

HEALTH SCIENCES (BS) + GENERALIST NURSING (MSN) MASTER'S ENTRY TO NURSING PRACTICE

Strong students interested in pursuing degrees in Health Sciences and Nursing at the Master's level can fast-track their education through this unique combined Bachelor's + Master's degree program, completing both degrees in five years and saving time and tuition. Students complete 36 graduate credit hours as undergraduates that count toward both degrees. To apply, students must be in the Pathways Honors Program (<https://catalog.depaul.edu/colleges-schools/science-health/#specialprogramstext>) and should consult their academic advisor by the end of freshman year to ensure that their coursework is completed properly. Due to the program structure, students with significant transfer credit are not eligible. Please see the Health Sciences (BS) (<https://csh.depaul.edu/academics/health-sciences/undergraduate/health-sciences-bs/Pages/default.aspx>) and Generalist Nursing (MSN) (<https://csh.depaul.edu/academics/nursing/graduate/nursing-menp/Pages/default.aspx>) [Master's Entry to Nursing Practice, MENP] pages for information on the requirements for both programs.
