PURPOSES

The Liberal Studies Program at DePaul is the portion of the curriculum in which all undergraduate students participate, no matter what their college or major. It is central to all undergraduate degrees at DePaul because it accomplishes two purposes that the University considers essential to a liberal education. These purposes are, first, to bring the student to engage, as a matter of habit, in reflective intellectual activity and, second, to bring the student to an awareness that questions of value underlie all human activities.

Reflectiveness and value-consciousness are the conditions of intellectual freedom. They make explicit the spiritual dimension which underlies the university's concern for the human person. That dimension is the potential of human beings to discover, create, and inhabit worlds of meaning and significance. Only reflective persons who are deeply concerned with the value of various human enterprises can fully discover the spiritual dimension of their lives.

Ordinarily, reflection arises in the attempt to resolve concrete issues, problems, and conflicts or in the effort to explore the nexus between information, ideas or events, and their significance. But as an expressly liberating activity, reflection pushes forward to explore the modes of inquiry, the processes of learning, and the instruments and ends of knowledge. Through reflection a student does not merely engage in a range of intellectual activities but examines them and explores their possibilities. At this level, the student becomes not only a critical thinker but a self-critical thinker as well.

Such reflection grants the insight upon which freedom depends. A curriculum which persistently encourages reflection enables students to become self-critical, self-directing, and autonomous thinkers. Such students do not engage in intellectual activity haphazardly or from mere habit, but deliberately, and with a perception of its powers and limitations. And, since students begin with such knowledge, they are capable of modifying, augmenting, and transforming the activity in which they are engaged.

DePaul takes the position that students must grapple with value issues in all areas of their undergraduate education. Consistent with its emphasis on the dignity of the person, DePaul insists that the development of a value consciousness occur in a context which acknowledges the plurality of world views and value systems available to students in a contemporary society and which respects the student's right to choose freely but thoughtfully among them.

Since DePaul is a Catholic university, the consideration of religious world views and ethical values is given a prominent place in undergraduate education. However, the student's awareness of a value dimension to human life, of alternative value systems, and of the steps necessary to choose wisely among them is developed in several distinct but interrelated areas: religious and philosophical, societal and personal, intellectual, ethical, and aesthetic.

At the same time that the Liberal Studies Program stresses reflective-ness, value-consciousness, and critical inquiry, it also encourages students to become active participants in the exploration and discovery of knowledge. It does so, in part, through courses that enhance student awareness of diverse communities and the everyday issues, experiences, contributions and concerns of different peoples and cultures, both historical and living. In pursuit of these ends, students learn in many ways: through reading, writing, dialogues, first hand observation and participation, quantitative and qualitative research, and other creative activities. Although disciplinary knowledge is central to the Liberal Studies Program, student awareness of interdisciplinary perspectives and ways of knowing is also encouraged.

THE CURRICULUM

There are two components to the Liberal Studies Program. The first, called the Common Core, emphasizes communication, quantitative and intellectual skills, as well as an introduction to the urban and Vincentian nature of the university. Integration of the general education program is further enhanced by a series of common experiences throughout the student's educational career. These experiences include the First Year Program; the Sophomore Seminar on Multiculturalism in the United States; the Junior Year Experiential Learning requirement, and the Senior Year Capstone Seminar.

The second part of the program, called Learning Domains, is concerned mainly with the subjects that make up the conventional liberal arts and sciences curriculum. Breadth of learning is assured by asking the student to do course work in six Learning Domains: Understanding the Past (UP); Scientific Inquiry (SI); Religious Dimensions (RD); Philosophical Inquiry (PI); Self,

Society, and the Modern World (SSMW); and Arts and Literature (AL).

These domains of the Liberal Studies Program represent possible ways of grouping the various inquiries found in the university. They identify and focus attention on areas of inquiry in which significant similarities are to be found, though not all activities carried on within a domain are identical. A liberally educated person is someone who has some experience, both practical and theoretical, with the diversity and range of inquiry represented in the university community. These particular domains facilitate that experience. They represent society's intellectual life in its theoretical, practical, and artistic moments. Through the programs of study within the domains, students are required to create or discover, however provisionally, a map of the intellectual world.

Finally, pre-collegiate skills in communication and computation are a prerequisite for domain study. Some students are therefore required to take certain skills courses before they begin the Liberal Studies Program. Moreover, since these generic skills are an integral part of all college work, it is one of the characteristics of the Liberal Studies Program that all courses seek to further develop these skills.

PROGRAM REQUIREMENTS

The principle of adapting the Liberal Studies Program to the interests and academic requirements of the individual student extends to the number of hours (or courses) required of any student in the program. Given that all students do not seek or need the same preparation in liberal studies, the length of the program varies according to the nature of the student's degree. Consequently, the number of courses required of a student in the School of Music and The Theatre School is less than the number required in the College of Liberal Arts and Sciences, the School of Education, the College of Commerce, and the School of Computer Science, Telecommunications and Information Systems.

Students should consult the bulletin for a description of the particular requirements of their College or School as well as their individual departments.

Regardless of the number of courses required, the integrity of each student's liberal studies program is maintained. All liberal studies programs are of sufficient length to ensure that the several purposes of liberal education and the distinctive purposes of DePaul are adequately served.

MODERN LANGUAGE OPTION

Students who wish to study a Modern Language may do so for Liberal Studies Program credit. Those who begin the language at the introductory or intermediate level must complete a three-course sequence for liberal studies credit. Students who begin their work at DePaul with 200- or 300- level language courses may complete one or two courses for liberal studies credit.

Students who complete a three-course sequence may substitute two of the three courses for Liberal Studies Program credit. Students can select one course each from two of the following Learning Domain combinations: arts and literature or scientific inquiry (cannot substitute for the lab science requirement); philosophical inquiry or religious dimensions; self, society and the modern world or understanding the past. The third course of the sequence fulfills open elective credit. Students interested in this option should consult the listing for their college or school in this bulletin to determine the Liberal Studies Program courses for which the Modern Language Option will substitute.

Note: The Modern Language Option may not be used to meet the language requirement for Bachelor of Arts students in the College of Liberal Arts and Sciences or School of Education. It may be used for advanced study once the requirement is met. The introductory language sequence will not fulfill the Modern Language Option and will not be counted for Liberal Studies Program credit for students who are native speakers of the language. The intermediate sequence will not fulfill the Modern Language Option and will not be counted for Liberal Studies Program credit for students who are native speakers of the language unless the chair of the Modern Languages Department so recommends. Interested students should contact their academic advisor or their college office for information concerning the regulations and procedures governing the exercise of this option.

COMMON CORE

The Common Core is a series of experiences throughout the Liberal Studies Program that emphasizes communication, quantitative and intellectual skills, as well as an introduction to the urban and Vincentian nature of the university. The Common Core begins with the First Year Program, followed by a Sophomore Seminar on Multiculturalism in the United States, a Junior Year Experiential Learning requirement, and a Senior Year Capstone Seminar.

The First Year Program has two overarching goals: introducing students to the process of intellectual inquiry as it is practiced in a university, and community building. The First Year Program consists of Discover Chicago, Explore Chicago, Focal Point Seminars, Quantitative Reasoning and the Composition and Rhetoric Sequence. **Students taking ENG 103 and/or ENG 104 at DePaul must receive grades of C- or better in order to fulfill the Liberal Studies requirement.**

Students will select a Sophomore Seminar on Multiculturalism in the United States from a list of offerings (see class schedule for current offerings). Sophomore seminars address more than one of the following topics: race, ethnicity, class, gender, language, religion, and sexual orientation.

The Experiential Learning component, although recommended for the junior year, can take place in any one of the years when it is appropriate. This requirement can be met in one of the following ways providing it is approved by the university: study abroad, domestic study, service learning, internship, or individual or group research projects involving extensive field work or work in the laboratory.

The Senior Year Capstone course provides students with the opportunity to integrate and reflect upon the diverse components of their education. Students will have the opportunity to connect their major field of study with broader issues raised in the general education process. Students must earn a grade of C or better in the senior year capstone course.

FIRST YEAR PROGRAM

ISP 101	Focal Point Seminars
ISP 102	Explore Chicago
ISP 103	Discover Chicago
ISP 120	Quantitative Reasoning
ENG 103	Composition and Rhetoric I
ENG 104	Composition and Rhetoric II

SOPHOMORE SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Students are required to take an approved Liberal Studies Program course that addresses some dimension of multiculturalism in the context of the United States. Multiculturalism includes issues and topics such as ethnicity, race, class, gender, language, religion, and sexual orientation. These courses generally include the examination of the history of multiculturalism and the experiences and perspectives of different cultural groups. They enable students to develop a critical perspective about the meaning of multiculturalism and provide an understanding of the historical and/or contemporary manifestations of inequality. They also examine the contributions of different cultural groups to the ongoing development of the American experience and American society and culture. Courses are identified in the schedule as ISP 200.

TOPICS OFFERED IN THE PAST INCLUDE:

American Autobiography
American Political Culture
American Urban History
Asian-American Experiences in the US
At Home and Abroad: Exploring the Changing Definitions of Ethnic Identity through Plays where Characters Travel from America to their "Countries of Origin"
Black American Music Culture: Traditions/Innovations
Border Cultures

Building through Resistance: Religions of Colonized People
Catholic Diversity in American Culture
Civil Rights on Film
Community and Society
Cultural Diversity in the United States
Cultural Issues in Psychology
Culture and Religion
Culture in Conflict
Culture-Quests in Literature and Film
Dealing with Group Diversity
Diversifying the Stage
Diversity Among the Arab Communities in America
Diverse Values and Voices in Education
Diversity and Equal Protection Under the Law - Racial Minorities, Women, Gays and Lesbians
Diversity in American Families
Diversity in the Work Place
Domestic Groups, the United States and the World
Ethical Worlds: Moral Issues Across Cultures
Ethno-Cultures in Cyber Space
Gay and Lesbian America from the Forties to the Nineties
Gender and Diversity
Gender and Society
Historical Roots of Group Diversity
History of American Religion
History of Chicago 1800-1945
History of US Women to 1860
Immigrant or Aliens: The Other in America
Issues of Difference in Education
Latina Perspectives in the United States
Latino/as in the United States: the Construction of Latino Communities Perspectives on America
Latino Communities
Life on the Hyphen
Literature and Identity: Women's Literature
Love, Beauty, and Friendship: Women's Cross Cultural Perspectives
Multicultural Comic Books: Verbal and Visual Subculture
Multicultural Issues in US Women's History
Multicultural Literacy and the American Novel
Multiethnic Comedy
Multicultural Theater: Diverse Voices from 1968 to Today
Multicultural Voices in American Literature
Multiculturalism and Democracy
Multiculturalism and Education
Multiculturalism in Contemporary Art
Music of the World's People
Native Americans: Their Struggle to Have a Place in the United States Culture
Organizational Communication Assimilation
Parenting in Multicultural Family Systems
Performing Identity/Performing Culture
Philosophic Approaches to Multiculturalism
Political Socialization
Race, Ability and Class
Race and Ethnic Relations
Race, Identity, and Culture--Womanists and Feminists of Color
Red, White, and Black: Culture and Conflict in North America, 1500-1763
Religious Worlds in Comparative Perspective
Sex and Power in American Politics
Southern Cultures after the Civil War
The American Religious Experience
The Immigrant Experience
The Urban Experience
Urban Diversity in the USA

War, Social Justice and Diversity
Wellness, Disease and AIDS in Cross Cultural Perspective
White Racism
White Studies and Eradicating White Racism
Women Writers of Color
Women in the US, 1860-Present

JUNIOR YEAR EXPERIENTIAL LEARNING

The Experiential Learning requirement engages students in the first-hand discovery of knowledge through observation and participation in activities, most often in field-based settings outside the classroom. This inductive process of “learning by doing and reflecting” is supported by theory based information. In these courses, students will search, order, compare and analyze information which will result in the discovery of knowledge about issues, problems, ideas, communities, as well as their personal and intellectual relationship to the same.

Experiential learning work may take place in a regularly scheduled course or an approved internship, or in an independent study format approved on a case-by-case basis. All such courses may be offered in the student’s major and can count for both major field and Liberal Studies requirements. Students who elect this option will substitute a Liberal Studies domain elective (from outside the students' major field area) for the Experiential Learning requirement. When more than four credit hours are earned from such an experience – for example, an eight-hour internship – four hours may be counted toward Liberal Studies requirements and four hours toward major program requirements. Any work that meets the experiential learning requirement must be approved by the Liberal Studies Council.

The Experiential Learning component is recommended for the junior year because much of the learning necessitates foundational knowledge and the ability to manage the independence essential for such an experience.

FORMS OF EXPERIENTIAL LEARNING

Study Abroad: Study Abroad programs emphasize social, political, historical and cultural understanding through a total immersion into the life and culture of a foreign country. Study trips abroad range in duration from two weeks to a full academic year. Domestic Study: Domestic study courses offer students the opportunity to learn more about the United States in a geographic location outside Chicago.

Community-based Service Learning: Community-based Service learning courses provide students with the opportunity to work with a community organization or agency and to reflect upon what they have learned through this service in class discussions. Information on service learning opportunities is available through DePaul’s Steans Center for Community-Based Service Learning Center. See current schedule for a list of departmentally based offerings.

Internships: Internship courses offer students the opportunity to experience and reflect on the hiring process, work activities, communication and culture of businesses or organizations. Students who apply and receive internship opportunities through the University Internship Program will register for ISP 250. In addition some colleges and departments offer 200-level and 300-level internships that will satisfy the experiential learning requirement.

Individual or group research projects: These research projects involve extensive field or laboratory work. The projects are supervised, evaluated and graded by a faculty member. Please see class schedule for current offerings.

EXPERIENTIAL LEARNING COURSE LIST

AMERICAN STUDIES

AMS 300 Domestic Studies
AMS 392 Internship in AMS

ANTHROPOLOGY

ANT 390 Cultural Politics of Transnational Labor

WMS 318 A History of Feminism - Service and Activism

SENIOR YEAR LIBERAL STUDIES CAPSTONE

Students are required to take a Liberal Studies Capstone course in their major field during their senior year. Some Liberal Studies Capstone courses may be offered jointly for students in related majors and fields of study. These courses provide students with an opportunity to integrate their major area of study with broader issues raised in their general education program. These courses do not replace capstone experiences in the major field whose purpose is bringing some degree of integration or closure to the student's major field of study alone. Rather, the Liberal Studies Capstone experience allows students to see the relationship of ideas, perspectives, and substantive areas of scholarship and creative work within their major field and those learned through their course work in the learning domain courses and other courses and experiences of the Liberal Studies Program.

LEARNING DOMAINS**ARTS AND LITERATURE**

Courses in the Arts and Literature domain ask students to extend their knowledge and experience of the arts while developing their critical and reflective abilities. In these courses, students will interpret and analyze particular creative works, investigate the relations of form and meaning and through critical and/or creative activity come to experience art with greater openness, insight and enjoyment. These courses focus on works of art or literature as such, though the process of analysis may also include social and cultural issues. Work in this domain includes literature, the visual arts, media arts, the performing arts, music and theater.

Students will complete three courses in this learning domain, with not more than two courses coming from the same department or program.

For course descriptions see individual department listings.

PHILOSOPHICAL INQUIRY

Courses in the Philosophical Inquiry domain address conceptual issues fundamental to reflection on such philosophical topics as metaphysics (e.g., being and nonbeing, the one and the many, the nature of reality, same and other, self and other); epistemology (e.g., the nature and possibility of knowledge, different ways of knowing, knowledge vs. opinion, truth and falsity); ethics (e.g., right and wrong action, good and bad, objectivism and relativism in ethics, social and political philosophies, the idea of value, the problem of evil); and aesthetics (e.g., the nature of beauty, aesthetic value, the possibility of aesthetic valuation). Courses address questions of how philosophical topics such as those indicated above impinge upon, shape, and challenge student lives. Students will take two courses in this domain.

For course descriptions see individual department listings.

POLITICAL SCIENCE

PSC 230	Classic Political Thought
PSC 231	Modern Political Thought

RELIGIOUS DIMENSIONS

Courses in the Religious Dimensions domain offer students the opportunity to explore the explicitly religious dimensions of life and culture. These dimensions are found in the culturally embedded narratives, beliefs and practices of particular religions, as well as in encounters with realities perceived to be ultimate or sacred. Through myth, symbol, ritual and doctrine, these religions not only provide order and meaning, they also carry capacities to challenge and transform individuals and societies. Intellectual and social maturity requires understanding the unique contributions, both positive and negative, of the religious traditions of the world to culture and consciousness. It also requires coming to terms with questions of ultimacy. This Learning Domain offers courses with a comparative, thematic or ethical focus, as well as courses in specific traditions.

Students will take two courses, in any order, in this Learning Domain. One course will be selected from the category of Patterns and Problems. Another course will be selected from the category Traditions in Context.

For course descriptions see individual department listings.

SCIENTIFIC INQUIRY

Courses in the Scientific Inquiry domain are designed to provide students with an opportunity to learn the methods of modern science and its impact in understanding the world around us. Courses are designed to help students develop a more complete perspective about science and the scientific process, including: an understanding of the major principles guiding modern scientific thought; a comprehension of the varying approaches and aspects of science; an appreciation of the connection among the sciences and the fundamental role of mathematics in practicing science; an awareness of the roles and limitations of theories and models in interpreting, understanding, and predicting natural phenomena; and a realization of how these theories and models change or are supplanted as our knowledge increases. Students will take three courses in this learning domain. The Quantitative Reasoning course (or placement out of the course through the placement tests) is a prerequisite for all courses in this domain. Students must complete at least one course with a laboratory component and at least one course with a strong quantitative component. A course listed as laboratory/ quantitative will fulfill a student's laboratory or quantitative requirement, not both. **Students may use the full year-long sequences in biology (BIO 101, 102, and 103) , chemistry (CHE 111, 113, and 115 OR CHE 171, 173, or 175), or physics (PHY 150, 151, and 152 OR PHY 155 and 156) to fulfill this requirement. Otherwise, at most 2 courses can come from the same department or program.**

For course descriptions see individual department listings.

PHY 204	Frontiers of the Universe

SELF, SOCIETY AND THE MODERN WORLD

Courses in the Self, Society and the Modern World domain focus on the mutual impact of society and culture on individuals and of individuals on society and culture. Particular attention is given to human relationships and behavior as they are influenced by social, economic and political institutions, spatial and geographical factors, and the events and social and cultural forces of modernity. This Learning Domain is concerned with such issues as the role of power and the bases of inequality in society and in international relations. It examines individual cognition, feelings and behavior as they affect the well-being of members of society, relationships and collective life. The domain examines the processes of human development and learning and the importance of culture in everyday life. It emphasizes the pursuit of knowledge on such matters through the development of theory and the application of methods of inquiry that draw on the empirical investigation of the modern world. Courses in the domain explore such particular issues as poverty and economic opportunity, the environment, nationalism, racism, individual alienation, gender differences, and the bases of conflict and consensus in complex, urban societies and in global relations.

Students will complete three courses in this Learning Domain, with not more than two

courses coming from the same department or program.
For course descriptions see individual department listings.

COURSES

AFRICAN AND BLACK DIASPORA STUDIES

WMS 307	Beyond the Veil: Women in the Middle East
WMS 326	Women and Law
WMS 342	Gender and Life Narrative Research
WMS 390	Women Across Cultures

UNDERSTANDING THE PAST

Courses in the Understanding the Past domain study human life in past societies (primarily pre-1945) as a process of continuity and change over time. Many of the documents that mediate the past to us have considerable aesthetic or intellectual value in and of themselves. However, courses in this Learning Domain will examine texts, art works, and other forms of evidence less for their aesthetic or intellectual value than for their usefulness as tools for reconstructing aspects of the past and building sensible, defensible, and well-informed historical interpretations about the past and about causation in the past.

Students are required to take two courses in this Learning Domain. One course must focus primarily on the period before 1800 and one course must focus primarily on the period after 1800. Students must also select their two courses from two different geographic categories. The five categories are: 1) Asia; 2) Latin America; 3) Africa; 4) North America or Europe; and 5) intercontinental or comparative history.

For course descriptions see individual department listings.

PRE-1800

Africa **HISTORY**

HST 227	Africa to 1800: The Age of Empires
HST 290	Ancient Egypt
HST 291	The Fertile Crescent: Mesopotamia and Beyond

Asia

HISTORY

- HST 230 Politics and Culture in Medieval Japan
 HST 232 Culture and Politics in Imperial China
