Honors Senior Thesis Option

Students who choose to complete an Honors Senior Thesis must have their project approved at least one term prior to executing the project. To gain approval for a senior thesis, students must complete an online application, including a project proposal, signed by two faculty advisors. In keeping with the interdisciplinary nature of the program, the thesis should attempt to move outside the boundaries normally associated with one particular discipline and should be supervised by two faculty members from different academic fields. While the final product must be a substantial piece of work building on the student's accumulated

knowledge and new research, specific requirements for each thesis will depend on the nature of the project. See the Honors director or associate director for further information.

Study Abroad

Study Abroad is particularly appropriate for students in the Honors Program and, though not required, is strongly recommended. Honors students interested in Study Abroad should plan to participate during their sophomore or junior year and should make certain that they have fulfilled appropriate modern language requirements before that point in their undergraduate careers. They should meet with the Honors associate director prior to their departure for pre-approval of course substitutions. Coursework completed abroad may substitute for Honors Approved Electives or selected Honors core courses that are equivalent to the study abroad course.

Honors Advising

All Honors students will work with an Honors advisor for academic planning and to schedule Honors courses in conjunction with their major requirements. As a general rule, Honors students take one or two Honors courses each quarter during their first and second years of study and one or two Honors courses a year in the junior and senior years.
