

COMPUTER SCIENCE + WRITING AND RHETORIC (BS)

The Computer Science + Writing and Rhetoric (BS) is a multidisciplinary degree that enables students to combine training in computer science with writing and rhetoric to become:

- Software developers with value-added capacity to write persuasively and precisely across a range of genres and contexts
- Writers who understand and contribute to technological applications, and who can communicate complex systems in accessible ways

A Computer Science + Writing and Rhetoric (BS) graduate will be ideally suited for many positions in writing and computer science. A richly interdisciplinary field drawing on humanistic and social science methodologies, rhetoric and writing studies will complement technical training in Computer Science with the capacity to assess and communicate in writing the ethical, cultural, and political affordances and constraints of social computing. With the ongoing intersection of social behaviors and computational systems, professionals with theoretical and practical capacity in both computer science and rhetoric and writing are well positioned to keep pace with technical developments in both computing and society.

Modern Language Requirement		
All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:		
placing into 104 or above on the DePaul language placement exam		
completing the last course or earning AP or BI credit for the last course in the first-year college sequence of any language (e.g., 103 for DePaul language classes)		
completing a college course or earning AP or IB credit for a college course beyond the first-year level in any language (e.g., 104 or above for DePaul language classes)		
completing the final course of a four-year sequence of the same modern language in high school *		
completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)		
completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)		
*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language at the proper level.		
Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.		
Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.
