

GAME DESIGN (BS)

The BS in Game Design prepares students to become storytellers, critical thinkers, entrepreneurs, and leaders in the field of games. Students collaborate in interdisciplinary teams with programmers, artists, and musicians to master the iterative development process and create polished experiences. Students build a portfolio showcasing their skills developing AAA, indie, and art games, as well as transformative play experiences on established and emerging platforms including augmented and virtual reality, tabletop, and physical technology.

Learning Outcomes

Students will be able to:

- Collaboratively generate ideas, share them and assess their inherent risks and scope.
- Translate game ideas into prototypes; iteratively develop prototypes until they are viable and playable.
- Evaluate games with users using multiple common games user research methods.
- Manage the pipeline for games, effectively evaluating the impact of potential changes.
- Develop a foundational literacy and confidence in reading, writing, and modifying computer programs and scripts.
- Clearly communicate and establish the vision for a game's experiential goal by taking formal and dramatic game elements into account.
- Intentionally craft experiences that leverage and develop the unique affordances of games as an artistic medium.

Note

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by

the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit.

This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.
