why poverty remains prevalent in the United States.

This course examines the demographics of poverty and its concentration in central cities. In addition, definitions of poverty and public policies have affected neighborhoods, neighborhood-grounded grassroots action, and local neighborhood development initiatives.

A major focus of urban policy and grassroots action is the condition of suburbia as a particular American social and cultural landscape.

The course explores how suburbia was represented in cinema since the post-war period. Covering diverse selection of films and genre, the course examines how domesticity, family life, gender roles, race, suburbanization, domestic space and architecture have been in cinematic space. Drawing on historical and contemporary sources, the course places suburbia at the center stage and examines the relationship between cinema and suburban ideals and how cinema as a particular mode of representation has sought to address suburbia as a particular American social and cultural landscape.

The course will examine the process of globalization on cities and its policy implication. In particular, the course will explore how the impact of globalization on cities may be evaluated; what benefits or problems they produce and for whom. It will conclude by looking at how public policy professionals can influence these results.

This course looks at the public policy responses to climate change in a variety of contexts. Beginning with a discussion of the unique, global nature of the problem, the course looks at how international, national, and subnational governments have developed policies to mitigate greenhouse gas emissions as well as ways to build resilience in the face of changing climatic conditions. Special attention will be placed on the role of uncertainty and risk management in the policy making process with regard to climate adaptation. There is no prerequisite for this course.

This course examines the relationship between the city and cinema and explores how the city both real and ideal is represented in film. Covering a diverse selection of films, genres, and historical periods, the course critically explores the relationship between urban forms and cinematic representations.

This core course provides students a foundation of and some experience with the research methods used in public policy for collecting and conducting public policy analysis. This will include an overview of research designs and the variety of methods for conducting public policy analysis. Concepts of reliability and validity as well as the use of social scientific policy studies are used. The social science approach to conducting research on public policy is the focus.

This course focuses on writing of research questions and hypotheses, selection of appropriate quantitative statistical analyses for research questions, interpretation of statistical results, and communication of those results. A significant portion of the course work will involve doing statistical analyses of existing data using Statistical Package for the Social Sciences (SPSS). Students will prepare a substantial paper using the techniques for public policy analysis. Students majoring in PPS are encouraged to have completed PPS 205 before taking this course. This core course for PPS majors and minors should be taken before the senior year.

A major focus of urban policy and grassroots action is the condition of city neighborhoods. This course examines trends in urban policy as they have affected neighborhoods, neighborhood-grounded grassroots action, and local neighborhood development initiatives.

This course examines the demographics of poverty and its concentration in central cities. In addition, definitions of poverty and public policies aimed at alleviating poverty are explored with the aim of understanding why poverty remains prevalent in the United States.

This course examines the theories and models of public policy-making. It highlights how public policy is made and who participates in the process. It explores the important role of politics in public policy-making. American institutions and groups are highlighted as well as the unique role the media plays in the process. Students will also have a chance to analyze a public policy based on the diversity of public policy models.
PPS 302 | ENVIRONMENTAL MANAGEMENT AND POLICY | 4 quarter hours
(Undergraduate)
Students will explore the different environmental programs and policies. A portion of the course will examine the management of environmental programs and the role of regulations, adjudication, and policy tools available for making policy and managing the implementation of environmental programs. Students will analyze a specific environmental program in the government and evaluate its management. This course prepares students with a background for working in the environmental management field.

PPS 308 | INTRODUCTION TO NONPROFIT ORGANIZATIONS | 4 quarter hours
(Undergraduate)
This course provides an introduction to and overview of the most important skills needed in managing a nonprofit organization, and gives students a chance to practice those skills using contemporary and historical case studies. Topics covered include the history, scope, and significance of the nonprofit sector, theories of the nonprofit sector, law and governance, resource development and volunteer management, social entrepreneurship, marketing, external relations, the nonprofit life cycle, competition and collaboration, and relationships with business and government.

PPS 318 | PROGRAM DEVELOPMENT AND EVALUATION NONPROFIT ORGANIZATIONS | 4 quarter hours
(Undergraduate)
Every nonprofit organization (NPO) should measure its progress in fulfilling its mission, its success in mobilizing its resources, and its staff's effectiveness on the job. What about a program implemented by an NPO works? How does it make a difference? Who benefits most? And in what context? Program Development and Evaluation is a course that will introduce students to practical program planning, implementation and evaluation skills applicable to nonprofit organizations engaged in a variety of policy areas including emergency relief, service delivery, and policy & rights advocacy. The topics include identifying the problem, planning, implementing and evaluating a program. The course will examine both formative and summative evaluation, and why these components are so critical to measure the real success of an NPO in achieving its mission.

PPS 308 is a prerequisite for this class.

PPS 319 | FUNDRAISING FOR NONPROFIT ORGANIZATIONS | 4 quarter hours
(Undergraduate)
This course teaches students the theories and techniques of resource development and fundraising for nonprofit organizations. We discuss the fundraising tradition in the U.S., principal donor types, theories of donor behavior, and the organizational, legal and ethical contexts of fundraising. Students learn basic fundraising tools, including planning, grant writing, special events, major gifts, planned giving, and capital campaigns. Students work as volunteer consultants with nonprofit partners to analyze their current fundraising strategies and materials and help them develop new ones.

PPS 322 | FUNDAMENTALS OF HUMAN RESOURCE MANAGEMENT | 4 quarter hours
(Undergraduate)
This course explores human resource issues facing employees with supervisory responsibilities in public service organizations, including those working in the volunteer, non-profit, religious, government, and education sectors. The course considers human resource planning, employee recruiting and selection, and the motivation and evaluation of staff personnel and managers both individually and in teams. Topics include recruiting and selecting employees and managers, fostering team development, managing employee stress, preventing workplace violence, and handling issues pertaining to termination, training, and development. The course also explores progressive discipline and improving performance management of employees and volunteers.

PPS 329 | STRATEGIC MANAGEMENT AND PLANNING | 4 quarter hours
(Undergraduate)
Students learn how to apply strategic management and planning concepts and tools to public and nonprofit organizations to achieve goals and objectives in meeting service delivery missions, both domestically and internationally. The course focuses on analyzing the interaction of trends, market forces, stakeholders, and core competencies in developing visions and strategies for alternative scenarios.

PPS 330 | SUSTAINABLE DEVELOPMENT | 4 quarter hours
(Undergraduate)
Sustainable development has become a crucial concept in international initiatives worldwide. It attempts to foster policies that balance the need for economic development with practices that promote healthy communities and ecosystems. This course is based on the instructor's theoretical and practical experience gathered in developed and developing countries under market and command economies conditions. Special emphasis is placed on the role of institutions, both governmental and non-government, in shaping economic policies that are compatible with environmental health. The course pursues the objective of preparing students to understand main environmental problems and to generate solutions for these problems from a multidisciplinary perspective.

PPS 331 | ENVIRONMENTAL JUSTICE | 4 quarter hours
(Undergraduate)
The purpose of this course is to provide students with a historical background on environmental justice (EJ) in the US and an understanding of the current EJ movement. Policy debates surrounding EJ are highlighted from recent studies on determining ‘disproportionate impact’ to local EJ communities. In addition, students will experience the challenges of EJ organizations in Chicago through the service-based learning component of the course. Twenty-five hours of service learning is required for completion of this course.
PPS 332 | NATIONAL PARKS POLICY AND GOVERNANCE | 4 quarter hours  
(Undergraduate)  
This course focuses on the interrelationship between public policy, human values, and nature as displayed through environmental policy governing our national parks. Special attention is given to the cultural dynamics (including political and legal) that are demonstrated in how public policies have been created and implemented over time in regards to our national parks. The course reviews the policy literature and theories associated with the management of the national parks as it reflects our societal values of the time period. These policies have dramatically changed over time, so it is an ideal venue that demonstrates a significant change in how we view nature. The role of tourism, economic development pressures and property owners (takings) concerns will be included. Also, critical thinking about national parks policy will be required. This is taught as a hybrid course.  

PPS 333 | GREEN CITIES | 4 quarter hours  
(Undergraduate)  
This course looks at public policies pertaining to urban sustainability. Low-carbon transportation, green building policies, locally produced renewable energy, and storm water management policies are among the topics discussed.  

PPS 334 | SUSTAINABLE LAND REVITALIZATION AND BROWNFIELDS DEVELOPMENT POLICY | 4 quarter hours  
(Undergraduate)  
This course is focused on environmental public policy issues associated with Brownfields, Superfund sites, and an assortment of state and local land revitalization programs. Substantive emphasis includes examination of social problems and public policy impediments associated with the revitalization of neighborhoods. This course includes current public policy regulations and implementation guidelines to prepare students for working in this field.  

PPS 346 | ADVOCACY AND LOBBYING | 4 quarter hours  
(Undergraduate)  
Explores the roles of individuals and organizations in the public policy process, particularly as power arrangements facilitate or impede consensus building. Examines how legislation is written and how administrative rules are formed in government agencies. Special attention is paid to advocacy techniques such as lobbying, public education, and litigation.  

PPS 350 | ISSUES IN URBAN REDEVELOPMENT | 4 quarter hours  
(Undergraduate)  
The course examines the central issues in contemporary urban development: how urban restructuring, demographic shifts, new patterns of production and consumption, as well as technologically-grounded globalization processes, shape urban development. The course emphasizes the changing context of urban development policy and explores various critical approaches to interpreting urban development policy.  

PPS 351 | THE POLICY AND POLITICS OF URBAN HOUSING | 4 quarter hours  
(Undergraduate)  
The course looks at housing as a social symbol and material commodity, with particular emphasis placed on the role of government in the direct provision of housing and the indirect support of home ownership, as well as housing policies indirect impact on neighborhood development, race relations, and metropolitan suburbanization.  

PPS 352 | ISSUES IN URBAN EDUCATIONAL POLICY | 4 quarter hours  
(Undergraduate)  
This course examines the politics, history, and social context of urban education. Special attention is devoted to emerging policy alternatives such as the use of school vouchers and the formation of charter schools.  

PPS 353 | INEQUALITY AND PUBLIC POLICY | 4 quarter hours  
(Undergraduate)  
Many recent studies have detailed the significant growth in economic inequality in the United States, showing a level not seen since the 1920s. Others have focused on the consequences on significant inequality for a society and its politics. Often this inequality is seen as a necessary (and even desirable) consequence of a free market. This course focuses, however, on policy aspects of our current inequality: the public policies that have contributed to current levels of inequality, reasons for reducing inequality, and public policies that may reduce inequality. U.S. inequality and public policies will also be contrasted with those of similar nations, such as Germany and Nordic countries.  

PPS 358 | SPECIAL TOPICS IN NONPROFIT STUDIES | 4 quarter hours  
(Undergraduate)  
This course provides an in-depth examination of various issues in nonprofit management. It may be taken multiple times, each on a different topic.  

PPS 359 | SPECIAL TOPICS IN PUBLIC POLICY STUDIES | 4 quarter hours  
(Undergraduate)  
This course provides an in-depth examination of various public policy issues and be taken multiple times for each topic offered.  

PPS 360 | GREAT LAKES GOVERNANCE POLICY AND MANAGEMENT | 4 quarter hours  
(Undergraduate)  
The Great Lakes of the United States are a significant natural resource. This course will give an overview of the discovery, history, and policy development associated with the management and governance of the lakes. Students will research the different organizations involved with public policy of the lakes, as well as learn the legal framework in how they interact. This course takes an interdisciplinary approach to understanding the lakes.  

PPS 361 | PUBLIC SPACES AND SOCIAL CONTROL | 4 quarter hours  
(Undergraduate)  
Several contemporary trends have led city governments to emphasize policies to attract middle class residents, tourists, and conventions back to the city. These policies often include means of increasing social control over public spaces so that these users feel safe. Also, given fiscal constraints, many local governments see privatization of some public spaces, including neighborhoods, as a means of stretching limited dollars while providing needed services. Many commentators and scholars, however, are greatly concerned about the resulting changes in public spaces of urban areas. They write about Disneyfication of urban areas, commodification of culture, the city as spectacle or theme park, the city as fortress or panopticon, the restrictions of certain behaviors and publics in urban areas—in other words, the loss of public space. These issues and policies raise questions about the differences between public and private spaces, the role of public spaces in democratic governance, the definition/identification of “the public” and citizens, the use of private governments for social control, police strategies for social control, and the equity of social control efforts in and current use patterns of public spaces. Those issues are the focus of the course.
PPS 378 | URBAN RESILIENCE AND CLIMATE ADAPTATION POLICY | 4 quarter hours
(Undergraduate)
With more than half the global population living in cities and climate models projecting significant global warming over the next decades, local officials will be at the forefront of adapting to new climatic realities. This course looks specifically at municipal policies adopted to address climate adaptation and responses to other environmental and health stressors such as global pandemics. The course takes a global view, exploring policies from both the Global North and Global South as well as international networks of policy diffusion that facilitate cooperation between urban policymakers around the world.

PPS 393 | CAPSTONE: GENTRIFICATION | 4 quarter hours
(Undergraduate)
This course is designed to bring together much of the knowledge attained by Public Policy students during their four years at DePaul by focusing on the often contentious issues of urban gentrification and re-gentrification. Gentrification involves economic issues, political issues, environmental issues, educational issues, race and ethnicity, and equity issues as well. The course shall examine the variables associated with the process of gentrification, the advantages and disadvantages of that process, the winners and the losers in the process, and the political and economic implications of all of this.

Status as a Public Policy Studies major with Senior standing is a prerequisite for this class.

PPS 394 | CAPSTONE: GREEN INFRASTRUCTURE | 4 quarter hours
(Undergraduate)
This course is designed to integrate the two concentrations of the Public Policy major to address sustainable management of essential urban infrastructure systems, including stormwater management, energy production and efficiency, and urban forests. The course shall examine how municipal green infrastructure investment reflects larger social values and encourages students to examine the social forces that impact the efficacy of green infrastructure.

Status as a Public Policy Studies major with Senior standing is a prerequisite for this class.

PPS 397 | TRAVEL/STUDY | 1-4 quarter hours
(Undergraduate)
Travel/Study.

PPS 398 | INTERNSHIP | 4 quarter hours
(Undergraduate)
The course combines academic study with practical experience obtained through work in an off-campus internship setting. The internship course requires academic output in the form of a research journal, paper, or other project.

PPS 399 | INDEPENDENT STUDY | 4-8 quarter hours
(Undergraduate)
Independent Study.
