Under Construction

Accountancy (BSB)

The objectives of the Bachelor of Science in Business with a major in Accountancy are to provide students with a solid foundation in the theory, principles, and procedures of the discipline and professional practice of accountancy, including the study of financial, managerial and tax accounting as well as auditing and systems; to encourage and prepare students for professional certification; to foster an understanding of the profession of accountancy and its role in modern business environments; and to develop an awareness of the need for continuing intellectual development through either professional or academic means.

**Learning Outcomes**

**Core Outcomes**

- Use analytical and reflective skills in decision making.
- Communicate effectively both orally and in writing.
- Recognize legal and ethical issues confronting them.
- Contribute to the performance of a group within a business setting.
- Know the differences among global economies, institutions, business practices and cultures.
- Acquire knowledge of the functional areas of business and the interrelationships among the functional areas within a business.

**Program Specific Outcomes**

Students will be able to:

- Apply and explain the application of accounting standards and regulation, and where appropriate international accounting standards.
- Communicate effectively both orally and in writing.
- Use research databases to research accounting issues.
- Apply accounting knowledge in new and unfamiliar circumstances.
- Use technology and data analytics to facilitate accounting and auditing decisions.

**College Core Requirements**

**Business Core Requirements**

All undergraduate students in the Driehaus College of Business complete foundational courses in the areas of analytics, accountancy, mathematics, economics, business law, finance, management, management information systems/computer science, and marketing.

**Course Requirements**

For a student to complete the Bachelor of Science in Business, the following Business Core courses totaling at least 70.0 hours are required:

<table>

Professional Writing
Select one of the following:  2-4
WRD 202  PROFESSIONAL WRITING FOR BUSINESS (2.0 quarter hours)

WRD 204  TECHNICAL WRITING
WRD 206  PROFESSIONAL WRITING

1 Strobel students take specially designated sections of all required ACC classes, including ACC 101 and ACC 102 (excluding ACC 250).
2 Students majoring in accounting (primary or secondary/double major) are allowed to substitute ACC 370 in place of BLW 201. Hospitality Leadership majors must take HSP 207 for the Business Law requirement; use of HSP 207 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete both HSP 207 and BLW 201.
3 Finance majors, Finance secondary/double majors, Finance Honors majors, Finance Honors secondary/double majors, and Actuarial Science majors must take FIN 320.
4 MGT 301-H is required if pursuing the Management Honors Program.
5 MIS majors and minors must take MIS 140.
6 Actuarial Science and Economic Data Analytics majors must take CSC 241.
7 Entrepreneurship majors and minors must take ICS 394.
8 A course taken for Global Business Perspective that is in a student’s major or minor field must be completed with a minimum grade of C-.

Business Ethics
All undergraduate students in the Driehaus College of Business complete a course in Business Ethics. It is recommended students take MGT 248 or PHL 248 in Philosophical Inquiry or MGT 228 or REL 228 in Religious Dimensions in the Liberal Studies Program (or University Honors Program) Requirements.

Second Majors and Minors
The addition of a second major or minor may affect the Business Core classes required for a student. Meet with an academic advisor to confirm requirements.

Math Requirements for all business majors (except Actuarial Science majors)
- MAT 137 may be replaced by MAT 348 or MAT 351.

Grade Minimum Requirements for Accountancy Major
A minimum grade of C- is required for the following: ACC 101, ACC 102, ACC 370 (if taken), BUS 102, ECO 105, ECO 106, MAT 137, and the course in Professional Writing.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Learning Domains

Arts and Literature (AL) (p. 1300)
  • 3 Courses Required

Historical Inquiry (HI) (p. 1304)
  • 2 Courses Required

Math and Computing (MC) (p. 1306)
  • Not Required

Philosophical Inquiry (PI) (p. 1307)
  • 2 Courses Required

Religious Dimensions (RD) (p. 1308)
  • 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
  • 1 Lab Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
  • 1 Course Required

1 PHL 248/MGT 248 is required in PI or REL 228/MGT 228 is required in RD.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

Course Requirements

In addition to ACC 101 and ACC 102, a student majoring in Accountancy is required to complete the following courses totaling at least 46.0 hours:

1 Students majoring in accounting (primary or secondary) are allowed to substitute ACC 370 in place of BLW 201.

Career Management Course

Students are required to complete the Career Course (250) associated with the major. Students who double major may choose the Career Course (250) associated with either major provided that hours for graduation are satisfied.

Open Electives

Open elective credit (4.0 hours) is needed to meet the minimum graduation requirement of 192 hours.

Financial Reporting Course

Students who have taken the financial accounting course, ACC 307-H taught within the finance cohort are exempt from taking the financial accounting course ACC 304.

Graduation Requirements

All Accountancy (ACC) courses and any courses used toward the Accountancy major must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

Concentration Requirements

A concentration provides focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students may choose the following:

• Accountancy (BSB), Internal Audit Concentration (p. 46)
**Sample Schedule**

Students majoring in Accountancy are encouraged to take the required courses in the following order:

<table>
<thead>

</table>

1. replaces ACC 372, prerequisite ACC 305
2. replaces ACC 374; prerequisite ACC 372
3. replaces ACC 350; prerequisite ACC 305 and ACC 380

These courses are offered every quarter except summer and may be taken at any time providing prerequisites have been met. These courses must be taken in-person and not online.

**Graduate Year**

Upon completion of the bachelor's degree, students complete the remaining master's degree requirements.

1. Visit the MSAA degree requirements (p. 174) in the course catalog for more information.

**Admission Requirements**

Current DePaul accountancy majors who meet the following criteria may apply to this program:

- Junior standing or higher (at least 88.0 credits)
- A minimum cumulative DePaul grade point average of 3.200
- A minimum Accountancy (ACC) grade point average of 3.000
- B or higher in each of the three graduate classes taken during senior year

Students should apply for admission while enrolled in ACC 305.

Students must maintain the same GPA standards above by the end of senior year to continue into the MSAA program.

To apply to the program, go to [https://grad.depaul.edu/apply](https://grad.depaul.edu/apply).

- Select Audit and Advisory Services-Combined
- Select the term you plan to begin the master's degree after finishing your bachelor's degree. This term can be changed at a later date if your plans change.
- Not required: GMAT exam, personal statement, recommendations, and application fee.
- You may upload your unofficial transcript available through Campus Connect.
Accountancy (BSB) + Taxation (MSTAX)

The Combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The Combined BSB-Accountancy + MS Taxation Program allows accountancy majors to complete a bachelor’s degree and a Master of Science in Taxation (MSTAX) degree in as few as five years.

The Master of Science (MS) in taxation is an integrated program of study that provides the foundation for exceptional performance and leadership in the field of taxation.

One of the first MS in taxation programs in the United States, DePaul’s program is structured for working professionals to enhance understanding and analysis of complex tax statutes, tax regulations, related cases and rulings, and the Internal Revenue Code.

MS in taxation students gain technical competencies; analytical, communications and interpretive skills; and leadership abilities that prepare them to add value at the highest levels in their firms, businesses and organizations.

Classes During Senior Year
In this program, students will take three graduate classes during their senior year. These three classes will count toward both the bachelor’s degree and master’s degree as indicated below.

<table>
<thead>
<tr>
<th>Course</th>

<td>4</td>
</tr>
<tr>
<td></td>
<td>or ACC 566 FEDERAL INCOME TAX PROCEDURES</td>
<td></td>
</tr>
</tbody>
</table>

1 replaces ACC 383; prerequisite ACC 380
2 replaces ACC 350; prerequisite ACC 551

These courses must be taken in-person and not online.

Graduate Year
Upon completion of the bachelor’s degree, students complete the remaining master’s degree requirements.

Visit the MS Taxation degree requirements (p. 1116) in the course catalog for more information.

Admission Requirements
Current DePaul accountancy majors who meet the following criteria may apply to this program:

• Junior standing or higher (at least 88.0 credits)
• A minimum cumulative DePaul grade point average of 3.200
• A minimum Accountancy (ACC) grade point average of 3.000
• B or higher in each of the three graduate classes taken during senior year
• B or higher in ACC 380

Students should apply for admission while enrolled in ACC 380.

Students must maintain the same GPA standards above by the end of senior year to continue into the MST program.

To apply to the program, go to https://grad.depaul.edu/apply (https://grad.depaul.edu/apply/).

• Select Taxation – Combined Degree
• Select the term you plan to begin the master’s degree after finishing your bachelor’s degree. This term can be changed at a later date if your plans change.
• Not required: GMAT exam, personal statement, recommendations, and application fee.
• You may upload your unofficial transcript available through Campus Connect.

Accountancy (BSB), Internal Audit Concentration
Available to students majoring in Accountancy, the optional concentration in Internal Audit prepares students to meet the challenges of the profession and provides them with knowledge of the internal audit function that is becoming increasingly important in the global business community. Students experience rigorous classroom learning designed to deliver the knowledge and practical skills they’ll need to succeed during the first years of their careers including: oral and written communication, understanding of internal audit’s role of providing objective assurance of key governance, risk management, and compliance processes, use information technology processes and controls in the assurance function, and development of teamwork and leadership skills. Successful students will enjoy opportunities to visit companies and interact with Chief Audit Executives on risk assessment projects.

A student completing the concentration in Internal Audit is required to take three courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 372</td>
<td>AUDITING I</td>
<td>4</td>
</tr>
<tr>
<td>ACC 376</td>
<td>INTERNAL AUDITING</td>
<td>4</td>
</tr>
<tr>
<td>ACC 375</td>
<td>FRAUD EXAMINATION AND FORENSIC AUDITING</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>or IS 344 IT AUDITING</td>
<td></td>
</tr>
</tbody>
</table>

Courses for the concentration may be taken in any order.

To declare the concentration in Internal Audit, a student must be a declared Accountancy major. The concentration may be declared at the same time as major declaration or added afterward. All courses for the concentration must be completed with a minimum grade of C-.

Accountancy (BSB) Online
The objectives of the Bachelor of Science in Business with a major in Accountancy are to provide students with a solid foundation in the theory, principles, and procedures of the discipline and professional practice of accountancy, including the study of financial, managerial and tax
accounting as well as auditing and systems; to encourage and prepare students for professional certification; to foster an understanding of the profession of accountancy and its role in modern business environments; and to develop an awareness of the need for continuing intellectual development through either professional or academic means.

Learning Outcomes

Core Outcomes
- Use analytical and reflective skills in decision making.
- Communicate effectively both orally and in writing.
- Recognize legal and ethical issues confronting them.
- Contribute to the performance of a group within a business setting.
- Know the differences among global economies, institutions, business practices and cultures.
- Acquire knowledge of the functional areas of business and the interrelationships among the functional areas within a business.

Program Specific Outcomes

Students will be able to:
- Apply and explain the application of accounting standards and regulation, and where appropriate international accounting standards.
- Communicate effectively both orally and in writing.
- Use research databases to research accounting issues.
- Apply accounting knowledge in new and unfamiliar circumstances.
- Use technology and data analytics to facilitate accounting and auditing decisions.

College Core Requirements

Business Core Requirements

All undergraduate students in the Driehaus College of Business complete foundational courses in the areas of analytics, accountancy, mathematics, economics, business law, finance, management, management information systems/computer science, and marketing.

Course Requirements

For a student to complete the Bachelor of Science in Business, the following Business Core courses totaling at least 70.0 hours are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>

</table>

Computer Science or MIS

Select one of the following:
- CSC 241 INTRODUCTION TO COMPUTER SCIENCE I
- MIS 140 INTRODUCTION TO BUSINESS TECHNOLOGY AND DECISION MAKING

Communication

Select one of the following:
- MKT 376 EFFECTIVE BUSINESS COMMUNICATION
- ORGC 201 BUSINESS AND PROFESSIONAL COMMUNICATION

Business Capstone

Select one of the following:
- ICS 394 ENTREPRENEURSHIP STRATEGY
- ICS 395 MANAGEMENT STRATEGY
- ICS 396 HOSPITALITY STRATEGY (Hospitality majors only)

Global Business Perspective

Select 4.0 hours of the following:
- ECO 316 EUROPEAN ECONOMIC HISTORY
- ECO 330 RADICAL RESPONSES TO CAPITALISM
- ECO 333 TOPICS IN GLOBAL ECONOMIES
- ECO 334 UNDERSTANDING CHINA'S ECONOMY
- ECO 360 ECONOMICS OF LOW-INCOME COUNTRIES
- ECO 361 INTERNATIONAL TRADE
- ECO 362 INTERNATIONAL MONETARY ECONOMICS
- ECO 363 ECONOMICS OF THE EUROPEAN UNION
- FIN 340 INTERNATIONAL FINANCE
- FIN 355 GLOBAL IPOs & VENTURE CAPITAL
- ICS 350 INTERNATIONAL BUSINESS SEMINAR
- MGT 354 GLOBAL HUMAN RESOURCE MANAGEMENT
- MGT 357 INTERNATIONAL BUSINESS
- MKT 340 MARKETING ACROSS CULTURES: A CULTURAL PERSPECTIVE ON MULTICULTURAL MARKETS
- MKT 358 MARKETING IN A GLOBAL ENVIRONMENT
- MKT 360 INTERNATIONAL MARKETING
- SOC 217 WORK IN A GLOBALIZED WORLD
- A course taken as part of a term-long study abroad program

Professional Writing

Select one of the following:
- WRD 202 PROFESSIONAL WRITING FOR BUSINESS (2.0 quarter hours)
Strobel students take specially designated sections of all required ACC classes, including ACC 101 and ACC 102 (excluding ACC 250).

Students majoring in accounting (primary or secondary/double major) are allowed to substitute ACC 370 in place of BLW 201. Hospitality Leadership majors must take HSP 207 for the Business Law requirement; use of HSP 207 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete both HSP 207 and BLW 201.

Finance majors, Finance secondary/double majors, Finance minors, Finance Honors majors, Finance Honors secondary/double majors, and Actuarial Science majors must take FIN 320.

MKT majors and Sales minors must take MKT 376.

Entrepreneurship majors and minors must take ICS 394. Hospitality Leadership majors must take ICS 396 for the Business Capstone; use of ICS 396 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete ICS 396 and one of ICS 394 or ICS 395.

A course taken for Global Business Perspective that is in a student’s major or minor field must be completed with a minimum grade of C-.

**Business Ethics**

All undergraduate students in the Driehaus College of Business complete a course in Business Ethics. It is recommended students take MGT 248 or PHL 248 in Philosophical Inquiry or MGT 228 or REL 228 in Religious Dimensions in the Liberal Studies Program (or University Honors Program) Requirements.

**Second Majors and Minors**

The addition of a second major or minor may affect the Business Core classes required for a student. Meet with an academic advisor to confirm requirements.

**Math Requirements for all business majors (except Actuarial Science majors)**

- MAT 137 may be replaced by MAT 348 or MAT 351.

**Grade Minimum Requirements for Accountancy Major**

A minimum grade of C- is required for the following: ACC 101, ACC 102, ACC 370 (if taken), BUS 102, ECO 105, ECO 106, MAT 137, and the course in Professional Writing.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
<th>Title</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Students must earn C- or better in this course.

**Learning Domains**

- Arts and Literature (AL) (p. 1300) • 3 Courses Required
- Historical Inquiry (HI) (p. 1304) • 2 Courses Required
- Math and Computing (MC) (p. 1306) • Not Required
- Philosophical Inquiry (PI) (p. 1307) • 2 Courses Required
- Religious Dimensions (RD) (p. 1308) • 2 Courses Required
- Scientific Inquiry (SI) (p. 1310) • 1 Lab Course Required
- Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312) • 1 Course Required

PHL 248/MGT 248 is required in PI or REL 228/MGT 228 is required in RD.

**Notes**

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit.
This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Major Requirements**

**Course Requirements**

In addition to ACC 101 and ACC 102, a student majoring in Accountancy is required to complete the following courses totaling at least 46.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 250</td>
<td>CAREER MANAGEMENT FOR ACCOUNTANTS</td>
<td>2</td>

<td>TAX TREATMENT OF CORPORATIONS AND PARTNERSHIPS</td>
<td>4</td>
</tr>
</tbody>
</table>

1 Students majoring in accounting (primary or secondary) are allowed to substitute ACC 370 in place of BLW 201.

**Career Management Course**

Students are required to complete the Career Course (250) associated with the major. Students who double major may choose the Career Course (250) associated with either major provided that hours for graduation are satisfied.

**Open Electives**

Open elective credit (4.0 hours) is needed to meet the minimum graduation requirement of 192 hours.

**Financial Reporting Course**

Students who have taken the financial accounting course, ACC 307-H taught within the finance cohort are exempt from taking the financial accounting course ACC 304.

**Concentration**

The Internal Audit concentration is not available in the Online Accountancy degree.

**Graduation Requirements**

All Accountancy (ACC) courses and any courses used toward the Accountancy major must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

---

**Accountancy (BSB) Online + Audit and Advisory Services (MSAA)**

The Combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The Combined BSB + MSAA Program allows accountancy majors to complete a bachelor’s degree and a Master of Science in Audit and Advisory Services (MSAA) degree in as few as five years.

The MSAA provides students with advanced auditing skills and prepares them to succeed as accountants at both public accounting firms and corporate internal audit departments. Students receive hands-on training with audit tools, visualization techniques and data analytics. The program also uses forensic accounting to prepare students to understand what questions to ask of financial data and how to interpret the findings. Students graduate with a set of integrated competencies that are highly valued by the accounting profession.

**Classes During Senior Year**

In this program, students will take three graduate classes during their senior year. These three classes will count toward both the bachelor’s degree and master’s degree as indicated below:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 547</td>
<td>AUDITING I</td>

</tbody>
</table>

1 replaces ACC 372, prerequisite ACC 305
2 replaces ACC 374; prerequisite ACC 372
3 replaces ACC 350; prerequisite ACC 305 and ACC 380

These courses are offered every quarter except summer and may be taken at any time providing prerequisites have been met. These courses must be taken in-person and not online.

**Graduate Year**

Upon completion of the bachelor’s degree, students complete the remaining master’s degree requirements.

Visit the MSAA degree requirements (p. 174) in the course catalog for more information.

**Admission Requirements**

Current DePaul accountancy majors who meet the following criteria may apply to this program:

- Junior standing or higher (at least 88.0 credits)
- A minimum cumulative DePaul grade point average of 3.200
- A minimum Accountancy (ACC) grade point average of 3.000
- B or higher in each of the three graduate classes taken during senior year

Students should apply for admission while enrolled in ACC 305.
Students must maintain the same GPA standards above by the end of senior year to continue into the MSAA program.

To apply to the program, go to https://grad.depaul.edu/apply (https://grad.depaul.edu/apply/).

- Select Audit and Advisory Services-Combined
- Select the term you plan to begin the master’s degree after finishing your bachelor’s degree. This term can be changed at a later date if your plans change.
- Not required: GMAT exam, personal statement, recommendations, and application fee.
- You may upload your unofficial transcript available through Campus Connect.

**Accountancy (BSB) Online + Taxation (MSTAX)**

The Combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The Combined BSB-Accountancy + MS Taxation Program allows accountancy majors to complete a bachelor’s degree and a Master of Science in Taxation (MSTAX) degree in as few as five years.

The Master of Science (MS) in taxation is an integrated program of study that provides the foundation for exceptional performance and leadership in the field of taxation.

One of the first MS in taxation programs in the United States, DePaul’s program is structured for working professionals to enhance understanding and analysis of complex tax statutes, tax regulations, related cases and rulings, and the Internal Revenue Code.

MS in taxation students gain technical competencies; analytical, communications and interpretive skills; and leadership abilities that prepare them to add value at the highest levels in their firms, businesses and organizations.

**Classes During Senior Year**

Current DePaul accountancy majors who meet the following criteria may apply to this program:

- Junior standing or higher (at least 88.0 credits)
- A minimum cumulative DePaul grade point average of 3.200
- A minimum Accountancy (ACC) grade point average of 3.000
- B or higher in each of the three graduate classes taken during senior year
- B or higher in ACC 380

Students should apply for admission while enrolled in ACC 380.

Students must maintain the same GPA standards above by the end of senior year to continue into the MST program.

To apply to the program, go to https://grad.depaul.edu/apply (https://grad.depaul.edu/apply/).

- Select Taxation – Combined Degree
- Select the term you plan to begin the master’s degree after finishing your bachelor’s degree. This term can be changed at a later date if your plans change.
- Not required: GMAT exam, personal statement, recommendations, and application fee.
- You may upload your unofficial transcript available through Campus Connect.

**Accountancy (Minor)**

Available to students majoring outside the Driehaus College of Business, the Accountancy minor is designed for those students seeking to acquire skills in analyzing, interpreting, and communicating financial information to complement their major course of study.

**Prerequisite Requirements**

Students must meet the prerequisite course equivalency of pre-calculus (MAT 130 PRECALCULUS) prior to taking the first course in the minor.

**Course Requirements**

A non-Driehaus student minoring in Accountancy is required to complete the following courses totaling at least 24.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>

</tbody>
</table>
ACC 305 FINANCIAL REPORTING II
ACC 306 FINANCIAL REPORTING III
ACC 308 ADVANCED FINANCIAL ACCOUNTING
ACC 350 INFORMATION FOR DECISION MAKING
ACC 370 PROFESSIONAL RESPONSIBILITIES & BUSINESS LAW
ACC 372 AUDITING I
ACC 374 AUDITING II
ACC 375 FRAUD EXAMINATION AND FORENSIC AUDITING
ACC 376 INTERNAL AUDITING
ACC 380 TAX TREATMENT OF INDIVIDUALS AND PROPERTY
ACC 383 TAX TREATMENT OF CORPORATIONS AND PARTNERSHIPS
ACC 398 SPECIAL TOPICS (with approval)
ACC 399 INDEPENDENT STUDY

ACC 250, ACC 300, ACC 393 may not be used toward minor requirements.

**Graduation Requirements**

All Accountancy (ACC) courses and any courses used toward the Accountancy minor must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

### Accountancy (Minor: Business Students Only)

Students in the Driehaus College of Business who minor in Accountancy will acquire skills in analyzing, interpreting and communicating financial information to complement their major course of study.

### Course Requirements

In addition to ACC 101 and ACC 102, a Driehaus student minoring in Accountancy is required to complete the following courses totaling at least 16.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>

GSB 500 | U.S. BUSINESS CULTURE & PRACTICE 2 | 4

1 May be waived for students with a prior business degree or equivalent course work.
2 Required for international students and may be waived for those students with a prior U.S. degree.

Degree Requirements

1. Satisfactory completion of the 12 required Accountancy Courses and the 4 Business Courses, or equivalent courses, as outlined above.
2. Satisfactory completion of at least 48 earned graduate credit hours applicable to the degree (waived courses are not considered earned hours).
3. Satisfactory completion of the college residency requirement.
4. All courses for credit toward the degree must be completed with satisfactory grades within six calendar years after the candidate's first term of enrollment in the Kellstadt Graduate School of Business. After a lapse of six years a course is expired. An expired course is not acceptable for the purpose of satisfaction of degree requirements and is not applicable to the degree without the written permission of the program director or the Kellstadt Graduate School of Business.

Accountancy (MSACC) Online

Program Description

The nationally ranked Master of Science (MS) in Accountancy is intended for students who do not have an undergraduate accounting degree and wish to pursue a career in accountancy. Through the program’s challenging and integrated sequence of courses, students become proficient in topics that are relevant to the work of a professional accountant. Students also gain a solid understanding of other business disciplines and their relationship to accounting issues.

Program Features

Faculty expertise and experience. Bringing both theory and practice into the classroom, DePaul’s accountancy faculty includes distinguished scholars and professionals who have served as internal auditors, team managers, chief financial officers, controllers and partners in accounting firms.

Location. DePaul’s location in the heart of Chicago’s financial and business community gives students access to employers at top companies, including international accounting and consulting firms.

Strong alumni network. The alumni of DePaul’s graduate and undergraduate accounting programs form one of the largest accounting and tax networks in the Chicago area, providing unparalleled access to career opportunities and networking.

Online learning. The program can be completed entirely online, a benefit for students who seek a flexible schedule or do not live in the area. The online option provides full access to the MS in Accountancy’s comprehensive curriculum through video lectures and course materials presented in a convenient, supportive and engaging online format.

Accountancy Honors (BSB)

The designation Strobel Scholar is reserved for students of exceptional ability, achievement, and motivation in the School of Accountancy and Management Information Systems’ Strobel Honors Program. These students are characterized by outstanding academic records, high aptitudes for scholastic work, and reputations for leadership.

Special honors sections of accountancy courses are provided for Strobel Scholars every quarter as indicated in the quarterly class schedule. The content and structure of these honors sections are designed to appeal to the Strobel Scholar. Strobel Scholars proceed through the Program together, interacting with peers who have similar abilities. Learning and teaching concepts are advanced and student-oriented; small group activities and student presentations are used in honors sections. Students in the Strobel Scholars Program are expected to maintain high academic performance throughout the complete honors curriculum. Academic performance is reviewed at the end of each school year by the Administrator of the Strobel Scholars Program, Deloitte Professor John McEnroe. Outside speakers from the accounting and business communities are frequent visitors and participants.

The program is named after the late chair of the Accountancy Department, Eldred C. Strobel. Professor Strobel’s distinguished career as an accounting educator spanned thirty-five years, fourteen of which
were served as chair. Known for his support of innovative approaches to accounting education, he was the founder of the honors program, which now bears his name.

Admission to the Strobel Honors Program is by invitation only and is based on outstanding academic achievement in high school. Prior to being considered for the Strobel Honors Program, a student must be admitted to DePaul University and the Driehaus College of Business as a full-time, first-year, degree-seeking student.

</tr>
</tbody>
</table>

**Program Specific Outcomes**

Students will be able to:

- Apply and explain the application of accounting standards and regulation, and where appropriate international accounting standards.
- Communicate effectively both orally and in writing.
- Use research databases to research accounting issues.
- Apply accounting knowledge in new and unfamiliar circumstances.
- Use technology and data analytics to facilitate accounting and auditing decisions.

**College Core Requirements**

**Business Core Requirements**

All undergraduate students in the Driehaus College of Business complete foundational courses in the areas of analytics, accountancy, mathematics, economics, business law, finance, management, management information systems/computer science, and marketing.

**Course Requirements**

For a student to complete the Bachelor of Science in Business, the following Business Core courses totaling at least 70.0 hours are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

Strobel students take specially designated sections of all required ACC classes, including ACC 101 and ACC 102 (excluding ACC 250).
Students majoring in accounting (primary or secondary/double major) are allowed to substitute ACC 370 in place of BLW 201. Hospitality Leadership majors must take HSP 207 for the Business Law requirement; use of HSP 207 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete both HSP 207 and BLW 201.

Finance majors, Finance secondary/double majors, Finance minors, Finance Honors majors, Finance Honors secondary/double majors, and Actuarial Science majors must take FIN 320.

MGT 301-H is required if pursuing the Management Honors Program. MIS majors and minors must take MIS 140. Actuarial Science and Economic Data Analytics majors must take CSC 241.

MKT majors and Sales minors must take MKT 376.

Entrepreneurship majors and minors must take ICS 394. Hospitality Leadership majors must take ICS 396 for the Business Capstone; use of ICS 396 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete ICS 396 and one of ICS 394 or ICS 395.

A course taken for Global Business Perspective that is in a student’s major or minor field must be completed with a minimum grade of C-.

Business Ethics
All undergraduate students in the Driehaus College of Business complete a course in Business Ethics. It is recommended students take MGT 248 or PHL 248 in Philosophical Inquiry or MGT 228 or REL 228 in Religious Dimensions in the Liberal Studies Program (or University Honors Program) Requirements.

Second Majors and Minors
The addition of a second major or minor may affect the Business Core classes required for a student. Meet with an academic advisor to confirm requirements.

Math Requirements for all business majors (except Actuarial Science majors)
• MAT 137 may be replaced by MAT 348 or MAT 351.

Grade Minimum Requirements for Accountancy Major
A minimum grade of C- is required for the following: ACC 101, ACC 102, ACC 370 (if taken), BUS 102, ECO 105, ECO 106, MAT 137, and the course used for Professional Writing.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1 Students must earn C- or better in this course.

Learning Domains
Arts and Literature (AL) (p. 1300)
• 3 AL Courses Required

Historical Inquiry (HI) (p. 1304)
• 2 HI Courses Required

Math and Computing (MC) (p. 1306)
• Not Required

Philosophical Inquiry (PI) (p. 1307)
• 2 PI Courses Required

Religious Dimensions (RD) (p. 1308)
• 2 RD Courses Required

Scientific Inquiry (SI) (p. 1310)
• 1 Lab Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
• 1 SCBI Course Required

1 PHL 248/MGT 248 is required in PI or REL 228/MGT 228 is required in RD.

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.
Major Requirements

Course Requirements
In addition to ACC 101 and ACC 102, a student majoring in Accountancy Honors is required to complete the following courses totaling at least 46.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 250</td>
<td>CAREER MANAGEMENT FOR ACCOUNTANTS</td>
<td>2</td>
</tr>
<tr>
<td>ACC 300</td>
<td>BUSINESS PROCESSES, INFORMATION SYSTEMS AND CONTROL (PREREQUISITE: ACC 102)</td>
<td>4</td>
</tr>
<tr>
<td>ACC 303</td>
<td>COST &amp; MANAGERIAL ACCOUNTING</td>
<td>4</td>
</tr>
<tr>
<td>ACC 304</td>
<td>FINANCIAL REPORTING I</td>
<td>4</td>
</tr>
<tr>
<td>ACC 305</td>
<td>FINANCIAL REPORTING II</td>
<td>4</td>
</tr>
<tr>
<td>ACC 306</td>
<td>FINANCIAL REPORTING III</td>
<td>4</td>
</tr>
<tr>
<td>ACC 308</td>
<td>ADVANCED FINANCIAL ACCOUNTING</td>
<td>4</td>
</tr>
<tr>
<td>ACC 350</td>
<td>INFORMATION FOR DECISION MAKING</td>
<td>4</td>
</tr>
<tr>
<td>ACC 372</td>
<td>AUDITING I</td>
<td>4</td>
</tr>
<tr>
<td>ACC 374</td>
<td>AUDITING II</td>
<td>4</td>
</tr>
<tr>
<td>ACC 380</td>
<td>TAX TREATMENT OF INDIVIDUALS AND PROPERTY</td>
<td>4</td>
</tr>
<tr>
<td>ACC 383</td>
<td>TAX TREATMENT OF CORPORATIONS AND PARTNERSHIPS</td>
<td>4</td>
</tr>
</tbody>
</table>

*Students majoring in accounting (primary or secondary) are allowed to substitute ACC 370 in place of BLW 201.

Strobel Course Sections
The courses listed above (excluding ACC 250, ACC 300 and ACC 370) must be taken as honors sections by students in the Strobel program. Strobel students take specially designated sections of all ACC classes, including ACC 101 and ACC 102.

Grade Standard
Strobel Honors students will face dismissal from the honors track if they receive a D or F in an honors accounting class or less than a B- in three honors accounting classes. This standard is designed to ensure that the academic excellence that the designation engenders is maintained.

Financial Reporting Course
Students who have taken the financial accounting course, ACC 307-H taught within the finance cohort are exempt from taking the financial accounting course ACC 304.

Career Management Course
Students are required to complete the Career Course (250) associated with the major. Students who double major may choose the Career Course (250) associated with either major provided that hours for graduation are satisfied.

Open Electives
Open elective credit (4.0 hours) is needed to meet the minimum graduation requirement of 192 hours.

Graduation Requirements
All Accountancy (ACC) courses and any courses used toward the Accountancy major must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

- Accountancy Honors (BSB), Internal Audit Concentration (p. 58)

Courses in the Strobel sequence must be taken in the following order:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Year</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Fall Quarter</td>
<td>INTRODUCTION TO ACCOUNTING I (H)</td>
<td>4</td>
</tr>
<tr>
<td>Winter Quarter</td>

<td>FINANCIAL REPORTING III (H)</td>
<td>4</td>
</tr>
<tr>
<td>Third Year</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Fall Quarter</td>
<td>AUDITING I (H)</td>
<td>4</td>
</tr>
<tr>
<td>Winter Quarter</td>
<td>INTERNSHIP IN ACCOUNTANCY (recommended)</td>
<td>4</td>
</tr>
<tr>
<td>Spring Quarter</td>
<td>AUDITING II (H)</td>
<td>4</td>
</tr>
<tr>
<td>ACC 380</td>
<td>TAX TREATMENT OF INDIVIDUALS AND PROPERTY (H)</td>
<td>4</td>
</tr>
<tr>
<td>Fourth Year</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Fall Quarter</td>
<td>TAX TREATMENT OF CORPORATIONS AND PARTNERSHIPS (H)</td>
<td>4</td>
</tr>
<tr>
<td>Winter Quarter</td>
<td>ADVANCED FINANCIAL ACCOUNTING (H)</td>
<td>4</td>
</tr>
<tr>
<td>Spring Quarter</td>
<td>INFORMATION FOR DECISION MAKING (H)</td>
<td>4</td>
</tr>
</tbody>
</table>

"H" denotes Strobel specific section of the course listed. The courses must be taken as honors sections by students in the Strobel program (with the exception of the recommended ACC 393, which is not offered as an honors section).

There is no honors section of ACC 250 or ACC 300. Students may take that course any quarter that fits their schedule. Completion is recommended prior to third year.

ACC 393 is not required for the major, but it is recommended and may be used for Experiential Learning in the Liberal Studies requirements.
Accountancy Honors (BSB) + Audit and Advisory Services (MSAA)

The Combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The Combined BSB + MSAA Program allows accountancy majors to complete a bachelor’s degree and a Master of Science in Audit and Advisory Services (MSAA) degree in as few as five years.

The MSAA provides students with advanced auditing skills and prepares them to succeed as accountants at both public accounting firms and corporate internal audit departments. Students receive hands-on training with audit tools, visualization techniques and data analytics. The program also uses forensic accounting to prepare students to understand what questions to ask of financial data and how to interpret the findings. Students graduate with a set of integrated competencies that are highly valued by the accounting profession.

Classes During Senior Year

In this program, students will take three graduate classes during their senior year. These three classes will count toward both the bachelor’s degree and master’s degree as indicated below.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 547</td>
<td>AUDITING I</td>

<td>AUDITING II</td>
<td>4</td>
</tr>
<tr>
<td>ACC 640</td>
<td>ACCOUNTING THEORY AND POLICY FORMULATION</td>
<td>4</td>
</tr>
</tbody>
</table>

1 replaces ACC 372, prerequisite ACC 305
2 replaces ACC 374; prerequisite ACC 372
3 replaces ACC 350; prerequisite ACC 305 and ACC 380

These courses are offered every quarter except summer and may be taken at any time providing prerequisites have been met. These courses must be taken in-person and not online.

Graduate Year

Upon completion of the bachelor’s degree, students complete the remaining master’s degree requirements.

Visit the MSAA degree requirements (p. 174) in the course catalog for more information.

Admission Requirements

Current DePaul accountancy majors who meet the following criteria may apply to this program:

- Junior standing or higher (at least 88.0 credits)
- A minimum cumulative DePaul grade point average of 3.200
- A minimum Accountancy (ACC) grade point average of 3.000
- B or higher in each of the three graduate classes taken during senior year

Students must maintain the same GPA standards above by the end of senior year to continue into the MSAA program.

To apply to the program, go to https://grad.depaul.edu/apply (https://grad.depaul.edu/apply/).

- Select Audit and Advisory Services-Combined
- Select the term you plan to begin the master’s degree after finishing your bachelor’s degree. This term can be changed at a later date if your plans change.
- Not required: GMAT exam, personal statement, recommendations, and application fee.
- You may upload your unofficial transcript available through Campus Connect.

Accountancy Honors (BSB) + Taxation (MSTAX)

The Combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The Combined BSB-Accountancy + MS Taxation Program allows accountancy majors to complete a bachelor’s degree and a Master of Science in Taxation (MSTAX) degree in as few as five years.

The Master of Science (MS) in taxation is an integrated program of study that provides the foundation for exceptional performance and leadership in the field of taxation.

One of the first MS in taxation programs in the United States, DePaul’s program is structured for working professionals to enhance understanding and analysis of complex tax statutes, tax regulations, related cases and rulings, and the Internal Revenue Code.

MS in taxation students gain technical competencies; analytical, communications and interpretive skills; and leadership abilities that prepare them to add value at the highest levels in their firms, businesses and organizations.

Classes During Senior Year

In this program, students will take three graduate classes during their senior year. These three classes will count toward both the bachelor’s degree and master’s degree as indicated below.

<table>

</tr>
</tbody>
</table>

1 replaces ACC 383; prerequisite ACC 380
2 replaces ACC 350; prerequisite ACC 551

These courses must be taken in-person and not online.
Graduate Year

Upon completion of the bachelor’s degree, students complete the remaining master’s degree requirements.

Visit the MS Taxation degree requirements (p. 1116) in the course catalog for more information.

Admission Requirements

Current DePaul accountancy majors who meet the following criteria may apply to this program:

- Junior standing or higher (at least 88.0 credits)
- A minimum cumulative DePaul grade point average of 3.200
- A minimum Accountancy (ACC) grade point average of 3.000
- B or higher in each of the three graduate classes taken during senior year
- B or higher in ACC 380

Students should apply for admission while enrolled in ACC 380.

Students must maintain the same GPA standards above by the end of senior year to continue into the MST program.

To apply to the program, go to https://grad.depaul.edu/apply (https://grad.depaul.edu/apply/).

- Select Taxation – Combined Degree
- Select the term you plan to begin the master’s degree after finishing your bachelor’s degree. This term can be changed at a later date if your plans change.
- Not required: GMAT exam, personal statement, recommendations, and application fee.
- You may upload your unofficial transcript available through Campus Connect.

Accountancy Honors (BSB), Internal Audit Concentration

Available to students majoring in Accountancy, the optional concentration in Internal Audit prepares students to meet the challenges of the profession and provides them with knowledge of the internal audit function that is becoming increasingly important in the global business community. Students experience rigorous classroom learning designed to deliver the knowledge and practical skills they’ll need to succeed during the first years of their careers including: oral and written communication, understanding of internal audit’s role of providing objective assurance of key governance, risk management, and compliance processes, use information technology processes and controls in the assurance function, and development of teamwork and leadership skills. Successful students will enjoy opportunities to visit companies and interact with Chief Audit Executives on risk assessment projects.

A student completing the concentration in Internal Audit is required to take three courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 375</td>
<td>FRAUD EXAMINATION AND FORENSIC AUDITING</td>
<td>4</td>
</tr>
<tr>
<td>or IS 344</td>
<td>IT AUDITING</td>
<td></td>
</tr>
</tbody>
</table>

Courses for the concentration may be taken in any order.

To declare the concentration in Internal Audit, a student must be a declared Accountancy major. The concentration may be declared at the same time as major declaration or added afterward. All courses for the concentration must be completed with a minimum grade of C-.

Acting (BFA)

The Theatre School’s Bachelor of Fine Arts (BFA) degree in Acting prepares actors to work on both stage and screen. It develops actors who are imaginative, skillful, expressive and vibrantly alive. It is rooted in the Chicago tradition, emphasizing physicality, truth in action, communication, collaboration and spontaneity. The first year introduces the actor to a broad range of techniques and experiences, defines a way of working and provides a set of skills. The next three years focus on developing and refining this way of working - adding skills and technique - while helping each actor discover and apply those which work best for him or her.

Learning Outcomes

Core Outcomes

Students will be able to:

- Identify and describe the historical and theatrical significance of a range of theatrical artists, works, and artistic approaches from antiquity or present, encompassing a broad range of periods, cultures, and styles.
- Synthesize and apply elements of their education and training to the preparation, rehearsal, and presentation of theatrical productions with discipline, respect, and maturity.
- Identify and explain their theatrical work in the context of the cultural and social impact of the arts.

Program Specific Outcomes

Students will be able to:

- Read and interpret theatrical text and apply research, imagination, and personalization to create a unique, insightful, and compelling performance.
- Act truthfully from moment-to-moment in a variety of theatrical works, periods, and styles.
- Demonstrate personal practice of improving vocal and physical expressiveness as an actor.
- Read and interpret theatrical text and apply research, imagination, and personalization to create a unique, insightful, and compelling performance.
- Act truthfully from moment-to-moment in a variety of theatrical works, periods, and styles.
• Demonstrate personal practice of improving vocal and physical expressiveness as an actor.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1. Students must earn a C- or better in this course.
2. Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam.

**Learning Domains**

**Arts and Literature (AL) (p. 1300)**
- THE 204
- THE 205
- THE 206

**Historical Inquiry (HI) (p. 1304)**
- 1 Course Required

**Math and Computing (MC) (p. 1306)**
- Not Required

**Philosophical Inquiry (PI) (p. 1307)**
- 1 Course Required

**Religious Dimensions (RD) (p. 1308)**
- 1 Course Required

**Scientific Inquiry (SI) (p. 1310)**
- 1 Lab Course or 1 SWK Course Required

**Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)**
- Not Required

**Other (p. 1300)**
- Choose 1 course from the above learning domains as an elective

**Notes**

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Acting (MFA)

The Theatre School’s Master of Fine Arts (MFA) degree in Acting is a highly truthful, yet expressive, physical acting program informed by our Chicago roots that prepares actors to work on stage and screen all over the world. The first year experience is about expanding the size and specificity of the actor’s skill, imagination, and drive. The next year intensifies scenic study of a diverse spectrum of dramatic literature, with a strong path of ensemble creation and student-generated work. The final year puts the work in the context of the profession, connects the student to artistic and industry leaders while refining the actor’s entrepreneurial spirit through company created works and independent cinema experience.

### Terminal Requirements for the Master of Fine Arts Degree

In addition to completing the graduate requirements of the major program, each student must complete this terminal requirement: one analytical research paper, a minimum of 15 pages in length, in conjunction with Rehearsal and Performance Casting, Independent Project, or a topic relevant to the degree and approved by the Head of Graduate Acting.

### Actuarial Science (BS)

An actuary is a business professional who analyzes the financial consequences of risk and uncertainty. They interpret statistics to determine probabilities of accidents, sickness, death, and loss of property from theft and natural disasters. Actuaries use mathematics, statistics and financial theory to study uncertain future events, especially concerning risk management and insurance programs. Actuaries are considered the “financial architects” of the insurance world.

We offer courses that will help you prepare for the actuarial exams offered by the Society of Actuaries and the Casualty Actuarial Society.
These courses include Probability and Statistics I & II (P Exam), Theory of Interest (FM Exam), Mathematics for Finance (IFM Exam), Loss Models I & II (STAM Exam), Life Contingencies I & II (LTAM Exam), and Applied Regression Analysis and Applied Time Series & Forecasting (SRM Exam). We also offer courses that will allow you to satisfy other requirements in the actuarial credentialing process.

</tr>
</tbody>
</table>

**Learning Outcomes**

Students will be able to:

- Describe the risk management process and explain how insurance is used to protect against risk.
- Apply the laws of probability and statistics to problems encountered by actuaries.
- Use the theory of interest to evaluate financial instruments and manage assets and liabilities.
- Analyze financial derivatives contracts and identify their risk-mitigation features.

**College Core Requirements**

**Modern Language Requirements**

Students who intend to graduate with the Bachelor of Arts (BA) degree will be required to demonstrate competence in a modern language equivalent to the proficiency attained from one year of college-level language study. Such competence may be demonstrated in one of several ways:

- completing the last course in the fourth-year high school sequence of any language
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact Student Records.

BA students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While Bachelor of Science (BS) students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

**Major Declaration Requirements**

All students in the College are required to declare a major field prior to beginning their junior year. After researching College programs, the student should declare a major field by visiting Campus Connection and using the Declarations and Inter-College Transfer tool. The student will then be assigned a faculty advisor or staff advisor in the department or program and should make an appointment to see that advisor at his or her earliest convenience.

To change major fields, or to declare a minor or concentration, the student must use the Declarations and Inter-College Transfer tool described above. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the College or an academic advisor in the Office for Academic Advising Support.

**Liberal Studies Requirements**

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

**Actuarial Science (BSB)**

An actuary is a business professional who analyzes the financial consequences of risk and uncertainty. They interpret statistics to determine probabilities of accidents, sickness, death, and loss of property from theft and natural disasters. Actuaries use mathematics, statistics and financial theory to study uncertain future events, especially concerning risk management and insurance programs. Actuaries are considered the “financial architects” of the insurance world.

Actuaries are in high demand and work for insurance companies, consulting and investment firms, government, employee benefit departments of large corporations, hospitals, and banks. The field is highly competitive and requires students to pass exams that lead to professional certification by the Society of Actuaries, the Casualty Actuarial Society and other accredited international societies. This program will equip students with the skills needed to pass at least two actuarial exams, which are the industry’s standard of gauging expertise for internships and employment, prior to graduation. We have structured our program around these milestones, enabling our students to gain internships in a timely manner and to graduate into full employment.

**Program Requirements**

Learning Outcomes

Core Outcomes:

Students will be able to:

- Use analytical and reflective skills in decision making.
- Communicate effectively both orally and in writing.
- Recognize legal and ethical issues confronting them.
- Contribute to the performance of a group within a business setting.
- Know the differences among global economies, institutions, business practices and cultures.
- Acquire knowledge of the functional areas of business and the interrelationships among the functional areas within a business.

Program Specific Outcomes

Students will be able to:

- Apply the laws of probability and statistics to problems encountered by actuaries on a daily basis.
- Explain the theory of interest and how it is the foundation for derivative securities.
- Explain contingent payment models and how they apply to mitigating financial risks through insurance contracts.
- Organize, and simulate various Life Contingency models in a manner consistent with the insurance industry practice.
- Describe life cycle effects and then explain how different groups of individuals may protect themselves from any harmful effects.
- Calculate the financial costs and benefits of insurance contracts for various individuals given different life cycle assumptions.
- Apply the laws of probability and statistics to problems encountered by actuaries on a daily basis.
- Explain the theory of interest and how it is the foundation for derivative securities.
- Explain contingent payment models and how they apply to mitigating financial risks through insurance contracts.
- Organize, and simulate various Life Contingency models in a manner consistent with the insurance industry practice.
- Describe life cycle effects and then explain how different groups of individuals may protect themselves from any harmful effects.
- Calculate the financial costs and benefits of insurance contracts for various individuals given different life cycle assumptions.

College Core Requirements

Business Core Requirements

All undergraduate students in the Driehaus College of Business complete foundational courses in the areas of analytics, accountancy, mathematics, economics, business law, finance, management, management information systems/computer science, and marketing.

Course Requirements

For a student to complete the Bachelor of Science in Business with a major in Actuarial Science, the following Business Core courses totaling at least 76.0 hours are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>

MAT 341 STATISTICAL METHODS USING SAS

Business Ethics
All undergraduate students in the Driehaus College of Business complete a course in Business Ethics. It is recommended students take MGT 248 or PHL 248 in Philosophical Inquiry or MGT 228 or REL 228 in Religious Dimensions in the Liberal Studies Program (or University Honors Program) Requirements.

Second Majors and Minors
The addition of a second major or minor may affect the Business Core classes required for a student. Meet with an academic advisor to confirm requirements.

Math Requirements for Actuarial Science majors
- An Actuarial Science student is expected to complete the Calculus sequence in the first year of study.
- The calculus requirement can be met with one of these sequences:
  - Calculus: MAT 150, MAT 151, and MAT 152
  - Calculus for Mathematics and Science Majors: MAT 160, MAT 161, and MAT 162
  - Calculus for Life Sciences: MAT 170, MAT 171, and MAT 172
  - Summer Calculus: MAT 155 and MAT 156
- Actuarial Science students do not take Business Calculus MAT 135, MAT 136, or Business Statistics MAT 137.

Grade Minimum Requirements for Actuarial Science Major
A minimum grade of C- is required for the following: ACC 101, ACC 102, ECO 105, ECO 106, FIN 310, FIN 320, MAT 150, MAT 151, MAT 152, and MAT 341 (Professional Writing), and any FIN course used for Global Business Perspective.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Junior Year
Experiential Learning Required 4

Senior Year
Capstone
ICS 392 SENIOR SEMINAR 4

1 Students must earn C- or better in this course.

Learning Domains
Arts and Literature (AL) (p. 1300) • 3 Courses Required
Historical Inquiry (HI) (p. 1304) • 2 Courses Required
Math and Computing (MC) (p. 1306) • Not Required
Philosophical Inquiry (PI) (p. 1307) • 2 Courses Required
Religious Dimensions (RD) (p. 1308) • 2 Courses Required
Scientific Inquiry (SI) (p. 1310) • 1 Lab Course Required
Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312) • 1 Course Required

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements
Course Requirements
In addition to FIN 310 and FIN 320, a student majoring in Actuarial Science is required to complete the following courses totaling at least 44.0 hours:
### Adult-Gerontological Nurse Practitioner Certificate

The certificate option will allow for licensed registered nurses holding a graduate degree to complete the coursework necessary to sit for certification as a nurse practitioner. Upon completion of the program, graduates are eligible to take certification exams provided by either the American Nurse Credentialing Center (ANCC) or the American Academy of Nurse Practitioners Certification Program (AANPCP). Those seeking certification in the population specific options offered by the School are able to take an exam through either certifying body.

The population targeted by the program consists of graduates of the entry to practice program at DePaul University as well as other programs in the State of Illinois. Additionally, this program allows any registered nurse with a graduate degree to pursue nurse practitioner training. Alumni have often communicated the desire for nurse practitioner training without immediately pursing the doctorate. This certificate offering will provide that training, allowing experienced nurses to practice at an advanced level prior to completing the terminal degree.

Students in the Adult-Gerontological Nurse Practitioner Certificate program must follow the academic standing, probation and dismissal guidelines, among the other guidelines, found in the Program Graduate Academic Student Handbook for the Doctor of Nursing Practice program.

Students in the Adult-Gerontological Nurse Practitioner Certificate program must apply for degree conferral via Campus Connection in advance of their final quarter in the program in order to have their coursework audited for the awarding and delivery of their certificate.

### Graduation Requirements

All Finance (FIN) courses and any course used towards the Actuarial Science major must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

This graduate certificate program is approved as a Gainful Employment Program through the U.S. Department of Education and is, therefore, eligible for Federal Student Aid.

### Advertising Creative (Minor)

Students pursuing an Advertising Creative minor develop an understanding of creative processes in developing advertising campaigns. Creative is also a longstanding industry standard used in the profession for describing individuals that create advertising content for various media and communication forms including traditional (i.e. direct mail, sales letters, brochures, television, radio, internet) to more innovative forms (social media platforms, interactive promotions, brand user experiences, etc.). It is also a job title that refers to an Ad/PR professional who works on creative teams to develop big ideas such as campaign slogans, storyboards, jingles, and other branded persuasive messages. The following collection of courses in the Advertising Creative
minor prepares students to be advertising creatives, copywriters, creative strategists, and for careers in other creative roles with a specific focus on branding in advertising and PR.

An Advertising Creative Minor requires students to complete a total of 24 credit hours (six courses): three required courses and three elective courses. To complete the minor, students must take:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>

</tr>
<tr>
<td>PRAD 393</td>
<td>SPECIAL TOPICS IN PUBLIC RELATIONS AND ADVERTISING (Creative related topics such as Advanced Copywriting, Advanced Portfolio, Multimedia Ad Production, Concept and Sketch Development)</td>
<td></td>
</tr>
</tbody>
</table>

1 2 credit course. Must take two of these courses to count toward the minor.

All students at DePaul, including students majoring in Public Relations and Advertising (PRAD) can earn this minor.

African and Black Diaspora Studies (BA)

The aim of the Department of African & Black Diaspora Studies is to provide DePaul students with a systematic, interdisciplinary, and integrated course of study of Africa & the Black Diaspora, including Black America, the Afro-Caribbean and Afro-Latin America.

African & Black Diaspora Studies (ABD) will also train students in comparative analysis (of regions, histories, peoples, religions, philosophies, etc.) through intersectional analysis of history, power, identity, gender, and race. The Department’s offerings provide students with opportunities to learn about and develop expertise in the cultures, histories, and societies of people of African descent.

African and Black Diaspora Studies prepares students to pursue professions and careers in a variety of areas. ABD students have gone on to careers in fields such as law/legal studies, counseling, social work, academia, teaching, community work/advocacy, publishing, communication and media, marketing, public policy, and more.

</tbody>
</table>

Learning Outcomes

Students will be able to:

- Explain the concept of diaspora as a global unifying concept by integrating attention to the diversity of groups that make up the Black Diaspora.
- Detect and differentiate the interactions of race, ethnicity, gender, sexuality, and class.
- Identify and analyze multiple theories of Blackness: as a source of cultural identity, aesthetics, and/or as a basis of political, social, or national movements.
- Analyze and evaluate the ideological frameworks through which Black people have been defined and have defined themselves.
- Produce oral or written work based on primary and secondary sources that evaluate the contributions of African and Black people in the modern world.

College Core Requirements

Study in the Major Field

The student's course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By "liberal education" the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized "concentration." The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student's choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.
Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

**The Modern Language Requirement (MLR)**
All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
- completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the “Modern Language Option” (see below).

**The Modern Language Option (MLO)**
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

**NOTE:** Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

**External Credit and Residency**
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

**Liberal Studies Requirements**
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1. Students must earn a C- or better in this course.
2. Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete LSP 120 and both a Computational Reasoning course and a Statistical Reasoning course in the Math and Computing Domain take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and cannot be applied to the SI Domain.

• 1 Course Required

Notes

A student majoring in African and Black Diaspora Studies (ABD) is required to complete the Capstone offered by the ABD Department. This is the case even if a student is double majoring (or pursuing a dual degree) and the secondary major (or degree) requires its own Capstone. An ABD major in the University Honors Program shall take the University Honors Capstone and the ABD Capstone.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Core Courses

Students are required to complete four core courses (16-quarter credit hours) in African and Black Diaspora Studies (ABD). The core courses are designed to accomplish these goals:
• to introduce students to the learning goals and outcomes of the Department of African and Black Diaspora Studies;
• to introduce students to the main debates, concerns, and ideas in the distinct areas within African and Black Diaspora Studies;
• to emphasize the Vincentian tenet that questions of human value are central to scholarly inquiry; and
• to strengthen an understanding of the interrelationships and dynamics between Africa, the Caribbean and Latin America, the United States, and other spaces of the African Diaspora.

300-Level Courses

For this requirement, students must take four ABD courses (16-quarter credit hours) at the 300 level.

Any ABD 300-level course may apply toward the completion of the major’s 300-Level requirement. All other 300-level courses must be approved by the African and Black Diaspora Studies department chair for application toward the 300-Level requirement.

These courses build upon the general foundation of knowledge provided by the core courses. They serve to reinforce and extend student knowledge about a particular area of study relating to Africa and/or the Black Diaspora as well as the Department’s core sites of inquiry (culture, gender, history, power, and race).

To ensure that students are exposed to a variety of methodological approaches, students will endeavor to take courses in the social and behavioral sciences (i.e. Anthropology, Geography, History, International Studies, Psychology, Political Science, and Sociology), humanities (i.e. Art and Architectural History, Literature, Music, Philosophy, Religious Studies, and Theatre), and interdisciplinary studies (i.e. American studies, Critical Ethnic Studies, Latin American & Latino studies, Women’s and Gender studies, LGBT studies, etc.).

Students who wish to take a 200-level course in partial fulfillment of this requirement must petition the Department of African and Black Diaspora Studies chair for approval (this is not common, and only allowed in exceptional circumstances).

Major Field Electives

 Majors in the Department of African and Black Diaspora Studies will take four ABD courses as major field electives (16-quarter credit hours). These courses can be at the 200-level or 300-level. The Department urges students to consider courses at the 300-level to fulfill this requirement.

 Such courses are designed to provide students with an opportunity to take courses related to their interests in African and Black Diaspora Studies and at the same time extend their academic preparation through coursework in allied fields. The selection of electives should be done in consultation with the student’s ABD academic advisor.

Capstone

This senior seminar (four quarter hours) engages students in a synthesis of what they have learned through coursework. The capstone course
will involve reading, writing, discussion, as well as the preparation of a substantive piece of work (e.g., a senior thesis, a research paper, etc.).

Open Electives
Open elective credits are also required to meet the minimum graduation requirement of 192 quarter-credit hours.

**African and Black Diaspora Studies 3+3 (BA+JD)**

In the 3+3 (BA+JD) Program, high-achieving incoming first-year undergraduate students are admitted simultaneously to the College of Liberal Arts and Social Sciences and the College of Law. Students complete their first three years in the College of Liberal Arts and Social Sciences and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA+JD students meet regularly with advisors in both Colleges and have access to a variety of resources to ensure their success.

**Key Program Features**

- Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
- Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
- Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
- Students receive early (conditional) admission to the College of Law.
- Credits earned in the first year of law school apply toward the BA degree.
- Students may opt out of the College of Law segment of the program and continue in the College of Liberal Arts and Social Sciences during their fourth year.
- If students withdraw after the first semester in the College of Law, they return to the College of Liberal Arts and Social Sciences for the winter quarter.

**Program Requirements**

In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements. Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study. Students who enroll in the BA+JD program in 2021 must maintain a cumulative GPA of 3.7 in their third and final year of undergraduate study.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRELAW 150</td>
<td>THE PRACTICE OF LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 151</td>
<td>RECENT CONTROVERSIES IN THE LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 152</td>
<td>THINKING ABOUT THE LAW</td>
<td>2</td>
</tr>
</tbody>
</table>

In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law's online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant’s third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These classes can be found in the Core Required Courses on the Law JD program page (p. 677).

**Financial Aid**

BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law’s median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

**African and Black Diaspora Studies (BA)+Critical Ethnic Studies (MA)**

The combined Bachelor’s/Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

Undergraduate students majoring in African and Black Diaspora Studies apply to the Critical Ethnic Studies MA program in spring of their junior year; interested students should contact the Critical Ethnic Studies (CES) graduate director. Students in this program take twelve graduate credit hours in their senior year; these graduate courses apply toward both undergraduate African and Black Diaspora Studies and graduate Critical Ethnic Studies requirements.

In the senior year undergraduate students complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CES 401</td>
<td>CRITICAL ETHNIC STUDIES</td>
<td>4</td>
</tr>
<tr>

<tr>
<td>CES 405</td>
<td>RACE AND THE MEDIA</td>
<td></td>
</tr>
<tr>
<td>or CMNS 563</td>
<td>MULTICULTURAL MEDIA REPRESENTATIONS</td>
<td></td>
</tr>
</tbody>
</table>

Once the student has graduated with their undergraduate BA in African and Black Diaspora Studies, they will matriculate into the MA Program. As MA students, students will take the remaining nine courses toward the MA degree. Usually, students will take three graduate courses per quarter in order to complete the MA in the one additional year. Students may also wish to take one of these courses during the summer. See MA degree requirements (p. 303).
Students interested in applying to the BA/MA program in Critical Ethnic Studies should contact the Critical Ethnic Studies director at ces@depaul.edu.

**African and Black Diaspora Studies (Minor)**

The minor provides students with a general knowledge about African and Black Diaspora (ABD) Studies. Many students minor in ABD to complement their major field studies.

Six courses (24-quarter hours) are required for the ABD minor. ABD courses that fulfill Liberal Studies Learning Domain requirements can also double-count towards the ABD minor.

**Course Requirements**

Students majoring in African and Black Diaspora Studies (BA) are restricted from earning this minor.

**Albanian and Southeastern European Studies Undergraduate Certificate**

The multidisciplinary Certificate in Albanian and Southeastern European Studies consists of four 4-credit hour courses (16 credit hours total), and is available to DePaul undergraduate and non-degree seeking students. It explores the intersections and connections of Albanian history, language, culture, and politics to the larger regions of the Balkans, Eastern Mediterranean, and Southeastern Europe. Many of the courses in the certificate can be double counted toward the learning domains, and students can build their own interdisciplinary curriculum by drawing on courses from different disciplines that explore the history, politics, and culture of Albania and Kosovo, Southeastern Europe, and the European Union through multiple perspectives. This certificate helps students to internationalize their academic plan, and can also demonstrate an understanding of Albania, Southeastern Europe, and broader European culture, history, and politics to potential graduate schools or employers.

**Certificate Requirements:**

- One 4-credit hour core course: ALB 280E
- Three 4-credit hour elective courses (see sample course list below for details)

**Note:**
Advanced or heritage speakers of Albanian can choose to complete two 2-credit FLAC courses in Albanian language instead of one of the required 4-credit hour electives in English.

</tbody>
</table>

**Certificate Advising:**
To declare the certificate, students must contact the Hidai “Eddie” Bregu Endowed Chair in Albanian Studies, Dr. Gazmend Kapllani (gkapllani@depaul.edu). Dr. Kapllani advises on the completion of requirements and can share additional information on opportunities that complement classroom learning, such as research opportunities, academic internships, and scholarships.

**American Politics (Minor)**

A minor concentration in American Politics offers a survey of American political institutions and behavior. It provides an opportunity to explore in depth a specific topic of interest which complements an individual course of study.

**Course Requirements**

American Sign Language (Minor)

The minor in American Sign Language at DePaul University provides students with a basic linguistic and cultural background, develops their creative and critical thinking skills, and helps to prepare them for a career in a multicultural world.

The minor consists of a total of 5 courses in American Sign Language at the 200/300-level.

American Studies (BA)

American Studies examines the breadth and diversity of the American experience. It is an interdisciplinary field that integrates the study of history, literature, popular culture, media, geography, politics, art, and religion in order to analyze critically American society, culture, institutions, and intellectual traditions. Students and faculty in American Studies question what constitutes American culture, and how cultural expressions reflect and reveal American values, beliefs, prejudices, pleasures, and perceptions.

American Studies courses are methodologically grounded in many different areas of cultural studies including media studies, material culture, visual literacy, critical race theory, and gender/sexuality studies. Students are expected to gain competency in American cultural studies by mastering the theoretical and intellectual frameworks of their concentrations and by learning to interpret and analyze primary documents.

Students in history, communication, anthropology, political science, sociology, English and other interdisciplinary programs find it beneficial to double major or minor in American Studies. Students who pursue Americans Studies are well prepared for graduate work in the humanities as well as professional training in law, business, and other fields. Most of our graduates go on to pursue post-graduate degrees.

**Learning Outcomes**

- Integrate a range of disciplinary approaches and methods into their written and oral projects;
- Find, use, and synthesize primary source material from multiple disciplines (including but not limited to textual sources, material culture, visual culture, music, and popular culture);
- Apply theories and methodologies drawn from cultural studies, cultural theory, or cultural criticism to their written and oral work;
- Analyze an event, source, idea or person within its historical context;
- Interprets or analyzes identities through an intersectional lens, where three or more areas of identity are examined in relationship to one another (such as the inter-workings of race, ethnicity, gender, sexuality, citizenship, class, ability, religion, etc.);
- Analyze historical and/or contemporary manifestations of inequality in power, resources, and access;
- Produce and communicate an interdisciplinary project that draws on primary and secondary source evidence to a broad audience.

**College Core Requirements**

**Study in the Major Field**

The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.
Because no academic major program is built in isolation, students are required to pursue a number of electives of the student's choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration
All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

The Modern Language Requirement (MLR)
All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
- completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

NOTE: Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

External Credit and Residency
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

• 2 Courses Required
  [1 Lab Course, and 1 SWK Course]

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
• 2 Courses Required

Notes

A student majoring in American Studies (AMS) is required to complete the Capstone offered by the AMS Department. AMS 301 may be waived for Honors students who are producing an Honors capstone thesis project and double majors when AMS is a student’s secondary major and the student completes a thesis project through a capstone in their primary major; in these cases AMS 301 must be replaced with a 300 level AMS course. Students seeking these exceptions must discuss with the AMS Program Director in advance.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

The American Studies major requires thirteen courses, detailed below.

• Five (5) core courses form the foundation of the program. Ideally, majors should complete these prior to the start of their senior year.
  a. Foundational course, Critical American Studies: AMS 201 (generally offered Winter quarter);
  b. Introduction to Historical Methods and Sources: HST 298 (offered every quarter);
  c. U.S. history course (see first list below).
  d. Intersectional & Transnational Approaches course (from second list below)
  e. Additional Method/Theory course (from third list below). Ideally, this will be connected to the student’s concentration & selected in consultation with your Major Advisor.

• One (1) American Studies Capstone course
  • AMS 301: During the fall quarter of their senior year, students should take AMS 301. Students will be sent instructions on how to prepare for the Senior Seminar by the Autumn Quarter instructor for the course. Students must earn a C- or better in this course. This course is waived for Honors students who are producing an Honors capstone thesis project and Double Majors when AMS is a student’s secondary major AND the student completes a thesis project through a capstone course in their primary major; in these cases AMS 301 must be replaced with a 300-level AMS course. Students seeking these exceptions must discuss with the AMS Program Director in advance.

• Five (5) interdisciplinary courses are selected to form one of five possible concentrations:
  • Popular Culture and Media Studies;
  • Social and Literary Movements;
  • Politics, Institutions and Values;
  • Comparative Race and Ethnic Studies; or
  • Material Culture and the Built Environment.
  At least three of the concentration courses must be at the 300-level.

• Two (2) Major Elective courses are selected to complement one’s work in American Studies.
  • In consultation with an advisor, students select two additional courses from outside the concentration.

Distribution Requirements

• For the concentration and the electives, no more than three courses for the major should be from any one department outside of AMS.
• Also, from the combination of concentration courses AND elective courses at least three courses should carry an AMS designator.
• At least three of the concentration courses should be at the 300-level.
• In no instance may a course double count within the major; in other words, a course taken to fulfill the method or theory course requirement in the core may not also simultaneously fulfill credits within the concentration or electives, etc. Likewise, a course taken to fulfill the “Additional Method/Theory” requirement may not also
simultaneously fill the "Intersectional & Transnational Approaches" requirement, etc.

To fulfill the U.S. History requirement, one of the following may be taken (please note that these courses may NOT double count to fulfill any other AMS requirement):

Comparative Race and Ethnic Studies Concentration, American Studies (BA)

American Studies has taken a central position in the analysis of American ethnicity and race. Early work in this area focused on the history and culture of specific groups, but as the field has developed, inquiry has turned to the theoretical and comparative analysis of race. Courses in this concentration encourage students to explore both the specificity and the diversity of race and ethnicity in American culture by taking some...
courses that focus on the experience of one racial or ethnic group and others that offer comparative perspectives.

**Concentration Courses**

Please note that the below list of possible courses is not exhaustive and that many courses listed under "TOPICS" headings may also count toward American Studies. Students may take an unlimited number of TOPICS courses, as long as the topic of each course is different.

Students must choose five courses from the following; however, exceptions may be granted by the Director of the American Studies Program. No more than three courses may be from any one department (AMS notwithstanding); at least three courses should be at the 300-level.

**Portfolio Requirement**

Students are encouraged to maintain an active record of documents from their concentration courses, including syllabi, completed written course work, collections of visuals, e.g., photo essays – whatever is appropriate to the six courses chosen for the concentration. Students will use these documents to aid them in writing reflective essays during the initial weeks of their senior seminar. These essays might ask you to consider “What were the course’s most valuable lessons in research, analysis, writing and communication? How did this course, taken together with the other courses you have chosen for your concentration, influence/develop your understanding of the area of American culture on which you are focusing?” These essays, along with representative assignments, will form the student’s American Studies “portfolio.” Students turn in their portfolio on the concentration, along with a proposal for the senior seminar project, in the first weeks of the senior seminar, AMS 301. Specific directions for the portfolio can be obtained from your American Studies advisor, from the American Studies Program office, or from the American Studies Program Director.

**Open Electives**

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

**Material Culture and the Built Environment Concentration, American Studies (BA)**

Students in this concentration study the complex interrelationships among the arts, craft, design, ideas, places, and social and cultural life in America. This concentration allows for the encyclopedic study of things in their historical context, drawing on methodologies and approaches from art and design history, economic history, history of technology, philosophy, anthropology, archaeology, and geography.

The curriculum combines two broad approaches: giving objects prime importance and placing objects in wider social and intellectual contexts.
Some courses raise issues related to media, techniques, aesthetics, production and consumption, historiography, and theory, while others focus on the role objects and places play in people's lives: the planning of cities, parks, and gardens; the design of buildings, interiors, and furnishings; clothing; jewelry and body adornment; the material culture of food, decoration, and ornament; illustration and the graphic arts. Students will explore the ways in which Americans have been shaped by and have shaped their physical environments, from "nature" to the urban environment.

**Concentration Courses**

Please note that the below list of possible courses is not exhaustive and that many courses listed under "TOPICS" headings may also count toward American Studies. Students may take an unlimited number of TOPICS courses, as long as the topic of each course is different.

Students must choose five courses from the following; however, exceptions may be granted by the Director of the American Studies Program. No more than three courses may be from any one department (AMS notwithstanding); at least three courses should be at the 300-level.

Portfolio Requirement

Students are encouraged to maintain an active record of documents from their concentration courses, including syllabi, completed written course work, collections of visuals, e.g., photo essays – whatever is appropriate to the six courses chosen for the concentration. Students will use these documents to aid them in writing reflective essays during the initial weeks of their senior seminar. These essays might ask you to consider "What were the course's most valuable lessons in research, analysis, writing and communication? How did this course, taken together with the other courses you have chosen for your concentration, influence/develop your understanding of the area of American culture on which you are focusing?" These essays, along with representative assignments, will form the student's American Studies "portfolio." Students turn in their portfolio on the concentration, along with a proposal for the senior seminar project, in the first weeks of the senior seminar, AMS 301. Specific directions for the portfolio can be obtained from your American Studies advisor, from the American Studies Program office, or from the American Studies Program Director.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Politics, Institutions and Values Concentration, American Studies (BA)

Students in the Politics, Institutions, and Values concentration examine the structural and cultural processes that shape the distribution of power and resources, and supply the cultural meanings for U.S. society. Courses in this concentration explore a variety of American institutions and social processes, among them the political system, the economy, the educational system, the health care arena, the justice system and numerous other cultural and social spheres. Students will study the dynamic relations among these realms in courses ranging from traditional disciplines, like Political Science and Sociology, to those within interdisciplinary programs such as Women's and Gender Studies and, of course, American Studies.

This concentration particularly encourages students to choose courses that emphasize an historical perspective in order to better understand the interplay of individuals, social groups and subcultures as they shape and are shaped by various institutions over time. A historical perspective also allows for comparisons among traditional, modern and contemporary methodologies for conceptualizing American society. Ultimately, students in the Politics, Institutions and Values concentration should develop the critical skills with which to analyze the complexity of the conflicts among these institutions and processes and their diverse participants, among ruling elites, their members and outsiders, and between the official discourses and the complex real outcomes.

Concentration Courses

Please note that the below list of possible courses is not exhaustive and that many courses listed under "TOPICS" headings may also count toward American Studies. Students may take an unlimited number of TOPICS courses, as long as the topic of each course is different.

Students must choose five courses from the following; however, exceptions may be granted by the Director of the American Studies Program. No more than three courses may be from any one department (AMS notwithstanding); at least three courses should be at the 300-level.

Portfolio Requirement

Throughout the concentration courses, students are required to maintain a "portfolio" which combines reflections on the courses with collections of course materials (syllabi, completed written course work, collections of visuals, e.g., photo essays - whatever is appropriate to the six courses chosen for the concentration). The reflections on each course and then on the concentration overall should include responses to questions such as "What were the course's most valuable lessons in research, analysis, writing and communication? How did this course, taken together with the other courses you have chosen for your concentration, influence/develop your understanding of the area of American culture on which you are focusing?" Students turn in their portfolio on the concentration, along with a proposal for the senior seminar project, in the first weeks of the senior semester. Specific directions for the portfolio can be obtained from your American Studies advisor, from the American Studies Program office, or from the American Studies Program Director.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Popular Culture and Media Studies Concentration, American Studies (BA)

The Popular Culture and Media Studies concentration in American Studies offers students an opportunity to explore the rich and complex role popular culture has played and continues to play in American life. In contrast to high culture or folk culture forms, "popular culture" generally refers to those commercialized leisure activities or arts that are broadly accessible to most Americans, either through their mass media production (music, radio, film, television, novels, newspapers, magazines, fashion) or wide availability (amusement parks, concerts, sports, Broadway shows, shopping malls, internet sites). Since the end of the nineteenth century, American culture has been defined through its popular arts, most obviously Hollywood films and television programs, and American popular culture and media products have had enormous effects on American identity.

Four broad sets of questions underpin our examination of American popular culture and media. First, what does our close examination of the formal elements of cultural products - their written and visual texts, their physical shapes and sounds - tell us about their specific cultural effects and meanings, both during the historical period in which they were produced and in the present? Second, how does examining the development processes and industrial histories of cultural products help us better understand their political, economic, technological, and social implications? Third, what does the reception of these products by audiences, either through live performances or mass media, tell us about their impact on the formation of American identities (gender, racial, sexual), values, and opinions? Finally, how does studying the history of American popular culture help us critically assess our current cultural politics and the role American popular culture continues to play in our understanding of ourselves as individuals, as members of social groups, and as national and international citizens?

In this concentration, students integrate courses from a number of disciplines, combining those that offer broad surveys of cultural development as well as close examinations of particular cultural products; students should also look for courses that offer a variety of methodological approaches to studying American popular culture.

Concentration Courses

Please note that the below list of possible courses is not exhaustive and that many courses listed under "TOPICS" headings may also count toward American Studies. Students may take an unlimited number of TOPICS courses, as long as the topic of each course is different.

Students must choose five courses from the following; however, exceptions may be granted by the Director of the American Studies Program. No more than three courses may be from any one department (AMS notwithstanding); at least three courses should be at the 300-level.

### Portfolio Requirement

Students are encouraged to maintain an active record of documents from their concentration courses, including syllabi, completed written course work, collections of visuals, e.g., photo essays – whatever is appropriate to the six courses chosen for the concentration. Students will use these documents to aid them in writing reflective essays during the initial weeks of their senior seminar. These essays might ask you to consider “What were the course’s most valuable lessons in research, analysis, writing and communication? How did this course, taken together with the other courses you have chosen for your concentration, influence/develop your understanding of the area of American culture on which you are focusing?” These essays, along with representative assignments, will form the student’s American Studies “portfolio.” Students turn in their portfolio on the concentration, along with a proposal for the senior seminar project, in the first weeks of the senior seminar, AMS 301. Specific directions for the portfolio can be obtained from your American Studies advisor, from the American Studies Program office, or from the American Studies Program Director.

### Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

### Social and Literary Movements Concentration, American Studies (BA)

The Social and Literary Movements concentration focuses upon two areas of study: major cultural products by the principal novelists, philosophers, poets, political and religious thinkers, historians, artists, musicians and intellectuals in American history; and major cultural movements which have shaped the world view and attitudes of literate Americans in American history.

In the first area of focus, a heavy emphasis will be given to individual creative work, its form and content, its specific antecedents and influences as well as its later impact, and the cultural and philosophical implications of the document itself. The relationship between each work and larger trends of the period, both cultural and social, will also be explored.

In the second field of study, the focus will be upon broader cultural movements which are diffused through the larger literate society, which include major cultural documents as well as popular expressions of these ideas, beliefs and attitudes. Thus, the focus here is on the cultural reception and diffusion of ideas, the relation between innovative movements and mainstream belief systems and attitudes, and the nature and direction of cultural exchange.

### Concentration Courses

Please note that the below list of possible courses is not exhaustive and that many courses listed under “TOPICS” headings may also count toward American Studies. Students may take an unlimited number of TOPICS courses, as long as the topic of each course is different.

Students must choose five courses from the following; however, exceptions may be granted by the Director of the American Studies Program. No more than three courses may be from any one department (AMS notwithstanding); at least three courses should be at the 300-level.

Portfolio Requirement
Students are encouraged to maintain an active record of documents from their concentration courses, including syllabi, completed written course work, collections of visuals, e.g., photo essays -- whatever is appropriate to the six courses chosen for the concentration. Students will use these documents to aid them in writing reflective essays during the initial weeks of their senior seminar. These essays might ask you to consider "What were the course's most valuable lessons in research, analysis, writing and communication? How did this course, taken together with the other courses you have chosen for your concentration, influence/develop you understanding of the area of American culture on which you are focusing?" These essays, a long with representative assignments, will form the student's American Studies "portfolio." Students turn in their portfolio on the concentration, along with a proposal for the senior seminar project, in the first weeks of the senior seminar, AMS 301.
Specific directions for the portfolio can be obtained from your American Studies advisor, from the American Studies Program office, or from the American Studies Program Director.

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

American Studies (Minor)
The six course American Studies minor offers a course of study on what constitutes American culture and how cultural expressions reflect and reveal American values, beliefs and perceptions.

Course Requirements
Course Title Quarter Hours
AMS 201 CRITICAL AMERICAN STUDIES (generally offered in Winter quarter) 4
Select four US topic courses (American Studies electives), one of which must have an AMS prefix. 16
Select one US survey course of the following: 4
Analytics Certificate

A certificate program in Analytics is intended for students with a bachelor degree who want to gain technical skills in data mining and big data analytics.

A student in a certificate program may not use a course already taken as part of an MS program. In particular, students with an MS from CDM may not reuse, for certificate credit, any course already taken for the MS. A faculty advisor can make an appropriate substitution. A student in a certificate program may substitute a maximum of two (2) courses.

A student must earn at least C- in each of the five (5) courses and earn a cumulative GPA of at least 2.5 to receive the certificate.

Students who do not have a background in statistical inference, linear algebra and programming will be required to take up to three (3) introductory courses.

Introductory courses can be waived by prior coursework, work experience or successful completion of a Graduate Assessment Examination (GAE) in the Introductory Course area.

Admission Requirements

The Certificate Program in Analytics has the same admission requirements as the MS in Data Science. After completing the certificate, students have the option to enroll in the MS degree and all courses from the certificate can be applied there.

All applicants must have:

- Successfully completed a bachelor’s degree or its equivalent from a regionally accredited institution.
- Have a minimum GPA of 3.0.
- Have completed two (2) courses in Calculus.

Choose non-degree seeking programs on the DePaul Application.

Animation (BA)

The BA in Animation focuses on 3D modeling and animation, hand-drawn animation, motion graphics, and stop-motion animation for game development, cinema, TV and interactive media.

## Learning Outcomes

Students will be able to:

- Demonstrate a solid foundation in design and traditional studio art, and will be able to use these skills in order to communicate effectively through visual means.
- Demonstrate knowledge of the history of animation through written critical evaluation of animated films and be able to analyze work in a historical context.
- Create work in a variety of animation techniques including hand-drawn, 3D animation, stop-motion and experimental methods.
- Implement the use of storyboarding, animatics, and essential pre-production techniques to develop a film concept.
- Discuss learning experiences across disciplines in the University and establish connections to their own animation practices.
- Utilize their skills to produce a number of animated films culminating in a thesis animation in the media of their choosing.

## Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

¹ Students must earn a C- or better in this course.

² Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam.

## Learning Domains

### Arts and Literature (AL) (p. 1300)

- **3 Courses Required**:
  - 2 Courses Required from the following list:
    - Any HAA course approved for A&L
    - ART 200
    - ART 220
    - GD 220
    - ILL 206
    - MCS 207
    - MCS 208
    - MCS 209
  - 1 Additional Course

### Historical Inquiry (HI) (p. 1304)

- **2 Courses Required**

### Math and Computing (MC) (p. 1306)

- **1 CR Course or 1 SR Course Required**

### Philosophical Inquiry (PI) (p. 1307)

- **2 Courses Required** (See note below)

### Religious Dimensions (RD) (p. 1312)

- **3 Courses Required**

Note

- Students must earn a C- or better in this course.

Students must take one of the following ethics courses: CSC 208 (PI), FILM 228/GAM 228/IT 228 (PI), PHL 248/MGT 248 (PI), REL 228/MGT 228 (RD).

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Select Forty-Eight Credit Hours of Open Electives \hspace{1em} 48

Students must earn a grade of C- or higher in all major elective courses.

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

See www.cdm.depaul.edu (http://www.cdm.depaul.edu) to see sample schedule of course requirements on a year-by-year basis.

Degree Requirements
Students in this degree must meet the following requirements:

• Complete a minimum of 192 credit hours (generally 48 courses).
• Earn a grade of C- or higher in WRD 103, WRD 104, and all Major and Minor courses.
• Earn a grade of D or higher in all other Liberal Studies and Open Elective courses.
• Maintain a cumulative GPA of 2.0 or higher.

Animation (BA), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

Students who meet the admission requirements below may choose to apply to a combined degree program. Interested students should consult their faculty advisor regarding the application procedure. This program allows students to combine many CDM bachelor’s degrees with a CDM master’s degree following the structure outlined below.

Admission Criteria

• Minimum of 44 quarter hours earned
• Minimum of 12 quarter hours earned at DePaul
• GPA of 3.3 or higher in courses taken at DePaul
• Full admission to the designated master’s program requires meeting admission requirements (https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx) for that program
• Faculty endorsement from a CDM full-time faculty member

Students should discuss their interest in a CDM combined degree program with a CDM faculty advisor. Before admission to the degree, students should work with the faculty advisor to identify a course plan for the combined degree program, including the list of courses to take and how the courses will be applied toward both the undergraduate and graduate degrees. Non-CDM students can email the CDM advising office (advising@cdm.depaul.edu) if interested in a combined degree with a CDM master’s degree.

If you are currently a CDM student and interested in combining your CDM bachelor’s degree with a non-CDM graduate degree, please contact the respective college for admission and application procedures.

Students enrolled in the Bachelor of Arts in Computing or the Bachelor of Arts in Professional Studies with a major in Computing (https://www.cdm.depaul.edu/academics/Pages/BA-Computing.aspx) joint degree programs between CDM and the School of Continuing and Professional Studies are eligible for this program. Interested students who meet the admission criteria for a combined degree should contact SCPS Academic Services (scpsadvising@depaul.edu) for more information. Advanced programs (e.g., JD/MS, MFA, and PhD) are not eligible for the combined degree program.

Program Structure

Students in the combined degree program take a maximum of three (3) graduate level courses that count toward both their bachelor’s and master’s degree requirements. Students may enroll in graduate level coursework in the junior and senior year only. Students in the combined degree program will receive the bachelor’s degree after meeting all graduation requirements including the minimum credit hours required for graduation.

To earn the master’s degree, the student must earn as many additional graduate credit hours as needed to reach the minimum number of graduate credit hours required in that master’s degree.
Maintaining Good Standing
Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter.

The student and faculty advisor will be notified when the student’s cumulative GPA falls below 3.3 or when the student receives less than a C- in a graduate level course.

If a student’s cumulative GPA falls below 3.3, the student must earn a term GPA of 3.3 or above in the following quarter to stay in good standing. If the student does not achieve a 3.3 term GPA, then the student will be dismissed from the combined program and resume the traditional B.A./B.S./B.F.A.

If dismissed from the combined degree program after graduate courses have been passed, the graduate courses may only apply to the undergraduate degree. Should the student later be admitted to a graduate program, graduate courses applied to the undergraduate degree may not apply to the graduate program and may not be repeated if they are required in the declared graduate curriculum. Other graduate courses may be substituted in this case.

Designing a Course of Study
It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the Combined Degree Program.

This course of study should include the graduate courses to be taken and the undergraduate courses that are replaced by the graduate courses. Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

It is advisable for the student and the faculty advisor to enter the proposed plan of study in the student communication record in BlueStar so it is available to the student and CDM faculty and staff.

Registering for Master's Degree Courses
Combined degree students must meet regularly with their faculty advisor. The faculty advisor will initiate the registration process for all graduate level courses taken during the undergraduate career.

Bachelor's Degree to Master's Degree Transition
In order to be fully admitted to the designated master's program, the student must meet all admission requirements for that program. When preparing to complete the undergraduate portion of the combined degree, students must submit the application for degree conferral for the undergraduate degree by the application deadline. At this time, the students should contact the CDM Academic Success Center about the procedure required to be formally admitted to the declared graduate program.

Animation (BFA)
The BFA in Animation provides students with a solid foundation in the art of animation and its history combined with insight into the latest techniques used in the rapidly-moving fields of high end 3D animation in the film, television, and game development industries.

Concentrations
3D Animation
The area of 3D animation dominates the film industry—five of the twenty-one top grossing films of 2017 were 3D animated, and eight of the top ten were heavily dependent on 3D animation for special effects.

Cinema Concentration
The technically demanding art of modern 3D character animation is grounded in the core fundamentals of animation mechanics, visual storytelling and acting. Right from the start, students in the Cinema Animation concentration gain hands-on experience bringing digital characters to life. They are given in-depth instruction in the most up-to-date software and technology available, including motion capture and green screen, but the emphasis is always on creativity, experimentation and expression.

Game Art Concentration
Becoming a game development artist requires a solid foundation in animation, visual design principles, color theory, and drawing. Students in the Game Art concentration also receive in-depth instruction in the latest advanced game modeling and animation technology and practices, including motion capture, rigging and digital sculpting. They learn about real-world problem-solving, team dynamics, and pipeline requirements while working alongside programmers and game designers on cross-disciplinary game development projects.

Motion Graphics Concentration
Motion Graphics, sometimes known as Motion Design, involves putting graphic forms, text, and photographic elements into motion using the principles of animation. These are almost always paired with sound and music for a specific purpose, such as in advertisements, educational and industrial videos, films and television titles, visual effects, and video games. Chicago is a major center for commercial advertising production, and Motion Graphics is a significant part of the commercial production and post-production process.

Storyboarding and Character Design Concentration
Storyboard artists are in demand in the television and feature film animation industries. A storyboard artist can also find work storyboarding live action films, visual effects, and commercials. The skills of the storyboard artist can also be applied to graphic novels and comics. Character design is a much sought-after role in animation, game art, live action film, comics, and children’s literature. Both disciplines share a requirement for strong traditional drawing skills.

Visual Effects Animation Concentration
The VFX Animation concentration in the Animation BFA deals with the artistic creation and animation of computer-generated 3D creatures, vehicles, objects, and environments for use in the live action film and television industries. Think of the T-Rex from Jurassic Park, the AT-ATs of Rogue One, or the future Los Angeles of Blade Runner 2049. The concentration combines a solid animation foundation with specialized VFX courses. VFX careers in live action film and television require skills ranging broadly from live action compositing to 3D character animation. Skilled VFX artists are in high demand within the feature film, television, commercial, and new media industries. This concentration complements
the VFX concentration in the Film & Television BFA, which is balanced more towards live action production.

Concentration Requirement

Students must also complete the requirements from one (1) of the following concentrations: 3D Animation, Cinema, Game Art, Motion Graphics, Storyboarding and Character Design, or Visual Effects Animation

Degree Requirements

Students in this degree must meet the following requirements:

- Complete a minimum of 208 credit hours.
- Earn a grade of C- or higher in WRD 103, WRD 104, and all Major and Minor courses.
- Earn a grade of D or higher in all other Liberal Studies and Open Elective courses.
- Maintain a cumulative GPA of 2.0 or higher.

Concentration Requirements

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

- 3D Animation Concentration, Animation (BFA) (p. 99)
- Cinema Concentration, Animation (BFA) (p. 101)
- Game Art Concentration, Animation (BFA) (p. 102)
- Motion Graphics Concentration, Animation (BFA) (p. 103)

CDM Electives
CDM electives can be any undergraduate course in the college of Computing and Digital Media.

Open Electives
Open Elective credit hours are required to meet the minimum graduation requirement of 208 hours. Open Electives may be taken from any unit at DePaul.

Animation (BFA), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s/Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

Students who meet the admission requirements below may choose to apply to a combined degree program. Interested students should consult their faculty advisor regarding the application procedure. This program allows students to combine many CDM bachelor’s degrees with a CDM master’s degree following the structure outlined below.

Admission Criteria

- Minimum of 44 quarter hours earned
- Minimum of 12 quarter hours earned at DePaul
- GPA of 3.3 or higher in courses taken at DePaul
- Full admission to the designated master’s program requires meeting admission requirements (https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx) for that program
- Faculty endorsement from a CDM full-time faculty member

Students should discuss their interest in a CDM combined degree program with a CDM faculty advisor. Before admission to the degree, students should work with the faculty advisor to identify a course plan for the combined degree program, including the list of courses to take and how the courses will be applied toward both the undergraduate and graduate degrees. Non-CDM students can email the CDM advising office (advising@cdm.depaul.edu) if interested in a combined degree with a CDM master’s degree.

If you are currently a CDM student and interested in combining your CDM bachelor’s degree with a non-CDM graduate degree, please contact the respective college for admission and application procedures.

Students enrolled in the Bachelor of Arts in Computing or the Bachelor of Arts in Professional Studies with a major in Computing (https://www.cdm.depaul.edu/academics/Pages/BA-Computing.aspx) joint degree programs between CDM and the School of Continuing and Professional Studies are eligible for this program. Interested students who meet the admission criteria for a combined degree should contact SCPS Academic Services (scpsadvising@depaul.edu) for more information. Advanced programs (e.g., JD/MS, MFA, and PhD) are not eligible for the combined degree program.

Program Structure

Students in the combined degree program take a maximum of three (3) graduate level courses that count toward both their bachelor’s and master’s degree requirements. Students may enroll in graduate level coursework in the junior and senior year only. Students in the combined degree program will receive the bachelor’s degree after meeting all graduation requirements including the minimum credit hours required for graduation.

To earn the master’s degree, the student must earn as many additional graduate credit hours as needed to reach the minimum number of graduate credit hours required in that master’s degree.

Only CDM courses can be taken as part of this program. Advanced programs (e.g., JD/MS, MFA, and PhD) are not eligible for the combined degree program.

Maintaining Good Standing

Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter.

The student and faculty advisor will be notified when the student’s cumulative GPA falls below 3.3 or when the students receives less than a C- in graduate level course.

If a student’s cumulative GPA falls below 3.3, the student must earn a term GPA of 3.3 or above in the following quarter to stay in good standing. If the student does not achieve a 3.3 term GPA, then the student will be dismissed from the combined program and resume the traditional B.A./B.S./B.F.A.

If dismissed from the combined degree program after graduate courses have been passed, the graduate courses may only apply to the undergraduate degree. Should the student later be admitted to a graduate program, graduate courses applied to the undergraduate degree many not apply to the graduate program and may not be repeated if they are required in the declared graduate curriculum. Other graduate courses may be substituted in this case.

Designing a Course of Study

It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the Combined Degree Program.

This course of study should include the graduate courses to be taken and the undergraduate courses that are replaced by the graduate courses.
Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

It is advisable for the student and the faculty advisor to enter the proposed plan of study in the student communication record in BlueStar so it is available to the student and CDM faculty and staff.

Registering for Master's Degree Courses

Combined degree students must meet regularly with their faculty advisor. The faculty advisor will initiate the registration process for all graduate level courses taken during the undergraduate career.

Bachelor's Degree to Master's Degree Transition

In order to be fully admitted to the designated master's program, the student must meet all admission requirements for that program. When preparing to complete the undergraduate portion of the combined degree, students must submit the application for degree conferral for the undergraduate degree by the application deadline. At this time, the students should contact the CDM Academic Success Center about the procedure required to be formally admitted to the declared graduate program.

**Open Electives**

Open elective credit also is required to meet the minimum graduate requirements of 208 hours.
Animation (MA)

The MA in Animation provides a combination of artistic and technical training that prepares students for a future in traditional and 3D animation, computer game art, pre-production, motion graphics, and visual effects.

Concentrations

3D Animation

The 3D Animation concentration is for students interested in 3D animated film making. Students will learn all the 3D tools necessary to realize their cinematic vision, including the most current approaches to 3D animation, modeling, texturing, lighting, rigging, visual effects, compositing, and rendering. Students will complement their 3D studies with a solid foundation in studio art, visual design, art history, and traditional approaches to cinematic film making.

Motion Graphics

Motion Graphics, sometimes known as Motion Design, involves putting graphic forms, text, and photographic elements into motion using the principles of animation. These are almost always paired with sound and music for a specific purpose, such as in advertisements, educational and industrial videos, films and television titles, visual effects, and video games.

Storyboarding and Character Design

Storyboard artists are in demand in the television and feature film animation industries. A storyboard artist can also find work storyboarding live action films, visual effects, and commercials. The skills of the storyboard artist can also be applied to graphic novels and comics. Character design is a much sought-after role in animation, game art, live action film, comics, and children's literature. Both disciplines share a requirement for strong traditional drawing skills, so a drawing portfolio is a crucial part of application to this concentration.

Technical Artist Concentration

The Technical Artist Concentration prepares students for a range of technical roles, from the complex jobs of riggers, next generation modelers and motion capture artists to the hybrid specialization of the Technical Artist. A game industry Technical Artist is an art department member who serves as a bridge between art and engineering. In the film and television CGI animation and VFX industries the Technical Artist is more commonly referred to as a Technical Director or Technical Animator.

Traditional Animation

The Traditional Animator Concentration is for students who are interested in deepening their knowledge of traditional animation, including hand-drawn, stop motion, and hybrid methods, with an eye towards a production career in animation. Students in this concentration will have training in the history, critical artistic issues, and fundamental principles that are necessary for animation artists. MA in Animation graduates will be prepared for many varied career options available to animators, including storyboard artists, visual development artists, layout artists, character animators, and commercial animators.

Learning Outcomes

Students will be able to:

- Examine the historical foundations of animation, and analyze the relationships between animation and other arts.
- Utilize critical and historical analysis to inform their specific area of study.
- Apply essential concepts and utilize tools necessary for 3D production including modeling, lighting, texturing and rendering.
- Demonstrate a high level of competence in 2D or 3D animation technique.
- Implement the use of storyboarding, animatics, and essential pre-production techniques to develop a film concept.
- Produce animated films both collaboratively and as solo ventures.

Degree Requirements

Course Requirements

Course requirements are determined by the concentration selected.

No Introductory Course may be substituted for any other course at any level.

Degree Requirements

Students in this degree program must meet the following requirements:

- Complete a minimum of 52 graduate credit hours in the designated program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all graduate courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
- Students pursuing a second master's degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.
For DePaul's policy on repeat graduate courses and a complete list of academic policies see the DePaul Graduate Handbook in the Course Catalog.

Concentration Requirements
Concentrations, tracks and specializations provide focus to the degree. In addition to any degree requirements, students are required to choose one of the following:

- 3D Animation Concentration, Animation (MA) (p. 107)
- Motion Graphics Concentration, Animation (MA) (p. 108)
- Storyboarding and Character Design Concentration, Animation (MA) (p. 109)
- Technical Artist Concentration, Animation (MA) (p. 109)
- Traditional Animation Concentration, Animation (MA) (p. 110)

CDM Open Electives
Students must complete eight (8) credit hours of graduate courses from the College of Computing and Digital Media. Elective courses must be in the range of 421 to 699.

Animation (MA), Combined Bachelor's + Master's Degree

The combined Bachelor's + Master's degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

DePaul Undergraduate Degree + Animation (MA)
The Animation (MA) combined degree program is open to all undergraduate majors across the university.

Students who are interested in this program and meet the following criteria

- Sophomore status (at least 44 quarter hours earned)
- Minimum of 12 quarter hours earned at DePaul
- GPA of 3.3 or higher in courses taken at DePaul
- Full admission to the designated master's program requires meeting admission requirements (https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx) for that program
- Faculty endorsement from a CDM full-time faculty member

Students should review the information online (https://www.cdm.depaul.edu/academics/Pages/CombinedDegrees.aspx) to follow the instructions to submit an application.

If accepted, a student can take up to three graduate courses (12 credits). These three courses count towards both the bachelor's program and the Master of Arts degree. Students will pay the current undergraduate tuition rate for these three courses.

Maintaining Good Standing

- Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter

CDM Open Electives

Students must complete eight (8) credit hours of graduate courses from the College of Computing and Digital Media. Elective courses must be in the range of 421 to 699.

Designing a Course of Study

It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the Combined Degree Program. This course of study may include which undergraduate classes to avoid taking in order to take the graduate version. Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

Registering for Master's Degree Courses

The student’s advisor must complete the BS/MS Request form, under the Faculty tab on the CDM Intranet, to request the student’s enrollment in the three graduate courses. The form will require the following data: student’s full name, graduate course and section, and the undergraduate course to be substituted for. The CDM dean’s office will process the enrollment.

Bachelor’s Degree to Master’s Degree Transition

In order to be fully admitted to the designated master’s program, the student must meet all admission requirements for that program. Learn more about master’s degree admission requirements (http://www.cdm.depaul.edu/Prospective%20Students/Pages/MastersDegreeStudents.aspx). Students will follow the master’s degree program requirements for the term they are admitted to the master’s degree program.

Double Demon Scholarship

The Double Demon scholarship, offered exclusively to DePaul alumni, covers 25 percent of the tuition for a master’s degree or select certificate programs. Combined degree program students are eligible.

Alumni from any of DePaul’s colleges who are admitted into a graduate degree program from one of these programs automatically qualify for the Double Demon Scholarship. This scholarship is available for new part-time or full-time students who began a master’s degree in CDM in winter 2012-2013 or later and the other colleges beginning in winter 2013-2014. It cannot be applied retroactively.

There is no limit to the amount of courses that can be taken by eligible students. However, students may not take more than four courses in any quarter without permission from the college. The scholarship cannot be applied to cover fees or other non-tuition costs.

**Open Electives**

Students must complete the eight (8) credit hours of Open Electives from graduate courses in the College of Computing and Digital Media. Open Elective courses must be in the range of 421 to 699.

### Technical Artist Electives

Students must select the required 16 credit hours of Technical Artist Electives from the following choices. Students may take these courses before completing their Core Requirements courses. It is recommended that students choose their Technical Artist Elective courses in one of the following areas of focus: Rigging, Animation, Modeling, or Visual Effects.

#### Rigging Focus Area

CDM Open Electives

Students must complete sixteen credit hours of graduate courses from the College of Computing and Digital Media. Elective courses must be in the range of 421 to 699.

Animation (MFA)

This degree is for students who are interested in creating original animated films and artwork as their main vocation. Students in the MFA in Animation program will receive intense and rigorous training in the history, critical artistic issues, and fundamental principles that are necessary for animation artists.

Program Requirements

<table>
<thead>
<tr>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

- Examine the historical foundations of animation, and analyze the relationships between animation and other arts.
- Utilize critical and historical analysis to inform their specific area of study and develop personal voice.
- Demonstrate skills necessary for the creation of animation in game development, 3D and 2D animated films, television or effects animation.
- Produce animated films both collaboratively and as solo ventures.
- Acquire and utilize contemporary and professional practices in animation education.
- Demonstrate their abilities as contributing artists in the field of animation by the completion of an animated thesis film.

</tbody>
</table>

After successfully completing ANI 603, students may continue to work on their Thesis Projects in the zero-credit ANI 701 until they successfully complete their project.

- ANI 701 allows students to maintain status without additional cost.
**CDM Electives**

Twenty-eight (28) credit hours of open electives are required and may be chosen from any graduate level CDM courses. Introductory courses from any CDM graduate program may not be used as CDM electives in this program.

**MFA Short Film Sequence**

This course will start out with research, including an examination of animated short film examples as role models. Students will then work on developing ideas and pre-production. The instructor will be responsible for helping the students determine what method of animation they want to use, and identifying faculty mentors who can help them with the method. The students will complete their short film by the end of Spring quarter. Successful completion of ANI 503 is required in order to progress to ANI 601, so if a student doesn't show adequate progress they may be delayed or recommended to switch to the MA program. All MFA majors will be subject to review at the end of their first year before they are allowed to proceed to the MFA Thesis Project sequence. At the end of the first year the ANI MFA Committee will meet and decide, using a clear rubric, whether MFA students should be allowed to proceed to the MFA Thesis Project sequence. The instructor of the MFA Short Film sequence will provide written recommendations to the committee. The committee will view the films created in the MFA Short Film sequence, and special consideration will be given to the opinions of faculty who have had the students in class and/or have served as their mentors. Students who are not approved to the MFA Thesis phase will be allowed to complete the requirements for the ANI MA in the concentration of their choice. Their faculty advisor will help them substitute the MFA Short Film sequence courses for MA requirements if necessary.

**MFA Thesis Project Sequence**

We use the word “project” instead of film because we are open to and encourage alternative animation solutions beyond films, including TV shows, installations, interactive/game projects, augmented/virtual reality, performance, and others. Students will be strongly encouraged to work on their thesis project concepts over the summer before their second year. At the beginning of the fall quarter each student will consult with the instructor to choose their MFA Thesis Committee. They will work on a thesis proposal at the beginning of Fall quarter, which must be approved by the instructor and their MFA Thesis Committee before proceeding with production. Students will work on their thesis projects throughout the year.

**MFA Faculty Mentors**

Every quarter of their first year each MFA student will choose two faculty mentors from among the full-time faculty. They cannot choose a faculty mentor who is currently their MFA Short Film instructor. They cannot choose the same faculty mentor two quarters in a row. No faculty mentor will mentor more than two MFA students each quarter. MFA students must schedule meetings (during the faculty member’s office hours) with each faculty mentor at least two times during the quarter. These meetings will be used for feedback and suggestions for the student’s short film. In addition to helping the students and building a sense of community, this will also better prepare faculty for the students’ thesis defense and give the student better knowledge for their choice of their MFA Thesis Committee. Non-Animation full-time faculty may be chosen as faculty mentors with the approval of the Short Film instructor.

**MFA Thesis Committee**

At the beginning of their second year, in consultation with the MFA Thesis Project instructor, all MFA students will choose a three member MFA Thesis Committee, and designate one of these three full-time faculty members as their Thesis Chair. Non-Animation full-time faculty may be members of a thesis committee with the approval of the MFA Thesis Project instructor. MFA students must schedule meetings (during the faculty member's office hours) with each thesis committee member at least once during the quarter. These meetings will be used for feedback and suggestions for the student’s thesis film. Students should continue to meet regularly with their committee during the thesis continuation process.

**MFA Thesis Continuation**

After the second year MFA students may use this zero-credit course, which they don’t pay for, to continue working on their thesis projects until completion. MFA students have five years to successfully complete their thesis project, which must be approved by ANI faculty (see MFA Thesis Defense). In extreme circumstances a student may ask for the deadline to be extended, but they must receive approval from their Thesis Chair.

**MFA Thesis Defense**

At the completion of their thesis project all students must publicly screen/exhibit their projects. The ANI MFA Committee meets with the MFA candidate and questions them about their project. A supermajority of the committee is required for approval of the MFA. A student whose project was not approved may reapply up to two times for approval.

The admission process for the MFA will not change. All applicants are subject to portfolio review and vote by the Animation MFA Committee. MFA students will only be admitted to start in the Fall quarter.

**Degree Requirements**

Students in the MFA in Animation degree program must meet the following requirements:

- Complete a minimum of 80 graduate credit hours in the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all graduate courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Satisfactorily complete the MFA thesis as determined by the student’s MFA Advisor Committee.
- Students cannot count credit earned towards a previously awarded master’s or MFA degree toward the completion of this MFA program.

For DePaul’s policy on repeat graduate courses and a complete list of academic policies see the DePaul Graduate Handbook in the Course Catalog.

**Animation (Minor)**

The minor in Animation at DePaul emphasizes solid traditional animation and storytelling skills, while encouraging experimentation in form, content and medium.

Anthropology (BA)

Anthropology is the comparative study of humanity, focusing on people in all places and throughout history and prehistory. Courses engage students in the analysis of beliefs, values, and practices from a perspective that understands societies on their own terms. This perspective includes comparing the similarities and differences among different groups and appreciating and valuing different ways of living. Students study other cultures in order to learn more about their own. This curriculum affords students the opportunity to see the interaction between "what we know" and "what we do" that lies at the heart of the study of humanity.

Our curriculum combines the best parts of a critical, creative, liberal arts education with practical, professional preparation. The major courses direct the student toward the subfields of cultural anthropology, biological anthropology and archaeology, with a focus on applied research in these sub-fields. As part of the major, students engage in several research projects, including those that expose them to the application of anthropological knowledge for non-academic audiences, and to archaeological field methods. Out-of-class research projects in the City of Chicago are integral components of several courses. Students graduate with an extensive knowledge of how anthropology is actually done. We bring students farther into this practical side of the discipline than any other BA program in the country.

Academic careers are attractive to some graduates, but more than half of all professional anthropologists work outside of academic institutions. Some of these careers include research for public and private organizations, administration and/or public policy on the local, regional, federal, or international level; research and work in museums; intercultural communication; advertising, marketing, and public relations; human resources, public health, health care, and law. They also contribute to non-governmental and international organizations. Within the context of administration or public policy, anthropologists are engaged in cultural resource management (CRM), monitoring the preservation of cultural resources for national parks, museums, and state or municipal cultural institutions (i.e., parks and historical societies). Anthropology enhances other career paths, such as modern languages, international studies, international relations, cultural studies, and international business. Students will have completed at least four ethnographic research projects and be qualified in archaeological research skills by the time they graduate.

The extensive ethnoarchaeological research experience qualifies students with BA degrees to work in both non-profit (social service agencies) and for-profit (marketing, design, user-based) research settings. The extensive ethnographic research experience qualifies students with BA degrees to work in both non-profit (social service agencies) and for-profit (marketing, design, user-based) research settings. The archaeological certification opens avenues for careers in cultural resource management (CRM), monitoring the preservation of cultural resources for national parks, museums, and state or municipal cultural institutions (i.e., parks and historical societies). Anthropology enhances other career paths, such as modern languages, international studies, international relations, cultural studies, and international business. Students will have completed at least four ethnographic research projects and be qualified in archaeological research skills by the time they graduate.

Learning Outcomes

Students will be able to:

- Assess core anthropological concepts.
- Generate results of anthropological research.
- Disseminate anthropological research findings to multiple audiences.
- Demonstrate anthropological methods.
- Apply ethical principles of anthropology.
criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration
All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

The Modern Language Requirement (MLR)
All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
- completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Students who have met the MLR and wish to pursue further work in the language may elect the “Modern Language Option” (see below).

The Modern Language Option (MLO)
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

NOTE: Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

External Credit and Residency
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Select five 200/300 level ANT courses

| 100 level courses do not count as electives unless approved by the chair. |

#### Experiential Learning and Senior Capstone

Majors in anthropology are expected to fulfill their junior year experiential learning (JYEL) and senior capstone (SC) requirements with ANT 322 and ANT 396 respectively. Both of these courses are recognized by the Liberal Studies Council as fulfilling these requirements. Students may take other junior year experiential learning and senior capstone courses, but are still required to take these two courses (or designated alternatives) to fulfill the major with the permission of the department chair. When students take ANT 322 to fulfill the JYEL requirement they must take an additional course in a liberal studies learning domain of their choice.

#### Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

### Anthropology 3+3 (BA+JD)

In the 3+3 (BA+JD) Program, high-achieving incoming first-year undergraduate students are admitted simultaneously to the College of Liberal Arts and Social Sciences and the College of Law. Students complete their first three years in the College of Liberal Arts and Social Sciences and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA+JD students meet
regularly with advisors in both Colleges and have access to a variety of resources to ensure their success.

**Key Program Features**

- Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
- Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
- Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
- Students receive early (conditional) admission to the College of Law.
- Credits earned in the first year of law school apply toward the BA degree.
- Students may opt out of the College of Law segment of the program and continue in the College of Liberal Arts and Social Sciences during their fourth year.
- If students withdraw after the first semester in the College of Law, they return to the College of Liberal Arts and Social Sciences for the winter quarter.

**Program Requirements**

In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements.

Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study. These classes can be found in the Core Required Program Requirements.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRELAW 150</td>
<td>THE PRACTICE OF LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 151</td>
<td>RECENT CONTROVERSIES IN THE LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 152</td>
<td>THINKING ABOUT THE LAW</td>
<td>2</td>
</tr>
</tbody>
</table>

In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law’s online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant’s third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These classes can be found in the Core Required Courses on the Law JD program page (p. 677).

**Financial Aid**

BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law’s median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

**Anthropology (BA) + Secondary Education Social Science (MEd)**

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The TEACH Program combines a Liberal Arts and Social Sciences (LAS) undergraduate Social Science major (Anthropology, Economics, Geography, History, Political Science, or Sociology) or a Science and Health (Psychology) major with a graduate level College of Education (COE) Master’s in Education Program. Students graduate with a BA or BS in their disciplinary major and a MEd in Education with State of Illinois Secondary Social Science licensure.

Students may apply to the TEACH Program during the spring of their junior year. They must enroll in the Junior Year Experiential Learning course, TCH 320, and meet other application criteria; these include completion of at least 16 quarter credit hours at DePaul and a 3.0 GPA. During their senior year, students are required to complete a TEACH Program capstone course, TCH 390, and three 400-level courses that count toward both their undergraduate and graduate degrees:

**Junior Year Coursework: 4 undergraduate quarter hours required**

<table>
<thead>
<tr>
<th>Course</th>

</tbody>
</table>
Social Science Content Area (grades of C or better required for licensure):
The following Social Science content area requirements are required. These can be taken as part of the major, liberal studies or open elective requirements:

- HST 298
- HST 299
- 3 United States History courses
- 2 Non-United States History courses
- 6 from the anthropology major
- Additional licensure requirements: (one course in each area required)
  - Geography (GEO 101 recommended)
  - Political Science (PSC 120 recommended)
  - Psychology (PSY 105 recommended)
  - Sociology (SOC 101 recommended)

This combined degree program of the College of Liberal Arts and Social Sciences and the College of Education was collaboratively developed, and is governed and taught by faculty from these units.

The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring quarter. Upon graduation and the fulfilling of State of Illinois licensure requirements (which may require some additional course work in the student’s major and related fields), students are eligible to be licensed to teach Social Sciences at the 5th-12th grade levels.

A full description of the TEACH Program can be found here. (p. 1145)

Students interested in the TEACH Program should consult with the designated TEACH Program advisor in their home department.

Anthropology (Minor)
The minor in Anthropology is intended to give you an overview of the discipline. You will study beliefs, values and practices of various cultures and will compare similarities and differences among diverse groups.

Course Requirements

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Select any three additional courses from the anthropology curriculum for which the student has the prerequisites, including at least one 200-level and one 300-level course.

Students majoring in Anthropology (BA) or minoring in Archaeology are restricted from earning this minor.

Applied Behavioral Sciences (BA)
The Bachelor of Arts in Applied Behavioral Studies degree from the School of Continuing and Professional Studies (SCPS) is an accelerated, inter-disciplinary, 2-year degree completion program for adult students. This degree is offered at the Loop campus and online. This course-based major is for graduates of community colleges with an Associate’s degree who seek broad interdisciplinary preparation for a career in human services, social work, nonprofit management and other related fields.

Applicants to the Bachelor of Arts in Applied Behavioral Sciences need an Associate in Arts or an Associate in Science (from IL schools; other degrees to be evaluated), or have earned 66 semester credit hours, applicable to the program based on review and evaluation. The major consists of courses from the Department of Psychology, the College of Communication, and the School of Continuing and Professional Studies, which offers the majority of courses, including a unique series of Adult Learning Seminars. The courses in the major provide students with multiple perspectives on human behavior, interaction and communications.

- Flexible scheduling including online options available
- Financial Aid, flexible payment options, and special adult student tuition pricing
- Acceleration and affordability through transfer credit and prior learning assessment (PLA) credit
- Opportunities to combine bachelor’s and master’s programs and apply graduate courses to both programs
- Individualized program planning, course selection and advising assistance provided
- Enhanced career opportunities through professional portfolio development, and career placement services instruction from industry practitioners, and wide-ranging Career Services support
- Degree granted by DePaul University, with its excellent academic reputation and the opportunity to join its prestigious and extensive alumni network

Applied Diplomacy (BA)

The practice of diplomacy in the 21st Century requires new and creative responses to the complex nature of bridge building, community formation and conflict resolution. While the work of nation-state diplomatic corps representatives remains central to such efforts, diplomacy is also practiced by multiple non-state actors and individuals, including business people, scientists, artists, community organizers, activists, clergy and educators. Diplomacy today is truly transprofessional.

DePaul’s program in Applied Diplomacy addresses these realities through an innovative program designed to train a new generation of diplomats. At both the undergraduate and graduate level the curriculum is multidisciplinary in expertise, deeply rooted in an ethic of collaboration and is designed to serve the needs of bridge builders across multiple boundaries of difference.

What would it look like if a future nation-state diplomat spent time with Chicago-based community organizers, in order to learn about the real-world intricacies of negotiation and coalition-building across boundaries of difference? Can you imagine a world in which a Chicago community organizer has the same background in international relations, international political economy and mediation as a peer in the foreign service?

DePaul's Applied Diplomacy program is dedicated to re-conceptualizing the practice of diplomacy to make these interconnections possible. Uniting traditional and non-traditional approaches to the field, the program seeks to transform our understanding of both. We emphasize the critical necessity for practitioners of diplomacy to become culturally, racially, ethnically, ecologically and religiously literate, and embrace an interdisciplinary and intercultural definition of the term diplomacy.

<tbody>
<tr>
<td>Liberal Studies Requirements</td>
</tr>
<tr>
<td>Degree (Core + Concentration) Requirements</td>
</tr>
<tr>
<td>Open Electives</td>
</tr>
<tr>
<td>Total hours required</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

- Recognize the inherent interdependence between the local and the global
- Explain how diplomacy is not only practiced by elite nation-state actors but also by people on the ground of diverse professions, social locations and worldviews
- Define the core concepts which guide the study of statecraft, nation-state diplomacy, comparative politics and international relations
- Describe the relationship between track-one and track-two diplomacy and the potential of this relationship to be more deeply integrated
- Explain how the world’s neighborhoods, community groups, cities, states, regions, and transnational environmental realities are interdependent and cannot be understood in isolation
- Achieve competency in a second language, not only to communicate with others but also as a means of understanding that each language comes with particular worldviews, strengths and limitations which inform the practice of diplomacy
• Analyze, understand and critique both normative and non-normative definitions of power, and the unique contributions both make toward the work of diminishing conflict and promoting peace-building
• Explain the profound value of being able to understand and learn from communities that are not one’s own through the lens of art, culture, language, religion and the experiences of others.

College Core Requirements
Study in the Major Field
The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration
All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

The Modern Language Requirement (MLR)
All students will be required to demonstrate competence in a modern language (i.e., a language other than English) to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

• placing into 104 or above on the DePaul language placement exam
• completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
• completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
• completing the final course of a four-year sequence of the same modern language in high school
• completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
• completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the “Modern Language Option” (see below).

The Modern Language Option (MLO)
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

NOTE: Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

External Credit and Residency
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Required

1. Students must earn C- or better in this course.
2. Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete LSP 120 and both a Computational Reasoning course and a Statistical Reasoning course in the Math and Computing Domain take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and cannot be applied to the SI Domain.

### Learning Domains

**Arts and Literature (AL) (p. 1300)**
- 3 Courses Required

**Historical Inquiry (HI) (p. 1304)**
- 2 Courses Required

- 2 Courses Required
  - 1 CR Course, and 1 SR Course

**Philosophical Inquiry (PI) (p. 1307)**
- 2 Courses Required

**Religious Dimensions (RD) (p. 1308)**
- 2 Courses Required

**Scientific Inquiry (SI) (p. 1310)**
- 2 Courses Required
  - 1 Lab Course, and 1 SWK Course

**Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)**
- 1 Course Required

### Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

### Major Core Requirements

Modern Language Component: 24

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following concentrations. Majors will take six courses from their chosen concentration, two of which must be at the 300 level.

- Diplomacy and Critical Theory, Applied Diplomacy (BA) (p. 120)
- Diplomacy and International Law, Applied Diplomacy (BA) (p. 120)
- Diplomacy and International Political Economy, Applied Diplomacy (BA) (p. 120)
- Diplomacy and International Relations, Applied Diplomacy (BA) (p. 120)
- Diplomacy and Religion, Applied Diplomacy (BA) (p. 121)
- Diplomacy and the Arts, Applied Diplomacy (BA) (p. 121)
- Diplomacy, Culture, and Identity, Applied Diplomacy (BA) (p. 122)
- Diplomacy, Non-Governmental Organizations, and Peacebuilding, Applied Diplomacy (BA) (p. 123)
- History of Diplomacy, Applied Diplomacy (BA) (p. 123)
- Language and Diplomacy, Applied Diplomacy (BA) (p. 124)
- Urban Diplomacy, Applied Diplomacy (BA) (p. 128)

## Diplomacy and Critical Theory, Applied Diplomacy (BA)

<table>

Language and Diplomacy, Applied Diplomacy (BA)

The Language and Diplomacy BA Concentration

The structure of the Language and Diplomacy BA concentration is as follows. Students will be able to select six 200- or 300-level courses from 1. target language courses, 2. courses in translation and interpretation, and 3. linguistics courses.

At least two of the concentration courses must be at the 300 level. At least three of the concentration courses must be in a target language.

Embedded in this concentration are the following possibilities:

- If students take five courses at the 200 or 300 level in their chosen target language, they’ll also earn the standard language minor in that language.
- If students choose three of their courses in Translation and Interpreting, they’ll have earned the Undergraduate Certificate in Translation and Interpreting after taking the two-credit hour “TIC” practicum (MOL 379).
- If students choose three of their courses in Linguistics, they’ll be halfway to earning the six-course Linguistics minor.

Students fulfilling the requirements of this concentration have the possibility of choosing to take courses in more than one language, but the majority of students will focus on one language. Students selecting this concentration for their major in Applied Diplomacy are expected to work closely with an advisor, in order to insure that their course selections both fulfill the requirements of the concentration and are best tailored to fit with their vocational trajectory.

TARGET LANGUAGE COURSES:

Arabic

### Applied Diplomacy (MA)

The practice of diplomacy in the 21st Century requires new and creative responses to the complex nature of bridge building, community formation and conflict resolution. While the work of nation-state diplomatic corps representatives remains central to such efforts, diplomacy is also practiced by multiple non-state actors and individuals, including business
people, scientists, artists, community organizers, activists, clergy and educators. Diplomacy today is truly transprofessional.

DePaul’s program in Applied Diplomacy addresses these realities through an innovative program designed to train a new generation of diplomats. At both the undergraduate and graduate level the curriculum is multidisciplinary in expertise, deeply rooted in an ethic of collaboration and is designed to serve the needs of bridge builders across multiple boundaries of difference.

What would it look like if a future nation-state diplomat spent time with Chicago-based community organizers, in order to learn about the real-world intricacies of negotiation and coalition-building across boundaries of difference? Can you imagine a world in which a Chicago community organizer has the same background in international relations, international political economy and mediation as a peer in the foreign service?

Program Requirements  | Quarter Hours
--- | ---
Degree (Core + Professional Development) Requirements  | 32
Concentration  | 16
Total hours required  | 48

Students will be able to:

- Recognize the inherent interdependence between the local and the global
- Explain how diplomacy is not only practiced by elite nation-state actors but also by people on the ground of diverse professions, social locations and worldviews
- Define the core concepts which guide the study of statecraft, nation-state diplomacy, comparative politics and international relations
- Describe the relationship between track-one and track-two diplomacy and the potential of this relationship to be more deeply integrated
- Explain how the world’s neighborhoods, community groups, cities, states, regions, and transnational environmental realities are interdependent and cannot be understood in isolation
- Achieve competency in a second language, not only to communicate with others but also as a means of understanding that each language comes with particular worldviews, strengths and limitations which inform the practice of diplomacy
- Analyze, understand and critique both normative and non-normative definitions of power, and the unique contributions both make toward the work of diminishing conflict and promoting peace-building
- Explain the profound value of being able to understand and learn from communities that are not one’s own through the lens of art, culture, language, religion and the experiences of others
- Compile a portfolio whose goal is to place the classroom learning from the program into direct, systematic conversation with the real world diplomatic challenges of bridge building, negotiation and conflict resolution presented in the context of their internship placements

The Language and Diplomacy MA Concentration

The structure of the MA Language and Diplomacy concentration is as follows. Students will be able to select 4 courses from 1. target language courses, and 2. courses in translation and interpretation.

At least two of the concentration courses must be in a target language.

Embedded in this concentration is the following possibility:

• If students choose three of their courses in Translation and Interpreting, they'll have earned the Graduate Certificate in Translation and Interpreting after taking the two-credit hour “TIC” practicum (MOL 479).

Students fulfilling the requirements of this concentration have the possibility of choosing to take courses in more than one language, but it is more likely that they will focus on one language. Students selecting this concentration for their MA in Applied Diplomacy are expected to work closely with an advisor, in order to insure that their course selections both fulfill the requirements of the concentration and are best tailored to fit with their vocational trajectory.

The Minor in Applied Diplomacy is designed to equip students with an understanding of the transprofessional nature of modern diplomacy, which holds that while diplomacy is practiced by nation-state diplomatic corps representatives, it is also practiced by businesspeople, scientists, artists, educators, religious leaders, community organizers and activists, among others. This perspective is the hallmark of the Grace School of Applied Diplomacy, and is the lens through which we aim to inspire minors to see the work they are doing in their respective majors as a vital source of diplomatic knowledge and practice.

The core courses required for a Minor in Applied Diplomacy have been chosen to give the students a strong foundation upon which to build a bridge between their own major and the discipline of diplomatic studies.

The Minor in Applied Diplomacy consists of six courses. Three of these courses must be drawn from among DPL 200, DPL 201, DPL 202 and DPL 203. Students taking the Minor may also take a fourth course from this group.

Select three additional courses from Applied Diplomacy concentration courses

The three remaining courses a student must take to fulfill the requirements of the Minor can be drawn from no more than two of the eleven concentrations offered in the BA program. One of the three remaining courses may be fulfilled by the fourth course from "DPL 200-201-202-203" group above. Students who minor in Applied Diplomacy will be encouraged to work with an advisor to select concentration courses which best reflect their field of interest.

- Diplomacy and Critical Theory ([https://las.depaul.edu/academics/applied-diplomacy/undergraduate/applied-diplomacy-ba/concentration-requirements/Pages/diplomacy-critical-theory.aspx](https://las.depaul.edu/academics/applied-diplomacy/undergraduate/applied-diplomacy-ba/concentration-requirements/Pages/diplomacy-critical-theory.aspx))

</tr>
</tbody>
</table>

### Learning Outcomes

Students will be able to:

- Demonstrate knowledge of the mathematical basis and foundations of probability and statistics necessary to develop and implement appropriate mathematical models.
- Solve a computational problem by using appropriate numerical and statistical procedures with a focus on accuracy, error control, and efficiency.
- Implement a variety of mathematical and statistical structures to model and analyze complex problems.
- Identify, formulate, abstract, and solve mathematical problems using tools from a variety of mathematical areas including calculus, linear algebra, algebra, analysis, probability, and statistics.
- Use computational and statistical software platforms to develop and execute various mathematical procedures and numerical algorithms.
- Communicate mathematical ideas professionally, in verbal and visual form, by using appropriate terminology and notation.

### Degree Requirements

#### Course Requirements

Candidates for the degree must complete at least 48 quarter hours of graduate level work in applied mathematics and pass two sets of comprehensive examinations. Comprehensive examinations are offered twice a year, at the beginning of the autumn and spring quarters. Students need to notify the program director at least a month in advance to register for the exams.
Concentration Requirement

Computer Usage
The department places strong emphasis on computation and is well supported with equipment and software necessary for research. Computers are used for data analysis and to find solutions to problems that arise in numerical analysis, simulations, and mathematical modeling. The computer packages used in these courses are likely to play an important role in the solution of the problems students will encounter in their places of employment.

Concentration Requirements
Concentrations, tracks and specializations provide focus to the degree. Students may declare at most two concentrations for their MS, provided they successfully complete at least 14 courses as 56 credit hours required for their degree.

In addition to any degree requirements, students are required to choose one of the following:

- Actuarial Science Concentration, Applied Mathematics (MS) (p. 135)
- Applied and Computational Mathematics Concentration, Applied Mathematics (MS) (p. 136)
- Mathematical Finance Concentration, Applied Mathematics (MS) (p. 136)
- Statistics Concentration, Applied Mathematics (MS) (p. 137)

Student Handbook
Academic Probation
A student will be placed on academic probation at the time when his/her cumulative GPA falls below 2.70.

Academic Dismissal
A graduate student may be academically dismissed under one or more of the following violations of satisfactory progress: his/her cumulative GPA remains below 2.70 after one year of coursework while being on academic probation, lack of progress toward degree completion, or failing the comprehensive examinations twice.

Conditional Admission
Students whose undergraduate degrees were in majors other than mathematics or related fields may be conditionally admitted provided they complete the following minimum prerequisites as conditions: two years of calculus [the equivalent of MAT 150-MAT 152], multivariable calculus and linear algebra [the equivalent of MAT 260-MAT 262], and a course in statistics. Additionally, a course in computer programming is required.

Readmission
The same readmission standards outlined in the Graduate Student Handbook and approval of the program director are observed for students in these programs.

Transfer Credit
No more than two graduate courses (8 quarter credit hours or its semester equivalent) may be transferred from another DePaul program or institution provided that they are equivalent to courses offered in DePaul's graduate program, and they did not count toward another degree either at DePaul or another institution. Written approval must come from graduate program director and associate dean for graduate studies.

Undergraduate Courses
No undergraduate courses shall count toward the graduate degree.

Graduation Requirements
Requirements include, but are not limited to, twelve graduate courses (48 credit hours) at a minimum cumulative GPA of 2.70, and passing of Part-I and Part-II comprehensive examinations.

Graduation with Distinction
A minimum cumulative GPA of 3.70 for coursework applied toward the applied mathematics degree and high performance - as determined by the Mathematical Sciences department - on the comprehensive examinations are required for graduation with distinction.

Time Limitation
The degree is expected to be completed in a maximum of six years.

## Applied Mathematics (MS), Combined Bachelor's + Master's Degree

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

## DePaul Undergraduate Degree + Applied Mathematics (MS)

This combined program is an opportunity for every DePaul undergraduate with at least 88 credits (junior-standing) and preparatory work in Mathematics roughly equivalent to a math minor to apply for early admission to the Master of Science in Applied Mathematics. The interdisciplinary nature of this program will be beneficial to non-mathematics majors interested in studying more advanced topics in applied and computational mathematics as they are used in other fields.

Students interested in the combined degree program should consult first with their undergraduate advisor in their home college and the Applied Mathematics graduate program director to evaluate whether they are eligible for admission to the combined degree program and to plan the undergraduate program of study that includes the graduate level MAT courses as open electives or, in certain cases, as substitutes to major requirements.

### Admission Criteria

Students may apply for admission to the universal combined degree program if they satisfy the following criteria:

- At least 88.0 credit hours earned (junior status)
- GPA of 3.0 or higher in courses taken at DePaul University
- Successful completion (with a grade of C- or better) of the following undergraduate coursework:
  - A year of single-variable calculus (equivalent of MAT 150-151-152)
  - A course in multivariable calculus (equivalent of MAT 260)
  - A course in linear algebra (equivalent of MAT 262)
  - A course in computer programming (e.g., C++, Python, Java, R)

To apply, students should submit the following materials to the Office of Graduate Admissions (graddepaul@depaul.edu):

- CSH Combined Program Application form
- Official copy of undergraduate transcript

Interested students are strongly encouraged to consult with the Applied Mathematics Graduate Program Director prior to submitting their application.

Students enrolled in the universal combined degree program will be awarded their Bachelor's degrees upon completion of their undergraduate degree requirements. They need to apply for undergraduate degree conferral when they reach the required credit hours and meet all other criteria for their baccalaureate degree.

Applied Professional Studies (MA)

The Master of Arts Program in Applied Professional Studies (MAAPS) from the School of Continuing and Professional Studies (https://scps.depaul.edu/Pages/default.aspx) (SCPS) serves adults who wish to design and execute their graduate study in a personally-relevant area that is otherwise not served by typical course-based, already-structured programs. These “entrepreneurial learners” come with a personal/professional area of study they want to pursue, a desire to build and manage their own learning processes, and a goal to both learn and shape their learning into contributions that make a difference.

Key Features
1. You design your own area of study (an area of professional contribution in a particular setting) guided by a graduate framework. Your idea; your design.
2. You learn to think in terms of learning for both intentional outcomes and timely applications.
3. You build a plan for learning that incorporates an array of learning strategies (not just classes!)—strategies that fit your sought outcomes and learning preferences and result in products you can use.
4. You manage the pace, place and process of implementing your plan.
5. You receive assistance from a team of advisors from the University as well as your own particular professional community.
6. You engage in a brief/intensive series of “liberal learning” seminars designed to rekindle and/or deepen your practice in key domains of applied effectiveness (personal, interpersonal, organizational, values and inquiry).
7. You accomplish your goal of graduate study—focusing on an area of importance to you and earning an accredited graduate degree with competencies endorsed by the University.

Program Requirements
Degree Requirements 52
Total hours required 52

Learning Outcomes
Students who complete the MAAPS common curriculum plus their Focus Area demonstrate the following learning outcomes:

• Demonstrate advanced knowledge in their areas of professional study.
• Cultivate a regular practice of reflection on their professional practice.
• Engage methods of inquiry to improve practice in their areas of study.
• Take initiative to broaden professional networks and continually develop and refresh key skills.
• Anticipate, adapt and engage with emerging issues in their areas of study and practice.
• Exercise personal agency and collaborative skill to attain personal and professional goals.
Degree Requirements

Course Requirements
Students are required to complete a minimum of 52 graduate credit hours with a cumulative GPA of not less than 2.5.

Planning & Integration (8 credit hours)
Students, with the assistance of an academic committee, design individualized graduate learning plans. Once plans are approved, students pursue their plans and work to ensure that all parts link together.

Individualized Focus Area
The Individualized Focus Area features a customized track where each student, with the support of an advisory team, researches and designs a path leading to the attainment of specific, academically grounded objectives in an applied professional field. With the help of their advisory team, students in the Individualized Focus Area integrate graduate level coursework, applied learning activity, academic inquiry, and professional development. Since the Individualized Focus Area is not limited to a particular academic area with existing professional standards, it is ideal for entrepreneurial students ready to work with leaders in their field to determine the appropriate professional standards for their unique, often cutting edge or hybrid, focus.

Individualized Focus Area Competence Areas
Students in this track may choose from an array of courses and experiential learning activities to create their unique focus. They are guided in their choices by their advisory committees as they select learning activities that address the following list of professional competencies which can be satisfied through a combination of coursework, applied experiential earning activities, and liberal learning seminars from the MAAPS core curriculum:
Educating Adults

The Educating Adults track is designed for students working in diverse settings who are involved in the process and practice of adults’ learning. Grounded in current research and best practices in adult education and learning theory, the Educating Adults track is made up of a set of core courses and learning activities to be applied in the students’ own workplace/practice setting. Participants in this track deepen their knowledge and skills in the areas of assessment, design, facilitation, evaluation, and applied research to improve their repertoire of core and cutting-edge knowledge and skill as educators of adults.

This track is for those who want to expand their knowledge of key theories and best practices in adult learning—including the latest in instructional technology, course and training design, learning facilitation, internet-based practices, and emerging trends. It is for educators of all types: trainers, coaches, managers, and more.

Educating Adults Required Courses

</tbody>
</table>

Organizational Leadership

The Organizational Leadership track is designed for students interested in developing and applying effective leadership skills known to be crucial to success in the business world. Completing the Organizational Leadership track will provide opportunities for students to positively impact their organizations. Students will learn to apply relevant leadership theories and models to generate solutions to real world problems within various types of organizations and to advance teams toward a shared corporate vision.

Organizational Leadership Required Courses

</tr>
</tbody>
</table>

Social Change

This track is designed for individuals whose practice involves leading effective social change in communities and organizations. Integral components of this track are ethical decision-making, global and inclusive perspectives, future trends, and mentorship. Learning gained from the track’s core curriculum, as well as the applied capstone project, is essential to unlock each participants’ potential to effectively lead social change. As students collaborate with the other advocates in their Social Change Track cohort and their communities, they have the unique opportunity to practice the creation of responsible action plans to effect constructive social change.

Social Change Course Options

Students in this track may choose from an array of courses and experiential learning activities, some possible possible course electives include: Transformational Leadership, Understanding and Responding to Identity and Intersectionality, Arts for Social Action, Technology for Communication, Tools for Change, Leading and Social Change.

Applied Professional Studies (MA), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.
DePaul Undergraduate Degree + Applied Professional Studies (MA)

The Applied Professional Studies (MAAPS (p. 137)) combined degree program from the School of Continuing and Professional Studies (https://scps.depaul.edu/Pages/default.aspx) (SCPS) is open to all undergraduate majors across the university. Students who are interested in this program must apply to the SCPS Graduate Admission Office in their junior year, and if accepted, can take up to three graduate courses (12 credits). These three courses count towards both the bachelor’s program and the Master of Arts degree. Students will pay the current undergraduate tuition rate for these three courses. Once students earn their Bachelor of Arts or Bachelor of Science degree from DePaul, they matriculate as a graduate student and complete the remaining required courses for their Master of Arts degree. Students should work with their undergraduate advisor to see how the graduate classes will fulfill undergraduate degree requirements. Students must maintain a 3.0 GPA (B or better) in each graduate class taken in their senior year in order to continue in the program.

Pathway participants may take 12 credit hours from the Liberal Learning section of the graduate programs. Current offerings include:

- LLS 410D WRITING FOR GRADUATE STUDENTS
- LLS 410E EVIDENCED BASED DECISION MAKING
- LLS 410F GENDER IN BUSINESS AND LEADERSHIP
- LLS 410G ADVANCED LEADERSHIP THEORY & PRACTICE
- LLS 420D APPLYING ETHICS IN THE PROFESSIONS
- LLS 420E LEADERSHIP CHANGE AND POSITIVE ORGANIZATIONS
- LLS 420F LEADERSHIP MODELS FOR STRONG ORGANIZATIONS
- LLS 420G EMOTIONAL INTELLIGENCE AT WORK
- LLS 420H LEADING FOR SOCIAL CHANGE
- LLS 440A UNDERSTANDING AND FLEXING MINDSETS
- LLS 450B APPLYING SYSTEMATIC INQUIRY (IN PROFESSIONAL PRACTICE)

Applied Psychology (Minor)

The Applied Psychology minor allows you to study the application of psychological theories and research to fields that integrate applied psychological perspectives including health care, education, community outreach, and sports.

This minor is only for non-psychology majors and a maximum of one psychology minor may be earned by a student.

Psychology majors cannot earn a minor in applied psychology.

Six psychology courses are required, including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 105</td>
<td>INTRODUCTORY PSYCHOLOGY I</td>
<td>4</td>

Applied Statistics (MS)

Program Requirements

<table>
<thead>
<tr>
<th>Degree Requirements</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total hours required</td>
<td>48</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

- Demonstrate knowledge of the mathematical basis and foundations of probability and statistics necessary for them to develop and implement appropriate statistical models.
- Implement a variety of mathematical, statistical, and data analysis techniques to model and analyze complex problems, and demonstrate competence in analyzing data using methods embedded in their courses.
- Solve a real-world problem using appropriate statistical procedures with a focus on precision and accuracy.
- Use computational and statistical software platforms to develop and execute various statistical procedures and statistical computing algorithms.
- Communicate statistical ideas clearly, in verbal form, using appropriate statistical terminology and generate reports that show statistical expertise in writing and model implementation.

Degree Requirements

</tbody>
</table>

Candidates for the degree must complete at least 48 quarter hours of graduate level work in applied statistics and pass two sets of comprehensive examinations. Comprehensive examinations are offered twice a year, at the beginning of the autumn and spring quarters. Students need to notify the program director at least a month in advance to register for the exams.
Concentration Requirement
Applied Statistics students must choose one concentration: Biostatistics, Data Science, or General Applied Statistics.

Computer Usage
The department places strong emphasis on computation and is well supported with equipment and software necessary for research. Computers are used for data analysis and to find solutions to problems that arise in numerical analysis, simulations, and mathematical modeling. The computer packages used in these courses are likely to play an important role in the solution of the problems students will encounter in their places of employment.

Concentration Requirements
Concentrations, tracks and specializations provide focus to the degree. Students may declare at most two concentrations for their MS, provided they successfully complete at least 14 courses as 56 credit hours required for their degree.

In addition to any degree requirements, students are required to choose one of the following:
- Biostatistics Concentration, Applied Statistics (MS) (p. 142)
- Data Science Concentration, Applied Statistics (MS) (p. 142)
- General Applied Statistics Concentration, Applied Statistics (MS) (p. 142)

Program Graduate Academic Student Handbook

Academic Probation
A student will be placed on academic probation at the time when his/her cumulative GPA falls below 2.70.

Academic Dismissal
A graduate student may be academically dismissed under one or more of the following violations of satisfactory progress: his/her cumulative GPA remains below 2.70 after one year of coursework while being on academic probation, lack of progress toward degree completion, or failing the comprehensive examinations twice.

Conditional Admission
Students whose undergraduate degrees were in majors other than mathematics or related fields may be conditionally admitted provided they complete the following minimum prerequisites as conditions: two years of calculus [the equivalent of MAT 150-MAT 152], multivariable calculus and linear algebra [the equivalent of MAT 260-MAT 262], and a course in statistics.

Readmission
The same readmission standards outlined in the Graduate Student Handbook and approval of the program director are observed for students in these programs.

Transfer Credit
No more than two graduate courses (8 quarter hours or its semester equivalent) may be transferred from another program or institution provided that they are equivalent to courses offered in DePaul’s graduate program, and they did not count toward another degree at DePaul or another institution. Written approval must come from graduate program director and associate dean for graduate studies.

Undergraduate Courses
No undergraduate courses shall count toward the graduate degree.

Graduation Requirements
Requirements include, but are not limited to, twelve graduate courses (48 credit hours) at a minimum cumulative GPA of 2.70, and passing of Part-I and Part-II comprehensive examinations.

Graduation with Distinction
A minimum cumulative GPA of 3.70 for coursework applied toward the applied statistics degree and high performance - as determined by the mathematical sciences department - on the comprehensive examinations are required for graduation with distinction.

Time Limitation
The degree is expected to be completed in a maximum of six years.

Applied Statistics (MS), Combined Bachelor's + Master's Degree
The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

DePaul Undergraduate Degree + Applied Statistics (MS)
This combined program is an opportunity for every DePaul undergraduate with at least 88 credits (junior-standing) and preparatory work in Mathematics roughly equivalent to a math or stat minor to apply for early admission to the Master of Science in Applied Statistics. The interdisciplinary nature of this program will be beneficial to non-mathematics majors interested in studying the theory and application of mathematics and statistics as well as statistical computing. This can help them connect applied statistics to their area of study and will provide them with contextualized experience in data analysis.

Students interested in the combined degree program should consult first with their undergraduate advisor in their home college and the Applied Statistics graduate program director to evaluate whether they are eligible for admission to the combined degree program and to plan the undergraduate program of study that includes the graduate level MAT courses as open electives or, in certain cases, as substitutes to major requirements.

Admission Criteria
Students may apply for admission to the universal combined degree program if they satisfy the following criteria:
- At least 88.0 credit hours earned (junior status)
- GPA of 3.0 or higher in courses taken at DePaul University
- Successful completion (with a grade of C- or better) of the following undergraduate coursework:
  - A year of single-variable calculus (equivalent of MAT 150-151-152)
  - A course in multivariable calculus (equivalent of MAT 260)

</table>

Students in the Certificate in Applied Statistics program must follow the academic standing, probation and dismissal guidelines, among the other guidelines, found in the Program Graduate Academic Student Handbook for Applied Statistics.

Students in the Certificate in Applied Statistics program must apply for degree conferral via Campus Connection in advance of their final quarter in the program in order to have their coursework audited for the awarding and delivery of their certificate.

Applied Technology (MS)

The Master of Science Program in Applied Technology (MSAT) from the School of Continuing and Professional Studies (p. 1457) (SCPS) is designed for people who want to deepen their understanding and use of technology while enhancing their skills and knowledge for improving the interface between technology and humanity in organizational systems.

Key Features

- You draw on the combined strengths of two of DePaul University’s colleges—the School for Continuing and Professional Studies and the College of Computing and Digital Media.
- You develop advanced and applied capabilities in one of the following areas of “applied technology” specialization:
  - Applied Information Systems
  - Applied Network Technology
  - Applied IT Project Management
  - Applied Information Technology
  - Applied Human Computer Interaction
- You customize portions of your study by combining coursework with on-the-job applied learning projects.
- You receive assistance from a team of advisors from the University and professional community who provide coaching and mentoring to ensure your success.
- You engage in a brief/intensive series of “liberal learning” seminars designed to rekindle and/or deepen your practice in key domains of applied effectiveness (personal, interpersonal, organizational, values and inquiry).
- You accomplish your goal of graduate study—enhancing your expertise in applying technology and earning an accredited graduate degree with competencies endorsed by the University.

Program Requirements

<table>
<thead>
<tr>
<th>Degree Requirements</th>
<th>Quarter Hours</th>
</tr>
</thead>
</table>

Learning Outcomes

Students will be able to:

- Demonstrate advanced knowledge with respect to applying technology to organizational problem solving and decision-making.
- Apply reflective acuity in support of applying technology.
- Engage methods of inquiry to improve practice in applying technology in practice.
- Take initiative to add value in their professional practice.
- Adapt and engage from an over-broadening repertoire of responses.
- Contribute to achieve collective results.

Degree Requirements

Course Requirements

Students must complete a minimum of 52 graduate credit hours with a cumulative GPA of not less than 2.5.

Planning & Integration

- AT 580

Liberal Learning

Students participate in graduate seminars designed to liberate practice from single points of view and action. Students are required to complete 18 credit hours of coursework in the Liberal Learning section.

Professional Specialization

The Professional Specialization includes one of five career-related ‘tracks’ of core courses offered by the College of Computing and Digital Media.
• Applied Information Systems
• Applied Network Technology
• Applied IT Project Management
• Applied Information Technology
• Applied Human-Computer Interaction

Culmination
• AT 587
• AT 589

Concentration Requirements
• Applied Human-Computer Interaction Specialization, Applied Technology (MS) (p. 144)
• Applied Information Systems Specialization, Applied Technology (MS) (p. 144)
• Applied Information Technology Specialization, Applied Technology (MS) (p. 145)
• Applied IT Project Management Specialization, Applied Technology (MS) (p. 145)
• Applied Network Technology Specialization, Applied Technology (MS) (p. 145)

Applied Human-Computer Interaction Specialization, Applied Technology (MS)

This area of specialization within the MS in Applied Technology program prepares students to design, implement, and evaluate computer interfaces so that they are accessible and easy for people to use. This interdisciplinary specialization integrates concepts and methods from computer science, graphic design and the social sciences to provide a comprehensive understanding of the user-centered design process. The combination of coursework, liberal learning seminars, and independent workplace-based projects advance students' capabilities to influence organizations and apply a repertoire of strategies and techniques to the user-centered design process, including usability assessment and testing, user task and preference analysis, information architecture, and construction of dynamic and function-driven web sites and other applications.

Introductory Courses

Introductory courses may be waived for any of the following conditions:

• The student has the appropriate course work to satisfy an Introductory Course.
• The student has appropriate and verified professional experience to satisfy an Introductory Course.
• The student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

Applied Information Systems Specialization, Applied Technology (MS)

The Applied Information Systems specialization focuses on integrating business and technology with an emphasis on the development, management and planning of information systems. This focus provides students with a strong foundation in business and systems analysis, project management and database and enterprise infrastructure. Students completing this specialization possess a broad range of skills and understandings in support of organizations gaining strategic and tactical competitive advantage.

Applied Information Technology Specialization, Applied Technology (MS)

This area of specialization within the MS in Applied Technology program addresses contemporary needs for understanding and applying the core principles of technology to solve problems, improve effectiveness and increase efficiencies in corporations, health care institutions, and government agencies. With the combination of coursework, workplace-based projects, and liberal learning seminars, students advance their technological, organizational, and personal capacities. Individuals who serve or are moving into positions of serving as liaisons between the Information Technology department and a functional business unit are likely to benefit from this graduate program. The program also serves those who work within departments that are information dependent, rely heavily on information technology, and/or seeking to advance their careers through project management or information technology management positions.

Applied IT Project Management Specialization, Applied Technology (MS)

This area of specialization within the MS in Applied Technology program is designed to advance the capabilities of working professionals to fill the growing need for IT project managers. The combination of coursework, liberal learning seminars, and independent workplace-based based projects advance students' technological, organizational, and personal capacities to lead and manage IT project teams. Students focus on developing and leveraging knowledge and skills in project and risk management, investment financial analysis, organizational and ethical decision-making, and technologies to promote both collaboration and management controls. These and other capabilities reflect the skills to build leadership practices that enable quality work.

Introductory Courses

Introductory courses may be waived for any of the following conditions:

- The student has the appropriate course work to satisfy an Introductory Course.
- The student has appropriate and verified professional experience to satisfy an Introductory Course.
- The student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

## Advanced Courses

- Three additional Applied Telecommunications or Applied Network and Information Security courses chosen with advisor approval.

## Arabic (MA)

DePaul’s MA program in Arabic provides students a customizable, flexible curriculum to develop advanced linguistic and cultural expertise in a language and to apply that expertise in the disciplinary or professional contexts of their choice. Whether in the “global village” of today’s world or in multiethnic communities such as Chicago, this advanced expertise is an increasingly valuable personal and professional asset, requiring appropriate training and credentials. The MA program especially seeks to serve adult professionals (government employees, social workers, healthcare providers, businesspeople, or certified K-12 teachers) whose careers require this applied expertise.

The MA in Arabic may be expanded also to include select graduate certificate programs covering particular areas of interest. Students participating in a combined MA/certificate program should consult with their academic advisor to determine what coursework might count toward both programs. A separate application process for the certificate is required. Students who are interested in any of the following combination programs should contact the Graduate Student Services Office for additional information.

- Arabic + Digital Humanities Certificate
- Arabic + Teaching English to Speakers of Other Languages (TESOL) Certificate
- Arabic + Translation and Interpreting Studies Certificate

## Program Requirements

<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Degree Requirements</td>
<td>48</td>
</tr>
<tr>
<td>Total hours required</td>
<td>48</td>
</tr>
</tbody>
</table>

## Learning Outcomes

Students will be able to:

- Speak and participate in most informal and some formal conversations from topics related to school, home, and leisure activities, to many related to employment, current events, and matters of public and community interest.
- Narrate and describe in the major time frames of past, present, and future in paragraph-length discourse with some control of aspect, as well as combine and link sentences into connected discourse of paragraph length; although these narrations and descriptions tend to be handled separately rather than interwoven.
- Use communicative strategies such as rephrasing and circumlocution, and contribute to a conversation with sufficient accuracy, clarity, and precision to convey their intended message without misrepresentation or confusion.
- Combine and link sentences into texts of paragraph length and structure, and use minimal control of common structures and vocabulary.
- Listen and comprehend (albeit unevenly) short conventional narrative and descriptive texts with a clear underlying structure.
- Understand conventional narrative and descriptive texts with clear underlying structure (though their comprehension may be uneven).

## Degree Requirements

### Course Requirements

The curriculum of the MA in Arabic consists of twelve courses (48 quarter credit hours), divided into two parts:

1. A core curriculum of three required courses (12 quarter credit hours), and
2. Nine courses (36 quarter credit hours) in the language area. All courses in the language area must be courses taught in the target language of the student’s program (i.e. courses with prefixes ARB).

In exceptional cases, with the approval of the student’s advisor and the director of the graduate program, a student may count one or two courses taught in English from allied fields (such as art history, economics, education, geography, health sciences, management, philosophy, political science, religion, sociology, etc.) among the nine “language area” courses in the student’s program.

### Core Curriculum

The core curriculum consists of the following three courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MOL 401</td>
<td>PROFESSIONAL FOUNDATIONS</td>
<td>4</td>
</tr>
<tr>
<td>MOL 402</td>
<td>LANGUAGE, SELF AND SOCIETY</td>
<td>4</td>
</tr>
<tr>
<td>MOL 496</td>
<td>MAMOL CAPSTONE</td>
<td>4</td>
</tr>
</tbody>
</table>

In addition, all 300-level language courses are offered simultaneously as 400-level electives to complete the MA program. The 400-level courses have additional requirements.

### Additional Requirements

Additional requirements include:

- Portfolio

The portfolio (completed while enrolled in MOL 496) consists of a compilation and critical assessment of select work done throughout the program and a capstone project. Capstone projects may include a community service experience, internship, performance or creative work, teaching portfolio, thesis, or translation.

### Graduation Grade Point Average Requirement

In order to graduate from the program, students must complete all program requirements with a minimum GPA of 3.000.
The program is designed to prepare students for advanced use of Mid rather than on prior coursework. Therefore, it is open to students minimum level of language proficiency (ACTFL rating of "Intermediate Mid") rather than on prior coursework. Admission to this combined Master of Arts program is based on a standardized tests from the American Council on the Teaching of Foreign Languages (ACTFL): the Oral Proficiency Interview (OPI) and the Writing Proficiency Test (WPT).

Students who lack 20 quarter credit hours (or the equivalent in semester credit hours) of coursework must demonstrate proficiency in the language by attaining a rating of at least "Intermediate Mid" on two standardized tests from the American Council on the Teaching of Foreign Languages (ACTFL): the Oral Proficiency Interview (OPI) and the Writing Proficiency Test (WPT).

Students may apply ("transfer") toward their MA programs in Modern Languages no more than eight quarter hours of graduate-level credit completed at another college or university, with approval from the departmental director of graduate programs. Students may not transfer credits already used to satisfy the degree requirements of any program at another college or university.

Students seeking to apply "transfer" credit toward their MA programs in Modern Languages must complete the college transfer request form.

Students from the MA programs in Modern Languages earn their degrees "with distinction" if they graduate with a cumulative grade point average (GPA) of 4.0 (on a scale where 4.0=A). To verify eligibility, students and their faculty advisors should contact the departmental advisor and the departmental director of graduate studies before the deadline to apply for graduation.

The minor consists of a total of 5 courses in Arabic language at the 200/300-level. Courses taught in English will not be counted toward this minor unless Program Director permission is secured.

An Arabic Language minor provides intermediate proficiency in Arabic. Arabic is considered by the United States government as one of the critical languages for Americans to learn.

Students majoring in Arabic Studies (BA) or minoring in Arabic Studies are restricted from earning this minor.

Through DePaul’s Arabic Studies program, students will develop the ability to speak, understand, read and write the Arabic language and will be encouraged to foster an appreciation of Islamic literature and civilization.

Studying Arabic will expand the student’s knowledge of the Middle East and of the culture of more than one billion Arabs across the globe. While learning the Arabic language, the student will also learn about Arab cultural, religious and political forces.

The Arabic language is one of the United Nations’ six official languages, and the U.S. Government considers it one of the most critical languages for Americans to learn. Chicago has one of the nation’s largest Arab-American populations in the U.S., giving the student opportunities to visit its communities and gain first-hand knowledge about the Arab culture and language.

What can the student do with this degree?

• Consulting
• Education
• Governmental Agency Work
• Immigration Services
• International Business
• Non-Profit Work
• Public Administration
• Public Policy
• Translation Services

</tbody>
</table>

Learning Outcomes

Students will be able to:

• Proficiently speak, understand, read, and write the studied language(s) to: engage in conversations, interpret and create a variety of written texts, provide and obtain information, express feelings and emotions, exchange opinions.
• Acquire knowledge of the cultures related to the studied language(s) with appropriate background in geography, history, politics, and society.
• Acquire knowledge of the literary traditions related to the studied language(s) along with techniques of literary and rhetorical analysis.
• Acquire basic notion of the history and theory of language and language study, including linguistics, sociolinguistics, language acquisition, and dialectology.
• Acquire basic notion of the theory and practice of translation and interpretation.

College Core Requirements

Study in the Major Field

The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By "liberal education" the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

The Modern Language Requirement (MLR)

All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

• placing into 104 or above on the DePaul language placement exam
• completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
• completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
• completing the final course of a four-year sequence of the same modern language in high school*
• completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
• completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the "Modern Language Option" (see below).

The Modern Language Option (MLO)

The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.
MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

**NOTE:** Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

**External Credit and Residency**

A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

| **Senior Year**              |       |
| **Capstone**                 |       |
| Required 1                   | 4     |

1. Students must earn a C- or better in this course.
2. Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete LSP 120 and both a Computational Reasoning course and a Statistical Reasoning course in the Math and Computing Domain take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and cannot be applied to the SI Domain.

**Learning Domains**

- Arts and Literature (AL) (p. 1300) • 1 Course Required
- Historical Inquiry (HI) (p. 1304) • 2 Courses Required
- Math and Computing (MC) (https://catalog.depaul.edu/undergraduate-core/liberal-studies-program/liberal-studies-learning-domains/math-and-computing/) • 2 Courses Required [1 CR Course, and 1 SR Course]
- Philosophical Inquiry (PI) (p. 1307) • 2 Courses Required
- Religious Dimensions (RD) (p. 1308) • 2 Courses Required
- Scientific Inquiry (SI) (p. 1310) • 2 Courses Required [1 Lab Course, and 1 SWK Course]
- Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312) • 3 Courses Required

**Notes**

A student whose only major is in Modern Languages is required to complete the Capstone offered by the Department of Modern Languages (MOL). A student who is double majoring (or pursuing dual degrees) with the primary major (or primary degree) in MOL may substitute the Capstone of the secondary major or degree. An MOL major in the University Honors Program shall take only the University Honors Capstone, not both the Honors Capstone and the MOL Capstone.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.
Major Requirements
Course Requirements
• 24-32 credit hours of 200/300 level courses in Arabic Language
• 20-28 credit hours of Allied Courses from at least three different departments

Students who begin their study of Arabic at DePaul with ARB 202 or higher may substitute a 300-level Arabic elective course for any of the required 200-level courses. No English-language (“E-designation”) courses can be applied toward the “Six Advanced Level Courses in Arabic Language” requirement of the major.

MOL 340, MOL 341, and MOL 342 are specifically designed to help Arabic Studies students better understand the Arabic-speaking world. Students are highly recommended to take at least two of the three MOL Arabic-related courses that we offer.

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Arabic Studies 3+3 (BA+JD)

In the 3+3 (BA+JD) Program, high-achieving incoming first-year undergraduate students are admitted simultaneously to the College of Liberal Arts and Social Sciences and the College of Law. Students complete their first three years in the College of Liberal Arts and Social Sciences and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA+JD students meet regularly with advisors in both Colleges and have access to a variety of resources to ensure their success.

Key Program Features
• Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
• Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
• Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
Students receive early (conditional) admission to the College of Law.

• Credits earned in the first year of law school apply toward the BA degree.

• Students may opt out of the College of Law segment of the program and continue in the College of Liberal Arts and Social Sciences during their fourth year.

• If students withdraw after the first semester in the College of Law, they return to the College of Liberal Arts and Social Sciences for the winter quarter.

Program Requirements

In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements. Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.7 in their third and final year of undergraduate study.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRELAW 150</td>
<td>THE PRACTICE OF LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 151</td>
<td>RECENT CONTROVERSIES IN THE LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 152</td>
<td>THINKING ABOUT THE LAW</td>
<td>2</td>
</tr>
</tbody>
</table>

In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law's online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant's third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These classes can be found in the Core Required Courses on the Law JD program page (p. 677).

Financial Aid

BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law's median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

Arabic Studies (Minor)

Through DePaul's Arabic Studies minor, students will develop a basic grasp of the Arabic language and gain an overview of Islamic literature and civilization.

Course Requirements

• Three quarters of college-level Arabic language (at any level).

• Five additional courses focusing on the Arab world from at least two different disciplines, chosen in consultation with an advisor or faculty member, from the current approved Arabic Studies Allied Course List.

Archaeology (Minor)

The Archaeology minor provides students with an intensive grounding in both the methods and narratives of prehistoric and historic archaeology. Students are required to complete six courses (24-26 credit hours).

Course Requirements

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANT 103</td>
<td>ARCHAEOLOGY</td>
<td>4</td>
</tr>
<tr>
<td>or ANT 120</td>
<td>SCIENCE OF ARCHAEOLOGY</td>
<td>6</td>
</tr>
<tr>
<td>ANT 202</td>
<td>ARCHAEOLOGICAL FIELD METHODS</td>
<td>6</td>
</tr>
<tr>
<td>ANT 206</td>
<td>WORLD PREHISTORY</td>
<td>4</td>
</tr>
</tbody>
</table>

To complete the minor students may select three electives from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANT 250</td>
<td>MATERIAL CULTURE OF MODERN AMERICA</td>
<td>6</td>
</tr>
<tr>
<td>ANT 252</td>
<td>MATERIAL CULTURE AND DOMESTIC LIFE</td>
<td>6</td>
</tr>
<tr>
<td>ANT 254</td>
<td>HISTORICAL ARCHAEOLOGY OF CHICAGO</td>
<td>6</td>
</tr>
<tr>
<td>ANT 256</td>
<td>MUSEUMS AND MATERIAL CULTURE</td>
<td>6</td>
</tr>
<tr>
<td>ANT 358</td>
<td>ARCHEOLOGY OF CITIES</td>
<td>6</td>
</tr>
<tr>
<td>ANT 374</td>
<td>ANTHROPOLOGY AND MUSEUMS</td>
<td>6</td>
</tr>
<tr>
<td>ANT 384</td>
<td>ARCHAEOLOGICAL ANALYSIS</td>
<td>6</td>
</tr>
<tr>
<td>ANT 390</td>
<td>SPECIAL TOPICS IN ANTHROPOLOGY (Focusing primarily on archaeology)</td>
<td>6</td>
</tr>
</tbody>
</table>

1 Or comparable field methods course (ANT 384).

Non-anthropology courses that apply as electives for the minor include:

- AMS 370 THE MATERIAL CULTURE OF MODERN AMERICA
- HST 290 ANCIENT EGYPT
- HST 291 ANCIENT WORLD HISTORY: MESOPOTAMIA AND THE FERTILE CRESCENT
- HST 294 ANCIENT GREECE
- HST 296 ANCIENT ROME: ORIGINS TO THE END OF THE REPUBLIC

Architecture and Urbanism (Minor)

The interdisciplinary Architecture and Urbanism Minor brings together the prominent emphases on the material landscapes and cultural environments of the city evident in Geography courses and History of Art and Architecture courses. While both History of Art and Architecture and Geography have different kinds of theoretical or historical questions, they nevertheless strongly overlap when considering how the specific geographic spaces of cities unfold as particular spatial and cultural constructs. Courses in the minor thus explore the variety of ways in which the spaces of cities relate to their historical/geographical materiality. In this sense, culture is broadly construed to encompass the spatial, aesthetic, linguistic, and other social practices that define the material and phenomenological particularities of cities.

The minor is made up of 5 courses total, 2 required courses and 3 additional courses selected from the list below.

College Core Requirements

Study in the Major Field

The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

The Modern Language Requirement (MLR)

All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
- completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in...
high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the “Modern Language Option” (see below).

The Modern Language Option (MLO)
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

NOTE: Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

External Credit and Residency
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

</tbody>
</table>

1 Students must earn a C- or better in this course.
2 Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete LSP 120 and both a Computational Reasoning course and a Statistical Reasoning course in the Math and Computing Domain take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and cannot be applied to the SI Domain.

Learning Domains

Arts and Literature (AL) (p. 1300)

• 1 Course Required

Historical Inquiry (HI) (p. 1304)

• 2 Courses Required

• 2 Courses Required
  [1 CR Course, and 1 SR Course]

Philosophical Inquiry (PI) (p. 1307)

• 2 Courses Required

Religious Dimensions (RD) (p. 1308)

• 2 Courses Required

Scientific Inquiry (SI) (p. 1310)

• 2 Courses Required
  [1 Lab Course, and 1 SWK Course]

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)

• 3 Courses Required

Notes

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by
the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

1 Capstone course offered in the Spring Quarter, OR other related capstone course (with advisor approval).
2 Any course section not applied elsewhere in this degree program.

**Open Electives**

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The Modern Language Requirement (MLR) credits earned can be applied to open electives.

**Art (Minor)**

The Art minor provides students with the opportunity to choose a general art studio study in their areas of interest, through any art media offered in the department. A total of six courses are required for an Art minor.

Three areas of concentration are offered:

1. A Studio Art concentration designed to develop artistic skills and abilities in painting, drawing, sculpture, printmaking, and digital imaging;
2. A Photography and Media Art concentration designed to develop artistic skills and abilities in photography, digital photography, video, and web art; and
3. A Graphic Art concentration designed to develop artistic skills and abilities in primarily two-dimensional media, focusing on an intersection of art and design which can include the following areas: photography, drawing, printmaking, text, digital imaging, web art, the graphic novel, and the artist book and poster.

Students majoring in Art, Media, and Design (BA) or (BFA) or Art (BA) are restricted from earning this minor.

Art, Media, and Design (BA)

The BA in Art, Media, and Design offers a general curriculum with areas of concentration, which identifies and promotes continuing contact with the enduring values of our artistic heritage and the application of these values to the future. The educational aim of the school is to provide, through individualized mentoring, a foundation in project-based learning and studio art practice. The curriculum emphasizes fundamental artistic concepts through art making, problem solving, and experimentation in studio courses.

Three areas of concentration are offered:

1. A Studio Art concentration designed to develop artistic skills and abilities in painting, drawing, sculpture, printmaking, and digital imaging;
2. A Photography and Media Art concentration designed to develop artistic skills and abilities in photography, digital photography, video, and web art; and
3. A Graphic Art concentration designed to develop artistic skills and abilities in primarily two-dimensional media, focusing on an intersection of art and design which can include the following areas: photography, drawing, printmaking, text, digital imaging, web art, the graphic novel, and the artist book and poster.

</tr>
</tbody>
</table>

**Learning Outcomes**

Students will be able to:

- Demonstrate a high degree of competency of technical execution appropriate to their chosen medium.
- Integrate the ways in which materials, techniques, processes, and subjects generate meaning.
- Produce work that demonstrates sensitivity to the cultural, social, and/or aesthetic components of art making.
- Produce work that demonstrates their ability to take creative and intellectual risks.
- Apply critical thinking to analyze and contextualize their ideas in group critiques, written assignments, and through their artworks.

**College Core Requirements**

**Study in the Major Field**

The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

**Declaration of Major, Minor and Concentration**

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

**The Modern Language Requirement (MLR)**

All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
• completing the final course of a four-year sequence of the same modern language in high school*
• completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
• completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the “Modern Language Option” (see below).

The Modern Language Option (MLO)
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

NOTE: Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

External Credit and Residency
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Learning Domains
Arts and Literature (AL) (p. 1300)
• 1 Course Required
Historical Inquiry (HI) (p. 1304)
• 2 Courses Required
Math and Computing (MC) (p. 1306)
• 2 Courses Required
[1 CR Course and 1 SR Course]
Philosophical Inquiry (PI) (p. 1307)
• 2 Courses Required
Religious Dimensions (RD) (p. 1308)
• 2 Courses Required
Scientific Inquiry (SI) (p. 1310)
• 2 Courses Required
[1 Lab Course and 1 SWK Course]
Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
• 3 Courses Required

Notes
Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Concentration Requirements
Students must also complete the requirements from one of the following concentrations: Studio Art, Photography and Media Art, or Graphic Art.

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

• Graphic Art Concentration, Art, Media, and Design (BA) (p. 160)
• Photography and Media Art Concentration, Art, Media, and Design (BA) (p. 161)
• Studio Art Concentration, Art, Media, and Design (BA) (p. 162)

Art, Media, and Design 3+3 (BA+JD)
In the 3+3 (BA+JD) Program, high-achieving incoming first-year undergraduate students are admitted simultaneously to the College of Liberal Arts and Social Sciences and the College of Law. Students complete their first three years in the College of Liberal Arts and Social Sciences and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA+JD students meet regularly with advisors in both Colleges and have access to a variety of resources to ensure their success.

Key Program Features
• Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).

• Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
• Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
• Students receive early (conditional) admission to the College of Law.
• Credits earned in the first year of law school apply toward the BA degree.
• Students may opt out of the College of Law segment of the program and continue in the College of Liberal Arts and Social Sciences during their fourth year.
• If students withdraw after the first semester in the College of Law, they return to the College of Liberal Arts and Social Sciences for the winter quarter.

Program Requirements
In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements. Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.7 in their third and final year of undergraduate study.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRELAW 150</td>
<td>THE PRACTICE OF LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 151</td>
<td>RECENT CONTROVERSIES IN THE LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 152</td>
<td>THINKING ABOUT THE LAW</td>
<td>2</td>
</tr>
</tbody>
</table>

In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law's online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant’s third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These classes can be found in the Core Required Courses on the Law JD program page (p. 677).

Financial Aid
BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law’s median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

HON courses with approval of faculty advisor or Chair

Prerequisites may be waived with the permission of the instructor.

### Open Electives (28 credits)

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

### Art, Media, and Design (BFA)

The Bachelor of Fine Arts in Art, Media, and Design offers a studio specific curriculum that identifies and promotes continuing contact with the enduring values of our artistic heritage and the application of these values to the future. The educational aim of the school is to provide, through individualized mentoring, a focused foundation in studio art practice. The curriculum emphasizes fundamental artistic concepts through project-based learning, problem solving, experimentation in studio courses, and through development of the student artistic voice.

The Art School offers three concentrations, Studio Art, Photography and Media, and Graphic Art, leading to a Bachelor of Fine Arts degree. Each of the concentrations is comprised of courses specifically designed to enhance students’ creativity, productivity, artistic and analytic skills, and mastery of tools and materials. Through individualized mentoring and a choice of electives, students are aided in planning for a variety of diverse art-related professions and graduate school options.

#### Studio Art

- Designed to develop artistic skills and abilities in painting, drawing, sculpture, printmaking, and digital imaging. Areas of Specialty:
  1. Drawing and Painting and Printmaking,
  2. Sculpture,
  3. Digital Imaging in Studio Art,
  4. Graphic Art

#### Photography and Media Art

- Designed to develop artistic skills and abilities in photography, digital photography, video, and web art. Areas of Specialty:
  1. Photography,
  2. Digital Photography,
  3. Graphic Art,
  4. Intermedia/Web Art and Video Art

#### Graphic Art

- Designed to develop artistic skills and abilities in primarily two-dimensional media, focusing on an intersection of art and design that can include photography, drawing, printmaking, text, digital imaging, web art, the graphic novel, and the artist book and poster. Areas of Specialty:
  1. Photography,
  2. Intermedia/Web Art and Video Art,
  3. Drawing and Painting and Printmaking

Complementary Minors in related areas: Students in the BFA in Art, Media, and Design have the option of complementing their major for extended artistic study and/or expanded career possibilities with minors in: Communication and Media, Graphic Design, Creative Writing, Art-Related Service Learning, Illustration, Animation, Game Design, Digital Cinema, Marketing (for non-business majors), History of Art and Architecture, American Politics, Psychology, International Politics, Public Law and Political Thought, Environmental Studies/Science, and Sustainability Studies. For details please visit the college/school website for the minor(s) in which you are interested.
Students majoring in Art, Media, and Design (BA) or Art (BA) are restricted from earning this major.

</tr>
<tr>
<td>Open Electives</td>
<td>24</td>
</tr>
<tr>
<td><strong>Total hours required</strong></td>
<td><strong>192</strong></td>
</tr>
</tbody>
</table>

### Learning Outcomes

Students will be able to:

- Demonstrate a high degree of competency of technical execution appropriate to their chosen medium.
- Produce work that demonstrates the social, visual, psychological, and/or aesthetic components of art making.
- Differentiate between artistic styles and the diverse populations and communities from which works of art are made.
- Express their thoughts and opinions in critiques, written assignments, and through their artwork.
- Produce work that demonstrate their ability to take creative and intellectual risks.
- Integrate the ways in which their materials, techniques, and subjects generate meaning.
- Understand the place of art making in a global context that connects with other disciplines.
- Define themselves as professional artists who contribute to their communities with their creative work.

### College Core Requirements

#### Study in the Major Field

The student's course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By "liberal education" the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized "concentration." The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student's choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

### Declaration of Major, Minor and Concentration

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

### External Credit and Residency

A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

### Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1 Students must earn a C- or better in this course.
2 Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam.

**Learning Domains**

**Arts and Literature (AL) (p. 1300)**

- Not Required

**Historical Inquiry (HI) (p. 1304)**

- 2 Courses Required

**Math and Computing (MC) (p. 1306)**

- Not Required

**Philosophical Inquiry (PI) (p. 1307)**

- 2 Courses Required

**Religious Dimensions (RD) (p. 1308)**

- 2 Courses Required

**Scientific Inquiry (SI) (p. 1310)**

- 1 Course Required

  [1 Lab Course]

**Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)**

- 2 Course Required

**Notes**

A student majoring in Art, Media, and Design (AMD) is required to complete the Capstone offered by the AMD Department. This is the case even if a student is double majoring (or pursuing a dual degree) and the secondary major (or degree) requires its own Capstone. An AMD major in the University Honors Program shall take the University Honors Capstone and the AMD Capstone.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or as the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Please Note: ART 104 is not acceptable for major credit.

Prerequisites may be waived with the permission of the instructor.
Concentration Requirements

Students must also complete the requirements from one of the following concentrations: Studio Art, Photography and Media Art, or Graphic Art.

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

- Graphic Art Concentration, Art, Media, and Design (BFA) (p. 166)
- Photography and Media Art Concentration, Art, Media, and Design (BFA) (p. 167)
- Studio Art Concentration, Art, Media, and Design (BFA) (p. 167)

### Open Electives (24 credits)

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

HON courses with approval of faculty advisor or Chair
# Artificial Intelligence (MS)

The MS in Artificial Intelligence degree provides students with the foundational knowledge and technical skills to design and implement artificial intelligence machines and autonomous systems. Students will gain a deep understanding of advanced concepts and techniques in AI, and will learn core relevant areas including machine learning, vision computing, natural language processing, robotics and cognitive science. The degree prepares students for professional careers as AI/ML engineers or research scientists, managing intelligent systems development and design.

## Program Requirements

<table>
<thead>
<tr>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introductory Courses</td>
</tr>
<tr>
<td>Degree Requirements</td>
</tr>
<tr>
<td>Total hours required</td>
</tr>
</tbody>
</table>

## Learning Outcomes

Students will be able to:

- Analyze and design architectures for intelligent agents to solve a specific real-world problem.
- Explain core concepts of advanced machine learning techniques and AI algorithms including, for instance, heuristic search, logical reasoning, supervised and unsupervised learning, deep learning, classification methods, Bayesian networks, natural language processing and image analysis.
- Identify and combine AI techniques and approaches to solve a specific problem and to develop a modern intelligent application.
- Use programming skills to implement an AI enabled system in a specific domain.
- Explain and define categories of ethical dilemmas posed by the coming revolution in intelligent and autonomous computing systems.
- Work independently or in a small team to design and develop an intelligent computer system.
- Read and present research papers.
- Communicate effectively the core concepts of an intelligent computer system to a non-technical audience.

## Degree Requirements

### Course Requirements

No Introductory Course may be substituted for any other course at any level.

#### Introductory Courses

Introductory courses may be waived for any of the following conditions:

- The student has the appropriate course work to satisfy an Introductory Course.
- The student has appropriate and verified professional experience to satisfy an Introductory Course.
- If an exam is available, the student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

Arts Leadership (MFA)

The Theatre School’s graduate Arts Leadership Fellowship is a two-year Master of Fine Arts (MFA) program that combines full-time employment at Chicago Shakespeare Theater with full-time coursework at DePaul University. This rigorous program, distinct among competitive programs, is designed to prepare students to become highly skilled leaders in the complex and sophisticated world of the arts.

**Program Requirements**

<table>
<thead>
<tr>
<th>Degree Requirements</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total hours required</td>
<td>96</td>
</tr>
</tbody>
</table>

**Learning Outcomes**

**Core Outcomes:**

Students will be able to:

- Identify and describe the historical and theatrical significance of a range of theatrical artists, works, and artistic approaches from antiquity to the present, encompassing a broad range of periods, cultures, and styles.
- Identify and explain their theatrical work in the context of the cultural and social impact of the arts.

**Program Specific Outcomes:**

Students will be able to:

- Master the nature and dynamics of collaborative practice between and among artists, boards, personnel, and audience and work with collaborators within an organizational structure.
- Develop and master the skills of strategic planning and master the basic principles of finance (including budgeting and financial management).
- Develop a workable knowledge of law and legal procedures as they relate to the ethics of business practice, governance, and contracts, and a practical knowledge of relevant labor relations and issues.
- Develop specific proficiencies in marketing strategies as they relate to overall artistic programming and specific events.
- Understand the specifics of facility management and resource allocation.

---

Asian Studies, Global (Minor)

The Global Asian Studies Program at DePaul is the first program of its kind in the world and unique in its global approach to the study of Asia, Asian diaspora and transnationalism, and Asian American topics.

Our award-winning faculty offer international expertise and professional training in our more than one hundred courses. We have a vibrant alumni mentoring network as well as international internship opportunities.

See our website (https://las.depaul.edu/academics/global-asian-studies/Pages/default.aspx) for information about our faculty, students and alumni. The Global Asian Studies program also hosts a number of events. We bring in speakers and performers of international renown to provide the latest scholarly and popular culture developments in the field of Global Asian Studies. These and other program activities provide a contemporary link between in-class learning and out-of-the-classroom experiences. For more information, email us at globalasianstudies@depaul.edu.

A minor in Global Asian Studies complements a student’s major field of study through:

- Enhancing cultural competence in Asia, particularly in business and social practices.
- Preparing for real-world challenges, especially in inter-cultural and international environments.
- Improving critical thinking and analytical skills, including in professional presentation and writing.
- Strengthening career readiness via hands-on learning, study abroad and international exchange.
- Developing flexibility and adaptability to new places and situations.
- Mentoring and networking opportunities.

**Minor Requirements**

A student minoring in Global Asian Studies is required to complete the following courses totaling 24.0 hours (6 courses):
<table>

NOTE: Students may use up to three courses focusing on only one country (e.g., up to three China, Japan, or India courses) towards the five General Asia electives.

**Astrophysics (BS)**

The Astrophysics program focuses on the theoretical, observational and experimental study of the Universe. Emphasis is placed on the universe on its largest scales (cosmology), its most visible constituents (stars), and on analysis of modern astronomical data sets. Undergraduates also have the opportunity to work with faculty in their research.
### Program Requirements

</tr>
</tbody>
</table>

Students will be able to:

- Demonstrate critical thinking, quantitative, and mathematical skills required to answer questions about the behavior of the universe.
- Create and interpret multiple representations of astrophysics concepts through the use of mathematics, computational code, computer simulations, as well as written, graphical, and pictorial descriptions.
- Design, execute, and analyze observations to test astrophysics theories and hypotheses.
- Effectively communicate their understanding of astrophysics concepts to scientists and non-scientists.

### College Core Requirements

#### Modern Language Requirements

Students who intend to graduate with the Bachelor of Arts (BA) degree will be required to demonstrate competence in a modern language equivalent to the proficiency attained from one year of college-level language study. Such competence may be demonstrated in one of several ways:

- completing the last course in the fourth-year high school sequence of any language
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

### Major Declaration Requirements

All students in the College are required to declare a major field prior to beginning their junior year. After researching College programs, the student should declare a major field by visiting Campus Connection and using the Declarations and Inter-College Transfer tool. The student will then be assigned a faculty advisor or staff advisor in the department or program and should make an appointment to see that advisor at his or her earliest convenience.

To change major fields, or to declare a minor or concentration, the student must use the Declarations and Inter-College Transfer tool described above. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the College or an academic advisor in the Office for Academic Advising Support.

### Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact Student Records.

Students who complete an Inter-College Transfer (ICT) to the College of Science and Health will abide by the College of Science and Health Modern Language Requirement in place on the effective date of the ICT.

BA students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While Bachelor of Science (BS) students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.
1 Students must earn a C- or better in this course.

2 Students with a primary major in Physics are required to complete the Capstone offered by the Physics department. Students double majoring or pursuing dual degrees with the primary major or primary degree in Physics are required to complete the Capstone offered by the Physics department. Physics students in the University Honors Program shall take the University Honors Capstone. They are not expected to take both the Honors Capstone and the primary major or primary degree Capstone.

Learning Domains
Arts and Literature (AL) (p. 1300)
- 3 Courses Required

Historical Inquiry (HI) (p. 1304)
- 2 Courses Required

Math and Computing (MC) (p. 1306)
- Not Required

Philosophical Inquiry (PI) (p. 1307)
- 2 Courses Required

Religious Dimensions (RD) (p. 1308)
- 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
- Not required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
- 3 Courses Required

Notes
Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

CHE 130 & CHE 131 GENERAL CHEMISTRY I and GENERAL CHEMISTRY I LABORATORY
CHE 132 & CHE 133 GENERAL CHEMISTRY II and GENERAL CHEMISTRY LABORATORY II
CHE 134 & CHE 135 GENERAL CHEMISTRY III and GENERAL CHEMISTRY LABORATORY III

Mathematics Sequence: Select three 300-level sequenced courses as approved by departmental advisor

Computer Science Sequence: Select any one year-long three-course sequence of CSC courses as approved by departmental faculty advisor

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Audit and Advisory Services (MSAA)

Program Description
The Master of Science in Audit and Advisory Services (MSAA) provides students with advanced auditing skills and prepares them to succeed as accountants at both public accounting firms and corporate internal audit departments. Students received hands-on training with audit tools, visualization techniques and data analytics. The program also uses forensic accounting to prepare students to understand what questions to ask about financial data and how to interpret the findings. Students graduate with a set of integrated competencies that are highly valued by the accounting profession.

The program is intended for students with a prior degree in accounting. It offers a unique opportunity to earn a graduate degree while also fulfilling the extra credit hours needed to qualify for the CPA exam.

Program Features
Comprehensive curriculum. The program’s integrated curriculum focuses on areas that are in high demand across accounting profession sectors, including internal audit, data analytics, fraud and forensic accounting, and information systems.

Case-based coursework. Students gain advanced, practical skills for workplace application by learning in a case-based setting and working with audit systems used by accounting professionals.

Professional input. The program’s core competencies are based on insights from top-ranking members of the auditing and accounting profession. Students are prepared with skills that are highly regarded by firms and corporations.

Recognized as a top school. DePaul’s accounting program is recognized by the Institute of Internal Auditors Internal Auditing Education Partnership Program as a comprehensive-level school for internal audit education—making DePaul one of only 15 schools in the United States recognized with this distinction.

Learning Outcomes
Students will be able to:

• Exhibit sophisticated knowledge of internal auditing, corporate governance and internal control.
• Apply and develop an understanding of data mining, data analytics and data reporting.
• Understand and critically analyze the regulatory and ethical standards within an internal auditing and fraud context.
• Demonstrate an understanding of audit and fraud issues from an international perspective.
• Find red flags in financial statement and reports and investigate fraud within an organization.
• Recognize and apply relevant ethical standards in the context of fraud and internal auditing.
• Write and speak about current accounting issues to peers, practitioners, and the public.

Degree Requirements

Course Requirements
Twelve courses are required to complete the Master of Science in Audit and Advisory Services (MSAA) degree. Of the twelve required courses, nine are required and three are selected from among business electives. Students may not repeat at the graduate level course material that was completed as part of their undergraduate degree. Please consult with an academic advisor for clarification.

Students must complete the following nine required courses (36 hrs):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 535</td>
<td>PRINCIPLES OF ACCOUNTING INFORMATION SYSTEMS</td>
<td>4</td>
</tr>

<td>FORENSIC AND INVESTIGATIVE ACCOUNTING</td>
<td>4</td>
</tr>
<tr>
<td>ACC 646</td>
<td>FORENSIC FINANCIAL STATEMENT ANALYSIS AND VALUATION</td>
<td>4</td>
</tr>
</tbody>
</table>

In addition, students must complete three open business electives (12 hrs).

Note: The following classes may not be taken for elective credit:
Students interested in this minor should consult home college advisors and secure permission from the Bilingual-Bicultural Education Program to enroll.

Course Requirements

7 courses are required for the minor:

<table>

Minor in Bilingual Education with Bilingual Endorsement

This option is only available to undergraduates in the College of Education pursuing ISBE Licensure.

The minor with endorsement requires the above 7 courses PLUS 100 fieldwork hours (including registration in BBE 96) and a passing score on the Target Language Proficiency Test.

- BBE 96

ISBE Licensure Division endorses in any target language for which tests are available through ILTS. If a language test through ILTS does not exist for bilingual endorsement, candidates may substitute the Foreign Language Content-Area test.

Note: Individuals interested in pursuing a minor in bilingual and a minor in ESL need to select the combined ESL-Bilingual (ESL-BE) minor. Individuals cannot earn a separate minor for both areas.

Bilingual-Bicultural Education (MA or MEd)

The Bilingual Bicultural Education program offers a comprehensive and in-depth examination of the linguistic, academic, social, and cultural needs of English language learners by addressing second language acquisition and bilingual/ESL educational theory, research, policy, and practice. The foundation of the program rests on the sociopolitical, linguistic, and cultural implications of approaches to language education and language policies. The program offers two concentrations for Illinois State endorsement: Bilingual Education (BE) and English as a Second Language (ESL).

Licensure Option

Students seeking the master's degree in Bilingual Bicultural Education have the option to also pursue an Illinois initial or subsequent
teaching license. Please consult your academic advisor as an additional program application may be required.

**Endorsements**

- **Bilingual Education (BE):** Requires an Illinois target language proficiency (TLP) test in addition to the required coursework and field experience hours.
- **English as a Second Language (ESL):** Must complete the required coursework and field experience hours (does not require a language proficiency test).

**Endorsement Application**

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE. All licensure guidelines, rules, and requirements can be found on the ISBE website.

**Program Requirements**

<table>
<thead>
<tr>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>48</td>
</tr>
</tbody>
</table>

**Learning Outcomes**

Students will be able to:

- Apply theoretical foundations of second language education to develop sound instruction and teaching approaches for language learners.
- Integrate theory and research on second language acquisition into praxis for language learners.
- Evaluate history and policies of second language education and how historical and policy context affect the education of language learners.
- Analyze various assessment issues that affect second language learners, such as accountability, reliability, validity, bias, special education testing, language proficiency, language supports, and accommodations.
- Demonstrates a positive attitude and commitment to the profession
- Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
- Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates concern for and protection of safety and well-being of others

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

Biochemistry (BA)

As a Biochemistry major, you will learn the fundamentals of chemical and biochemical theory and practice through scientific investigation, laboratory experience and research opportunities.

All Biochemistry students will take core courses in chemistry and biochemistry, biology, physics and mathematics.

Faculty in the Department of Chemistry and Biochemistry research projects in biochemistry, chemical biology, biophysical chemistry, medicinal chemistry and bioanalytical chemistry in addition to traditional subdisciplines of chemistry. Their projects are funded internally and also through government, foundation and industry grants, providing students with multiple opportunities to gain hands-on research experience. Being in Chicago also allows you to attend many scientific conferences hosted in the city throughout the year.

</tbody>
</table>

Learning Outcomes

Students will be able to:
- Perform experiments in the domain of biochemistry, using discipline specific techniques.
- Apply proper safety protocols for biochemical laboratory environments.
- Responsibly collect, analyze, and represent scientific data from biochemical experiments.
- Proficiently explain and apply, in writing, core biochemical principles to the results of biochemical experiments and to representative problems.

College Core Requirements

Modern Language Requirements

Students who intend to graduate with the Bachelor of Arts (BA) degree will be required to demonstrate competence in a modern language equivalent to the proficiency attained from one year of college-level language study. Such competence may be demonstrated in one of several ways:
- completing the last course in the fourth-year high school sequence of any language
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
• achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
• achieving a satisfactory rating in a proficiency examination accepted by DePaul
• achieving a score of 3 or higher on the Advance Placement (AP) test for any language
• achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
• achieving a satisfactory score on the CLEP examination

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact Student Records.

Students who complete an Inter-College Transfer (ICT) to the College of Science and Health will abide by the College of Science and Health Modern Language Requirement in place on the effective date of the ICT.

BA students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While Bachelor of Science (BS) students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Major Declaration Requirements

All students in the College are required to declare a major field prior to beginning their junior year. After researching College programs, the student should declare a major field by visiting Campus Connection and using the Declarations and Inter-College Transfer tool. The student will then be assigned a faculty advisor or staff advisor in the department or program and should make an appointment to see that advisor at his or her earliest convenience.

To change major fields, or to declare a minor or concentration, the student must use the Declarations and Inter-College Transfer tool described above. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the College or an academic advisor in the Office for Academic Advising Support.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

In addition, the Department of Chemistry recommends that students who are seeking accreditation by the American Chemical Society fulfill
the Modern Language Option by completing a three-course language sequence. Please see an advisor for further information.

Major Requirements

Course Requirements

Common Core
All students pursuing a Bachelor of Arts in Biochemistry must complete a common core of courses in the department. These courses are consistent with the requirements of all degree programs accredited by the American Chemical Society. The courses in the common core consist of:

<table>
<thead>
<tr>
<th>Introductory Courses</th>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>CHE 130</td>
<td>GENERAL CHEMISTRY I and GENERAL CHEMISTRY I LABORATORY</td>
<td>4-6</td>
</tr>
<tr>
<td></td>
<td>CHE 120</td>
<td>GENERAL CHEMISTRY II and GENERAL CHEMISTRY II LABORATORY</td>
<td>4-6</td>
</tr>
<tr>
<td></td>
<td>CHE 134 &amp; CHE 135</td>
<td>GENERAL CHEMISTRY III and GENERAL CHEMISTRY LABORATORY III</td>
<td>4</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHE 130 &amp; CHE 131</td>
<td>GENERAL CHEMISTRY I and GENERAL CHEMISTRY I LABORATORY</td>
<td>4-6</td>
</tr>
<tr>
<td>CHE 120 &amp; CHE 131</td>
<td>GENERAL CHEMISTRY II and GENERAL CHEMISTRY II LABORATORY</td>
<td>4-6</td>
</tr>
<tr>
<td>CHE 134 &amp; CHE 135</td>
<td>GENERAL CHEMISTRY III and GENERAL CHEMISTRY LABORATORY III</td>
<td>4</td>
</tr>
</tbody>
</table>

The department offers General Chemistry each summer. In this case, the combination of CHE 136/CHE 137 and CHE 138/CHE 139 may substitute for the three-quarter sequences above.

Foundation Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHE 204 &amp; CHE 205</td>
<td>ANALYTICAL CHEMISTRY and ANALYTICAL CHEMISTRY LABORATORY</td>
<td>4</td>
</tr>
<tr>

<tr>
<td>CHE 320 &amp; CHE 321</td>
<td>INTERMEDIATE INORGANIC CHEMISTRY and INTERMEDIATE INORGANIC CHEMISTRY LABORATORY</td>
<td>4</td>
</tr>
<tr>
<td>CHE 340 &amp; CHE 341</td>
<td>BIOCHEMISTRY I and EXPERIMENTAL BIOCHEMISTRY I</td>
<td>4</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>In-Depth Course</th>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>CHE 342 &amp; CHE 343</td>
<td>BIOCHEMISTRY II and EXPERIMENTAL BIOCHEMISTRY II</td>
<td>4</td>
</tr>
</tbody>
</table>

Biology
One year of General Biology, offered by the Department of Biological Sciences, are required to earn a baccalaureate degree in biochemistry.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 191</td>
<td>GENERAL BIOLOGY I FOR SCIENCE MAJORS</td>
<td>4</td>
</tr>
<tr>
<td>BIO 192</td>
<td>GENERAL BIOLOGY II FOR SCIENCE MAJORS</td>
<td>4</td>
</tr>
<tr>
<td>BIO 193</td>
<td>GENERAL BIOLOGY III FOR SCIENCE MAJORS</td>
<td>4</td>
</tr>
</tbody>
</table>

Calculus
One year of calculus is required to earn a baccalaureate degree in biochemistry. This may be accomplished by completing any one of the following five course sequences offered by the Department of Mathematical Sciences:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 147</td>
<td>CALCULUS WITH INTEGRATED PRECALCULUS I</td>
<td>6</td>
</tr>
<tr>
<td>MAT 148</td>
<td>CALCULUS WITH INTEGRATED PRECALCULUS II</td>
<td>6</td>
</tr>
<tr>
<td>MAT 149</td>
<td>CALCULUS WITH INTEGRATED PRECALCULUS III</td>
<td>6</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Sequence One</th>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 150</td>
<td>CALCULUS I</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>MAT 151</td>
<td>CALCULUS II</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>MAT 152</td>
<td>CALCULUS III</td>
<td>4</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Sequence Three</th>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 160</td>
<td>CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS I</td>
<td>5</td>
<td></td>
</tr>
<tr>
<td>MAT 161</td>
<td>CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS II</td>
<td>5</td>
<td></td>
</tr>
<tr>
<td>MAT 162</td>
<td>CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS III</td>
<td>5</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Sequence Four</th>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 170</td>
<td>CALCULUS FOR LIFE SCIENCES I</td>
<td>5</td>
<td></td>
</tr>
<tr>
<td>MAT 171</td>
<td>CALCULUS FOR LIFE SCIENCES II</td>
<td>5</td>
<td></td>
</tr>
<tr>
<td>MAT 172</td>
<td>CALCULUS III WITH DIFFERENTIAL EQUATIONS</td>
<td>5</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Sequence Five</th>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 155</td>
<td>SUMMER CALCULUS I</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>MAT 156</td>
<td>SUMMER CALCULUS II</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Students interested in earning credit for multi-variable calculus should not take the MAT 170/ MAT 171/MAT 172 sequence. Business calculus cannot be substituted for any of the sequences above.
Physics
One year of general physics is required to earn a baccalaureate in biochemistry. This may be accomplished by completing one of the following three-course sequences offered by the Department of Physics:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sequence One</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PHY 170</td>
<td>UNIVERSITY PHYSICS I</td>
<td>4</td>
</tr>
<tr>
<td>PHY 171</td>
<td>UNIVERSITY PHYSICS II</td>
<td>4</td>
</tr>
<tr>
<td>PHY 172</td>
<td>UNIVERSITY PHYSICS III</td>
<td>4</td>
</tr>
<tr>
<td>Sequence Two</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PHY 150</td>
<td>GENERAL PHYSICS I</td>
<td>4</td>
</tr>
<tr>
<td>PHY 151</td>
<td>GENERAL PHYSICS II</td>
<td>4</td>
</tr>
<tr>
<td>PHY 152</td>
<td>GENERAL PHYSICS III</td>
<td>4</td>
</tr>
</tbody>
</table>

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Departmental Program Requirements
The following enrollment-related policies are fully enforced by the Department of Chemistry and Biochemistry

1. All students enrolling in the first course of a General Chemistry sequence must independently meet a minimum mathematics requirement and successfully complete the General Chemistry placement examination. See the course descriptions for General Chemistry for up-to-date information.

2. All prerequisite chemistry courses must be completed with a C- or better. Students not meeting this requirement may be removed from course rosters before the start of an academic session. This requirement may be waived only with departmental consent.

3. The department offers lower-level sequences several times each academic year. Due to potentially small class sizes, upper-level courses are typically scheduled every other year. Students should consult with their faculty academic advisor to develop a program they can complete in a timely fashion.

Sequencing and Prerequisites
Students should begin their General Chemistry and General Biology sequences in their freshman year provided they have an adequate mathematics background. Students not yet prepared for calculus should take the prerequisite courses in their first year. The Calculus and Physics sequences should be taken no later than their sophomore and junior year, respectively. The Organic Chemistry sequence, Analytical Chemistry and Instrumental Analysis should be taken in the sophomore year. The Biochemistry sequence should be taken in their junior year. Advanced courses in Chemistry may be taken as soon as students have met the appropriate prerequisites.

Biochemistry (BS)
As a Biochemistry major, you will learn the fundamentals of chemical and biochemical theory and practice through scientific investigation, laboratory experience and research opportunities.

All Biochemistry students will take core courses in chemistry and biochemistry, biology, physics and mathematics.

Faculty in the Department of Chemistry and Biochemistry research projects in biochemistry, chemical biology, biophysical chemistry, medicinal chemistry and bioanalytical chemistry in addition to traditional subdisciplines of chemistry. Their projects are funded internally and also through government, foundation and industry grants, providing students with multiple opportunities to gain hands-on research experience. Being in Chicago also allows you to attend many scientific conferences hosted in the city throughout the year.

Learning Outcomes
Students will be able to:

- Design and perform biochemical experiments and use chemical instrumentation.
- Apply proper safety protocols while in laboratory environments.
- Responsibly collect, analyze, and represent scientific data.
- Proficiently explain, both orally and in writing, and apply core chemical principles to the results of experiments and to representative problems.

College Core Requirements
Modern Language Requirements
Students who intend to graduate with the Bachelor of Arts (BA) degree will be required to demonstrate competence in a modern language equivalent to the proficiency attained from one year of college-level language study. Such competence may be demonstrated in one of several ways:

- completing the last course in the fourth-year high school sequence of any language
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact Student Records.
Students who complete an Inter-College Transfer (ICT) to the College of Science and Health will abide by the College of Science and Health Modern Language Requirement in place on the effective date of the ICT.

BA students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While Bachelor of Science (BS) students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

**Major Declaration Requirements**

All students in the College are required to declare a major field prior to beginning their junior year. After researching College programs, the student should declare a major field by visiting Campus Connection and using the Declarations and Inter-College Transfer tool. The student will then be assigned a faculty advisor or staff advisor in the department or program and should make an appointment to see that advisor at his or her earliest convenience.

To change major fields, or to declare a minor or concentration, the student must use the Declarations and Inter-College Transfer tool described above. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the College or an academic advisor in the Office for Academic Advising Support.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1. Students must earn a C- or better in this course.
2. Students with a primary major in Biochemistry are required to complete the Capstone offered by the Chemistry department. Students double majoring or pursuing dual degrees with the primary major or primary degree in Biochemistry are required to complete the Capstone offered by the Chemistry department. Biochemistry students in the University Honors Program shall take the University Honors Capstone. They are not expected to take both the Honors Capstone and the primary major or primary degree Capstone.

**Learning Domains**

- **Arts and Literature (AL)** (p. 1300)
  - 3 Courses Required
- **Historical Inquiry (HI)** (p. 1304)
  - 2 Courses Required
- **Math and Computing (MC)** (p. 1306)
  - Not Required
- **Philosophical Inquiry (PI)** (p. 1307)
  - 2 Courses Required
- **Religious Dimensions (RD)** (p. 1308)
  - 2 Courses Required
- **Scientific Inquiry (SI)** (p. 1310)
  - Not Required
- **Social, Cultural, and Behavioral Inquiry (SCBI)** (p. 1312)
  - 3 Courses Required

**Notes**

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

In addition, the Department of Chemistry recommends that students who are seeking accreditation by the American Chemical Society fulfill the Modern Language Option by completing a three-course language sequence. Please see an advisor for further information.

**Major Requirements**

**Course Requirements**

**Common Core**

All students pursuing a Bachelor of Science in Biochemistry must complete a common core of courses in the department. These courses are consistent with the requirements of all degree programs accredited by the American Chemical Society. The courses in the common core consist of:
### Introductory Courses

<table>
<thead>
<tr>

</tr>
<tr>
<td>BIO 250</td>
<td>CELL BIOLOGY</td>
<td>4</td>
</tr>
</tbody>
</table>

One 300-level biology course may replace an In-depth Chemistry course 1

1 In consultation with a student’s academic advisor. Suggested options:
- BIO 339
- BIO 370
- BIO 375
- HLTH 320

### Calculus

One year of calculus is required to earn a baccalaureate degree in biochemistry. This may be accomplished by completing any one of the following five course sequences offered by the Department of Mathematical Sciences:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Sequence One</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>MAT 147</td>

<td>6</td>
</tr>
<tr>
<td>MAT 148</td>
<td>CALCULUS WITH INTEGRATED PRECALCULUS II</td>
<td>6</td>
</tr>
<tr>
<td>MAT 149</td>
<td>CALCULUS WITH INTEGRATED PRECALCULUS III</td>
<td>6</td>
</tr>
</tbody>
</table>

**Sequence Two** |
| MAT 150 | CALCULUS I | 4 |
| MAT 151 | CALCULUS II | 4 |
| MAT 152 | CALCULUS III | 4 |

**Sequence Three** |
| MAT 160 | CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS I | 5 |
| MAT 161 | CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS II | 5 |
Autumn 2021-2022 183

MAT 162 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS III 5

Sequence Four
MAT 170 CALCULUS FOR LIFE SCIENCES I 5
MAT 171 CALCULUS FOR LIFE SCIENCES II 5
MAT 172 CALCULUS III WITH DIFFERENTIAL EQUATIONS 5

Sequence Five
MAT 155 SUMMER CALCULUS I 6
MAT 156 SUMMER CALCULUS II 6

Students interested in earning credit for multi-variable calculus should not take the MAT 170/MAT 171/MAT 172 sequence. Business calculus cannot be substituted for any of the sequences above.

Physics
One year of general physics is required to earn a baccalaureate in biochemistry. This may be accomplished by completing one of the following three-course sequences offered by the Department of Physics:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHY 170</td>
<td>UNIVERSITY PHYSICS I</td>
<td>4</td>
</tr>
<tr>
<td>PHY 171</td>
<td>UNIVERSITY PHYSICS II</td>
<td>4</td>
</tr>
<tr>
<td>PHY 172</td>
<td>UNIVERSITY PHYSICS III</td>
<td>4</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHY 150</td>
<td>GENERAL PHYSICS I</td>
<td>4</td>
</tr>
<tr>
<td>PHY 151</td>
<td>GENERAL PHYSICS II</td>
<td>4</td>
</tr>
<tr>
<td>PHY 152</td>
<td>GENERAL PHYSICS III</td>
<td>4</td>
</tr>
</tbody>
</table>

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Departmental Program Requirements
The following enrollment-related policies are fully enforced by the Department of Chemistry and Biochemistry

1. All students enrolling in the first course of a General Chemistry sequence must independently meet a minimum mathematics requirement and successfully complete the General Chemistry placement examination. See the course descriptions for General Chemistry for up-to-date information.

2. All prerequisite chemistry courses must be completed with a C- or better. Students not meeting this requirement may be removed from course rosters before the start of an academic session. This requirement may be waived only with departmental consent.

3. The department offers lower-level sequences several times each academic year. Due to potentially small class sizes, upper-level courses are typically scheduled every other year. Students should consult with their faculty academic advisor to develop a program they can complete in a timely fashion.

Sequencing and Prerequisites
Students should begin their General Chemistry and General Biology sequences in their freshman year provided they have an adequate mathematics background. Students not yet prepared for calculus should take the prerequisite courses in their first year. The Calculus and Physics sequences should be taken no later than their sophomore and junior year, respectively. The Organic Chemistry sequence, Analytical Chemistry and Instrumental Analysis should be taken in the sophomore year. The Biochemistry sequence should be taken in their junior year. Advanced courses in Chemistry and courses in biology may be taken as soon as students have met the appropriate prerequisites.

Bioethics and Society (Minor)
The Minor in Bioethics and Society offers students an interdisciplinary approach to the various moral, social, political, and conceptual issues that arise at the ever changing intersection of the life sciences, health, and society.

Course Requirements
The minor requires students to take a total of six courses (24 quarter hours):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HLTH 229</td>
<td>ETHICS FOR HEALTH SCIENCES</td>
<td>4</td>
</tr>
<tr>
<td>PHL 229</td>
<td>BIOMEDICAL ETHICS</td>
<td></td>
</tr>
<tr>
<td>REL 229</td>
<td>MEDICINE, ETHICS AND SOCIETY</td>
<td></td>
</tr>
</tbody>
</table>

Note: Only one of these courses may be counted towards satisfaction of the requirement for the minor.

Students must take a total of four courses, in addition to the foundational bioethics course, in accordance with the following distribution:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>NEU 228</td>
<td>NEUROETHICS</td>
<td></td>
</tr>
<tr>

</tbody>
</table>

Choose 3 of the following: 12

- PHL 416  ARISTOTLE II
- PHL 425  AQUINAS
- PHL 511  KANT II
- PHL 520  MARX I
  or PHL 521  MARX II
- PHL 641  SEMINAR ON THE CONTINENTAL TRADITION IN ETHICS
- PHL 656  SEMINAR ON SOCIAL AND POLITICAL THOUGHT
- PHL 660  SEMINAR IN FEMINIST ETHICS
- PHL 661  TOPICS IN FEMINIST THEORY

Training / Teaching Requirements

1. Students must participate in the Biomedical Ethics Training Program or serve as a Teaching Assistant for PHL 229: Biomedical Ethics with a tenured or tenure-line faculty member.

2. Upon completion of the training program or assistantship, students must teach at least two sections of Biomedical Ethics (PHL 229).

Biological Science (Minor)

As a Biological Science minor you will gain a strong foundation in biological science theories and practices. You will have the opportunity to choose electives based on your individual study plan.

Select three additional courses (generally lab-based) designed for the major 1 12

1. If desired, these courses can be recommended by a departmental advisor on the basis of the student's interests.

Biological science majors cannot earn a biological science minor.

Biological Sciences (BA)

The Department of Biological Sciences provides courses for both biology majors and non-majors. The core program for the BA major consists of seven lecture/laboratory courses which provide a strong foundation in biology. Beyond the core program, students take three additional majors-level biology courses, guided by their interests. There are a number of opportunities for learning outside the classroom, including a program of seminars, internships, and opportunities for research with a member of the faculty. Students are encouraged to use their open electives to complete coursework required for graduate or professional programs or to pursue minors in fields that will complement their training in biology.

Learning Outcomes

Students will be able to:

- Distinguish among the diversity of fields and approaches within Biology.
- Describe the relationships among Biology and other scientific and social disciplines.
- Describe how the scientific process is used to identify and resolve testable questions.
- Critically analyze and interpret the biological scientific literature.
- Effectively communicate scientific information to diverse audiences in both written and oral form.
College Core Requirements

Modern Language Requirements

Students who intend to graduate with the Bachelor of Arts (BA) degree will be required to demonstrate competence in a modern language equivalent to the proficiency attained from one year of college-level language study. Such competence may be demonstrated in one of several ways:

- completing the last course in the fourth-year high school sequence of any language
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact Student Records.

Students who complete an Inter-College Transfer (ICT) to the College of Science and Health will abide by the College of Science and Health Modern Language Requirement in place on the effective date of the ICT.

BA students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While Bachelor of Science (BS) students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Major Declaration Requirements

All students in the College are required to declare a major field prior to beginning their junior year. After researching College programs, the student should declare a major field by visiting Campus Connection and using the Declarations and Inter-College Transfer tool. The student will then be assigned a faculty advisor or staff advisor in the department or program and should make an appointment to see that advisor at his or her earliest convenience.

To change major fields, or to declare a minor or concentration, the student must use the Declarations and Inter-College Transfer tool described above. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the College or an academic advisor in the Office for Academic Advising Support.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1 Students must earn a C- or better in this course.

2 Students with a primary major in Biology are required to complete the Capstone offered by the Biology department. Students double majoring or pursuing dual degrees with the primary major or primary degree in Biology are required to complete the Capstone offered by the Biology department. Biology students in the University Honors Program shall take the University Honors Capstone. They are not expected to take both the Honors Capstone and the primary major or primary degree Capstone.

Learning Domains

Arts and Literature (AL) (p. 1300)
- 3 Courses Required

Historical Inquiry (HI) (p. 1304)
- 2 Courses Required

Math and Computing (MC) (p. 1306)
- 1 Course Required
  [1 CR Course]

Philosophical Inquiry (PI) (p. 1307)
- 2 Courses Required

Religious Dimensions (RD) (p. 1308)
- 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
- Not Required
Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)

• 3 Courses Required

Notes
Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy would apply only to those students in pursuit of a BA or BS degree, and not to those who are double majors or earning BFA or BM degrees.

1 Biology courses that fulfill the Scientific Inquiry Domain requirements, other than the General Biology sequence, do not generate credit toward the major.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Biological Sciences (BS)

The Department of Biological Sciences provides courses for both biology majors and non-majors. For its BS major, the department offers seven different concentrations. These concentrations provide a core program consisting of five lecture/laboratory courses. Beyond the core program, the concentrations allow the students to have a moderate degree of specialization in any one of several areas. It also provides a number of opportunities for learning outside the classroom, including a program of seminars, internships and opportunities for research with, or under the direction of, a member of the faculty.

Learning Outcomes

Students will be able to:

• Distinguish among the diversity of fields and approaches within Biology.
• Describe the relationships among Biology and other scientific and social disciplines.
• Describe how the scientific process is used to identify and resolve testable questions.
• Critically analyze scientific information and design and analyze the results of an experiment.
• Effectively communicate scientific information in both written and oral forms.

College Core Requirements

Modern Language Requirements

Students who intend to graduate with the Bachelor of Arts (BA) degree will be required to demonstrate competence in a modern language equivalent to the proficiency attained from one year of college-level language study. Such competence may be demonstrated in one of several ways:

• completing the last course in the fourth-year high school sequence of any language
• completing the last course in the first-year college sequence of any language
• completing a college course beyond the first-year level in any language
• achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
• achieving a satisfactory rating in a proficiency examination accepted by DePaul
• achieving a score of 3 or higher on the Advance Placement (AP) test for any language
• achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
• achieving a satisfactory score on the CLEP examination

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact Student Records.

Students who complete an Inter-College Transfer (ICT) to the College of Science and Health will abide by the College of Science and Health Modern Language Requirement in place on the effective date of the ICT.

BA students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While Bachelor of Science (BS) students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

**Major Declaration Requirements**

All students in the College are required to declare a major field prior to beginning their junior year. After researching College programs, the student should declare a major field by visiting Campus Connection and using the Declarations and Inter-College Transfer tool. The student will then be assigned a faculty advisor or staff advisor in the department or program and should make an appointment to see that advisor at his or her earliest convenience.

To change major fields, or to declare a minor or concentration, the student must use the Declarations and Inter-College Transfer tool described above. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the College or an academic advisor in the Office for Academic Advising Support.

</tr>
<tr>
<td>MAT 156</td>
<td>SUMMER CALCULUS II</td>
<td>6</td>
</tr>
</tbody>
</table>

Students may be advised on the basis of their performance on the Mathematics Diagnostic test to take one or more course before calculus.

**Concentration Requirements**

Students must also complete the requirements from one of the following concentrations: Integrative Biology; Microbiology and Biotechnology; Medicine and Health; Neuroscience; Ecology and Evolution; Cell & Molecular Biology; or Physiology. Students are limited to only declaring one concentration.

**Sequencing**

Since programs in the Biological Sciences tend to be structured, it is useful for students to take courses in sequence. Students should begin with the General Biology and General Chemistry sequences. These are prerequisite to higher level requirements such as Ecology, Cell Biology, Genetics, and Organic Chemistry, which should preferably be taken in the sophomore year. Since calculus is required for the degree, students should also begin their study of mathematics as soon as possible, preferably prior to their junior year, so that they can be adequately prepared for the General Physics sequence, best taken in the junior year. Because of this highly structured sequence, students are strongly encouraged to work with their departmental advisor in order to plan their course schedules and plan alternatives if necessary. Such planning is particularly important for transfer students, as the sequence presented above is highly recommended and most likely to be completed in a timely fashion.

The predominance of chemistry and biology course sequences required in the freshman and sophomore years generally dictates that, with the exception of the Liberal Studies Core courses, the majority of the Liberal Studies courses may be postponed until the junior and senior years. Students may therefore be taking fewer Liberal Studies courses in the first two years than many other programs, concentrating instead on major field requirements, which are prerequisites to upper division courses.
Concentration Requirements

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

- Cell & Molecular Biology Concentration, Biological Sciences (BS) (p. 190)
- Ecology and Evolution Concentration, Biological Sciences (BS) (p. 190)
- Integrative Biology Concentration, Biological Sciences (BS) (p. 191)
- Medicine and Health Concentration, Biological Sciences (BS) (p. 191)
- Microbiology and Biotechnology Concentration, Biological Sciences (BS) (p. 192)
- Neuroscience Concentration, Biological Sciences (BS) (p. 192)
- Physiology Concentration, Biological Sciences (BS) (p. 192)

Biological Sciences (BS) + Secondary Education Biology (MEd)

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The TEACH Program combines a College of Science and Health (CSH) undergraduate Biology major or some other disciplinary major with a graduate level College of Education (COE) Master of Education (MEd) Program. Students graduate with a BS in their CSH disciplinary major and a MEd in Education with a State of Illinois Secondary Biology Certification.

Students may apply to the TEACH Program during the spring of their junior year. They must enroll in the Junior Year Experiential Learning course, TCH 320, and meet other application criteria; these include completion of at least 16 quarter credit hours at DePaul and a 3.0 GPA. During their senior year, students are required to complete a TEACH Program capstone course, TCH 390, and three 400-level courses that count toward both their undergraduate and graduate degrees:

Junior Year Coursework: 4 undergraduate quarter hours required

- General Chemistry III
- General Physics I
- General Physics II
- General Physics III

This combined degree program of the College of Science and Health and the College of Education was collaboratively developed, and is governed and taught by faculty from these units.

The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring quarter. Upon graduation and the fulfilling of State of Illinois licensure requirements (which may require some additional coursework work in the student’s major and related fields), students are eligible to be licensed to teach Biology at the 5th-12th grade levels.

A full description of the TEACH Program can be found here. (p. 1118)

Students interested in the TEACH Program should consult with the designated TEACH Program advisor in their home department.

Biological Sciences (BS)/Biological Sciences (MS)

The combined Bachelor’s/Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and MS degree programs.
Students apply to this program in spring of their junior year. Applicants should have the support of a faculty member that will serve as their research mentor in the MS program. Information on potential research mentors can be found at our Biology Faculty and Staff page:

https://csh.depaul.edu/academics/biological-sciences/Pages/faculty-staff.aspx

In addition, applicants will need to submit a copy of their transcripts, a letter of recommendation from the potential research mentor, and a personal statement highlighting their professional interests, experience, and plans. A minimum GPA of 3.0 is expected. Interested students should meet with the Graduate Program Director to learn more.

Information about the Biological Sciences MS program can be found at the following link:

https://csh.depaul.edu/academics/biological-sciences/graduate/biological-sciences-ms/Pages/default.aspx

Select two of the following:  

1 Each professional program in health requires different courses from the list below. Please consult with an academic advisor to help you select the ones that will support your applications.
2 Students may substitute HLTH 301 AND HLTH 302 for BIO 201 AND BIO 307 or BIO 201 AND BIO 308. Students who opt to take HLTH 301 and HLTH 302 cannot receive credit for any of the following courses: BIO 201, BIO 307, and BIO 308. BIO 201 and BIO 307 or BIO 308 do not need to be taken as a combination.
3 Students can request permission from the department to have a BIO 390 class count for one of the requirements if appropriate.
4 CHE 234 & 235, 340 & 341, 346, HLTH 301, 302, 320, and NEU 201 also fulfills this requirement.

It is strongly recommended that students who wish to take the MCAT take an ethics course as part of their Philosophical Inquiry Domain and PSY 105, PSY 106 & SOC 101 for their Social, Cultural, and Behavioral Inquiry. Biology courses other than the General Biology sequence that...
have any Scientific Inquiry domain designation do not generate credit toward the major or minor.

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Microbiology and Biotechnology Concentration, Biological Sciences (BS)

Select three courses from the following list, at least one of which must be a lab course:

- BIO 201: HUMAN ANATOMY
- or BIO 270: COMPARATIVE VERTEBRATE ANATOMY
- BIO 309: PLANT PHYSIOLOGY
- or BIO 307: ANIMAL PHYSIOLOGY
- or BIO 308: HUMAN PHYSIOLOGY
- BIO 312: TOPICS IN EXERCISE PHYSIOLOGY
- BIO 339: CELLULAR NEUROBIOLOGY
- BIO 352: ADVANCED COMPARATIVE PHYSIOLOGY
- BIO 385: MAMMALIAN REPRODUCTION

¹ Students can substitute HLTH 301 AND HLTH 302 for BIO 307 or BIO 308.
² At least two of the five total electives must be lab courses. Biology courses other than the General Biology sequence that have any Scientific Inquiry domain designation do not generate credit toward the major or minor.
³ CHE 234 & 235, 340 & 341, 346, HLTH 301, 302, 320, and NEU 201 also fulfills this requirement.

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.
BIO 386  INTRODUCTION TO ENDOCRINOLOGY
BIO 360  MOLECULAR BIOLOGY
CHE 340  BIOCHEMISTRY I
& CHE 341  and EXPERIMENTAL BIOCHEMISTRY I
Select four additional majors-level Biology courses 1,2  16

1 One must be a lab course. Biology courses other than the General Biology sequence that have any Scientific Inquiry domain designation do not generate credit toward the major or minor.
2 CHE 234 & 235, 340 & 341, 346, HLTH 301, 302, 320, and NEU 201 also fulfills this requirement.

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Biological Sciences (MA)
A program of study leading to the Master of Arts degree in Biology is designed for students who:

• Have a strong desire to increase their understanding of the life sciences.
• Plan additional education at the master's level for increased proficiency in teaching. This program is not intended for those students pursuing technical and/or laboratory research-related careers, or planning to continue study towards the PhD degree.

Program Requirements  Quarter Hours
Degree Requirements  50
Total hours required  50

Learning Outcomes
Students will be able to:

• Apply biology knowledge to design a scientific study to test an original hypothesis.
• Distinguish among the diversity of fields and approaches within Biology.
• Critically analyze and evaluate the validity of scientific findings.
• Effectively communicate scientific information in both written and oral formats.

Degree Requirements
Course Requirements
50 hours of graduate credit including:

BIO 486  INTRODUCTION TO ENDOCRINOLOGY
BIO 489  RESEARCH IN FIELD BIOLOGY

BIO 490, as appropriate, may also be approved in one of the three core areas.

BIO 406 can be taken as an elective.

Advancement to Candidacy
Based upon results of a qualifying examination taken near the end of the third quarter of the student's first full year of course work.

Final Project Requirement
Based upon an independent library research project under the supervision of a faculty member. Up to four credit hours of BIO 496 may be taken to complete the Final Project.

Program Graduate Academic Student Handbook

Academic Probation
Students are expected to maintain a minimum cumulative grade point average (GPA) of 3.00. If a student's cumulative GPA falls below this minimum the student will be put on academic probation and will have one quarter of coursework to raise their cumulative GPA up to at least a 3.00 or face academic dismissal from the program. If the student's cumulative GPA goes below the minimum a second time, they will be academically dismissed from the program.

Academic Dismissal
Students may be dismissed for breaches of academic integrity, breaches of the code of student responsibility, or violations of satisfactory progress, including but not limited to, failing a retake of the oral qualifying exam, not maintaining at least a 3.00 cumulative GPA, or lack of progress towards degree completion. Students who have completed their coursework, but who are still working on their final project (MA) must be enrolled in candidacy continuation during the three quarters of the academic school year. Failure to enroll in candidacy continuation will result in dismissal from the program.

Readmission
If a student leaves the program for any reason they must reapply to the program unless prior agreement for readmission has been granted by the Director of Graduate Studies in Biology (hereafter, Program Director). A specific timeline for readmission must be specified and agreed to by the Program Director prior to the student leaving the program.

Transfer Credit
Two semester courses or three quarter courses from another institution or program may be accepted as transfer credit upon approval of the Program Director and Associate Dean for Graduate Studies. Credit will only be transferred for courses that have equivalents in the DePaul curriculum as determined by the Program Director. Transfer credit can only be awarded for graduate level coursework which has not counted toward the completion of a degree at DePaul or any other institution.

Undergraduate Courses
No undergraduate courses will be counted towards the graduate degree.

Graduation Requirements
In order to graduate, students must satisfy the degree requirements as specified in the course catalog for MA degrees, including but not limited to maintaining a minimum cumulative GPA of 3.00.

Graduation with Distinction
This program does not offer the "With Distinction" designation at the time of graduation.

Time Limitation
Students pursuing a master's degree must complete all requirements for the master's degree within a maximum of six years from their first term of enrollment in the program.

Biological Sciences (MS)

A program of study leading to the Master of Science degree in Biology designed for students who:

• Have a strong desire to increase their understanding of the life sciences.
• Plan additional education at the master's level for increased proficiency in teaching and/or research.
• Plan to continue study toward the PhD.

The master's program provides lecture, laboratory and seminar courses—along with learning experiences in research and undergraduate laboratory assisting, to aid students in achieving their stated goals. Students develop a particular concentration of studies in consultation with their faculty advisor.

Program Graduate Academic Student Handbook

Advancement to Candidacy

Based upon the results of a qualifying examination taken near the end of the third quarter of the student’s first full year and earning grades of B or better on graduate courses taken during the first year. Participation in undergraduate laboratory instruction is strongly encouraged.

Thesis Requirement

Results based upon an independent laboratory investigation.

Final Examination Requirement

An oral examination, including presentation of a seminar based on the MS thesis research, and a period of questioning on the thesis, the area of research which the thesis addresses, and basic biology as it relates to the thesis area.

Academic Probation

Students are expected to maintain a minimum cumulative grade point average (GPA) of 3.00. If a student’s cumulative GPA falls below this minimum the student will be put on academic probation and will have one quarter of coursework to raise their cumulative GPA up to at least a 3.00 or face dismissal from the program. If the student’s cumulative GPA falls below the minimum a second time, they will be dismissed from the program.
Academic Dismissal
Students may be dismissed for breaches of academic integrity, breaches of the code of student responsibility, or violations of satisfactory progress, including but not limited to, failing a retake of the oral qualifying exam, not maintaining at least a 3.00 cumulative GPA, or lack of progress towards degree completion. Students who have completed their coursework, but who are still working on their thesis (MS) must be enrolled in candidacy continuation during the three quarters of the academic school year. Failure to enroll in candidacy continuation will result in dismissal from the program.

Readmission
If a student leaves the program for any reason they must reapply to the program unless prior agreement for readmission has been granted by the Director of Graduate Studies in Biology (hereafter, Program Director). A specific timeline for readmission must be specified and agreed to by the Program Director prior to the student leaving the program.

Transfer Credit
Two semester courses or three quarter courses from another institution or program may be accepted as transfer credit upon approval of the Program Director and Associate Dean for Graduate Studies. Credit will only be transferred for courses that have equivalents in the DePaul curriculum as determined by the Program Director. Transfer credit can only be awarded for graduate level coursework which has not counted toward the completion of a degree at DePaul or any other institution.

Undergraduate Courses
No undergraduate courses will be counted towards the graduate degree.

Graduation Requirements
In order to graduate, students must satisfy the degree requirements as specified in the course catalog for MS degrees, including but not limited to maintaining a minimum cumulative GPA of 3.00.

Graduation with Distinction
This program does not offer the "With Distinction" designation at the time of graduation.

Time Limitation
Students pursuing a master’s degree must complete all requirements for the master’s degree within a maximum of six years from their first term of enrollment in the program.

Business (Minor)
Available to students outside of the Driehaus College of Business, the Business Minor provides students with sought-after skills for developing an entrepreneurial mindset, making economic and financial decisions, understanding consumers and branding, and using data to tell a story.

Course Requirements
A non-Driehaus student minoring in Business is required to complete the following courses totaling at least 20.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUS 211</td>
<td>DEVELOPING AN ENTREPRENEURIAL MINDSET</td>
<td>4</td>
</tr>
</tbody>
</table>

Graduation Requirements
All Business (BUS) courses and any other courses used toward the Business minor must be completed with a minimum grade of C- and with a combined GPA of 2.00 or higher.

Business Administration (BAPS)
The Bachelor of Arts in Professional Studies with a major in Business Administration from the School of Continuing and Professional Studies (SCPS) builds knowledge and skills for application in corporate and nonprofit settings, especially within administrative, managerial and supervisory positions. In this program, students examine their prior and current work experience in light of theory and principles. This program intentionally helps students to integrate liberal arts learning, with an emphasis on agile and critical thinking, with a professional specialization.

This major advances students’ foundational business knowledge in a range of areas critical to business administration, especially project management, human resources, risk management, leadership, workplace law, globalization, ethical conduct, data analytics, and professional communications. With a range of courses in the major offered as electives, students may choose courses and specialize in areas of particular interest to them.

Graduates of this program will be particularly well positioned to make optimal decisions in the workplace and become promotable leaders. This major is designed for working adult students and provides:

• Flexible scheduling including online options available
• Financial Aid, flexible payment options, and special adult student tuition pricing
• Acceleration and affordability through transfer credit and prior learning assessment (PLA) credit
• Opportunities to combine bachelor’s and master’s programs and apply graduate courses to both programs
• Individualized program planning, course selection and advising assistance provided
• Enhanced career opportunities through professional portfolio development, and career placement services instruction from industry practitioners, and wide-ranging Career Services support
• Degree granted by DePaul University, with its excellent academic reputation and the opportunity to join its prestigious and extensive alumni network

Learning Outcomes
Students will be able to:

1. Develop an entrepreneurial mindset, making economic and financial decisions, understanding consumers and branding, and using data to tell a story.
2. Gain knowledge and skills in a range of areas critical to business administration, including project management, human resources, risk management, leadership, workplace law, globalization, ethical conduct, data analytics, and professional communications.
3. Apply liberal arts learning in a professional context, integrating agile and critical thinking with professional specialization.
4. Make optimal decisions in the workplace, becoming promotable leaders.
5. Pursue opportunities to combine bachelor’s and master’s programs and apply graduate courses to both programs.
6. Receive individualized program planning, course selection, and advising assistance.
7. Enhance career opportunities through professional portfolio development and career placement services.
8. Receive a degree from DePaul University, with its excellent academic reputation and access to a prestigious and extensive alumni network.
• Analyze and apply knowledge and theories of management.
• Analyze issues in organizational contexts.
• Apply skills for effective decision-making in organizations.
• Investigate problems using qualitative and quantitative methods.
• Apply ethical principles in context.
• Apply various methods of communication in multiple settings.
• Analyze and apply different liberal arts perspectives.

### Open Electives (44 credits)
Open Electives can be fulfilled through courses taken in the School of Continuing and Professional Studies and other DePaul colleges, transfer courses, assessment of prior learning (PLA), and independent studies.

### Business Administration (BSB)

The Bachelor of Science in Business with a major in Business Administration is designed for those students who desire a broad-based business curriculum with a strong liberal arts foundation. This flexible program is geared to the student who has no strong functional preference (e.g., Accounting, Finance, Marketing) but rather desires an overall conceptual foundation. Students majoring in Business Administration might be preparing for law school, entering into a family business, or some other specialized purpose. The program has sufficient flexibility to meet the needs of each of these career orientations.

### Learning Outcomes
Students will be able to:

- Use analytical and reflective skills in decision making.
- Communicate effectively both orally and in writing.
- Recognize legal and ethical issues confronting them.
- Contribute to the performance of a group within a business setting.
- Know the differences among global economies, institutions, business practices and cultures.
- Acquire knowledge of the functional areas of business and the interrelationships among the functional areas within a business.

### College Core Requirements

#### Business Core Requirements

All undergraduate students in the Driehaus College of Business complete foundational courses in the areas of analytics, accountancy, mathematics, economics, business law, finance, management, management information systems/computer science, and marketing.

#### Course Requirements

For a student to complete the Bachelor of Science in Business, the following Business Core courses totaling at least 70.0 hours are required:

<table>
<thead>
<tr>
<th>Course Title</th>

FIN 355  GLOBAL IPOs & VENTURE CAPITAL
ICS 350  INTERNATIONAL BUSINESS SEMINAR
MGT 354  GLOBAL HUMAN RESOURCE MANAGEMENT
MGT 357  INTERNATIONAL BUSINESS
MKT 340  MARKETING ACROSS CULTURES: A CULTURAL PERSPECTIVE ON MULTICULTURAL MARKETS
MKT 358  MARKETING IN A GLOBAL ENVIRONMENT
MKT 360  INTERNATIONAL MARKETING
SOC 217  WORK IN A GLOBALIZED WORLD

A course taken as part of a term-long study abroad program

Professional Writing
Select one of the following: 2-4

WRD 202  PROFESSIONAL WRITING FOR BUSINESS (2.0 quarter hours)
WRD 204  TECHNICAL WRITING
WRD 206  PROFESSIONAL WRITING

1 Strobel students take specially designated sections of all required
   ACC classes, including ACC 101 and ACC 102 (excluding ACC 250).
2 Students majoring in accounting (primary or secondary/double
   major) are allowed to substitute ACC 370 in place of BLW 201.
   Hospitality Leadership majors must take HSP 207 for the Business
   Law requirement; use of HSP 207 is limited to Hospitality Leadership
   majors. A student majoring in Hospitality Leadership and a second
   business major must complete both HSP 207 and BLW 201.
3 Finance majors, Finance secondary/double majors, Finance minors,
   Finance Honors majors, Finance Honors secondary/double majors,
   and Actuarial Science majors must take FIN 320.
4 MGT 301-H is required if pursuing the Management Honors Program.
5 MIS majors and minors must take MIS 140.
   Actuarial Science and Economic Data Analytics majors must take
   CSC 241.
6 MKT majors and Sales minors must take MKT 376.
7 Entrepreneurship majors and minors must take ICS 394.
   Hospitality Leadership majors must take ICS 396 for the Business
   Capstone; use of ICS 396 is limited to Hospitality Leadership
   majors. A student majoring in Hospitality Leadership and a second
   business major must complete ICS 396 and one of ICS 394 or
   ICS 395.
8 A course taken for Global Business Perspective that is in a student’s
   major or minor field must be completed with a minimum grade of C-

Business Ethics
All undergraduate students in the Driehaus College of Business complete
a course in Business Ethics. It is recommended students take MGT 248
or PHL 248 in Philosophical Inquiry or MGT 228 or REL 228 in Religious

Dimensions in the Liberal Studies Program (or University Honors
Program) Requirements.

Second Majors and Minors
The addition of a second major or minor may affect the Business Core
classes required for a student. Meet with an academic advisor to confirm
requirements.

Math Requirements for all business majors (except
Actuarial Science majors)
  • MAT 137 may be replaced by MAT 348 or MAT 351.

Global Business Perspective
If a course is shared between Global Business Perspective and the
Business Administration major, additional hours of Open Elective credit
are required.

Grade Minimum Requirements for Business
Administration Major
A minimum grade of C- is required for the following: ACC 101, ACC 102,
BUS 102, ECO 105, ECO 106, MAT 137, MGT 300, MGT 301, the course
used for Professional Writing, and any MGT course used for Global
Business Perspective.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges &
Schools section of the University Catalog. Select the appropriate college
or school, followed by Undergraduate Academics and scroll down.

Arts and Literature (AL) (p. 1300)
- 3 Courses Required

Historical Inquiry (HI) (p. 1304)
- 2 Courses Required

Math and Computing (MC) (p. 1306)
- Not Required

Philosophical Inquiry (PI) (p. 1307)
- 2 Courses Required

Religious Dimensions (RD) (p. 1308)
- 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
- 1 Lab Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
- 1 Course Required

1 PHL 248 / MGT 248 is required in PI or REL 228 / MGT 228 is required in RD.

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements
Course Requirements
A student majoring in Business Administration is required to complete the following courses totaling at least 30.0 hours:

<table>
<thead>
<tr>
<th>Course</th>

MKT 305 INTRODUCTION TO MARKETING RESEARCH
Select five business electives to be chosen from any 300-level courses offered through any Driehaus College of Business program or department.

The five electives must be from at least three different departments.

Exceptions listed below.

Major Electives Exceptions
- Students are required to follow all course prerequisites.
- Students may not use the following courses in the Business Administration major: ACC 370, ECO 315, ECO 393, ECO 395, FIN 300, FIN 310, FIN 320, HSP 301, HSP 302, ICS 392, MGT 300, MGT 301, MKT 301, and MKT 310.
- The following courses are not recommended for Business Administration majors: ECO 304, ECO 305, ECO 306, ECO 375 and ECO 380
- ICS 350 can be used only once in the Business Administration major electives.
- MKT 376 may not be used when also used for the Communication requirement.
- ICS 394, ICS 395, or ICS 396 may not be used when also used for the Business Capstone requirement.
- BLW 202 and/or BLW 203 may be used in the Business Administration Electives.

Career Management Course
Students are required to complete the Career Course (250) associated with the major. Students who double major may choose the Career Course (250) associated with either major provided that hours for graduation are satisfied.

Open Electives
Open elective credit (20.0 hours) is needed to meet the minimum graduation requirement of 192 hours.

Global Business Perspective
If any course is shared between Global Business Perspective and the Business Administration major, additional hours of Open Elective credit are required. Any course used toward the Business Administration major and Global Business Perspective must be passed with C- or higher.

Graduation Requirements
Any Management (MGT) courses in the Business Core and any courses used toward the Business Administration major must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

Business Administration (Minor)
Available to students majoring outside of the Driehaus College of Business, those students who minor in Business Administration will acquire a general foundation in business, including the fields of accounting, business law, economics, finance, management, and marketing.
Prerequisite Requirements
Students must complete MAT 130 (or placement test) prior to taking ACC 101.

Course Requirements
A non-Driehaus student minoring in Business Administration is required to complete the following courses totaling at least 32.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 101</td>
<td>INTRODUCTION TO ACCOUNTING I</td>
<td>4</td>

</tr>
</tbody>
</table>

Select a course in statistics 4

The requirement for a course in statistics may be satisfied through the completion of the LSP 120 and LSP 121 sequence.

Graduation Requirements
All Management (MGT) and any other courses used toward the Business Administration minor must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

Business Analytics (MS)
The Master of Science in Business Analytics provides students with the tools and techniques to turn complex data into decisions that drive business performance. Students gain data analysis skills that can be applied to a wide range of functions and fields, including marketing, finance, operations, human resources, healthcare and hospitality. Graduates emerge well-equipped to assume business analyst roles or deepen analytical skills within their current roles.

Program Features
The curriculum provides a combination of skills in business and data science that are highly prized by organizations. Students study statistics, decision modeling and data visualization, in addition to core business analytic functions in the areas of operations, accounting, finance, management and marketing.

The MS in Business Analytics is a STEM-designated program, which can qualify international students to extend their post-graduation stay in the United States.

Learning Outcomes
Students will be able to:

• Acquire data necessary to make data-driven business decisions using appropriate emerging technologies.

Degree Requirements
The curriculum for the Master of Science in Business Analytics requires a minimum of 12 courses (48 credit hours), consisting of:

• Nine core courses (36 credit hours total)
• Three career path electives (12 credit hours total)

<table>

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These three graduate level courses will count toward both the undergraduate and graduate degree programs.

### DePaul Undergraduate Degree + Business Analytics (MS)

Through the master’s in Business Analytics program, you’ll gain the necessary techniques to turn complex data into solutions that drive business decisions for a wide range of industries.

The program’s primary focus is preparing students for roles that require them to be *expert users* of data analytics with the ultimate purpose of informing business decisions. Students will develop key competencies that enable them to perform core tasks applying data analytic tools and techniques to any business function. These include analyzing market strategies, synthesizing and managing timely flow of current business intelligence to support recommendations for action, identifying, analyzing and communicating industry, technology or geographic trends with business strategy implications, and generating reports summarizing business, financial or economic data for review key stakeholders.

DePaul degree-seeking undergraduate students interested in earning a Master of Science in Business Analytics may apply to the bachelor’s degree/Business Analytics (MS) combined program. Students may be able to obtain both degrees in an expedited period, typically in five years.

### Admission

Students must formally apply and be admitted to the Department of Management before beginning their graduate coursework. Undergraduate students who meet the following criteria may apply to this program:

- Junior standing or higher (at least 88.0 credits)
- A minimum cumulative DePaul grade point average of 3.20

Students participating in this program will typically take three of the following graduate level courses during their senior year:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GSB 519</td>
<td>BUSINESS ANALYTICS TOOLS (FORMERLY GSB420)</td>

<tr>
<td>MGT 585</td>
<td>FUNDAMENTALS OF BUSINESS ANALYTICS</td>
<td>5</td>
</tr>
</tbody>
</table>

Select one of the following:

- MGT 506 DECISION MAKING FOR MANAGERS
- MGT 598 PROJECT MANAGEMENT
Autumn 2021-2022 203

MGT 555  HUMAN CAPITAL STRATEGY AND SCIENCE  3
MGT 502  OPERATIONS MANAGEMENT  4
ACC 500  FINANCIAL ACCOUNTING  4
MKT 555  MARKETING MANAGEMENT  6

1  Replaces MGT 315 Supply Chain Analytics
2  Replaces MGT 303 Managing Projects and Teams
3  Replaces MGT 307 Human Resource Management
4  Replaces MGT 301 Principles of Operations Management
5  Replaces MGT 314 Business Analytics Foundation Tools
6  These graduate courses do not currently replace any single undergraduate level course

These three courses may double-count up to 12 credits towards both degree programs. The undergraduate degree will be awarded at the completion of all undergraduate work while the MSBA will be awarded upon completion of the remaining graduate level work.

Business Information Technology (MS)

Program Requirements  Quarter Hours
Degree Requirements          52
Total hours required          52

The MS in Business Information Technology is offered by the College of Computing and Digital Media (CDM), with some course work taken from the Kellstadt Graduate School of Business that addresses today's need for individuals who understand the core principles of both business and technology in corporations, health care institutions, and government agencies.

Learning Outcomes
Students will be able to:

- Analyze and design a complex information system using data and process modeling.
- Create a project plan for the development of an information system.
- Analyze the effectiveness of network computing and cloud computing policies in a multi-location organization.
- Analyze the effectiveness of a security policy, citing strengths and making recommendations for improvement.
- Evaluate project and IT management situations to determine which of the various categories of leadership approaches is most appropriate, and construct a plan to apply those leadership techniques.
- Interpret and use financial statements to analyze the position, performance and changes in the financial position of an organization.
- Apply marketing metrics to evaluate the effectiveness of marketing activities.

Degree Requirements

Course Requirements
No Introductory Course may be substituted for any other course at any level.

Course  Title  Quarter Hours

ACC 502  ADVANCED MANAGEMENT ACCOUNTING  4
MKT 555  DECISIONS IN MARKETING MANAGEMENT  4
MGT 500  MANAGING FOR EFFECTIVE AND ETHICAL ORGANIZATIONAL BEHAVIOR  4
MGT 504  FUNDAMENTAL OPERATIONS MANAGEMENT  2
MGT 554  MANAGING HUMAN CAPITAL  2
GBS 525  BUSINESS INNOVATION & DESIGN (FORMERLY MGT 573)  4

Open Elective Courses
Select eight (8) credit hours of Open Electives 1
Capstone 2  8  4

1  Open Elective Courses are in the range of 421-699 and must be chosen among CSEC, CSC, ECT, GAM, GPH, HCI, HIT, IPD, IS, IT, NET, SE, and Kellstadt courses.
2  See Capstone Options below.

Capstone Options
Students have the option of completing either (a) IS 577 (Information Systems capstone course) or IS 580 (Technology Entrepreneurship), (b) a Graduate Internship (4 credits), (c) two quarters of CSC 500 (a Research Colloquium course), (d) IS 696 (a Master's Project course), or (e) a Master's Thesis.

- Capstone Courses
  - IS 577
  - IS 580

- Graduate Internship
  - An internship offers students the opportunity integrate their academic experience with on-the-job training in information systems. Students must enroll in CSC 697 for four (4) credit hours to satisfy the practicum requirement. These are the steps:
    a. Secure an internship with a focus in information systems.
    b. International Students must obtain the appropriate practical training form and meet with an advisor in the CDM Academic Center for approval (http://oiss.depaul.edu/Requests/Forms/index.asp). (http://oiss.depaul.edu/Requests/Forms/)
    c. Login to MyCDM and click the "MyInternships" link on the left to start the course enrollment process.

- Research Options
  - CSC 500 This is a course for two (2) credit hours therefore students must enroll in the course in each of two (2) separate quarters.
  - Master's Research
• Up to eight (8) credit hours with Major Elective substitutions.
• IS 696
• Master’s Thesis
  • A student who has made an original contribution to the area may choose to complete a Master’s Thesis. The process is:
    i. Complete IS 590 as a Major Elective substitution.
    ii. The student and the student’s research advisor form a Master’s Thesis Committee of three (3) faculty.
    iii. The student enrolls in IS 698 for two (2) consecutive quarters. In the event, the students has not completed the thesis within these two (2) quarters, the student will be allowed to register for the zero (0) credit hour course CSC 698 and the transcript will show the thesis title as the course topic.
    iv. The student will need to submit to the committee a thesis detailing the results of the research project. After a public defense, the committee will decide whether to accept the thesis.

Degree Requirements
Students in this degree program must meet the following requirements:

• Complete a minimum of 52 graduate credit hours in the designated degree program.
• Complete all graduate courses and requirements listed in the designated degree program.
• Earn a grade of C- or better in all courses of the designated degree program.
• Maintain a cumulative GPA of 2.5 or higher.
• Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
• Students pursuing a second master’s degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.

For DePau's policy on repeat graduate courses and a complete list of academic policies, see the DePaul Graduate Handbook.

Business Information Technology (MS), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

DePaul Undergraduate Degree + Business Information Technology (MS)
The Business Information Technology (MS) combined degree program is open to all undergraduate majors across the university.

Students who are interested in this program and meet the following criteria

• Sophomore status (at least 44 quarter hours earned)
• Minimum of 12 quarter hours earned at DePaul
• GPA of 3.3 or higher in courses taken at DePaul
• Full admission to the designated master’s program requires meeting admission requirements (https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx) for that program
• Faculty endorsement from a CDM full-time faculty member

Student should discuss their interest in this combined degree program with a CDM Information Systems faculty advisor prior to submitting the application for admission.

If accepted, a student can take up to three graduate courses (12 credits). These three courses count towards both the bachelor’s program and the Master of Science degree. Students will pay the current undergraduate tuition rate for these three courses.

Maintaining Good Standing

• Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter
• The student and Faculty Advisor will be notified when the student’s cumulative GPA falls below 3.3 or when the students receives less than a C- in graduate level course
• If a student’s cumulative GPA falls below 3.3, the student must earn a term GPA of 3.3 or above in the following quarter to stay in good standing. If the student does not achieve a 3.3 term GPA, then the student will be dismissed from the combined program and resume the traditional BA/BS.
• Graduate courses passed before dismissal will not be counted and may not be retaken. If the student pursues graduate study, other graduate courses must be substituted. To apply to a CDM graduate degree program, following dismissal from the combined degree, students must follow regular CDM Admission procedures, and will be required take 13 new graduate courses to earn a master’s degree.

Designing a Course of Study
It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the Combined Degree Program.

This course of study may include which undergraduate classes to avoid taking in order to take the graduate version. Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

Registering for Master's Degree Courses
The student’s advisor must complete the BS/MS Request form, under the Faculty tab on the CDM Intranet, to request the student’s enrollment in the three graduate courses. The form will require the following data: student’s full name, graduate course and section, and the undergraduate
course to be substituted for. The CDM dean's office will process the enrollment.

**Bachelor's Degree to Master's Degree Transition**

In order to be fully admitted to the designated master's program, the student must meet all admission requirements for that program. Learn more about master's degree admission requirements (http://www.cdm.depaul.edu/Prospective%20Students/Pages/MastersDegreeStudents.aspx). Students will follow the master's degree program requirements for the term they are admitted to the master's degree program.

**Double Demon Scholarship**

The Double Demon scholarship, offered exclusively to DePaul alumni, covers 25 percent of the tuition for a master's degree or select certificate programs. Combined degree program students are eligible.

Alumni from any of DePaul's colleges who are admitted into a graduate degree program from one of these programs automatically qualify for the Double Demon Scholarship. This scholarship is available for new part-time or full-time students who began a master's degree in CDM in winter 2012-2013 or later and the other colleges beginning in winter 2013-2014. It cannot be applied retroactively.

There is no limit to the amount of courses that can be taken by eligible students. However, students may not take more than four courses in any quarter without permission from the college. The scholarship cannot be applied to cover fees or other non-tuition costs.

**Learning Outcomes**

Students will be able to:

- Analyze and design a complex information system using data and process modeling.
- Create a project plan for the development of an information system.
- Analyze the effectiveness of network computing and cloud computing policies in a multi-location organization.
- Analyze the effectiveness of a security policy, citing strengths and making recommendations for improvement.
- Evaluate project and IT management situations to determine which of the various categories of leadership approaches is most appropriate, and construct a plan to apply those leadership techniques.
- Interpret and use financial statements to analyze the position, performance and changes in the financial position of an organization.
- Apply marketing metrics to evaluate the effectiveness of marketing activities.

</tr>
</tbody>
</table>

Learning Outcomes
Students will be able to:
• Identify and explain important terms, events, and concepts in Catholicism.
• Analyze Catholicism from a variety of disciplinary perspectives.
• Integrate classroom learning with Vincentian ideals.

**College Core Requirements**

**Study in the Major Field**
The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

**Declaration of Major, Minor and Concentration**
All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

**The Modern Language Requirement (MLR)**
All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

• placing into 104 or above on the DePaul language placement exam
• completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
• completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
• completing the final course of a four-year sequence of the same modern language in high school*
• completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
• completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the “Modern Language Option” (see below).

**The Modern Language Option (MLO)**
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

**External Credit and Residency**
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

**Liberal Studies Requirements**
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Race, Power, and Resistance
LSP 200  SEMINAR ON MULTICULTURALISM IN THE UNITED STATES 4

Junior Year
Experiential Learning
Required 4

Senior Year
Capstone
Required 4

1 Students must earn a C- or better in this course.
2 Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete LSP 120 and both a Computational Reasoning course and a Statistical Reasoning course in the Math and Computing Domain take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and cannot be applied to the SI Domain.

Learning Domains
Arts and Literature (AL) (p. 1300)
• 3 Courses Required

Historical Inquiry (HI) (p. 1304)
• 2 Courses Required

Math and Computing (MC) (p. 1306)
• 2 Courses Required
  [1 CR Course and 1 SR Course]

Philosophical Inquiry (PI) (p. 1307)
• 2 Courses Required

Religious Dimensions (RD) (p. 1308)
• 1 Course Required

Scientific Inquiry (SI) (p. 1310)
• 2 Courses Required
  [1 Lab Course and 1 SWK Course]

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
• 3 Courses Required

Notes
See Program Director for one additional course reduction.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Select two CTH electives, one of which must be at the 300-level  

8

Students majoring in Catholic Studies (BA) are restricted from earning this minor.

Chemistry (BA)

As a Chemistry major, you will learn the fundamentals of chemical theory and practice through scientific investigation, laboratory experience and research opportunities.

All Chemistry students will take core courses in chemistry, physics and mathematics.

Chemistry faculty members conduct research projects that are funded through government, foundation and industry grants, providing you with multiple opportunities to gain hands-on research experience. Being in Chicago also allows you to attend many scientific conferences hosted in the city throughout the year.

Program Requirements  

Quarter Hours  
Liberal Studies Requirements  
76  
Major Requirements  
68  
Open Electives  
48  
Total hours required  
192

Learning Outcomes

Students will be able to:

• Perform experiments.
• Apply proper safety protocols while in laboratory environments.
• Responsibly collect, analyze, and represent scientific data.
• Proficiently explain and apply, in writing, core chemical principles to the results of experiments and to representative problems.

College Core Requirements

Modern Language Requirements

Students who intend to graduate with the Bachelor of Arts (BA) degree will be required to demonstrate competence in a modern language equivalent to the proficiency attained from one year of college-level language study. Such competence may be demonstrated in one of several ways:

• completing the last course in the fourth-year high school sequence of any language
• completing the last course in the first-year college sequence of any language
• completing a college course beyond the first-year level in any language
• achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
• achieving a satisfactory rating in a proficiency examination accepted by DePaul

• achieving a score of 3 or higher on the Advance Placement (AP) test for any language
• achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
• achieving a satisfactory score on the CLEP examination

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact Student Records.

Students who complete an Inter-College Transfer (ICT) to the College of Science and Health will abide by the College of Science and Health Modern Language Requirement in place on the effective date of the ICT.

BA students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While Bachelor of Science (BS) students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Major Declaration Requirements

All students in the College are required to declare a major field prior to beginning their junior year. After researching College programs, the student should declare a major field by visiting Campus Connection and using the Declarations and Inter-College Transfer tool. The student will then be assigned a faculty advisor or staff advisor in the department or program and should make an appointment to see that advisor at his or her earliest convenience.

To change major fields, or to declare a minor or concentration, the student must use the Declarations and Inter-College Transfer tool described above. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the College or an academic advisor in the Office for Academic Advising Support.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Sophomore Year

Multiculturalism in the US
LSP 200 SEMINAR ON RACE, POWER, AND RESISTANCE (FORMERLY MULTICULTURALISM IN THE U.S.) 4

Junior Year

Experiential Learning

Required 4

Senior Year

Capstone

CHE 330 SENIOR CAPSTONE IN THE PHYSICAL SCIENCES 1,2 4

1 Students must earn a C- or better in this course.
2 Students with a primary major in Chemistry are required to complete the Capstone offered by the Chemistry department. Students double majoring or pursuing dual degrees with the primary major or primary degree in Chemistry are required to complete the Capstone offered by the Chemistry department. Chemistry students in the University Honors Program shall take the University Honors Capstone. They are not expected to take both the Honors Capstone and the primary major or primary degree Capstone.

Learning Domains

Arts and Literature (AL) (p. 1300)
• 3 Courses Required

Historical Inquiry (HI) (p. 1304)
• 2 Courses Required

Math and Computing (MC) (p. 1306)
• Not Required

Philosophical Inquiry (PI) (p. 1307)
• 2 Courses Required

Religious Dimensions (RD) (p. 1308)
• 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
• Not Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
• 3 Courses Required

Notes

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

In addition, the Department of Chemistry recommends that students who are seeking accreditation by the American Chemical Society fulfill the Modern Language Option by completing a three-course language sequence. Please see an advisor for further information.

Major Requirements

Course Requirements

Common Core

All students pursuing a Bachelor of Arts or Bachelor of Science in chemistry must complete a common core of courses in the department. These courses are consistent with the requirements of all degree programs accredited by the American Chemical Society. The courses in the common core consist of:

Introductory Courses
Course Title Quarter Hours
Select one of the following: 4-6
CHE 130 GENERAL CHEMISTRY I
& CHE 131 and GENERAL CHEMISTRY I LABORATORY
CHE 120 GENERAL CHEMISTRY IP
& CHE 131 and GENERAL CHEMISTRY I LABORATORY
Select one of the following: 4-6
CHE 132 GENERAL CHEMISTRY II
& CHE 133 and GENERAL CHEMISTRY LABORATORY II
CHE 122 GENERAL CHEMISTRY IIIP
& CHE 133 and GENERAL CHEMISTRY LABORATORY II
CHE 134 & CHE 135 GENERAL CHEMISTRY III
and GENERAL CHEMISTRY LABORATORY III

The department offers General Chemistry each summer. In this case, the combination of CHE 136/CHE 137 and CHE 138/CHE 139 may substitute for the three-quarter sequences above.

Foundation Courses
Course Title Quarter Hours
CHE 204 & CHE 205 ANALYTICAL CHEMISTRY
and ANALYTICAL CHEMISTRY LABORATORY 4
CHE 230 & CHE 231 ORGANIC CHEMISTRY I
and ORGANIC CHEMISTRY LABORATORY I 4
CHE 232 & CHE 233 ORGANIC CHEMISTRY II
and ORGANIC CHEMISTRY LABORATORY II 4
CHE 234 & CHE 235 ORGANIC CHEMISTRY III
and ORGANIC CHEMISTRY LABORATORY III 4
CHE 261 INSTRUMENTAL ANALYSIS (LECTURE AND LAB COMPONENTS) 4

Allied Courses

Calculus

One year of calculus is required to earn a baccalaureate degree in chemistry. This may be accomplished by completing any of the following three-course sequences offered by the Department of Mathematical Sciences:

Course Title Quarter Hours
Sequence One
MAT 147 CALCULUS WITH INTEGRATED PRECALCULUS I 6
The following enrollment-related policies are fully enforced by the Departmental Program Requirements Undergraduate Studies or the Chair.

1. All students enrolling in the first course of a General Chemistry sequence must independently meet a minimum mathematics requirement and successfully complete the General Chemistry placement examination. See the course descriptions for General Chemistry for up-to-date information.
2. All prerequisite chemistry courses must be completed with a C- or better. Students not meeting this requirement may be removed from course rosters before the start of an academic session. This requirement may be waived only with departmental consent.
3. The department offers lower-level sequences several times each academic year. Due to potentially small class sizes, upper-level courses are typically scheduled every other year. Students should consult with their faculty academic advisor to develop a program they can complete in a timely fashion.

### Sequenting and Prerequisites

Students should begin their General Chemistry, Physics, and Calculus sequences in their freshman year, provided they have an adequate mathematics background. The Organic Chemistry sequence and Analytical Chemistry should be taken in the sophomore year. Students not yet prepared for calculus should take the prerequisite courses in the first year and take Calculus and General Physics one year later than suggested above. Advanced courses in Chemistry may be taken as soon as students have met the appropriate prerequisites.

Since the Undergraduate Common Core in Chemistry, Mathematics, and Physics is particularly demanding in the first two years, students take the majority of their Liberal Studies courses in their junior and senior years. This is necessary so that students have the necessary prerequisites for advanced courses.

Concentrations, tracks, and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

- Accelerated Program, Chemistry (BA) (p. 212)
- Standard Concentration, Chemistry (BA) (p. 214)

### Accelerated Program, Chemistry (BA)

The Accelerated Program is only for qualified Pathways Honors students with a major in Chemistry (BA) who have been accepted into the 3+4 College of Science and Health pre-professional program in pharmacy in conjunction with Rosalind Franklin University of Medicine and Science (RFUMS). In order to pursue the pre-pharmacy track, a student must secure approval from the College of Science and Health's pre-health advisor and Pre-health Advising Committee's (PAC) Accelerated Program advisor.

Students formally accepted into a 3+ Accelerated Program will complete their fourth year of coursework - taken at RFUMS and not shown here - and apply the credit toward their Bachelor of Arts degree in Chemistry at DePaul. Students must apply for degree conferral via Campus Connection by the deadline outlined in the Student Handbook in order to be considered a candidate for earning their Bachelor of Arts degree at the conclusion of their fourth year of study. As part of the agreement with RFUMS, some Liberal Studies Program courses, Chemistry major requirements, and open electives will be fulfilled by RFUMS courses. To avoid possibly earning duplicate credit for some courses, please be sure you meet regularly with the College of Science and Health pre-health advisor and your Chemistry faculty advisor.

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Chemistry (BA) + Secondary Education Chemistry (MEd)

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The TEACH Program combines a College of Science and Health (CSH) undergraduate Chemistry major or some other disciplinary major with a graduate level College of Education (COE) Master of Education (MEd) Program. Students graduate with a BS in their CSH disciplinary major and a MEd in Education with a State of Illinois Secondary Chemistry Certification.

Students may apply to the TEACH Program during the spring of their junior year. They must enroll in the Junior Year Experiential Learning course, TCH 320, and meet other application criteria; these include completion of at least 16 quarter credit hours at DePaul and a 3.0 GPA. During their senior year, students are required to complete a TEACH Program capstone course, TCH 390, and three 400-level courses that count toward both their undergraduate and graduate degrees:

## Junior Year Coursework: 4 undergraduate quarter hours required

  - Intermediate Organic Chemistry
  - Biochemistry I
  - Biochemistry II
  - Biochemistry III
  - Nuclear Chemistry
  - Biophysical Chemistry
  - Medicinal Chemistry
  - Drugs and Toxicology
  - Nutrition
  - Applied Spectroscopy

This combined degree program of the College of Science and Health and the College of Education was collaboratively developed, and is governed and taught by faculty from these units.

The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring quarter. Upon graduation and the fulfilling of State of Illinois licensure requirements (which may require some additional course work in the student’s major and related
fields), students are eligible to be licensed to teach Chemistry at the 5th-12th grade levels.

A full description of the TEACH Program can be found here. (p. 1122) Students interested in the TEACH Program should consult with the designated TEACH Program advisor in their home department.

**Open Electives**

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

**Chemistry (BS)**

As a Chemistry major, you will learn the fundamentals of chemical theory and practice through scientific investigation, laboratory experience and research opportunities.

All Chemistry students will take core courses in chemistry, physics and mathematics.

Chemistry faculty members conduct research projects that are funded through government, foundation and industry grants as well as DePaul internal grants, providing you with multiple opportunities to gain hands-on research experience. Being in Chicago also allows you to attend many scientific conferences hosted in the city throughout the year.

**Program Requirements**

- Liberal Studies Requirements: 76 Quarter Hours
- Major Requirements: 68
- Major Concentration Requirements: 24
- Open Electives: 24
- Total hours required: 192

**Learning Outcomes**

Students will be able to:

- Perform experiments and use chemical instrumentation.
- Apply proper safety protocols while in laboratory environments.
- Responsibly collect, analyze, and represent scientific data.
- Proficiently explain, both orally and in writing, and apply core chemical principles to the results of experiments and to representative problems.

**College Core Requirements**

**Modern Language Requirements**

Students who intend to graduate with the Bachelor of Arts (BA) degree will be required to demonstrate competence in a modern language equivalent to the proficiency attained from one year of college-level language study. Such competence may be demonstrated in one of several ways:

- completing the last course in the fourth-year high school sequence of any language
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact Student Records.

Students who complete an Inter-College Transfer (ICT) to the College of Science and Health will abide by the College of Science and Health Modern Language Requirement in place on the effective date of the ICT.

BA students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While Bachelor of Science (BS) students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

**Major Declaration Requirements**

All students in the College are required to declare a major field prior to beginning their junior year. After researching College programs, the student should declare a major field by visiting Campus Connection and using the Declarations and Inter-College Transfer tool. The student will then be assigned a faculty advisor or staff advisor in the department or program and should make an appointment to see that advisor at his or her earliest convenience.

To change major fields, or to declare a minor or concentration, the student must use the Declarations and Inter-College Transfer tool described above. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the College or an academic advisor in the Office for Academic Advising Support.
**Liberal Studies Requirements**

</tr>
</thead>
<tbody>
<tr>
<td>MAT 155</td>
<td>SUMMER CALCULUS I</td>
<td>6</td>
</tr>
<tr>
<td>MAT 156</td>
<td>SUMMER CALCULUS II</td>
<td>6</td>
</tr>
</tbody>
</table>

Students interested in earning credit for multi-variable calculus should not take the MAT 170/MAT 171/MAT 172 sequence. Business calculus cannot be substituted for any of the sequences above.

Physics
One year of calculus-based physics is required to earn a baccalaureate in chemistry. This may be accomplished by completing the following three-course sequence offered by the Department of Physics:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHY 170</td>
<td>UNIVERSITY PHYSICS I</td>
<td>4</td>
</tr>
<tr>
<td>PHY 171</td>
<td>UNIVERSITY PHYSICS II</td>
<td>4</td>
</tr>
<tr>
<td>PHY 172</td>
<td>UNIVERSITY PHYSICS III</td>
<td>4</td>
</tr>
</tbody>
</table>

Non-calculus-based physics cannot be used to meet the requirements of the common core unless previously approved by the departmental Exceptions Committee or academic advisor.

Departmental Program Requirements
The following enrollment-related policies are fully enforced by the Department of Chemistry

1. All students enrolling in the first course of a General Chemistry sequence must independently meet a minimum mathematics requirement and successfully complete the General Chemistry Placement examination. See the course descriptions for General Chemistry for up-to-date information.
2. All prerequisite chemistry courses must be completed with a C- or better. Students not meeting this requirement may be removed from course rosters before the start of an academic session. This requirement may be waived only with departmental consent.
3. The department offers lower-level sequences several times each academic year. Due to potentially small class sizes, upper-level courses are typically scheduled every other year. Students should consult with their faculty academic advisor to develop a program they can complete in a timely fashion.

Sequencing and Prerequisites
Students should begin their General Chemistry, Physics, and Calculus sequences in their freshman year, provided they have an adequate mathematics background. The Organic Chemistry sequence and Analytical Chemistry should be taken in the sophomore year. Students not yet prepared for calculus should take the prerequisite courses in the first year and take Calculus and General Physics one year later than suggested above. Advanced courses in Chemistry may be taken as soon as students have met the appropriate prerequisites.

Since the Undergraduate Common Core in Chemistry, Mathematics, and Physics is particularly demanding in the first two years, students take the majority of their Liberal Studies courses in their junior and senior years. This is necessary so that students have the necessary prerequisites for advanced courses.
Chemistry (BS) + Chemistry (MS)

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

Students planning to integrate a BS and MS degree program at DePaul University should inquire of the Director of Graduate Studies as undergraduate juniors. Students who have applied and are accepted into this program take a maximum of twelve graduate credit hours as three courses in their senior year; these graduate courses apply toward both undergraduate and graduate Chemistry requirements.

Chemistry (BS) + Secondary Education Chemistry (MEd)

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The TEACH Program combines a College of Science and Health (CSH) undergraduate Chemistry major or some other disciplinary major with a graduate level College of Education (COE) Master of Education (MEd) Program. Students graduate with a BS in their CSH disciplinary major and a MEd in Education with a State of Illinois Secondary Chemistry Certification.

Students may apply to the TEACH Program during the spring of their junior year. They must enroll in the Junior Year Experiential Learning course, TCH 320, and meet other application criteria; these include completion of at least 16 quarter credit hours at DePaul and a 3.0 GPA. During their senior year, students are required to complete a TEACH Program capstone course, TCH 390, and three 400-level courses that count toward both their undergraduate and graduate degrees:

### Junior Year Coursework : 4 undergraduate quarter hours required

All coursework in the content area must earn a grade of C or better.

- General Chemistry I
- General Chemistry II
- General Chemistry III
- Organic Chemistry I
- Organic Chemistry II
- Analytical Chemistry
- Physical Chemistry I
- Physical Chemistry II
- Applied Probability and Statistics (2qh)
- Chemistry Seminar (2qh)
- Calculus I
- Calculus II
- Calculus III
- General Physics I
- General Physics II
- General Physics III

- Choose three of the following Chemistry courses: 12 quarter hours
  - Organic Chemistry III
  - Air Chemistry
  - Solid Waste Chemistry
  - Physical Chemistry III
  - Intermediate Inorganic Chemistry
  - Intermediate Organic Chemistry
  - Biochemistry I
  - Biochemistry II
  - Biochemistry III
  - Nuclear Chemistry
  - Biophysical Chemistry
  - Medicinal Chemistry
  - Drugs and Toxicology
  - Nutrition
  - Applied Spectroscopy

This combined degree program of the College of Science and Health and the College of Education was collaboratively developed, and is governed and taught by faculty from these units.

The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring quarter. Upon graduation and the fulfilling of State of Illinois licensure requirements (which may require some additional course work in the student’s major and related...
fields), students are eligible to be licensed to teach Chemistry at the 5th-12th grade levels.

A full description of the TEACH Program can be found here. (p. 1122) Students interested in the TEACH Program should consult with the designated TEACH Program advisor in their home department.

**Chemistry (Minor)**

As a Chemistry minor, you will learn the fundamentals of chemical theory and practice through scientific investigation and laboratory experience.

### Course Requirements

<table>
<thead>
<tr>
<th>Course</th>

</tr>
</tbody>
</table>

The department offers General Chemistry each summer. In this case, the combination of CHE 136/CHE 137 and CHE 138/CHE 139 may substitute for the three-quarter sequences above.

Chemistry majors cannot earn a chemistry minor.

### Thesis

Students will be able to:

- Formulate a chemical problem of interest and propose an appropriate solution.
- Integrate chemical knowledge to create a persuasive and justifiable scientific argument regarding results.
- State future directions for and impact of their work on the scientific community.

### Degree Requirements

#### Track Requirements

In addition to the 9 courses at 32 credit hours in the Graduate Common Core, Chemistry students must complete the requirements within their chosen track: Thesis Track or one of the Non-Thesis Tracks.

### Learning Outcomes

Students will be able to:

- Critique the results of experiments and representative problems based on core chemical principles, both orally and in writing.
- Graphically represent scientific data for a professional audience.

### Track Requirements

Concentrations, tracks and specializations provide focus to the degree. In addition to any degree requirements, students are required to choose one of the following:

- Analytical/Physical Chemistry Track (Non-Thesis), Chemistry (MS) (p. 219)
- Biochemistry/Medicinal Chemistry Track (Non-Thesis), Chemistry (MS) (p. 219)
- Standard Track (Non-Thesis), Chemistry (MS) (p. 219)
- Synthetic Chemistry Track (Non-Thesis), Chemistry (MS) (p. 219)
- Thesis Track, Chemistry (MS) (p. 220)
Program Graduate Academic Student Handbook

Academic Probation
Students must maintain a minimum cumulative GPA of 2.75 to remain in good standing. A student whose cumulative GPA falls below 2.75 will be placed on academic probation.

Academic Dismissal
Students on probation have at most one academic quarter of coursework to raise their cumulative GPA to at least a 2.75. If a student does not, then he/she may be academically dismissed for a violation of satisfactory progress.

All students are expected to adhere to the Code of Student Responsibility as outlined in the Graduate Student Handbook. Any violation of the Code of Student Responsibility is considered very serious and is grounds for probation or dismissal at the discretion of the Chemistry Graduate Committee or Dean of Students.

Conditional Admission
An applicant may be admitted conditionally to the program at the discretion of the Chemistry Graduate Committee for one or more of the following reasons:

- Undergraduate GPA is less than 2.75 but the student has shown considerable promise in other areas (such as research).
- The applicant is missing one or two of the required courses but otherwise has met all of the criteria for admission; the applicant will be required to complete the missing coursework either at DePaul or comparable institution as a condition prior to taking graduate courses for which the missing course(s) is(are) prerequisite.

The Chemistry Graduate Committee will consider other circumstances not included in the above list on an individual basis.

Transfer Credit
Up to 12 quarter hours (or semester equivalent) of coursework may be accepted as transfer credit towards the M.S. degree for courses taken at another institution or through another DePaul program that articulate with current courses in the chemistry graduate program. Credits applied toward the completion of a degree at DePaul or another institution will not be accepted as transfer credit. Written approval must come from graduate program director and associate dean for graduate studies.

Graduation Requirements
Students need a minimum cumulative GPA of 2.75 in courses required by the program to be eligible for graduation.

Graduation with Distinction
Students may graduate “with distinction” by earning a minimum cumulative GPA of 3.75 for coursework applied toward the chemistry graduate program, or on the recommendation of the thesis defense committee.

Time Limitation
Students pursuing a master’s degree must complete all requirements for the master’s degree within a maximum of six years from the first term of enrollment in the program.
CHE 360  MEDICINAL CHEMISTRY  4
CHE 378  APPLIED SPECTROSCOPY  4
CHE 430  POLYMER SYNTHESIS  4
CHE 431  POLYMER SYNTHESIS LABORATORY  2
CHE 434  POLYMER CHARACTERIZATION  4
CHE 435  POLYMER CHARACTERIZATION LABORATORY  2
Select one additional 4 credit course at the 400-level  1

1 Excluding CHE 497

- No more than three 300-level four-credit-hour courses may be taken for graduate credit toward MS

The Thesis Track, Chemistry (MS)

- CHE 497 (https://catalog.depaul.edu/search/?P=CHE%20497) (minimum of 12 credit hours)
- One additional 4 credit-hour course at the 400-level (excluding CHE 497 (https://catalog.depaul.edu/search/?P=CHE%20497))
- In addition, MS thesis students must write a thesis based on their research project and successfully pass a two-part oral exam. The first part of the examination consists of the thesis presentation and defense; the second part is an oral examination concerning the student’s general knowledge of chemistry.

Chicago Studies (Minor)

The Chicago Studies minor gives students the opportunity to study Chicago across multiple disciplines. It is designed for students who wish to deepen their understanding of the city through a range of community-based learning experiences.

Course Requirements

The minor requires five courses (20 credits), including one core course (4 credits) and four electives (16 credits). Courses marked (1) may fulfill Experiential Learning requirements.

Chinese (MA)

DePaul's MA program in Chinese provides students a customizable, flexible curriculum to develop advanced linguistic and cultural expertise in a language and to apply that expertise in the disciplinary or professional contexts of their choice. Whether in the "global village"
of today's world or in multi-ethnic communities such as Chicago, this advanced expertise is an increasingly valuable personal and professional asset, requiring appropriate training and credentials. The MA program especially seeks to serve adult professionals (government employees, social workers, healthcare providers, business people, or certified K-12 teachers) whose careers require this applied expertise.

The MA in Chinese may be expanded to include also select graduate certificate programs covering particular areas of interest. Students participating in a combined MA/certificate program should consult with their academic advisor to determine what coursework might count toward both programs. A separate application process for the certificate is required. Students who are interested in any of the following combination programs should contact the Graduate Student Services Office for additional information.

- Chinese + Digital Humanities Certificate
- Chinese + Teaching English to Speakers of Other Languages (TESOL) Certificate
- Chinese + Translation and Interpreting Studies Certificate

### Program Requirements

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Degree Requirements</td>
<td>48</td>
</tr>
<tr>
<td>Total hours required</td>
<td>48</td>
</tr>
</tbody>
</table>

### Learning Outcomes

Students will be able to:

- Speak and participate in most informal and some formal conversations from topics related to school, home, and leisure activities, to many related to employment, current events, and matters of public and community interest.
- Narrate and describe in the major time frames of past, present, and future in paragraph-length discourse with some control of aspect, as well as combine and link sentences into connected discourse of paragraph length; although these narrations and descriptions tend to be handled separately rather than interwoven.
- Use communicative strategies such as rephrasing and circumlocution, and contribute to a conversation with sufficient accuracy, clarity, and precision to convey their intended message without misrepresentation or confusion.
- Combine and link sentences into texts of paragraph length and structure, and use minimal control of common structures and vocabulary.
- Listen and comprehend (albeit unevenly) short conventional narrative and descriptive texts with a clear underlying structure.
- Understand conventional narrative and descriptive texts with clear underlying structure (though their comprehension may be uneven).

### Core Curriculum

The core curriculum consists of the following three courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MOL 401</td>
<td>PROFESSIONAL FOUNDATIONS</td>
<td>4</td>
</tr>
<tr>
<td>MOL 402</td>
<td>LANGUAGE, SELF AND SOCIETY</td>
<td>4</td>
</tr>
<tr>
<td>MOL 496</td>
<td>MAMOL CAPSTONE</td>
<td>4</td>
</tr>
</tbody>
</table>

In addition, all 300-level language courses are offered simultaneously as 400-level electives to complete the MA program. The 400-level courses have additional requirements.

### Additional Requirements

Additional requirements include:

- Portfolio

The portfolio (completed while enrolled in MOL 496) consists of a compilation and critical assessment of select work done throughout the program and a capstone project. Capstone projects may include a community service experience, internship, performance or creative work, teaching portfolio, thesis, or translation.

### Graduation Grade Point Average Requirement

In order to graduate from the program, students must complete all program requirements with a minimum GPA of 3.000.

### Thesis Option

A thesis option will be available for students who attain a GPA of at least 3.7 in the program after completing 24 credit hours of coursework.

### Student Handbook

Students in a graduate program offered through Modern Languages follow the requirements, rules, and regulations set by the College of Liberal Arts and Social Sciences and the DePaul University Graduate Handbook. There are additional academic regulations specific to students in a Modern Language graduate program.

### Language Proficiency for Admission

In order to be eligible for admission to a Modern Language graduate program a student must have successfully completed at least 20 quarter credit hours (or the equivalent in semester credit hours) of advanced college-level coursework in the language (this is the equivalent of an undergraduate "minor" at most colleges or universities in the United States).

Students who lack 20 quarter credit hours (or the equivalent in semester credit hours) of coursework must demonstrate proficiency in the language by attaining a rating of at least "Intermediate Mid" on two standardized tests from the American Council on the Teaching of Foreign Languages (ACTFL): the Oral Proficiency Interview (OPI) and the Writing Proficiency Test (WPT).
Transfer Credit

Students may apply ("transfer") toward their MA programs in Modern Languages no more than eight quarter hours of graduate-level credit completed at another college or university, with approval from the departmental director of graduate programs. Students may not transfer credits already used to satisfy the degree requirements of any program at another college or university.

Students seeking to apply "transfer" credit toward their MA programs in Modern Languages must complete the college transfer request form.

Graduation with Distinction

Students from the MA programs in Modern Languages earn their degrees "with distinction" if they graduate with a cumulative grade point average (GPA) of 4.0 (on a scale where 4.0=A). To verify eligibility, students and their faculty advisors should contact the departmental advisor and the departmental director of graduate studies before the deadline to apply for graduation.

Chinese (MA), Combined Bachelor's + Master's Degree

The combined Bachelor's + Master's degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

DePaul Undergraduate Degree + Chinese (MA)

Admission to this combined Master of Arts program is based on a minimum level of language proficiency (ACTFL rating of "Intermediate Mid") rather than on prior coursework. Therefore, it is open to students with any undergraduate majors with the accompanying language ability. The program is designed to prepare students for advanced use of their linguistic skills in any area of professional interest (from business, government, and education to further graduate study).

The program requires 48 quarter hour credits of coursework. This coursework consists of:

1. 12-quarter hour credits of required courses:  

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MOL 401</td>
<td>PROFESSIONAL FOUNDATIONS</td>
<td>4</td>
</tr>
<tr>
<td>MOL 402</td>
<td>LANGUAGE, SELF AND SOCIETY</td>
<td>4</td>
</tr>
<tr>
<td>MOL 496</td>
<td>MAMOL CAPSTONE</td>
<td>4</td>
</tr>
</tbody>
</table>

2. 36-quarter hour credits of elective coursework, specifically relevant to each individual student's professional interests and language, and chosen in consultation with the student's faculty advisor.

The required courses (MOL 401, MOL 402, and MOL 496) are each worth 4-quarter hour credits. Elective courses may vary in credit. Because each student pursues a highly customized selection of coursework, it may include independent study, practicum, study abroad, or transfer credits that allow students to complete in any term additional credits toward satisfaction of degree requirements. Depending on individual interests, a student may (with approval of their advisor) also take as electives courses taught in English by other DePaul units, provided that the students satisfy any relevant prerequisites for those courses.

Chinese Language (Minor)

DePaul's Chinese Language minor focuses on developing an intermediate proficiency in spoken and written Chinese, one of the world's major languages that is growing in importance in our global society.

The minor consists of a total of 5 courses in Chinese language at the 200/300-level. Courses taught in English (CHN 208E, CHN 248E, CHN 250E) will not be counted toward this minor unless Program Director permission is secured.

Students majoring in Chinese Studies (BA) or minoring in Chinese Studies are restricted from earning this minor.

Chinese Studies (BA)

DePaul Chinese Studies Program (BA) is an interdisciplinary program that aims to develop DePaul students' Mandarin Chinese language proficiency and deeper understanding of Chinese society and culture as well as its relations to the world. Students take both Mandarin Chinese language, culture, and literature courses taught in Mandarin Chinese by faculty in the Department of Modern Languages and a variety of China-related allied studies courses taught in English by faculty in over ten disciplines. The program will help students grow into a marketable candidate in a variety of professional fields, such as business, consulting, education, or politics.

Chinese Studies courses focus on a variety of topics, including:

- Art  
- Business  
- Economics  
- History  
- Language  
- Literature  
- Philosophy  
- Politics  
- Religion

</table>

Learning Outcomes

Students will be able to:

- Proficiently speak, understand, read, and write the studied language(s) to: engage in conversations, interpret and create a variety of written texts, provide and obtain information, express feelings and emotions, exchange opinions.
- Acquire knowledge of the cultures related to the studied language(s) with appropriate background in geography, history, politics, and society.
- Acquire knowledge of the literary traditions related to the studied language(s) along with techniques of literary and rhetorical analysis.
Acquire basic notion of the history and theory of language and language study, including linguistics, sociolinguistics, language acquisition, and dialectology.

Acquire basic notion of the theory and practice of translation and interpretation.

College Core Requirements
Study in the Major Field
The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration
All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

The Modern Language Requirement (MLR)
All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g., 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g., 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)

Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the “Modern Language Option” (see below).

The Modern Language Option (MLO)
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

NOTE: Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

External Credit and Residency
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Junior Year

Experiential Learning

Required 4

Senior Year

Capstone

Required 1 4

1 Students must earn a C- or better in this course.
2 Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete LSP 120 and both a Computational Reasoning course and a Statistical Reasoning course in the Math and Computing Domain take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and cannot be applied to the SI Domain.

Notes

A student whose only major is in Modern Languages is required to complete the Capstone offered by the Department of Modern Languages (MOL). A student who is double majoring (or pursuing dual degrees) with the primary major (or primary degree) in MOL may substitute the Capstone of the secondary major or degree. An MOL major in the University Honors Program shall take only the University Honors Capstone, not both the Honors Capstone and the MOL Capstone.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

Course Requirements

• 24-32 credit hours of 200/300 level courses in Chinese Language
• 20-28 credit hours of Allied Courses from at least three different departments

Students who begin their study of Chinese at DePaul with CHN 202 or higher may substitute a 300-level Chinese elective course for any of the required 200-level courses. No English-language ("E-designation") courses can be applied toward the "Six Advanced Level Courses in Chinese Language" requirement of the major.

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Chinese Studies 3+3 (BA+JD)
In the 3+3 (BA+JD) Program, high-achieving incoming first-year undergraduate students are admitted simultaneously to the College of Liberal Arts and Social Sciences and the College of Law. Students complete their first three years in the College of Liberal Arts and Social Sciences and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA+JD students meet regularly with advisors in both Colleges and have access to a variety of resources to ensure their success.

Key Program Features
- Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
- Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
- Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
- Students receive early (conditional) admission to the College of Law.
- Credits earned in the first year of law school apply toward the BA degree.
• Students may opt out of the College of Law segment of the program and continue in the College of Liberal Arts and Social Sciences during their fourth year.
• If students withdraw after the first semester in the College of Law, they return to the College of Liberal Arts and Social Sciences for the winter quarter.

Program Requirements
In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements. Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.7 in their third and final year of undergraduate study.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRELAW 150</td>
<td>THE PRACTICE OF LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 151</td>
<td>RECENT CONTROVERSIES IN THE LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 152</td>
<td>THINKING ABOUT THE LAW</td>
<td>2</td>
</tr>
</tbody>
</table>

In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law's online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant's third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These classes can be found in the Core Required Courses on the Law JD program page (p. 677).

Financial Aid
BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law's median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

Chinese Studies (Minor)
The Chinese Studies minor offers a basic understanding of the Chinese Language along with an exploration of at least two disciplines in Chinese history and culture.

Course Requirements
• Three quarters of college-level Chinese language (at any level).
• Five additional courses focusing on China from at least two different disciplines, chosen in consultation with an advisor or faculty member, from the current approved Chinese Studies Allied Course List.

### Notes

Students majoring in Chinese Studies (BA) or minorin Chinese Language are restricted from earning this minor.

## Cinema Studies (Minor)

The Cinema Studies minor provides students with the skills to analyze film critically across genres, along with a basic competency in film production in two areas of the student's choice.

### Course Requirements

A minor in Cinema Studies requires students to complete six courses (24 credits).

The Classical Studies minor offers a basic grounding in Latin or Greek, along with a more in-depth exploration of at least two disciplines focusing on the history, culture, art or religion of the ancient Western world.

**Course Requirements**

- Three quarters of college-level Ancient Greek or Latin (at any level).
- Five additional courses focusing on Ancient Greece or Rome from at least two different disciplines, chosen in consultation with an advisor or faculty member, from the current approved Classical Studies Allied Course List. For any of these five courses students are strongly encouraged to substitute any intermediate level course in Ancient Greek or Latin.

Climate Change Science and Policy (Minor)

The Climate Change Science and Policy minor provides a targeted set of natural and social science courses that form a background which will be useful in research, business, public service and non-profit sectors. The minor is a great fit for students who desire to be conversant in the scientific basis of climate change and the various policy responses being taken in governmental contexts throughout the world.

Clinical Psychology (MA)/(PhD)

The Clinical Psychology Program, which includes both clinical-child and clinical-community tracks, is one of four MA/PhD programs in the Department of Psychology at DePaul University. The American Psychological Association (APA) first accredited the Clinical Program in 1976, and it has held continuous APA accreditation since then. The Clinical Program trains students within the scientist-practitioner model, providing training in both research and practice.

The Clinical Program has four broad program aims:

- To educate students generally about psychology and instill a commitment to life-long learning
- To prepare graduates with knowledge and skills to engage in and shape research and scholarship
- To prepare graduates for diverse leadership career paths in the practice of clinical psychology and more in-depth preparation in child and/or community applications and policy
- To prepare graduates to work in the public sector, in an urban environment, with diverse ethnic and socio-economic populations, and with those who have been traditionally underserved by psychology

Specific competencies that support these aims include: ethical and legal standards, individual and cultural diversity, professional values and attitudes, communication and interpersonal skills, psychological assessment, psychological intervention, supervision, and consultation and interprofessional/interdisciplinary skills.

Program objectives are for students to acquire understanding and competence in psychological theory, research and practice, with particular attention to developmental psychopathology, community psychology, evidence-based treatments, dissemination, and program evaluation with children, adolescents, and families of diverse backgrounds. Our program's focus on diversity is intended to promote students' understanding about the societal and systemic/ecological forces that have contributed to current manifestations of inequality for many diverse groups such as for poor, urban, and ethnically diverse populations and on how these conditions influence mental health, family/community processes, and access to mental health services.

Program Requirements

<tr>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MA Degree Requirements</td>
</tr>
<tr>
<td>Additional PhD Degree Requirements</td>
</tr>
<tr>
<td>Total hours required</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

- Identify major theoretical concepts in psychology, trace their historical development, and integrate theory, research, and domain-specific knowledge to explain and interpret how clinical psychology currently advances knowledge.
- Critique and synthesize theoretical and empirical articles from peer-reviewed scholarly clinical psychology journals in terms of theory, methods, data analyses, and conclusions in order to compose novel perspectives and ideas.
- Develop testable research questions, identify strengths and limitations of research designs and data analysis techniques, conduct appropriate research and analytic strategies, and interpret the findings to situate them within the extant research literature in clinical psychology.
- Describe and discuss the ethical issues associated with human subjects/participant protection and the sequence of procedures needed for IRB approval of research projects, and apply these ethical practices in research.
• Exhibit effective communication skills for presenting at professional conferences and publishing in professional journals in clinical psychology.
• Demonstrate competence in clinical applications.

MA/PhD Degree Requirements

The Clinical Psychology MA/PhD is a combined degree. The MA is non-terminal and, therefore, only students intending to confer the PhD are admitted.

MA Course Requirements

The MA portion of the combined degree program requires a minimum of 76 quarter hours beyond the completion of a bachelor's degree, including four quarter hours of thesis research.

### Master's Thesis Requirements

#### Research Course

- **PSY 597**

#### Master's Thesis

Complete a thesis on a topic approved by the department.

#### Master's Thesis Examination

The examination is a defense of the student's thesis.

### PhD Course Requirements

The PhD portion of the combined degree program requires a minimum of 16 quarter hours beyond the completion of the master's degree, including four quarter hours of dissertation research. The following requirements must be completed to confer the PhD.

### Core Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 565</td>
<td>PROFESSIONAL DEVELOPMENT SEMINAR (3 quarters)</td>
<td>0</td>
</tr>
</tbody>
</table>

<td>INTERNSHIP IN CLINICAL PSYCHOLOGY (5 quarters)</td>
<td>0</td>
</tr>
<tr>
<td>PSY 598</td>
<td>DISSERTATION RESEARCH SEMINAR</td>
<td>0</td>
</tr>
</tbody>
</table>

1 Students are required to complete a total of 6 quarters of PSY 565 for the MA/PhD requirements.

### Area of Emphasis

At least three additional courses consistent with an area of emphasis are required to reach minimum number of hours required for the PhD.
### Additional Required Courses for Clinical-Child (may be used as electives for Clinical-Community)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

<td>4</td>
</tr>
<tr>
<td>PSY 568</td>
<td>SEMINAR IN PREVENTION AND INTERVENTION</td>
<td>4</td>
</tr>
</tbody>
</table>

### Clinical Practicum

Six quarters of clinical practicum need to be successfully completed. The Director of Clinical Training must approve the practicum placement in advance. All practicum courses are zero credit hours.

During year three, students should enroll in the following practicum courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 582</td>
<td>ADVANCED PRACTICUM-CLINICAL PSYCHOLOGY (autumn quarter)</td>
<td>0</td>
</tr>
<tr>
<td>PSY 583</td>
<td>PRACTICUM IN COMMUNITY MENTAL HEALTH (winter quarter)</td>
<td>0</td>
</tr>
<tr>
<td>PSY 584</td>
<td>ADVANCED PRACTICUM IN EVIDENCE-BASED PRACTICE IN PSYCHOLOGY (spring quarter)</td>
<td>0</td>
</tr>
</tbody>
</table>

During year four, students should enroll in the following practicum course three times:

- PSY 574 (taken separately in AQ, WQ, and SQ)

### Doctoral Candidacy Examination (Comprehensive Examination or Review Paper)

Designed to assess the student's general knowledge of clinical psychology and the student's area of emphasis (clinical-child or clinical-community). The examination is given in two sections. One section consists of an examination in the areas represented by the required courses in clinical psychology. A second section consists of an examination in the student's area of emphasis -- clinical-child or clinical-community psychology. An alternative to the Doctoral Candidacy Examination is to complete a major comprehensive review paper based on the literature within an area relevant to the field of clinical psychology. This paper must be submitted for publication in a peer-reviewed clinical psychology journal.

### Admission to Doctoral Candidacy

Formally given to the student with satisfactory coursework performance who has successfully completed the master's thesis and passed the Doctoral Candidacy Examination; the candidate has no more than five years from this date to complete the PhD requirements or dismissal from the program will ensue.

Students denied candidacy will be required to withdraw from the program or withdraw after completion of the MA.

### Internship

One-year supervised internship in an approved doctoral training site. Students typically intern during the fifth or sixth year in the program.

### Doctoral Dissertation Requirements

#### Research Course

- PSY 599

#### Doctoral Dissertation

Departmental committee approval and acceptance of topic and outline of dissertation given only after admission to doctoral candidacy.

### Doctoral Dissertation Examination

Student to defend dissertation and to show competence in the general field of psychology and in the area of specialization of the dissertation.

### Residency Requirement

The clinical psychology program requires a minimum of three full-time academic years of graduate coursework and residency, a master's thesis and dissertation, comprehensive exam/project, and completion of an internship prior to awarding the doctoral degree. The program's residency requirement is addressed through the requirement that students complete their coursework (in all courses, but one) in face-to-face classes during the first three years in the program, and complete their required graduate assistantship and teaching assistantship roles. Students are required to complete the internship before the degree is awarded.

### Time Limitations

- No more than four years between admission to the MA/PhD program and admission to doctoral candidacy.
• No less than eight months and no more than five years between admission to doctoral candidacy and the final doctoral oral examination; or dismissal from the program will ensue.

Program Graduate Academic Student Handbook
The content on this page is shared from another website. If you are seeing this message, the referring website is not available or is experiencing technical difficulties.

Minimum Grades
1. The minimum grade considered acceptable for a graduate course is a B+. This applies to courses taken both within and outside of the department for psychology graduate students. Grades below that (i.e., B and below) indicate that the student has not mastered the relevant content of the course.
2. If a graduate student earns a grade lower than B+ in a particular course, the student, instructor, and advisor will discuss the situation and circumstances and a remediation plan will be required. The student, his or her advisor, and the instructor, will work together to create a plan through which the student can (a) gain competence in the course material, and (b) demonstrate that competence. The remediation plan might include, for example, requiring the student to complete additional assignments, retaking the class, taking a substitute class, completing an independent study, or pursuing other options. The remediation plan must be approved by the instructor, advisor and the program director.
3. A second occurrence of a grade lower than a B+ (for the same or different course) will put the student on academic probation. Once placed on academic probation, the student’s record and any mitigating circumstances will be evaluated by a Psychology Department review board comprising the student’s advisor, the program director, and the department associate chair (the department chair might be included in special circumstances). Additional remediation and intervention might be suggested by the review board.
4. If there is a third occurrence of a grade below B+ (for the same or different course), the student will be dismissed from the program. The student may choose to appeal this decision, in which case the Chair of the Psychology Department will appoint a committee of three tenured Psychology Department faculty outside the student’s program to hear the appeal. Depending on the student’s academic record and any mitigating circumstances, he/she may be allowed to complete his/her Master’s degree but will not be permitted to continue onto the PhD (not applicable to terminal Department of Psychology MS degrees) without a successful appeal.

Academic Probation
Students are expected to maintain a minimum cumulative grade point average (GPA) of 3.20. If a student’s cumulative GPA falls below this minimum, the student will be put on academic probation and will have one quarter of coursework to raise their cumulative GPA to at least a 3.20 or face academic dismissal from the program. If the student raises his/her cumulative GPA to at least a 3.20, but it falls below the minimum a second time, he or she will be dismissed from the program before the next term begins.

Academic Dismissal
In addition to violations of satisfactory progress, including but not limited to, earning minimum grades, failing the comprehensive exam (including any possible retakes) or project, or maintaining a minimum cumulative GPA, students may be dismissed for breaches of academic honesty, or breaches of the code of student responsibility articulated in the DePaul University Student Handbook.

Time Limitations
Students must complete their MA degree requirements prior to completing their requirements for admission to doctoral candidacy. Further, no more than four years may pass between admission to the doctoral program (i.e., successful completion of the doctoral candidacy examination/project), and no less than eight months and no more than five years may pass between admission to candidacy and the final examination (i.e., the oral dissertation defense).

Graduation Requirements
Students need a minimum cumulative GPA of 3.20 in courses required by the program. In addition to meeting the minimum cumulative GPA requirement, failing the doctoral candidacy exam (or one retake) or project, lack of progress towards degree completion, and/or unsatisfactory evaluation could result in academic dismissal. See individual program policies for more details.

Graduation with Distinction for MA
The criteria for graduating "with distinction" are a minimum cumulative GPA of 3.75 and the recommendation of "with distinction" by the thesis committee.

For topics not listed above, please consult the Graduate Student Handbook of the Department of Psychology, your program manual or the Psychology Graduate Program Assistant.

Coaching (Minor)
A minor in Coaching is designed for students interested in acquiring a second teaching area in physical education to coach in a school or professional setting.

### Combined Degree Options

The following graduate programs can be combined with any DePaul undergraduate degree:

- Animation (MA) (p. 107)
- Arabic (MA) (p. 147)
- Applied Mathematics (MS) (p. 136)
- Applied Professional Studies (MA) (p. 139)
- Applied Statistics (MS) (p. 141)
- Business Information Technology (MS) (p. 104)
- Chinese (MA) (p. 222)
- Communication and Media (MA) (p. 243)
- Computer Science (MS) (p. 275)
- Critical Ethnic Studies (MA) (p. 304)
- Data Science (MS) (p. 345)
- Digital Communication and Media Arts (MA) (p. 363)
- Economics and Policy Analysis (MS) (p. 399)
- Educating Adults (MA) (p. 409)
- Entrepreneurship (MS) (p. 461)
- Environmental Science (MS) (p. 468)
- Finance (MSF) (p. 505)
- French (MA) (p. 516)
- German (MA) (p. 544)
- Health Communication (MA) (p. 556)
- Health Informatics (MS) (p. 560)
- History (MA) (p. 581)
- Hospitality Leadership and Operational Performance (MS) (p. 591)
- Human Resources (MS) (p. 596)
- Information Systems (MS) (p. 609)
- International Public Service (MS) (p. 630)
- International Studies (MA) (p. 634)
- Italian (MA) (p. 650)
- Japanese (MA) (p. 652)
- Journalism (MA) (p. 668)
- Management (MS) (p. 723)
- Marketing (MS) (p. 744)
- Marketing Analysis (MS) (p. 745)
- Public Administration (MPA) (p. 934)
- Public Health (MPH) (p. 941)
- Public Policy (MPP) (p. 950)
- Public Service Management (MS) (p. 962)
- Public Relations and Advertising (MA) (p. 957)
- Pure Mathematics (MS) (p. 966)
- Real Estate (MS) (p. 974)
- Sociology (MA) (p. 1052)
- Spanish (MA) (p. 1078)
- Supply Chain Management (MS) (p. 1110)
- Sustainable Management (MS) (p. 1112)

- Writing, Rhetoric, and Discourse (MA) (p. 1286)
- Women's and Gender Studies (MA) (p. 1250)

### Comedy Arts (BFA)

The Theatre School's Bachelor of Fine Arts (BFA) degree in Comedy Arts prepares graduates to be performers, directors, and content creators through the academic study of the history and techniques of comedy and by the practical application of this knowledge in the creation and performance of a progression of theatrical productions.

The curriculum reflects the way comedians have learned their field for centuries, by testing their material in front of an audience, digesting their response, and then learning to revise and rethink in order to be successful communicators. Through a variety performance experiences, students will create content for a variety of forums.

Students work with a distinguished and award-winning faculty of professional writers, directors, and performers. Students will perform their work both on campus and in Chicago comedy venues.

### Learning Outcomes

**Core Outcomes:**

Students will be able to:

- Analyze and discuss artistic productions within a context of theatre history, social structures, cultural identities, political movements, and individual experience.
- Apply ethical frameworks to both the process and product of artistic collaboration in service to both colleagues and the larger community.
- Design actionable plans to complete complex projects both individually and as a leader or member of a team.

**Program Specific Outcomes:**

Students will be able to:

- Practice the concepts and skills of multiple theatrical disciplines in order to create, produce, and perform a variety of forms of comedy.
- Apply the knowledge and skills they have developed in the study of comedy to projects in other fields and disciplines as life-long learners.

### Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

### Open Electives (4-12 hours)

Open elective credit may also be required to meet the minimum graduation requirement of 192 hours.
Commercial French (Minor)

The Commercial French minor program is offered to students who wish to be proficient enough to conduct business in French. Students completing the minor are encouraged to take the business language certification exams given by the French government through their respective chambers of commerce.

Course Requirements

- 12 credits of advanced (200-level) coursework in French language, selected to develop appropriate levels of proficiency in the language and to provide an introduction to translation
- 8 credits of advanced (300-level) coursework: FCH 320 FRENCH FOR BUSINESS and a related class.

Depending on their level of prior expertise with French, students may need to complete courses at the Basic and Intermediate levels before enrolling in 200 or 300-level language courses.

Students majoring in French (BA) or minoring in French or French Translation are restricted from earning this minor.

Commercial Spanish (Minor)

The Commercial Spanish minor program is for students who wish to be proficient enough to conduct business in Spanish. Students completing the minor are encouraged to take the business language certification exam in Spanish.

Required Courses

- SPN 320
- Four more courses at the 200/300 level in Spanish. The department recommends that those four courses include SPN 252.

Students majoring in Spanish (BA) or minoring in Spanish are restricted from earning this minor.

<td>40</td>
</tr>
<tr>
<td>Open Electives</td>
<td>52</td>
</tr>
<tr>
<td>Total hours required</td>
<td>192</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

- Explain the complexities of human communication
- Construct a presentation that tailors ideas to a specific audience
- Analyze content from various media.

College Core Requirements (p. 236)

Modern Language Requirement (p. 236)

Modern Language Option (p. 236)

All majors in the College of Communication consist of a four-course common core plus an additional combination of program requirements and electives.

College Core Requirements

Four core courses are required of all College of Communication students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 101</td>
<td>INTRODUCTION TO HUMAN COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 102</td>
<td>INTRODUCTION TO MASS COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 103</td>
<td>INTERCULTURAL COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 104</td>
<td>PUBLIC SPEAKING</td>
<td>4</td>
</tr>
</tbody>
</table>

Students are encouraged to complete all four prior to taking additional coursework in the major.

Modern Language Requirement

Students who intend to graduate with a Bachelor of Arts degree in the College of Communication will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing the last course in a second year high school course work in a modern language or Latin
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language (must be completed during high school)
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement. Students with some modern language training should consult with the Modern Language Department about the course with which they should begin. Students with little or no previous work in the language will be required to complete the entire three-course introductory sequence.

Modern Language Option

The Modern Language Option is available to all BA students who wish to study a modern language beyond the level necessary to meet the
College’s modern language requirement. Students selecting the option may substitute a three-course language sequence for three learning domain courses, or two upper-level courses in the same language for two learning domain requirements. Modern language option waivers cannot be applied to courses in the Math and Computing Domain or courses in the Scientific Inquiry domain. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1 Students must earn a C- or better in this course.

2 Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete LSP 120 and both a Computational Reasoning course and a Statistical Reasoning course in the Math and Computing Domain take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and cannot be applied to the SI Domain.

**Learning Domains**

**Arts and Literature (AL)** (p. 1300)

- 2 Courses Required

**Historical Inquiry (HI)** (p. 1304)

- 2 Courses Required

**Math and Computing (MC)** (p. 1306)

- 2 Courses Required

- [1 CR Course and 1 SR Course]

**Philosophical Inquiry (PI)** (p. 1307)

- 2 Courses Required

**Religious Dimensions (RD)** (p. 1308)

- 2 Courses Required

**Scientific Inquiry (SI)** (p. 1310)

- 2 Courses Required

- [1 Lab Course and 1 SWK Course]

**Social, Cultural, and Behavioral Inquiry (SCBI)** (p. 1312)

- 2 Courses Required

**Note**

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a major requirement or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

\textsuperscript{1} Students may take up to 4 hours of credit in CMN 397 RESEARCH PRACTICUM and CMN 399 INDEPENDENT STUDY toward graduation requirements.

\textsuperscript{2} A maximum of 8 credits from two credit College of Communication courses can be applied to major requirements.

**Internship Credit**

Students in the major may take CMN 394 and/or CMN 395 (when work relates to the major). In order to take CMN 394 or CMN 395, students must have completed two of the four communication core classes (CMN 101, CMN 102, CMN 103, CMN 104), two courses in the chosen major and have fulfilled internship program eligibility requirements.

**Open Electives**

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

**Communication and Media 3+3 (BA +JD)**

In the 3 + 3 BA/JD Program, high-achieving first-year incoming undergraduate students are admitted simultaneously to the College of Communication and the College of Law. Students complete their first three years in the College of Communication and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA/JD students meet regularly with advisors in both colleges and have access to a variety of resources to ensure their success.

**Key Program Features**

- Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
- Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
- Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
- Students receive early (conditional) admission to the College of Law.
- Credits earned in the first year of law school apply toward the BA degree.
- Students may opt out of the College of Law segment of the program and continue in the College of Communication during their fourth year.
- If students withdraw after the first semester in the College of Law, they return to the College of Communication for the winter quarter.

**Program Requirements**

In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements. Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.7 in their third and final year of undergraduate study. Students who enrolled in the BA+JD program prior to 2022 must achieve a cumulative GPA of 3.35 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.35 in their third and final year of undergraduate study.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:

- PRELAW 150 THE PRACTICE OF LAW
- PRELAW 151 RECENT CONTROVERSIES IN THE LAW
- PRELAW 152 THINKING ABOUT THE LAW

In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law’s online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant’s third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These classes can be found in the Core Required Courses on the Law JD program page (p. 677).

**Financial Aid**

BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law’s median LSAT and GPA are the most likely candidates for larger
merit scholarships. College of Law students are not eligible for the Double Demon discount.

**Participating Majors**
The BA/JD Program is available for students pursuing the following majors:

- Communication and Media (p. 236)
- Communication and Technology (p. 245)
- Communication Studies (p. 248)
- Journalism (p. 661)
- Media and Cinema Studies (p. 784)
- Organizational Communication (p. 861)
- Public Relations and Advertising (p. 952)
- Sports Communication (p. 1100)

For admission requirements and information, contact the Office of Admission (https://www.depaul.edu/admission-and-aid/Pages/default.aspx).

**Communication and Media (BA)**

Online

The College of Communication offers a variety of courses leading to a Bachelor of Arts degree in Communication and Media. The BA in Communication and Media offers students the opportunity to pursue coursework in communication and media that draws upon two or more related areas of study. This degree will provide flexibility for transfer students and others who have not determined their precise career trajectory, while affording them the fundamental communication and critical thinking skills needed to enter jobs across the public, private and non-profit sectors, or to continue their education in academic or professional post-graduate programs. In order to complete this degree, students have the option of pursuing coursework from any of the other majors offered in the College of Communication.

Some liberal studies requirements may not be offered online. Some communication major courses may not have online options.

</tr>
<tr>
<td>Open Electives</td>
<td>52</td>
</tr>
<tr>
<td><strong>Total hours required</strong></td>
<td><strong>192</strong></td>
</tr>
</tbody>
</table>

**Learning Outcomes**

Students will be able to:

- Explain the complexities of human communication
- Construct a presentation that tailors ideas to a specific audience
- Analyze content from various media.

---

**Modern Language Requirement (p. 239)**

All majors in the College of Communication consist of a four-course common core plus an additional combination of program requirements and electives.

**College Core Requirements**

Four core courses are required of all College of Communication students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 101</td>
<td>INTRODUCTION TO HUMAN COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 102</td>
<td>INTRODUCTION TO MASS COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 103</td>
<td>INTERCULTURAL COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 104</td>
<td>PUBLIC SPEAKING ¹</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>ORGC 201 BUSINESS AND PROFESSIONAL COMMUNICATION</td>
<td>4</td>
</tr>
</tbody>
</table>

Students are encouraged to complete all four prior to taking additional coursework in the major.

¹ Students may choose to take CMN 104 or ORGC 201 to complete the communication core requirement. Students who complete ORGC 201 for the communication core requirement can waive the presentation requirement and take an additional communication elective instead.

**Modern Language Requirement**

Students who intend to graduate with a Bachelor of Arts degree in the College of Communication will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing the last course in a second year high school course work in a modern language or Latin
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language (must be completed during high school)
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement. Students with some modern language training should consult with the Modern Language Department about the course with which they should begin. Students with little or no previous work in the language will be required to complete the entire three-course introductory sequence.
Modern Language Option

The Modern Language Option is available to all BA students who wish to study a modern language beyond the level necessary to meet the College's modern language requirement. Students selecting the option may substitute a three-course language sequence for three learning domain courses, or two upper-level courses in the same language for two learning domain requirements. Modern language option waivers cannot be applied to courses in the Math and Computing Domain or courses in the Scientific Inquiry domain. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Students may take up to 4 hours of credit in CMN 397 RESEARCH PRACTICUM and CMN 399 INDEPENDENT STUDY toward graduation requirements.

A maximum of 8 credits from two credit College of Communication courses can be applied to major requirements.

Students who take ORGC 201 instead of CMN 104 in the communication core can waive the presentation requirement and take an additional communication elective instead.

Internship Credit

Students in the major may take CMN 394 and/or CMN 395 (when work relates to the major). In order to take CMN 394 or CMN 395, students must have completed two of the four communication core classes (CMN 101, CMN 102, CMN 103, CMN 104), two courses in the chosen major and have fulfilled internship program eligibility requirements.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Communication and Media (MA)

The Master of Arts in Communication and Media offers an interdisciplinary program in which students can explore the impact of communication and media in a variety of contexts (e.g., popular culture, corporate world, interpersonal relationships, new media) and communication modes (e.g., digital media, film and television, performance, verbal and nonverbal). Flexible curriculum allows students to fulfill their unique academic and professional goals. The curriculum places heavy emphasis on the connection between theory and practice, through which students learn tools and frameworks to critically examine and resolve real-life issues around them.

By offering four optional areas of concentration—Interpersonal Communication, Media and Cinema Studies, Multicultural Communication, and Organizational Communication—the program is uniquely designed to harbor the underlying connections across multiple areas and simultaneously allow for the development of mastery in a specific concentration area. Declaring a concentration is optional.

Program Requirements Quarter Hours
Degree Requirements 48
Total hours required 48

Learning Outcomes

Students will be able to:

- Demonstrate knowledge of relevant conceptual and theoretical vocabulary with the concentration(s) of interest.
- Identify and produce communicative messages to solve problems; address or explain industrial or cultural issues; or create changes in relational, organizational, intercultural, or mediated spheres.
- Critically analyze communication-related problems and products through a variety of theoretical, methodological, and stylistic lenses.

Degree Requirements

Students in this degree program must meet the following requirements:

- Complete a minimum of 48 graduate credit hours and a degree completion option.
- Complete all graduate courses and requirements listed in the designated degree program.
- Maintain a cumulative GPA of 3.00 or higher.

1 Students can take up to 2 of their 9 electives (8 credits) from departments outside of Communication Studies or Media and Cinema Studies. Outside electives must be approved by the graduate program director or graduate advisor.

Optional Communication and Media Concentrations

Students may opt to complete one of four concentrations. Each concentration requires five courses (20 credits) specific to that concentration; these five courses (20 credits) are included in the 12 course (48 credits) total required for the degree. To view concentration requirements, please view the concentration requirement pages linked below:

- Interpersonal Communication (p. 244)
- Media and Cinema Studies (p. 244)
- Multicultural Communication (p. 244)
- Organizational Communication (p. 245)

Optional Latino Media & Communication Concentration

The graduate concentration in Latino Media & Communication is comprised of at least three graduate courses drawn from the areas of advertising, journalism, media and cinema studies, multicultural communication, organizational communication and public relations. Graduate students in any of the College of Communication Master of Arts programs can elect to complete the Latino Media & Communication concentration. Students may need to use outside electives to complete this concentration.

Students who complete the concentration will:

- Develop an understanding of the heterogeneous and rapidly changing Latino communities locally, nationally and globally
- Ground their knowledge of intercultural studies within a more extensive and concrete knowledge of a particular (even though diverse), rapidly growing, and increasingly important population within the U.S.
- Increase their cross-cultural competence (understanding and ability to dialogue across difference, develop cultural sensitivity and awareness) with Latino communities
- Enhance their capacity to communicate with and learn from Latino populations in the workplace, in community situations and other sites of engagement
- Recognize the impact of the movement of Latinos across the globe and develop the skills to critically consume and produce media, public relations and advertisement representations that communicate to and about Latino communities
Courses

Students are required to take three courses (12 credits) from the following list:

<table>

</tbody>
</table>

1 Topic must be related to Latino Media and Communication.

Completion Requirement: Comprehensive Final Exam or Project/Thesis

Students in the Master of Arts in Communication and Media complete their degree requirements by passing a comprehensive final exam. Students who attain a 3.75 GPA or higher and obtain prior approval from the graduate program director have the option to complete a culminating project or thesis instead of the comprehensive final exam. Students completing a project or thesis will enroll in CMNS 599 as their 12th and final course in the quarter they defend their project/thesis.

Grade Requirements

All students are required to maintain a cumulative GPA of 3.000 in their coursework. If a student's cumulative GPA falls below 3.000, the student will be allowed to complete an additional 16 credits or 3 quarters (whichever comes first) to attain the 3.000 minimum GPA. If the cumulative GPA remains below a 3.000 at the conclusion of this time period, the student may be dismissed from the program. The student's cumulative and term GPAs along with overall academic performance will be factored into the dismissal decision.

Concentration Requirements

- Interpersonal Communication Concentration, Communication and Media (MA) (p. 244)
- Media and Cinema Studies Concentration, Communication and Media (MA) (p. 244)
- Multicultural Communication Concentration, Communication and Media (MA) (p. 244)
- Organizational Communication Concentration, Communication & Media (MA) (p. 245)

Communication and Media (MA), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

DePaul Undergraduate Degree + Communication and Media (MA)

The Communication and Media (MA) combined degree program is open to all undergraduate majors across the university. Students who are interested in this program must apply to the Graduate Admission Office in their junior year, and if accepted, can take up to three graduate courses (12 credits) in their senior year. These three courses count towards both the bachelor’s program and the master of arts degree. Students will pay the current undergraduate tuition rate for these three courses. Once students earn their Bachelor of Arts or Bachelor of Science degree from DePaul, they matriculate as a graduate student and complete the remaining required courses for their Master of Arts degree. Students should work with their undergraduate advisor to see how the graduate classes will fulfill undergraduate degree requirements. Students must maintain a 3.0 GPA (B or better) in each graduate class taken in the senior year in order to continue in the program.

Double Demon Scholarship

Alumni from any of DePaul's colleges who are admitted into a graduate degree program in the College of Communication automatically qualify for the Double Demon Scholarship. Combined degree program students are eligible.

This scholarship covers 25% of the tuition for a master's degree in the College of Communication. Both full-time and part-time students
are eligible. No scholarship application is required. (DePaul University employees are eligible for other employee tuition benefits through the university, and therefore are not eligible for the Double Demon Scholarship.)

**Interpersonal Communication Concentration, Communication and Media (MA)**

**Course Requirements**
The Interpersonal Communication concentration requires 5 courses (20 credit hours).

**Core Courses**
Students must take one core Interpersonal Communication concentration course (4 credit hours).

Communication and Media (Minor)

The Communication and Media minor is for students interested in multiple areas of the media who wish to further their skills in effective communication to complement their major course of study.

Course Requirements
A minor in Communication and Media consists of 24 credit hours (six courses).

- 3 courses starting with the prefix CMNS or ORGC
- 3 courses starting with the prefix JOUR, MCS, PRAD, or SPRTCMMN

Any of those six courses may be replaced with:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 394</td>
<td>MAKING THE MOST OF YOUR COMMUNICATION INTERNSHIP</td>
<td>4</td>
</tr>
<tr>
<td>or CMN 395</td>

<td>Major Requirements</td>
<td>40</td>
</tr>
<tr>
<td>Open Electives</td>
<td>52</td>
</tr>
<tr>
<td>Total hours required</td>
<td>192</td>
</tr>
</tbody>
</table>

Learning Outcomes
Students will be able to:

- Students will be able to explain how digital technology has affected communication practices across a range of subjects and disciplines.
- Students will be able to compare new technological practices and evaluate changes in technological practices across a range of communication subjects.
- Students will be able to demonstrate key competencies in video production, audio production, graphic design, and other technologies within digital media arts.
- Students will be able to identify the underlying ethical issues that the advent of digital technology has brought to contemporary society.
College Core Requirements (p. 246)

Modern Language Requirement (p. 246)

Modern Language Option (p. 246)

All majors in the College of Communication consist of a four-course common core plus an additional combination of program requirements and electives.

College Core Requirements

Four core courses are required of all College of Communication students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 101</td>
<td>INTRODUCTION TO HUMAN</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>COMMUNICATION</td>
<td></td>
</tr>
<tr>
<td>CMN 102</td>
<td>INTRODUCTION TO MASS</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>COMMUNICATION</td>
<td></td>
</tr>
<tr>
<td>CMN 103</td>
<td>INTERCULTURAL COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 104</td>
<td>PUBLIC SPEAKING</td>
<td>4</td>
</tr>
</tbody>
</table>

Students are encouraged to complete all four prior to taking additional coursework in the major.

Modern Language Requirement

Students who intend to graduate with a Bachelor of Arts degree in the College of Communication will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing the last course in a second year high school course work in a modern language or Latin
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language (must be completed during high school)
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement. Students with some modern language training should consult with the Modern Language Department about the course with which they should begin. Students with little or no previous work in the language will be required to complete the entire three-course introductory sequence.

Modern Language Option

The Modern Language Option is available to all BA students who wish to study a modern language beyond the level necessary to meet the College’s modern language requirement. Students selecting the option may substitute a three-course language sequence for three learning domain courses, or two upper-level courses in the same language for two learning domain requirements. Modern language option waivers cannot be applied to courses in the Math and Computing Domain or courses in the Scientific Inquiry domain. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

First Year Program

</tr>
</tbody>
</table>
Philosophical Inquiry (PI) (p. 1307)
- 2 Courses Required

Religious Dimensions (RD) (p. 1308)
- 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
- 2 Courses Required
  [1 Lab Course and 1 SWK Course]

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
- 2 Courses Required

**Note**
Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a major requirement or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

## Major Requirements

### Four Required Courses (16 hours)

<table>
<thead>
<tr>

Communication and Technology 3+3 (BA+JD)

In the 3 + 3 BA/JD Program, high-achieving first-year incoming undergraduate students are admitted simultaneously to the College of Communication and the College of Law. Students complete their first three years in the College of Communication and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA/JD students meet regularly with advisors in both colleges and have access to a variety of resources to ensure their success.

Key Program Features

- Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
- Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
- Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
- Students receive early (conditional) admission to the College of Law.
- Credits earned in the first year of law school apply toward the BA degree.
- Students may opt out of the College of Law segment of the program and continue in the College of Communication during their fourth year.
- If students withdraw after the first semester in the College of Law, they return to the College of Communication for the winter quarter.

Program Requirements

In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements. Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.7 in their third and final year of undergraduate study. Students who enrolled in the BA+JD program prior to 2022 must achieve a cumulative GPA of 3.35 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.35 in their third and final year of undergraduate study.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:

- PRELAW 150 THE PRACTICE OF LAW
- PRELAW 151 RECENT CONTROVERSIES IN THE LAW
- PRELAW 152 THINKING ABOUT THE LAW

In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law’s online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant’s third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These classes can be found in the Core Required Courses on the Law JD program page (p. 677).

Financial Aid

BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law’s median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

Participating Majors

The BA/JD Program is available for students pursuing the following majors:

- Communication and Media (p. 236)
- Communication and Technology (p. 245)
- Communication Studies (p. 248)
- Journalism (p. 661)
- Media and Cinema Studies (p. 784)
- Organizational Communication (p. 861)
- Public Relations and Advertising (p. 952)
- Sports Communication (p. 1100)

For admission requirements and information, contact the Office of Admission (https://www.depaul.edu/admission-and-aid/Pages/default.aspx).

Communication Studies (BA)

<table>
<thead>
<tr>
<th>Program Requirements</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>College Core Requirements</td>
<td>16</td>
</tr>
<tr>
<td>Liberal Studies Requirements</td>
<td>84</td>
</tr>
</tbody>
</table>
Major Requirements 40
Open Electives 52
Total hours required 192

Learning Outcomes
Students will be able to:

- Articulate the importance of communication in public, professional, and personal contexts.
- Explain cultural similarities and differences across communication contexts.
- Critically analyze messages employing relevant communication theories, ethics, principles, and research.
- Create messages that are effective and appropriate for the audience, purpose, and context.

College Core Requirements (p. 249)
Modern Language Requirement (p. 249)
Modern Language Option (p. 249)

All majors in the College of Communication consist of a four-course common core plus an additional combination of program requirements and electives.

College Core Requirements
Four core courses are required of all College of Communication students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 101</td>
<td>INTRODUCTION TO HUMAN COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 102</td>
<td>INTRODUCTION TO MASS COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 103</td>
<td>INTERCULTURAL COMMUNICATION</td>
<td>4</td>
</tr>
<tr>
<td>CMN 104</td>
<td>PUBLIC SPEAKING</td>
<td>4</td>
</tr>
</tbody>
</table>

Students are encouraged to complete all four prior to taking additional coursework in the major.

Modern Language Requirement
Students who intend to graduate with a Bachelor of Arts degree in the College of Communication will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing the last course in a second year high school course work in a modern language or Latin
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language (must be completed during high school)
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement. Students with some modern language training should consult with the Modern Language Department about the course with which they should begin. Students with little or no previous work in the language will be required to complete the entire three-course introductory sequence.

Modern Language Option
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level necessary to meet the College’s modern language requirement. Students selecting the option may substitute a three-course language sequence for three learning domain courses, or two upper-level courses in the same language for two learning domain requirements. Modern language option waivers cannot be applied to courses in the Math and Computing Domain or courses in the Scientific Inquiry domain. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Students must earn a C- or better in this course.

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework or by passing a dedicated proficiency exam. Students who complete LSP 120 and both a Computational Reasoning course and a Statistical Reasoning course in the Math and Computing Domain take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and cannot be applied to the SI Domain.

Learning Domains

Arts and Literature (AL) (p. 1300)
- 2 Courses Required

Historical Inquiry (HI) (p. 1304)
- 2 Courses Required

Math and Computing (MC) (p. 1306)
- 2 Courses Required
  [1 CR Course and 1 SR Course]

Philosophical Inquiry (PI) (p. 1307)
- 2 Courses Required

Religious Dimensions (RD) (p. 1308)
- 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
- 2 Courses Required
  [1 Lab Course and 1 SWK Course]

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
- 2 Courses Required

Note

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a major requirement or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Electives**

Select three electives (12 credits) from any College of Communication offering

Students may take up to 4 hours of credit in this course toward graduation requirements.

A maximum of 8 credits from two credit College of Communication courses may be applied to major requirements.

**Internship Credit**

Students in the major may take CMN 394 and/or CMN 395 (when work relates to the major). In order to take CMN 394 or CMN 395, students must have completed two of the four communication core classes (CMN 101, CMN 102, CMN 103, CMN 104), two courses in the chosen major and have fulfilled internship program eligibility requirements.
Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Communication Studies 3+3 (BA+JD)
In the 3 + 3 BA/JD Program, high-achieving first-year incoming undergraduate students are admitted simultaneously to the College of Communication and the College of Law. Students complete their first three years in the College of Communication and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA/JD students meet regularly with advisors in both colleges and have access to a variety of resources to ensure their success.

Key Program Features
- Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
- Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
- Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
- Students receive early (conditional) admission to the College of Law.
- Credits earned in the first year of law school apply toward the BA degree.
- Students may opt out of the College of Law segment of the program and continue in the College of Communication during their fourth year.
- If students withdraw after the first semester in the College of Law, they return to the College of Communication for the winter quarter.

Program Requirements
In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements. Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study. Students who enrolled in the BA+JD program prior to 2022 must achieve a cumulative GPA of 3.35 by the end of their second year of undergraduate study. Students who earn an LSAT score and GPA at or above the College of Law’s median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

Participating Majors
The BA/JD Program is available for students pursuing the following majors:
- Communication and Media
- Communication and Technology
- Communication Studies
- Journalism
- Media and Cinema Studies
- Organizational Communication
- Public Relations and Advertising
- Sports Communication

Financial Aid
BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law’s median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

For admission requirements and information, contact the Office of Admission (https://www.depaul.edu/admission-and-aid/Pages/default.aspx).

Communication Studies (Minor)
The Communication Studies minor is focused on preparing students to communicate effectively in any career. Emphasis is placed on speaking and writing for presentation, along with professional, workplace communication.

Course Requirements
A minor in Communication Studies consists of 24 credit hours (6 courses) in Communication Studies.

  PERFORMANCE OF RITUAL
- ORGC 201  
  BUSINESS AND PROFESSIONAL COMMUNICATION
- ORGC 354  
  EMPLOYMENT INTERVIEWING

### Additional Courses

Select four additional courses (16 hours) from CMNS or ORGC. Students may include the following toward the four additional courses:  
- CMN 394  
  MAKING THE MOST OF YOUR COMMUNICATION INTERNSHIP
- or CMN 395  
  COMMUNICATION INTERNSHIP SPECIAL TOPICS

Students majoring in Communication Studies (BA) are restricted from earning this minor.

---

**Community Development Certificate**

This inter-disciplinary certificate program offers skills in organization planning, leadership development, and program evaluation. The program allows established and emerging professionals to broaden their perspective on urban development programs in an inter-disciplinary learning environment by including knowledge from psychology, public service, sociology, geography and liberal studies.

Students must successfully complete a minimum of 16-quarter hours of graduate credit. Each course carries four-quarter hours. **No more than two courses earned toward the certificate shall come from one department.** Please note that the list of courses is subject to change.

**Community Psychology (MA/PhD)**

The Community Psychology Program is one of four combined MA/PhD programs in the Department of Psychology at DePaul University. The program prepares students to become excellent researchers, intervention specialists, consultants, and program evaluators who have a firm grounding in the theory, research and practice of Community Psychology.

Our training program has a special focus on working with underserved, minority populations (e.g., low-income urban children, adolescents, families and adults) and community-based organizations. We invite you to explore our website so that you can find out more about our program.

We believe there is a need to equip students with psychological skills that are targeted toward non-individually oriented topics, such as community and organizational change, and evaluators of social policy. Students in the Community Psychology Program will be trained in research methodologies to be applied to social and community interventions. These students will gain an understanding of social-community change from a public health perspective rather than a traditional individual-counseling orientation and will be collaborating with community agencies, not-for-profit groups or grass-roots organizations. Their principle roles are in research, evaluation, program development and other non-clinical activities.
The Community Program utilizes a unique approach toward training graduate students. The program will stress training community professionals who work in the public or private sector with diverse gender, ethnic, racial and sexual orientation populations. This program exemplifies the mission of DePaul University through its strong emphasis on service to others. An objective of training will be to provide graduate students with educational and practical skills for scientific and leadership development as community advocates of social justice and empowerment. The community faculty and supervisors have both an intra- and interdisciplinary orientation, including but not limited to, social, experimental, and feminist psychology, plus sociology and public service.

The Community Program seeks to achieve four inter-related goals in training, specifically:

1. Provide students with a breadth of knowledge in the content of community psychology.
2. Provide statistical and methodological foundations in general psychology to demonstrate competence in core areas within the discipline.
3. Provide the means to contribute to new developments in the field of community psychology and the social basis of behavior.
4. Provide for the specific needs of the students and the communities they will serve.

Since the Community Program has an ecological-community orientation that emphasizes a public health model rather than a clinical or medical model, those who have no specific interest in this area would be better served by another program. In particular, those having interests in traditional clinical work would not find the Community Program a good fit. Students accepted in the Community Program are ineligible to transfer into the Clinical Program.

Using a research-in-action training model, our program focuses on providing students with the theory, knowledge, skills and experience to work effectively with underserved communities to promote positive change, to examine the interaction between the individual and the environment, and to understand how contextual issues affect individuals and communities.

Specifically, the Community Program trains students to do the following:

- Develop, implement and evaluate preventive interventions
- Conduct action research that will help us to better understand and address social problems
- Evaluate community-based programs to help them gather information that will lead to better service provision to disadvantaged populations
- Consult with non-profit social service organizations to build organizational capacity
- Teach and conduct community research in college and university settings
- Identify major theoretical concepts in psychology, trace their historical development, and integrate theory, research, and domain-specific knowledge to explain and interpret how community psychology currently advances knowledge.
- Critique and synthesize theoretical and empirical articles from peer-reviewed community psychology scholarly journals in terms of theory, methods, data analyses, and conclusions in order to compose novel perspectives and ideas.
- Develop testable research questions, identify the strengths and limitations of research designs and data analysis techniques, conduct appropriate research and analytic strategies, and interpret the findings to situate them within the extant research literature in community psychology.
- Describe and discuss ethical issues associated with human subjects/participant protection and the sequence of procedures needed for IRB approval of research projects, and apply these ethical practices in research.
- Exhibit effective communication skills for presenting at professional conferences and publishing in professional journals in community psychology.
- Conduct evaluations of community- and/or school-based programs.

MA/PhD Degree Requirements

The Community Psychology MA/PhD is a combined degree. The MA is non-terminal and, therefore, only students intending to confer the PhD are admitted.

MA Course Requirements

The MA portion of the combined degree program requires a minimum of 48 quarter hours beyond the completion of a bachelor's degree, including four quarter hours of thesis research.

Learning Outcomes

Students will be able to:
Elective Courses
Two elective courses required. Electives can be any graduate-level psychology course, or any graduate-level non-psychology course, with permission from the faculty advisor or program director.

Research Course

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 597</td>
<td>MASTER’S THESIS RESEARCH</td>
<td></td>
</tr>
</tbody>
</table>

Master’s Thesis Research
Complete a thesis on a topic approved by the department. It is expected that the student’s proposal for the master’s thesis will be approved by November 15 of the second year in the program. The student’s final thesis is due by February 1 of third year in program.

Master’s Thesis Examination
The examination may be, but is not necessarily limited to, a defense of the student’s thesis.

Doctoral Candidacy Examination (Comprehensive Examination or Project)
Although an applicant is accepted into the Community Psychology MA/PhD Program, formal acceptance and admission to doctoral candidacy depends upon the student’s satisfactory progress in meeting the various demands of graduate education and professional training.

The student is expected to take doctoral comprehensive examinations in the area of community psychology in the spring of the third year in the program. These examinations cannot be taken until the student has successfully completed and defended the master’s thesis. Another option is to conduct a comprehensive project rather than take an exam. The project involves the submission of an empirical paper, review paper, or grant application. The project proposal is due by May 1 of the third year (or within three months of completing the master’s thesis). The final comprehensive project is due by May 1 of the fourth year (or within one year of proposal acceptance).

Admission to Doctoral Candidacy
Formally given to the student with satisfactory coursework performance who has successfully completed and passed the Doctoral Candidacy Examination; the candidate has no more than five years from this date to complete the PhD requirements or dismissal from the program will ensue.

Students denied candidacy will be required to withdraw from the program or withdraw after completion of the MA.

PhD Course Requirements
The PhD portion of the combined degree requires a minimum of 28 quarter hours beyond the completion of the master’s degree, including four quarter hours of dissertation research. The following requirements must be completed to confer the PhD. If a student meets the requirements for years 1-3 (72 course credits and 4 dissertation credits) and is able to graduate as early as at the end of the 3rd year, the remaining 0 credit courses are no longer required.

Field Work and Practicum
All students develop two applied community-based fieldwork projects. They develop relationships with community organizations, design a project based on mutual interests, and receive individual and group supervision to implement the project they design. Metropolitan Chicago has a large population of community sites to draw upon as resources for assisting in placing students in practica and job-related sites.

Dissertation
The student should form a dissertation committee and begin work on the dissertation proposal during the third or fourth year. The dissertation proposal should be accepted by November 15 of the fifth year. The final
dissertation defense should be completed by May 1 of the sixth year in program.

**Oral Examination**

Student is to defend his or her dissertation and to show competence in the general field of psychology and in the area of specialization.

**Time Limitation**

- No more than four years between admission to the MA/PhD program and admission to doctoral candidacy.
- No less than eight months and no more than five years between admission to doctoral candidacy and the final doctoral oral examination; or dismissal from the program will ensue.

**Program Graduate Academic Student Handbook**

The content on this page is shared from another website. If you are seeing this message, the referring website is not available or is experiencing technical difficulties.

**Minimum Grades**

1. The minimum grade considered acceptable for a graduate course is a B-. This applies to courses taken both within and outside of the department for psychology graduate students. Grades below that (i.e., C+ and below) indicate that the student has not mastered the relevant content of the course.

2. If a graduate student earns a grade lower than B- in a particular course, the student, instructor, and advisor will discuss the situation and circumstances and a remediation plan will be required. The student, his or her advisor, and the instructor, will work together to create a plan through which the student can (a) gain competence in the course material, and (b) demonstrate competence. The remediation plan might include, for example, requiring the student to complete additional assignments, retaking the class, taking a substitute class, completing an independent study, or pursuing other options. The remediation plan must be approved by the instructor, advisor and the program director.

3. A second occurrence of a grade lower than B- (for the same or different course) will put the student on academic probation. Once placed on academic probation, the student's record and any mitigating circumstances will be evaluated by a Psychology Department review board comprising the student's advisor, the program director, and the department associate chair (the department chair might be included in special circumstances). Additional remediation and intervention might be suggested by the review board.

4. If there is a third occurrence of a grade below B- (for the same or different course), the student will be dismissed from the program. The student may choose to appeal this decision, in which case the Chair of the Psychology Department will appoint a committee of three tenured Psychology Department faculty outside the student's program to hear the appeal. Depending on the student’s academic record and any mitigating circumstances, he/she may be allowed to complete his/her Master's degree but will not be permitted to continue onto the PhD (not applicable to terminal Department of Psychology MS degrees) without a successful appeal.

**Academic Probation**

Students are expected to maintain a minimum cumulative grade point average (GPA) of 3.20. If a student’s cumulative GPA falls below this minimum, the student will be put on academic probation and will have one quarter of coursework to raise their cumulative GPA to at least a 3.20 or face academic dismissal from the program. If the student raises his/her cumulative GPA to at least a 3.20, but it falls below the minimum a second time, he or she will be dismissed from the program before the next term begins.

**Academic Dismissal**

In addition to violations of satisfactory progress, including but not limited to, earning minimum grades, failing the comprehensive exam (including any possible retakes) or project, or maintaining a minimum cumulative GPA, students may be dismissed for breaches of academic honesty, or breaches of the code of student responsibility articulated in the DePaul University Student Handbook.

**Time Limitations**

Students must complete their MA degree requirements prior to completing their requirements for admission to doctoral candidacy. Further, no more than four years may pass between admission to the doctoral program (i.e., successful completion of the doctoral candidacy examination/project), and no less than eight months and no more than five years may pass between admission to candidacy and the final examination (i.e., the oral dissertation defense).

Students are required to meet the timelines specified by the program even if the timeline is more stringent than the College timeline. Failure to do so could result in dismissal.

Extensions on these timelines must be requested in writing to both the department (Program Director) and the college (to the Dean) and must be approved at both levels. Students must complete all requirements for the degree (which may include additional coursework, examinations, or other conditions) by the deadline outlined in the extension. Failure to meet specified time limitations or deadlines can result in dismissal from the program.

**Graduation Requirements**

Students need a minimum cumulative GPA of 3.20 in courses required by the program. In addition to meeting the minimum cumulative GPA requirement, failing the doctoral candidacy exam (or one retake) or project, lack of progress towards degree completion, and/or unsatisfactory evaluation could result in academic dismissal. See individual program policies for more details.

**Graduation with Distinction for MA**

The criteria for graduating "with distinction" are a minimum cumulative GPA of 3.75 and the recommendation of "with distinction" by the thesis committee.

For topics not listed above, please consult the Graduate Student Handbook of the Department of Psychology, your program manual or the Psychology Graduate Program Assistant.

**Community Psychology (MS)**

This program has been developed in response to needs expressed by community groups and organizations for assistance in addressing the needs of their most vulnerable members. The program prepares students to work at the master’s level in the field of Community Psychology in a variety of community, government and consulting work settings. Students will learn how a community-based social justice perspective recognizes inequalities and promotes the exercise of greater power (i.e., access to resources and decision-making) for communities that have
have been marginalized, and creates ties to advocacy work with oppressed populations. The program leads to an applied, terminal MS degree and is not designed as an intermediate step toward a doctoral degree. Students interested in pursuing a PhD should speak with their academic advisor about the best way to prepare for a doctoral program.

Student applications to the program are due no later than May 1st, although we do begin the application review and acceptance process in early April. Early application is encouraged. Admissions decisions are made by the faculty administering the program and are finalized by May 15th.

The application process will require prospective students to submit the following information:

- Undergraduate transcript
- GRE Scores – the General portion is required of all applicants
- 3 letters of recommendation
- Personal statement
- Psychology course history list
- List of community psychology-related volunteer or employment activities

Students applying to this program must have successfully completed a bachelor’s degree; either a BA or a BS. A minimum of six undergraduate psychology courses including a Statistics course and a Research Methods or an Experimental psychology course are required. Applicants who lack the necessary prerequisite courses will be required to successfully complete them, without graduate credit, before being admitted into the program. Students who do not have an undergraduate psychology major but who otherwise satisfy the requirements may apply.

The DePaul Psychology Department strongly encourages applications from students of underrepresented groups.

### Program Requirements

<table>

Students will be able to:

- Describe major community psychology theories in depth
- Design research studies to collect appropriate data, analyze and report the data
- Apply the ethical standards of psychology
- Demonstrate competence in written, oral, and interpersonal communication
- Demonstrate a high level of professional performance

Students must complete 48 quarter hours and maintain a cumulative GPA of at least 3.20.

### Program Graduate Academic Student Handbook

#### Minimum Grades

1. The minimum grade considered acceptable for a graduate course is a B-. This applies to courses taken both within and outside of the department for psychology graduate students. Grades below that (i.e., C+ and below) indicate that the student has not mastered the relevant content of the course.

2. If a graduate student earns a grade lower than B- in a particular course, the student, instructor, and advisor will discuss the situation and circumstances and a remediation plan will be required. The student, his or her advisor, and the instructor, will work together to create a plan through which the student can (a) gain competence in the course material, and (b) demonstrate that competence. The remediation plan might include, for example, requiring the student to complete additional assignments, retaking the class, taking a substitute class, completing an independent study, or pursuing other options. The remediation plan must be approved by the instructor, advisor and the program director.
3. A second occurrence of a grade lower than a B- (for the same or different course) will put the student on academic probation. Once placed on academic probation, the student's record and any mitigating circumstances will be evaluated by a Psychology Department review board comprising the student's advisor, the program director, and the department associate chair (the department chair might be included in special circumstances). Additional remediation and intervention might be suggested by the review board.

4. If there is a third occurrence of a grade below B- (for the same or different course), the student will be dismissed from the program. The student may choose to appeal this decision, in which case the Chair of the Psychology Department will appoint a committee of three tenured Psychology Department faculty outside the student's program to hear the appeal. Depending on the student's academic record and any mitigating circumstances, he/she may be allowed to complete his/her Master’s degree but will not be permitted to continue onto the PhD (not applicable to terminal Department of Psychology MS degrees) without a successful appeal.

**Academic Probation**

Students are expected to maintain a minimum cumulative grade point average (GPA) of 3.00. If a student's cumulative GPA falls below this minimum, the student will be put on academic probation and will have one quarter of coursework to raise it up to the minimum.

**Academic Dismissal**

If the student does not raise their cumulative GPA to at least 3.00 after one quarter of coursework while on academic probation, the student will be academically dismissed from the program. If the student's cumulative GPA falls below the minimum a second time, they will be academically dismissed from the program without a second academic probationary period.

**Graduation Requirements**

Students need a minimum cumulative GPA of 3.20 in courses required by the program. In addition to meeting the minimum cumulative GPA requirement, lack of progress towards degree completion, and/or unsatisfactory evaluation could result in dismissal. See individual program policies for more details.

**Graduation with Distinction for MS**

The criteria for graduating "with distinction" are a minimum cumulative GPA of 3.75 and the recommendation of "with distinction" by the thesis committee.

**Time Limitation**

Students must complete their degree requirements within a five-year period from the first registration date for a course in the program.

**Community Service Studies (Minor)**

The Community Service Studies (CSS) Minor is a multidisciplinary program that provides a framework for understanding and engaging in critical social issues at the level of community. While the notion of community is increasingly complex, the program explores the nuances of community as defined through the lens of groups with common affiliation, identity, or grievance that may be geographically or non-geographically based. The curriculum relies heavily on community-based service learning courses and is designed to provide students with a foundation of analytical, reflective, interpersonal, and leadership skills. Through supporting university partnerships with Chicago-area community-based organizations, students gain a local perspective on social justice issues, including those built on race, class, and gender inequalities and other forms of social, economic and political exclusion.

The practice of service is often shaped by particular economic and cultural circumstances related to power, privilege, and identity. A central component of CSS is the importance of viewing communities through an asset lens and thus working to support existing community strengths rather than responding to needs. Students minoring in CSS therefore develop strong critical self-reflection skills that guide them as future leaders in making ethical and socially responsible decisions.

**Study Abroad Courses**

Several Study Abroad experiences may be used to fulfill one or more course requirements for the Minor. Approval of these trips for the Minor must be obtained in consultation with the Director.

**Comparative Literature (Minor)**

The Comparative Literature minor enables students to study the history, theory, and criticism of literature across national, linguistic, and disciplinary boundaries. It is designed for students who combine the drive and the ability to master foreign languages with a strong commitment to theoretical and interdisciplinary approaches to literature. Students must do a substantial portion of their work in at least one foreign language. Although students will take many of their courses in the departments of their elected literary fields, the program in comparative literature is distinguished from national literature departments by its comparative scope and by the requirement of seminars that focus on fundamental theoretical questions regarding the nature of literature and literary inquiry. The requirements for the minor are designed to allow each student to
follow a course of study that combines intellectual rigor with the pursuit of personal interests.

Select one of the following two five-course options: 20

Option One: Five Comparative Literature courses

Option Two: Four Comparative Literature courses

One 300-level literature course from the Department of Modern Languages in a language other than English (not an "E" course)

**Composition (BM)**

The Bachelor of Music degree in composition is comprised of a comprehensive range of courses including analysis, orchestration, counterpoint, compositional procedures and contemporary musical styles. Throughout their studies, students work with a faculty of distinguished composers and participate in master classes with well-known guest composers. Student compositions may be performed at quarterly Composers Forums, and seniors may have a composition read through and recorded by Ensemble 20+, the School's student new music ensemble.

**Learning Outcomes**

Students will be able to:

- Perform solo and ensemble works with appropriate techniques and musicality.
- Identify and analyze the elements of music in a given piece, including an understanding of its compositional processes, aesthetic properties, and artistic, social, and historical contexts for works in the Western music tradition, Contemporary periods, Jazz, and World Music Cultures.
- Demonstrate an appropriate level of aural, keyboard, and conducting skills.
- Compose consistently, developing a compositional voice that reflects awareness of prevalent musical styles of the 20th and 21st centuries and that shows a fundamental knowledge of instrumentation.
- Analyze appropriately music of the common practice period as well as the 20th and 21st centuries.
- Identify and demonstrate essential techniques of creating electroacoustic music.
- Effectively employ contrapuntal composition techniques of previous centuries.

**Music Core Requirements**

**Course Requirements**

</tbody>
</table>

3 Students in the BM-Jazz Studies program are not required to take MUS 321 or MUS 322.

**Applied Music**
Students may enroll in a maximum of 3 credits of applied study per quarter, with a maximum of 36 credits total. The requirements for applied study vary by degree program:

- BM in performance, 36 credits
- BM in jazz studies, 32 credits
- BM in composition, 12 credits
- BM in music education, 18 credits
- BM in performing arts management, 18 credits
- BA in music, 12 credits
- BS in sound recording technology, performance track, 9 credits

The BS in Performing Arts Management degree does not require applied lessons, and the BS in Sound Recording Technology, non-performance track, degree does not require applied lessons.

Except performance majors, students may enroll in additional applied credits, which will count towards music electives.

**Modern Language Option**

If a music student wishes to study a modern language for a three-course sequence (12 credits) beyond their degree program's requirement, the three MLO substitutions must be made in three different Liberal Studies learning domains. Any substitutions must be consistent with the principle that students complete at least one course in each learning domain. In the Scientific Inquiry domain, the only MLO substitution allowed is for Scientific Inquiry-Elective. Additional language credits may be applied toward non-music electives or free electives.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

¹ Students must earn a C- or better in this course.
² Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam.

**Learning Domains**

- **Arts and Literature (AL)** (p. 1300)
  - 2 Courses Required
- **Historical Inquiry (HI)** (p. 1304)
  - 2 Courses Required
- **Math and Computing (MC)** (p. 1306)
  - Not Required
- **Philosophical Inquiry (PI)** (p. 1307)
  - 1 Course Required
- **Religious Dimensions (RD)** (p. 1308)
  - 1 Course Required
- **Scientific Inquiry (SI)** (p. 1310)
  - 1 SWK Course or 1 Lab Course Required
- **Social, Cultural, and Behavioral Inquiry (SCBI)** (p. 1312)
  - 1 Course Required

**Notes**

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Major Requirements**

**Program Checkpoints**

Students are admitted to a specialization at their initial enrollment. Students are then allowed to continue in specialization courses on the basis of program checkpoints. The program checkpoints differ for each specialization, and students should contact the department chairs or program directors/coordinators for more information. Students are not permitted to continue to enroll in specialization classes if they have not met the requirements of their program checkpoints.

**Course Requirements**

Students are required to complete the following courses for a specialization in Composition:

Composition (MM)

The Master of Music in composition program offers students one-on-one instruction with DePaul’s distinguished faculty of active composers, as well as seminars with guest composers and performers from Chicago and across the country. Graduate composition majors have their compositions performed at DePaul Composers Forum, a quarterly student composition concert, and second-year students may have a composition read through and recorded by the DePaul Chamber Orchestra. Graduate student compositions may also be performed by other DePaul ensembles, including Ensemble 20+, the Contemporary Music Ensemble. DePaul also offers two assistantships to graduate composition students. The Master of Music in composition is a two-year program.

Program Requirements
Degree Requirements 48
Total hours required 48

Learning Outcomes

Core Outcomes
Students will be able to:

• Demonstrate basic music research techniques and apply knowledge of standard reference tools and bibliographic sources to the writing of a variety of professional and academic music texts.

• Develop an expanded global, historical, and cultural understanding of music through the in-depth study of musical elements, compositional processes, and aesthetic properties.

Program Specific Outcomes
Students will be able to:

• Compose consistently throughout the two years of the degree program, and successfully produce performances of works.

• Develop an individual compositional voice or style that reflects an awareness of prevalent musical styles and techniques of the 20th and 21st centuries and have a knowledge of works of the last 100 years that are an important part of the development of new sonorities and techniques.

• Analyze music of the common practice period as well as music of the 20th and 21st centuries.

Degree Requirements
Course Requirements

A minimum of 48 quarter hours of graduate credit is required for the Master of Music degree. This total is divided between the basic studies required of all master’s degree students and courses in the specialization.

Music Core Requirements (16 Credits)
Course Title Quarter Hours
COM 405 ANALYTICAL STUDIES 4
MUS 400 MUSIC RESEARCH 4

Music History: Select two of the following:
JZZ 405 JAZZ HISTORY 8
MUS 420 HISTORY OF THE ORATORIO

MUS 487 20TH CENTURY MUSIC BEFORE WWII

Composition Specialization Requirements (28 Credits)
Course Title Quarter Hours
COM 415 COMPOSITION 2
12 credits of composition lessons (2 credits in each quarter): 12
COM 447 NON-WESTERN SOUND AND CONCEPT IN CONTEMPORARY MUSIC 4
COM 445 TWENTIETH CENTURY MUSIC TOPICS 4
COM 416 COMPUTER ASSISTED COMPOSITION 4
COM 446 NEW MUSIC COMPOSITION SEMINAR 4

Music Electives (4 Credits)
• Students may choose from any 400 level course offered by the School of Music, except for additional applied lessons.

Terminal Requirements

Two terminal requirements are required of all students:

• A written comprehensive examination, in which the students must demonstrate a satisfactory knowledge of their major field of study. The comprehensive examination may be taken at any time after 32 quarter hours of graduate credit have been earned.

• The completion of an original work.

While preparation of the terminal requirement in the major may take place within some course or activity for which a student is registered for credit, additional academic credit is not granted for the project itself.
Residency Requirements
All courses for the master's degree must be taken at DePaul University. Graduate credit for courses completed at other institutions may not be applied toward the degree.

A full-time graduate student must be registered for a minimum of six quarter hours in any term. All requirements for the degree must be completed within six calendar years from the time a student is first enrolled. For students removing deficiencies, this period will begin when all deficiencies are removed and admission to the master's degree program has been granted.

Computational Finance (MS) (College of Business)
The Master of Science in Computational Finance provides students the ability to understand existing financial models in a quantitative and mathematical way. Graduates will be able to apply these quantitative tools to solve complex problems in the areas of portfolio management, risk management and financial engineering. Offered as a joint degree of the College of Computing and Digital Media and the Kellstadt Graduate School of Business, the program is designed to meet the industry-wide need for financial professionals with exceptional programming skills, as well as in-depth understanding of financial concepts and business language.

Program Features
Taught by faculty members with both industry and academic expertise, this degree will help you to develop skills to:

• Build a trading engine.
• Implement financial concepts into computer programs.
• Develop and use numerical algorithms and analytical techniques.
• Explore pricing of derivative securities.
• Understand and analyze simulation of financial systems.

STEM Designation
DePaul’s Master of Science in Computational Finance is a Department of Homeland Security STEM-designated program. STEM designation is granted to programs that produce graduates educated in science, technology, engineering and/or math who help support U.S. economic competitiveness and growth. International students who earn degrees from STEM-designated programs may qualify to extend their post-graduation stay in the United States for Optional Practical Training (https://studyinthestates.dhs.gov/stem-opt-hub/) (OPT). OPT provides an opportunity for international students to develop their careers while also helping meet the demand for STEM-educated professionals in the U.S. workforce. To find out more, contact the Kellstadt Graduate School of Business at kgsb@depaul.edu or (312) 362-8810.

Learning Outcomes
Students will be able to:

• Analyze and simulate time series data using a stochastic process.
• Implement a portfolio optimization algorithm based on Modern Portfolio Theory.
• Demonstrate an in-depth knowledge of:
  • Bond Valuation Models.
  • Stock Valuation Models.
  • Options Valuation Models.

Degree Requirements
Course Requirements
The Master of Science in Computational Finance is a joint degree with the College of Computing and Digital Media, CDM. The degree is structured to develop financial management knowledge and proficiency. The GMAT test is required for admission for students admitted via the College of Business. Students admitted via the College of Computing and Digital Media may submit either GMAT or GRE test results. The TOEFL test is required for international students. Calculus I and Calculus II with at least a B- average. Business Calculus is not sufficient for the Calculus requirement.

Students complete the degree by taking 13 required courses; 7 from KGSB and 5 from CDM and 1 elective.

Introductory Courses

Computational Finance (MS) (College of Computing and Digital Media)

The MS in Computational Finance is a joint degree between CDM and the Kellstadt Graduate School of Business, offering students the skills to approach financial models through a quantitative framework. The program prepares students for careers in the field of quantitative financial analysis in areas including portfolio management, risk management, and financial engineering.

Learning Outcomes

Students will be able to:
- Analyze and simulate time series data using a stochastic process.
- Implement a portfolio optimization algorithm based on Modern Portfolio Theory.
- Demonstrate an in-depth knowledge of:
  - Bond Valuation Models.
  - Stock Valuation Models.
  - Options Valuation Models.

Degree Requirements

Course Requirements

No Introductory course may be substituted for any other course at any level.

Introductory Courses

Introductory courses may be waived for any of the following conditions:
- The student has the appropriate course work to satisfy an Introductory Course.
- The student has appropriate and verified professional experience to satisfy an Introductory Course.
- If an exam is available, the student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

Major Elective Course (1 Course)

Students must take one 500-level course in CDM, Kellstadt, or the Department of Mathematics.

Major Elective Courses

Students must take one 500-level course in CDM, Kellstadt, or the Department of Mathematics.

Degree Requirements

1. Satisfactory completion of the college residency requirement.
2. Satisfactory completion of the 13 required and elective courses.
3. All courses for credit toward the degree must be completed within six calendar years after the candidate's first term of enrollment in the Kellstadt Graduate School of Business. After a lapse of six years a course is expired. An expired course is not acceptable for the purpose of satisfaction of degree requirements and is not applicable to the degree without the written approval of the director of the program or the Kellstadt Graduate School of Business.
Degree Requirements

Students in this degree program must meet the following requirements:

- Complete a minimum of 52 graduate credit hours in addition to any required introductory courses of the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of B- or better in each introductory course of the designated degree program.
- Earn a grade of C- or better in all courses beyond the introductory courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
- Students pursuing a second master’s degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.

For DePaul’s policy on repeat graduate courses and a complete list of academic policies, see the DePaul Graduate Handbook.

Computational Physics (Minor)

The Computational Physics minor provides a hands-on curriculum in computational and experimental physics with an emphasis on applications in modern, applied physics.

Course Requirements

<table>
<thead>

</tbody>
</table>

Physics majors cannot earn a minor in Computational Physics.

Computer and Information Sciences (PhD)

The PhD in Computer and Information Sciences offers an opportunity for exceptional students to pursue substantial research in the computer sciences and related areas. To earn a PhD degree, a student must demonstrate breadth of knowledge in at least two (2) research areas and significant depth in a chosen dissertation area. In addition, the student must conceive, write, and defend a PhD dissertation representing a significant and original contribution to current academic research as demonstrated by a public dissertation defense and publication in established peer-reviewed academic conferences and/or journals.

There are two (2) tracks within the PhD Program: the Computing track (C-track) and the Information Systems and HCI track (I-track). Students pursuing PhD topics in typical computer science areas such as algorithms, artificial intelligence, databases, data mining, programming languages, software engineering, etc. follow the Computing track. The Information Systems and HCI track is for students whose topics fall under the category of Information Systems or Human-Computer Interaction. Students must choose whether to enter the Computing or Information Systems track at admission.

<table>
<thead>
<tr>
<th>Program Requirements</th>
<th>Quarter Hours</th>

</thead>
<tbody>
<tr>
<td>Degree requirements for students entering with relevant master's degree</td>
<td>minimum 60 hours</td>
</tr>
<tr>
<td>Degree requirements for conditionally admitted students (students without a relevant master's degree)</td>
<td>minimum 100 hours</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

- Propose a research problem and novel solutions that make significant and unique contributions to advance knowledge.
- Select and apply appropriate research methods and experimental designs within the selected research area.
- Demonstrate knowledge of core concepts, theories, and seminal work in the general field of Computer Science (Computing Track) or Information Systems (Information Systems and HCI Track).
- Communicate research results in academic publications including a clear motivation and problem statement, a rigorous survey of related work, a clear explanation and analysis of work performed, and a summary of the novel research contributions.
- Orally communicate complex and novel research concepts.
- Describe the ethical issues of conducting and publishing research using human subjects.
- Evaluate the novelty, correctness, and rigor of research papers describing research in areas related to the selected research.

Degree Requirements

Course Requirements

Most of the courses that PhD students will take will be geared toward preparing the student for the Breadth exams, and for whatever other preparation the advisor deems necessary. There are some specific requirements for courses, as specified below.

Number of Credits

Students must take at least 60 credits in the CDM 420 - CDM 699 range, including at least 12 credits of CSC 699 (or equivalent as approved by advisor). Non-CDM courses may be substituted with permission of the advisor.

CSC 426

Students must take CSC 426 in their first two years.
CSC 500
Students must take at least two quarters (4 credits) of CSC 500 in their first two years.

Other Requirements for Conditionally Admitted Students
Students who do not have a master’s degree are considered "conditionally admitted" students. These students must complete an additional 40 credits (typically 10 courses) of graduate coursework, including 36 credits (9 courses) of CDM courses in the range of 420 - 598. No courses under CSC 420 shall count toward the PhD degree. Non-CDM courses may be substituted with permission of the advisor.

Grade Requirements
Students must maintain a grade point average of 3.5 or better to remain in good standing in the program. Any course grade below B- is unsatisfactory and will not be counted toward degree requirements.

Continuous Enrollment
Students must remain continuously enrolled in CSC 701 (Full Time, 0 credits) or CSC 702 (Part Time, 0 credits) in Fall, Winter, and Spring quarters if they are not taking any other courses. CSC 701 is for students who are working on their doctoral work on a full-time basis during that quarter. CSC 702 is for those students working on their doctoral work on a part-time basis (e.g., if they also hold a full-time job).

Exams
Breadth Exams
Students must pass two Breadth Exams. Exams are administered in the second week of the Spring and Fall Quarters. Registration for the exams are due 30 days prior. If an exam is unsuccessful, the student is required to retake the Breadth Exam in that same area. Students may attempt a Breadth Exam twice. If a student fails a Breadth Exam twice, he or she will be dismissed from the program.

In consultation with their advisor, students in the Computing track can choose two exams from among the following.

- Artificial Intelligence
- Automata Complexity and Computability
- Data Analysis & Data Mining
- Databases
- Human-Computer Interaction
- Networking
- Programming Languages & Compilers
- Software Engineering
- Systems

In consultation with their advisor, students in the Information Systems and HCI track can choose two exams. One of the breadth exams must be selected from the following topic areas. The second breadth exam can be either one of the I-track exams listed below or a C-track exam from the previous list.

- IS Analysis and Design
- IT Project Management
- Information Security and Compliance
- IT Policy, Strategy, and Management
- E-Commerce Technology
- Human-Computer Interaction

Depth
Students must complete a Depth examination in the chosen area of research. The Depth Exam must be completed before the Proposal Defense.

For the C-track, the specifics of the depth examination will be determined by the student’s Dissertation Committee, who must all agree on the format of the exam and whether it was successfully completed.

The I-track Depth Exam is a take-home exam administered by the student’s advisor. This exam covers research methodology and essential data analysis techniques. A common reading list is established by the I-track faculty for this exam.

The Dissertation
After the exams have been passed, the student must propose a significant original research project and successfully defend that proposal to the student’s Dissertation Committee. Once the research has been completed, the student must hold a public defense to demonstrate to the Dissertation Committee that the work has been completed satisfactorily.

Time Limits
Full-Time Students
- Year 1: (a) Pass at least 1 breadth exam or (b) show concrete evidence of initial research, such as a literature review, technical report, poster presentation at a conference, etc.
- Year 2: (a) Pass both breadth exams and (b) show evidence of continuing research, such as publication or conference presentation.
- Years 3 to 5: Continue to demonstrate progress in research; submit additional publication(s) to reputable journals or conferences; and pass Proposal Defense.
- No less than six months and no more than three years between Proposal Defense and the Dissertation Defense.

Part-Time Students
- No more than three years between enrollment in the doctoral program and completion of Breadth Examinations.
- No more than five years between completion of Breadth Examinations and Proposal Defense.
- No less than eight months and no more than five years between Proposal Defense and Dissertation Defense.

Computer Science (BS)
The BS in Computer Science provides essential training in the foundations of computing, data storage and information processing. With this foundation, graduates of the program can easily adapt to and create new information technologies, new computing paradigms, and new ideas for applying computer systems.

The BS in Computer Science can be completed online by transfer students if they meet the following requirements:

- Have a minimum of 45 quarter/30 semester hours of transfer credit
- Completed one (1) semester of Java or C++
- Have a minimum cumulative 2.0 GPA
- Be in good standing at the last school they attended
Autumn 2021-2022 267

Note - The lab science requirement, English Composition I (WRD 103), and the pre-calculus prerequisite (MAT 130) for the Discrete Mathematics I (MAT 140) and Data Analysis (IT 223) requirements are not available online at DePaul and will need to be completed on campus or transferred in from another institution.

For more information on this option and a sample schedule please see www.cdm.depaul.edu (http://www.cdm.depaul.edu).

Students can choose to study within one of two concentrations in the BS in Computer Science program:

• Software Development
• Game Systems

Program Requirements  Quarter Hours
Liberal Studies Requirements  76
Major and Concentration Requirements  96
Open Electives  20
Total hours required  192

Learning Outcomes

Students will be able to:

• Model a computational problem, select appropriate algorithms and data structures for a solution, justify the correctness of the algorithm, and implement an application solving the problem.
• Analyze the efficiency of a computational solution mathematically and validate the analysis experimentally.
• Analyze and select an algorithm based on system effects.
• Criticize a program on the basis of its maintainability and suggest improvements.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Religious Dimensions (RD) (p. 1308)
• 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
• 1 Lab Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
• 3 Courses Required

Note

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

Course Requirements
Course  Title  Quarter Hours
CSC 241  INTRODUCTION TO COMPUTER SCIENCE I  4
CSC 242  INTRODUCTION TO COMPUTER SCIENCE II  4
CSC 300  DATA STRUCTURES I  4
CSC 301  DATA STRUCTURES II  4
CSC 321  DESIGN AND ANALYSIS OF ALGORITHMS  4
CSC 347  CONCEPTS OF PROGRAMMING LANGUAGES  4
CSC 373  COMPUTER SYSTEMS I  4
CSC 374  COMPUTER SYSTEMS II  4
MAT 140  DISCRETE MATHEMATICS I  4
MAT 141  DISCRETE MATHEMATICS II  4
WRD 204  TECHNICAL WRITING  4

Note: Students may take CSC 243 and one (1) Additional Major Elective in lieu of CSC 241 and CSC 242.

Concentration Requirements
Students must also complete the requirements from Software Development or Game Systems concentrations.

Degree Requirements
Students in this degree must meet the following requirements:

- Complete a minimum of 192 credit hours (generally 48 courses)
- Earn a grade of C- or higher in WRD 103, WRD 104, and all Major and Minor courses
- Earn a grade of D or higher in all other Liberal Studies and Open Elective courses
- Maintain a cumulative GPA of 2.0 or higher

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

- Game Systems Concentration, Computer Science (BS) (p. 269)
- Software Development Concentration, Computer Science (BS) (p. 269)

Computer Science (BS), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s/Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

Students who meet the admission requirements below may choose to apply to a combined degree program. Interested students should consult their faculty advisor regarding the application procedure. This program allows students to combine many CDM bachelor’s degrees with a CDM master’s degree following the structure outlined below.

Admission Criteria

- Minimum of 44 quarter hours earned
- Minimum of 12 quarter hours earned at DePaul
- GPA of 3.3 or higher in courses taken at DePaul
- Full admission to the designated master’s program requires meeting admission requirements (https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx) for that program
- Faculty endorsement from a CDM full-time faculty member

Students should discuss their interest in a CDM combined degree program with a CDM faculty advisor. Before admission to the degree, students should work with the faculty advisor to identify a course plan for the combined degree program, including the list of courses to take and how the courses will be applied toward both the undergraduate and graduate degrees. Non-CDM students can email the CDM advising office (advising@cdm.depaul.edu) if interested in a combined degree with a CDM master’s degree.

If you are currently a CDM student and interested in combining your CDM bachelor’s degree with a non-CDM graduate degree, please contact the respective college for admission and application procedures.

Students enrolled in the Bachelor of Arts in Computing or the Bachelor of Arts in Professional Studies with a major in Computing (https://www.cdm.depaul.edu/academics/Pages/BA-Computing.aspx) joint degree programs between CDM and the School of Continuing and Professional Studies are eligible for this program. Interested students who meet the admission criteria for a combined degree should contact SCPS Academic Services (scpsadvising@depaul.edu) for more information. Advanced programs (e.g., JD/MS, MFA, and PhD) are not eligible for the combined degree program.

Program Structure

Students in the combined degree program take a maximum of three (3) graduate level courses that count toward both their bachelor’s and master’s degree requirements. Students may enroll in graduate level coursework in the junior and senior year only. Students in the combined degree program will receive the bachelor’s degree after meeting all graduation requirements including the minimum credit hours required for graduation.

To earn the master’s degree, the student must earn as many additional graduate credit hours as needed to reach the minimum number of graduate credit hours required in that master’s degree.

Only CDM courses can be taken as part of this program. Advanced programs (e.g., JD/MS, MFA, and PhD) are not eligible for the combined degree program.

Maintaining Good Standing

Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter.

The student and faculty advisor will be notified when the student’s cumulative GPA falls below 3.3 or when the students receives less than a C- in graduate level course.

If a student’s cumulative GPA falls below 3.3, the student must earn a term GPA of 3.3 or above in the following quarter to stay in good standing. If the student does not achieve a 3.3 term GPA, then the student will be dismissed from the combined program and resume the traditional B.A./B.S./B.F.A.

If dismissed from the combined degree program after graduate courses have been passed, the graduate courses may only apply to the undergraduate degree. Should the student later be admitted to a graduate program, graduate courses applied to the undergraduate degree may not apply to the graduate program and may not be repeated if they are required in the declared graduate curriculum. Other graduate courses may be substituted in this case.
Designing a Course of Study

It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the Combined Degree Program.

This course of study should include the graduate courses to be taken and the undergraduate courses that are replaced by the graduate courses. Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

It is advisable for the student and the faculty advisor to enter the proposed plan of study in the student communication record in BlueStar so it is available to the student and CDM faculty and staff.

Registering for Master's Degree Courses

Combined degree students must meet regularly with their faculty advisor. The faculty advisor will initiate the registration process for all graduate level courses taken during the undergraduate career.

Bachelor's Degree to Master's Degree Transition

In order to be fully admitted to the designated master's program, the student must meet all admission requirements for that program. When preparing to complete the undergraduate portion of the combined degree, students must submit the application for degree conferral for the undergraduate degree by the application deadline. At this time, the students should contact the CDM Academic Success Center about the procedure required to be formally admitted to the declared graduate program.

Major Electives

Major Electives may be selected from 300-level CSC, CSE, SE, or GAM courses or from the list of courses below:

Open Electives

Open Elective Credit Hours are required to meet the minimum graduation requirements of 192 hours. Open Electives may be taken from any unit at DePaul.

See [www.cdm.depaul.edu](http://www.cdm.depaul.edu) to see sample schedule of course requirements on a year-by-year basis.

Capstone

One of the following two-course options is required:

- GAM 394 and GAM 395
- or CSC 394 and one (1) additional major elective

Computer Science (MS)

The MS in Computer Science exposes students to the complete life-cycle of computer application development including abstraction, modeling and algorithm development, leveraging computer systems, programming languages and development frameworks, and software development techniques and processes. It prepares students for a professional career in Software Development or Computer Science Research.

Program Requirements

Learning Outcomes

Students will be able to:

- Model a computational problem, select appropriate algorithms and data structures for a solution, justify the correctness of the algorithm, and implement an application solving the problem.
- Demonstrate proficiency with fundamental concepts in algorithms, programming languages, software engineering, distributed systems, and databases.
- Demonstrate an in-depth knowledge in at least one area of Computer Science.
- Demonstrate the ability to independently learn and master new software development paradigms, algorithms, APIs, and programming languages.

Degree Requirements

Course Requirements

No Introductory Course may be substituted for any other course at any level.

Introductory Courses

Introductory courses may be waived for any of the following conditions:

- The student has the appropriate course work to satisfy an Introductory Course.
- The student has appropriate and verified professional experience to satisfy an Introductory Course.

- If an exam is available, the student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

Major Electives

Thirty-two credit hours of Major Electives are required. Graduates of the MS in Computer Science program must be proficient in at least one broad area of Computer Science listed below. For this reason students will take the remaining thirty-two credit hours as follows:

- Sixteen credit hours (typically taken as four 4-credit courses) from one area
- Sixteen credit hours (typically taken as four 4-credit courses) from any area, including the option to take the SE Studio Capstone, the 2-course GAM studio sequence, the 1-course CS capstone, the Research Colloquium course, or write an MS Thesis, or develop an MS Research Project.

The courses in each area are listed below. The Independent Study courses (CSC 695) may be taken for up to 8 credits and at most 4 credit hours of CSC 695 can count towards the chosen area.

As part of their electives, students have the option of signing up for the Research Colloquium, or completing a Research Project, or writing a Master’s Thesis, or participating in a Graduate Internship.

Research Colloquium

The research colloquium consists of weekly talks by a variety of speakers including faculty, students, and guests from the academic and business communities. The lectures feature new creative and scholarly work that encompasses the disciplines and areas of interest of the School of Computing. Students interested in attending the colloquium and receiving credit should sign up for the CSC 500 course (NOTE: this course carries only 2 credits; it may be taken twice for credit.) Student evaluation is based on attendance as well as an online journal with reflections on each of the presentations. The educational objectives are to expose students to creative and scholarly research at DePaul and elsewhere, and to engage students in the thought process of identifying and solving challenging research problems.

Master’s Research

Students interested in a more in-depth study of a particular area can choose to work with a faculty member (not necessarily their academic advisor) on an independent study or research project. The work involved may include system development, empirical studies, or theoretical work. The student will register for up to 4 credit hours of CSC 695. 4 credit hours of CSC 695 replaces one 500 level major elective course in the MS in Computer Science program. CSC 695 can be taken multiple times for up to 8 credit hours. Students must successfully complete the Foundation courses prior to their first enrollment in CSC 695. Students interested in the Master’s Thesis option will typically take 8 credits of CSC 695.

Master’s Thesis

A student who has made an original contribution to the area (typically, through work done by CSC 695) may choose to complete a Master’s Thesis. The student and the student’s research advisor should form a Master’s Thesis Committee of 3 faculty. The student will need to submit to the committee a thesis detailing the results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for the 0 credit course CSC 698 and the transcript will show the thesis title as the course topic.

Graduate Internship

In cooperation with local employers, the graduate program offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Students may take CSC 697 for up to four credits. Admission to the internship program requires consent of the instructor and a student services advisor. International students may complete curricular practical training (CPT) through this class provided they first obtain CPT authorization from International Student and Scholar Services (ISS) before beginning the internship.

Degree Requirements

Students in this degree program must meet the following requirements:

- Complete a minimum of 52 graduate credit hours in addition to any required introductory courses of the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
- Students pursuing a second master’s degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.

For DePaul’s policy on repeat graduate courses and a complete list of academic policies see the DePaul Graduate Handbook.

Computer Science (MS), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

DePaul Undergraduate Degree + Computer Science (MS)

The Computer Science (MS) combined degree program is open to all undergraduate majors across the university.
Students who are interested in this program and meet the following criteria:

- Sophomore status (at least 44 quarter hours earned)
- Minimum of 12 quarter hours earned at DePaul
- GPA of 3.3 or higher in courses taken at DePaul
- Full admission to the designated master's program requires meeting admission requirements ([https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx](https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx)) for that program
- Faculty endorsement from a CDM full-time faculty member

Students should discuss their interest in this combined degree program with a CDM Computer Science faculty advisor prior to submitting the application for admission.

If accepted, a student can take up to three graduate courses (12 credits). These three courses count towards both the bachelor's program and the Master of Science degree. Students will pay the current undergraduate tuition rate for these three courses.

**Maintaining Good Standing**

- Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter
- The student and Faculty Advisor will be notified when the student’s cumulative GPA falls below 3.3 or when the student receives less than a C- in graduate level course
- If a student’s cumulative GPA falls below 3.3, the student must earn a term GPA of 3.3 or above in the following quarter to stay in good standing. If the student does not achieve a 3.3 term GPA, then the student will be dismissed from the combined program and resume the traditional BA/BS.
- Graduate courses passed before dismissal will not be counted and may not be retaken. If the student pursues graduate study, other graduate courses must be substituted. To apply to a CDM graduate degree program, following dismissal from the combined degree, students must follow regular CDM Admission procedures, and will be required take 13 new graduate courses to earn a master’s degree.

**Designing a Course of Study**

It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the Combined Degree Program.

This course of study may include which undergraduate classes to avoid taking in order to take the graduate version. Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

**Registering for Master’s Degree Courses**

The student’s advisor must complete the BS/MS Request form, under the Faculty tab on the CDM Intranet, to request the student’s enrollment in the three graduate courses. The form will require the following data: student’s full name, graduate course and section, and the undergraduate course to be substituted for. The CDM dean’s office will process the enrollment.

---

**Bachelor's Degree to Master's Degree Transition**

In order to be fully admitted to the designated master's program, the student must meet all admission requirements for that program. Learn more about master's degree admission requirements ([http://www.cdm.depaul.edu/Prospective%20Students/Pages/MastersDegreeStudents.aspx](http://www.cdm.depaul.edu/Prospective%20Students/Pages/MastersDegreeStudents.aspx)). Students will follow the master's degree program requirements for the term they are admitted to the master’s degree program.

**Double Demon Scholarship**

The Double Demon scholarship, offered exclusively to DePaul alumni, covers 25 percent of the tuition for a master's degree or select certificate programs. Combined degree program students are eligible.

Alumni from any of DePaul's colleges who are admitted into a graduate degree program from one of these programs automatically qualify for the Double Demon Scholarship. This scholarship is available for new part-time or full-time students who began a master's degree in CDM in winter 2012-2013 or later and the other colleges beginning in winter 2013-2014. It cannot be applied retroactively.

There is no limit to the amount of courses that can be taken by eligible students. However, students may not take more than four courses in any quarter without permission from the college. The scholarship cannot be applied to cover fees or other non-tuition costs.

</table>

**Learning Outcomes**

Students will be able to:

- Model a computational problem, select appropriate algorithms and data structures for a solution, justify the correctness of the algorithm, and implement an application solving the problem.
- Demonstrate proficiency with fundamental concepts in algorithms, programming languages, software engineering, distributed systems, and databases.
- Demonstrate an in-depth knowledge in at least one area of Computer Science.
- Demonstrate the ability to independently learn and master new software development paradigms, algorithms, APIs, and programming languages.

**Degree Requirements**

**Course Requirements**

No Introductory Course may be substituted for any other course at any level.

**Introductory Courses**

Introductory courses may be waived for any of the following conditions:
• The student has the appropriate course work to satisfy an Introductory Course.
• The student has appropriate and verified professional experience to satisfy an Introductory Course.
• If an exam is available, the student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

Major Electives

Thirty-two credit hours of Major Electives are required. Graduates of the MS in Computer Science program must be proficient in at least one broad area of Computer Science listed below. For this reason students will take the remaining thirty-two credit hours as follows:

• Sixteen credit hours (typically taken as four 4-credit courses) from one area
• Sixteen credit hours (typically taken as four 4-credit courses) from any area, including the option to take the SE Studio Capstone, the 2-course GAM studio sequence, the 1-course CS capstone, the Research Colloquium course, or write an MS Thesis, or develop an MS Research Project.

The courses in each area are listed below. The Independent Study courses (CSC 695) may be taken for up to 8 credits and at most 4 credit hours of CSC 695 can count towards the chosen area.

</table>
As part of their electives, students have the option of signing up for the Research Colloquium, or completing a Research Project, or writing a Master's Thesis, or participating in a Graduate Internship.

**Research Colloquium**

The research colloquium consists of weekly talks by a variety of speakers including faculty, students, and guests from the academic and business communities. The lectures feature new creative and scholarly work that encompasses the disciplines and areas of interest of the School of Computing. Students interested in attending the colloquium and receiving credit should sign up for the CSC 500 course (NOTE: this course carries only 2 credits; it may be taken twice for credit.) Student evaluation is
based on attendance as well as an online journal with reflections on each of the presentations. The educational objectives are to expose students to creative and scholarly research at DePaul and elsewhere, and to engage students in the thought process of identifying and solving challenging research problems.

**Master’s Research**

Students interested in a more in-depth study of a particular area can choose to work with a faculty member (not necessarily their academic advisor) on an independent study or research project. The work involved may include system development, empirical studies, or theoretical work. The student will register for up to 4 credit hours of CSC 695. 4 credit hours of CSC 695 replaces one 500 level major elective course in the MS in Computer Science program. CSC 695 can be taken multiple times for up to 8 credit hours. Students must successfully complete the Foundation courses prior to their first enrollment in CSC 695. Students interested in the Master's Thesis option will typically take 8 credits of CSC 695.

**Master’s Thesis**

A student who has made an original contribution to the area (typically, through work done by CSC 695) may choose to complete a Master’s Thesis. The student and the student's research advisor should form a Master’s Thesis Committee of 3 faculty. The student will need to submit to the committee a thesis detailing the results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for the 0 credit course CSC 698 and the transcript will show the thesis title as the course topic.

**Graduate Internship**

In cooperation with local employers, the graduate program offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Students may take CSC 697 for up to four credits. Admission to the internship program requires consent of the instructor and a student services advisor. International students may complete curricular practical training (CPT) through this class provided they first obtain CPT authorization from International Student and Scholar Services (ISS) before beginning the internship.

**Degree Requirements**

Students in this degree program must meet the following requirements:

- Complete a minimum of 52 graduate credit hours in addition to any required introductory courses of the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
- Students pursuing a second master’s degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.

For DePaul’s policy on repeat graduate courses and a complete list of academic policies see the DePaul Graduate Handbook.

**Computing (BAPS)**

The Bachelor of Arts in Professional Studies with a Major in Computing is a joint degree program between the School of Continuing and Professional Studies (SCPS) and the College of Computing and Digital Media (CDM) at DePaul. The program builds knowledge and skills in computing and technology-based systems for application in a range of organizational settings. In this program, students examine their prior and current work-based experience in light of theory and principles. This program intentionally helps students to integrate liberal arts learning, with an emphasis on agile and critical thinking, with a professional specialization.

This major advances students’ foundational knowledge in a range of computing areas. Students may pursue concentrations in computer science, information systems, information technology, network technology, and security. With a range of elective courses offered in the major, students may specialize further in areas of particular interest to them.

This major is designed for working adult students and provides:

- Flexible scheduling including online options available
- Financial Aid, flexible payment options, and special adult student tuition pricing
- Acceleration and affordability through transfer credit and prior learning assessment (PLA) credit
- Opportunities to combine bachelor’s and master’s programs and apply graduate courses to both programs
- Individualized program planning, course selection and advising assistance provided
- Enhanced career opportunities through professional portfolio development, and career placement services instruction from industry practitioners, and wide-ranging Career Services support
- Degree granted by DePaul University, with its excellent academic reputation and the opportunity to join its prestigious and extensive alumni network

**Total hours required**

192 hours

**Learning Outcomes**

Students will be able to:

- Design a technology-based solution to a problem in an organization.
- Plan the implementation of a technology-based system customized to an organization.
• Analyze a technology-based system in an organization and recommend improvements.
• Investigate problems using qualitative and quantitative methods.
• Apply ethical principles in context.
• Apply various methods of communication in multiple settings.
• Analyze and apply different liberal arts perspectives.

**College Core** (78 credits, 20 credits in residence)

**Lifelong Learning Requirements** (32 credits, 16 credits in residence)

Learning Outcomes
Core Outcomes
Students will be able to:

- Identify and describe the historical and theoretical significance of a range of theatrical artists, works and artistic approaches from antiquity to the present, encompassing a broad range of periods, cultures, and styles.
- Synthesize and apply elements of their education and training to the preparation, rehearsal, and presentation of theatrical productions with discipline, respect, and maturity.
- Identify and explain their theatrical work in the context of the cultural and social impact of the arts.

Program Specific Outcomes
Students will be able to:

- Read and interpret theatrical text and apply research, imagination, and personalization to create a unique, insightful, and compelling design concept.
- Demonstrate an understanding of the history of clothing and fashion in the context of social and cultural development.
- Demonstrate and apply an understanding and application of garment fabrication skills.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

LSP 120 | QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY | 4 |

Sophomore Year

Race, Power, and Resistance
LSP 200 | SEMINAR ON MULTICULTURALISM IN THE UNITED STATES | 4 |

Junior Year

Experiential Learning
Not Required
Senior Year

Capstone
Not Required

1 Students must earn a C- or better in this course.
2 Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam.

Learning Domains

Arts and Literature (AL) (p. 1300)
- THE 204
- THE 205
- THE 206

Historical Inquiry (HI) (p. 1304)
- 1 Course Required

Math and Computing (MC) (p. 1306)
- Not Required

Philosophical Inquiry (PI) (p. 1307)
- 1 Course Required

Religious Dimensions (RD) (p. 1308)
- 1 Course Required

Scientific Inquiry (SI) (p. 1310)
- 1 Lab Course or 1 SWK Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
- Not Required

Other (p. 1300)
- Choose 1 course from the above learning domains as an elective

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Program Requirements

| Liberal Studies Requirements | 52 |
| Major Requirements           | 175 |
| Total hours required         | 227 |

Learning Outcomes

Core Outcomes

Students will be able to:

- Identify and describe the historical and theoretical significance of a range of theatrical artists, works and artistic approaches from antiquity to the present, encompassing a broad range of periods, cultures, and styles.
- Synthesize and apply elements of their education and training to the preparation, rehearsal and presentation of theatrical productions with discipline, respect, and maturity.
- Identify and explain their theatrical work in the context of the cultural and social impact of the arts.

Program Specific Outcomes

Students will be able to:

- Understand and interpret a design concept and create a plan to fabricate the design for production.
- Demonstrate an understanding of the history of clothing and fashion in the context of social and cultural development.
- Demonstrate and apply an expertise in garment fabrication skills for a variety of styles and periods.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Learning Outcomes

Core Outcomes

Students will be able to:

1. Students must earn a C- or better in this course.
2. Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam.
Learning Domains
Art and Literature (AL) (p. 1300)
  • THE 204
  • THE 205
  • THE 206

Historical Inquiry (HI) (p. 1304)
  • 1 Course Required

Math and Computing (MC) (p. 1306)
  • Not Required

Philosophical Inquiry (PI) (p. 1307)
  • 1 Course Required

Religious Dimensions (RD) (p. 1308)
  • 1 Course Required

Scientific Inquiry (SI) (p. 1310)
  • 1 Lab Course or 1 SWK Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
  • Not Required

Other (p. 1300)
  • Choose 1 course from the above learning domains as an elective

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Must complete three:
Quarter Hours

Regulation in Springfield, Illinois.

must be met according to state regulations. For more information,

Clinical Mental Health Counseling and school counseling integrate Illinois state requirements for licensure, and all specialty areas meet national standards for professional practice. School counseling and college counseling and student affairs programs are 72 credit hours, and the clinical mental health counseling program is 90 credit hours. All specialty areas include a 100 hour practicum and 600 hour internship. These clinical experiences are mandatory, and for the school counseling and clinical mental health counseling specialty areas, they are required by the state for licensure. A degree from the Counseling Program prepares students for career opportunities such as school counseling in elementary, middle, and high schools; counseling in community agencies; counseling in higher education; career counseling through the lifespan; counseling in hospitals or institutional-care settings; group counseling; couples and family counseling; or counseling in private practice, depending upon the chosen specialty area. All of the specialty areas emphasize and are designed to foster leadership, advocacy, and social justice.

Counseling Program

The Counseling Program is CACREP-accredited and ensures the highest academic and professional standards, providing individuals with theoretical frameworks and competencies that prepare them to offer effective counseling services. There are three degree specialty areas within the program: clinical mental health counseling, college counseling and student affairs, and school counseling. The specialty areas of clinical mental health counseling and school counseling integrate Illinois state requirements for licensure, and all specialty areas meet national standards for professional practice. School counseling and college counseling and student affairs programs are 72 credit hours, and the clinical mental health counseling program is 90 credit hours. All specialty areas include a 100 hour practicum and 600 hour internship. These clinical experiences are mandatory, and for the school counseling and clinical mental health counseling specialty areas, they are required by the state for licensure. A degree from the Counseling Program prepares students for career opportunities such as school counseling in elementary, middle, and high schools; counseling in community agencies; counseling in higher education; career counseling through the lifespan; counseling in hospitals or institutional-care settings; group counseling; couples and family counseling; or counseling in private practice, depending upon the chosen specialty area. All of the specialty areas emphasize and are designed to foster leadership, advocacy, and social justice.

Counseling (MA or MEd)

The Counseling Program is CACREP-accredited and ensures the highest academic and professional standards, providing individuals with theoretical frameworks and competencies that prepare them to offer effective counseling services. There are three degree specialty areas within the program: clinical mental health counseling, college counseling and student affairs, and school counseling. The specialty areas of clinical mental health counseling and school counseling integrate Illinois state requirements for licensure, and all specialty areas meet national standards for professional practice. School counseling and college counseling and student affairs programs are 72 credit hours, and the clinical mental health counseling program is 90 credit hours. All specialty areas include a 100 hour practicum and 600 hour internship. These clinical experiences are mandatory, and for the school counseling and clinical mental health counseling specialty areas, they are required by the state for licensure. A degree from the Counseling Program prepares students for career opportunities such as school counseling in elementary, middle, and high schools; counseling in community agencies; counseling in higher education; career counseling through the lifespan; counseling in hospitals or institutional-care settings; group counseling; couples and family counseling; or counseling in private practice, depending upon the chosen specialty area. All of the specialty areas emphasize and are designed to foster leadership, advocacy, and social justice.

The MA degree in Counseling requires the successful completion of a Thesis.

Specialty Areas

The Counseling program has three specialty areas:

• Clinical Mental Health Counseling
• College Counseling and Student Affairs
• School Counseling

School Counseling Licensure Option

The School Counseling specialty area is an Illinois State Board of Education (ISBE) approved program for the Illinois Professional Educator License with and endorsement in School Counseling.

LPC Licensure Information

The State of Illinois requires that those who wish to work as a counselor have licensure as either a Licensed Professional Counselor (LPC) or an advanced Licensed Clinical Professional Counselor (LCPC). The Counseling program’s Clinical Mental Health Counseling specialty area meets the educational requirements for the Licensed Clinical Professional Counselor. However, there are further requirements that must be met according to state regulations. For more information, contact the State of Illinois Department of Financial and Professional Regulation in Springfield, Illinois.

Learning Outcomes

Student will be able to:

• Exhibit personal and professional maturity and adhere to the ethical codes of the counseling profession.
• Explain how social systems and policies impact underrepresented, marginalized, and oppressed groups and, when deemed necessary, incorporate multicultural advocacy skills in their professional practice.
• Apply micro counseling skills when providing counseling services with clients and/or students.
• Evaluate research and conduct program evaluation.
• Use a variety of individual counseling strategies and provide appropriate referral services.

College Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

• Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
• Reflects on his or her own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
• Demonstrates a positive attitude and commitment to the profession
• Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
• Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
• Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
• Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
• Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
• Demonstrates concern for and protection of safety and well-being of others

Degree Conferral and Graduation
The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

College Requirements
Dispositions
The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

• Is receptive to supervisor and faculty feedback and acts meaningfully and professionally upon suggestions
• Reflects on their own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
• Takes initiative in all learning experiences and responsibility for their own professional growth and development
• Is open to new ideas and engagement in learning
• Demonstrates awareness of own cultural values and biases, actively works to understand clients’ worldviews, and applies culturally appropriate intervention strategies

• Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
• Communicates and cooperates effectively with others
• Demonstrates consistent professional behavior across all settings
• Maintains appropriate interpersonal and professional boundaries
• Accepts personal responsibility for their own behavior
• Expresses feelings and opinions effectively and appropriately to the setting

Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

Degree Requirements
Professional Practice
Students complete their Professional Practice courses towards the end of the program. The Professional Practice courses include a Practicum in Counseling, Internship in Counseling I, and Internship in Counseling II. Students must have taken the specialty area’s prerequisite courses and must complete a formal application process to participate in the Professional Practice experience. This includes attending a clinical orientation a full year before submitting an initial placement site application, securing a placement, and beginning the Professional Practice experience. Students should consult an advisor for additional information on the application and the course enrollment process.

Specialty areas provide focus to the degree. In addition to any degree requirements, students are required to choose one of the following:

- Clinical Mental Health Counseling Specialty Area, Counseling (MA or MEd) (p. 289)
- College Counseling and Student Affairs Specialty Area, Counseling (MA or MEd) (p. 290)
- School Counseling Specialty Area, Counseling (MA or MEd) (p. 290)

Clinical Mental Health Counseling Specialty Area, Counseling (MA or MEd)

The Clinical Mental Health Counseling (CMHC) specialty area is a practitioner-oriented program that is designed to prepare students to enter the professional field of clinical mental health counseling. Our program integrates counseling knowledge, skills, and clinical field experiences based on current research and best practices to help students develop their professional identities as clinical mental health counselors. With a sound foundation in counseling and mental health training, graduates will be able to work within a variety of clinical settings such as community mental health centers, day treatment and in-patient hospital settings, employee assistance plans, correctional facilities, foster care agencies, group homes, youth mentoring programs, colleges and universities, and private practice settings. Within these settings, our graduates are equipped to address and resolve personal, familial, and social concerns that interfere with clients' abilities to lead healthy and productive lives.

Unique to the Counseling program at DePaul University are opportunities for our students to learn in our state-of-the-art training facility (Education and Counseling Center), and a rigorous education in multiculturalism and social justice. The program's focus is on training students to become culturally competent practitioners who can serve as advocates and leaders for clients, communities, and the profession. Graduates of our program have become counselors and leaders serving culturally and linguistically diverse populations (e.g., clients who are LGBTQ, of varied racial and ethnic backgrounds, and economically disenfranchised).

Graduates of this specialty area are also competitive for admission into doctoral programs in counseling psychology, counselor education, and other mental health fields as long as they design their coursework and experiences during the program with this focus in mind. Students choosing to further their research knowledge and skills to better prepare for advanced degree programs often complete a master's thesis or complete research with a faculty advisor.

Program Requirements

The CMHC specialty area is a 90-quarter hour program that requires at least three years to complete. Coursework plus an on-site practicum experience generally make up the first two years of the program, followed by a year of specialty coursework and professional practice in the field.

The course sequence below meets the educational requirements for both the Licensed Professional Counselor (LPC) and Licensed Clinical Professional Counselor (L CPC) as set by the State of Illinois Department of Financial and Professional Regulation (IDFPR). The CMHC specialty area program of study generally meets the licensure requirements for other states; however, certain states have different requirements. It is the responsibility of the student to check with the state licensure board to verify the necessary requirements to be eligible for licensure and to plan on meeting those requirements. State licensure board contact information can be obtained through the American Counseling Association http://www.counseling.org/knowledge-center/licensure-requirements (http://www.counseling.org/knowledge-center/licensure-requirements/).

Master of Education (MEd) Degree Requirements

Capstone project with faculty supervision written in conjunction with CSL 552, CSL 553, and CSL 554. Does not require additional course enrollment.

College Counseling and Student Affairs Specialty Area, Counseling (MA or MEd)

This master’s degree prepares counseling professionals to work in various offices within student affairs such as in career centers, offices of residence life, and college counseling centers. It provides the counseling professional with the skills to provide individual and group counseling and to serve as a leader and advocate for students, universities, and the profession.

The Master's Thesis is written in conjunction with CSL 553 and CSL 554 and with faculty advisement. Enrollment in CSL 559 and an oral examination are required. Consult the MA Thesis Handbook for additional information.

Master of Education (MEd) Degree Requirements

Capstone project with faculty supervision written in conjunction with CSL 552, CSL 553, and CSL 554. Does not require additional course enrollment.

School Counseling Specialty Area, Counseling (MA or MEd)

This master’s degree allows the student to become licensed as a professional school counselor through the Illinois State Board of
Education. The specialty area sequence prepares students to work with students, staff and families in public and private K-12 school systems. Courses and professional practice experiences in the field provide students the skills and knowledge to deliver a comprehensive, data-driven school counseling program based on national standards and best practice, and to serve as leaders and advocates for students, schools, and the profession.

The Master’s Thesis is written in conjunction with CSL 553 and CSL 554 and with faculty advisement. Enrollment in CSL 559 and an oral examination are required. Consult the MA Thesis Handbook for additional information.

**Master of Education (MEd) Degree Requirements**

Capstone project with faculty supervision written in conjunction with CSL 552, CSL 553, and CSL 554. Does not require additional course enrollment.

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their licensure area.

School Counseling students must complete the following tests:

- School Counseling Content Area (test #181) – assesses knowledge of student development, assessment, the school environment and the school counseling profession. Students must pass the School Counseling Content Area (test #181) prior to CSL 554: Internship II.

**Creative Practice: Art and Writing (Minor)**

This minor is an introduction to a cross-disciplinary approach to a creative arts practice in art-making and creative writing. This minor is not available to English majors in the Creative Writing concentration. Six courses are required.

**The Art School Course Requirements**

Three courses are required from one Art, Media, and Design area of focus from the following list:

**Digital Photography Focus**

### Creative Producing (MFA)

The MFA in Creative Producing is offered exclusively in Los Angeles, and is the terminal degree for producing in film and television. The program prepares graduates for a successful career in producing, and also a number of entertainment careers as the skillset covers a wide spectrum of occupations such as studio executives, television showrunners, talent agents and managers.

Optional Los Angeles Quarter

Students may apply to participate in the Los Angeles Quarter Program for the spring of their second year. The LA Quarter program offers a unique opportunity for students to experience the inner workings of Hollywood first hand. This ten-week immersion program is structured around living in Los Angeles, taking classes on a historic studio lot, and interning at high profile companies that align with students' professional aspirations. Through this experience, students learn how to navigate the studio system and build a network of professional contacts that will help them leave an indomitable mark on the entertainment industry. If selected to participate in the LA program, MFA Creative Producing students would take SCWR 441 INDUSTRY AND PITCHING SEMINAR (FORMERLY DC 505) and FILM 499 INTERNSHIPS IN MEDIA AND DESIGN in Los Angeles.

MFA Thesis

Students will be required to complete a final thesis project that involves creating a film and television slate. Students will be required to create a professional package for three projects which will entail optioning and developing source material such as a book, script, or magazine article. The ultimate goal for the thesis projects is for the students to have viable projects upon graduation that they can set up at a studio or produced independently. Student also have the option to produce a festival quality short film for their final thesis project subject to approval by the Creative Producing Committee.

Degree Requirements

Students in the MFA Creative Producing degree must meet the following requirements:

- Complete a minimum of 72 graduate credit hours in the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all graduate courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Satisfactorily complete the MFA thesis as determined by the student’s MFA Advisor Committee.
- Students cannot count credit earned towards a previously awarded master’s or MFA degree toward the completion of this MFA program.

For DePau's policy on repeat graduate courses and a complete list of academic policies, see the DePaul Graduate Handbook in the Course Catalog.

Creative Writing (Minor)

The Creative Writing minor trains students to write in a variety of genres through a series of workshops and courses in literary analysis.
Students majoring in English are restricted from earning this minor.

Students who minor in both Creative Writing and English Literature cannot count the same classes for both minors.

Creative Writing and Publishing (MFA)

The MFA in Creative Writing and Publishing is designed for students who want to work on long-form projects such as a novel, a memoir, or a poetry or story collection during their time at DePaul. Study across genres and develop and revise your work under the mentorship of acclaimed authors and poets. Flexible admissions and genre guidelines let students design their perfect MFA, culminating in a required master's thesis of a publishable quality.

While you find your voice as a writer, hone your skills and build your resume in either publishing or teaching through courses in Copyediting, Book Publicity, Book Design, Teaching Creative Writing, or Teaching English. Gain hands-on instruction in editorial work and desktop publishing with Big Shoulders Books, Poetry East, Crook & Folly, or Slag Glass City, including technical instruction in InDesign and the Chicago Manual of Style.

Because the MFA is a terminal degree qualifying graduates to teach at most colleges or universities, students interested in teaching should plan to take pedagogy courses to prepare for working in the classroom. Professional internships in DePaul classrooms offer excellent experience and preparation within the MFA program.

Additional graduate certificates are available in
Courses are offered weekday evenings on the Lincoln Park Campus and online. Check with the program director or www.english-exlibris.com for online course offerings. The program may be completed in as little as two years.

MFA Admission Requirements
Students with a bachelor’s degree in any field will be considered simultaneously for admission to the MA and MFA. MA in Writing and Publishing students can be considered for admission to the MFA if they have at least one remaining quarter of graduate study. Courses taken in the MA in Writing and Publishing can count toward the MFA as long as the student has not already graduated.

For admission, a student must also present the following:

- A strong record of previous academic achievement.
- Relevant course work in creative writing or experience with creative writing gained on the job or through endeavors such as publishing original work and/or participating in a writers’ circle or group.

Program Requirements

<table>

</tr>
</tbody>
</table>

Students will be able to:

- Create original works of poetry, fiction, and nonfiction
- Apply the skills of narration, description, exposition, and research to their own and others’ writing
- Understand the literary history of the various genres they practice
- Evaluate and develop new ideas and experiment with form; for example: the prose poem, the short-story cycle, or the lyric essay
- Apply what they have learned by marketing their work for publication, as well as connecting with the larger literary community as publishing and/or teaching professionals
- Develop and sustain a book-length work of literature

MFA Course Requirements

Writing Workshop

- All workshops, except for ENG 480, ENG 487, ENG 490, ENG 491, and ENG 497, are reserved for graduate students in the Department of English

Near the end of your second year, you will be required to register for ENG 501 THESIS RESEARCH. You will need to choose a thesis director and a second reader for your final thesis.

College Core Requirements

Study in the Major Field

The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Criminology (BA)

Criminology studies the criminal legal system with the aim of creating more just policies and institutions that better support marginalized members of society. In the Criminology major, students are taught the skills needed to analyze crime and behavior data; to evaluate offender treatment programs; to design crime prevention models; and to assess social policies.

The Criminology major provides an educational experience that allows students to enter law enforcement, probation, corrections, crime prevention, and crime analysis professions. The major also provides a foundation for graduate study in law, social work, sociology, public policy, and public health.

Learning Outcomes

Students will be able to:

- Describe the moral, philosophical, historical, and scientific dimensions of Criminology.
- Explain the principles and methods of research in Criminology, how they are commonly used by professionals and scholars in the field to create and assess policy, and how to analyze these data.
- Contrast the main criminological traditions and perspectives in a clear, reasoned, and discipline-specific manner, and its relation to policy, practice, and research.
- Demonstrate critical thinking and effective communication skills about Criminology.

Online Degree Option

The MFA/MA program is committed to offering at least 3 online and/or remote-enabled courses every regular academic quarter. Yearly offerings will include 4-5 workshops, 2 publishing courses, 1-2 literature courses, and a variety of electives. Online summer session and December intercession courses can also count toward your degree. Check with the program director or www.english-exlibris.com (http://www.english-exlibris.com/) for online course offerings.
Students will be prompted to visit the College Office for their official graduation check early in their senior year.

**Declaration of Major, Minor and Concentration**

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

**The Modern Language Requirement (MLR)**

All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*  
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
- completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the “Modern Language Option” (see below).

**The Modern Language Option (MLO)**

The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

**NOTE:** Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

**External Credit and Residency**

A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

| Required |       |

| Senior Year |       |
| Capstone |       |
| CRIM 395 | CAPSTONE IN CRIMINOLOGY | 4 |
1 Students must earn a C- or better in this course.

2 Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam.

3 CRIM 398 recommended.

4 A student majoring in Criminology (CRIM) is required to complete the Capstone offered by the Criminology Department. This is the case even if a student is double majoring (or pursuing a dual degree) and the secondary major (or degree) requires its own Capstone. A CRIM major in the University Honors Program shall take the University Honors Capstone and the CRIM Capstone.

Learning Domains

Arts and Literature (AL) (p. 1300)
- 3 Courses Required

Historical Inquiry (HI) (p. 1304)
- 2 Courses Required

Math and Computing (MC) (p. 1306)
- 1 Course Required
  [1 CR Course]

Philosophical Inquiry (PI) (p. 1307)
- 2 Courses Required

Religious Dimensions (RD) (p. 1308)
- 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
- 2 Courses Required
  [1 Lab Course and 1 SWK Course]

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
- 1 Course Required

Notes
Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or as the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

The multidisciplinary nature of Criminology provides content, training, and theoretical knowledge to undergraduate students across a variety of disciplines.

In addition, the students will register for a Criminology-specific capstone course (CRIM 395) that contextualizes the knowledge and skills learned in the curriculum.

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

- Community Justice Concentration, Criminology (BA) (p. 299)
- Criminal Justice Administration Concentration, Criminology (BA) (p. 300)
- Race, Class, Gender, and Justice Concentration, Criminology (BA) (p. 301)

The three concentrations in the Criminology major speak to the Vincentian mission at DePaul and prepare students for the profession. In addition, the three concentrations will emphasize experiential learning, connections to Chicago institutions, and transferable leadership skills. The three concentrations are Community Justice; Race, Class, Gender and Justice; and Criminal Justice Administration. All students must enroll in one concentration in order to receive the BA in Criminology.

Community Justice Concentration, Criminology (BA)

Community Justice emphasizes the need for collaborative efforts between criminal legal agencies and community partners to enhance informal social control with the goal of stabilizing communities and reducing crime. Specific strategies include community organizing, different aspects of crime prevention, private-public partnerships, and justice initiatives.

Students in the Community Justice Concentration will be required to register for 2 Criminology courses from the list below, one of which must be at the 300-level:

Criminal Justice Administration Concentration, Criminology (BA)

Criminal Justice Administration prepares students for criminal justice professions by developing the leadership and administrative skills needed for the daily challenges facing law enforcement agencies, the courts, and corrections institutions. Through a social justice perspective, students in this concentration develop more just and humane responses as agents of criminal legal system.

Students in the Criminal Justice Administration Concentration will be required to register for 2 Criminology courses from the list below, one of which must be at the 300-level:

<table>

### Criminology 3+3 (BA+JD)

In the 3+3 (BA+JD) Program, high-achieving incoming first-year undergraduate students are admitted simultaneously to the College of Liberal Arts and Social Sciences and the College of Law. Students complete their first three years in the College of Liberal Arts and Social Sciences and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA+JD students meet regularly with advisors in both Colleges and have access to a variety of resources to ensure their success.

### Key Program Features

- Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
- Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
- Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
- Students receive early (conditional) admission to the College of Law.
- Credits earned in the first year of law school apply toward the BA degree.
- Students may opt out of the College of Law segment of the program and continue in the College of Liberal Arts and Social Sciences during their fourth year.

- If students withdraw after the first semester in the College of Law, they return to the College of Liberal Arts and Social Sciences for the winter quarter.

### Program Requirements

In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements.

Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.7 in their third and final year of undergraduate study.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:

#### Course Title
- PRELAW 150 THE PRACTICE OF LAW
- PRELAW 151 RECENT CONTROVERSIES IN THE LAW
- PRELAW 152 THINKING ABOUT THE LAW

In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law’s online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant’s third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These courses can be found in the Core Required Courses on the Law JD program page (p. 677).

### Financial Aid

BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law’s median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

### Race, Class, Gender, and Justice Concentration, Criminology (BA)

Race, Class, Gender, and Justice examines the social, political, and economic inequities in society. This concentration sensitizes students to the struggles of marginalized groups who are exposed to the criminal legal system. The courses within this concentration serve to further students’ conceptual understanding of the values, ethics, and power relationships involved in the process of justice.
Students in the Race, Class, Gender and Justice Concentration will be required to register for 2 Criminology courses from the list below, one of which must be at the 300-level:

**Criminology (Minor)**

Students who minor in Criminology will explore the social, political, and economic influences that shape crime and punishment. The following curriculum chart provides the required and elective courses that count toward the minor. A total of 24 credit hours from 6 courses is required for completion of the minor.

1. Three required courses (12 credit hours):
   - CRIM 101
   - CRIM 205
   - A 300-level CRIM course

2. Three elective courses from the following areas (12 credit hours):
   - Criminology Major Core (p. 299)
   - Concentration in Community Justice (p. 299)
   - Concentration in Criminal Justice Administration (p. 300)
   - Concentration in Race, Class, Gender and Justice (p. 301)
   - A related course from another department (with program director approval)

**Critical Ethnic Studies (MA)**

The Critical Ethnic Studies Master of Arts prepares students for advanced analysis of race and ethnicity in an urban and global context. It provides an interdisciplinary approach to the studies of systematic marginalization of racialized minorities. It also looks at how racialized groups respond to and counter these forces through art, culture, political organization and other forms of social citizenship.

This program uses an interdisciplinary social justice perspective to critique global and local configurations of power. We emphasize social justice and transformation while focusing on U.S. ethno-racial populations through an intersectional, transnational, and urban framework. Students apply critical theories to complex social and cultural issues. The program consists of a combination of core courses and electives and a final project or internship. Launched in the Fall of 2015, CES is the first of its kind in the nation. Admission is accepted on a rolling basis.

Certificate Options:

The MA in Critical Ethnic Studies may also be expanded to include select graduate certificate programs covering particular areas of interest. Students participating in a combined MA/certificate program should consult with their academic advisor to determine what coursework might count toward both programs. A separate application process for the
Certificate is required. Students who are interested in any of the following combination programs should contact the unit offering the certificate for additional information.

- Critical Ethnic Studies + Community Development Certificate
- Critical Ethnic Studies + Digital Humanities Certificate
- Critical Ethnic Studies + GIS Certificate
- Critical Ethnic Studies + Global Health Certificate
- Critical Ethnic Studies + Master in Social Work Certificate
- Critical Ethnic Studies + Metropolitan Planning and Development Certificate
- Critical Ethnic Studies + Publishing Certificate
- Critical Ethnic Studies + Social and Cultural Foundations in Education Certificate
- Critical Ethnic Studies + Social Research Certificate
- Critical Ethnic Studies + Sustainable Urban Food Systems Certificate
- Critical Ethnic Studies + Teaching English to Speakers of Other Languages
- Critical Ethnic Studies + Women's and Gender Studies Certificate

<td>28</td>
</tr>
<tr>
<td>Concentration Requirements</td>
<td>16</td>
</tr>
<tr>
<td>Final Project Requirements</td>
<td>4</td>
</tr>
<tr>
<td><strong>Total hours required</strong></td>
<td><strong>48</strong></td>
</tr>
</tbody>
</table>

### Learning Outcomes

Students will be able to:

- Demonstrate knowledge of critical approaches to ethnic studies through the study of the diverse racial and ethnic groups in the city of Chicago and the U.S. within a global context.
- Integrate diverse methodologies and approaches to the study of race and ethnicity in writing.
- Apply theories of racialization and ethnic formation to cultural, social and political issues and contexts.
- Create an ethical framework and strong sense of social responsibility by engaging normative questions and engaging in public service experiences.

### Degree Requirements

#### Core Courses

<table>
<thead>
<tr>
<th>Course</th>

<tr>
<td>or INT 404</td>
<td>MIGRATION AND FORCED MIGRATION</td>
<td></td>
</tr>
<tr>
<td>CES 405</td>
<td>RACE AND THE MEDIA</td>
<td>4</td>
</tr>
<tr>
<td>or CMNS 563</td>
<td>MULTICULTURAL MEDIA REPRESENTATIONS</td>
<td></td>
</tr>
</tbody>
</table>

#### Concentration Electives

Students must choose four elective courses in an area of concentration. Electives are defined as either 400-level courses or up to two 300-level courses in departments including but not limited to African and Black Diaspora Studies, English, Global Asian Studies, History, International Studies, Islamic World Studies, Latin American and Latino/a Studies, LGBTQ Studies, Sociology, Women's and Gender Studies, and courses in the College of Communication. These courses should be chosen in consultation with the CES director or final project advisor.

### Final Project Requirements

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CES 412</td>
<td>FINAL PROJECT INDEPENDENT RESEARCH</td>
<td>4-8</td>
</tr>
</tbody>
</table>

Students are asked to complete a final project, one that will represent a culmination of the student's work in the program. All projects will consist of a rigorous piece of writing, either reflective, analytical, or expository. This piece of writing will draw upon the writing intensive skills developed in all their coursework. Final project options are as follows:

1. An original research thesis of up to 50–80 pages on a topic agreed upon by the student’s committee. The thesis may be comparative or focus on a single ethnic or racialized group through the use of intersectional methodologies.
2. A portfolio of three high-quality essays completed during the program, which are curated and linked together by a 20-page narrative setting out the intellectual rationale for their compilation.
3. A completed internship with a community organization in order to gain practical experience and a 20-page essay reflecting on the links between the student’s intellectual work and practical work experience.
4. An original creative project and a 15-20 page framing paper, in which the student describes, critically frames, and reflects on the creative project.
Critical Ethnic Studies (MA), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

DePaul Undergraduate Degree + Critical Ethnic Studies (MA)

Critical Ethnic Studies offers a combined program that allows students the opportunity to complete a bachelor’s degree in any major while also taking courses that can count towards a master’s degree in Critical Ethnic Studies. This program is open to all majors at DePaul University. Students apply in the spring of their junior year. Interested students should contact the Critical Ethnic Studies (CES) graduate director at ces@depaul.edu (%20ces@depaul.edu).

During the senior year, admitted students take three graduate-level courses that double-count toward undergraduate and graduate requirements. Students beginning the MA portion of the combined degree program will receive the Double Demon Scholarship which covers 25% of the tuition on the remaining MA courses.

In the senior year students complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CES 401</td>
<td>CRITICAL ETHNIC STUDIES</td>
<td>4</td>
</tr>
<tr>
<td>Select two of the following:</td>
<td>8</td>
<td></td>
</tr>
<tr>
<td>CES 402</td>
<td>MOBILITY AND THE STATE</td>
<td></td>
</tr>
<tr>
<td>CES 403</td>
<td>CITIES AND RACIAL FORMATION</td>
<td></td>
</tr>
<tr>
<td>CES 404</td>
<td>BORDERS AND MIGRATION</td>
<td></td>
</tr>
<tr>
<td>or INT 404</td>
<td>MIGRATION AND FORCED MIGRATION</td>

</tr>
<tr>
<td>CES 405</td>
<td>RACE AND THE MEDIA</td>
<td></td>
</tr>
<tr>
<td>or CMNS 563: MULTICULTURAL MEDIA REPRESENTATIONS</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Once the student has graduated with their undergraduate degree, they will matriculate into the MA Program. As MA Students, the students take the remaining nine courses toward the MA degree – usually students will take three graduate courses per quarter in order to complete the MA in the one additional year. Students may also wish to take one of these courses during the summer. See MA degree requirements (p. 303).

Application Instructions and Requirements

Current DePaul undergraduate students with junior status (at least 88.0 credits) and a cumulative DePaul grade point average of 3.00, outside and within the College of Liberal Arts and Social Sciences, are encouraged to apply to the combined bachelor’s + master’s degree program in Critical Ethnic Studies.

Students must submit the following to the Graduate Admission Office at graddepaul@depaul.edu no later than the end of the spring quarter of their Junior year:

• Critical Ethnic Studies BA/MA Online Application (https://www.depaul.edu/academics/undergraduate/Pages/combined-degree-apply.aspx)
• Personal Statement/statement of purpose (300-500 words)
• Writing sample (academic writing of approximately 2,000 words)
• Letters of recommendation are not required but can be submitted to strengthen an application

Critical Ethnic Studies Certificate

Graduate Certificate Program (16 Credit Hours)

The Critical Ethnic Studies Graduate Certificate Program at DePaul University introduces students to critical race theory and social movements through an intersectional approach that includes gender analysis and allows students to gain expertise in a comparative race framework or to focus on a specific ethno-racial group. The CES Certificate Program is available both to non-degree seeking students and to students in other DePaul graduate degree programs.

The Program’s requirements are:

<table>

</tbody>
</table>

To be considered for the certificate program, please follow the directions below. The admission requirements for the certificate program include a bachelor’s degree from a regionally accredited institution.

Non-Degree Seeking Students

Applications are accepted on an ongoing basis. Complete a DePaul University Liberal Arts and Social Sciences graduate admission online application (https://grad.depaul.edu/apply/); submit undergraduate and (if applicable) graduate transcripts (a GPA of 3.0 or above on a 4.0 scale is recommended but not required for admission); and a personal statement of 300-500 words (describing your interest in Critical Ethnic Studies, any prior experience in the field, and personal or professional goals for pursuing the certificate), and a writing sample (academic writing of approximately 2,000 words).

Students Enrolled in Other DePaul Graduate Degree Programs

Applications are accepted on an ongoing basis. Complete a DePaul University Liberal Arts and Social Sciences graduate admission online application (https://grad.depaul.edu/apply/). Submit a personal statement of 300-500 words (describing your interest in Critical Ethnic Studies, any prior experience in the field, and personal or professional
goals for pursuing the certificate) and a writing sample (academic writing of approximately 2,000 words).

The Graduate Director may use the personal statement as a basis for advising certificate students on the selection of courses and on any academic skills development that would aid successful participation in and completion of CES graduate courses.

Descriptions of courses offered through the Critical Ethnic Studies can be found in Campus Connect through the "Search for Classes" function.

For more information please contact the Critical Ethnic Studies Graduate Program Director, Laura Kina (773-325-4048 or lkindrey@depaul.edu), or visit the Critical Ethnic Studies website (https://las.depaul.edu/academics/critical-ethnic-studies/Pages/default.aspx).

Curriculum Studies (EdD)

The Education Doctorate (EdD) in Curriculum Studies encourages educators to reflect on and strengthen their own practice and to challenge themselves and their colleagues to work effectively for social justice and educational excellence. Students use critical reflection to improve practice, engage in rigorous theoretical inquiry, and identify, address, and build coalitions around opportunities and problems in education. The EdD typically serves candidates seeking professional or practitioner careers (e.g., superintendent, principal) and terminates in a capstone project (e.g., program evaluation, treatise, analysis of organizational practice, proposal for organizational development, policy paper, applied research, professional plan, final report, inquiry into a problem of practice, cost-benefit analysis).

Curriculum decision-making is a theoretically informed, practical, and dialogic activity. We encourage educators to seek the most defensible course of action in specific circumstances; this requires a thorough understanding of the sociocultural and political context and the analytical ability to think critically about broader purposes and consequences. We consider educators to be teachers not only in the classroom, but also in a variety of settings where they interact (including in higher education, community organizations, etc.). Educational environments, especially those in urban settings, are complex; creating viable options within them requires a rich knowledge base and the ability to think conceptually. Our program provides educators with a variety of theoretical perspectives to use in analyzing educational phenomena.

Graduates of the program may enter a new career or strengthen their current position in schools, universities or community organizations. They may assume faculty positions in higher education, take leadership positions in local and state education agencies, assume curriculum positions in school or community learning environments, or become leaders in educational policy.

Licenses and Endorsements

Superintendent Endorsement Option

Students pursuing a doctoral degree in Curriculum Studies are also eligible for the Superintendent Endorsement program, which requires additional coursework, along with four quarter hours for the superintendent internship course. ISBE states the following guidelines:

Individuals seeking the Superintendent endorsement must possess:

- a master's degree with a GPA of 3.0 or better on a 4.0 scale
- proof of two years of teaching experience on a valid Illinois teaching license
- proof of two years of full-time administrative experience on a valid administrative license with the general administrative endorsement
- proof of passing the Basic Skills/TAP and Superintendent content-area tests.

Upon completion of the Superintendent program and the endorsement's additional requirements, students must apply for the endorsement. Students are to work with the College of Education’s Licensure Officer when applying for the endorsement.

Teacher Leader Endorsement Option

Students pursuing a doctoral degree in Curriculum Studies are also eligible for the Teacher Leader Endorsement option, which requires additional coursework. To be eligible for the Teacher Leader endorsement program, students must possess:

- a bachelor's degree and master's degree from an accredited college or university,
- a valid teaching license
- at least two years of teaching experience
- proof of passing the Basic Skills or Test of Academic Proficiency.

Principal Licensure

Students pursuing a doctoral degree in Curriculum Studies are also eligible for the Principal Licensure program, which requires additional coursework. The Principal Licensure program at DePaul University is an approved Illinois State Board of Education (ISBE) program. It is a rigorous program preparing principals and assistant principals for work service in public and private schools in the state of Illinois.

To be eligible for the Principal Licensure program, students possess:

- a master's degree from an accredited college or university with a GPA of 2.75 or higher at the undergraduate level and a 3.25 or higher at the graduate level.
- a valid Illinois teaching license
- at least two years of full-time successful teaching experience
- proof of passing the basic skills or test of academic proficiency.

Concentrations

- Curriculum Studies (degree only)
- Curriculum Studies plus Superintendent Endorsement
- Curriculum Studies plus Teacher Leader Endorsement
- Curriculum Studies plus Principal Licensure

<table>

</tr>
</thead>
<tbody>
<tr>
<td>Degree Requirements</td>
<td>76</td>
</tr>
<tr>
<td>Total hours required</td>
<td>76</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

- Describe major movements in curriculum history and apply them to current educational practices and controversies.
- Analyze the theoretical foundations of curriculum and curriculum studies.
• Conduct independent inquiry supported by appropriate research literature, methods, and theoretical frameworks.
• Honor diverse perspectives, improve curriculum, and promote student learning and well-being.
• Critically analyze relationships between schools, society, and curriculum, drawing especially on structural, ideological, and human development perspectives
• Produce an independent dissertation that includes extensive review of relevant literature, clear rationale for study design and methods supported by relevant literature, and collection and analysis of appropriate data in order to make a novel contribution to a problem of professional knowledge.

**College Requirements**

**Dispositions**
The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

• Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
• Reflects on his or her own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
• Demonstrates a positive attitude and commitment to the profession
• Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
• Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
• Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
• Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
• Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
• Demonstrates concern for and protection of safety and well-being of others

**Degree Conferral and Graduation**
The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

**Degree Requirements**

Students must maintain an overall GPA of 3.0 prior to the completion of 36 credit hours and 3.3 after the completion of 36 credit hours. Students are allowed no more than two grades of “C.” Upon receiving a third grade of “C,” students must retake the class in which the grade was received. Grades of “D” and “F” require that the course be retaken.

**Course Requirements**

Teacher Leader Option, Curriculum Studies (EdD)

This program is ideal for students who are educators in K-12 environments and are seeking leadership roles, excluding principalship. Such roles include, but are not limited to: curriculum specialists, coaches, mentor teachers, department chair or lead teachers, content specialists, teacher leaders charged with supervisor roles, and program leaders. The program meets the standards set forth by the state of Illinois for the endorsement of Teacher Leader.

Curriculum Studies (EdS)

The Curriculum Studies Education Specialist Program encourages educators to reflect on and strengthen their own practice and to challenge themselves and their colleagues to work effectively for social justice and educational excellence. Students use critical reflection to improve practice, engage in rigorous theoretical inquiry, and identify, address, and build coalitions around opportunities and problems in education.

The EdS is situated between our existing master’s and doctoral degrees. It allows students wishing to continue their professional development to pursue coursework toward an advanced degree without the additional requirement of extensive, specialized training in research design and methods. Unlike almost all doctoral degrees, specialist degrees do not typically require a dissertation. Therefore, EdS students are not expected to engage in the in-depth research, analysis, and extensive conceptual and empirical framing required to research, write, and defend a dissertation.

Graduates of the EdS Program may enter a new career or strengthen their current position in schools, universities or community organizations. Potential professional opportunities for Education Specialists include adjunct and part-time faculty in higher education; curriculum specialists, directors of assessment, directors of instruction, and curriculum directors; P-12 teachers and teacher leaders, coaches, and mentors; and deans, administrators, and principals.

Licenses and Endorsements

Superintendent Endorsement Option

Students pursuing an EdS degree in Curriculum Studies are also eligible for the Superintendent Endorsement program, which requires additional coursework, along with four quarter hours for the superintendent internship course. ISBE states the following guidelines:

Individuals seeking the Superintendent endorsement must possess:
- a master’s degree with a GPA of 3.0 or better on a 4.0 scale
- proof of two years of teaching experience on a valid Illinois teaching license
- proof of two years of full-time administrative experience on a valid administrative license with the general administrative endorsement
- proof of passing the Basic Skills/TAP and Superintendent content-area tests.

Upon completion of the Superintendent program and the endorsement’s additional requirements, students must apply for the endorsement. Students are to work with the College of Education’s Licensure Officer when applying for the endorsement.

Teacher Leader Endorsement Option

Students pursuing a doctoral degree in Curriculum Studies are also eligible for the Teacher Leader Endorsement option, which requires additional coursework. To be eligible for the Teacher Leader endorsement program, students must possess:
- a bachelor’s degree and master’s degree from an accredited college or university.
- a valid teaching license
- at least two years of teaching experience
- proof of passing the Basic Skills or Test of Academic Proficiency.

Principal Licensure

Students pursuing a doctoral degree in Curriculum Studies are also eligible for the Principal Licensure program, which requires additional coursework. The Principal Licensure program at DePaul University is an approved Illinois State Board of Education (ISBE) program. It is a rigorous
program preparing principals and assistant principals for work service in public and private schools in the state of Illinois.

To be eligible for the Principal Licensure program, students must possess:

- a master’s degree from an accredited college or university with a GPA of 2.75 or higher at the undergraduate level and a 3.25 or higher at the graduate level.
- a valid Illinois teaching license
- at least two years of full-time successful teaching experience
- proof of passing the basic skills or test of academic proficiency.

Concentrations

- Curriculum Studies (degree only)
- Curriculum Studies plus Superintendent Endorsement
- Curriculum Studies plus Teacher Leader Endorsement
- Curriculum Studies plus Principal Licensure

Learning Outcomes

Students will be able to:

- Describe major movements in curriculum history and apply them to current educational practices and controversies.
- Analyze the theoretical foundations of curriculum and curriculum studies.
- Conduct independent inquiry supported by appropriate research literature, methods, and theoretical frameworks.
- Honor diverse perspectives, improve curriculum, and promote student learning and well-being.
- Critically analyze relationships between schools, society, and curriculum, drawing especially on structural, ideological, and human development perspectives.
- Produce an independent capstone project that includes a review of relevant literature and collection and analysis of appropriate data to make a novel contribution to a problem of professional practice.
- Demonstrate thoughtful, effective verbal and non-verbal communication and listening skills.
- Respect and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning.
- Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development.
- Demonstrate professional ethical and legal behavior as defined by the respective codes of ethics and laws.
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.).
- Demonstrates concern for and protection of safety and well-being of others.

Degree Conferral and Graduation

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPL Y FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

Degree Requirements

Students must maintain an overall GPA of 3.0 prior to the completion of 36 credit hours and 3.3 after the completion of 36 credit hours. Students are allowed no more than two grades of “C.” Upon receiving a third grade of “C,” students must retake the class in which the grade was received. Grades of “D” and “F” require that the course be retaken.
### Course Requirements

#### Core Courses: 24 quarter hours required

Teacher Leader Option, Curriculum Studies (EdS)

This program is ideal for students who are educators in K-12 environments and are seeking leadership roles, excluding principalship. Such roles include, but are not limited to: curriculum specialists, coaches, mentor teachers, department chair or lead teachers, content specialists, teacher leaders charged with supervisor roles, and program leaders. The
program meets the standards set forth by the state of Illinois for the endorsement of Teacher Leader.

**Curriculum Studies (MA or MEd)**

Curriculum Studies programs at DePaul share a commitment to social justice, democracy, and critical engagement with issues affecting marginalized students and communities. We assist educators to strengthen their practice and challenge themselves and their colleagues to work effectively for justice and excellence in teaching and learning. Students engage in critical reflection, rigorous theoretical inquiry, and applied and project-based work to improve their practice and to identify and address opportunities and problems in teaching and learning.

Our program is designed for educators who wish to enhance their skills in teaching, curriculum development, instructional supervision and coaching, or leadership of departments or educational programs. We aim to equip instructional leaders with the skills to better serve the needs all learners in a variety of settings: from PK-12 schools, colleges and universities, to school districts, museums, community-based organizations, national and international policy organizations, to major corporations.

To meet students’ goals, we offer students two master’s degree options:

- A Master’s of Arts (MA) culminating in an academic thesis (primarily for students planning to pursue a doctorate and wishing to develop their skills in research and scholarly writing).
- A Master’s of Education (MEd) culminating in an applied capstone project and offering three concentration / endorsement options.

**MA Degree**

Students who are interested in doctoral studies often pursue a Master of Arts degree to further hone their skills in research and scholarly writing.

A Master of Arts degree is distinguished by the preparation of a master’s thesis. The master’s thesis provides the culminating experience for students and allows them to explore the relationship between theory, educational practice, and educational inquiry.

The purpose of the master’s thesis is to demonstrate a student’s ability to engage in research by critically analyzing an educational issue, problem or question, to demonstrate their knowledge in a specific area, and to prepare them to conduct further independent research.

The Curriculum Studies Master of Arts (MA) program has 1 concentration:

- Curriculum Specialist (degree only)

**MEd Degree Concentrations/Endorsement Options**

The Master’s of Education (MEd) offers three concentration / endorsement options:

1. Curriculum Specialist (degree only)
2. Teacher Leader (degree with endorsement)
3. Computer Science (degree with endorsement)

(Students who already hold a master’s degree may elect to pursue coursework leading to the Teacher Leader Endorsement only.)
MEd-Curriculum Studies, Curriculum Specialist concentration

This concentration is a cross-disciplinary program run jointly by Curriculum Studies and Educational Leadership faculty. It provides practicing teachers who desire to take on various leadership roles in their school or district with the knowledge of both leadership and curriculum to be effective instructional leaders. The program meets the standards set forth by the State of Illinois for the Endorsement of "Teacher Leader."

MEd-Curriculum Studies with Teacher Leader Endorsement

This degree program is a cross-disciplinary program, housed in the Department of Leadership, Language and Curriculum (LLC) and run jointly by Curriculum Studies and Educational Leadership. It provides practicing teachers who desire to take on the myriad leadership roles in the local school community with the knowledge base of leadership and curriculum that will allow them to be effective and competent leaders. The program meets the standards set forth by the State of Illinois for the Endorsement of "Teacher Leader."

MEd-Curriculum Studies with Computer Science Endorsement

This concentration is a cross-disciplinary program run jointly by Curriculum Studies and College of Computing and Digital Media (CDM) and developed in collaboration with the Office of Computer Science of Chicago Public Schools (CPS). It integrates courses in curriculum studies with courses on computer science and computer science pedagogy to meet the specific requirements of the Illinois State Board of Education computer science teaching endorsement. This concentration is for practicing educators interested in teaching in or assisting the development of Computer Science classes, curriculum, or programs.

Teacher Leader Endorsement Only

This non-degree program allows students who already have a master's degree to obtain an ISBE Teacher Leader Endorsement. (Specific course requirements are detailed under the College of Education Licensure section of this catalog).

Learning Outcomes

Students will be able to:

- Describe major movements in curriculum history and apply them to current educational practices and controversies.
- Analyze the theoretical foundations of curriculum and curriculum studies.
- Conduct independent inquiry supported by appropriate research literature, methods, and theoretical frameworks.
- Honor diverse perspectives, improve curriculum, and promote student learning and well-being.
- Critically analyze relationships between schools, society, and curriculum, drawing especially on structural, ideological, and human development perspectives.

College Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Demonstrates a positive attitude and commitment to the profession
- Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates concern for and protection of safety and well-being of others

Degree Conferral and Graduation

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.
To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

Degree Requirements

MA Degree Requirements
Specific degree requirements are determined according to the concentration chosen by the student. Master of Arts (MA) concentration is available in Curriculum Specialist.

Please review the concentration requirements pages for more information.

Please note: a Master’s Thesis is completed for the MA concentration in conjunction with faculty advisement. Preparation for the writing of the Thesis should begin well in advance of the completion of coursework. Oral examination on Thesis required. Consult the MA Thesis Handbook for additional information.

MEd Degree Requirements
Specific degree requirements are determined according to the concentration chosen by the student. Master of Education (MEd) concentrations are available in Curriculum Specialist (degree only), Teacher Leader (degree with endorsement), Computer Science (degree with endorsement).

Please review the concentration requirements pages for more information.

Please note: A Capstone project is completed for only (Curriculum Specialist and Teachers Leader) MEd Concentrations in conjunction with faculty advisement, and students are required to take CS 608 to complete the Capstone project.

Academic Standards
Students must maintain a 3.0 average or higher to continue in the program. Any grade below a C will not count for credit toward completion of the program.

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements and major requirements, students are required to complete one of the following:

- Computer Science Endorsement, Curriculum Studies (MEd) (p. 314)
- Curriculum Specialist, Curriculum Studies (MA) (p. 314)
- Curriculum Specialist, Curriculum Studies (MEd) (p. 315)
- Teacher Leader Endorsement, Curriculum Studies (MEd) (p. 316)

### Curriculum Studies (MA or MEd) Online

Curriculum Studies programs at DePaul share a commitment to social justice, democracy, and critical engagement with issues affecting marginalized students and communities. We assist educators to strengthen their practice and challenge themselves and their colleagues to work effectively for justice and excellence in teaching and learning. Students engage in critical reflection, rigorous theoretical inquiry, and applied and project-based work to improve their practice and to identify and address opportunities and problems in teaching and learning.

Our program is designed for educators who wish to enhance their skills in teaching, curriculum development, instructional supervision and coaching, or leadership of departments or educational programs. We aim to equip instructional leaders with the skills to better serve the needs all learners in a variety of settings: from PK-12 schools, colleges and universities, to school districts, museums, community-based organizations, national and international policy organizations, to major corporations.

To meet students’ goals, we offer students two master’s degree options:

- A Master’s of Arts (MA) culminating in an academic thesis (primarily for students planning to pursue a doctorate and wishing to develop their skills in research and scholarly writing).
- A Master’s of Education (MEd) culminating in an applied capstone project and offering three concentration / endorsement options.

### MA Degree

Students who are interested in doctoral studies often pursue a Master of Arts degree to further hone their skills in research and scholarly writing.

A Master of Arts degree is distinguished by the preparation of a master’s thesis. The master’s thesis provides the culminating experience for students and allows them to explore the relationship between theory, educational practice, and educational inquiry.

The purpose of the master’s thesis is to demonstrate a student’s ability to engage in research by critically analyzing an educational issue, problem or question, to demonstrate their knowledge in a specific area, and to prepare them to conduct further independent research.

The Curriculum Studies Master of Arts (MA) program has 1 concentration:

- Curriculum Specialist (degree only)

### MEd Degree Concentrations/Endorsement Options

The Master’s of Education (MEd) offers three concentration / endorsement options:

1. Curriculum Specialist (degree only)
2. Teacher Leader (degree with endorsement)
3. Computer Science (degree with endorsement)

(Students who already hold a master’s degree may elect to pursue coursework leading to the Teacher Leader Endorsement only.)

#### MEd-Curriculum Studies, Curriculum Specialist concentration

This concentration is a cross-disciplinary program run jointly by Curriculum Studies and Educational Leadership faculty. It provides practicing teachers who desire to take on various leadership roles in their school or district with the knowledge of both leadership and curriculum to be effective instructional leaders. The program meets the standards set forth by the State of Illinois for the Endorsement of “Teacher Leader.”

#### MEd-Curriculum Studies with Teacher Leader Endorsement

This degree program is a cross-disciplinary program, housed in the Department of Leadership, Language and Curriculum (LLC) and run jointly by Curriculum Studies and Educational Leadership. It provides practicing teachers who desire to take on the myriad leadership roles in the local school community with the knowledge base of leadership and curriculum that will allow them to be effective and competent leaders. The program meets the standards set forth by the State of Illinois for the Endorsement of “Teacher Leader.”

#### MEd-Curriculum Studies with Computer Science Endorsement

This concentration is a cross-disciplinary program run jointly by Curriculum Studies and College of Computing and Digital Media (CDM) and developed in collaboration with the Office of Computer Science of Chicago Public Schools (CPS). It integrates courses in curriculum studies with courses on computer science and computer science pedagogy to meet the specific requirements of the Illinois State Board of Education computer science teaching endorsement. This concentration is for practicing educators interested in teaching in or assisting the development of Computer Science classes, curriculum, or programs.

#### Teacher Leader Endorsement Only

This non-degree program allows students who already have a master’s degree to obtain an ISBE Teacher Leader Endorsement. (Specific course requirements are detailed under the College of Education Licensure section of this catalog).

**Learning Outcomes**

Students will be able to:

- Describe major movements in curriculum history and apply them to current educational practices and controversies.
- Analyze the theoretical foundations of curriculum and curriculum studies.
- Conduct independent inquiry supported by appropriate research literature, methods, and theoretical frameworks.
- Honor diverse perspectives, improve curriculum, and promote student learning and well-being.
- Critically analyze relationships between schools, society, and curriculum, drawing especially on structural, ideological, and human development perspectives.

**College Requirements**

**Dispositions**

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Demonstrates a positive attitude and commitment to the profession
- Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
- Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates concern for and protection of safety and well-being of others

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

**Degree Requirements**

**MA Degree Requirements**

Specific degree requirements are determined according to the concentration chosen by the student. Master of Arts (MA) concentration is available in Curriculum Specialist.

Please review the concentration requirements pages for more information.

Please note: a Master’s Thesis is completed for the MA concentration in conjunction with faculty advisement. Preparation for the writing of the Thesis should begin well in advance of the completion of coursework. Oral examination on Thesis required. Consult the MA Thesis Handbook for additional information.

**MEd Degree Requirements**

Specific degree requirements are determined according to the concentration chosen by the student. Master of Education (MEd) concentrations are available in Curriculum Specialist (degree only), Teacher Leader (degree with endorsement), Computer Science (degree with endorsement).

Please review the concentration requirements pages for more information.

Please note: A Capstone project is completed for only (Curriculum Specialist and Teachers Leader) MEd Concentrations in conjunction with faculty advisement, and students are required to take CS 608 to complete the Capstone project.
**Academic Standards**

Students must maintain a 3.0 average or higher to continue in the program. Any grade below a C will not count for credit toward completion of the program.

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements and major requirements, students are required to complete the following:

- Computer Science Endorsement, Curriculum Studies (MEd) Online (p. 319)
- Curriculum Specialist, Curriculum Studies (MA) Online (p. 319)
- Curriculum Specialist, Curriculum Studies (MEd) Online (p. 320)
- Teacher Leader Endorsement, Curriculum Studies (MEd) Online (p. 321)

This class supports students as they develop a master’s paper or site-based practicum project. The master’s paper or practicum project offer
students an opportunity to demonstrate, in an educational setting, the curricular and leadership skills developed during the master’s program.

Note: For other requirements please view the Degree Requirements section.

**Teacher Leader Endorsement, Curriculum Studies (MEd) Online**

**Course Requirements (13 courses, 52 qh)**

Core Teacher Leader Core Courses: 40 quarter hours (10 courses) required, grade of C or better required

</tbody>
</table>

**Curriculum Studies (PhD)**

The Doctor of Philosophy of Education (PhD) in Curriculum Studies encourages educators to reflect on and strengthen their own practice and to challenge themselves and their colleagues to work effectively for social justice and educational excellence. Students use critical reflection to improve practice, engage in rigorous theoretical inquiry, and identify, address, and build coalitions around opportunities and problems in education. The PhD serves candidates seeking academic careers (e.g., university faculty, researcher) and terminates in a comprehensive dissertation of original research.

Curriculum decision-making is a theoretically informed, practical, and dialogic activity. We encourage educators to seek the most defensible course of action in specific circumstances; this requires a thorough understanding of the sociocultural and political context and the analytical ability to think critically about broader purposes and consequences. We consider educators to be teachers not only in the classroom, but also in a variety of settings where they interact (including in higher education, community organizations, etc.). Educational environments, especially those in urban settings, are complex; creating viable options within them requires a rich knowledge base and the ability to think conceptually. Our program provides educators with a variety of theoretical perspectives to use in analyzing educational phenomena.

Graduates of the program may assume faculty or researcher positions in higher education, take leadership positions in local and state education agencies, assume curriculum positions in school or community learning environments, or become leaders in educational policy. They may enter a new career or strengthen their current position in schools, universities or community organizations.

**Licensures and Endorsements**

**Superintendent Endorsement Option**

Students pursuing a doctoral degree in Curriculum Studies are also eligible for the Superintendent Endorsement program, which requires additional coursework, along with four quarter hours for the superintendent internship course. ISBE states the following guidelines:

Individuals seeking the Superintendent endorsement must possess:

- a master’s degree with a GPA of 3.0 or better on a 4.0 scale
- proof of two years of teaching experience on a valid Illinois teaching license
- proof of two years of full-time administrative experience on a valid administrative license with the general administrative endorsement
• proof of passing the Basic Skills/TAP and Superintendent content-area tests.

Upon completion of the Superintendent program and the endorsement’s additional requirements, students must apply for the endorsement. Students are to work with the College of Education’s Licensure Officer when applying for the endorsement.

Teacher Leader Endorsement Option

Students pursuing a doctoral degree in Curriculum Studies are also eligible for the Teacher Leader Endorsement option, which requires additional coursework. To be eligible for the Teacher Leader endorsement program, students must possess:

• a bachelor’s degree and master’s degree from an accredited college or university,
• a valid teaching license
• at least two years of teaching experience
• proof of passing the Basic Skills or Test of Academic Proficiency.

Principal Licensure

Students pursuing a doctoral degree in Curriculum Studies are also eligible for the Principal Licensure program, which requires additional coursework. The Principal Licensure program at DePaul University is an approved Illinois State Board of Education (ISBE) program. It is a rigorous program preparing principals and assistant principals for work service in public and private schools in the state of Illinois.

To be eligible for the Principal Licensure program, students possess:

• a master’s degree from an accredited college or university with a GPA of 2.75 or higher at the undergraduate level and a 3.25 or higher at the graduate level.
• a valid Illinois teaching license
• at least two years of full-time successful teaching experience
• proof of passing the basic skills or test of academic proficiency.

Concentrations

• Curriculum Studies (degree only)
• Curriculum Studies plus Superintendent Endorsement
• Curriculum Studies plus Teacher Leader Endorsement
• Curriculum Studies plus Principal Licensure

<table>
<thead>
<tr>

<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Degree Requirements</td>
<td>76</td>
</tr>
<tr>
<td>Total hours required</td>
<td>76</td>
</tr>
</tbody>
</table>

Students will be able to:

• Describe major movements in curriculum history and apply them to current educational practices and controversies.
• Analyze the theoretical foundations of curriculum and curriculum studies.
• Conduct independent inquiry supported by appropriate research literature, methods, and theoretical frameworks.
• Honor diverse perspectives, improve curriculum, and promote student learning and well-being.
• Critically analyze relationships between schools, society, and curriculum, drawing especially on structural, ideological, and human development perspectives
• Produce an independent dissertation that includes extensive review of relevant literature, clear rationale for study design and methods supported by relevant literature, and collection and analysis of appropriate data in order to make a novel contribution to a problem of professional knowledge.

College Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

• Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
• Reflects on his or her own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
• Demonstrates a positive attitude and commitment to the profession
• Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
• Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
• Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
• Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
• Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
• Demonstrates concern for and protection of safety and well-being of others

Degree Conferral and Graduation

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.
To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

**Degree Requirements**

Students must maintain an overall GPA of 3.0 prior to the completion of 36 credit hours and 3.3 after the completion of 36 credit hours. Students are allowed no more than two grades of "C." Upon receiving a third grade of "C," students must retake the class in which the grade was received. Grades of "D" and "F" require that the course be retaken.

**Course Requirements**

**Core Courses: 24 quarter hours required**

Principal Preparation Option, Curriculum Studies (PhD)

This Illinois State Board of Education approved program is designed for licensed teachers who already hold a master's degree in education and are seeking principal licensure. The program offers a powerful, discipline-based curriculum with a problem-solving orientation that prepares effective and principled decision-makers. Graduates from the program are prepared to assume school and district administrative and supervisory roles.

Additional Program Requirements

An additional 44 quarter hours:

Teacher Leader Option, Curriculum Studies (PhD)

This program is ideal for students who are educators in K-12 environments and are seeking leadership roles, excluding principalship. Such roles include, but are not limited to: curriculum specialists, coaches, mentor teachers, department chair or lead teachers, content specialists, teacher leaders charged with supervisory roles, and program leaders. The program meets the standards set forth by the state of Illinois for the endorsement of Teacher Leader.

Additional Program Requirements

Cyber-Physical Systems Engineering (BS)

The BS in Cyber-Physical Systems Engineering program prepares students for engineering systems that integrate physical processes, computation, and control. Cyber-physical systems are used to manage electric grids and other infrastructures, home utilities and appliances, robots, self-driving vehicles, smart appliances, and Internet of Things (IoT).
The BS in Cyber-Physical Systems Engineering is the only engineering program offered at DePaul. Just like any engineering program, it has rigorous math and science requirements and a focus on building systems based on theoretical foundations and fundamental engineering design principles. Unlike most engineering programs, it is multi-disciplinary and includes a broad and deep foundation in computer science and software development.

Students graduating with a BS in Cyber-Physical Systems Engineering will be uniquely positioned for engineering careers in various industries and building the interconnected cyber-physical systems of tomorrow.

Program Requirements
Liberal Studies Requirements 52
Major Requirements 136
Open Electives 4
Total hours required 192

Learning Outcomes
Students will be able to:

• Model a computational problem, select appropriate algorithms and data structures for a solution, justify the correctness of the algorithm, and implement an application solving the problem.
• Analyze and select an algorithm based on system effects.
• Analyze a simple physical process; develop a mathematical model that describes it and feedback control system that controls it.
• Select the hardware (e.g., sensor, actuators, controllers, etc.) and integrate feedback control algorithms to implement a cyber-physical system.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1 Students must earn a C- or better in this course.

Learning Domains
Arts and Literature (AL) (p. 1300)
• 2 Courses Required

Historical Inquiry (HI) (p. 1304)
• 2 Courses Required

Math and Computing (MC) (p. 1306)
• Not Required

Philosophical Inquiry (PI) (p. 1307)
• 1 Course Required

Religious Dimensions (RD) (p. 1308)
• 1 Course Required

Scientific Inquiry (SI) (p. 1310)
• Not Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
• 2 Courses Required

Note
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Any 300-level CSC course
Any 300-level SE course

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

See www.cdm.depaul.edu (http://www.cdm.depaul.edu/) to see sample schedule of course requirements on a year-by-year basis.

Degree Requirements

Students in this degree must meet the following requirements:

- Complete a minimum of 192 credit hours (generally 48 courses).
- Earn a grade of C- or higher in WRD 103, WRD 104, and all Major and Minor courses.
- Earn a grade of D or higher in all other Liberal Studies and Open Elective courses.
- Maintain a cumulative GPA of 2.0 or higher.

Cybersecurity (BS)

The BS in Cybersecurity prepares students to evaluate and manage an organization’s computer, information and network security, as well as develop a solid information technology infrastructure.

Program Requirements                              Quarter Hours
Liberal Studies Requirements                       76
Major Requirements                                 96
Open Electives                                     20
Total hours required                               192
Learning Outcomes
Students will be able to:

• Identify the information security services provided by "Confidentiality," "Integrity," and "Availability" (CIA).
• Analyze the security controls present in an environment and identify any improvements needed to implement fully a defense-in-depth model.
• Design an enterprise infrastructure that implements a defense-in-depth model.
• Develop security policies for an enterprise environment.
• Interpret how some of the legal and regulatory requirements impact an enterprise environment.
• Evaluate the threat sources, attack vectors and asset vulnerabilities in an enterprise environment via a risk assessment.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Notes
Students must take one of the following ethics courses: CSC 208 (PI), IT 228 (PI), PHL 248/MGT 248 (PI) or REL 228/MGT 228 (RD)

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

Learning Domains
Arts and Literature (AL) (p. 1300)
• 3 Courses Required

Historical Inquiry (HI) (p. 1304)
• 2 Courses Required
Students who meet the admission requirements below may choose to apply to a combined degree program. Interested students should consult their faculty advisor regarding the application procedure. This program allows students to combine many CDM bachelor’s degrees with a CDM master’s degree following the structure outlined below.

**Admission Criteria**

- Minimum of 44 quarter hours earned
- Minimum of 12 quarter hours earned at DePaul
- GPA of 3.3 or higher in courses taken at DePaul
- Full admission to the designated master’s program requires meeting admission requirements (https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx) for that program
- Faculty endorsement from a CDM full-time faculty member

Students should discuss their interest in a CDM combined degree program with a CDM faculty advisor. Before admission to the degree, students should work with the faculty advisor to identify a course plan for the combined degree program, including the list of courses to take and how the courses will be applied toward both the undergraduate and graduate degrees. Non-CDM students can email the CDM advising office (advising@cdm.depaul.edu) if interested in a combined degree with a CDM master’s degree.

If you are currently a CDM student and interested in combining your CDM bachelor’s degree with a non-CDM graduate degree, please contact the respective college for admission and application procedures.

Students enrolled in the Bachelor of Arts in Computing or the Bachelor of Arts in Professional Studies with a major in Computing (https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx) joint degree programs between CDM and the School of Continuing and Professional Studies are eligible for this program. Interested students who meet the admission criteria for a combined degree should contact SCPS Academic Services (scpsadvising@depaul.edu) for more information. Advanced programs (e.g., JD/MS, MFA, and PhD) are not eligible for the combined degree program.

**Program Structure**

Students in the combined degree program take a maximum of three (3) graduate level courses that count toward both their bachelor’s and master’s degree requirements. Students may enroll in graduate level coursework in the junior and senior year only. Students in the combined degree program will receive the bachelor’s degree after meeting all graduation requirements including the minimum credit hours required for graduation.

To earn the master’s degree, the student must earn as many additional graduate credit hours as needed to reach the minimum number of graduate credit hours required in that master’s degree.

Only CDM courses can be taken as part of this program. Advanced programs (e.g., JD/MS, MFA, and PhD) are not eligible for the combined degree program.

**Maintaining Good Standing**

Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter.
The student and faculty advisor will be notified when the student’s cumulative GPA falls below 3.3 or when the student receives less than a C- in a graduate level course.

If a student’s cumulative GPA falls below 3.3, the student must earn a term GPA of 3.3 or above in the following quarter to stay in good standing. If the student does not achieve a 3.3 term GPA, then the student will be dismissed from the combined program and resume the traditional B.A./B.S./B.F.A.

If dismissed from the combined degree program after graduate courses have been passed, the graduate courses may only apply to the undergraduate degree. Should the student later be admitted to a graduate program, graduate courses applied to the undergraduate degree may not apply to the graduate program and may not be repeated if they are required in the declared graduate curriculum. Other graduate courses may be substituted in this case.

**Designing a Course of Study**

It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the combined degree program.

This course of study should include the graduate courses to be taken and the undergraduate courses that are replaced by the graduate courses. Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

It is advisable for the student and the faculty advisor to enter the proposed plan of study in the student communication record in BlueStar so it is available to the student and CDM faculty and staff.

**Registering for Master’s Degree Courses**

Combined degree students must meet regularly with their faculty advisor. The faculty advisor will initiate the registration process for all graduate level courses taken during the undergraduate career.

**Bachelor’s Degree to Master’s Degree Transition**

In order to be fully admitted to the designated master’s program, the student must meet all admission requirements for that program. When preparing to complete the undergraduate portion of the combined degree, students must submit the application for degree conferral for the undergraduate degree by the application deadline. At this time, the students should contact the CDM Academic Success Center about the procedure required to be formally admitted to the declared graduate program.

**Cybersecurity (MS)**

The MS in Cybersecurity is intended for students who wish to specialize in the security aspects of Information Technology. Students will learn how to design, implement and maintain software systems designed to support security policy and network architecture consistent with mitigating risk and preventing hostile attacks.

**Concentrations**

**Computer Security Concentration**

The Computer Security concentration focuses on fundamental security topics that arise in the design, analysis, and implementation of distributed systems. This concentration provides in-depth coverage of the theory and application of identity, authentication, access control, auditing, assessment & prevention of software vulnerabilities, and cryptography, in the context of modern enterprise-scale & web-based systems.

**Networking and Infrastructure Concentration**

The Networking and Infrastructure concentration focuses on network infrastructure and network security management aspects of information security. This concentration will provide in-depth coverage of network security infrastructure technologies such as firewalls, Virtual Private Networks (VPN), Intrusion Detection and Prevention Systems (IDS/IPS), vulnerability assessment tools, as well as overall security infrastructure engineering and design.

**Governance, Risk Management and Compliance Concentration**

The Governance, Risk Management, and Compliance concentration focuses on enterprise-level information security risk management, IT audit, and regulatory compliance. This cross-disciplinary concentration focuses on how to:

- develop an information security program;
- assess security risk in business processes;
- identify and implement a system of controls for security governance and regulatory compliance;
- plan and conduct IT audits; and
- develop business continuity and disaster recovery plans.

**Program Requirements**

<table>
<thead>
<tr>
<th>Program Requirements</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introductory Courses</td>
<td>0-24</td>
</tr>
<tr>
<td>Degree Requirements</td>
<td>52</td>
</tr>
<tr>
<td>Total hours required</td>
<td>52-76</td>
</tr>
</tbody>
</table>

**Learning Outcomes**

Students will be able to:

- Identify the information security services provided by "Confidentiality," "Integrity," and "Availability" (CIA).
- Develop a security awareness program adapted to the different stakeholder of an enterprise.
- Evaluate sets of security controls to enforce security policies.
- Select appropriate tools and methods to conduct a proper incident response and forensic investigation in an enterprise environment.

**Degree Requirements**

**Course Requirements**

No Introductory Course may be substituted for any other course at any level.

The Introductory, Foundation, Advanced and Major Elective course selections are determined by the concentration chosen.

**Introductory Courses**

Introductory courses may be waived for any of the following conditions:

- The student has the appropriate course work to satisfy an Introductory Course.
- The student has appropriate and verified professional experience to satisfy an Introductory Course.
• If an exam is available, the student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

Foundation Courses
Students must achieve an average GPA of 3.0 or better in the five Foundation Courses. Students who do not meet the Foundation Courses’ GPA requirement must retake the course with the lowest grade. If a number of such courses exist, it is up to the student to choose which class to retake. Only the higher grade will count toward the average grade for the purpose of completing the GPA Requirement. Students who do not meet the GPA requirements are encouraged to talk to their faculty advisor to discuss their options. To progress to the Advanced Courses of the degree, a student must complete the Introductory and Foundation Courses.

Degree Requirements
Students in this degree program must meet the following requirements:

• Complete a minimum of 52 graduate credit hours in addition to any required introductory courses of the designated degree program.
• Complete all graduate courses and requirements listed in the designated degree program.
• Earn a grade of C- or better in all courses of the designated degree program.
• Achieve a GPA of 3.0 or better among the five foundation courses.
• Maintain a cumulative GPA of 2.5 or higher.
• Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
• Students pursuing a second master’s degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.

Concentration Requirements
Concentrations, tracks and specializations provide focus to the degree. In addition to any degree requirements, students are required to choose one of the following:

• Computer Security Concentration, Cybersecurity (MS) (p. 330)
• Governance, Risk Management and Compliance Concentration, Cybersecurity (MS) (p. 331)
• Networking and Infrastructure Concentration, Cybersecurity (MS) (p. 333)
Major Elective Courses
Students must complete four (4) credit hours from CSEC courses in the range of 420 or higher or a course from the list of courses below. That course cannot be used to fulfill a student’s CSEC Concentration Area or Foundation Course requirements.

CDM Open Elective Courses
Students must complete eight (8) Credit Hours of CDM open electives. Open Elective courses must be within the range of 421-699 and must be chosen among CSC, CSEC, NET, SE, IS, ECT, IT, PM, IPD, HIT, HCI, and GAM courses.

Capstone Options
Students have the option of completing the Information Security Governance course (4 credit hours) or the Computer, Information and Network Security Capstone course (4 credit hours) or completing a Master’s Research Project (up to 8 credit hours) to fulfill their Capstone requirement. If a student chooses to complete a Master’s Research project for 8 credit hours, 4 credit hours of CSC 695 replace one major or open elective course in the M.S. in Computer, Information, and Network Security program. A student who completes a Master’s Research project also has the option of completing a Master’s Thesis.

Information Security Governance Course
• CSEC 587

Computer, Information and Network Security Capstone Course
• CSEC 594

Master’s Research
• Students interested in a more-in-depth study of a particular area can choose to work with a faculty member (not necessarily their academic advisor) on an independent study or research project. The student will register for up to 8 credit hours of CSC 695. If a student chooses to complete a Master’s Research Project for 8 credit hours, 4 credit hours of CSC 695 replace one more or open elective course in the MS in Computer, Information and Network Security program.

Master’s Thesis
• A student who has made an original contribution to the area (typically, through work done by CSC 695) may choose to complete a Master’s Thesis. The student and the student’s research advisor should form a Master’s Thesis Committee of 3 faculty. The student will need to submit to the committee a thesis detailing the results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for the 0 credit course CSC 698 and the transcript will show the thesis title as the course topic.

- IS 506 | BUSINESS CONTINUITY/DISASTER RECOVERY MANAGEMENT AND TACTICS |
- NET 563 | PROTOCOLS AND TECHNIQUES FOR DATA NETWORKS (FORMERLY TDC 563) |

### Major Elective Courses

Students must complete four (4) Credit Hours of CSEC courses in the range of 420 or higher or a course from the list of courses that follow. That course cannot be used to fulfill a student’s Concentration Area or Foundation Courses requirements.

SOFTWARE RISK MANAGEMENT

SE 526 SOFTWARE SECURITY ASSESSMENT

SE 529 SOFTWARE RISK MANAGEMENT

CDM Open Elective Courses

Students must complete four (4) Credit Hours of CDM Open Elective. Open Elective courses must be within the range of 421-699 and must be chosen among CSC, CSE, CSEC, NET, SE, IS, ECT, IT, PM, IPD, HIT, HCI, and GAM courses.

Capstone Options

Four (4) credit hours are required for the capstone requirement. Students have the option of completing the Information Security Governance course (4 credit hours) or the Computer, Information and Network Security Capstone course (4 credit hours) or completing a Master's Research Project (up to 8 credit hours) to fulfill their Capstone requirement. If a student chooses to complete a Master's Research project for 8 credit hours, 4 credit hours of CSC 695 replace one major or open elective course in the M.S. in Computer, Information, and Network Security program. A student who completes a Master's Research project also has the option of completing a Master's Thesis.

Information Security Governance Course

• CSEC 587

Computer, Information and Network Security Capstone Course

• CSEC 594

Master's Research

• Students interested in a more-in-depth study of a particular area can choose to work with a faculty member (not necessarily their academic advisor) on an independent study or research project. The student will register for up to 8 credit hours of CSC 695. If a student chooses to complete a Master's Research project for 8 credit hours, 4 credit hours of CSC 695 replace one major or open elective course in the M.S. in Computer, Information and Network Security program.

Master's Thesis

• A student who has made an original contribution to the area (typically, through work done by CSC 695) may choose to complete a Master's Thesis. The student and the student's research advisor should form a Master's Thesis Committee of 3 faculty. The student will need to submit to the committee a thesis detailing the results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for the 0 credit course CSC 698 and the transcript will show the thesis title as the course topic.

Cybersecurity (MS) Online

The MS in Cybersecurity is intended for students who wish to specialize in the security aspects of Information Technology. Students will learn how to design, implement and maintain software systems designed to support security policy and network architecture consistent with mitigating risk and preventing hostile attacks.

Concentrations

Computer Security Concentration

The Computer Security concentration focuses on fundamental security topics that arise in the design, analysis, and implementation of distributed systems. This concentration provides in-depth coverage of the theory and application of identity, authentication, access control, auditing, assessment & prevention of software vulnerabilities, and cryptography, in the context of modern enterprise-scale & web-based systems.

Networking and Infrastructure Concentration

The Networking and Infrastructure Concentration focuses on the network infrastructure and network security management aspects of information security. This concentration will provide in-depth coverage of network infrastructure technologies such as firewalls, Virtual Private Networks (VPN), Intrusion Detection and Prevention Systems (IDS/IPS), vulnerability assessment tools, as well as overall security infrastructure engineering and design.

Governance, Risk Management and Compliance Concentration

The Governance, Risk Management, and Compliance concentration focuses on enterprise-level information security risk management, IT audit, and regulatory compliance. This cross-disciplinary concentration focuses on how to:

• develop an information security program;
• assess security risk in business processes;
• identify and implement a system of controls for security governance and regulatory compliance;
• plan and conduct IT audits; and
• develop business continuity and disaster recovery plans.

Program Requirements

<table>
<thead>
<tr>
<th>Program Requirements</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introductory Courses</td>
<td>0-24</td>
</tr>
<tr>
<td>Degree Requirements</td>
<td>52</td>
</tr>
<tr>
<td>Total hours required</td>
<td>52-76</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

• Identify the information security services provided by "Confidentiality," "Integrity," and "Availability" (CIA).
• Develop a security awareness program adapted to the different stakeholder of an enterprise.
• Evaluate sets of security controls to enforce security policies.
• Select appropriate tools and methods to conduct a proper incident response and forensic investigation in an enterprise environment.

Degree Requirements

No Introductory Course may be substituted for any other course at any level.

The Introductory, Foundation, Advanced and Major Elective course selections are determined by the concentration chosen.

Introductory Courses

Introductory courses may be waived for any of the following conditions:

• The student has the appropriate course work to satisfy an Introductory Course.
• The student has appropriate and verified professional experience to satisfy an Introductory Course.
• If an exam is available, the student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

**Foundation Courses**
Students must achieve an average GPA of 3.0 or better in the five Foundation Courses. Students who do not meet the Foundation Courses' GPA requirement must retake the course with the lowest grade. If a number of such courses exist, it is up to the student to choose which class to retake. Only the higher grade will count toward the average grade for the purpose of completing the GPA Requirement. Students who do not meet the GPA requirements are encouraged to talk to their faculty advisor to discuss their options. To progress to the Advanced Courses of the degree, a student must complete the Introductory and Foundation Courses.

**Degree Requirements**
Students in this degree program must meet the following requirements:

- Complete a minimum of 52 graduate credit hours in addition to any required introductory courses of the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all courses of the designated degree program.
- Achieve a GPA of 3.0 or better among the five foundation courses.
- Maintain a cumulative GPA of 2.5 or higher.
- Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
- Students pursuing a second master's degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.

**Concentration Requirements**
Concentrations, tracks and specializations provide focus to the degree. In addition to any degree requirements, students are required to choose one of the following:

- Computer Security Concentration, Cybersecurity (MS) Online (p. 335)
- Governance, Risk Management and Compliance Concentration, Cybersecurity (MS) Online (p. 336)
- Networking and Infrastructure Concentration, Cybersecurity (MS) Online (p. 338)

SOFTWARE RISK MANAGEMENT

CDM Open Elective Courses
Students must complete four (4) Credit Hours of CDM Open Elective. Open Elective courses must be within the range of 421-699 and must be chosen among CSC, CSE, CSEC, NET, SE, IS, ECT, IT, PM, IPD, HIT, HCI, and GAM courses.

Capstone Options
Four (4) credit hours are required for the capstone requirement. Students have the option of completing the Information Security Governance course (4 credit hours) or the Computer, Information and Network Security Capstone course (4 credit hours) or completing a Master’s Research Project (up to 8 credit hours) to fulfill their Capstone requirement. If a student chooses to complete a Master’s Research project for 8 credit hours, 4 credit hours of CSC 695 (https://catalog.depaul.edu/search/?P=CSC%20695) replace one major or open elective course in the M.S. in Computer, Information, and Network Security program. A student who completes a Master’s Research project has also the option of completing a Master’s Thesis.

Information Security Governance Course
• CSEC 587 (https://catalog.depaul.edu/search/?P=CSEC%20587)

Computer, Information and Network Security Capstone Course
• CSEC 594 (https://catalog.depaul.edu/search/?P=CSEC%20594)

Master’s Research
• Students interested in a more-in-depth study of a particular area can choose to work with a faculty member (not necessarily their academic advisor) on an independent study or research project. The student will register for up to 8 credit hours of CSC 695 (https://catalog.depaul.edu/search/?P=CSC%20695). If a student chooses to complete a Master’s Research project for 8 credit hours, 4 credit hours of CSC 695 (https://catalog.depaul.edu/search/?P=CSC%20695) replace one more or open elective course in the M.S. in Computer, Information and Network Security program.

Master’s Thesis
• A student who has made an original contribution to the area (typically, through work done by CSC 695 (https://catalog.depaul.edu/search/?P=CSC%20695)) may choose to complete a Master’s Thesis. The student and the student’s research advisor should form a Master’s Thesis Committee of 3 faculty. The student will need to submit to the committee a thesis detailing the results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for the 0 credit course CSC 698 (https://catalog.depaul.edu/search/?P=CSC%20698) and the transcript will show the thesis title as the course topic.

Data Science (BA)
The Bachelor of Arts in Data Science is designed to meet the growing demand for data scientists or data analysts. The increasing availability of digital information is changing the way businesses and organizations operate. More and more companies are in need of data science professionals with deep analytical and technical skills who can analyze massive amounts of data and extract information from complex data sources.

Learning Outcomes
Students will be able to:
• Collect, manage, interpret, and analyze data in order to assist in data-driven decision-making and to identify and solve problems using data-based analytical approaches.
• Use statistical software packages and computational software platforms to execute various statistical and mathematical procedures for data analysis and to sanitize, process, and visualize data.
• Employ suitable tools and techniques to access data from various sources, such as data from relational databases or from the web.
• Critique data analyses performed on a particular data set, identify limitations in the inferences drawn from the data, and effectively communicate, in verbal form, the results.

College Core Requirements
Modern Language Requirements
Students who intend to graduate with the Bachelor of Arts (BA) degree will be required to demonstrate competence in a modern language equivalent to the proficiency attained from one year of college-level language study. Such competence may be demonstrated in one of several ways:
• completing the last course in the fourth-year high school sequence of any language
• completing the last course in the first-year college sequence of any language
• completing a college course beyond the first-year level in any language
• achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
• achieving a satisfactory rating in a proficiency examination accepted by DePaul
• achieving a score of 3 or higher on the Advance Placement (AP) test for any language
• achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
• achieving a satisfactory score on the CLEP examination

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact Student Records.

Students who complete an Inter-College Transfer (ICT) to the College of Science and Health will abide by the College of Science and Health Modern Language Requirement in place on the effective date of the ICT.
BA students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While Bachelor of Science (BS) students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

Major Declaration Requirements
All students in the College are required to declare a major field prior to beginning their junior year. After researching College programs, the student should declare a major field by visiting Campus Connection and using the Declarations and Inter-College Transfer tool. The student will then be assigned a faculty advisor or staff advisor in the department or program and should make an appointment to see that advisor at his or her earliest convenience.

To change major fields, or to declare a minor or concentration, the student must use the Declarations and Inter-College Transfer tool described above. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the College or an academic advisor in the Office for Academic Advising Support.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1 Students must earn a C- or better in this course.
2 Students with a primary major in Data Science are required to complete the Capstone offered by the Data Science department. Students double majoring or pursuing dual degrees with the primary major or primary degree in Data Science are required to complete the Capstone offered by the Data Science department. Data Science students in the University Honors Program shall take the University Honors Capstone. They are not expected to take both the Honors Capstone and the primary major or primary degree Capstone.

Learning Domains
Arts and Literature (AL) (p. 1300)  
• 3 Courses Required

Historical Inquiry (HI) (p. 1304)  
• 2 Courses Required

Math and Computing (MC) (p. 1306)  
• Not Required

Philosophical Inquiry (PI) (p. 1307)  
• 2 Courses Required

Religious Dimensions (RD) (p. 1308)  
• 2 Courses Required

Scientific Inquiry (SI) (p. 1310)  
• 1 Lab Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)  
• 2 Courses Required

Notes
Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Data Science (BS)

The Bachelor of Science in Data Science is designed to meet the growing demand for data scientists or data analysts who can manage and analyze structured and unstructured data sets and extract meaningful knowledge to inform decisions. The curriculum consists of courses in computer science, mathematics and data management. Students learn about data processing and application development, machine learning and statistical modeling techniques, and the analytical and communication skills to explain results in a meaningful way. DePaul offers a Bachelor of Science degree through the School of Computing and a Bachelor of Arts degree in the College of Science and Health. The two programs share a common core of courses focusing on fundamental skills in data science that students take during the first two years. After the second year, the two degrees diverge in their emphasis and level of specialization.

Learning Outcomes

Students will be able to:

- Explain how data is represented for analytic applications.
- Select and apply techniques for data preparation including normalization and reduction.
- Perform exploratory analysis to gain preliminary understanding of data.
- Develop and evaluate predictive models.
- Perform an independent data science investigation, from data gathering and cleaning to application of data mining algorithms.

Data Science (MS)

The program provides students with the skills and knowledge to be successful in a data science career. At the end of program, graduates have the skills to analyze large datasets and to develop modeling solutions to support decision-making, a good understanding of the fundamental principles of marketing and customer relationship management, and communication skills to present results effectively to a non-technical business audience.

Concentrations

Computational Methods Concentration

The Computational Methods concentration addresses the increasing demand of data scientist with strong technical knowledge and skills to manage and extract information from massive amounts of data. This concentration is recommended for students who are interested in the more technical aspects of data science.

Health Care Concentration

The Health Care concentration addresses the increasing need of data scientists responsible for gathering, integrating, analyzing and presenting health care data. Students will learn analytics methods to support clinical decision systems, to improve patients’ outcomes and patients’ experience, and to improve clinical care and costs.

Hospitality Concentration

The Hospitality concentration addresses the increasing demand of data scientists that combine the skills to extract information from massive amounts of data with the competency in hospitality revenue analytics and optimization. The focus of this concentration is to teach students the analytics needs and challenges of the hospitality and tourism industry.

Marketing Concentration

Students take courses in multivariate statistics, advanced data mining and machine learning together with courses in marketing analytics and customer relationship management to gain a deep understanding of the challenges and goals of business applications.
Learning Outcomes

Students will be able to:

- Explain how data is represented for analytic applications.
- Select and apply techniques for data preparation including normalization and reduction.
- Develop and evaluate predictive models.
- Perform an independent data science investigation, from data gathering and cleaning to application of data mining algorithms to interpretation of results.

Degree Requirements

Course Requirements

No Introductory Course may be substituted for any other course at any level.

Introductory, Foundation, Advanced, and Elective course selections are determined by the concentration chosen.

Introductory Courses

Introductory courses may be waived for any of the following conditions:

- The student has the appropriate course work to satisfy an Introductory Course.
- The student has appropriate and verified professional experience to satisfy an Introductory Course.
- If an exam is available, the student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

Degree Requirements

Students in this degree program must meet the following requirements:

- Complete a minimum of 52 graduate credit hours in addition to any required introductory courses of the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
- Students pursuing a second master’s degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.

Concentration Requirements

Concentrations, tracks and specializations provide focus to the degree. In addition to any degree requirements, students are required to choose one of the following:

- Computational Methods Concentration, Data Science (MS) (p. 344)
- Health Care Concentration, Data Science (MS) (p. 346)
- Hospitality Concentration, Data Science (MS) (p. 348)
- Marketing Concentration, Data Science (MS) (p. 349)

Capstone Options

Four (4) credit hours are required for the capstone requirement. Students have the option of completing a real world Data Analytics Project, or completing the Predictive Analytics Capstone course, or participating in a Data Analytics Internship or completing a Master’s Thesis to fulfill their Capstone requirement.

- **Data Analytics Project**
  - The real data analytics project is for students who are interested in working in a small team on a research project under the supervision of a CDM faculty. A list of available projects is published on the dampa center website (http://dampa.cdm.depaul.edu). Students who are interested in proposing their own data analytics project are encouraged to contact a CDM faculty member teaching analytics courses as soon as possible. Students must enroll in CSC 695 for a total of 4 credit hours taken in two consecutive quarters (2 credit hours for 2 quarters) to satisfy the capstone requirement. The faculty who supervises the project will initiate enrollment in the CSC 695 course.

- **Predictive Analytics Capstone course**
  - DSC 672 course offers the opportunity of working on an analytics project in a more structured class format. Students enrolled in the courses will be working in teams on a data analytics project under the supervision of the course instructor.

- **Analytics Internship**
  - An internship offers students the opportunity to integrate their academic experience with on-the-job training in an analytics related field. Students must enroll in CSC 697 for 4 credit hours to satisfy the practicum requirement. These are the steps:
    i. Secure an internship with focus in analytics.
    ii. International Students must obtain the appropriate practical training form and meet with an advisor in the CDM Academic Center for approval. (http://oiss.depaul.edu/Requests/Forms/index.asp)
    iii. Login to MyCDM and click the “MyInternships” link on the left to start the course enrollment process.

- **Master’s Thesis**
  - A student who has made an original contribution to the area (typically, through work done by CSC 695 may choose to complete a Master’s Thesis. The student and the student’s research advisor should form a Master’s Thesis Committee of 3 faculty. The student will need to submit to the committee a thesis detailing the results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for the 0 credit hour course CSC 698 and the transcript will show the thesis title as the course topic.

Data Science (MS), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These
12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

**DePaul Undergraduate Degree + Data Science (MS)**

The Data Science (MS) combined degree program is open to all undergraduate majors across the university.

Students who are interested in this program and meet the following criteria

- Sophomore status (at least 44 quarter hours earned)
- Minimum of 12 quarter hours earned at DePaul
- GPA of 3.3 or higher in courses taken at DePaul
- Full admission to the designated master's program requires meeting admission requirements ([https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx](https://www.cdm.depaul.edu/Admission-and-Aid/Pages/Grad-Program-Requirements.aspx)) for that program
- Faculty endorsement from a CDM full-time faculty member

Student should discuss their interest in this combined degree program with a CDM Data Science faculty advisor prior to submitting the application for admission.

If accepted, a student can take up to three graduate courses (12 credits). These three courses count towards both the bachelor's program and the Master of Science degree. Students will pay the current undergraduate tuition rate for these three courses.

**Maintaining Good Standing**

- Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter
- The student and Faculty Advisor will be notified when the student’s cumulative GPA falls below 3.3 or when the students receives less than a C- in graduate level course
- If a student’s cumulative GPA falls below 3.3, the student must earn a term GPA of 3.3 or above in the following quarter to stay in good standing. If the student does not achieve a 3.3 term GPA, then the student will be dismissed from the combined program and resume the traditional BA/BS.
- Graduate courses passed before dismissal will not be counted and may not be retaken. If the student pursues graduate study, other graduate courses must be substituted. To apply to a CDM graduate degree program, following dismissal from the combined program and resume the traditional BA/BS.
- It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the Combined Degree Program.

This course of study may include which undergraduate classes to avoid taking in order to take the graduate version. Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

**Registering for Master’s Degree Courses**

The student’s advisor must complete the BS/MS Request form, under the Faculty tab on the CDM Intranet, to request the student’s enrollment in the three graduate courses. The form will require the following data: student’s full name, graduate course and section, and the undergraduate course to be substituted for. The CDM dean’s office will process the enrollment.

**Bachelor’s Degree to Master’s Degree Transition**

In order to be fully admitted to the designated master's program, the student must meet all admission requirements for that program. Learn more about master’s degree admission requirements ([http://www.cdm.depaul.edu/Prospective%20Students/Pages/MastersDegreeStudents.aspx](http://www.cdm.depaul.edu/Prospective%20Students/Pages/MastersDegreeStudents.aspx)). Students will follow the master's degree program requirements for the term they are admitted to the master’s degree program.

**Double Demon Scholarship**

The Double Demon scholarship, offered exclusively to DePaul alumni, covers 25 percent of the tuition for a master's degree or select certificate programs. Combined degree program students are eligible.

Alumni from any of DePaul’s colleges who are admitted into a graduate degree program from one of these programs automatically qualify for the Double Demon Scholarship. This scholarship is available for new part-time or full-time students who began a master’s degree in CDM in winter 2012-2013 or later and the other colleges beginning in winter 2013-2014. It cannot be applied retroactively.

There is no limit to the amount of courses that can be taken by eligible students. However, students may not take more than four courses in any quarter without permission from the college. The scholarship cannot be applied to cover fees or other non-tuition costs.

Capstone Options

Four (4) Credit Hours are required for the capstone requirement. Students have the option of completing a real world Data Analytics Project, or completing the Predictive Analytics Capstone course, or participating in a Data Analytics Internship or completing a Master’s Thesis to fulfill their Capstone requirement.

- Data Analytics Project
  - The real data analytics project is for students who are interested in working in a small team on a research project under the supervision of a CDM faculty. A list of available projects is published on the DAMPA Center website (http://dampa.cdm.depaul.edu). Students who are interested in proposing their own data analytics project are encouraged to contact a CDM faculty member teaching analytics courses as soon as possible. Students must enroll in CSC 695 for a total of 4 credit hours taken in two consecutive quarters (2 credit hours for 2 quarters) to satisfy the capstone requirement. The faculty who supervises the project will initiate enrollment in the CSC 695 course.

- Predictive Analytics Capstone course
  - DSC 672 course offers the opportunity of working on an analytics project in a more structured class format. Students enrolled in the courses will be working in teams on a data analytics project under the supervision of the course instructor.

- Analytics Internship
  - An internship offers students the opportunity to integrate their academic experience with on-the-job training in an analytics related field. Students must enroll in CSC 697 for 4 credit hours to satisfy the practicum requirement. These are the steps:
    i. Secure an internship with focus in analytics.
    ii. International Students must obtain the appropriate practical training form and meet with an advisor in the CDM Academic Center for approval (http://oiss.depaul.edu/Requests/Forms/index.asp (http://oiss.depaul.edu/Requests/Forms/)).
    iii. Login to MyCDM and click the “MyInternships” link on the left to start the course enrollment process.

- Master’s Thesis
  - A student who has made an original contribution to the area (typically, through work done by CSC 695) may choose to complete a Master’s Thesis. The student and the student’s research advisor should form a Master’s Thesis Committee of 3 faculty. The student will need to submit to the committee a thesis detailing the results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for the 0 credit hour course CSC 698 and the transcript will show the thesis title as the course topic.

Data Science (MS) Online

The program provides students with the skills and knowledge to be successful in a data science career. At the end of program, graduates have the skills to analyze large datasets and to develop modeling solutions to support decision-making, a good understanding of the fundamental principles of marketing and customer relationship management, and communication skills to present results effectively to a non-technical business audience.

Concentrations

Computational Methods Concentration

The Computational Methods concentration addresses the increasing demand of data scientist with strong technical knowledge and skills to manage and extract information from massive amounts of data. This concentration is recommended for students who are interested in the more technical aspects of data science.

Health Care Concentration

The Health Care concentration addresses the increasing need of data scientists responsible for gathering, integrating, analyzing and presenting health care data. Students will learn analytics methods to support clinical decision systems, to improve patients’ outcomes and patients’ experience, and to improve clinical care and costs.

Hospitality Concentration

The Hospitality concentration addresses the increasing demand of data scientists that combine the skills to extract information from massive amounts of data with the competency in hospitality revenue analytics and optimization. The focus of this concentration is to teach students the analytics needs and challenges of the hospitality and tourism industry.

Marketing Concentration

<table>
<thead>
<tr>
<th>Program Requirements</th>

</tr>
</thead>
<tbody>
<tr>
<td>Introductory Courses</td>
<td>0-12</td>
</tr>
<tr>
<td>Degree Requirements</td>
<td>52</td>
</tr>
<tr>
<td>Total hours required</td>
<td>52-64</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

- Explain how data is represented for analytic applications.
- Select and apply techniques for data preparation including normalization and reduction.
- Develop and evaluate predictive models.
- Perform an independent data science investigation, from data gathering and cleaning to application of data mining algorithms to interpretation of results.

Degree Requirements

No Introductory Course may be substituted for any other course at any level.
Introductory, Foundation, Advanced, and Elective course selections are determined by the concentration chosen.

**Introductory Courses**
Introductory courses may be waived for any of the following conditions:

- The student has the appropriate course work to satisfy an Introductory Course.
- The student has appropriate and verified professional experience to satisfy an Introductory Course.
- If an exam is available, the student passes a Graduate Assessment Examination (GAE) in the Introductory Course area.

**Degree Requirements**
Students in this degree program must meet the following requirements:

- Complete a minimum of 52 graduate credit hours in addition to any required introductory courses of the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
- Students pursuing a second master's degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.

**Concentration Requirements**
Concentrations, tracks and specializations provide focus to the degree. In addition to any degree requirements, students are required to choose one of the following:

- Computational Methods Concentration, Data Science (MS) Online (p. 351)
- Health Care Concentration, Data Science (MS) Online (p. 352)
- Hospitality Concentration, Data Science (MS) Online (p. 354)
- Marketing Concentration, Data Science (MS) Online (p. 355)

</tr>
</tbody>
</table>

1 Some advanced courses may not be offered online. Students may consult with their faculty advisor to determine suitable course substitutions.

#### Elective Courses

Students must take eight (8) Credit Hours of graduate level elective courses in the areas of statistical modeling, data mining or database technologies. Elective courses must be selected from the following list:
Course | Title | Quarter Hours
--- | --- | ---
CMNS 549 | SPECIAL TOPICS IN ORGANIZATIONAL COMMUNICATION |  
CSC 452 | DATABASE PROGRAMMING |  
CSC 481 | INTRODUCTION TO IMAGE PROCESSING |  
CSC 482 | APPLIED IMAGE ANALYSIS |  
CSC 521 | MONTE CARLO ALGORITHMS |  
CSC 528 | COMPUTER VISION |  
CSC 543 | SPATIAL DATABASES & GEOGRAPHIC INFORMATION SYSTEMS |  
CSC 555 | MINING BIG DATA |  
CSC 575 | INTELLIGENT INFORMATION RETRIEVAL |  
CSC 576 | COMPUTATIONAL ADVERTISING |  
CSC 578 | NEURAL NETWORKS AND DEEP LEARNING |  
CSC 594 | TOPICS IN ARTIFICIAL INTELLIGENCE |  
CSC 598 | TOPICS IN DATA ANALYSIS |  
DSC 425 | TIME SERIES ANALYSIS AND FORECASTING (FORMERLY CSC 425) |  
DSC 433 | SCRIPTING FOR DATA ANALYSIS (FORMERLY CSC 433) |  
DSC 540 | ADVANCED MACHINE LEARNING (FORMERLY CSC 529) |  
DSC 465 | DATA VISUALIZATION (FORMERLY CSC 465) |  
DSC 478 | PROGRAMMING MACHINE LEARNING APPLICATIONS (FORMERLY CSC 478) |  
DSC 480 | SOCIAL NETWORK ANALYSIS (FORMERLY CSC 495) |  
DSC 484 | WEB DATA MINING (FORMERLY ECT 584) |  
DSC 510 | HEALTH DATA SCIENCE |  
GEO 441 | GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT |  
GEO 442 | GEOGRAPHICAL INFORMATION SYSTEMS (GIS) FOR SUSTAINABLE URBAN DEVELOPMENT |  
GPH 565 | DESIGNING FOR VISUALIZATION |  
HCI 512 | INFORMATION VISUALIZATION AND INFOGRAPHICS |  
IPD 451 | BIG DATA AND NOSQL PROGRAM |  
IS 478 | INFORMATION TECHNOLOGY CONSULTING |  
IS 549 | DATA WAREHOUSING |  
IS 550 | ENTERPRISE DATA MANAGEMENT |  
IS 574 | BUSINESS INTELLIGENCE AND ANALYTICS SYSTEMS |  

Capstone Options

Four (4) Credit Hours are required for the capstone requirement. Students have the option of completing a real world Data Analytics Project, or completing the Predictive Analytics Capstone course, or participating in a Data Analytics Internship or completing a Master’s Thesis to fulfill their Capstone requirement.

- Data Analytics Project
  - The real data analytics project is for students who are interested in working in a small team on a research project under the supervision of a CDM faculty. A list of available projects is published on the DAMPA Center website (http://dampa.cdm.depaul.edu). Students who are interested in proposing their own data analytics project are encouraged to contact a CDM faculty member teaching analytics courses as soon as possible. Students must enroll in CSC 695 for a total of 4 credit hours taken in two consecutive quarters (2 credit hours for 2 quarters) to satisfy the capstone requirement. The faculty who supervises the project will initiate enrollment in the CSC 695 course.

- Predictive Analytics Capstone course
  - DSC 672 course offers the opportunity of working on an analytics project in a more structured class format. Students enrolled in the courses will be working in teams on a data analytics project under the supervision of the course instructor.

- Analytics Internship
  - An internship offers students the opportunity to integrate their academic experience with on-the-job training in an analytics related field. Students must enroll in CSC 697 for 4 credit hours to satisfy the practicum requirement. These are the steps:
    1. Secure an internship with focus in analytics.
    2. International Students must obtain the appropriate practical training form and meet with an advisor in the CDM Academic Center for approval (http://oiss.depaul.edu/Requests/Forms/index.asp (http://oiss.depaul.edu/Requests/Forms/)).
    3. Login to MyCDM and click the “MyInternships” link on the left to start the course enrollment process.

- Master’s Thesis
  - A student who has made an original contribution to the area (typically, through work done by CSC 695) may choose to complete a Master’s Thesis. The student and the student’s research advisor should form a Master’s Thesis Committee of 3 faculty. The student will need to submit to the committee a thesis detailing the results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for the 0 credit hour course CSC 698 and the transcript will show the thesis title as the course topic.

**Decision Analytics (BA)**

The Bachelor of Arts in Decision Analytics degree from the School of Continuing and Professional Studies (SCPS) is an interdisciplinary degree dedicated to the collection, analysis and communication of Big Data, a term used to reflect the challenging complexities and dynamic nature of large data sets today. Decision analysts have a keen sense of data and are able to apply critical reasoning to both qualitative and quantitative data in context. They are able to ask the right questions and formulate problems to facilitate analysis. As such, they are able to understand the organization from a systems perspective. They are comfortable learning new technologies in this dynamic field, particularly database, statistical and visualization software. They also excel in working collaboratively, dealing with ambiguity, creative problem solving, and communication skills.

The BA in Decision Analytics has a strong industry orientation that is specifically geared to provide students with the knowledge and skills they
can apply in jobs they hold today and to enable them to advance in their careers.

This major is designed for working adult students and provides:

- Flexible scheduling including online options available
- Financial Aid, flexible payment options, and special adult student tuition pricing
- Acceleration and affordability through transfer credit and prior learning assessment (PLA) credit
- Opportunities to combine bachelor’s and master’s programs and apply graduate courses to both programs
- Individualized program planning, course selection and advising assistance provided
- Enhanced career opportunities through professional portfolio development, and career placement services instruction from industry practitioners, and wide-ranging Career Services support
- Degree granted by DePaul University, with its excellent academic reputation and the opportunity to join its prestigious and extensive alumni network

**Learning Outcomes**

Students will be able to:

- Select and apply data analysis strategies to clarify situations.
- Identify patterns and relationships in data.
- Evaluate decisions based on logical analysis of data.
- Investigate problems using qualitative and quantitative methods.
- Apply ethical principles in context.
- Apply various methods of communication in multiple settings.
- Analyze and apply different liberal arts perspectives.

**College Core (78 credit hours, 20 credit hours in residence)**

**Lifelong Learning Requirements (32 credit hours, 16 credit hours in residence)**

Concentration Requirements (24 credit hours)

Students must also complete the requirements from either the General or Computing concentrations.

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

- Computing Concentration, Decision Analytics (BA) (p. 358)
- General Concentration, Decision Analytics (BA) (p. 358)

Computing Concentration, Decision Analytics (BA)

Students interested in continuing their study of decision analytics with a master's degree in Predictive Analytics or a similar computing field should complete this concentration.

Students must fulfill a total of 24 credits in the courses below (any additional credit hours taken are eligible toward Open Electives requirements):

<table>

</tbody>
</table>

Open Electives (46 credit hours)

Open Electives credit is required to meet the minimum graduation requirement of 192 credit hours. Students can individualize their learning in several ways using the Open Electives. Open Electives can be fulfilled through courses offered by the School of Continuing and Professional Studies and other DePaul colleges, transfer courses, assessment of prior learning (PLA), and independent studies.

General Concentration, Decision Analytics (BA)

Students who wish to pursue a master's degree in Predictive Analytics or a similar computing field should take the CSC courses. Students interested in a master's degree in Marketing Analysis or a similar marketing field should take MKT courses.

Students must fulfill a total of 24 credits selecting from any of the courses below (any additional credit hours taken are eligible toward Open Electives requirements):

<table>
<thead>
<tr>

### Digital Communication and Media Arts - CDM (MA)

The MA in Digital Communication and Media Arts is an interdisciplinary program that provides a foundation of media theory with hands-on experience in the latest digital technology. Students learn to develop and execute effective stories and campaigns across the ever-widening spectrum of digital media, while strengthening and expanding their chosen skill sets from classes across the College of Computing and Digital Media, as well as the College of Communication (degree partner).

<table>
<thead>
<tr>
<th>Program Requirements</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introductory Courses</td>
<td>0-8</td>
</tr>
<tr>
<td>Degree Requirements</td>
<td>52</td>
</tr>
<tr>
<td>Total hours required</td>
<td>52-60</td>
</tr>
</tbody>
</table>

### Learning Outcomes

Students will be able to:

- Understand and effectively explain how digital technology has affected communication practices across a range of subjects and disciplines, including the underlying ethical issues digital technology has brought to contemporary society.
- Assess and inventory relevant media projects; apply varied research methods and design thinking to develop new and relevant digital media products that address contemporary problems.
- Adequately demonstrate key competencies in still and moving image production, graphic and interactive design, and other technologies related to digital media arts.
- Identify and employ the affordances of digital media components in order to effectively develop a story or campaign across multiple media formats.
- Develop and deliver professional-level project pitches and research presentations.

### Degree Requirements

#### Course Requirements

No Introductory course may be substituted for any other course at any level. Foundation, Advanced, and Elective course selections are determined by the concentration chosen.

#### Introductory Courses

Introductory courses may be waived for any of the following conditions:

- The student has appropriate and verified professional experience to satisfy an Introductory Course.
- If an exam is available, the student passes a Graduate Assessment Examination (GAE) in the Introductory Course area, if such an examination is available.

#### Degree Requirements

Students in this degree program must meet the following requirements:

- Complete a minimum of 52 graduate credit hours in addition to any required introductory courses of the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Students pursuing a second (or more) graduate degree may not double count or retake any course that applied toward the completion of a prior graduate degree. If a required course in the second degree was already completed and applied toward a previous degree, the student must meet with a faculty advisor to discuss a new course to be completed and substituted in the new degree. This rule also applies to cross-listed courses, which are considered to be the same course but offered under different subjects.
- Students pursuing a second master's degree must complete a minimum of 52 graduate credit hours beyond their first designated degree program in addition to any required introductory courses in their second designated degree program.

Students with a GPA of 3.9 or higher will graduate with distinction.

### Concentration Requirements

Concentrations, tracks and specializations provide focus to the degree. In addition to any degree requirements, students are required to choose one of the following:

- Digital Communication Concentration, Digital Communication and Media Arts - CDM (MA) (p. 359)
- Media Arts Concentration, Digital Communication and Media Arts - CDM (MA) (p. 361)

### Digital Communication Concentration, Digital Communication and Media Arts - CDM (MA)

#### Course Requirements

The Digital Communication track requires an Introductory Competency course (4 credit hours) plus 13 courses (52 credit hours): four (4) core courses and nine (9) elective courses and a degree completion option.
Introductory Competency Course

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>DMA 402</td>
<td>INTRO TO VISUAL COMMUNICATIONS PRINCIPLES</td>
<td></td>
<td>4</td>
</tr>
<tr>
<td>or DMA 405</td>
<td>INTRO TO VISUAL COMMUNICATION TOOLS</td>
<td></td>
<td>1</td>
</tr>
</tbody>
</table>

1 Evaluation of the Introductory Competency course will follow standard CDM practice. All or part of the Introductory Competency course may be waived if a student has the equivalent academic background, or can demonstrate core technology competency.

Students may take an additional competency course as a Media Arts elective.

Core Courses

Students are required to take all of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMNS 570</td>
<td>INTRODUCTION TO DIGITAL CMN</td>
<td></td>

<td>CREATIVE PROCESS AND STRATEGY</td>
<td></td>
<td>4</td>
</tr>
<tr>
<td>MCS 575</td>
<td>DIGITAL MEDIA ETHICS</td>
<td></td>
<td>4</td>
</tr>
</tbody>
</table>

Digital Elective Courses

Students are required to take at least one (1) elective course that focuses on digital technology from each area: MCS, JOUR, and PRAD. Students must take two (2) media arts electives (from the College of Computing and Digital Media). Students must also take four (4) additional courses (two (2) if student chooses the Master's Project degree completion option, taking DMA 695 and CMNS 595), either from another College of Communication graduate program, the College of Computing and Digital Media, pre-approved outside electives, or in another department/college at DePaul. Outside electives must be approved by graduate advisor or program director.

Students who want to switch between DCMA tracks should be aware that some completed courses in one track may not count towards the requirements of the other. If a student is considering switching tracks, they should consult their advisor and graduate director for assistance.

**Completion Options**

### Comprehensive Exam
Students complete a three-part comprehensive exam based on questions derived from a minimum of one College of Communication core course (CMNS 570 or MCS 575) and two additional courses pulled from either the other core course and/or from the College of Communication elective courses.

### Graduate Scholarly Paper/Project
In consultation with a faculty member in the College of Communication (a professor with whom the student has had a class), the student should choose a paper or project they did for that professor’s course. This paper/project should be something to which the student wishes to expand upon or devote more time. This option is available to students holding a 3.5 GPA or higher and who have completed at least 10 courses (40 credit hours) in their program.

### Master’s Project
Two project courses (DMA 695 and CMNS 595) replace two additional elective classes. Students will enroll in CMNS 595 in the quarter they defend their project. The student will create an original project (i.e., web- or film-based projects, or projects related to professional or educational organizations) and a 30- to 40-page accompanying written report/analysis. This option is available to students holding a 3.7 GPA or higher and who have completed at least 6 courses (24 credit hours) in their program. Grade Requirements All students are required to maintain a cumulative GPA of 3.000 in their course work.

### Grade Requirements
All students are required to maintain a cumulative GPA of 3.000 in their coursework. If a student’s cumulative GPA falls below 3.000, the student will be allowed to complete an additional 16 credits or 3 quarters (whichever comes first) to attain the 3.000 minimum GPA. If the cumulative GPA remains below a 3.000 at the conclusion of this time period, the student may be dismissed from the program.

The student’s cumulative and term GPAs along with overall academic performance will be factored into the dismissal decision.

##### Major Elective Courses

Students are required to take eight (8) Credit Hours of Major Elective Courses according to the following criteria:

- Students should choose the eight (8) Credit Hours of graduate level elective courses from a College of Communication graduate program.
Master’s Thesis Project
Students must complete a Master’s Thesis Project as part of the degree requirements. Students have two options for how to complete the Master’s Thesis Project.

- Individual - The student will create an original project and a 20-30 page accompanying written research documentation and report/analysis.
- Collaborative - Students work in teams of 2-4 students to complete an original project and a 40-60 page accompanying written research documentation and report/analysis.

Students must have completed the necessary prerequisite classes and at least 8 courses (32 credit hours) in the DCMA program toward their 52 required Credit Hours (credits earned from Introductory Courses do not count toward the required total credits). Students should schedule a meeting with a faculty member to discuss the requirements.

Thesis milestones:

- Fall - Before the end of the fall quarter, students should submit a written proposal to advising faculty outlining their Thesis concept.
- Winter - Enroll in DMA 695.
- Spring - Enroll in DMA 698.
- Spring - Participate in end of year showcase and/or symposium.

Digital Communication and Media Arts - Communication (MA)
The Digital Communication and Media Arts program will teach students how digital technology has affected communication and artistic practices, and how to effect change in communication and artistic practices through the integration of digital technology. The learning goals for the MA in Digital Communication and Media Arts are grounded in both practice and theory. By taking advantage of the wealth of courses that focus on digital communication and digital technology in the College of Communication and the College of Computing and Digital Media, the degree program provides students an opportunity to experience and apply digital technology in multiple professions.

The Master of Arts in Digital Communication and Media Arts integrates multiple topics all centered on the way contemporary technology is changing communication practices, for a truly interdisciplinary degree program. This is a practical degree, in that it teaches students skills utilizing technology, while giving them the critical tools to become better communicators in a digital environment.

Students choose between two tracks: The Digital Communication track is offered through the College of Communication, while the Media Arts track is offered through the College of Computing and Digital Media.

### Program Requirements

<tbody>
<tr>
<td>Competency Course</td>
<td>0-8</td>
</tr>
<tr>
<td>Degree Requirements</td>
<td>52</td>
</tr>
<tr>
<td>Total hours required</td>
<td>52-60</td>
</tr>
</tbody>
</table>

### Learning Outcomes

Students will be able to:

- Explain how digital technology has affected communication practices across a range of subjects and disciplines.
- Compare new technological practices and evaluate changes in technological practices across a range of communication subjects.
- Demonstrate key competencies in video production, audio production, graphic design, and other technologies within digital media arts.
- Identify the underlying ethical issues that the advent of digital technology has brought to contemporary society.

## Degree Requirements

### Course Requirements

Specific course requirements are determined by the concentration chosen. Please see each concentration page for detailed information.

### Degree Requirements

Students in this degree program must meet the following requirements:

- Complete a minimum of 52 graduate credit hours in addition to any required competency courses of the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in all courses of the designated degree program.
- Maintain a cumulative GPA of 3.00 or higher.

### Optional Latino Media & Communication Concentration

The concentration in Latino Media & Communication is comprised of at least three graduate courses drawn from the areas of advertising, journalism, media and cinema studies, multicultural communication, organizational communication and public relations. Graduate students in any of the College of Communication Master of Arts programs can elect to complete the Latino Media & Communication concentration. Students may need to use outside electives to complete this concentration.

Students who complete the concentration will:

- Develop an understanding of the heterogeneous and rapidly changing Latino communities locally, nationally and globally.
- Ground their knowledge of intercultural studies within a more extensive and concrete knowledge of a particular (even though diverse), rapidly growing, and increasingly important population within the U.S.
- Increase their cross-cultural competence (understanding and ability to dialogue across difference, develop cultural sensitivity and awareness) with Latino communities.
- Enhance their capacity to communicate with and learn from Latino populations in the workplace, in community situations and other sites of engagement.
- Recognize the impact of the movement of Latinos across the globe and develop the skills to critically consume and produce media, public relations and advertisement representations that communicate to and about Latino communities.
- Develop field-specific knowledge of Latino media and communication along with an understanding of how Latino studies shapes other fields of communication.
Courses

Students are required to take three courses (12 credits) from the following list:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMNS 509</td>
<td>SPECIAL TOPICS IN MULTICULTURAL COMMUNICATION</td>
<td>1</td>
</tr>
<tr>
<td>CMNS 542</td>
<td>MULTICULTURAL COMMUNICATION IN THE WORKPLACE</td>
<td></td>
</tr>
<tr>
<td>JOUR 515</td>
<td>SPECIAL TOPICS IN JOURNALISM</td>
<td>1</td>
</tr>
<tr>
<td>MCS 521</td>
<td>TOPICS IN CINEMA STUDIES</td>
<td>1</td>
</tr>
<tr>
<td>MCS 533</td>
<td>LATIN AMERICAN CINEMA/MEDIA</td>
<td></td>
</tr>
<tr>

</tr>
<tr>
<td>CMN 598</td>
<td>STUDY ABROAD</td>
<td>1</td>
</tr>
</tbody>
</table>

¹ Topic must be related to Latino Media and Communication.

Concentration Requirements

Concentrations, tracks and specializations provide focus to the degree. In addition to any degree requirements, students are required to choose one of the following:

- Digital Communication Concentration, Digital Communication and Media Arts - Communication (MA) (p. 363)
- Media Arts Concentration, Digital Communication and Media Arts - Communication (MA) (p. 365)

Digital Communication and Media Arts (MA), Combined Bachelor’s + Master’s Degree

The combined Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

DePaul Undergraduate Degree + Digital Communication and Media Arts (MA)

The Digital Communication and Media Arts (MA) combined degree program is open to all undergraduate majors across the university. Students who are interested in this program must apply to the Graduate Admission Office in their junior year, and if accepted, can take up to three graduate courses (12 credits) in their senior year. These three courses count towards both the bachelor’s program and the master of arts degree. Students will pay the current undergraduate tuition rate for these three courses. Once students earn their Bachelor of Arts or Bachelor of Science degree from DePaul, they matriculate as a graduate student and complete the remaining required courses for their Master of Arts degree. Students should work with their undergraduate advisor to see how the graduate classes will fulfill undergraduate degree requirements. Students must maintain a 3.0 GPA (B or better) in each graduate class taken in the senior year in order to continue in the program.

Example Schedule for Students in the Combined Degree Program

<table>
<thead>

<td>Select three courses</td>
<td>12</td>
</tr>
</tbody>
</table>

¹ DCMA students must take 10 or 11 courses in their graduate year. Many DCMA students will take December Session or Summer session classes to fit in the additional course requirements.

Double Demon Scholarship

Alumni from any of DePaul’s colleges who are admitted into a graduate degree program in the College of Communication automatically qualify for the Double Demon Scholarship. Combined degree program students are eligible.

This scholarship covers 25% of the tuition for a master’s degree in the College of Communication. Both full-time and part-time students are eligible. No scholarship application is required. (DePaul University employees are eligible for other employee tuition benefits through the university, and therefore are not eligible for the Double Demon Scholarship.)

Digital Communication Concentration, Digital Communication and Media Arts - Communication (MA)

Course Requirements

The Digital Communication track requires: an Introductory Competency course (4 credit hours) plus 13 courses (52 credit hours): four core courses and nine elective courses and a degree completion option.
### Introductory Competency Course

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>DMA 402</td>
<td>INTRO TO VISUAL COMMUNICATIONS PRINCIPLES</td>
<td>4</td>
</tr>
<tr>
<td>or DMA 405</td>
<td>INTRO TO VISUAL COMMUNICATION TOOLS</td>
<td></td>
</tr>
</tbody>
</table>

Evaluation of the Introductory Competency course will follow standard CDM practice. All or part of the Introductory Competency course may be waived if a student has the equivalent academic background, or can demonstrate core technology competency.

Students may take an additional competency course as a Media Arts elective.

### Core Courses

Students are required to take all of the following (16 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMNS 570</td>
<td>INTRODUCTION TO DIGITAL CMN</td>
<td>4</td>
</tr>
<tr>
<td>DMA 525</td>
<td>FOUNDATION OF DIGITAL MEDIA</td>
<td>4</td>
</tr>
<tr>
<td>DMA 530</td>
<td>DESIGN THINKING AND STORYTELLING</td>
<td>4</td>
</tr>
<tr>
<td>MCS 575</td>
<td>DIGITAL MEDIA ETHICS</td>
<td>4</td>
</tr>
</tbody>
</table>

### Elective Courses

#### Communication Digital Technology Electives

Students are required to take at least one elective course that focuses on digital technology from each of the following areas:

- Media and Cinema Studies (MCS)
- Journalism (JOUR)
- Public Relations and Advertising (PRAD)

#### Example Communication Digital Technology Electives

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>

<td>FROM FRANKLIN TO THE INTERNET: A HISTORY OF AMERICAN JOURNALISM</td>
<td></td>
</tr>
<tr>
<td>JOUR 538</td>
<td>MASS COMMUNICATION IN THE DIGITAL AGE</td>
<td></td>
</tr>
</tbody>
</table>

### Media Arts Electives

Students must take two Media Arts electives from the College of Computing and Digital Media (CDM). These electives can be from Digital Media Arts (DMA) or other departments in CDM that have a media arts focus.

#### Example Media Arts Electives

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>DMA 410</td>
<td>DESIGN WORKSHOP</td>

<td>DESIGNING PLAYFUL EXPERIENCES</td>
<td></td>
</tr>
<tr>
<td>EXP 442</td>
<td>DESIGNING INTERFACES FOR EMERGING TECHNOLOGIES</td>
<td></td>
</tr>
</tbody>
</table>
Additional Electives
Students must also take four additional elective courses (two if student chooses the Master's Project degree completion option, taking CMNS 594 and CMNS 595). These elective courses may be:

- Any College of Communication graduate course
- Any College of Computing and Digital Media graduate course
- Any pre-approved outside elective (up to two electives from outside of the College of Communication or College of Computing and Digital Media can apply toward the degree)
- Any course in another department/college at DePaul that is approved by the graduate advisor or graduate program director (up to two electives from outside of the College of Communication or College of Computing and Digital Media can apply toward the degree)

Pre-Approved Outside Electives
Students will have the option to take pre-approved elective courses in either Writing, Rhetoric and Discourse (WRD) or Art, Media, and Design (AMD) as part of their additional electives, allowing students to develop an enriched focus.

</tr>
</tbody>
</table>

Grade Requirements
All students are required to maintain a cumulative GPA of 3.000 in their coursework. If a student's cumulative GPA falls below 3.000, the student will be allowed to complete an additional 16 credits or 3 quarters (whichever comes first) to attain the 3.000 minimum GPA. If the cumulative GPA remains below 3.000 at the conclusion of this time period, the student may be dismissed from the program. The student's cumulative and term GPAs along with overall academic performance will be factored into the dismissal decision.

Completion Options
Digital Communication Reflection Paper
Students complete a comprehensive reflection paper during their final term in the program. This completion option is available to all students and does not come with any course credit.

Digital Communication Capstone
In consultation with a faculty member in the College of Communication, the student should expand or develop a paper or project they have worked on in the program. This professor should have expertise in the area the student's paper/project is based. A meeting should be scheduled to discuss the requirements and design and agreement for the paper/project. Capstone does not come with course credit and is expected to take approximately 10 hours for the student to complete. This option is available to students holding a 3.5 GPA or higher and who have completed at least 10 courses (40 credit hours) in their program.

Master's Thesis Project
Two project/thesis courses (CMNS 594 and CMNS 595) replace two additional elective classes. Students will enroll in CMNS 594 in the Winter quarter and CMNS 595 in the Spring quarter of their final year. The student will create an original project (i.e., web- or film-based projects, or projects related to professional or educational organizations) and a 30- to 40-page accompanying written report/analysis. This option is available to students holding a 3.7 GPA or higher and who have completed at least 6 courses (24 credit hours) in their program.

**Major Elective Courses**

Students are required to take eight (8) credit hours of Major Elective Courses according to the following criteria:

- Students should choose 2 graduate level elective courses from a College of Communication program.

**Master’s Thesis Project**

Students must complete a Master’s Thesis Project as part of the degree requirements. Students have two options for how to complete the Master’s Thesis Project:

- Individual - The student will create an original project and a 20-30 page accompanying written research documentation and report/analysis.
- Collaborative - Students work in teams of 2-4 students to complete an original project and a 40-60 page accompanying written research documentation and report/analysis.

Students must have completed the necessary prerequisite classes and at least 8 courses (32 credit hours) in the DCMA program toward their 52 required credit hours (credits earned from Introductory Courses do not count toward the required total credits). Students should schedule a meeting with a faculty member to discuss the requirements.

Thesis milestones:

- Fall - Before the end of the fall quarter, students should submit a written proposal to advising faculty outlining their Thesis concept.
- Winter - Enroll in DMA 695.
- Spring - Enroll in DMA 698.
- Spring - Participate in end of year showcase and/or symposium.

**Digital Communication Certificate**

The graduate certificate in Digital Communication provides both continuing education for professionals in communication fields such as advertising, journalism, media studies, and public relations, and also skills training in contemporary digital technology for communication professionals. This six course (24 credit hour) interdisciplinary certificate will help students understand how digital technology has affected communication practices across a range of subjects and disciplines, develop new technological practices that reflect changes in the field across a range of communication subjects, identify ethical perspectives and evaluate the ethical dimensions of digital technology and practice, and evaluate professional-level communication skills and technological practices in order to become better communicators in digital environments.

Select three digital technology focused courses among offerings in Journalism (JOUR), Media and Cinema Studies (MCS), and Public Relations and Advertising (PRAD). Pre-approved courses include:

**Journalism (JOUR)**

- JOUR 503 REPORTING FOR CONVERGED NEWSROOMS
- JOUR 504 MULTIMEDIA NEWS PRODUCTION
- JOUR 506 NEWSCAST PRODUCING
- JOUR 507 VISUAL COMMUNICATION
- JOUR 509 JOURNALISM LAW AND ETHICS
- JOUR 515 SPECIAL TOPICS IN JOURNALISM
- JOUR 520 DATA JOURNALISM
- JOUR 521 SPORTS PRODUCING
- JOUR 522 MULTI-PLATFORM NEWS EDITING
- JOUR 523 ONLINE SPORTS REPORTING
- JOUR 529 ONLINE NEWS BUREAU
- JOUR 531 JOURNALISM BY NUMBERS
- JOUR 533 JOURNALISM & FREEDOM OF INFORMATION
- JOUR 536 SPORTS BLOGGING
- JOUR 537 FROM FRANKLIN TO THE INTERNET: A HISTORY OF AMERICAN JOURNALISM
- JOUR 538 MASS COMMUNICATION IN THE DIGITAL AGE
- JOUR 540 THE INTERNET, TECHNOLOGY, AND POLITICS
- JOUR 542 SOCIAL MEDIA AND THE NEWS
- JOUR 544 ENTREPRENEURIAL JOURNALISM
- JOUR 588 REPORTING FOR 14 EAST MAGAZINE
- MCS 520 TOPICS IN MEDIA STUDIES
- MCS 530 NEW MEDIA AND CULTURE
- MCS 541 AUDIO DOCUMENTARY

**Media and Cinema Studies (MCS)**

- MCS 520 TOPICS IN MEDIA STUDIES
- MCS 530 NEW MEDIA AND CULTURE

**Public Relations and Advertising (PRAD)**

- **Pre-approved courses include:**
MCS 542  TOPICS IN PRODUCTION
MCS 550  FANDOM AND ACTIVE AUDIENCES
MCS 575  DIGITAL MEDIA ETHICS
PRAD 521  PUBLIC RELATIONS MEASUREMENT AND DATA ANALYTICS
PRAD 550  INTEGRATED COMMUNICATION CAMPAIGNS
PRAD 562  MEDIA RELATIONS
PRAD 563  MEDIA PLANNING
PRAD 595  SPECIAL TOPICS IN PUBLIC RELATIONS & ADVERTISING 1

Select one Digital Media Arts (DMA) course from the College of Computing and Digital Media’s School of Design. Pre-approved courses include:

DMA 402  INTRO TO VISUAL COMMUNICATIONS PRINCIPLES
DMA 405  INTRO TO VISUAL COMMUNICATION TOOLS
DMA 410  DESIGN WORKSHOP
DMA 445  360 VIDEO PRODUCTION
DMA 475  MOVING IMAGE WORKSHOP
DMA 480  WEB/MEDIA DELIVERY WORKSHOP
DMA 490  PORTFOLIO
DMA 525  FOUNDATION OF DIGITAL MEDIA
DMA 527  CREATIVE PROCESS AND STRATEGY
DMA 530  DESIGN THINKING AND STORYTELLING
DMA 535  STORYTELLING ACROSS MEDIA

Select one additional elective course from the digital technology focused courses in JOUR, MCS or PRAD, DMA courses in the School of Design, or pre-approved courses in allied fields. 2 Example pre-approved allied field courses include:

WRD 524  DOCUMENT DESIGN
WRD 525  WRITING FOR THE WEB
WRD 530  TOPICS IN PROFESSIONAL AND DIGITAL WRITING
WRD 531  DIGITAL STORYTELLING
WRD 532  CONTENT STRATEGY
WRD 533  WRITING ACROSS MEDIA
WRD 580  MARKUP AND TEXT ENCODING IN THE HUMANITIES
ART 405  ADVANCED ART STUDIO
ART 427  DIGITAL ART
ART 460  WEB ART AND DESIGN
ART 461  PHOTOGRAPHY AND MEDIA ART
ART 489  VIDEO ART
ART 490  ADVANCED TOPICS IN ART, MEDIA AND DESIGN

1 Topics must be approved by graduate program director.
2 With prior approval of the graduate program director, the additional elective course may come from other areas within the College of Communication, the College of Computing and Digital Media, or from relevant areas in other colleges at DePaul.

This graduate certificate program is approved as a Gainful Employment Program through the U.S. Department of Education and is, therefore, eligible for Federal Student Aid.

**Digital Humanities Certificate**

The Graduate Certificate in Digital Humanities requires 16 credit hours. The certificate program provides hands-on knowledge and guided experience with DH projects, tools, and methods. It is an interdisciplinary program taught by faculty from across the university. The certificate can broaden, and strengthen, employment prospects of students in all humanities fields. From public history and journalism to website development and all levels of teaching, real-world experience with state-of-the-art software makes digital humanities training stand out in a world powered by new media.

**Digital Marketing (Minor)**

Students majoring outside the Driehaus College of Business may minor in Digital Marketing. Digital Marketing knowledge is complementary for students in majors where they will be working in marketing departments or need to have an understanding of how Digital Marketing works. Given Digital Marketing intersects skill-sets of analytics, content creation, marketing, and technology, Digital Marketing as a minor is of great value to students who need to understand the business side of marketing to be competitive and standout in the market. There is current demand among other concentrations being Computer Science, CDM, Public Relations, Communication, Entrepreneurship, and Hospitality.

**Course Requirements**

A non-Driehaus student minoring in Digital Marketing is required to complete the following courses totaling at least 20.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKT 301</td>
<td>PRINCIPLES OF MARKETING</td>
<td>4</td>
</tr>
<tr>

<td>SOCIAL MEDIA MARKETING</td>
<td>4</td>
</tr>
<tr>
<td>MKT 322</td>
<td>SEARCH ENGINE MARKETING &amp; ANALYTICS</td>
<td>4</td>
</tr>
</tbody>
</table>
Digital Marketing (Minor: Business Students Only)

Students in the Driehaus College of Business may minor in Digital Marketing. Digital Marketing knowledge is complementary for students in majors where they will be working in marketing departments or need to have an understanding of how Digital Marketing works. Given Digital Marketing intersects skill-sets of analytics, content creation, marketing, and technology, Digital Marketing as a minor is of great value to students who need to understand the business side of marketing to be competitive and stand out in the market. There is current demand among other concentrations being Computer Science, CDM, Public Relations, Communication, Entrepreneurship, and Hospitality.

Course Requirements
In addition to and MKT 301 and MKT 310, a Driehaus student minoring in Digital Marketing is required to complete the following courses totaling at least 16.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKT 321</td>
<td>SOCIAL MEDIA MARKETING</td>
<td>4</td>
</tr>
<tr>

<td>SEARCH ENGINE MARKETING &amp; ANALYTICS</td>
<td>4</td>
</tr>
<tr>
<td>MKT 395</td>
<td>DIGITAL MARKETING ANALYTICS AND PLANNING</td>
<td>4</td>
</tr>
<tr>
<td>MKT 396</td>
<td>MOBILE MARKETING</td>
<td>4</td>
</tr>
</tbody>
</table>

1 Recommended: take MKT 395 for first Digital Marketing course.

Graduation Requirements
All Marketing (MKT) courses and any courses used toward the Digital Marketing minor must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

Learning Outcomes
Core Outcomes
Students will be able to:
- Identify and describe the historical and theatrical significance of a range of theatrical artists, works, and artistic approaches from antiquity to present, encompassing a broad range of periods, cultures, and styles.
- Synthesize and apply elements of their education and training to the preparation, rehearsal, and presentation of theatrical productions with discipline, respect, and maturity.
- Identify and explain their theatrical work in the context of the cultural and social impact of the arts.

Program Specific Outcomes
Students will be able to:
- Identify and create dramatic action through text analysis, personalization, and imagination, telling the story of the play clearly and dynamically in space and time.
- Articulate the intent of the play and the director’s point of view.
- Lead organized and creative collaborations with designers, technicians, and actors.
- Articulate a personal aesthetic vision and demonstrate intent to impact the field.

Directing (MFA)
The Theatre School’s Master of Fine Art (MFA) degree in Directing is a three-year program that allows directors to develop and explore their artistic vision and then apply their ideas through constant collaboration with other artists – actors, designers, and dramaturgs. Coursework is focused on preparation – research, theory and analysis – as well as practical application through scene study, workshops and quarterly full-length directing assignments.

Doctorate in Business Administration (DBA)

The Doctorate in Business Administration (DBA) is designed for highly experienced professionals who seek to take their career to the highest level. The three-year program is designed for working professionals with a previous master’s degree in a business or business-related discipline. The ideal candidate will enter the program with significant business acumen gained through eight to 10 years of managerial or consultative experience. Candidates for the DBA will learn to frame complex business problems in a manner that enables an applied, evidence-based analysis of all available data and rigorous evaluation of potential solutions.

A fundamental component of the DBA experience is the personal working relationship with the research-active faculty of the Driehaus College of Business and Kellstadt Graduate School of Business. These ongoing mentor-student relationships support the doctoral candidates’ professional development in the tools and methods of data analysis and business intelligence. In addition, DBA candidates will advance through their program as members of a cohort of about 15 students. The program’s small group format is designed to build a strong network of like-minded, high-potential professionals to support each other both during the program and after graduation.

Each year of the program, candidates will participate in nine three-day residencies led by Kellstadt faculty. DePaul’s DBA program begins with a strong emphasis on research methodology and disciplinary coursework that features the most current developments from both academia and professional practice. Coursework simultaneously builds candidates’ interdisciplinary business knowledge and applied research skills. In the second year, DBA candidates will work as part of a small research team, with a faculty mentor, to take a research idea from conception to completion in one year. By the end of the second year, candidates will be expected to have framed and formally proposed their dissertation research. In the third year of the program, candidates will be personally supervised by one of Kellstadt’s research faculty as they pursue their dissertation research. Throughout the program, DBA candidates are exposed to emerging industry and disciplinary developments through a series of doctoral seminars on current topics in business.

**Learning Outcomes**

Students will be able to:

- Design, conduct and analyze research.
- Communicate and disseminate knowledge for internal and external constituencies.
- Understand and apply relevant organizational theory to contemporary organizational problems.
- Demonstrate awareness of ethical issues when conducting or disseminating research.
- Critically evaluate research quality and approaches to organizational decision-making.
- Understand how multicultural perspectives influence knowledge creation and dissemination.

1 These courses are taken Pass/Fail

Student Handbook

Doctorate in Business Administration

DePaul’s Doctorate in Business Administration (DBA) is for experienced professionals looking to take their careers to the next level.

About the DBA

The DBA is a three-year program designed for high-potential working professionals. Doctoral candidates are trained to frame complex business issues (both opportunities and threats), analyze responsive options, and implement change. The program empowers graduates to transform their organizations through a mastery of sophisticated research and analytical skills for decision-making. It also can provide experienced business professionals with the skills, experiences, and credentials to transition to academic careers.

Students take eight research methodology and eight business discipline-specific courses. Each course is delivered in three-hour modules resulting in five different courses during a given residency, and courses are staggered throughout the year to offer deep engagement in each topic.

Degree Requirements

Students in the DBA degree program must meet the following requirements in order to be eligible for degree conferral:

• Complete all designated doctoral courses, topical seminars, and research requirements.
• Earn a grade of C or better in all designated courses and doctoral seminars.
• Earn a designation of pass or higher on all research requirements.

Leave of Absence

• Students requesting a non-medical leave of absence are subject to the DePaul Graduate Handbook policy terms found here (https://catalog.depaul.edu/student-handbooks/graduate/graduate-academic-policies/leave-of-absence/).
• In addition to the terms of that policy, DBA students requesting non-medical leave must:
  • notify the Program Director and the Assistant Dean of Graduate Programs.
  • resume their coursework where they discontinued their studies (typically one year from the leave of absence date).
• Students requesting a medical leave of absence must contact the Dean of Students.

Computer Equipment

Each student will receive a computer with installed software for use over the three year program. Please refer to the Equipment Loan Agreement for details regarding return and damage policies.

Class Materials

Class materials, including textbooks, are provided by the program/are included in tuition fees.

Dismissal

Students who receive a C- or below in any single DBA course or who fail to make sufficient progress towards degree requirements will be subject to dismissal from the program.

Graduation

• DBA degree conferral requires the completion of a minimum of 72 quarter hours.
• Students should successfully defend their final dissertation by June 1 of their final year of coursework.
• If students do not successfully defend their final dissertation by June 1 of their final year of coursework, they must formally request a dissertation extension. To do this, they must:
  • by May 1, schedule a meeting with the Program Director to discuss (a) their intent to work on their dissertation beyond the deadline and (b) their anticipated timeline for completion.
• by May 15, discuss with their Dissertation Chair that Chair’s availability for advising beyond the expected timeline. (The DBA program cannot guarantee the Chair’s availability and students may be reassigned if their work extends beyond the dissertation deadline.)
• by June 1, complete the Dissertation Extension Request form and submit that form to the Program Director.
• Students granted a dissertation extension may request up to 12 additional months to successfully defend their final dissertation proposal. Students who do not meet this deadline set forth in their Dissertation Extension Request will be unable to graduate from the program.

Grades
• Letter Grades - Grades of A through C are acceptable and allow the student to remain in good academic standing.
• Pass/ Fail Grade - “Pass/ Fail” is assigned to specified program components upon their completion.
• Research-in-Progress (R) - “R” may be assigned to indicate that a student is making satisfactory progress in a course that extends beyond the end of the term or in a project.

Additional Policies
The Kellstadt Graduate School of Business Handbook (https://catalog.depaul.edu/colleges-schools/business/#graduateacademicstext) and the DePaul Graduate Handbook (https://catalog.depaul.edu/student-handbooks/graduate/graduate-academic-policies/) covers all policies and procedures not otherwise described within this DBA Handbook.

Documentary (MFA)
The MFA in Documentary intends to provide aspiring documentary filmmakers with a demanding program that integrates knowledge of documentary history, styles and traditions, an affinity to research and development, varied approaches to storytelling and production, with the technological aspects that develop strong production values, effective post-production, and finally the ability to take creative work to its audiences.

Program Requirements
Degree Requirements 64
Total hours required 64

Learning Outcomes
Students will be able to:
• Describe cinematic contentions utilized in the making of feature length and short documentary films.
• Assess the strengths and weakness of written non-fiction proposals to include visual approaches, as well as fundraising, marketing, exhibition, and distribution plans.
• Communicate a clear vision to a team of collaborators.
• Apply key concepts in areas of documentary media production, including: producing, directing, cinematography, sound, and editing.
• Critique creative work, synthesizing theory and practice.
• Analyze the ethical and moral decisions inherent in representing individuals, lifestyles, and cultures.
• Evaluate legal considerations regarding content and characters present in their work, whether domestically or abroad.

Open Elective
Open electives may be selected from any graduate level CP, DOC, FILM, POST, SCWR, or VFX course.
**MFA Thesis**

The most important form that program assessment will take is the MFA thesis project. This project is the culmination of the eight quarters of study and practice. We expect the thesis projects to find funding, screen at film festivals, create an impact in their respective communities, with their anticipated audiences, and find wide avenues of outreach and distribution. Specific requirements include:

- Documentary film under 30 minutes in length is required.
- Complete final proposal.
- Complete Rough Cut.
- Prepare for Public Screening after the thesis defense.

**MFA Thesis Committee**

Students will be assigned a faculty advisor upon acceptance into the MFA program. The advisor will monitor the student’s work and progress at the end of each quarter during their first year. Students will form a thesis committee at the beginning of their second year. During this second and third year, the thesis committee will evaluate the student’s work, making sure that each student is progressing at the pace with the quality required to earn the degree upon completion of their courses and thesis project. The MFA in Documentary allows students to nominate the chair of their thesis advisor committee in conjunction with the following rules:

- The committee must include three faculty advisors.
- One advisor must be assigned to the MFA Documentary Committee.
- Two advisors will be nominated by the student.
- Of the three advisors, at least two should be fulltime faculty members. One advisor may be an adjunct faculty member.

**MFA Thesis Screening**

A major component of the MFA degree is the public screening of the MFA thesis. It is the student’s responsibility to organize, schedule, promote and publicize this event.

**MFA Thesis Defense**

A minimum of thirty days prior to the public screening, the student will schedule a thesis defense with his/her MFA Thesis Committee. At this defense the student’s MFA Thesis Committee will discuss, evaluate, and critique the thesis and make a determination on the awarding of the MFA degree.

**MFA Thesis Timeline**

Students will have a maximum of five years from the first enrollment in the program to complete, defend, and screen their MFA Thesis. Time spent in the MS program will count toward this limit. Students may petition their MFA Thesis Committees for a one-time extension.

**DOC 701 THESIS CONTINUATION**

This zero-credit course is for students actively working to finish their thesis projects. A student’s MFA Thesis Committee Chair may enroll a student in 701 a maximum of eight times. Enrolling in 701 requires students to declare goals for the quarter with regard to finishing their thesis. Students who do not meet these goals may not be eligible to enroll in another 701 until those goals are met.

**Degree Requirements**

Students in the MFA Documentary degree program must meet the following requirements:

- Complete a minimum of 64 graduate credit hours in the designated degree program.
- Complete all graduate courses and requirements listed in the designated degree program.
- Earn a grade of C- or better in a graduate courses of the designated degree program.
- Maintain a cumulative GPA of 2.5 or higher.
- Satisfactorily complete the MFA thesis as determined by the student’s MFA Advisor Committee.
- Students cannot count credit earned towards a previously awarded master’s or MFA degree toward the completion of this MFA program.

For DePaul’s policy on repeat graduate courses and a complete list of academic policies see the DePaul Graduate Handbook in the Course Catalog.

**Documentary Studies (Minor)**

The Documentary Studies minor is designed to give students a foundation in the field of documentary creation across genres and subject matters. Students may choose to focus on a specific area such as audio or photo documentary.

**Course Requirements**

Students take a total of six courses (24 hours).
Learning Outcomes

Core Outcomes

Students will be able to:

• Identify and describe the historical and theoretical significance of a range of theatrical artists, works and artistic approaches from antiquity to the present, encompassing a broad range of periods, cultures, and styles.

• Synthesize and apply elements of their education and training to the preparation, rehearsal and presentation of theatrical productions with discipline, respect, and maturity.

• Identify and explain their theatrical work in the context of the cultural and social impact of the arts.

Program Specific Outcomes

Students will be able to:

• Read and interpret theatrical text within the historical context of its creation and as applied to contemporary issues and practices.

• Identify and communicate, orally and in writing, significant issues and approaches to the production of theatrical texts to both theatre practitioners and general audiences.

• Apply interpretive, analytical, and communication skills to a wide variety of literature and theatrical practices, ranging from classics to new work.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

  • 1 Lab Course or 1 SWK Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
  • Not Required

Other (p. )
  • Choose 1 course from the above learning domains as an elective

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

First Year Hours
THE 212 INTRODUCTION TO THEATRE STUDIES 4
THE 210 SCRIPT ANALYSIS 4
THE 268 INTRODUCTION TO THE PRODUCTION PROCESS 4
THE 291 PERFORMANCE WORKSHOP I 4
THE 214 ETHICAL DECISION MAKING IN THE THEATRE 4

History of Dramatic Literature Sequence (Arts and Literature Requirement)
THE 204 HISTORY OF DRAMATIC LITERATURE 4
THE 205 HISTORY OF DRAMATIC LITERATURE 4
THE 206 HISTORY OF DRAMATIC LITERATURE 4

Three Quarters of Theatre Crew 6
  TEC 107 THEATRE CREW (three quarters)

Second Year
THE 324 DRAMATIC THEORY 4
THE 273 THEATRE STUDIES PRODUCTION PRACTICE I 4
THE 141 DESIGN WORKSHOP 4

Dramaturgy I Sequence
THE 234 DRAMATURGY I: INTRODUCTION TO DRAMATURGY 4
THE 235 DRAMATURGY I: INTRODUCTION TO PRODUCTION DRAMATURGY 4
THE 236 DRAMATURGY I: TYA AND PLAYWORKS DRAMATURGY 4

English Literature Electives: Select three 300-level English courses chosen in consultation with advisor 12

Third Year

THE 335 DRAMATURGY II: NEW PLAY DRAMATURGY 4
THE 336 DRAMATURGY II: DIY DRAMATURGY 4

Production Practice: Select two of the following: 8
THE 371 THEATRE STUDIES PRODUCTION PRACTICE II
THE 372 THEATRE STUDIES PRODUCTION PRACTICE II
THE 373 THEATRE STUDIES PRODUCTION PRACTICE II

Dramatic Literature Electives: select three courses in consultation with advisor 12

Fourth Year
PHL 382 DRAMATIC THEORY: COMEDY 4

Survey of the Arts for Theatre Sequence
THE 381 SURVEY OF THE ARTS FOR THEATRE 4
THE 382 SURVEY OF THE ARTS FOR THEATRE 4

Capstone Sequence
THE 408 CAPSTONE: PREPARING FOR THE PROFESSION 4
THE 410 THEATRE STUDIES CAPSTONE 2
THE 412 PORTFOLIO PREPARATION 4

Production Practice Sequence
THE 471 THEATRE STUDIES PRODUCTION PRACTICE III 4
THE 472 THEATRE STUDIES PRODUCTION PRACTICE III 4
THE 490 THEATRE STUDIES INTERNSHIP 2-12

Additional Courses
It is also strongly suggested that students take three quarters of language.

Open Electives
Open elective credit may also be required to meet the minimum graduation requirement of 192 hours.

Drawing (Minor)

The Drawing minor will provide students with an intellectual base in idea development and visual literacy by working with a variety of media and approaches to drawing as a graphic medium. Six courses are required for the minor. ART 376 Drawing Projects is a “mini thesis” project-based course that will provide students with the opportunity to include experiences, interests, and varied degree programs from across the university as a resource for their final project.

Or other ART and related courses based on the approval of the advisor and/or AMD Chair

Students majoring in Art, Media, and Design (BA) or (BFA) and Art (BA) are restricted from earning this minor.

Early Childhood Education (BS)

The Bachelor of Science program in Early Childhood Education prepares students to teach children birth through second grade in a variety of urban and suburban education settings, including public and private elementary schools and child care centers.

Students learn educational theories and effective teaching practices, participate in field experiences that require observation and participation in teaching activities at multiple schools, and student teaching. Early Childhood students complete six weeks in a preschool classroom and six weeks in a primary classroom to fulfill their student teaching requirement leading to Illinois licensure. Students should meet early and regularly with their advisors to design and monitor their program of study.

Students entering the program must be able and willing to devote themselves to a minimum of 380 hours of daytime field experiences in schools and child care centers (230 hours in early childhood, including special education settings, and 150 hours in bilingual/ESL education settings). These field-based clinical hours are completed in conjunction with curriculum and strategy courses that require students to participate in teaching activities with children ranging in age from birth through eight years. In addition, the student must successfully complete two six-week periods of full-time student teaching as part of their culminating early childhood education experience.

The program incorporates a required concentration in bilingual education and English as a Second Language (ESL). Upon completion of the program, students are eligible to apply for Endorsements in bilingual education or ESL to be added to their early childhood teaching license. Bilingual Endorsements require a test of proficiency in the non-English language.

The required curriculum prepares students in special education and students are eligible for an Approval in ECE Special Education on their teaching license. This qualifies the individual to teach young children with special needs in a preschool setting (ages 3-6). Additional courses are available to prepare individuals to teach special education for the full range of the license (birth-2, primary grades).

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

Learning Outcomes

Students will be able to:

- Apply their knowledge of child development to create healthy, respectful, supportive, and challenging learning environments for each child.
- Establish respectful, reciprocal relationships that involve, support, and empower families as well as the communities in which they live.
- Create these relationships based on their knowledge and understanding of each family’s characteristics, the community’s dynamics, and the identified needs of the children.
- Use multiple forms and approaches of effective assessment in planning and documenting all children’s ongoing growth and development for a variety of stakeholders.
- Choose from a wide repertoire of developmentally appropriate and productive strategies to address the multiple learning needs of children and the families who support them.
- Design, implement, and critically analyze meaningful curriculum through use of academic disciplinary knowledge, to enhance learning outcomes for all children.
- Competently address children’s reading, writing, and oral communication needs to facilitate learning in all content areas.
- Conduct themselves as knowledgeable professionals focused upon providing and advocating for quality care and education in a variety of settings across the early childhood age span (i.e., birth through age 8 years).

College Core Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences.
for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Exercise Science, Middle Grades, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
- Balances self-confidence and assertiveness with respect for others' perspectives
- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

Skill Building Courses

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

Modern Language Competence Requirement

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SCPS Joint Program (BAECE) program. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.
For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level. Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

Licensure Tests
All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. The Academic Success Center can provide help through tutoring, workshops, and online resources to help each student succeed.

Field Experiences
Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

Endorsements
An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

Student Teaching Requirements
Student Teaching is the culminating clinical experience in the student’s program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

Academic Requirements
• Completion of all Liberal Studies, Introductory, Advanced and concentration/content area courses
• Overall cumulative GPA of 2.50 or better
• Cumulative GPA of 2.75 or better in all education courses
• Meet all other program requirements (e.g., modern language and residency requirements)
• Meet designated program standards
• Pass the required Illinois licensure content area test(s)

Clinical Requirements
• Completion of all required field experiences
• Three satisfactory evaluations in field experiences
• Three satisfactory faculty recommendations
• Attendance at mandatory meeting for student teaching
• Application for student teaching, resume, transcripts, and writing sample (check deadlines)
• Review and approval by Student Teaching Committee of the College of Education

Student Teaching Timeline and Deadlines
• Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
• Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
• Academic requirements are due one quarter before expected quarter of student teaching.
• Content areas tests must be passed prior to Student Teaching (deadlines apply).
• Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual childcare agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

Degree Conferral and Graduation
The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the
current academic year and then submit a cap and gown order. Honors announced at the ceremony for undergraduates are based on winter quarter GPAs because a final GPA is not available at the time of the ceremony. Eligibility for the June Commencement ceremony is limited to individuals that complete the entirety of their program (including student teaching) within the same academic year (prior to the ceremony).

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

**Licensure**

Requirements for licensure include completion of full bachelor's degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor's degree. A bachelor's degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

**Teacher Licensure**

Sept 1, 2015 begins the implementation of a new requirement for any individual seeking teaching licensure in the State of Illinois. The new requirement is the Teacher Performance Assessment ("edTPA"), which is mandated by the Illinois State Board of Education (ISBE) for anyone that completes student teaching in Fall 2015 and beyond. EdTPA is an assessment conducted during the student teaching experience. For this assessment, teacher candidates are required to create video clips of instruction, lesson plans, student work samples, analyses of student learning, and teacher candidate reflective commentaries for a learning segment and submit these components using an electronic portfolio to Evaluation Systems an outside agency that is a group of Pearson Publishing. The portfolio will be independently evaluated by a panel of trained reviewers hired by Pearson. For this service a fee is charged. The panel of scorers of edTPA are selected and trained by Evaluation Systems. DePaul University is neither affiliated with Evaluation Systems nor Pearson Publishing and by ISBE regulation cannot be involved in edTPA registration, submission of portfolios, or scoring of individual teacher candidate portfolios. Institutions of higher education are required by the Illinois State Board of Education to provide teacher candidates with information to prepare for edTPA; however, the process of edTPA is external to DePaul University and is not monitored by DePaul University's College of Education.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

---

1 Students must earn a C- or better in this course.
2 Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam.
3 This must be taken along with student teaching. Students must earn a C or better in this course.

**Learning Domains**

**Arts and Literature (AL) (p. 1300)**

- 2 Courses Required

**Historical Inquiry (HI) (p. 1304)**

- 2 Courses Required
  (Note: One must be in US History.)

**Math and Computing (MC) (p. 1306)**

- 1 Course Required
  (1 CR Course or 1 SR Course)

**Philosophical Inquiry (PI) (p. 1307)**

- 2 Courses Required:
  - LSE 380
  - 1 Additional Course
    (Note: PHL 100 recommended)

**Religious Dimensions (RD) (p. 1308)**

- 1 Course Required

**Scientific Inquiry (SI) (p. 1310)**

- Not Required
Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)

• 3 Courses Required:
  • PSC 120
  • 2 Additional Courses

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Early Childhood majors must complete the following tests:

- Early Childhood Content Area Test (test #107) – assesses knowledge of the content of what is taught at the early childhood level including language and literacy development, learning across the curriculum, diversity, collaboration, and professionalism in the early childhood program. Test is required before Student Teaching (deadlines apply).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

**Non-Licensure Option**

Individuals that do not desire a license or are not eligible for a license can seek to earn the degree without meeting licensure requirements. In seeking this option, individuals understand that the following stipulations apply:

- Confirmation must be given by the individual in writing that they seek this option and agree to the stipulations.
- A notation is placed on the transcript indicating that “completion of degree requirements did not lead to eligibility for licensure.”
- Individuals have the option to return to the program within 1-2 years to complete student teaching and other licensure requirements and become eligible for the license (however, the transcript notation will remain). This may require additional coursework or other requirements.
- Individual must complete requirements for licensure (including any relevant tests) at the time of licensure application.
- Coursework is chosen in consultation with faculty advisor and is based on individual’s prior coursework, experience, and interests and is individually tailored.
- All coursework must be taken at DePaul; no transfer credit is allowed for substitutions.
- Individuals must complete the specified coursework within 2 years or be subject to re-evaluation.

**Open Electives: 4 quarter hours required**

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98 (https://catalog.depaul.edu/search/?P=WRD%2098), MAT 94 (https://catalog.depaul.edu/search/?P=MAT%2094), and MAT 95 (https://catalog.depaul.edu/search/?P=MAT%2095).

**Student Teaching: 12 quarter hours required, grade of B- or better required**

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take ECE 387, Capstone Seminar with student teaching (listed in the Liberal Studies section) during the Autumn, Winter or Spring quarters. Early Childhood students complete 6 weeks in a preschool classroom and 6 weeks in a primary classroom.

**Course Title Quarter Hours**

</tr>
</tbody>
</table>

Requirements are listed in the Endorsements section of the Course Catalog and are in addition to degree requirements.

**Special Education Approval Courses**

All students in ECE program will take 5 courses that are required for the degree. These courses will make ECE students who are seeking a
• A minimum of 3 courses (12 credit hours) are required to substitute for the student teaching experience. Coursework must be 200-300 level and receive a grade of C or better.

**Developmental Therapy Option**

These courses will prepare early childhood teacher candidates for a career requiring expertise in early intervention for infants and toddlers (from birth to age three) with special needs and their families. The coursework can be taken in additional to degree requirements, or if seeking the non-licensure option, can be taken to replace student teaching. After taking the required courses and earning the degree, individuals will be required to take a training workshop on the State of Illinois system of Early Intervention and apply directly to Provider Connections to receive their credentials after submitting their transcripts.

**Early Childhood Education (EdD)**

The Early Childhood Education concentration in DePaul’s EdD program recognizes the current shortage of highly trained early childhood professionals for colleges and universities at the national level. The program focuses not only on analyzing theory and practice in early childhood education today, but also on the policy issues influencing the field of early childhood education.

All the coursework in this program is designed based on best practice guidelines from a variety of leading national early childhood education professional and research organizations, such as National Association of Education of Young Children, Council for Exceptional Children and Zero to Three. The program is rooted in applied child development as well as curricular theory that embraces the notion of learner self-efficacy, inquiry-based curricula, and partnerships with families.

Recognizing the need for hands-on training in research and higher academic teaching, part of the focus of this program is on mentoring doctoral candidates in acquiring these skills through two research and teaching internships prior to their dissertation work. The program is designed to prepare early childhood professionals who might come from a variety of backgrounds such as teachers, leaders or administrators, professionals working in the early childhood or related fields, or instructors at the college level.

**Licensures/Endorsements**

### Superintendent Endorsement Option

Students pursuing a doctoral degree in Early Childhood Education are also eligible for the Superintendent Endorsement program, which requires additional coursework, along with four quarter hours for the superintendent internship course. ISBE states the following guidelines:

Individuals seeking the Superintendent endorsement must possess:

• a master’s degree with a GPA of 3.0 or better on a 4.0 scale
• proof of two years of teaching experience on a valid Illinois teaching license
• proof of two years of full-time administrative experience on a valid administrative license with the general administrative endorsement
• proof of passing the Basic Skills/TAP and Superintendent content-area tests.

Upon completion of the Superintendent program and the endorsement’s additional requirements, students must apply for the endorsement. Students are to work with the College of Education’s Licensure Officer when applying for the endorsement.

### Teacher Leader Endorsement Option

To be eligible for the Teacher Leader endorsement program, students must possess:

• a bachelor’s degree and master’s degree from an accredited college or university,
• a valid teaching license
• at least two years of teaching experience
• proof of passing the Basic Skills or Test of Academic Proficiency.

### Principal Licensure

The principal licensure program at DePaul University is an approved Illinois State Board of Education (ISBE) program. It is a rigorous program preparing principals and assistant principals for work service in public and private schools in the state of Illinois.

To be eligible for the Principal Licensure program, students must possess:

• a master’s degree from an accredited college or university with a GPA of 2.75 or higher at the undergraduate level and a 3.25 or higher at the graduate level.
• a valid Illinois teaching license
• at least two years of full-time successful teaching experience
• proof of passing the basic skills or test of academic proficiency.

### Concentrations

• Early Childhood Education (degree only)
• Early Childhood Education plus Superintendent Endorsement
• Early Childhood Education plus Teacher Leader Endorsement
• Early Childhood Education plus Principal Licensure
Learning Outcomes

Students will be able to:

- Critically research, analyze, and argue (orally and in writing) various theories about child development (e.g., genetics, epigenetics), using the most up-to-date research literature on the science of development, and identify their implications for early childhood education and social policy.
- Effectively demonstrate (orally and in writing) an advocacy stance for children's well-being and that of their families, using the most up-to-date research on factors affecting development such as risk and resilience, culture, race, ethnicity, and language.
- Critically examine and conduct program evaluations of curricula, instructional approaches, assessment, and other elements of early childhood programming in the service of information the design of early childhood programs that consider neurological development, families, culture, class, race, ethnicity, as well as educational and social program environments.
- Create syllabi and demonstrate a high level of professional knowledge, competence, and communication skills in teaching about the field of early childhood education and care, applying critical knowledge of current research.
- Demonstrate an ability to conduct and compete quantitative and/or qualitative research studies (i.e., develop hypothesis and research questions, collect and analyze data, write results) focused upon the field of early childhood education.

College Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Demonstrates a positive attitude and commitment to the profession
- Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates concern for and protection of safety and well-being of others

Degree Conferral and Graduation

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

Degree Requirements

Students must maintain an overall GPA of 3.0 prior to the completion of 36 credit hours and 3.3 after the completion of 36 credit hours. Students are allowed no more than two grades of “C.” Upon receiving a third grade of “C,” students must retake the class in which the grade was received. Grades of “D” and “F” require that the course be retaken.

Course Requirements

Principal Preparation Option, Early Childhood Education (EdD)

This Illinois State Board of Education approved program, is designed for licensed teachers who already hold a master's degree in education and are seeking principal licensure. The program offers a powerful, discipline-based curriculum with a problem-solving orientation that prepares effective and principled decision-makers. Graduates from the program are prepared to assume school and district administrative and supervisory roles.

Additional Program Requirements

An additional 44 quarter hours:

Teacher Leader Option, Early Childhood Education (EdD)

This program is ideal for students who are educators in K-12 environments and are seeking leadership roles, excluding principalship. Such roles include, but are not limited to: curriculum specialists, coaches, mentor teachers, department chair or lead teachers, content specialists, teacher leaders charged with supervisor roles, and program leaders. The program meets the standards set forth by the state of Illinois for the endorsement of Teacher Leader.

Additional Program Requirements

Teacher Leader Core Courses (10 courses, 40 quarter hours)

Early Childhood Education (Minor)

The Early Childhood Education minor provides a learning opportunity to all DePaul Students for those interested in the care and education of young children. Students interested in this minor should consult home college advisors and secure permission from the Early Childhood Program to enroll.

Course Requirements

Seven courses from the following list selected in consultation with an academic advisor and Early Childhood Program faculty.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 286</td>
<td>ART, MUSIC, AND MOVEMENT FOR THE YOUNG CHILD</td>

</tr>
<tr>
<td>ECE 290</td>
<td>CHILD GROWTH AND DEVELOPMENT</td>
<td>1</td>
</tr>
<tr>
<td>ECE 302</td>
<td>CHILD AND FAMILY IN THE URBAN COMMUNITY</td>
<td>1</td>
</tr>
<tr>
<td>ECE 303</td>
<td>INTRODUCTION TO EARLY CHILDHOOD EDUCATION</td>
<td>1</td>
</tr>
<tr>
<td>ECE 307</td>
<td>LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD (BIRTH TO 8)</td>
<td>1</td>
</tr>
<tr>
<td>ECE 309</td>
<td>YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS</td>
<td>1</td>
</tr>
<tr>
<td>ECE 310</td>
<td>PREPRIMARY PROGRAMS: CURRICULUM AND STRATEGIES</td>
<td>1</td>
</tr>
<tr>
<td>ECE 375</td>
<td>ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE SETTINGS</td>
<td>1</td>
</tr>
</tbody>
</table>

Note: Students in DePaul's College of Education programs in Elementary Education, Physical Education, Special Education, Secondary Education, or World Language Education cannot select the ECE minor. Students may elect to take courses in this minor or other education courses but it would not lead to an endorsement on their Professional Educator License at the
completion of their program, though it may be applied in the future to a post-degree program leading to the addition of an endorsement.

Economic Data Analytics (BSB)

The Economic Data Analytics (EDA) Bachelor of Science in Business (BSB) focuses on quantitative analysis and aims to attract students who are specifically interested in a STEM undergraduate Economics program that highlights the economic analysis of data and the acquisition of software skills with such programs as STATA, R and SAS. Students learn to analyze "big data" using economic theory and both cross sectional and time series data analysis techniques. The skills developed allow graduates to analyze data to make business decisions in the private sector and to inform public policy and regulatory decisions in the public sector.

STEM Designation

DePaul's Bachelor of Science in Business degree with a major in Economic Data Analytics (EDA) is a STEM-designated program under CIP Code 45.0603: Econometrics and Quantitative Economics. International students who earn degrees from STEM-designated programs can qualify to extend their post-graduation stay in the United States for Optional Practical Training (OPT). OPT provides an opportunity for international students to develop their careers while also helping meet the demand for STEM-educated professionals in the U.S. workforce.

Students will be able to:

- Apply linear regression models to applications in economics and business.
- Use and program within statistical software [Stata, R and SAS].
- Define economic concepts needed to analyze issues in the business and popular press.
- Identify the function of key economic institutions, such as the Federal Reserve System.
- Employ an economic theory or model to analyze the impact of changes in economic variables.
- Assess the potential impact of government interventions on individuals, markets, and/or the macroeconomy.
- Clean and manipulate real-world data from sources such as social media, housing, health, financial and public [Census and Current Population Survey].

College Core Requirements

Business Core Requirements

All undergraduate students in the Driehaus College of Business complete foundational courses in the areas of analytics, accountancy, mathematics, economics, business law, finance, management, management information systems/computer science, and marketing.

Course Requirements

For a student to complete the Bachelor of Science in Business, the following Business Core courses totaling at least 70.0 hours are required:

A course taken as part of a term-long study abroad program

**Professional Writing**

Select one of the following:

- WRD 202 PROFESSIONAL WRITING FOR BUSINESS (2.0 quarter hours)
- WRD 204 TECHNICAL WRITING
- WRD 206 PROFESSIONAL WRITING

1. Strobel students take specially designated sections of all required ACC classes, including ACC 101 and ACC 102 (excluding ACC 250).

2. Students majoring in accounting (primary or secondary/double major) are allowed to substitute ACC 370 in place of BLW 201. Hospitality Leadership majors must take HSP 207 for the Business Law requirement; use of HSP 207 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete both HSP 207 and BLW 201.

4. GGT 301-H is required if pursuing the Management Honors Program.

5. MIS majors and minors must take MIS 140. Actuarial Science and Economic Data Analytics majors must take CSC 241.

6. MKT majors and Sales minors must take MKT 376.

7. Entrepreneurship majors and minors must take ICS 394. Hospitality Leadership majors must take ICS 396 for the Business Capstone; use of ICS 396 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete ICS 396 and one of ICS 394 or ICS 395.

8. A course taken for Global Business Perspective that is in a student’s major or minor field must be completed with a minimum grade of C-.

**Business Ethics**

All undergraduate students in the Driehaus College of Business complete a course in Business Ethics. It is recommended students take MGT 248 or PHL 248 in Philosophical Inquiry or MGT 228 or REL 228 in Religious Dimensions in the Liberal Studies Program (or University Honors Program) Requirements.

**Second Majors and Minors**

The addition of a second major or minor may affect the Business Core classes required for a student. Meet with an academic advisor to confirm requirements.

### Math Requirements for all business majors (except Actuarial Science majors)

- MAT 137 may be replaced by MAT 348 or MAT 351.

### Grade Minimum Requirements for Economic Data Analytic Major

A minimum grade of C- is required for the following: ACC 101, ACC 102, BUS 102, ECO 105, ECO 106, ECO 315, MAT 137, and any ECO course used for Global Business Perspective.

#### Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

- Not Required
Philosophical Inquiry (PI) (p. 1307)
- 2 PI Courses Required

Religious Dimensions (RD) (p. 1308)
- 2 RD Courses Required

Scientific Inquiry (SI) (p. 1310)
- 1 Lab Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
- 1 SCBI Course Required

PHL 248 / MGT 248 is required in PI or REL 228 / MGT 228 is required in RD.

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements
Course Requirements
In addition to ECO 105, ECO 106 and ECO 315, a student majoring in Economic Data Analytics (EDA) is required to complete the following courses totaling 34.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 250</td>
<td>CAREER PREPARATION FOR ECONOMICS MAJORS</td>
<td>2</td>
</tr>
<tr>
<td>ECO 304</td>
<td>ANALYTICS FOR ECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>ECO 305</td>
<td>INTERMEDIATE MICROECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>ECO 306</td>
<td>INTERMEDIATE MACROECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>ECO 376</td>
<td>TIME SERIES ANALYSIS</td>
<td>4</td>
</tr>
<tr>
<td>ECO 377</td>
<td>ECONOMIC ANALYTICS USING SAS &amp; R</td>
<td>4</td>
</tr>
</tbody>
</table>

Select one from:
- ECO 380  MATHEMATICAL ECONOMICS
- MAT 135  BUSINESS CALCULUS I
- MAT 150  CALCULUS I
- MAT 160  CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS I
- MAT 170  CALCULUS FOR LIFE SCIENCES I

Select one from an empirical or data-focused elective: 4
- ECO 310  URBAN ECONOMICS
- ECO 314  ECONOMICS OF THE PUBLIC SECTOR
- ECO 318  LABOR ECONOMICS AND ORGANIZATION

ECO 336  EXPLORING ECONOMICS & STATISTICS THROUGH SPORTS
ECO 360  ECONOMICS OF LOW-INCOME COUNTRIES

Select one elective of the following (cannot also be taken above): 4
- ECO 307  MANAGERIAL DECISION MAKING
- ECO 308  BUSINESS STRATEGY
- ECO 310  URBAN ECONOMICS
- ECO 312  THE CHICAGO ECONOMY
- ECO 313  MARKET STRUCTURE AND REGULATION OF BUSINESS
- ECO 314  ECONOMICS OF THE PUBLIC SECTOR
- ECO 316  EUROPEAN ECONOMIC HISTORY
- ECO 317  AMERICAN ECONOMIC HISTORY
- ECO 318  LABOR ECONOMICS AND ORGANIZATION
- ECO 319  ECONOMICS AND GENDER
- ECO 320  ECONOMICS OF RELIGION
- ECO 321  LAW & ECONOMICS
- ECO 322  FINANCIAL MARKET REGULATION
- ECO 325  THE ECONOMICS OF POVERTY
- ECO 326  HEALTH ECONOMICS
- ECO 330  RADICAL RESPONSES TO CAPITALISM
- ECO 333  TOPICS IN GLOBAL ECONOMIES
- ECO 334  UNDERSTANDING CHINA'S ECONOMY
- ECO 335  SUSTAINABLE STRATEGIES FOR ENERGY AND THE ENVIRONMENT
- ECO 336  EXPLORING ECONOMICS & STATISTICS THROUGH SPORTS
- ECO 340  DEVELOPMENT OF ECONOMIC THOUGHT
- ECO 341  BEHAVIORAL ECONOMICS
- ECO 359  DEVELOPMENT ECONOMICS
- ECO 360  ECONOMICS OF LOW-INCOME COUNTRIES
- ECO 361  INTERNATIONAL TRADE
- ECO 362  INTERNATIONAL MONETARY ECONOMICS
- ECO 363  ECONOMICS OF THE EUROPEAN UNION
- ECO 379  GAME THEORY
- ECO 398  SPECIAL TOPICS
- ECO 399  INDEPENDENT STUDY

If you are completing a double major or minor in finance, you must take FIN 320 in place of ECO 315.

ECO 393 may not be used towards the major.
ECO 395 may not be taken by students in the Driehaus College of Business.

Career Management Course
Students are required to complete the Career Course (250) associated with the major. Students who double major may choose the Career Course (250) associated with either major provided that hours for graduation are satisfied.
Global Business Perspective
If an ECO course is shared between Global Business Perspective and the Economics major, additional hours of Open Elective credit are required. Any ECO course must be passed with C- or higher.

Open Electives
Open elective credit (16.0 hours) is needed to meet the minimum graduation requirement of 192 hours.

Combined Bachelor’s + Master’s Program Participants
Students admitted to the Economics Combined Bachelor’s + Master’s program may apply up to three approved graduate course(s) towards undergraduate Economics major electives.

Graduation Requirements
All Economics (ECO) courses and any other courses used toward the Economics Data Analytics major must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

Economics (BA)
Economics is both a social science discipline and a framework for analyzing production, consumption, and distribution decisions. The goal of the undergraduate curriculum is to offer students the theoretical background necessary to understand business and policy issues, as well as the quantitative and analytical skills necessary to evaluate these issues independently. The Economics Department offers courses that explore topics such as unemployment, inflation, production and distribution, economic growth, environmental issues, poverty, urban and regional development, international trade, labor issues, economic history, and international economic relations.

Courses emphasize the need for accurate knowledge of business institutions and economic phenomena, for theories capable of explaining these phenomena, for estimating relationships among economic variables, and for testing explanations.

Graduates with a major in economics are solidly prepared for employment in the private, public, and non-profit sectors, or for advanced studies in business, law, and economics.

DePaul offers Economics as both a major and minor field of study through both the College of Liberal Arts and Social Sciences and the Driehaus College of Business. An Honors Track option is available to economic majors in both colleges. In addition, the Department of Economics offers the Combined Bachelors+Masters of Science in Economics and Policy Analysis.

Program Requirements Quarter Hours
Liberal Studies Requirements 76
Major Requirements 56
Open Electives 60
Total hours required 192

Learning Outcomes
Students will be able to:
- Define economic concepts needed to analyze issues in the popular press.
- Identify the function of key economic institutions, such as the Federal Reserve System.
- Employ an economic theory or model to analyze the impact of changes in economic variables.
- Assess the potential impact of government interventions on individuals, markets, and/or the macroeconomy.
- Gain exposure to the application of economic concepts/models in a variety of fields within economics (e.g., Labor Economics, Health Economics, Urban Economics, Development Economics, History of Economic Thought, etc.).

College Core Requirements
Study in the Major Field
The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By "liberal education" the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized "concentration." The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration
All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

The Modern Language Requirement (MLR)
All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:
- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*
• completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
• completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.

Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the “Modern Language Option” (see below).

The Modern Language Option (MLO)
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

**NOTE:** Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

External Credit and Residency
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

1 Students must earn a C- or better in this course.
2 A student whose only major is Economics is required to complete the Capstone offered by the Economics Department. A student who is double majoring (or pursuing dual degrees) with the primary major (or primary degree) in Economics may substitute the Capstone of the secondary major or degree. An Economics major in the University Honors Program shall take only the University Honors Capstone, not both the Honors Capstone and the Economics Capstone.

**Focus Areas for Economics Majors/Minors**

The Economics major requires students to complete principles of micro- and macroeconomics, intermediate micro- and macroeconomic theory, 1 term of statistics, and Economic Analytics. While the program does not require students to select a particular concentration for their studies, students may want to focus the selection of their economics electives to match their academic and future career interests. The department recommends the following Focus Areas as an advising tool for students to use in their course selection. In addition to the courses listed below, the department offers Special Topics courses [ECO 398] that may be relevant to one or more of the Focus Areas.

<table>
<thead>
<tr>
<th>Focus Area</th>
<th>Description</th>
<th>Occupations</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Strategy</td>
<td>For students interested in understanding how market competition and government regulation affects the behavior of business.</td>
<td>Pricing/Revenue Analyst; Business Development Analyst; Consulting; Risk Analyst</td>
<td></td>
</tr>
<tr>
<td>International Economics</td>
<td>For students interested in understanding how international markets work, how businesses handle international operations, and how countries develop trade and development policies.</td>
<td>International Trade Analyst; International Business Development; Positions with multinational companies related to their overseas operations</td>
<td></td>
</tr>
</tbody>
</table>

| Data Analytics | For students interested in enhancing their data analytical skills beyond the basic statistic requirement. This FA is a good complement to all other FAs as data analytics is used in many types of occupations. | Consulting; Data Analyst, Research Analyst |
| Economic Policy and Market Analysis | For students interested in government policy and its effect on the economy. | Economics Analyst (federal, state, and local government agencies); Policy Analyst; Legislative Liaison |
| Health Economics | For students interested in policy and analysis of healthcare delivery and insurance markets | Healthcare Analysts; Business Consulting; Healthcare Actuary |
| Macroeconomic Policy Analysis | For students interested in developing knowledge of how macroeconomic indicators are used in business decisions and policy making | Federal Reserve Bank Research Analyst; Business Development Analyst; Financial Market Analyst; Bureau of Economic Analysis Economist |
| Preparation for PhD in Economics | For students interested in pursuing a PhD in Economics | A Ph.D. in Economics is needed for academic and research-based employment in think tanks and government agencies |

</tr>
</tbody>
</table>

### Preparation for PhD in Economics

- Data Analytics courses
- Courses from any other FA would be appropriate especially advanced electives
- Regular calculus sequence (MAT 150/MAT 151/MAT 152) rather than the business calculus sequence (MAT 135/MAT 136).
- Note: students may want to consider the combined bachelor’s/master’s program to take graduate economics course in their senior year.

ECO 101, ECO 250, ECO 393 and ECO 395 may not be used as Economics Electives towards a major or minor in Economics.

### Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Students are encouraged to use their open electives to minor or double major in a complementary field of study. A student’s specific interest in economics will dictate the best choice of a minor or double major.

### Economics (BA) + Economics and Policy Analysis (MS)

The MS in Economics and Policy Analysis (MS-EPA) gives students a distinguished and marketable set of skills in economic theory as it applies to business and economic policy analysis. Students learn how to conduct statistical and econometric research grounded in sound economic models using data from multiple sources on different issues. In addition, students will be able to explain their results and policy recommendations not only to economists, but also to politicians, and the general public.

MS-EPA graduates can find employment in the private sector working for corporations in governmental relations departments, in federal and state governmental agencies, in trade associations or lobbying firms, or in the not-for-profit sector.

Undergraduate students will apply to the combined degree program during their sophomore/junior year. Students must complete ECO 105, ECO 106, ECO 305, MAT 135 or equivalent, MAT 137 or equivalent before being admitted to the program. Students who begin the program in the fall quarter take the following graduate level courses during their senior year:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 505</td>
<td>ADVANCED MICROECONOMICS</td>
<td></td>
</tr>
<tr>
<td>ECO 515</td>
<td>MICROECONOMICS OF MARKET ORGANIZATION</td>
<td></td>
</tr>
</tbody>
</table>

Graduate Economics elective (subject to prerequisites)

Students who begin the program in winter or spring quarters will select graduate courses in consultation with the Director of the MS in Economics and Policy Analysis Program.

These three courses will count towards completion of the BA with a major in Economics and will also count towards completion of the MS-EPA (students are encouraged to check with the department if they are not also economics majors). The undergraduate degree will be awarded.
at the completion of all undergraduate work while the MS-EPA will be awarded upon completion of the remaining graduate level work.

Economics (BA) + Secondary Education Social Science (MEd)

The TEACH Program combines a Liberal Arts and Social Sciences (LAS) undergraduate Economics major with a graduate level College of Education (COE) Master’s in Education Program. Students graduate with a B.A. in their disciplinary major and a MEd in Education with State of Illinois Secondary Social Science licensure.

Students may apply to the TEACH Program during the spring of their junior year. They must enroll in the Junior Year Experiential Learning course, TCH 320, and meet other application criteria; these include completion of at least 16 quarter credit hours at DePaul and a 3.0 grade point average. During their senior year, students are required to complete a TEACH Program capstone course, TCH 390, and three 400-level courses that count toward both their undergraduate and graduate degrees:

### Junior Year Coursework: 4 undergraduate quarter hours required

<table>
<thead>
<tr>

<td>INQUIRY &amp; APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY</td>
<td>4</td>
</tr>
</tbody>
</table>

Social Science Content Area (grades of C or better required for licensure):

The following Social Science content area requirements are required. These can be taken as part of the major, liberal studies or open elective requirements:

- 3 United States History courses
- 2 Non-United States History courses
- 6 from the economics major
- Additional licensure requirements: (one course in each area required)
  - Geography (GEO 101 recommended)
  - Political Science (PSC 120 recommended)
  - Psychology (PSY 105 recommended)
  - Sociology (SOC 101 recommended)
  - Anthropology (ANT 102 recommended)

This combined degree program of the College of Liberal Arts and Social Sciences and the College of Education was collaboratively developed, and is governed and taught by faculty from these units.

The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring quarter. Upon graduation and the fulfilling of State of Illinois licensure requirements (which may require some additional course work in the student’s major and related fields), students are eligible to be licensed to teach Social Sciences at the 5th-12th grade levels.

A full description of the TEACH Program can be found here. (p. 1145) Students interested in the TEACH Program should consult with the designated TEACH Program advisor in their home department.

Economics 3+3 (BA+JD)

In the 3+3 (BA+JD) Program, high-achieving incoming first-year undergraduate students are admitted simultaneously to the College of Liberal Arts and Social Sciences and the College of Law. Students complete their first three years in the College of Liberal Arts and Social Sciences and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA+JD students meet regularly with advisors in both Colleges and have access to a variety of resources to ensure their success.

### Key Program Features

- Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
- Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
- Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
- Students receive early (conditional) admission to the College of Law.
- Credits earned in the first year of law school apply toward the BA degree.
- Students may opt out of the College of Law segment of the program and continue in the College of Liberal Arts and Social Sciences during their fourth year.
- If students withdraw after the first semester in the College of Law, they return to the College of Liberal Arts and Social Sciences for the winter quarter.

### Program Requirements

In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements.
Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.7 in their third and final year of undergraduate study.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRELAW 150</td>
<td>THE PRACTICE OF LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 151</td>
<td>RECENT CONTROVERSIES IN THE LAW</td>
<td>2</td>
</tr>
<tr>
<td>PRELAW 152</td>
<td>THINKING ABOUT THE LAW</td>
<td>2</td>
</tr>
</tbody>
</table>

In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law's online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant’s third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These classes can be found in the Core Required Courses on the Law JD program page (p. 677).

Financial Aid

BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law's median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

Economics (BSB)

Economics is both a social science discipline and a framework for analyzing production, consumption, and distribution decisions. The goal of the undergraduate curriculum is to offer students the theoretical background necessary to understand business and policy issues, as well as the quantitative and analytical skills necessary to evaluate these issues independently. The Economics Department offers courses that explore topics such as unemployment, inflation, production and distribution, economic growth, environmental issues, poverty, urban and regional development, international trade, labor issues, economic history, and international economic relations. Courses emphasize the need for accurate knowledge of business institutions and economic phenomena, for theories capable of explaining these phenomena, for estimating relationships among economic variables, and for testing explanations.

Graduates with a major in economics are solidly prepared for employment in the private, public, and non-profit sectors, or for advanced studies in business, law, and economics. The economics major in the College of Business combines the study of economics with the related business fields of accountancy, finance, marketing and management.

DePaul offers Economics as both a major and minor field of study through both the Driehaus College of Business and the College of Liberal Arts and Social Sciences. An Honors Track option is available to economic majors in both colleges. In addition, the Department of Economics offers the Accelerated Bachelor-Master of Science in Economics and Policy Analysis.

Learning Outcomes

Core Outcomes

- Use analytical and reflective skills in decision making.
- Communicate effectively both orally and in writing.
- Recognize legal and ethical issues confronting them.
- Contribute to the performance of a group within a business setting.
- Know the differences among global economies, institutions, business practices and cultures.
- Acquire knowledge of the functional areas of business and the interrelationships among the functional areas within a business.

Program Specific Outcomes

Students will be able to:

- Define economic concepts needed to analyze issues in the business and popular press.
- Identify the function of key economic institutions, such as the Federal Reserve System.
- Employ an economic theory or model to analyze the impact of changes in economic variables.
- Assess the potential impact of government interventions on individuals, markets, and/or the macroeconomy.
- Apply economic concepts/models in a variety of fields within economics (e.g., Labor Economics, Health Economics, Urban Economics, International Economics, Development Economics, History of Economic Thought, etc.).

College Core Requirements

Business Core Requirements

All undergraduate students in the Driehaus College of Business complete foundational courses in the areas of analytics, accountancy, mathematics, economics, business law, finance, management, management information systems/computer science, and marketing.

Course Requirements

For a student to complete the Bachelor of Science in Business, the following Business Core courses totaling at least 70.0 hours are required:

<table>
<thead>
<tr>
<th>Course</th>

1. Strobel students take specially designated sections of all required ACC classes, including ACC 101 and ACC 102 (excluding ACC 250).
2. Students majoring in accounting (primary or secondary/double major) are allowed to substitute ACC 370 in place of BLW 201. Hospitality Leadership majors must take HSP 207 for the Business Law requirement; use of HSP 207 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete both HSP 207 and BLW 201.
4. MGT 301-H is required if pursuing the Management Honors Program.
5. MIS majors and minors must take MIS 140. Actuarial Science and Economic Data Analytics majors must take CSC 241.
6. MKT majors and Sales minors must take MKT 376.
7. Entrepreneurship majors and minors must take ICS 394. Hospitality Leadership majors must take ICS 396 for the Business Capstone; use of ICS 396 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete ICS 396 and one of ICS 394 or ICS 395.
8. A course taken for Global Business Perspective that is in a student’s major or minor field must be completed with a minimum grade of C-.

Business Ethics
All undergraduate students in the Driehaus College of Business complete a course in Business Ethics. It is recommended students take MGT 248 or PHL 248 in Philosophical Inquiry or MGT 228 or REL 228 in Religious Dimensions in the Liberal Studies Program (or University Honors Program) Requirements.

Second Majors and Minors
The addition of a second major or minor may affect the Business Core classes required for a student. Meet with an academic advisor to confirm requirements.

Math Requirements for all business majors (except Actuarial Science majors)
- MAT 137 may be replaced by MAT 348 or MAT 351.

Global Business Perspective
If an ECO course is shared between Global Business Perspective and the Economics major, additional hours of Open Elective credit are required.

Grade Minimum Requirements for Economics Major
A minimum grade of C- is required for the following: ACC 101, ACC 102, BUS 102, ECO 105, ECO 106, ECO 315, MAT 137, the course used for
Professional Writing, and any ECO course used for Global Business Perspective.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

¹ Students must earn C- or better in this course.

**Learning Domains**

**Arts and Literature (AL) (p. 1300)**
- 3 AL Courses Required

**Historical Inquiry (HI) (p. 1304)**
- 2 HI Courses Required

**Math and Computing (MC) (p. 1306)**
- Not Required

**Philosophical Inquiry (PI) (p. 1307)**
- 2 PI Courses Required

**Religious Dimensions (RD) (p. 1308)**
- 2 RD Courses Required

**Scientific Inquiry (SI) (p. 1310)**
- 1 Lab Course Required

**Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)**
- 1 SCBI Course Required

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Major Requirements**

**Course Requirements**

In addition to ECO 105, ECO 106 and ECO 315, a student majoring in Economics is required to complete the following courses totaling 34.0 hours:

<table>

<td>SUSTAINABLE STRATEGIES FOR ENERGY AND THE ENVIRONMENT</td>
<td></td>
</tr>
</tbody>
</table>

¹ PHL 248 / MGT 248 is required in PI or REL 228 / MGT 228 is required in RD.
If you are completing a double major or minor in finance, you must take FIN 320 in place of ECO 315.

ECO 101 is intended for non-Driehaus students and cannot be counted toward a major or minor in economics.

ECO 393 may not be used towards the major.

ECO 395 may not be taken by students in the Driehaus College of Business.

**Career Management Course**
Students are required to complete the Career Course (250) associated with the major. Students who double major may choose the Career Course (250) associated with either major provided that hours for graduation are satisfied.

**Global Business Perspective**
If an ECO course is shared between Global Business Perspective and the Economics major, additional hours of Open Elective credit are required. Any ECO course must be passed with C- or higher.

**Open Electives**
Open elective credit (16.0 hours) is needed to meet the minimum graduation requirement of 192 hours.

**Combined Bachelor’s + Master’s Program Participants**
Students admitted to the Economics Combined Bachelor’s + Master’s program may apply up to three approved graduate course(s) towards undergraduate Economics major electives.

**Graduation Requirements**
All Economics (ECO) courses and any courses used toward the Economics major must be completed with a minimum grade of C- and with a combined GPA of 2.0 or higher.

**Focus Areas for Economics Majors/Minors**
The Economics major requires students to complete principles of micro- and macroeconomics, intermediate micro- and macroeconomic theory, business analytics, and statistics. While the program does not require students to select a particular concentration for their studies, students may want to focus the selection of their economics electives to match their academic and future career interests. The department recommends the following Focus Areas as an advising tool for students to use in their course selection. In addition to the courses listed below, the department offers Special Topics courses [ECO 398] that may be relevant to one or more of the Focus Areas.

<table>
<thead>
<tr>
<th>Focus Area</th>
<th>Description</th>
<th>Occupations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Strategy</td>
<td>For students interested in understanding how market competition and government regulation affects the behavior of business.</td>
<td>Pricing/Revenue Analyst; Business Development Analyst; Consulting (litigation-related); Risk Analyst</td>
</tr>
<tr>
<td>International Economics</td>
<td>For students interested in understanding how international markets work, how businesses handle international operations, and how countries develop trade and development policies.</td>
<td>International Trade Analyst; International Business Development; Trade Compliance Analyst</td>
</tr>
<tr>
<td>Data Analytics</td>
<td>For students interested in enhancing their data analytical skills beyond the basic statistic requirement. This FA is a good complement to all other FAs as data analytics is used in many types of occupations.</td>
<td>Consulting; Data Analyst; Research Analyst</td>
</tr>
<tr>
<td>Economic Policy and Market Analysis</td>
<td>For students interested in government policy and its effect on the economy.</td>
<td>Economics Analyst (federal, state, and local government agencies); Policy Analyst; Legislative Liaison</td>
</tr>
<tr>
<td>Health Economics</td>
<td>For students interested in policy and analysis of healthcare delivery and insurance markets.</td>
<td>Healthcare Analyst; Business Consulting; Healthcare Actuary</td>
</tr>
<tr>
<td>Macroeconomic Policy Analysis</td>
<td>For students interested in developing knowledge of how macroeconomic indicators are used in business decisions and policy making.</td>
<td>Federal Reserve Bank Research Analyst; Business Development Analyst; Financial Market Analyst; Bureau of Economic Analysis Economist</td>
</tr>
</tbody>
</table>

**Relevant Coursework**
For students participating in the Economics Honors Track, we have indicated [1] which courses in can be used to satisfy the Advance Elective requirement [courses carrying a prerequisite of ECO 305, ECO 306, or ECO 375].

1 Advanced Elective

Preparation for PhD in Economics

- A Ph.D. in Economics is needed for academic and research-based employment in think tanks and government agencies.
- Recommended course ECO 304
- Courses from any of the FA would be appropriate especially advanced electives 1.
- Regular calculus sequence (MAT 150/MAT 151/MAT 152) rather than the business calculus sequence (MAT 135/MAT 136)
- Note: students may want to consider the combined bachelor’s/master’s program to take graduate economics course in their senior year

1 Advanced Elective.

Economics (Minor)

Available to students majoring outside the Driehaus College of Business, the minor in Economics allows a student to learn the foundations of microeconomic and macroeconomic theory, along with the theoretical, quantitative and analytical skills necessary to understand business and policy issues.

Prerequisite Requirements

Students must meet the prerequisite of MAT 101 prior to taking the first course in the minor.

Course Requirements

A non-Driehaus student minoring in Economics is required to complete the following courses totaling at least 24.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 105</td>
<td>PRINCIPLES OF MICROECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>ECO 106</td>
<td>PRINCIPLES OF MACROECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>Select four 300-level or higher Economics Electives</td>
<td>16</td>
<td></td>
</tr>
</tbody>
</table>

ECO 101 cannot be counted toward a major or minor in economics.

ECO 377, ECO 393 and ECO 395 may not be used as Economics Electives in the Economics major or minor.
Focus Areas for Economics Majors/Minors

The department recommends the following Focus Areas as an advising tool for students to use in their course selection. In addition to the courses listed in the Focus Areas, the department offers Special Topics courses (ECO 398) that may be relevant to one or more of the Focus Areas. Economics Focus Areas can be found in the Economics Major (p. 393) section of the Academic Catalog.

Graduation Requirements

All Economics (ECO) courses and any other courses used toward the Economics minor must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

Economics (Minor: Business Students Only)

Students in the Driehaus College of Business who wish to gain a deeper understanding of economic theory and practice to complement their majors can do so with a minor in Economics. Students may choose the economics electives that best fit their individual courses of study.

Course Requirements

In addition to ECO 105, ECO 106 and ECO 315, a Driehaus student minoring in Economics is required to complete the following courses totaling at least 12.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select three, 300-level or higher Economics Electives</td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

ECO 101 is intended for non-Driehaus students and cannot be counted toward a major or minor in economics.

ECO 377, ECO 393, and ECO 395 may not be used as Economics Electives in the Economics major or minor.

Focus Areas for Economics Majors/Minors

The department recommends the following Focus Areas as an advising tool for students to use in their course selection. In addition to the courses listed in the Focus Areas, the department offers Special Topics courses (ECO 398) that may be relevant to one or more of the Focus Areas. Economics Focus Areas can be found in the Economics Major (p. 393) section of the Academic Catalog.

Graduation Requirements

All Economics (ECO) courses and any other courses used toward the Economics minor must be completed with a minimum grade of C- and with a combined GPA of 2.000 or higher.

Economics and Policy Analysis (MS)

Become an Economic Analyst

In DePaul’s Master of Science (MS) in Economics and Policy Analysis you’ll gain in-depth knowledge of economic theory and advanced skills in data analysis that position you to examine economic and business policies. The research-driven curriculum prepares you to be a hands-on economic analyst.

Interested students participate in 12-16 week fellowships at private companies, a government agency, public policy institute or nonprofit in Chicago, Washington D.C., or another city.

Program Features

Through the MS in Economics and Policy Analysis program, students develop skills and knowledge in:

- Applied economic theory.
- Demonstrating research findings through written analyses for audiences that include business professionals, economists, policymakers and the public.
- Conducting econometric research.
- The relationship between economics and politics.

STEM Designation

DePaul’s Master of Science in Economics and Policy Analysis is a Department of Homeland Security STEM-designated program. STEM designation is granted to programs that produce graduates educated in science, technology, engineering and/or math who help support U.S. economic competitiveness and growth. International students who earn degrees from STEM-designated programs can qualify to extend their post-graduation stay in the United States for Optional Practical Training (https://studyinthestates.dhs.gov/stem-opt-hub/) (OPT). OPT provides an opportunity for international students to develop their careers while also helping meet the demand for STEM-educated professionals in the U.S. workforce. To find out more, contact the Kellstadt Graduate School of Business at kgsb@depaul.edu or (312) 362-8810.

Program Requirements

<table>
<thead>
<tr>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Degree Requirements</td>
</tr>
<tr>
<td>Total hours required</td>
</tr>
</tbody>
</table>

Learning Outcomes

Students will be able to:

- Apply modern economic theory, use analytical and evaluative skills to solve a variety of policy problems and make recommendations and decisions.
- Employ existing econometric software programs to solve complex problems in policy analysis.
- Understand the main theories of international trade and apply them to relevant international trade policy issues.
- Create clear and coherent written work that is geared towards different audiences including economists, non-economists, policy makers and general public.
- Integrate emerging technologies in ethical decision making.

Degree Requirements

Prerequisite Requirements

Students must have completed one course in Principles of Microeconomics and one in Principles of Macroeconomics as well as differential calculus prior to admission to the MSEPA program.

Course Requirements

Students in the MSEPA program complete 12 courses (48 credit hours). The degree consists of seven required core courses plus five elective courses. As part of the electives, students may apply for a one- or two-
course equivalent research fellowship. Alternatively, with approval of the program director, students may take two graduate elective courses outside of the economics department.

Students may enroll in the program on a full-time or part-time basis. Classes are generally offered during the evening. The typical full-time student will finish the program in five quarters. Students will be advised to take no more than three courses per term. Students attending the program part-time will typically take two evening courses per quarter and finish the program in six quarters.

### Research Fellowship

The research fellowship allows students to work full-time on Capitol Hill, an independent agency or nonprofit in Washington D.C., Chicago, or elsewhere for 12 to 16 weeks. Fellowships immerse students in analysis, research and policymaking, while providing a unique opportunity to develop an extensive professional network.

In order to be eligible for the fellowship, students must have earned a course grade of B or better in ECO 505, ECO 506 and ECO 507. In addition to the academic requirements, students must also have departmental approval.

### Degree Requirements

- Satisfactory completion of the college residency requirement.
- Satisfactory completion of the 12 required and elective courses.
- All courses for credit toward the degree must be completed within six calendar years after the candidate’s first term of enrollment in the Kellstadt Graduate School of Business. After a lapse of six years a course is expired. An expired course is not acceptable for the purpose of satisfaction of degree requirements and is not applicable to the degree without the written approval of the director of the program or the Kellstadt Graduate School of Business.

### Economics and Policy Analysis (MS), Combined Bachelor’s + Master’s Degree

The combined DePaul Bachelor’s + Master’s degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

### DePaul Undergraduate Degree + Economics and Policy Analysis (MS)

The MS in Economics and Policy Analysis gives students a distinguished and marketable set of skills in economic theory as it applies to business and policy analysis. Students learn how to conduct statistical and econometric research grounded in sound economic models using data from multiple sources on different issues. In addition, students will be able to explain their results and policy recommendations not only to economists, but also to politicians and the general public.

MS in EPA graduates can find employment in the private sector working for corporations in governmental relations departments, in federal and state governmental agencies, in trade associations or lobbying firms, or in the not-for-profit sector.

All undergraduate students who are interested in applying during their junior year must complete the following prerequisites requirements before admission to the combined program:

<table>

</table>
of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declarantion of Major, Minor and Concentration

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

The Modern Language Requirement (MLR)

All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

• placing into 104 or above on the DePaul language placement exam
• completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
• completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
• completing the final course of a four-year sequence of the same modern language in high school*
• completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
• completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

*Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Please note: Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Requirement.
Students who complete an Inter-College Transfer (ICT) to the College will abide by the MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the "Modern Language Option" (see below).

The Modern Language Option (MLO)
The Modern Language Option is available to all BA students who wish to study a modern language beyond the level required by their College, and to all other undergraduate students without a modern language requirement who wish to study a language at any level.

Students selecting the MLO may substitute a sequence of three courses in the same language for three domain courses.

The three MLO substitutions must be made in three different domains, and any substitutions must be consistent with the principle that students complete at least one course in each learning domain.

MLO substitutions may not be used to replace requirements in the Math & Computing, and Scientific Inquiry, domains.

Students majoring in one modern language may use the Modern Language Option for study of a second language at the Intermediate level or above.

Modern Languages courses with an E-designation are taught in English and may not be applied to the Modern Language Option.

NOTE: Please contact your college/school regarding additional information and restrictions about the Modern Language Option.

External Credit and Residency
A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

Liberal Studies Requirements
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

Junior Year

Experiential Learning
Required | 4

Senior Year

Capstone
ECO 395 CAPSTONE SEMINAR IN ECONOMICS 1,2 | 4

1 Students must earn a C- or better in this course.
2 A student whose only major is Economics is required to complete the Capstone offered by the Economics Department. A student who is double majoring (or pursuing dual degrees) with the primary major (or primary degree) in Economics may substitute the Capstone of the secondary major or degree. An Economics major in the University Honors Program shall take only the University Honors Capstone, not both the Honors Capstone and the Economics Capstone.

Learning Domains

Arts and Literature (AL) (p. 1300)
- 3 Courses Required

Historical Inquiry (HI) (p. 1304)
- 2 Courses Required

Math and Computing (MC) (p. 1306)
- Not Required

Philosophical Inquiry (PI) (p. 1307)
- 2 Courses Required

Religious Dimensions (RD) (p. 1308)
- 2 Courses Required

Scientific Inquiry (SI) (p. 1310)
- 2 Courses Required
- [1 Lab Course and 1 SWK Course]

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
- 1 Course Required

Notes
Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

Invitation
Economics majors will be invited each term to participate in the Honors Track if they meet the following criteria:
• Have declared Economics as their major (or second major).
• Have completed ECO 305 and ECO 306 with a minimum grade of B- in each course.
• Have a minimum grade point average (GPA) of 3.300 in all economics courses taken at DePaul.

### Course Requirements

<tbody>
<tr>
<td>MAT 135</td>
<td>BUSINESS CALCULUS I</td>
<td></td>
<td>4</td>
</tr>
<tr>
<td>MAT 137</td>
<td>BUSINESS STATISTICS (or an equivalent statistics course approved by an Economics advisor)</td>
<td></td>
<td>4</td>
</tr>
</tbody>
</table>

1. Advanced economics elective (an ECO course that carries a prerequisite of ECO 305, ECO 306, or ECO 304). This requirement must be satisfied with a course taken at DePaul.

MAT 150 may be substituted for MAT 135.

ECO 101, ECO 250, ECO 393, and ECO 395 may not be used as Economics Electives towards a major or minor in Economics.

### Degree Requirements

- Honors Track students must maintain a minimum GPA of 3.300 (B+ average) in all economics courses taken at DePaul.
- Honors Track students must submit a paper written for any economics class that meets the following criteria:
  a. the student earned a B+ or better on the paper;
  b. the paper contained a literature review based on at least 5 sources; and
  c. the paper was at least 10 pages OR used econometrics.
  d. the paper was sole-authored.

This requirement must be satisfied using a paper from a course taken at DePaul. Students should contact the Director of the Undergraduate Economics Program for submission guidelines.

### Economics Honors (BA) + Economics and Policy Analysis (MS)

The MS in Economics and Policy Analysis (MS-EPA) gives students a distinguished and marketable set of skills in economic theory as it applies to business and economic policy analysis. Students learn how to conduct statistical and econometric research grounded in sound economic models using data from multiple sources on different issues. In addition, students will be able to explain their results and policy recommendations not only to economists, but also to politicians, and the general public.

MS-EPA graduates can find employment in the private sector working for corporations in governmental relations departments, in federal and state governmental agencies, in trade associations or lobbying firms, or in the not-for-profit sector.

Undergraduate students will apply to the combined degree program during their sophomore/junior year. Students must complete ECO 105, ECO 106, ECO 305, MAT 135 or equivalent, MAT 137 or equivalent before being admitted to the program. Students who begin the program in the fall quarter, typically take the following graduate level courses during their senior year:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 505</td>
<td>ADVANCED MICROECONOMICS</td>
<td></td>
<td>4</td>
</tr>
<tr>
<td>ECO 515</td>
<td>MICROECONOMICS OF MARKET ORGANIZATION</td>
<td></td>
<td>4</td>
</tr>
</tbody>
</table>

Graduate Economics elective (subject to prerequisites)

Students who begin the program in winter or spring quarters, will select graduate courses in consultation with the Director of the MS in Economics and Policy Analysis Program.

The three graduate courses will count towards completion of the BA and will also count towards completion of the MS-EPA. Students may count their three graduate courses as major or open electives. One of the graduate level courses may count as an advanced elective for the Economics Honors Track if the minimum grade of B- is met. The undergraduate degree will be awarded at the completion of all undergraduate work while the MS-EPA will be awarded upon completion of the remaining graduate level work.

### Economics Honors (BA) + Secondary Education Social Science (MEd)

The TEACH Program combines a Liberal Arts and Social Sciences (LAS) undergraduate Economics major with a graduate level College of Education (COE) Master’s in Education Program. Students graduate with a BA in their disciplinary major and a MEd in Education with State of Illinois Secondary Social Science licensure.

Students may apply to the TEACH Program during the spring of their junior year. They must enroll in the Junior Year Experiential Learning
course, TCH 320, and meet other application criteria; these include completion of at least 16 quarter credit hours at DePaul and a 3.0 grade point average. During their senior year, students are required to complete a TEACH Program capstone course, TCH 390, and three 400-level courses that count toward both their undergraduate and graduate degrees:

### Junior Year Coursework: 4 undergraduate quarter hours required

<table>
<thead>

</tbody>
</table>

### Social Science Content Area (grades of C or better required for licensure)

The following Social Science content area requirements are required. These can be taken as part of the major, liberal studies or open elective requirements:

- HST 298
- HST 299
- 3 United States History courses
- 2 Non-United States History courses
- 6 from the economics major
- Additional licensure requirements: (one course in each area required)
  - Geography (GEO 101 recommended)
  - Political Science (PSC 120 recommended)
  - Psychology (PSY 105 recommended)
  - Sociology (SOC 101 recommended)
  - Anthropology (ANT 102 recommended)

This combined degree program of the College of Liberal Arts and Social Sciences and the College of Education was collaboratively developed, and is governed and taught by faculty from these units.

The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring quarter. Upon graduation and the fulfilling of State of Illinois licensure requirements (which may require some additional course work in the student’s major and related fields), students are eligible to be licensed to teach Social Sciences at the 5th-12th grade levels.

A full description of the TEACH Program can be found here. (p. 1145)

Students interested in the TEACH Program should consult with the designated TEACH Program advisor in their home department.

### Economics Honors 3+3 (BA+JD)

In the 3+3 (BA+JD) Program, high-achieving incoming first-year undergraduate students are admitted simultaneously to the College of Liberal Arts and Social Sciences and the College of Law. Students complete their first three years in the College of Liberal Arts and Social Sciences and their final three years in the College of Law. Students receive the Bachelor of Arts degree after successful completion of their first year of law school. Throughout the program, BA+JD students meet regularly with advisors in both Colleges and have access to a variety of resources to ensure their success.

#### Key Program Features

- Students earn a law degree (Juris Doctor) in a total of six years (three years undergraduate and three years in law school).
- Students save one year’s worth of undergraduate tuition and living expenses while gaining a head start in entering the legal profession.
- Students benefit from new curricular offerings and collaborative activities created to prepare them for law school.
- Students receive early (conditional) admission to the College of Law.
- Credits earned in the first year of law school apply toward the BA degree.
- Students may opt out of the College of Law segment of the program and continue in the College of Liberal Arts and Social Sciences during their fourth year.
- If students withdraw after the first semester in the College of Law, they return to the College of Liberal Arts and Social Sciences for the winter quarter.

#### Program Requirements

In order to maintain status in the program, students must demonstrate satisfactory progress toward completing their undergraduate coursework in three years, including meeting the Modern Language Requirement and necessary Liberal Studies Program or Honors Program requirements. Students who enroll in the BA+JD program in 2022 or later must achieve a cumulative GPA of 3.7 by the end of their second year of undergraduate study and maintain a cumulative GPA of 3.7 in their third and final year of undergraduate study.

In addition, students must complete a series of two-credit courses, taught by College of Law faculty, prior to matriculation in the College of Law. They are designed to help students understand many aspects of the legal system as well as to complement their undergraduate course of study. The courses are as follows:
In order to matriculate in the College of Law, students will be required to register with the Law School Admissions Council, submit the College of Law’s online application, comply with all character and fitness requirements for admission, and submit an LSAT score. The activities should be completed no later than February 1 of the participant’s third undergraduate year. The LSAT score will only be used for consideration of merit scholarships; it will not be a factor in the admission of the participant to the program.

In addition to the three PRELAW classes, students will complete 11 courses (29 semester credit hours) during their final year of undergraduate study. These classes can be found in the Core Required Courses on the Law JD program page (p. 677).

**Financial Aid**

BA/JD students are not eligible for undergraduate scholarships once they start law school. All students will receive a merit scholarship from the College of Law, with merit scholarships beginning at $1,500 per academic year. Students who earn an LSAT score and GPA at or above the College of Law’s median LSAT and GPA are the most likely candidates for larger merit scholarships. College of Law students are not eligible for the Double Demon discount.

### Economics Honors (BSB)

The Honors Track in Economics is available to students completing the Bachelor of Science in Business with a major in Economics. It provides the opportunity to pursue a more challenging path of meeting degree requirements. In addition to maintaining a higher GPA, this path requires the demonstration of more quantitative and writing skills than the basic requirements for the Economics major. The student successfully completing this track would graduate with departmental honors.

<table>

### Learning Outcomes

**Core Outcomes**

- Use analytical and reflective skills in decision-making.
- Communicate effectively both orally and in writing.
- Recognize legal and ethical issues confronting them.
- Contribute to the performance of a group within a business setting.
- Know the differences among global economies, institutions, business practices and cultures.
- Acquire knowledge of the functional areas of business and the interrelationships among the functional areas within a business.

**Program Specific Outcomes**

Students will be able to:

- Define economic concepts needed to analyze issues in the business and popular press
- Identify the function of key economic institutions, such as the Federal Reserve System.
- Employ an economic theory or model to analyze the impact of changes in economic variables.
- Assess the potential impact of government interventions on individuals, markets, and/or the macroeconomy.
- Apply economic concepts/models in a variety of fields within economics (e.g., Labor Economics, Health Economics, Urban Economics, International Economics, Development Economics, History of Economic Thought, etc.)

### College Core Requirements

#### Business Core Requirements

All undergraduate students in the Driehaus College of Business complete foundational courses in the areas of analytics, accountancy, mathematics, economics, business law, finance, management, management information systems/computer science, and marketing.

#### Course Requirements

For a student to complete the Bachelor of Science in Business, the following Business Core courses totaling at least 70.0 hours are required:

<table>

**Business Capstone**
Select one of the following:

- ICS 394  ENTREPRENEURSHIP STRATEGY
- ICS 395  MANAGEMENT STRATEGY
- ICS 396  HOSPITALITY STRATEGY (Hospitality majors only)

**Global Business Perspective**
Select 4.0 hours of the following:

- ECO 316  EUROPEAN ECONOMIC HISTORY
- ECO 330  RADICAL RESPONSES TO CAPITALISM
- ECO 333  TOPICS IN GLOBAL ECONOMIES
- ECO 334  UNDERSTANDING CHINA’S ECONOMY
- ECO 360  ECONOMICS OF LOW-INCOME COUNTRIES
- ECO 361  INTERNATIONAL TRADE
- ECO 362  INTERNATIONAL MONETARY ECONOMICS
- ECO 363  ECONOMICS OF THE EUROPEAN UNION
- FIN 340  INTERNATIONAL FINANCE
- FIN 355  GLOBAL IPOs & VENTURE CAPITAL
- ICS 350  INTERNATIONAL BUSINESS SEMINAR
- MGT 354  GLOBAL HUMAN RESOURCE MANAGEMENT
- MGT 357  INTERNATIONAL BUSINESS
- MKT 340  MARKETING ACROSS CULTURES: A CULTURAL PERSPECTIVE ON MULTICULTURAL MARKETS
- MKT 358  MARKETING IN A GLOBAL ENVIRONMENT
- MKT 360  INTERNATIONAL MARKETING
- SOC 217  WORK IN A GLOBALIZED WORLD

A course taken as part of a term-long study abroad program

**Professional Writing**
Select one of the following:

- WRD 202  PROFESSIONAL WRITING FOR BUSINESS (2.0 quarter hours)
- WRD 204  TECHNICAL WRITING
- WRD 206  PROFESSIONAL WRITING

1. Strobel students take specially designated sections of all required ACC classes, including ACC 101 and ACC 102 (excluding ACC 250).
2. Students majoring in accounting (primary or secondary/double major) are allowed to substitute ACC 370 in place of BLW 201. Hospitality Leadership majors must take HSP 207 for the Business Law requirement; use of HSP 207 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete both HSP 207 and BLW 201.
4. MGT 301-H is required if pursuing the Management Honors Program.
5. MIS majors and minors must take MIS 140. Actuarial Science and Economic Data Analytics majors must take CSC 241.
6. MKT majors and Sales minors must take MKT 376.
7. Entrepreneurship majors and minors must take ICS 394. Hospitality Leadership majors must take ICS 396 for the Business Capstone; use of ICS 396 is limited to Hospitality Leadership majors. A student majoring in Hospitality Leadership and a second business major must complete ICS 396 and one of ICS 394 or ICS 395.
8. A course taken for Global Business Perspective that is in a student’s major or minor field must be completed with a minimum grade of C-.

**Business Ethics**
All undergraduate students in the Driehaus College of Business complete a course in Business Ethics. It is recommended students take MGT 248 or PHL 248 in Philosophical Inquiry or MGT 228 or REL 228 in Religious Dimensions in the Liberal Studies Program (or University Honors Program) Requirements.

**Second Majors and Minors**
The addition of a second major or minor may affect the Business Core classes required for a student. Meet with an academic advisor to confirm requirements.

**Math Requirements for all business majors (except Actuarial Science majors)**
- MAT 137 may be replaced by MAT 348 or MAT 351.

**Global Business Perspective**
If an ECO course is shared between Global Business Perspective and the Economics major, additional hours of Open Elective credit are required.

**Grade Minimum Requirements for Economics Major**
A minimum grade of C- is required for the following: ACC 101, ACC 102, BUS 102, ECO 105, ECO 106, ECO 315, MAT 137, the course used for Professional Writing, and any ECO course used for Global Business Perspective.

**Liberal Studies Requirements**
Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select the appropriate college or school, followed by Undergraduate Academics and scroll down.

**Course**  
**Title**  
**Hours**

**First Year Program**

**Chicago Quarter**

- LSP 110  DISCOVER CHICAGO  
  or LSP 111  EXPLORE CHICAGO

Experiential Learning

Required 4

Senior Year

Capstone

ICS 392 SENIOR SEMINAR 1 4

1 Students must earn C- or better in this course.

Learning Domains

Arts and Literature (AL) (p. 1300)
• 3 AL Courses Required

Historical Inquiry (HI) (p. 1304)
• 2 HI Courses Required

Math and Computing (MC) (p. 1306)
• Not Required

Philosophical Inquiry (PI) (p. 1307)
• 2 PI Courses Required

Religious Dimensions (RD) (p. 1308)
• 2 RD Courses Required

Scientific Inquiry (SI) (p. 1310)
• 1 Lab Course Required

Social, Cultural, and Behavioral Inquiry (SCBI) (p. 1312)
• 1 SCBI Course Required

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student’s primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the Experiential Learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

Invitation

Economics majors will be invited each term to participate in the Honors Track if they meet the following criteria:

• Have completed ECO 305 and ECO 306 with a minimum grade of B- in each course
• Have a minimum GPA of 3.300 in all Economics (ECO) courses taken at DePaul

Course Requirements

In addition to ECO 105, ECO 106 and ECO 315, a student majoring in the Honors Track in Economics is required to complete the following courses totaling 38.0 hours:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 250</td>
<td>CAREER PREPARATION FOR ECONOMICS MAJORS</td>
<td>2</td>
</tr>
<tr>
<td>ECO 304</td>
<td>ANALYTICS FOR ECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>ECO 305</td>
<td>INTERMEDIATE MICROECONOMICS (with a B- minimum grade)</td>
<td>4</td>
</tr>
<tr>
<td>ECO 306</td>
<td>INTERMEDIATE MACROECONOMICS (with a B- minimum grade)</td>
<td>4</td>
</tr>
</tbody>
</table>

Select one from either:

<table>

Undergraduate Economics Program for submission guidelines. The director position is currently held by Associate Professor Laura Owen, lowen@depaul.edu.

**Combined Bachelor’s + Master’s Program Participants**

Students admitted to the Economics Combined Bachelor’s + Master’s program may apply up to three approved graduate course(s) towards undergraduate Economics major electives.

**Graduation Requirements**

All Economics (ECO) courses and any other courses used toward the Economics Honors major must be completed with a minimum grade of C- unless otherwise noted above and with a combined GPA of 2.000 or higher. Economics Honors students must maintain a minimum GPA of 3.300 (B+ average) in all Economics (ECO) courses taken at DePaul.

**Sample Schedule**

Students interested in pursuing the Honors Track in Economics are advised to complete the following courses according to the sequence found below:

<table>
<thead>
<tr>
<th>Course Title Quarter</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st or 2nd Year</td>
<td></td>
</tr>
<tr>
<td>ECO 105 PRINCIPLES OF MICROECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>ECO 106 PRINCIPLES OF MACROECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>MAT 137 BUSINESS STATISTICS</td>
<td>4</td>
</tr>
<tr>
<td>One term of Calculus (MAT 135, MAT 150, MAT 160, MAT 170)</td>
<td>4</td>
</tr>
<tr>
<td>2nd or 3rd Year</td>
<td></td>
</tr>
<tr>
<td>ECO 250 CAREER PREPARATION FOR ECONOMICS MAJORS</td>
<td>2</td>
</tr>
<tr>
<td>ECO 304 ANALYTICS FOR ECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>ECO 305 INTERMEDIATE MICROECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>ECO 306 INTERMEDIATE MACROECONOMICS</td>
<td>4</td>
</tr>
<tr>
<td>Advanced Economics Electives (selected from approved courses)</td>
<td>4</td>
</tr>
<tr>
<td>2nd through 4th Year</td>
<td></td>
</tr>
<tr>
<td>ECO 376 TIME SERIES ANALYSIS or ECO 377 ECONOMIC ANALYTICS USING SAS AND R</td>
<td>4</td>
</tr>
<tr>
<td>Additional Economics Electives (3 courses required)</td>
<td>12</td>
</tr>
</tbody>

**Educating Adults (MA)**

The Master of Arts Program in Educating Adults (MAEA) from the School of Continuing and Professional Studies (p. 1457) (SCPS) is designed for people who, working formally or informally in diverse settings, support the process and practice of adults’ learning. Grounded in key theories, current research and best practices in adult education and learning, the program provides a learning laboratory for learners to build and deepen their knowledge and skills in assessment, design, facilitation, evaluation and ongoing research to improve practice.

**Focus Areas**

MAEA students may choose a focus area within Educating Adults:

*Community-Engaged Learning*

This focus area is designed to help adults effect change and growth within their local contexts. Students electing this focus area work with others to facilitate positive change for individuals, groups, and/or
communities. Related areas include community development, community engagement, empowerment, social change, social impact, and social justice.

**Learning and Development**
This focus area is designed to help adults develop their growth and performance potential in the workplace. Students electing this focus area center their work on assessment and evaluation, curriculum/program development, delivery/facilitation, and/or curriculum design. Related areas include employee engagement, human resources, instructional design, performance improvement, talent development, and training.

**Technology-Enhanced Learning**
This focus area is designed to help adults learn using technology in various ways and for various purposes. Students electing this focus area use a range of platforms, strategies and tools for designing and delivering learning in on-line, on-ground, and/or hybrid environments. Related areas include E-learning, gamification, and social media.

**Individualized**
This focus area is to-be-developed by the individual student in the event that none of the three designated areas (above) reflects the student’s interests and career aspirations. (If proposing one’s own individualized focus area, students are advised to consider the perspectives of external audiences such as employers and graduate schools.)

**Key Features**
- You expand your knowledge of key theories and best practices in adult learning—including the latest in instructional technology, course design, learning facilitation, internet-based practices and emerging trends.
- You further develop competencies as an adult educator and expand your repertoire of core and cutting-edge knowledge and skills.
- You study with other adult educators in a collaborative learning environment.
- You customize portions of your study to match your individual learning needs and goals and carry out an applied project that contributes to adults’ learning in your particular area of practice.
- You receive assistance from a team of advisors from the University who provide coaching and mentoring to ensure your success.
- You engage in a brief/intensive series of “liberal learning” seminars designed to rekindle and/or deepen your practice in key domains of applied effectiveness (personal, interpersonal, organizational, values and inquiry).
- You accomplish your goal of graduate study—enhancing your contribution as an educator of adults and earning an accredited graduate degree with competencies endorsed by the University.

**Learning Outcomes**
**Program Specific Outcomes**
Students will be able to:
- Apply reflective acuity in support of adults learning.
- Engage methods of inquiry to improve the practice of adult learning.
- Take initiative to add value in their professional practice.
- Adapt and engage from an ever-broadening repertoire of responses.
- Contribute to achieve collective results.

**Degree Requirements**
**Course Requirements**
Students must complete a minimum of 52 graduate credit hours with a cumulative GPA of not less than 2.5.

### Education and Social Justice (Minor)

The minor is for undergraduates with majors in other fields of study who want to study educational issues but are not pursuing teacher licensure. From a critical and interdisciplinary lens, students enrolled in the minor will study educational thought, policy and practice in relationship to broader social, cultural and political forces, in both school and non-school settings. The minor will help students develop the knowledge and skills necessary to understand and critically analyze the purposes of education and its impact on individuals and the broader society.

### Course Requirements

The requirements for the Undergraduate Minor in Education and Social Justice include completion of six courses among the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Quarter Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCU 207</td>
<td>SOCIAL AND HISTORICAL ISSUES IN EDUCATION</td>
<td>4</td>
</tr>
<tr>
<td>LSE 358</td>
<td>EDUCATION AND SOCIAL JUSTICE</td>
<td>4</td>
</tr>
<tr>
<td>LSE 353</td>
<td>THE POLITICS OF EDUCATION</td>
<td>4</td>
</tr>
<tr>
<td>LSE 380</td>
<td>PHILOSOPHICAL STUDIES IN PEDAGOGY, CULTURE AND GLOBALIZATION</td>
<td>4</td>
</tr>
<tr>
<td>SCU 337</td>
<td>HUMAN GROWTH AND DEVELOPMENT</td>
<td>4</td>
</tr>
<tr>
<td>LSE 355</td>
<td>INTERNATIONAL STUDIES IN EDUCATION</td>
<td>4</td>
</tr>
</tbody>
</table>

Note: College of Education students may apply up to three courses from their major toward the completion of this minor.

### Education, Culture, and Society (MA or MEd)

The Education, Culture, and Society Program is committed to inquiry that examines the relationship of schooling, education, and educational policy to social justice and cultural democracy. The program is an interdisciplinary one, designed to appeal to students seeking alternatives to more specialized or technical programs of study in education. This program is designed to attract educators, leaders, and individuals with bachelor’s degrees who have broad interests in education but who may not be professional educators. This program anticipates that students pursuing this degree will come from a variety of educational and professional backgrounds involving different forms of educational work such as media, private foundations, museums, community organizations, labor unions, higher education, K-12 schools, and others. Students are attracted to this program for personal and professional enhancement, research for private foundations, adult education and training, or to prepare for doctoral work, careers in higher education, and other related areas.

The program provides students the opportunity to study education, not only as schooling, but also more broadly as a dynamic cultural and political force that unfolds in a wide range of shifting and overlapping sites of learning. Students will consider education as a dynamic process that shapes social identities and social life as well as the learning of values and beliefs, all of which are central to how people make cognitive and emotional investments and act in the world. As such, education is a significant force in creating, maintaining, and challenging assumptions of neutrality and hierarchies of race, ethnicity, gender, class, and sexual difference. From this perspective, education is an indispensable tool for creating conditions for social justice and democratic life. In this context,
students investigate the pedagogical and cultural conditions necessary for supporting the flourishing of human agency and the redefinition of human engagement in social life.

Faculty teaching in the ECS program bring expertise from a variety of disciplines and fields within educational policy studies: the sociology of education, the philosophy of education, the history of education, the psychology of education and human development, critical pedagogy, cultural studies, feminist studies, urban studies, critical race studies, research methods and more. The faculty also has a diverse range of interests in areas such as globalization, peace and human rights education, social theory and social construction of knowledge; the role of education in the production of inequalities of race, gender, class, sexuality, and language; socially situated theories of learning and teaching; and the role of education in the construction of culture and social identities.

Given the interdisciplinary approach to the study of education of this degree program, students have the opportunity with the approval of their faculty advisor to take at least 20 hours of elective courses outside of the Education, Culture, and Society Program as well as the College of Education. Choices of electives include, but are not limited to, courses in departments and programs such as Communication, Philosophy, Women's Studies, American Studies, International Studies, Public Policy, and Sociology.

Licensure Option

Students seeking the master's degree in Education, Culture, and Society have the option to also pursue an Illinois teaching license or endorsement. Please consult your academic advisor as an additional program application may be required.

Critical Ethnic Studies Certificate Option

The MA and MEd in Education, Culture, and Society may also be expanded to include the Critical Ethnic Studies certificate, which is part of the Critical Ethnic Studies Program. Students participating in a combined MA or MEd in ECS/certificate in Critical Ethnic Studies should consult with their academic advisor to determine what coursework might count toward both programs. A separate application process for the certificate, administered by the Critical Ethnic Studies Program, is required. Students who are interested in the certificate should contact the Critical Ethnic Studies Program for additional information.

Learning Outcomes

Students will be able to:

- Apply theories within the humanities, social sciences, and psychological sciences within the disciplinary foundations of education to their understanding of educational phenomenon.
- Integrate methodologies into designing and conducting research in the disciplinary foundations of education.
- Analyze human development as a socio-cultural process that takes place over the lifespan and over historical time.
- Communicate, verbally and in writing, their understanding of the inter-relationship between identities and social relations of race, ethnicity, class, gender, sexual orientation, etc. and use this information to examine issues of power, resistance, and social change.
- Apply the understanding of identity and social relations to examine issues of power, resistance, and personal and institutional transformation.

College Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Demonstrates a positive attitude and commitment to the profession
- Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
- Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates concern for and protection of safety and well-being of others

Degree Conferral and Graduation

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).
After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

**Dispositions**

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Values and is committed to a critical orientation toward understanding key theories and concepts in the foundations of education
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Understands the importance of and is committed to clear oral and written communication, both in traditional and in new and emerging digital formats
- Demonstrates a willingness to engage course texts and requirements
- Demonstrates sensitivity to and respect for diverse identities, cultures, and lived experiences
- Demonstrates and advocates social justice principles in the classroom with students and colleagues and in clinical settings
- Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy in relationships with student colleagues and faculty

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

The student prepares a thesis, which is a report of the results of an original investigation. The student must first obtain approval of the subject and general plan from their Thesis Advisor, and have a research proposal approved by his/her thesis committee. The Thesis Advisor must be an EPSR faculty member (but not necessarily the originally assigned Faculty Advisor). The College of Education Thesis Handbook outlines the policies and procedures needed to successfully satisfy the thesis requirement. The College of Education Thesis Handbook can be obtained from the College of Education website.

Course Registration

Registration for ECS master's degree core courses is different from regular registration. The ECS students are granted access to registration for ECS core courses. If a student has special circumstances and cannot register for all cores offered in a term, this must be discussed with and approved by that student's ECS faculty advisor prior to the start of the term. Course registration for electives is the same as for all College of Education students.

Education, Culture, and Society (MEd) Online

The Education, Culture, and Society Program is committed to inquiry that examines the relationship of schooling, education, and educational policy to social justice and cultural democracy. The program is an interdisciplinary one, designed to appeal to students seeking alternatives to more specialized or technical programs of study in education. This program is designed to attract educators, leaders, and individuals with bachelor's degrees who have broad interests in education but who may not be professional educators. This program anticipates that students pursuing this degree will come from a variety of educational and professional backgrounds involving different forms of educational work such as media, private foundations, museums, community organizations, labor unions, higher education, K-12 schools, and others. Students are attracted to this program for personal and professional enhancement, research for private foundations, adult education and training, or to prepare for doctoral work, careers in higher education, and other related areas.

The program provides students the opportunity to study education, not only as schooling, but also more broadly as a dynamic cultural and political force that unfolds in a wide range of shifting and overlapping sites of learning. Students will consider education as a dynamic process that shapes social identities and social life as well as the learning of values and beliefs, all of which are central to how people make cognitive and emotional investments and act in the world. As such, education is a significant force in creating, maintaining, and challenging assumptions of neutrality and hierarchies of race, ethnicity, gender, class, and sexual difference. From this perspective, education is an indispensable tool for creating conditions for social justice and democratic life. In this context, students investigate the pedagogical and cultural conditions necessary for supporting the flourishing of human agency and the redefinition of human engagement in social life.

Faculty teaching in the ECS program bring expertise from a variety of disciplines and fields within educational policy studies: the sociology of education, the philosophy of education, the history of education, the psychology of education and human development, critical pedagogy, cultural studies, feminist studies, urban studies, critical race studies, research methods and more. The faculty also has a diverse range of interests in areas such as globalization, peace and human rights education, social theory and social construction of knowledge; the role of education in the production of inequalities of race, gender, class, sexuality, and language; socially situated theories of learning and teaching; and the role of education in the construction of culture and social identities.

Given the interdisciplinary approach to the study of education of this degree program, students have the opportunity with the approval of their faculty advisor to take at least 20 hours of elective courses outside of the Education, Culture, and Society Program as well as the College of Education. Choices of electives include, but are not limited to, courses in departments and programs such as Communication, Philosophy, Women's Studies, American Studies, International Studies, Public Policy, and Sociology.

Licensure Option

Students seeking the master's degree in Education, Culture, and Society have the option to also pursue an Illinois teaching license or endorsement. Please consult your academic advisor as an additional program application may be required.

Learning Outcomes

Students will be able to:

- Apply theories within the humanities, social sciences, and psychological sciences within the disciplinary foundations of education to their understanding of educational phenomenon.
- Integrate methodologies into designing and conducting research in the disciplinary foundations of education.
- Analyze human development as a socio-cultural process that takes place over the lifespan and over historical time.
- Communicate, verbally and in writing, their understanding of the inter-relationship between identities and social relations of race, ethnicity, class, gender, sexual orientation, etc. and use this information to examine issues of power, resistance, and social change.
- Apply the understanding of identity and social relations to examine issues of power, resistance, and personal and institutional transformation.

College Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain
circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Demonstrates a positive attitude and commitment to the profession
- Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
- Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates concern for and protection of safety and well-being of others

Degree Conferral and Graduation
The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

</table>

Educational Leadership (EdD)
The Educational Leadership Doctoral Program consists of three concentrations: General Concentration, Higher Education, and Global Catholic Educational Leadership. In addition, the program offers licensure and endorsement opportunities: Superintendent Endorsement, Teacher Leader Endorsement, and Principal Licensure.

Concentrations

Educational Leadership General

The Educational Leadership General Concentration provides a rich knowledge base to analyze administrative practices and promote socially just leadership of schools and organizations with an educational purpose, with focuses on PK-12 education or related fields. This program is uniquely designed to link theory with practice and is not based on traditional assumptions about the relationships of theory with practice or on conventional notions about the status of practitioners and theorists.

The program’s schedule allows students to attend full-time or part-time. Graduates of the program may wish to enter into a new career or strengthen their knowledge-base for their current position. Career options may include faculty positions in higher education, leadership positions in local and state education agencies, or leaders in educational policy and advocacy in related organizations and institutions.

Global Catholic Educational Leadership

The Global Catholic Educational Leadership Concentration in the Educational Leadership Doctoral Program addresses issues specific to Catholic education targeting a global audience of Catholic leaders. This fully online program serves both the local Church and the growing numbers of international Catholic leaders with limited access to a local university and/or a desire to collaborate with Catholic educators internationally. In terms of both service to Catholic schools and the development of a global perspective, an Ed.D. in Global Catholic Leadership speaks to DePaul’s wider vision. Catholic educational leaders in elementary schools, high schools, family education centers, diocesan offices, religious community councils, and Australian educational partners serve as the target market for the Ed.D. Working professionals and international students drawn to the Vincentian mission may be able to take some of the courses face-to-face, but the expense of travel encourages the development of a vital on-line community sharing global perspectives.

The online delivery combined with the current research and dissertation components align with the vision and mission of the university in expanding perspectives to a larger audience. Students who receive an Ed.D. in the Global Catholic Leadership concentration will be prepared for leadership in Catholic educational institutions at all levels, grounded in the philosophy and theology of Catholic education and the research needed to be an agent of transformation in a Catholic educational.

Licensures and Endorsements

Superintendent Endorsement

The Doctoral program’s Educational Leadership concentration is an Illinois State Board of Education (ISBE) approved program for the Superintendent endorsement. The Superintendent endorsement requires an additional four quarter hours for the internship course. ISBE states the following guidelines:

- a master’s degree with a GPA of 3.0 or better on a 4.0 scale
- proof of two years of teaching experience on a valid Illinois teaching license
- proof of two years of full-time administrative experience on a valid administrative license with the general administrative endorsement
- proof of passing the Basic Skills/TAP and Superintendent content-area tests.

Upon completion of the Superintendent program and the endorsement’s additional requirements, students must apply for the endorsement. Students are to work with the College of Education’s Licensure Officer when applying for the endorsement.

Teacher Leader Endorsement

To be eligible for the Teacher Leader endorsement program, students must possess:

- proof of passing the Basic Skills/TAP
- a master’s degree with a GPA of 3.0 or better on a 4.0 scale
- proof of two years of teaching experience on a valid Illinois teaching license
- proof of two years of full-time administrative experience on a valid administrative license with the general administrative endorsement
- proof of passing the Basic Skills/TAP and Superintendent content-area tests.

The program’s schedule allows students to attend full-time or part-time. Graduates of the program may wish to enter into a new career or strengthen their knowledge-base for their current position. Career options may include faculty positions in higher education, leadership positions in local and state education agencies, or leaders in educational policy and advocacy in related organizations and institutions.
• a bachelor's degree and master's degree from an accredited college or university,
• a valid teaching license
• at least two years of teaching experience
• proof of passing the Basic Skills or Test of Academic Proficiency.

Principal Licensure
The principal licensure program at DePaul University is an approved Illinois State Board of Education (ISBE) program. It is a rigorous program preparing principals and assistant principals for work service in public and private schools in the state of Illinois.

To be eligible for the Principal Licensure program, students must possess:

• a master's degree from an accredited college or university with a GPA of 2.75 or higher at the undergraduate level and a 3.25 or higher at the graduate level.
• a valid Illinois teaching license
• at least two years of full-time successful teaching experience
• proof of passing the Basic Skills or Test of Academic Proficiency.

Concentrations
The Educational Leadership EdD program has several concentrations:

• Educational Leadership, General Concentration (degree only)
• Educational Leadership, Catholic Educational Leadership Concentration (degree only)
• Educational Leadership, Higher Education Concentration (degree only)
• Educational Leadership plus Superintendent Endorsement
• Educational Leadership plus Teacher Leader Endorsement
• Educational Leadership plus Principal Licensure

Learning Outcomes
Students will be able to:

• Describe major movements in curriculum history and apply them to current educational practices and controversies.
• Analyze the theoretical foundations of curriculum and curriculum studies.
• Conduct independent inquiry supported by appropriate research literature, methods, and theoretical frameworks.
• Honor diverse perspectives, improve curriculum, and promote student learning and well-being.
• Critically analyze relationships between schools, society, and curriculum, drawing especially on structural, ideological, and human development perspectives
• Produce an independent dissertation that includes extensive review of relevant literature, clear rationale for study design and methods supported by relevant literature, and collection and analysis of appropriate data in order to make a novel contribution to a problem of professional knowledge.

College Requirements

Dispositions
The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

• is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
• Reflects on his or her own progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
• Demonstrates a positive attitude and commitment to the profession
• Demonstrates thoughtful, effective verbal and non-verbal communication and listening skills
• Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
• Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
• Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
• Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
• Demonstrates concern for and protection of safety and well-being of others

Degree Conferral and Graduation
The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Graduate students must be approved for student teaching and complete student teaching, seminar, and induction courses to be cleared for the degree. Student must submit graduation application for the quarter you are completing the final course (student teaching is considered a course).

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select FOR STUDENTS, then GRADUATION, then APPLY FOR DEGREE CONFERRAL. On screen instructions will take you through the application process.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website.

**EdD Degree Requirements**

Specific degree requirements are determined according to the concentration chosen by the student. Doctorate of Education (EdD.) concentrations are available in General Concentration, Higher Education, and Global Catholic Educational.

Please review the concentration requirements pages for more information.

**Academic Standards**

Students must maintain an overall GPA of 3.0 prior to the completion of 36 credit hours and 3.3 after the completion of 36 credit hours. Students are allowed no more than two grades of "C." Upon receiving a third grade of "C," students must retake the class in which the grade was received. Grades of "D" and "F" require that the course be retaken.

- Global Catholic Educational Leadership Concentration, Educational Leadership (EdD) (p. 417)

Higher Education Concentration, Educational Leadership (EdD)

Degree Requirements

Students must maintain an overall GPA of 3.0 prior to the completion of 36 credit hours and 3.3 after the completion of 36 credit hours. Students are allowed no more than two grades of "C." Upon receiving a third grade of "C," students must retake the class in which the grade was received. Grades of "D" and "F" require that the course be retaken.

### Principal Preparation Option, Educational Leadership (EdD)

This Illinois State Board of Education approved program, is designed for licensed teachers who already hold a master’s degree in education and are seeking principal licensure. The program offers a powerful, discipline-based curriculum with a problem-solving orientation that prepares effective and principled decision-makers. Graduates from the program are prepared to assume school and district administrative and supervisory roles.

### Additional Program Requirements
