

# FINANCE (MSF) ONLINE

The Master of Science in Finance program provides students with the real-world skills necessary to succeed as finance professionals. Students develop a deep understanding of modern financial markets along with the instruments and tools used in the industry. In addition to acquiring a conceptual foundation, students learn to develop strategic financial objectives, improve investment decisions, design financial instruments, manage corporate risk and seize new business opportunities.

## Program Features

Through the MS in Finance program, students will develop skills in:

- Financial decision-making techniques and strategies.
- Creating and developing solutions to complex financial problems.
- Designing, using and evaluating financial tools and instruments.
- Developing proposals for profitability and productivity.
- Outlining and identifying strategic financial objectives.
- Risk analysis.

The MS in Finance program is offered at DePaul's Loop Campus, in the heart of Chicago's financial district, allowing students to learn in the setting in which they will be working. Students will be encouraged to complete an internship and participate in extracurricular activities and seminars around Chicago.

Program Requirements	Quarter Hours
Introductory Requirements (waived with applicable prior credit): Candidates are expected to demonstrate competency in principles of financial accounting, economics, and statistics prior to enrollment in the program. Students who have not demonstrated these competencies through previous coursework are required to achieve these competencies prior to registration for the core classes.	
Degree Requirements	48
<b>Total hours required</b>	<b>48</b>

## Learning Outcomes

- Acquire both knowledge and skills that are broad, deep, and necessary to fulfill their professional goals.
- Use analytical and decision-making skills to solve problems encountered by business and investors.
- Apply financial theory to solve a variety of problems in investment management, risk management, and in corporate finance.
- Produce a coherent written statement of the analysis of a complex business issue.
- Understand and solve problems encountered by a multinational business.
- Develop the foundation to think about and address ethical issues in the context of financial markets and institutions.

## Degree Requirements

### Course Requirements

The MS in Finance program requires a minimum of 48 credit hours subject to the prerequisite requirement.

### Prerequisites for the MSF Program

Students complete the Master of Science in Finance by taking six core courses and six elective courses in addition to the program prerequisites.

Candidates are expected to demonstrate competency in principles of financial accounting, economics, and statistics prior to enrollment in the program. Students who have not demonstrated these competencies through previous coursework are required to achieve these competencies prior to registration for the core courses.
