

# NEUROSCIENCE (BS) + OCCUPATIONAL THERAPY (MS)

---

Students interested in pursuing degrees in Neuroscience and Occupational Therapy may do so through this unique combined program which may be completed in just over five years. Interested students apply to enter the Occupational Therapy program in the College of Science and Health in their first year of study and if accepted, they begin coursework in Occupational Therapy in their fourth year. Students will pursue this path using the Accelerated 3+ Pre-Health/Occupational Therapy Concentration, Neuroscience (BS) (<https://catalog.depaul.edu/programs/neuroscience-bs/pre-health-concentration-occupational-therapy-combined-neuroscience-bs/>). See the Neuroscience (BS) and the Occupational Therapy (MS) (<https://catalog.depaul.edu/programs/occupational-therapy-ms/>) catalog pages for more detail.
