Except as provided for in the Formal Title IX Sexual Harassment Policy and Procedures (https://offices.depaul.edu/secretary/policies-procedures/policies/Documents/Formal%20Title%20IX%20Sexual%20Harassment.pdf), if the University determines that a University Board hearing is appropriate, the University will take reasonable measures to ensure that the first session of the University Board hearing takes place within seven business days of the conclusion of the initial meetings. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.

A mutually convenient time for the University Board hearing will be decided upon. If requested by a party or otherwise necessary, and at the discretion of the moderator, a University Board hearing may take place entirely over the telephone and/or video conferencing, or with one or more parties participating by telephone and/or video conferencing. The University Board hearing will proceed over as many sessions as necessary.

The moderator will set a date by which all materials for the hearing will be sent to the University Board. Materials turned into the moderator after that date will be sent to the University Board if feasible.

The actual University Board hearing will proceed as follows:

1. The University Board panel will select a chairperson. The chairperson is charged with maintaining an orderly discussion throughout the University Board hearing and ensuring that there is equal opportunity for both the complainant and the referred student to present their information.

2. The Chairperson will confirm that all students understand their rights.

3. The Chairperson will describe the information before the University Board panel and will make sure that all students have copies of materials as needed.

4. If an investigator was utilized prior to the University Board hearing, the investigator will provide an overview of the investigation and answer questions from the panel, complainant, and referred student. The investigator will be present for the entirety of the hearing should additional questions arise.

5. Both the complainant and the referred student will have the opportunity to provide witnesses. In cases where a University representative is serving as the complainant, the University representative will present any witness information that has been made available. The University Board panel may also request additional witnesses. Witnesses will provide their information one at a time. A witness may only be present when that witness is providing information. The University may approve the use of written statements from witnesses who are not available to be present in person.

6. The University Board panel may present questions to witnesses who are present at the University Board hearing. If the complainant or the referred student have any questions for witnesses, they may offer those questions to the chairperson of the University Board panel to ask the witness. The University Board panel may decline to ask any question provided. The University Board panel may ask that a witness return later in the University Board hearing for additional questions.

7. Members of the University Board may ask questions to the complainant and the referred student at any time during the University Board hearing. If the complainant or the referred student have any questions for each other, they may offer those questions to the chairperson of the University Board panel to ask the witness. The University Board panel may decline to ask any question provided.

8. After the University Board panel has reviewed all the relevant information provided in the University Board hearing, the chairperson will ask the complainant and the referred student whether there is any additional information that needs to be considered but that has not already been provided.

9. The complainant and the referred student will have an opportunity to give a final statement about the alleged violation. In cases where a University representative is serving as the complainant, the University representative will simply summarize the information already provided. The final statement may be read aloud or submitted in writing. In the interest of time, the University Board panel may place a time limit on the final statements.

10. The moderator will excuse everyone from the University Board hearing except for the University Board panel and the moderator.

11. The University Board panel will determine that the student is or is not in violation of the policy at issue. A majority vote by the University Board panel will be used to make this determination. The decision will be reviewed with the moderator before being finalized.

12. If the University Board panel finds the student in violation, the University Board panel will determine the appropriate sanctions. Prior to making any determinations about sanctions, the moderator will inform the University Board panel of any previous student conduct matters involving the referred student. A majority vote by the University Board panel will be used to make this determination. The decision will be reviewed with the moderator before being finalized.

13. Typically, the moderator will invite the referred student back into the University Board hearing and the chairperson will announce the decisions of the University Board panel. Typically, the decision will be announced to the complainant by the moderator as appropriate.

14. The University will take reasonable measures to notify the complainant and referred student of the outcome and sanctions in writing within five business days of the last session of a University Board hearing. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.

15. The moderator will inform the complainant and the referred student of their appeal options.

Student organizations have the same rights as students, modified as necessary to address the group or organizational context.
Information About Conduct Sanctions

This section explains the details of conduct sanctions. For a complete overview of the Student Conduct Process go to Overview of the Student Conduct Process (p. 1615).

The Student Conduct Process is an educational one by which the University strives to instill in its students an understanding that they are responsible for their actions. There are several reasons for imposing conduct sanctions:

1. To educate students and redirect behavior toward a standard more acceptable for members of the University community.
2. To protect the University community from possible harm or injury.
3. To require restitution for property that is lost, stolen, or damaged.

In general, conduct sanctions become effective immediately when given. In certain circumstances, the University may delay the effective date of sanctions. Students will be informed of any decision to delay the effective date of sanctions.

Conduct sanctions are determined based on a consideration of the totality of the circumstances. This could include, for example, a student’s prior record of conduct; the severity of the incident; and the impact on the community. Students may be given a single sanction or multiple sanctions.

As detailed in Emergency Contacts (p. 1608), a student’s emergency contacts or other individuals may be made aware of sanctions in certain situations involving violations of University policies or laws related to alcohol and controlled substances.

The following is a list of sanctions that the University may impose on a student or student organization through the Student Conduct Process:

1. Restriction: Restrictions upon a student's University privileges may be imposed for a set period of time. These restrictions may include, but are not limited to, removal from student housing; the denial of the right to represent the University in any way; and restricted access to facilities or individuals, parking privileges, and/or participation in certain curricular, co-curricular, or extra-curricular activities.
2. Restitution: A student who damages property may be required to pay actual repair or replacement costs. Failure to pay may result in withholding of the student’s records and/or additional sanctions.
3. Educational Project: An educational project is a sanction designed to assist the student in better understanding the overall impact of the policy violation. Educational projects might include research papers, the creation of educational materials, or the planning and/or presentation of educational programs related to the policy infraction. Assigned projects may not include physical labor unless they are directly related to the violations(s) and do not cause humiliation or degradation to the student.
4. Alcohol and Other Drug Intervention: A student who is found responsible for violation a policy related to alcohol or controlled substances may be required to meet with the Office of Health Promotion and Wellness and/or participate in an intervention called BASICS (Brief Alcohol Screening and Intervention for College Students).
5. University Reprimand: University reprimand signifies that any further policy violation may result in additional sanctions. It does not restrict the student in any way.
6. University Probation: University probation is a written statement to the student indicating that the student’s behavior is of such a nature as to jeopardize continued enrollment at the University. University probation can be for a specified period of time or for as long as the student is enrolled. Any additional policy violation during the probationary period may result in additional sanctions.
7. Suspension: Suspension is a total separation from the University for a required period of time and/or until particular conditions for readmission are met. Suspension may include various prohibitions regarding a student’s ability to be on University property or participate in University activities. A sanction of suspension is permanently noted on a student’s transcript, regardless of whether or not the student is successfully readmitted at the conclusion of a suspension. At the end of the suspension period and/or once the student can demonstrate that the conditions for readmission have been met, the student may be required to meet with the Dean of Students or other designee before being readmitted to the University.
8. Dismissal: Dismissal is a permanent separation from the University. Dismissal is a permanent bar to readmission to the University. A sanction of dismissal is permanently noted on a student’s transcript. Dismissal may include various prohibitions regarding a student’s ability to be on University property or participate in University activities.
9. Revocation of Admission: Revocation of admission signifies that a student who has previously been admitted to the University, but has not yet matriculated, is no longer admitted for enrollment in the planned term and program. Revocation of admission may be a permanent separation from the University and permanent bar to readmission to the University, or it may be limited to a particular time frame or program. The student may be required to meet with the Dean of Students or other designee before being readmitted to the University.
10. Revocation of Degree: Revocation of degree signifies that the University is withdrawing a degree that has been awarded. Revocation of degree is a permanent separation from the University. A sanction of revocation of degree is permanently noted on a student’s transcript.

Student organizations are subject to the same sanctions as students, modified as necessary to address the group or organizational context, plus any such other sanctions or outcomes that are deemed appropriate under the circumstances. Other sanctions may be imposed on students or student organizations for policy violations related to processes managed by other University areas.

Conduct Appeal Procedures

This section explains the details of appeals in the Student Conduct Process. For a complete overview of the Student Conduct Process go to Overview of the Student Conduct Process (p. 1615).
Determinations as to (i.) whether or not a policy has been violated and (ii.) sanctions may be appealed through these procedures. Both complainants and referred students may appeal determinations as to policy violations and sanctions. The reason for the appeal process is to guarantee that the situation has been resolved through a fundamentally fair process in accordance with established policies and procedures.

Students will be informed of the appeal procedures, including to whom an appeal should be directed, at the conclusion of an administrative hearing, University Board hearing, or otherwise when a determination of a policy violation is made and/or sanctions are determined.

Typically, appeals from a University Board hearing will be submitted to the Dean of Students, while appeals from an administrative hearing will be submitted to the supervisor of the administrative hearing officer. The individual reviewing an appeal will have had no involvement in the initial determination. Either party will have the opportunity to request the substitution of the individual reviewing an appeal because of a possible conflict of interest or bias.

Except as provided for in the Formal Title IX Sexual Harassment Policy and Procedures (https://offices.depaul.edu/secretary/policies-procedures/policies/Documents/Formal%20Title%20IX%20Sexual%20Harassment.pdf), a complainant or referred student may only appeal the determination as to a policy violation or sanction on the following three grounds:

1. A substantial procedural error occurred that unreasonably impaired a fair process or rendering of a determination or sanction, and that made the process or the final decision fundamentally unfair.
2. New information of a substantive nature that was impossible to have been considered at the time of the hearing or determination has been discovered, and it would be fundamentally unfair to not consider the information.
3. The initial sanction(s) are fundamentally unfair, disproportionate, or inappropriate.

In order to appeal, the complainant and/or referred student must submit a written request for appeal to the designated individual within five business days of being notified of the initial decision.

The individual designated to review the appeal may decide that the sanctions imposed should not go into effect until the appeal process is completed. Complainants and referred students should understand, however, that, unless otherwise stipulated, sanctions are considered in effect once a hearing is completed, regardless of whether an appeal is requested.

The individual designated to review the appeal will make a determination that:

1. The appeal is denied because none of the grounds for an appeal above have been met.
2. The appeal is granted because one or more of the grounds for an appeal have been met.

The designated reviewer will take reasonable measures to notify the complainant and/or referred students of the appeal determination within five business days of when the University receives the appeal. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.

If an appeal is granted, then the individual designated to review the appeal will determine whether the matter can be resolved without a new hearing (for example, modification of sanctions so that they are not fundamentally unfair or inappropriate) or whether a new hearing is necessary. If a new hearing is necessary, except as provided for in the Formal Title IX Sexual Harassment Policy and Procedures (https://offices.depaul.edu/secretary/policies-procedures/policies/Documents/Formal%20Title%20IX%20Sexual%20Harassment.pdf), the University will determine whether this hearing will be an administrative hearing or a University Board hearing. All hearings that take place after an appeal has been granted will proceed in accordance with established procedures.

All decisions regarding whether an appeal will be granted are final. If the appeal is denied, then all sanctions imposed will remain in effect.

*For student conduct cases involving the Sexual & Relationship Violence Prevention and Response (https://offices.depaul.edu/secretary/policies-procedures/policies/Documents/Sexual%20and%20Relationship%20Violence%20Prevention%20and%20Response.pdf) policy or the Formal Title IX Sexual Harassment Policy and Procedures (https://offices.depaul.edu/secretary/policies-procedures/policies/Documents/Formal%20Title%20IX%20Sexual%20Harassment.pdf), please refer to the specific information in those policies on the different procedures that may apply.

Student Conduct Records

Student conduct records are maintained in accordance with the University’s Records Retention Schedule. Specifically, student conduct records from a Student Conduct Process that did not result in a sanction of dismissal or suspension are retained for ten years after a student’s graduation or last date of attendance.

In accordance with the University Records Retention Schedule, transcripts are retained permanently. As such, student conduct records from a Student Conduct Process that resulted in a sanction of dismissal or suspension are retained permanently.

The University may also report disciplinary matters that remain unresolved and pending at the time a student left or withdrew from the University. Records of pending matters are kept indefinitely; once resolved, they are kept and maintained according to the policy stated above.

The University will release student conduct records and the information in those records only as permitted or required under FERPA, the Clery Act, or any other legal mandate.

Additional Procedures Regarding Sexual and Relationship Violence

In order to be eligible to conduct an administrative hearing, participate on a University Board panel, or hear an appeal, involving a violation of the Sexual and Relationship Violence Prevention and Response policy or the
Formal Title IX Sexual Harassment Policy and Procedures, an individual must receive at least 8 hours of annual training on topics related to the issues detailed in those policies. A sufficient number of individuals will receive this annual training such that substitutions of personnel and University Board panel members for conflict of interest, bias, and other matters can occur as needed.

University-Initiated Temporary Medical Withdrawal Process

Note: The process and criteria described in this section apply in situations in which DePaul University initiates a discussion with a student regarding the student's temporary withdrawal from DePaul for medical reasons. Students looking to voluntarily take a leave of absence or withdraw from DePaul for medical or other reasons should consult the Withdrawal policy.

DePaul University places the utmost priority on student welfare and community safety. DePaul provides a continuum of support services to address the needs of students within the context of the University community. Sometimes students may have health needs that require a level of care exceeding that which DePaul can effectively provide. Being able to safely participate in the programs, services, or activities of the University is an essential requirement for a student's continued participation. As such, in some situations, it may be appropriate to consider options for a student's temporary withdrawal from DePaul or for altering a student's ability to fully participate in certain programs, services, or activities at DePaul.

This University-initiated temporary medical withdrawal process is not a disciplinary process. Rather, under this process, DePaul will work with a student regarding a University-initiated temporary medical withdrawal. If a withdrawal is appropriate, the University will also work with the student on a plan for return and plan for success upon return.

As further detailed below, all determinations as to withdrawals and plans for return and success will be based upon an individualized assessment of the student’s situation, including an evaluation of current medical information and/or best available objective information about the student. DePaul will consider this information in assessing circumstances such as the nature, duration, and severity of the risk to the student and/or University community, the probability that the behavior of concern will occur, and whether reasonable accommodations would mitigate the risk.

This process is intended as an interactive dialogue between the student and DePaul concerning the student's continued participation in the programs, services, or activities of DePaul. At all times during the process, DePaul will work with the student to determine whether other options or reasonable accommodations would be appropriate instead of, or in addition to, a University-initiated temporary medical withdrawal process or alterations to a student's ability to fully participate in certain programs, services, or activities at DePaul. More information about the interactive process for establishing reasonable accommodations is available from DePaul's Center for Students with Disabilities.

When a student demonstrates conduct that violates DePaul’s Code of Student Responsibility or other DePaul policies, that conduct will be addressed through the appropriate disciplinary processes. There may be situations in which both the University-initiated temporary medical withdrawal process and the Code of Student Responsibility and/or other DePaul policies are applicable (see below for further details).

Students may choose to have an advisor join them for any meeting or conversation that is a part of this process. An advisor is a member of the DePaul University community who acts as a support person for the student. The role of the advisor is to quietly confer with and support the student throughout the process.

Criteria

DePaul may initiate this process if a student:

1. Demonstrates behavior that is unreasonably disruptive to the normal education processes and orderly operation of the university;
2. Demonstrates behavior that poses a serious and imminent health or safety risk to the themselves, or
3. Demonstrates behavior that poses a serious and imminent health or safety risk to others.

Initial Determination and Notification to the Student

The university-initiated temporary medical withdrawal process begins when the Dean of Students Office receives information indicating that a student appears to have demonstrated behavior consistent with one or more of the criteria listed above. In many instances, this information will come from the Student Care Team, which will have conducted an individualized threat assessment in accordance with its established procedures and determined that the student has demonstrated behavior consistent with one or more of the criteria listed above.

If, after reviewing the information received, the Dean of Students Office initially determines that the information indicates that the student has demonstrated behavior consistent with one or more of the criteria listed above, the Dean of Students Office will inform the student of the following in writing:

1. That the Dean of Student Office has made an initial determination based on available information that the student has demonstrated behavior consistent with one or more of the criteria listed above (with the specific criterion or criteria identified).
2. That the university is initiating a process pursuant to this university-initiated temporary medical withdrawal process (with a copy of or link to the process).
3. That the student is required to have a meeting with the Dean of Students Office to discuss potential next steps, including the possibility of a university-initiated temporary medical withdrawal or alterations in a student's ability to fully participate in certain programs, services, or activities at DePaul. The Dean of Students Office will attempt to schedule this meeting within one (1) business day of the student receiving this initial notification.
4. That the student may bring an Advisor to this meeting, or any other meeting or conversation that is part of this process, as further detailed above.
5. Any interim restrictions, as further explained below.

Interim Restrictions

The Dean of Students may place interim restrictions on the student's participation in university programs, services, or activities (including attending classes, extra-curricular activities, and residential arrangements). Any interim restrictions will be determined on an individualized basis and will be consistent with the goals of reducing the
impact of any behavior that indicate the criteria listed above and ensuring the safety of the student and the university community where this is of immediate concern. All interim restrictions will be communicated in writing to a student. In general, interim restrictions will remain in place until a final determination is made concerning a possible withdrawal (including any appeal).

Initial Meeting and Additional Information Gathering

In this initial meeting, the Dean of Students Office will explain the university-initiated temporary medical withdrawal process to the student. The Dean of Students Office will review with the student the information that appears to indicate that the student has demonstrated behavior consistent with one or more of the criteria listed above.

The Dean of Students Office will give the student an opportunity to respond to the information orally at the meeting. The student will also be given an opportunity to respond to any interim restrictions that have been put in place. If the student would like to submit additional information in response to the information provided, the student may choose to do so. This information could include, for example, a written response, a request from the student that the Dean of Students Office speak with a qualified care provider, or other documentation.

If the student wishes to submit additional information, the Dean of Students Office will work with the student to develop a reasonable timeline for submitting this information, balancing the need for a prompt decision with the student’s need to provide information.

Determination and Plan for Return

The Dean of Students will make a determination as to whether a university-initiated temporary medical withdrawal or any alterations to a student’s ability to fully participate in certain programs, services, or activities at DePaul is appropriate based on the criteria listed above. In making this determination, the Dean of Students will consider all information available, including any information provided by or on behalf of the student, including information provided by a student’s qualified care provider, and information learned from consultation with others with particular subject-matter expertise as needed (for example, a counselor from University Counseling Services or a physician from DePaul Health Services). All determinations as to withdrawal or alterations to a student’s ability to fully participate in certain programs, services, or activities will be as narrowly tailored as possible under the circumstances given the nature, duration and severity of any risk to the student and/or university community.

The student will generally be informed of this determination, including the basis for the determination, in writing within two (2) business days of the initial meeting, or within two (2) business days of the university receiving all information. However, the university reserves the right to extend this time limit, in its sole discretion, in order to ensure proper review of all relevant material. The university will provide the student with written notice of any extension.

At the time that the university provides the student with the determination, the university will also provide the student with a written individualized plan for return to full participation in programs, services, or activities at DePaul. The purpose of the plan for return is to clearly establish the path by which the student can return to safe and successful full participation in programs, services, or activities at DePaul following a university-initiated temporary medical withdrawal or other alterations to a student’s ability to fully participate in certain programs, services, or activities at DePaul. Plans for return to full participation in activities will be as narrowly tailored as possible under the circumstances given the nature, duration and severity of any risk to the student and/or university community.

Specific elements of the plan for return could include, for example:

1. Successful demonstration that the behaviors that led to the university-initiated temporary medical withdrawal have been mitigated to the extent that the student is no longer demonstrating behavior consistent with the criteria listed above; or
2. Development of a treatment plan and/or verification from a qualified care provider that an individual is consistently and satisfactorily complying with a treatment plan.

If possible, the Dean of Students Office will meet with the student in person in order to provide the determination and discuss the plan for return.

If the Dean of Students Office determines that a university-initiated temporary medical withdrawal or any alterations to a student’s ability to fully participate in certain programs, services, or activities at DePaul will begin, the student will also be informed in writing about options for appeal (as detailed below).

Students are responsible for contacting appropriate offices at DePaul or elsewhere in order to ensure that their academic and financial affairs are in order (including any on-campus housing). All determinations as to the effect of a university-initiated temporary medical withdrawal or other alterations to the ability to fully participate in programs, services, or activities at DePaul will be made by the applicable offices in accordance with existing policies. If requested by the student, the Dean of Students Office can assist a student with facilitating conversations with appropriate offices as needed. This could include, for example, the possibility of a late withdrawal through the Late Withdrawal Process (https://offices.depaul.edu/student-affairs/support-services/academic/Pages/late-withdrawal-process.aspx).

Appeal

A student may appeal the determination of the Dean of Students Office that a university-initiated temporary medical withdrawal or other alterations to the ability to fully participate in programs, services, or activities at DePaul will begin, including aspects of the plan for return. A student has five (5) business days from the date on which the student was informed of the determination and plan to request this appeal.

A student may appeal on the following three grounds:

1. A substantial procedural error occurred that unreasonably impaired the student’s ability to achieve a fair process or final decision and that made the process or final decision fundamentally unfair;
2. New information of substantive nature, impossible to have been considered at the time of the original determination, has been discovered and it would be fundamentally unfair not to consider the information; or
3. Aspects of the determination and/or plan for return are fundamentally unfair or inappropriate.

The student must submit their appeal to the Vice President for Student Affairs. In the appeal, the student should explain why one or more of
these three grounds for appeal has been met. In reviewing the student’s appeal, the Vice President for Student Affairs will review the information received from or on behalf of the student, and all other available information, including all information considered by the Dean of Students Office. If deemed necessary, the Vice President for Student Affairs may also speak further with the student or others to ask additional questions or otherwise collect additional information.

After review, the Vice President for Student Affairs will make a determination that:

1. The appeal is denied because none of the grounds for an appeal have been met. The determination and plan for return will remain as-is.
2. The appeal of the withdrawal determination is denied because none of the grounds for an appeal have been met, but the appeal of the plan for return is granted because one or more of the grounds for appeal have been met. The determination will remain as-is, but the plan for return will be modified; or
3. The appeal of the withdrawal determination is granted because one or more of the grounds for an appeal have been met. The university is no longer initiating a temporary medical withdrawal or other alterations to the ability to fully participate in the program, services, or activities at DePaul at this time.

DePaul will notify the student of the appeal determination in writing within five (5) business days of when the appeal is received. However, the university reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material. The university will provide the student with written notice of any extension.

The decision of the Vice President for Student Affairs is final.

If a student is no longer temporarily medically withdrawn, alterations to the ability to fully participate in programs, services, or activities at DePaul are no longer in place as the result of an appeal, or modifications are made to the plan for return the Dean of Students Office will work with the student to address any outstanding concerns on an individualized basis.

## Student’s Return to the University and Plan for Success

A student is eligible to return to full participation in the programs, services, or activities at DePaul when the student’s individualized plan for return is successfully completed. If at any time a student believes that current circumstances have changed such that the individualized plan for return should be modified, the student should contact the Dean of Students Office to discuss that possibility. All modifications to a plan for return will be established in writing.

Students wishing to return to DePaul following a university-initiated temporary medical withdrawal must schedule a meeting with the Dean of Students Office to discuss the student’s successful completion of the plan for return. In general, this meeting must be in-person. However, exceptions may be made at the discretion of the Dean of Students Office.

In addition to participating in this meeting in order to demonstrate their successful completion of the plan, students may also be asked to speak with others with particular subject-matter expertise as needed (for example, a counselor from University Counseling Services or a physician from DePaul Health Services) or may be asked to submit additional information or documentation. As appropriate, this could include a requirement that the student complete a release of information such that the Dean of Students Office may speak with a student’s qualified care providers or others, or review current medical documentation. All requests for information will be made as narrowly as possible in order to fulfill the need to consider whether a student has successfully completed the plan.

Based on all of the information available, the Dean of Students Office will make a determination as to whether the student has successfully completed the plan.

In order to continue to support the student, the Dean of Students Office may also work with the student to develop an on-going, individualized plan for student success and to provide for the student’s safe and successful enrollment and participation in the university’s programs, services or activities. Specific elements of the plan for student success could include, for example:

1. An on-going monitoring plan;
2. Consistent compliance with a recommended treatment plan;
3. Periodic conversation with the Dean of Students Office or others to discuss continued success;
4. Specific on-going behavioral expectations aligned with DePaul’s established policies and procedures, and designed to prevent or mitigate the behaviors that led to the university-initiated temporary medical withdrawal to the extent that the student is no longer demonstrating behavior consistent with the criteria listed above; and
5. Options for utilizing available resources and implementing reasonable accommodations to facilitate success.

This determination and any on-going plan for student success will be communicated to the student in writing.

The student may request a meeting with the Dean of Students Office to respond to the plan for success. If at any time a student believes that current circumstances have changed such that the plan for success should be modified, the student should contact the Dean of Students Office to discuss that possibility. All modifications to a plan for success will be established in writing.

All determinations as to whether the student has successfully completed the plan for return, as to whether a plan for return should be modified, as to an on-going plan for student success, as to whether a plan for success should be modified, and as to successful fulfillment of the on-going plan for student success will be made by the Dean of Students Office. These determinations are final.

## Other Important Information Regarding This Process

Because conduct that gives rise to a university-initiated temporary medical withdrawal or alterations in a student’s ability to fully participate in certain programs, services, or activities at DePaul might also violate the Code of Student Responsibility, it is possible that a student who has successfully completed the plan for return might still not be eligible for return to full participation due to student conduct sanctions. Similarly, it is possible that a student who has satisfied all required student conduct sanctions might still not be eligible for return to full participation in programs, services, or activities at DePaul because of an inability to successfully complete the plan for return.

At any point during the university-initiated temporary medical withdrawal process, a student may decide to take a leave of absence or withdraw from DePaul for medical or other reasons pursuant to the Withdrawal
policy. However, once a university-initiated temporary medical withdrawal process has begun, DePaul may make the determination that it is appropriate to develop a plan for return. In that instance, the procedures detailed in this process would apply.

DePaul may make such reasonable exceptions to the university-initiated temporary medical withdrawal process as circumstances may require for the welfare of the university and/or the involved student(s), provided that fundamental elements of fairness and due process are observed.

**Student Care Team and Threat Assessment**

DePaul University's Student Care Team (SCT) is responsible for assessing and coordinating a response to a wide-range of concerns about students. The SCT also fulfills the role of the Campus Threat Assessment Team with respect to students (DePaul University Campus Violence Prevention Plan [https://offices.depaul.edu/public-safety/crime-reporting-prevention/Pages/campus-violence-prevention-plan.aspx]). The SCT is charged with proactively monitoring the University's campus environment from a threat perspective, as well as providing leadership and coordinating the University's response to critical incidents that affect individual students.

Members of the campus community are encouraged to report concerns about disturbing behavior exhibited by a DePaul student to the Dean of Students, Chair of the Student Care Team (SCT), as soon as possible. Whenever there is concern for immediate physical danger, individuals should call 911.

In general, the Dean of Students will review the information provided, involving the SCT as appropriate. Depending on the behavior, this review could include a threat assessment. Based on this review, the SCT will determine an appropriate, individualized, situation-specific response action plan. This could include case management, recommendations about behavioral intervention (either by the SCT or by another individual), and/or referrals to, or recommendations regarding, other University processes or supports. As circumstances warrant, these responses could happen simultaneously.

COURSE DESCRIPTIONS

A
• Accountancy (ACC) (p. 1640)
• Administration & Supervision (A&S) (p. 1647)
• African & Black Diaspora Studies (ABD) (p. 1653)
• Allied Health Technology (AHT) (p. 1659)
• American Sign Language (ASL) (p. 1663)
• American Studies (AMS) (p. 1665)
• Animation (ANI) (p. 1669)
• Anthropology (ANT) (p. 1681)
• Applied Brass (APB) (p. 1686)
• Applied Diplomacy (DPL) (p. 1686)
• Applied Keyboard (APK) (p. 1688)
• Applied Music (APM) (p. 1695)
• Applied Professional Studies (AP) (p. 1695)
• Applied Strings (APS) (p. 1697)
• Applied Technology (AT) (p. 1698)
• Applied Voice (APV) (p. 1699)
• Applied Woodwinds (APW) (p. 1699)
• Arabic (ARB) (p. 1699)
• Art and Architecture, History of (HAA) (p. 1702)
• Art and Craft of Theatre (ACT) (p. 1710)
• Art, Media, and Design (ART) (p. 1712)
• Arts and Ideas (AI) (p. 1721)
• Asian Studies, Global (AAS) (p. 1725)

B
• Bilingual-Bicultural Education (BBE) (p. 1732)
• Biological Sciences (BIO) (p. 1739)
• Business Administration (BADM) (p. 1749)
• Business Law (BLW) (p. 1753)
• Business Studies (BUS) (p. 1754)

C
• Catholic Studies (CTH) (p. 1755)
• Catholic Theological Union (CTU) (p. 1760)
• Chemistry (CHE) (p. 1761)
• Chinese (CHN) (p. 1769)
• Communication (CMN) (p. 1774)
• Communication Studies (CMNS) (p. 1776)
• Community Service Studies (CSS) (p. 1787)
• Comparative Literature (CPL) (p. 1788)
• Composition (COM) (p. 1789)
• Computer Graphics & Motion Technology (GPH) (p. 1791)
• Computer Science (CSC) (p. 1795)
• Core Curriculum Arts and Ideas (CCA) (p. 1808)
• Core Curriculum Human Community (CCH) (p. 1812)
• Core Curriculum Scientific World (CCS) (p. 1819)
• Counseling (CSL) (p. 1821)
• Criminology (CRIM) (p. 1826)
• Critical Ethnic Studies (CES) (p. 1829)
• Curriculum Studies (CS) (p. 1830)
• Cyber-Physical Systems Engineering (CSE) (p. 1836)
• Cybersecurity (CSEC) (p. 1838)

D
• Data Science (DSC) (p. 1842)
• Decision Analytics (DA) (p. 1844)
• Design (DES) (p. 1845)
• Digital Humanities (DHS) (p. 1853)
• Digital Media Arts (DMA) (p. 1853)

E
• E-Commerce Technology (ECT) (p. 1855)
• Early Childhood Education (ECE) (p. 1857)
• Economics (ECO) (p. 1864)
• Educating Adults (EA) (p. 1872)
• Education - General (EDU) (p. 1875)
• Elementary Education (EE) (p. 1876)
• English (ENG) (p. 1877)
• English Language Academy (ELA) (p. 1887)
• Environmental Science (ENV) (p. 1890)
• Experience Design (EXP) (p. 1897)

F
• Film & Television Documentary (DOC) (p. 1898)
• Film & Television Production (FILM) (p. 1901)
• Film & TV Creative Producing (CP) (p. 1910)
• Film & TV Post-Production (POST) (p. 1912)
• Film & TV Screenwriting (SCWR) (p. 1918)
• Finance (FIN) (p. 1927)
• Focus Area (FA) (p. 1934)
• French (FCH) (p. 1938)

G
• Game Development (GAM) (p. 1947)
• Geography (GEO) (p. 1954)
• German (GER) (p. 1961)
• Graduate School of Business (GSB) (p. 1968)
• Graphic Design (GD) (p. 1972)
• Greek (GRK) (p. 1977)

H
• Health Communication (HTHC) (p. 1979)
• Health Information Technology (HT) (p. 1980)
• Health Science (HLTH) (p. 1981)
• History (HST) (p. 1985)
• Honors (HON) (p. 2000)
• Hospitality Leadership (HSP) (p. 2002)
• Human Centered Design (HCD) (p. 2007)
• Human Community (HC) (p. 2007)
• Human-Computer Interaction (HCI) (p. 2012)

I
• IIT Chemical Engineering (ICE) (p. 2015)
• Illinois Institute of Technology (IIT) (p. 2016)
• Illustration (ILL) (p. 2023)
• Information Systems (IS) (p. 2024)
• Information Technology (IT) (p. 2031)
• Institute for Professional Development (IPD) (p. 2034)
• Integrative Learning (IN) (p. 2037)
• Interactive Media (IM) (p. 2038)
• Interdisciplinary Commerce Studies (ICS) (p. 2039)
• Interdisciplinary Studies (IDS) (p. 2039)
• Interdisciplinary Studies Program (ISP) (p. 2040)
• International Business (IB) (p. 2040)
• International Studies (INT) (p. 2041)
• Irish Studies (IRE) (p. 2050)
• Islamic World Studies (IWS) (p. 2051)
• Italian (ITA) (p. 2055)
• Japanese (JPN) (p. 2063)
• Jazz Studies (JZZ) (p. 2067)
• Journalism (JOUR) (p. 2071)

L
• Labor Education (LE) (p. 2080)
• Latin (LAT) (p. 2082)
• Latin American & Latino Studies (LST) (p. 2083)
• Law (LAW) (p. 2088)
• Lesbian, Gay, Bisexual, Transgender, Queer Studies (LGQ) (p. 2105)
• Liberal Learning Seminars (LLS) (p. 2107)
• Liberal Studies in Education (LSE) (p. 2109)
• Liberal Studies Program (LSP) (p. 2112)
• Lifelong Learning (LL) (p. 2113)

M
• Management (MGT) (p. 2114)
• Management Information Systems (MIS) (p. 2125)
• Marketing (MKT) (p. 2126)
• Master of Public Health (MPH) (p. 2134)
• Masters in Social Work (MSW) (p. 2137)

W
• Women’s and Gender Studies (WGS) (p. 2442)
• World Language Education (WLE) (p. 2451)
• Writing Rhetoric and Discourse (WRD) (p. 2452)

Accountancy (ACC)

ACC 101 | INTRODUCTION TO ACCOUNTING I | 4 quarter hours (Undergraduate)
Introduction to Accounting I provides an introduction to financial accounting as the means of recording, storing and summarizing economic events of the business enterprise to meet external reporting needs. Emphasis is placed on the preparation and analysis of financial statements and other financial reports to the public based on the accounting equation, accrual accounting concepts, and data gathering techniques. Topics include corporate accounting for current and long-term assets and current liabilities, and the corporate income statement. MAT 130 is a prerequisite for this class.

ACC 102 | INTRODUCTION TO ACCOUNTING II | 4 quarter hours (Undergraduate)
Introduction to Accounting II, a companion and sequel course to Accounting 101, continues to explore basic accounting fundamentals and concepts. The course provides an introduction to managerial accounting and internal reporting. Topics include financial accounting for long-term liabilities, the components of stockholders equity, the statement of cash flows, financial statement analysis, budgeting and variance analysis, job costing for the service sector and cost analysis for decision-making. A grade of C- or better in ACC 101 is a prerequisite for this class.

ACC 250 | CAREER MANAGEMENT FOR ACCOUNTANTS | 2 quarter hours (Undergraduate)
This course is designed to explore and manage the professional expectations and career potential of an accountancy major. Students will participate in hands-on resume building activities, practice interviews and apply research and evaluation skills to execute job search and career management strategies. Students will learn about Career Center resources and internship opportunities as ways to prepare for successful job searches and to maximize their potential for long-term professional growth. (2 quarter hours)
A grade of C- or better in ACC 101 is a prerequisite for this class.

ACC 300 | ADVANCED ANALYTICS FOR ACCOUNTANTS | 4 quarter hours (Undergraduate)
The course will familiarize students with basic concepts and steps used in accounting data analytics. With an emphasis on hands-on problem-solving capabilities, this course will develop students’ analytics mindset and critical thinking skills in the context of accounting.
BUS 102 and MAT 137 are prerequisites for this course.

ACC 303 | COST & MANAGERIAL ACCOUNTING | 4 quarter hours (Undergraduate)
Managerial Accounting provides a thorough grounding in manufacturing accounting, cost allocation techniques, and the evaluation of management control systems. Students will examine manufacturing cost systems including job order costing, process costing, and activity-based costing. Tools for management control systems will be covered to enable the student to evaluate and compare various systems.
A grade of C- or better in ACC 102 is a prerequisite for this class.

ACC 304 | FINANCIAL REPORTING I | 4 quarter hours (Undergraduate)
Financial Reporting I includes a study of U.S. and international accounting standards, the concepts of accounting and basic financial statements. Accounting for cash, receivables, inventories, depreciable assets and current liabilities will also be examined.
A grade of C- or better in ACC 102 is a prerequisite for this class.

ACC 305 | FINANCIAL REPORTING II | 4 quarter hours (Undergraduate)
Financial Reporting II focuses on researching accounting issues, revenue recognition and financial statement analysis. The course also provides an understanding of complex issues such as accounting for investments, long-term liabilities, derivatives, contributed capital, retained earnings and earnings per share.
A grade of C- or better in ACC 304 or ACC 307 is a prerequisite for this class.

ACC 306 | FINANCIAL REPORTING III | 4 quarter hours (Undergraduate)
The third course in the financial accounting sequence, this course studies deferred taxes, pensions and other post-retirement benefits, leases, accounting changes and error analysis, statement of cashflows (advanced), and full disclosure, if time permits. Selected spreadsheet applications will be introduced through homework assignments.
A grade of C- or better in ACC 305 or ACC 309 is a prerequisite for this class.
ACC 307 | FINANCIAL REPORTING I FOR FINANCE HONORS STUDENTS | 4 quarter hours (Undergraduate)
Financial Reporting I includes a study of U.S. and international accounting standards, the concepts of accounting and basic financial statements. Accounting for cash, receivables, inventories, depreciable assets and investments will also be examined. This course takes a user of financial statements, rather than a preparer of financial statements, point of view.
ACC 101, ACC 102 and status as a Finance Honors student are a prerequisite for this class.

ACC 308 | ADVANCED FINANCIAL ACCOUNTING | 4 quarter hours (Undergraduate)
Advanced Financial Accounting focuses on accounting for multi-corporate entities and acquisitions, accounting for state and local governments, accounting for non-profit organizations, foreign operations, partnership accounting, and segment reporting. Selected spreadsheet applications will be introduced through homework assignments.
A grade of C- or better in ACC 305 or ACC 309 is a prerequisite for this class.

ACC 309 | FINANCIAL REPORTING II FOR FINANCE HONORS STUDENTS | 4 quarter hours (Undergraduate)
Financial Reporting II focuses on researching accounting issues, revenue recognition and financial statement analysis. The course also provides an understanding of complex issues such as accounting for investments, long term liabilities, derivatives, contributed capital, retained earnings and earnings per share.
ACC 307 or ACC 304 and status as a Finance Honors student are a prerequisite for this class.

ACC 350 | INFORMATION FOR DECISION MAKING | 4 quarter hours (Undergraduate)
Information for Decision-Making is typically the final course in the curriculum in Accountancy. It is the course in the program that must emphasize research using the FASB Accounting Standards Codification and documenting research results. There is also a focus on written and oral communication as well as teamwork. More specifically, the course addresses the standard setting process in financial accounting as well as the role that the Securities and Exchange Commission fills in that process. In addition, current financial accounting topics are covered including revenue recognition, fair value measurement and disclosures, and earnings quality. The course also provides an introduction to International Financial Reporting Standards.
(A grade of C- or better in ACC 305 or ACC 309) and a grade of C- or better in ACC 380 are prerequisites for this class.

ACC 370 | PROFESSIONAL RESPONSIBILITIES & BUSINESS LAW | 4 quarter hours (Undergraduate)
This course covers the aspects of the legal environment of special concern to accounting practitioners, including: the ethical standards of accounting practice, legal liability of accountants, contract law, property law, tort law, commercial paper, the laws of agency, sales laws, banking, agency, partnerships, corporations, trusts and wills, suretyships, secured transactions, bankruptcy, employment law, securities regulation, antitrust, and public regulation and disclosure laws.
A grade of C- or better in ACC 102 is a prerequisite for this class.

ACC 372 | AUDITING I | 4 quarter hours (Undergraduate)
Auditing I provides a conceptual introduction to the nature and value of financial statement audits. The course emphasizes the professional skepticism required of auditors in a changing ethical and legal environment including the Professional Ethics Rules and U.S. Securities laws. The course focuses on Generally Accepted Auditing Standards (GAAS) that address engagement planning and execution including systems of internal control, audit procedures, evidence, and reporting.
A grade of C- or better in ACC 305 or ACC 309 is a prerequisite for this class.

ACC 374 | AUDITING II | 4 quarter hours (Undergraduate)
Auditing II is a sequel to Auditing I (ACC 372). Auditing II builds upon the understanding and application of the Generally Accepted Auditing Standards (GAAS) Standards of Fieldwork to both analyze and evaluate audit procedures chosen and evidence obtained regarding classes of transactions and account balances. The course highlights common tools and techniques for planning and conducting audits including the use of sampling and data analysis when performing tests of controls and substantive tests.
A grade of C- or better in ACC 372 is a prerequisite for this class.

ACC 375 | FRAUD EXAMINATION AND FORENSIC AUDITING | 4 quarter hours (Undergraduate)
Fraud Examination and Forensic Accounting covers various aspects of fraud prevention and detection including the elements and costs of fraud, controls to prevent fraud, and methods of fraud detection. Guest speakers with expertise in fraud examination and forensic auditing play a significant role in this course including the presentation and use of an interactive, real-world fraud case.
A grade of C- or better in ACC 304 or ACC 307 is a prerequisite for this class.

ACC 376 | INTERNAL AUDITING | 4 quarter hours (Undergraduate)
Internal Auditing introduces a risk-based, process, and controls-focused internal audit approach. Topics include International Standards for the Professional Practice of Internal Auditing, internal control, corporate governance, risk assessment, evidence, audit documentation, and fraud risks. The course highlights the use of systems-based audit techniques and sampling. Professional ethics and emerging issues in the profession are discussed.
A grade of C- or better in ACC 102 is a prerequisite for this class.

ACC 380 | TAX TREATMENT OF INDIVIDUALS AND PROPERTY | 4 quarter hours (Undergraduate)
Tax Treatment of Individuals and Property covers the basic provisions of the Internal Revenue Code as they relate to the taxation of individuals. It focuses on concepts of gross income, exclusions, deductions, exemptions, and credits, as well as property transactions. It also includes tax research.
A grade of C- or better in ACC 304 or ACC 307 is a prerequisite for this class.
This course is designed to provide future accounting and business professionals with knowledge and practice about accounting information systems and their role in accounting functions and financial decision making. It will enable the student to interface with accounting systems, and to participate in their design and audit. It will focus on the nature and flows of accounting information in organizations, security and internal controls and the use of information technology in accounting information systems and decision-making. The student will be able to evaluate internal control in information systems and design controls to mitigate risks associated with information systems.

ACC 500 or ACC 502 is a prerequisite for this course.

ACC 541 | FINANCIAL ACCOUNTING THEORY & PRACTICE I | 4 quarter hours
(Graduate)
Intermediate theory and preparation of financial statements; review of accounting concepts and development of accounting models; methods and problems in valuation and reporting; with emphasis on current assets and liabilities, property, plant and equipment, and intangibles, review of relevant authoritative literature.

ACC 500 or ACC 502 or equivalent is a prerequisite for this class.

ACC 542 | COST AND MANAGERIAL ACCOUNTING | 4 quarter hours
(Graduate)
Introduction to cost and managerial concepts and techniques. Topics include cost accumulation (job, process, standard costing, and activity-based costing), cost behavior, breakeven analysis, budgeting, contribution approach to income measurement, joint and by-product costing, cost allocation methods, and their relevance for decision-making.

ACC 500 or ACC 502 or equivalent is a prerequisite for this class.

ACC 543 | FINANCIAL ACCOUNTING THEORY & PRACTICE II | 4 quarter hours
(Graduate)
Continuation of intermediate theory and financial statement preparation with emphasis on the components of stockholder’s equity; special problems such as earnings per share, accounting changes, income taxes, derivatives, and statement of cash flows; review of relevant authoritative literature and interpretation of financial statements.

ACC 541 is a prerequisite for this class.

ACC 545 | ADVANCED TOPICS IN ACCOUNTING THEORY | 4 quarter hours
(Graduate)
This course is designed to provide comprehensive coverage of the following: consolidations, partnership accounting, foreign operations and not-for-profit accounting. Coverage of the topics emphasizes both theory and practice. Mastery of the material is obtained through problem-solving situations.

ACC 543 is a prerequisite for this class.

ACC 547 | AUDITING I | 4 quarter hours
(Graduate)
Auditing I provides a conceptual introduction to the nature and value of financial statement audits. The course emphasizes the professional skepticism required of auditors in a changing ethical and legal environment including the Professional Ethics Rules and U.S. Securities laws. The course focuses on Generally Accepted Auditing Standards (GAAS) that address engagement planning and execution including systems of internal control, audit procedures, evidence, and reporting.

ACC 500 or ACC 502 or equivalent, is a prerequisite for this course.
ACC 500 | TAX TREATMENT OF INDIVIDUALS AND PROPERTY TRANSACTIONS | 4 quarter hours
(Graduate)
This course provides detailed coverage of the federal income tax treatment of individual taxpayers. It includes coverage of inclusions, exclusions, deductions, credits, rates of taxation, special tax computations and the tax aspects of property transactions. It also includes tax research.
ACC 541 is a prerequisite for this class.

ACC 550 | AUDITING II | 4 quarter hours
(Graduate)
Auditing II is a sequel to Auditing I (ACC 547). Auditing II builds upon the understanding and application of the Generally Accepted Auditing Standards (GAAS) Standards of Fieldwork to both analyze and evaluate audit procedures chosen and evidence obtained regarding classes of transactions and account balances. The course highlights common tools and techniques for planning and conducting audits including the use of sampling and data analysis when performing tests of controls and substantive tests.
ACC 547 is a prerequisite for this class.

ACC 551 | TAX TREATMENT OF CORPORATIONS AND PARTNERSHIPS | 4 quarter hours
(Graduate)
This course covers the federal income tax treatment of corporations and partnerships. It includes ethics in tax practice and an exposure to estate and gift taxation.
ACC 548 is a prerequisite for this class.

ACC 552 | BUSINESS LAW FOR ACCOUNTANTS | 4 quarter hours
(Graduate)
This course covers the aspects of the legal environment of special concern to accounting practitioners, including: the ethical standards of accounting practice, legal liability of accountants, contract law, property law, tort law, commercial paper, the laws of agency, sales laws, banking, agency, partnerships, corporations, trusts and wills, suretyships, secured transactions, bankruptcy, employment law, securities regulation, antitrust, and public regulation and disclosure laws. Formerly "Legal and Ethical Environment of Accounting Practice".
Not Available to MST Students

ACC 554 | MANAGEMENT ACCOUNTING AND CONTROL | 2 quarter hours
(Graduate)
This course provides students with a conceptual understanding of basic cost management and managerial accounting knowledge and skills. Topics include cost behavior, cost-volume-profit analysis, cost accounting systems, budgeting and control, responsibility accounting, the basics of strategic performance measurement systems and analyzing performance. Emphasis is on the interpretation & use of accounting information rather than its creation & accumulation. (2 quarter hours)
ACC 500 is a prerequisite for this class. This course is not available for Macc, MSACC or MST students.

ACC 555 | MANAGEMENT ACCOUNTING FOR DECISION-MAKING | 4 quarter hours
(Graduate)
This course addresses the financial, nonfinancial & ethical dimensions of decision-making. It provides students with a conceptual understanding of cost management and managerial accounting skills. Topics include cost behavior, cost-volume-profit analysis, cost systems, budgeting and control and decision-making. Emphasis is on the interpretation & use of accounting information rather than its creation & accumulation.
ACC 500 is a prerequisite for this class. This course is not available for Macc, MSACC or MST students.

ACC 557 | GLOBAL STRATEGIC FINANCIAL ANALYSIS | 4 quarter hours
(Graduate)
This course concentrates on each student's own career goals by focusing on cases of well-known financial successes and failures in the global business world. It enables students to become intelligent users (readers) of financial reporting in a global environment. Students will learn to identify key relationships in the statements to strategy of high performance companies and to make critical judgments underlying the elements and valuations in the financial statements. Students will study integrated reporting, corporate governance, and sustainability accounting. The course is a useful elective for MSA, MACC and MBA programs.
ACC 500 or ACC 502 or equivalent, is a prerequisite for this course.

ACC 558 | TAX RESEARCH | 4 quarter hours
(Graduate)
This course examines sources of tax law used during a tax research project by making use of the Internal Revenue Code, Treasury Regulations, Treasury Rulings and Administrative Pronouncements, Judicial Decisions, and other sources. Students examine the weight of authority of each source of tax law and the structure of databases used by tax professionals to build a conclusion to the tax issue being researched.
ACC 548 is a prerequisite for this class.

ACC 560 | CORPORATE REORGANIZATIONS | 4 quarter hours
(Graduate)
Federal income tax implications of transfers of stock, securities and property in connection with corporate acquisitions, combinations and separations. This course is mainly concerned with the tax consequences to corporate parties, to reorganizations and to their shareholders. Emphasis is given to determining the taxability of transactions and asserting the availability of tax attributes to successors in interest. NOTE: This is a M.S.T. course.
ACC 558 is a prerequisite for this class.

ACC 559 | TAXATION OF CORPORATIONS AND SHAREHOLDERS | 4 quarter hours
(Graduate)
Study of federal income taxation of corporations and shareholders with emphasis on transactions between the corporation and its shareholders. Topics include corporate formations, nonliquidating distributions to shareholders, stock redemptions, and corporate liquidations. NOTE: This is a M.S.T. course.

ACC 561 | CORPORATE RECOMMENDATIONS | 4 quarter hours
(Graduate)
This course examines sources of tax law used during a tax research project by making use of the Internal Revenue Code, Treasury Regulations, Treasury Rulings and Administrative Pronouncements, Judicial Decisions, and other sources. Students examine the weight of authority of each source of tax law and the structure of databases used by tax professionals to build a conclusion to the tax issue being researched.
ACC 558 is a prerequisite for this class.

ACC 562 | CONSOLIDATED RETURNS | 4 quarter hours
(Graduate)
This course deals with the principles and mechanics of tax consolidations including eligibility, intercompany transactions, inventory adjustments, basis of subsidiary stock, limitations on net operating losses, earnings and profits, unified loss rule and circular basis. NOTE: This is a M.S.T. course.

ACC 563 | PARTNERSHIPS | 4 quarter hours
(Graduate)
An in-depth analysis of the federal income tax rules governing partners and partnerships. This course will take the student through the life cycle of a partnership that includes the formation of a partnership, allocation of operations, and liquidation. Some of the topics covered include the study of the aggregate and entity theories, application and importance of IRC 704(b) & 704(c), as well as the allocation of liabilities to partners. NOTE: This is a M.S.T. course.
ACC 551 and ACC 558 are prerequisites for this class.
ACC 564 | TRANSACTIONS IN PROPERTY | 4 quarter hours  
(Graduate)  
This course is concerned mainly with the federal income tax implications of gains and losses derived from sales and other dispositions of property. Emphasis will be given to the determination and recognition of gain or loss, character of gain or loss (capital or ordinary), basis and holding period. NOTE: This is a M.S.T. course.
ACC 551 is a prerequisite for this class.

ACC 555 | TAX ACCOUNTING, PERIODS, AND METHODS | 4 quarter hours  
(Graduate)  
This course deals with federal income tax planning as to determination of the proper periods for reporting income and deductions, overall methods of tax accounting and special elections available to taxpayers. Topics include the installment method, accounting method changes, accrual method, cash method, FIFO, LIFO and accounting periods. NOTE: This is a M.S.T. course.
ACC 551 is a prerequisite for this class.

ACC 556 | FEDERAL INCOME TAX PROCEDURES | 4 quarter hours  
(Graduate)  
A study of the procedures which must be followed when dealing with the Internal Revenue Service and possible alternative courses of action. Included are such topics as the organization of the Internal Revenue Service, filing requirements, refund claims, closing agreements, examination procedures, protests, assessment, payment and collection of tax, statute of limitations, interest and penalties. NOTE: This is a M.S.T. course.
ACC 551 is a prerequisite for this class.

ACC 557 | INTERNATIONAL ASPECTS OF U.S. TAXATION | 4 quarter hours  
(Graduate)  
Provides conceptual and practical framework of the US federal taxation of international activities for both US and non US businesses. For foreign persons, includes treatment of passive, active and land-owning activities including withholding taxes and disclosures. For US persons, includes treatment of sourcing and expense allocation, foreign income, the anti-deferral rules, and the foreign tax credit mechanism. Includes the impact of intergovernmental double tax treaties including dispute resolution mechanisms, filings and the state tax treatment of foreign income. ACC 551 and ACC 558 are prerequisites for this class.

ACC 558 | TAXATION OF CLOSELY HELD CORPORATIONS | 4 quarter hours  
(Graduate)  
This course deals with federal income tax planning in connection with the accumulated earnings tax, personal holding companies, S corporations, multiple corporations, transactions between related parties and small business corporation stock. NOTE: This is a M.S.T. course.
ACC 558 and ACC 560 are prerequisites for this class.

ACC 559 | CONCEPTS OF DEFERRED COMPENSATION | 4 quarter hours  
(Graduate)  
The nature, purpose and operation of the various forms of deferred compensation are examined and evaluated: employee pension; profit sharing and stock bonus plans, stock options; executive compensation plans; retirement plans for self-employed individuals; other plans. NOTE: This is a M.S.T. course.
ACC 551 and ACC 558 are prerequisites for this class.

ACC 570 | STATE AND LOCAL INCOME AND FRANCHISE TAXATION | 4 quarter hours  
(Graduate)  
This course identifies and examines the types of income and capital stock taxes imposed on corporations and pass-through entities by state governments. Topics include nexus and the impact of P.L. 86-272, conformity to the Internal Revenue Code, modifications to federal taxable income, business and nonbusiness income, methods of reporting, and allocation and apportionment and current developments. NOTE: This is a M.S.T. course.
ACC 551 is a prerequisite for this class.

ACC 571 | ESTATE AND GIFT TAXATION | 4 quarter hours  
(Graduate)  
This course consists of a detailed review of the federal estate tax, gift tax and generation-skipping tax laws. In the area of estate taxation, assets included in the gross estate, deductions allowed, and credits permitted are analyzed under the relevant statutes, regulations and cases. The taxation of gifts, the application of gift tax deductions, and the application of gift tax exclusions are covered. The taxation of generation-skipping transfers and the GST exemption allocations rules are analyzed. Valuation issues are discussed at length. Illinois estate tax issues are reviewed in detail. Basic consistency rules are discussed. The basic rules under EGERRA are briefly mentioned. NOTE: This is a M.S.T. course.
ACC 551 is a prerequisite for this class.

ACC 572 | CONCEPTS OF STATE PROPERTY AND TRANSACTION TAXATION | 4 quarter hours  
(Graduate)  
This course focuses on concepts of property and sales taxation, but will survey other state and local transaction taxes, including excise taxes, utility taxes, fuel taxes and escheat statutes. Property tax concepts include the fundamentals of the property tax process, distinctions between real and personal property valuation theory and approaches and practical means by which taxpayers can challenge their assessments and ensure fair taxation. NOTE: This is a M.S.T. course.
ACC 548 is a prerequisite for this class.

ACC 573 | INCOME TAXATION OF ESTATES, TRUSTS AND DECEDECENTS | 4 quarter hours  
(Graduate)  
This course deals with federal income taxation of estates, trusts and decedents with special emphasis on such concepts as income in respect of a decedent and estate and trust distributions. Also, included are such topics as the income and deductions included in the decedent's final return, death of a partnership member, the income and deductions of estate and trusts, the throwback rule, grantor trusts and the tax ramifications of the use of other special trusts. NOTE: This is a M.S.T. course.
ACC 551 is a prerequisite for this class.

ACC 574 | ESTATE PLANNING | 4 quarter hours  
(Graduate)  
This course will deal primarily with how to avoid and minimize federal estate taxes and estate administration expenses upon the subsequent demise of the client. Therefore, the student must have taken the estate and gift taxation, the use of outright gifts, the use of trusts. Generation skipping transfers and charitable gifts will also be considered. NOTE: This is a M.S.T. course.
ACC 551 is a prerequisite for this class.
ACC 576 | FEDERAL TAX VALUATION | 4 quarter hours (Graduate)
Fair market value is referenced hundreds of times in the Internal Revenue Code, and many more times in the Regulations. In the initial part of this course, the procedures and methods applicable to tax valuation are reviewed to heighten practitioner awareness of the range of potential valuation methods, the appropriateness of their application, and the rationale behind the conclusions drawn. Tax cases are used extensively to achieve this objective. In the second part of the course presentations and discussions address more specific topics such as built-in gains, valuation aspects of charitable giving, conservation easements, ESOPs, family limited partnerships, reasonable compensation, S-corporations, special use properties, bankruptcy and transfer pricing. Note: This is a M.S.T. course.

ACC 551 is a prerequisite for this class.

ACC 580 | ACCOUNTING FOR INCOME TAXES | 4 quarter hours (Graduate)
Covers the financial accounting and reporting standards for the effects of income taxes that result from corporate activities. Topics include computation of current and deferred tax expense or benefit, temporary differences, carry-forwards, computation of deferred tax assets and liabilities, valuation allowances, business combinations, investments in subsidiaries and equity method investments, presentation and disclosure, and implementation of accounting for uncertainty in income taxes under FIN 48.

ACC 551 is a prerequisite for this class.

ACC 581 | TAXATION OF REAL ESTATE | 4 quarter hours (Graduate)
An in-depth study of federal income taxation as it relates to real estate, including current issues and planning possibilities. Topics include consequences of acquisition and disposition, real estate development, leasing, mortgages and other financing devices and forms of ownership of real estate. NOTE: This is a M.S.T. course.

ACC 551 is a prerequisite for this class.

ACC 582 | ADVANCED CONCEPTS IN INTERNATIONAL TAXATION | 4 quarter hours (Graduate)
Designed as a companion to ACC 567, this course delves deeper into selected topics of the US federal treatment of international activities: treatment of cross border transactions; transfers of property from the US; the taxation of foreign currency gains and losses; BEAT; FATCA and the branch profits tax regimes. Seminars cover mergers and acquisitions, Value Added Taxes and the OECD’s BEPS project.

ACC 551 is a prerequisite for this class.

ACC 583 | FUNDAMENTALS OF TRANSFER PRICING IN BUSINESS | 4 quarter hours (Graduate)
Transfer pricing has become a critical business and tax issue for multinational corporations (MNCs). This course will examine how transfer pricing plays an important role in MNCs decisions on supply chain management, tax planning, intellectual property ownership and management incentives. Rather than focusing from just a strict accounting or tax perspective, this course will view transfer pricing from a business managers perspective using basic undergraduate concepts from accounting and economics. Through a combination of readings and case studies, students will learn the basics of US and foreign tax rules governing transfer pricing, common issues faces by MNCs in the areas listed above and an overview of more advanced transfer pricing topics.

ACC 560 is a prerequisite for this class.

ACC 590 | WRITING FOR TAX PROFESSIONALS | 2 quarter hours (Graduate)
Writing for Tax Professionals focuses on developing skills to transform the results of tax research into a tax research memorandum and a client letter. This course provides a series of exercises that build skills in analyzing primary sources, applying rules and court holdings to fact patterns, and communicating this tax analysis into written documents. Throughout the course, you will write and receive feedback on your writing. The final assignment will incorporate the earlier writing exercises into a tax research memorandum and an accompanying client letter.

ACC 558 is a prerequisite for this class.

ACC 591 | TAX EXEMPT ORGANIZATIONS | 4 quarter hours (Graduate)
Tax treatment of public charities and private foundations. The way exempt status is secured and retained, qualified exemptions, unrelated business income, the loss of exemption, prohibited transactions, deductibility of contributions and required reporting and auditing.

ACC 551 is a prerequisite for this class.

ACC 592 | FEDERAL INCOME TAX OF INDIVIDUALS | 4 quarter hours (Graduate)
This course provides a comprehensive in depth study of the Federal income tax system as it applies to individual taxpayers. This course will focus on the components of gross income, adjustments to arrive at adjusted gross income, deductions and exemptions, tax rates and filing status, and tax credits that apply to individual taxpayers. This course will review the specific provisions of interest to employees, entrepreneurs, investors, and retirees.

ACC 548 is a prerequisite for this class.

ACC 593 | OVERVIEW OF TRANSFER PLANNING FOR WEALTH MANAGEMENT | 4 quarter hours (Graduate)
This course introduces students to an overview of the transfer tax system from a financial planning perspective. The course will be divided into four areas of concentration: (1) transfer tax, (2) property law, (3) estate planning, and (4) insurance, charitable and retirement topics. The objective of the course is to analyze how each of the above areas of concentration impact the financial planning process.

Not Available to MST Students

ACC 594 | FAMILY OFFICE AND MULTIGENERATIONAL PLANNING | 4 quarter hours (Graduate)
This course will involve a survey of the planning and structuring issues that high net worth families face when managing wealth for multiple generations. The course will be facilitated by one or two instructors who will direct eight different expert guest lecturers in the wealth management field. The topics include: introduction and review of federal wealth transfer tax concepts; generation-skipping transfer tax and structuring dynastic entities; charitable gifts and foundations utilized in large families; management and dispositions of family business and closely held entities; asset protection planning; domestic and international; international estate planning: offshore trusts and entities; creating and administering a family office; family governance, wealth education and private trust companies.

ACC 551 and ACC 592 are prerequisites for this class.
ACC 615 is a prerequisite for this course.

This course introduces students to the field of data mining and data analytics, which has been defined as the extensive use of data, statistical and quantitative analysis, and exploratory and predictive models to drive decisions and actions. With an emphasis on hands-on problem solving capabilities, this course further develops students’ analytics mindset and data-driven decision skills.

ACC 615 is a prerequisite for this course.

ACC 598 | SEMINAR ON CURRENT PROBLEMS IN TAXATION | 4 quarter hours
(Graduate)
Covers recent significant developments in the future of legislation, regulations, administrative rulings and case law on federal income, estate and gift taxation. Emphasis is placed on specific tax planning in light of these current developments. Topics are discussed against background of leading Supreme Court cases. Recommended as final tax course in M.S.T. program.

ACC 560, ACC 565 and ACC 566 and completion of 32 units of credit are prerequisites for this class.

ACC 615 | APPLIED STATISTICS FOR ACCOUNTANTS | 4 quarter hours
(Graduate)
This course is a statistical overview of concepts taught in elementary and intermediate statistics classes but with more emphasis on understanding and interpretation of outcomes and findings. Report writing, article critiquing as well as team projects will be utilized. This course will cover general selected general statistics including basic sample descriptives, categorical data analysis including odds and risk ratios, estimation and hypothesis testing and basic regression and ANOVA technique. Logistic regression will also be covered. The course will emphasize data analytics and data projects.

ACC 635 | PRINCIPLES OF FORENSIC ACCOUNTING | 4 quarter hours
(Graduate)
This course will focus on fraud principles that relate to asset misappropriations, corruption and fraudulent financial statements. Emphasis will be on examination, review, and analysis of a variety of fraud schemes, including discussion of investigative strategies and controls used to detect and prevent the impact fraud has on an organization.

ACC 636 | INTERNAL AUDITING, CORPORATE GOVERNANCE AND INTERNAL CONTROL | 4 quarter hours
(Graduate)
This course addresses the overall role that internal audit plays as a critical part of an organization’s control and governance structure. The course includes a case that incorporates the complete internal audit process for a hypothetical company, including identification of risk, planning, execution of fieldwork and reporting. This course also covers the strategic role and operations of an internal audit function from three key perspectives; the Chief Audit Executive, the chair of the audit committee, and the CEO or CFO. The relative roles and relationships with the organization’s external auditor and the organization’s risk and control functions are also addressed.

ACC 500 is a prerequisite for this class.

ACC 637 | DATA MINING AND ANALYTICS | 4 quarter hours
(Graduate)
This course introduces students to the field of data mining and data analytics, which has been defined as the extensive use of data, statistical and quantitative analysis, and exploratory and predictive models to drive decisions and actions. With an emphasis on hands-on problem solving capabilities, this course further develops students’ analytics mindset and data-driven decision skills.

ACC 615 is a prerequisite for this course.

ACC 638 | ADVANCED IT AUDITING | 4 quarter hours
(Graduate)
This course prepares students to understand and assess the sources IT risks and conduct IT audits by examining the key principles behind the auditing of IT processes. The course has a focus on gaining hands-on experience in analyzing and assessing IT risks and controls. The effective management of Information Technology (IT) assets in order to meet business objectives and of IT-related business risks is of critical importance to organizations today. The application of the COBIT framework and other professional IT audit standards is emphasized.

ACC 500 or ACC 502 is a prerequisite for this course.

ACC 639 | AUDIT ANALYTICS | 4 quarter hours
(Graduate)
The course will familiarize students with basic audit analytics knowledge, skills and tools, and expose students to real world audit analytics related issues and potential solutions. With an emphasis on hands-on problem solving capabilities, this course attempts to develop students’ analytics mindset in the context of auditing by using CaseWare IDEA.

ACC 640 | ACCOUNTING THEORY AND POLICY FORMULATION | 4 quarter hours
(Graduate)
A study of the process by which accounting policies are formulated. The students are asked to make critical evaluations of basic issues such as income determination and current issues such as FASB agenda items in light of their theoretical, empirical, practical and political aspects. Students are expected to demonstrate an ability to use the accounting research literature. Students should plan to take this capstone course at the end of their degree program. This course is intended to be taken toward the end of the MSA program.

ACC 543 is a prerequisite for this class.

ACC 645 | FORENSIC AND INVESTIGATIVE ACCOUNTING | 4 quarter hours
(Graduate)
This course focuses the human element of accounting-based fraud. The course covers interpersonal skills such as the psychology of those who commit crimes, reading people and places, handwriting analysis, and discourse analysis. It also includes technical skills such as net worth analysis, expert witnessing, and the writing of expert reports. The course is delivered using hands-on experience in a case-based setting.

ACC 646 | FORENSIC FINANCIAL STATEMENT ANALYSIS AND VALUATION | 4 quarter hours
(Graduate)
This course focuses on financial statement fraud. Skills taught in this course include using financial statement analysis to detect fraud in financial statements, and valuation skills that can be used to value both public and private firms in cases of shareholder and partnership disputes, divorce cases etc. Students are given a chance to use these skills to detect and investigate fraud within a company’s financial statements.

ACC 690 | GRADUATE INTERNSHIP | 4 quarter hours
(Graduate)
Technical knowledge acquired in the classroom is applied in an actual business environment through varied assignments under supervision in industry, government or public accounting. Offered variably.

ACC 798 | SPECIAL TOPICS | 4 quarter hours
(Graduate)
Content and format of this course are variable. An in-depth study of current issues in accountancy. Subject matter will be indicated in class schedule. Offered variably.
ACC 799 | INDEPENDENT STUDY | 4 quarter hours
(Graduate)
Available for graduate students of demonstrated capability for intensive independent work in accountancy.

Administration & Supervision (A&S)

A&S 491 | EFFECTIVE LEADERSHIP OF SCHOOLS | 4 quarter hours
(Graduate)
This course introduces students to the research base of organizational theory, the politics of education, and foundations of building level instructional leadership. Multiple theories are examined in light of the students' experience in educational settings. This examination of theory in light of experience provides the students with a framework for analyzing both familiar educational institutions and the theories that support educational institutions. Through a study of administrative and organizational theory using those settings with which students are most familiar, students will become more reflective of the theoretical base that will inform their future practice as administrators.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 492 | THE PRINCIPALSHIP | 4 quarter hours
(Graduate)
This course provides students with the tools needed to enter into a Pre-K-12 school setting and function effectively. Topics included in this course include: scheduling; managing resources; technology; issues of working with students and teachers; maintaining a safe and effective learning environment.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 493 | DATA DRIVEN DECISION MAKING | 4 quarter hours
(Graduate)
This course provides future administrators with the tools they need to critically examine demographic, financial, personnel and testing data and to use the insights gained in making well informed administrative decisions.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 494 | SCHOOL FINANCE | 4 quarter hours
(Graduate)
Major consideration will be given to problems relating to the preparing of a school budget, procuring revenue, financial accounting, capital outlays, insurance on property, taking of inventory, and the social and political implications of how schools are financed.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 495 | SCHOOL LAW | 4 quarter hours
(Graduate)
Authority; powers and liability of school personnel; rights and status of students; character of districts and school board control of curriculum, school property, finances. Special emphasis on recent state and federal court decisions as they affect Illinois and neighboring states.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 496 | STAKEHOLDER RELATIONSHIPS | 4 quarter hours
(Graduate)
This course draws on the literature about constructive conflict resolution and partnership building to address the important, inevitable, and sometimes stormy relationships among various education stakeholders both inside and outside of the school building. Educational administrators cannot fire tenured teachers, angry parents, or zealous community organizers. Thus, they must learn the paradigms and tools to not only resolve the inevitable conflicts that arise with these stakeholders but also to be able to work with them as key strategic partners.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 498 | INSTRUCTIONAL SUPERVISION AND SUPPORT | 4 quarter hours
(Graduate)
Instructional Supervision is examined from the perspective of both student and teacher learning, dealing with issues such as motivation, responsibility and increased proficiency. This course deals with issues of teacher observation and evaluation; clinical supervision; and professional development programming.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 499 | PLANNING FOR PROFESSIONAL DEVELOPMENT | 4 quarter hours
(Graduate)
This course introduces students to the dynamics of adult learning and how to apply these learning theories to the development of meaningful professional development for teachers and adult staff that enhances student success. Goals: (1) Developing skills and developing a comprehensive plan for professional development, (2) Addressing the challenges of adult learners, (3) Developing mentoring and coaching skills, (4) Developing and understanding the importance of assessment and reflection.

A&S 570 | HISTORICAL, PHILOSOPHICAL AND THEOLOGICAL FOUNDATIONS OF CATHOLIC SCHOOL LEADERSHIP | 4 quarter hours
(Graduate)
A survey of the history of Catholic K-12 education in the United States and the foundational documents of Catholic Education. Students will examine the history and philosophical/theological foundation of Catholic Schools in the United States and will be asked to reflect on the nature and mission of Catholic education in the multicultural, multiethnic milieu of Twenty-first Century America.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.
A&S 571 | SPIRITUAL AND ADMINISTRATIVE LEADERSHIP IN CATHOLIC SCHOOLS | 4 quarter hours
(Graduate)
Students will be asked to conceptualize leadership from the Transformational and Servant Leadership perspectives. Using these principles, students will examine the spirituality of Catholic School leadership, and its implications for them in their role as ministers and coordinators of ministries in the school setting. Students will then examine the unique administrative and managerial factors that impact Catholic schools from a leadership framework that is imbued with the spirituality of Servant Leadership. 
Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 582 | LAW IN HIGHER EDUCATION | 4 quarter hours
(Graduate)
This course prepares students to examine the themes and tensions in the constitutional, statutory, administrative, and case law that related to higher education. Students will examine and compare the themes and tensions in federal, state, and municipal law as well. Students will explore the impact of the law on various higher educational stakeholders, including but not limited to, students, faculty, staff, alumna, and the community at large. Students will apply legal principles to higher education case studies to develop effective problem-solving skills to prevent and mitigate legal issues.
Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 588 | SERVICE LEARNING FOR HIGHER EDUCATION | 4 quarter hours
(Graduate)
This class is a hands-on, minds-on engagement in the practice and theory of service learning - the integration of community service and related academic study. Students will assist a service-learning program with planning, implementation or evaluation and integrate this experience with study of current practice, theory and research. Students who plan careers in higher education will find this useful in light of the increased commitment to providing service-learning opportunities on campuses. Many student services and other higher education positions include the need to offer leadership to these programs.

A&S 590 | ORGANIZATIONAL DEVELOPMENT | 4 quarter hours
(Graduate)
A development approach used in combining theory, research, and applications for improving interpersonal effectiveness and to develop problem-solving capacity of the organization. The course is about change, organizational goals. The internship provides supervised experiences in selected organizations on a full-time or part-time basis. The student intern is cooperatively assigned to an organization under the immediate supervision of organizational personnel. The experiences provided are designed to enrich the student’s theoretical background with practical opportunities of participating in (1) overall contact with personnel and with the major functions and problems of certain critical administrative and/or supervisory activities, and (2) a detailed study and analysis of a particular administrative and/or supervisory function or activity.
Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 591 | RESEARCH SEMINAR IN EDUCATIONAL LEADERSHIP | 4 quarter hours
(Graduate)
This course is designed to help graduate students in Educational Leadership through the process of planning, organizing, drafting, and revising their Master’s papers. Students will be expected to complete a literature review and to develop a strong proposal for an integrative paper as a prelude to selecting an advisor for their Master’s papers.
Status as a Graduate Education student is a prerequisite for this class.

A&S 593 | PRACTICUM IN EDUCATIONAL LEADERSHIP | 4 quarter hours
(Graduate)
The practicum provides opportunities for advanced students in administration and supervision to participate in and complete a research project in selected systems on a full-time or part-time basis. The experiences are intended to provide, under professional direction and supervision for (1) study for major factions, policies, and problems for administration and supervision, and (2) intensive study of certain critical administrative and supervisory practices.
Status as a Graduate Education student is a prerequisite for this class.

A&S 594 | INTERNSHIP IN EDUCATIONAL LEADERSHIP | 4 quarter hours
(Graduate)
The internship provides supervised experiences in selected organizations on a full-time or part-time basis. The student intern is cooperatively assigned to an organization under the immediate supervision of organizational personnel. The experiences provided are designed to enrich the student’s theoretical background with practical opportunities of participating in (1) overall contact with personnel and with the major functions and problems of certain critical administrative and/or supervisory activities, and (2) a detailed study and analysis of a particular administrative and/or supervisory function or activity.
Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 595 | WORKSHOP IN EDUCATIONAL LEADERSHIP | 4 quarter hours
(Graduate)
Topics of particular interest and concern to administrators and supervisors will be presented in a high-involvement seminar format. Primary reliance will be on written materials; however, audio-visual and role-playing mechanisms may also be used.
Status as a Graduate Education student is a prerequisite for this class.

A&S 596 | HUMAN RESOURCE MANAGEMENT | 4 quarter hours
(Graduate)
Theory, practice and relevant research in modern personnel administration. Recruitment, staff-development, interviewing, collective bargaining, conflict resolution and employee evaluation are emphasized. Human resource administration, induction programs, and in-service opportunities are touched upon.
Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 597 | POLITICS OF EDUCATION | 4 quarter hours
(Graduate)
Policy development in education as a political process; community power, state and national politics in educational decision-making and the role of leadership and pressure groups in the shaping of educational policy at local, state and national levels.
Status as a Graduate Education student is a prerequisite for this class.

A&S 598 | INDEPENDENT STUDY IN EDUCATIONAL LEADERSHIP | 4 quarter hours
(Graduate)
Independent study. Permission of instructor, department chair and Associate Dean are required.
Status as a Graduate Education student is a prerequisite for this class.
A&S 599 | THESIS SEMINAR IN EDUCATIONAL LEADERSHIP | 4 quarter hours  
*(Graduate)*  
A student writing a thesis registers for this course for four quarter hours of credit. When the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

A&S 600 | REGISTERED STUDENT IN GOOD STANDING | 0 quarter hours  
*(Graduate)*  
Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required (0 credit hours).  
Status as a Graduate Education student is a prerequisite for this class.

A&S 601 | INTRODUCTION TO THE INTERNSHIP | 0 quarter hours  
*(Graduate)*  
This course prepares the candidate for the internship experience. It provides an opportunity to examine and analyze the internship site, become familiar with the roles and responsibilities for person in the internship triad and understand expectations for the intern. (0 credit hours).

A&S 602 | PRINCIPAL LICENSURE INTERNSHIP I | 2 quarter hours  
*(Graduate)*  
This internship experience immerses the student into the world of the instructional leader in the contemporary Pre K-8th school setting. The student is to complete at minimum 100 clock hours of instructional leadership experiences in The PreK-8 setting by participating and taking the lead in concrete sustained leadership experiences under the supervision of both the building’s principal (mentor) and the faculty supervisor. (2 credit hours).  
Status as a Graduate Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 603 | PRINCIPAL LICENSURE INTERNSHIP II | 2 quarter hours  
*(Graduate)*  
This internship experience immerses the student into the world of the instructional leader in the contemporary 9-12 school setting. The student is to complete at minimum 100 clock hours of instructional leadership experiences in the 9-12 setting by participating and taking the lead in concrete sustained leadership experiences under the supervision of both the building’s principal (mentor) and the faculty supervisor. (2 credit hours)  
Status as a Graduate Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 604 | PRINCIPAL LICENSURE INTERNSHIP | 4 quarter hours  
*(Graduate)*  
This internship experience immerses students in the world of an instructional leader in the contemporary Pre K-12 school setting. In this year-long course students will complete at minimum 100 clock hours of instructional leadership experiences in a Pre K-8 setting and 100 clock hours of instructional leadership in a 9-12 setting by participating and taking the lead in concrete sustained leadership experiences under the supervision of both the building’s principal (mentor) and their faculty supervisor. Prior to immersing students in their internship experience, students will attend 4 seminars and are provided an opportunity to examine and analyze their internship site, to become familiar with their roles and responsibilities and understand the internship site’s expectations.  
Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 606 | REVIEW OF LITERATURE | 0 quarter hours  
*(Graduate)*  
This paper will give students the opportunity to develop and demonstrate written competence in a subfield of their disciplines and to enhance life-long learning. Specifically, they will broaden their knowledge base and inform themselves about a topic, issue, theory, etc., by reviewing and synthesizing existing literature. To do so, students will need a variety of bibliographic skills including searching databases. In other words, students will need to be able to ask and answer such questions as "What is known about? What are major issues and themes?" (0 credit hours)

A&S 607 | INTEGRATIVE PAPER | 0 quarter hours  
*(Graduate)*  
Students will observe and/or participate in the reciprocal interaction of theory and practice, by investigating actual practice in the field as it relates to theory. This might take the form of investigating how a particular theory is applied in the field, developing a practical application of a theory, or, conversely, developing/refining a theory based on investigations made in the field. In other words, as graduates encounter new theories and practices they will need to be able to investigate and evaluate them, asking and answering questions about "how theories work." (0 credit hours)

A&S 608 | CAPSTONE IN EDUCATIONAL LEADERSHIP | 4 quarter hours  
*(Graduate)*  
Students who have completed the majority of the program will engage in an analysis of an urban school. Students will be given demographic, financial and testing data; a narrative of the school’s history and recent past; photographs of the setting, and other pertinent data and artifacts. Using these artifacts, students will be asked to design their first year agenda as the chief administrator in the building. Using the ISLLC standards as a guideline, students will create a portfolio that clearly outlines, schedules, professional development plans, budgets, enrollment projections, and so forth.

A&S 625 | CANDIDACY CULMINATING PROJECT | 0 quarter hours  
*(Graduate)*  
Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms. (0 credit hours).  
Status as a Graduate Education student is a prerequisite for this class.
A&S 640 | LEGAL ASPECTS OF SPECIAL EDUCATION FOR CLASSROOM TEACHERS | 4 quarter hours  
(Graduate)  
The course will include a discussion of the legal rights of students with disabilities and the corresponding responsibilities and obligations of schools and educational personnel for meeting their educational needs. The course will include specific legal components inherent with the identification and education of students with disabilities including adaptations of classroom instructional methodology for students with disabilities in the regular education classroom.

A&S 645 | THE ADMINISTRATION AND SUPERVISION OF SPECIAL EDUCATION | 4 quarter hours  
(Graduate)  
This course will examine the role and function of special education; special services within the school and community; including special classes for the mentally and/or physically handicapped; and various services, such as school psychology, school social work, speech correction, learning disabilities specialist, and others. The course includes specific models for administration of special education programs and procedures for supervision and evaluation of special education personnel.

A&S 670 | HISTORICAL, PHILOSOPHICAL AND THEOLOGICAL FOUNDATIONS OF CATHOLIC EDUCATION | 4 quarter hours  
(Graduate)  
A survey of the history of Catholic K-12 education in the United States and the foundational documents of Catholic Education. Students will examine the history and philosophical/theological foundation of Catholic Schools in the United States and will be asked to reflect on the nature and mission of Catholic education in the multicultural, multiethnic milieu of Twenty-first Century America.  
Status as an EDD student with a Global Catholic Educational Leadership concentration is a prerequisite for this class.

A&S 671 | SPIRITUAL AND ADMINISTRATIVE LEADERSHIP IN CATHOLIC SCHOOLS | 4 quarter hours  
(Graduate)  
Students will be asked to conceptualize leadership from the Transformational and Servant Leadership perspectives. Using these principles, students will examine the spirituality of Catholic School leadership, and its implications for them in their role as ministers and coordinators of ministries in the school setting. Students will then examine the unique administrative and managerial factors that impact Catholic schools from a leadership framework that is imbued with the spirituality of Servant Leadership.

Status as an EDD student with a Global Catholic Educational Leadership concentration is a prerequisite for this class.

A&S 672 | INTERNATIONAL BACCALAUREATE LEADERSHIP IN SCHOOLS | 4 quarter hours  
(Graduate)  
Students will be asked to conceptualize leadership from the view of the International Baccalaureate Principles and Practices and the IB Leadership perspectives. Using the IB principles, students will examine leadership within IB schools and the priorities of integrating the IB perspectives into roles as leader and teacher. Students will examine the unique administrative and managerial factors that impact IB schools from a leadership framework that is imbued with global minded leadership practices and priorities of inclusivity, diversity, and equity.

Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.

A&S 673 | THE HISTORY, PHILOSOPHY OF INTERNATIONAL BACCALAUREATE EDUCATION | 4 quarter hours  
(Graduate)  
This course is a survey of the history of International Baccalaureate education across the globe and the universal foundational principles and practices of the IB. Students will examine the history and impact of the IB on learning across the globe. Students will analyze the research around IB and will determine the application within the context of leading IB into the future. The foci also include a global perspective for International Baccalaureate educational leadership theory and praxis applicable at the primary, secondary, and higher educational levels.  
Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.

A&S 688 | SERVICE LEARNING FOR HIGHER EDUCATION | 4 quarter hours  
(Graduate)  
This class is a hands-on, minds-on engagement in the practice and theory of service learning - the integration of community service and related academic study. Students will assist a service-learning program with planning, implementation or evaluation and integrate this experience with study of current practice, theory and research. Students who plan careers in higher education will find this useful in light of the increased commitment to providing service-learning opportunities on campuses. Many student services and other higher education positions include the need to offer leadership to these programs.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 694 | SCHOOL FINANCE | 4 quarter hours  
(Graduate)  
Major consideration will be given to problems relating to the preparation of a school budget, procuring revenue, financial accounting, capital outlays, insurance on property, taking of inventory, and the social, political, and ethical implications of how schools are financed.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 695 | SCHOOL LAW | 4 quarter hours  
(Graduate)  
Authority, powers and liability of school personnel; rights and status of students; character of districts and school board control of curriculum, school property, finances. Special emphasis on recent state and federal court decisions as they affect Illinois and neighboring states.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 696 | WORKSHOP IN EDUCATIONAL LEADERSHIP | 4 quarter hours  
(Graduate)  
Topics of particular interest and concern to administrators and supervisors will be presented in a high-involvement seminar format. Primary reliance will be on written materials; however, audio-visual and role-playing mechanisms may also be used.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 700 | REGISTERED DOCTORAL STUDENT IN GOOD STANDING | 0 quarter hours  
(Graduate)  
Non-credit. This registration is required of all doctoral students who are not enrolled in a doctoral course, but are completing course requirements and/or dissertation research. It provides access to University facilities. Academic advisor approval required. After the third enrollment, dissertation chair approval required. (0 credit hours)

Status as a EDD student with a declared concentration is a prerequisite for this class.
A&S 705 | DISSERTATION SEMINAR | 4 quarter hours (Graduate)
This course will guide the online EdD student through the initial stages of dissertation development, including topic exploration and planning, research question development and methodology determination. Students will review and evaluate research methodologies in order to identify an appropriate research design. In addition, they will analyze a number of dissertations in order to discover and pursue a strategy appropriate for undertaking the research process. Students will be part of a community of researchers, willing and able to support each other in the development of research plans as the group moves through the process together.

Status as an EDD student with a Global Catholic Educational Leadership concentration is a prerequisite for this class.

A&S 706 | CANDIDACY PAPER | 0 quarter hours (Graduate)
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook. (0 credit hours)

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 801 | LEADERSHIP THEORY AND PRACTICE | 4 quarter hours (Graduate)
This course examines leadership theories from various social, psychological and philosophical perspectives both historical and contemporary. The student will also be called upon to reflect upon contemporary practice in K-16 and other higher educational and related leadership settings and evaluate the efficacy of the theoretical frameworks in light of practice.

Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class.

A&S 802 | CONTEMPORARY ISSUES IN HIGHER EDUCATION | 4 quarter hours (Graduate)
This course explores contemporary policy issues in American higher education. The purpose of this course is to introduce students to key policy issues at various institutional levels in light of the broader political and cultural context. Students will conduct policy analysis of national, regional, and local issues in American higher education. This course considers and applies the integrated approach of policy and practice in examining issues in higher education.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 803 | THE SUPERINTENDENCY: PROGRAMS, SYSTEMS, AND STRUCTURES | 4 quarter hours (Graduate)
This course examines the basic work of the district superintendent with an emphasis on the superintendent's role as finding and developing resources, developing positive relationships with the school board, and developing, implementing and evaluating district policy. (Requires 10 hours of field work).

Status as an EDD-Educational Leadership student is a prerequisite for this class. Other EDD students may enroll with permission of instructor.

A&S 804 | INTERNATIONAL BACCALAUREATE LEADERSHIP THEORY AND PRACTICE | 4 quarter hours (Graduate)
International Baccalaureate Leadership: Theory and Practice examines the IB philosophy and how this influences the leadership of IB program implementation. Throughout the course, learners will examine how to align leadership theories with that of the IB mission and philosophy. The course experiences will engage students examining how to establish and sustain a school culture and ethos consistent with the IB philosophy, and conducive to meeting the IB Program Standards and Practices. Learners will be called upon to reflect upon contemporary practices in all levels and settings of educational leadership and to evaluate the practical efficacy and effectiveness of theoretical frameworks.

Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.

A&S 805 | CATHOLIC LEADERSHIP THEORY AND PRACTICE | 4 quarter hours (Graduate)
Catholic Leadership Theory and Practice examines Catholic educational leadership and how this influences the leadership of Catholic schools at every level. Throughout the course, learners will examine how to align leadership theories with that of the Catholic mission and call to social justice. The course experiences will engage students examining how to establish and sustain a Catholic school culture and ethos consistent with Catholic social teachings, and conducive to meeting Catholic faith in action. Learners will be called upon to reflect upon contemporary practices in all levels and settings of Catholic educational leadership and to evaluate the practical efficacy and effectiveness of theoretical frameworks.

Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.

A&S 811 | ASSESSMENT AND ACCOUNTABILITY | 4 quarter hours (Graduate)
This course addresses the key role of leaders in educational systems, from K-16 through higher ed, for the development, articulation, implementation, and supervision of an assessment process that provides accountability for all stakeholders—students, parents, teachers, faculty, staff, legislators, relevant communities, and governing authorities. Issues of philosophy, standards, outcomes, curricula, instrumentation, technology, and the interconnected nature of these factors are identified as they influence the leadership role in accountability compliance. Factors related to ethical practice and social justice anchor the philosophical and political parameters of the course.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 812 | ASSESSMENT, ACCOUNTABILITY AND EVALUATION IN HIGHER EDUCATION | 4 quarter hours (Graduate)
Questions, issues, and decision-making of assessment, evaluation, and accountability permeate the higher education landscape in light of the broader cultural context. The purpose of this course is to explore practices and issues connected to assessment, accountability and decision-making in alignment with the institutional purposes and need for effectiveness and taking into account stakeholders’ concerns, leadership practice, and student outcomes in post-secondary contexts. Students will explore and apply a variety of assessment methods and techniques, examine underlying rationales, and political and ethical considerations of accountability in higher education.

Status as a EDD student with a declared concentration is a prerequisite for this class.
A&S 822 | DIVERSITY AND EQUITY IN HIGHER EDUCATION | 4 quarter hours (Graduate)
Students in this course will explore notions of diversity and equity within and across higher education in light of the broader political and cultural context. The purpose of this course is to develop an understanding of key equity and social justice issues within higher education institutions. Students will examine the historical, contextual, and cultural roles of policies and practices that frame and guide post-secondary institutions.
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 823 | COMMUNITY AND CONSENSUS BUILDING FOR SCHOOL IMPROVEMENT | 4 quarter hours (Graduate)
Students will examine inclusive models for conflict resolution and consensus building among school/community members, whether K-16 or higher ed, that engage membership in processes and decision making through data collection, self-analysis, mission/vision development, goal setting and program planning, implementation and evaluation that leads to school and community improvement. Attention will be given to establishing linkages with local municipal, state, and federal resources, business and industrial resources, community services, and other community resources.
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 824 | ADVANCED HUMAN RESOURCES MANAGEMENT | 4 quarter hours (Graduate)
This course is designed to familiarize prospective superintendents with human resources and personnel management functions. This course provides a comprehensive ethical and legal background for the effective supervision of both certified and non-certified staff. Topics include hiring, induction, the evaluation of personnel, dismissal, collective bargaining, union relationships and succession planning.
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 834 | THE SUPERINTENDENT AS INSTRUCTIONAL LEADER | 4 quarter hours (Graduate)
The course will cover issues of best practices of instructional design and practice; managerial issues that promote instructional success; and the instructional leader as responsible to provide a learning environment for all members of the school community. Instructional Leadership at the chief executive officer level is the theme of this standards-based course. The application of strategic planning skills to enhance teaching and learning; to ensure alignment among curriculum, curriculum resources, and assessment; and to support the collection and use of multiple measures of success are promulgated through the requirements of this course. Emphasis is placed on skills designed to advocate, nurture, and sustain an instructional program and a culture that supports student learning and staff professional growth. Staff evaluation, improving staff performance, and effective models of supervision are emphasized.
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 838 | SUPERVISED APPLIED CAPSTONE (EDD) PROPOSAL DEVELOPMENT | 4 quarter hours (Graduate)
Students register for this course for the quarter in which they defend their capstone proposals. Permission of capstone chair required.

A&S 839 | INDEPENDENT APPLIED CAPSTONE (EDD): EDUCATIONAL LEADERSHIP | 4 quarter hours (Graduate)
Students register for this course for the quarter in which they defend their capstone projects. Permission of capstone chair required.

A&S 843 | THE POLITICS OF SCHOOLING | 4 quarter hours (Graduate)
Students will engage in analyzing educational policy and the political processes related to problem identification, problem solving, decision making, the underlying political processes and their impact on the school/community, students, parents, educators, staff, and community members. The role of such entities as, school boards, unions, professional associations, businesses, university preparation programs, book and test publishers, and local, state, and national policy makers in the education political arena will be analyzed. Attention will be given to the means by which support for change is developed with special emphasis on collaborative dialogue and teamwork for political action. Strategies for coalition building, and individual and collective action will be informed by the use of theory from applied behavioral science and political science.
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 849 | SUPERVISED DISSERTATION PROPOSAL DEVELOPMENT | 4 quarter hours (Graduate)
Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

A&S 859 | INDEPENDENT DISSERTATION RESEARCH: EDUCATIONAL LEADERSHIP | 4 quarter hours (Graduate)
Students register for this course for the quarter in which they defend their dissertation. Permission of dissertation chair required.

A&S 872 | BUDGETING AND HUMAN RESOURCE MANAGEMENT IN HIGHER EDUCATION | 4 quarter hours (Graduate)
The purpose of this course is to introduce students to the financing, economics, budgeting, and organization of higher education and its institutions. Students will examine the benefits, and costs of higher education, revenue resources, particularly tuition, admissions, financial aid, endowment policies and practices, resource allocation, budgetary practices, and other fiscal policies that affect faculty, staff, students, and other higher education stakeholders.
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 873 | CURRENT TRENDS IN BUDGETING AND FINANCE | 4 quarter hours (Graduate)
This course focuses on the priorities of school funding. Financial decisions undergird instructional programs and administrative decision making. Relating these to available money and funding, setting priorities and maximizing the impact on student achievement will be studied. A&S 494 or equivalent and status as an EDD student are a prerequisite for this class.
A&S 882 | LAW IN HIGHER EDUCATION | 4 quarter hours (Graduate)
This course prepares students to examine the themes and tensions in the constitutional, statutory, administrative, and case law that related to higher education. Students will examine and compare the themes and tensions in federal, state, and municipal law as well. Students will explore the impact of the law on various higher educational stakeholders, including but not limited to, students, faculty, staff, alumni, and the community at large. Students will apply legal principles to higher education case studies to develop effective problem-solving skills to prevent and mitigate legal issues.
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 883 | SCHOOL LAW | 4 quarter hours (Graduate)
This course examines the current legal requirements of schools and how changes impact schools. Administrators make decisions that respond to many realities, including the rules and regulations at the local, state, and national levels. The administrator works within a constantly changing system. The duties and liabilities of school administrators as determined by federal rules and regulations, state school codes, the policies of boards of education, and case law will be examined.
A&S 495 and status as an EDD student are prerequisites for this course.

A&S 894 | INTERNSHIP IN EDUCATIONAL LEADERSHIP | 4-8 quarter hours (Graduate)
(4-8 qh) The internship provides supervised experiences in selected organizations on a full-time or part-time basis. The student intern is cooperatively assigned to an organization under the immediate supervision of organizational personnel. The experiences provided are designed to enrich the student’s theoretical background with practical opportunities of participating in (1) overall contact with personnel and with the major functions and problems of certain critical administrative and/or supervisory activities, and (2) a detailed study and analysis of a particular administrative and/or supervisory function or activity.
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 898 | SUPERINTENDENT INTERNSHIP SEMINAR - THEORY INTO PRACTICE | 1 quarter hours (Graduate)
(1 QH) This course is a prerequisite for the internship. The course provides the interns with the requisite skills to enter into the internship experience, such as reflective practice, putting theory into practice, and familiarizing themselves with the life of central office.

A&S 899 | SUPERINTENDENT INTERNSHIP | 1 quarter hours (Graduate)
(1qh) The intern is assigned to a district office, under the supervision of a licensed superintendent. The student will be assigned work that will demonstrate mastery of the ELCC Standards. This internship extends from Summer Session through the following Spring with a minimum of 100 clock hours per term.
Status as a EDD student with a declared concentration is a prerequisite for this class.

African&Black Diaspora Studies (ABD)

ABD 100 | INTRODUCTION TO AFRICAN AND BLACK DIASPORA STUDIES | 4 quarter hours (Undergraduate)
This interdisciplinary introductory course examines the many ways in which African and diasporic peoples have created robust lives for themselves and contributed to the creation of the modern world. Our investigation will pay special attention to how social, economic, and political institutions, geographical factors, and the cultural forces of modernity have influenced African contributions to the modern world.

ABD 144 | AFRICAN RELIGIOUS EXPERIENCE | 4 quarter hours (Undergraduate)
A survey of the varieties of African religious practice and thought.

ABD 200 | AFRICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS | 4 quarter hours (Undergraduate)
This is an introductory survey course on African politics. The organizing topic and focus of the course will be Africa's experience with democratic governance, especially its continuing vigor and popular appeal on the continent despite its elusive character. Our goal in this course is to gain a deeper understanding and appreciation of Africa: its rich political tradition, incredible diversity, its contradictions, achievements and failings. The objective is to be able to ask better questions, and develop some insights about why democracy, self-sustaining economic growth, equity and social justice have been so difficult to accomplish and sustain in the region.

ABD 202 | AFRICA, 1750-1900 | 4 quarter hours (Undergraduate)
The Age of Conquest. The origins of Afro-European relations and the political, economic and military causes of the European partition and occupation of the continent. Cross-listed with HST 132.

ABD 203 | AFRICA, 1900-PRESENT | 4 quarter hours (Undergraduate)
The workings of the colonial system, the rise and course of independence movements, and the history of individual African states since independence. Cross-listed with HST 133.

ABD 206 | AFRO-CARIBBEAN AND AFRO-LATIN AMERICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS | 4 quarter hours (Undergraduate)
This course introduces students to the study of peoples of African descent in the Caribbean and Latin America through lenses of history, politics, and culture. Students will learn how racial identities are constructed and interpreted in the Americas and the ways these identities have shaped Latin American and Caribbean cultures, politics, and societies. This course will explore broad patterns, changes, and continuities in the history of the African Diaspora in the hemisphere through an analysis of various topics such as conquest, colonization, slavery, independence struggles, nation-building, imperialism, neo-colonialism, revolution, violence, social movements, and inter-American relations.
ABD 208 | AFRICAN AMERICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS | 4 quarter hours
(Undergraduate)
This course is intended to acquaint the student with a range of texts that illustrate some of the major themes in African American studies while emphasizing the development of students' critical reading, writing, and analytical skills. The course will serve as an introduction to African American historical, literary, political, and cultural study. This course is meant to introduce students to some of the issues, debates, and questions that have shaped the study and development of Black Americans in the United States and the broader world.

ABD 209 | RACE AND RACISM | 4 quarter hours
(Undergraduate)
Although it is common for us to talk about race, very few of us have an understanding of what the term means, much less how it came to signify human diversity. Race is not an objective scientific category that reliably conveys information about people or groups of people; it is a set of ideologies and practices that originated in modern Europe and has a traceable intellectual history. In this course we will study the origin of race as an intellectual and scientific project designed to organize humanity into discrete and hierarchical groups, and the implications of racial thinking, i.e. racial discrimination perpetuated by rhetorical and pictorial stereotypes, discriminatory behavior and institutional practices. We will utilize racial formation theory which links race and racism by showing the dynamic connections between stereotypes, prejudice, discrimination and privilege.

ABD 210 | AFRICA ON FILM | 4 quarter hours
(Undergraduate)
Africa is a continent with a rich and growing repertoire of film. This course explores this repertoire, focusing primarily on films made about Africa by filmmakers of African descent. This class will feature fiction and non-fiction films (full-length and shorts) by well-known filmmakers of African descent. In addition to screenings, students will read essays that illuminate the background necessary to intelligently interpret and critique film. Topics for discussion include the funding, distribution, and presentation of African Films as well as modes of criticism appropriate to film made by Africans and the relation of filmmaking to history. Film directors include Souleymane Cisse, Bassek ba Kobhio, Jean-Marie Teno, Djibril Dio Mambety, Mohamad Camara, and Ousmane Sembene.

ABD 211 | AFRICA TO 1800: AGE OF EMPIRES | 4 quarter hours
(Undergraduate)
A study of African history from earliest times, concentrating on the political, social and religious aspects of major African states and empires. Cross-listed with HST 131.

ABD 214 | ARCHEOLOGY OF THE AFRICAN DIASPORA | 4 quarter hours
(Undergraduate)
Africans have been on the move since the dawn of humanity. Archaeology is one discipline that can inform us about the presence and influence of Africans throughout the world, beginning with our hominin ancestors and continuing through the 20th century. Prior experience with archaeology is not required. Topics include: the evolution and development of our species; migrations within the African continent and abroad; and the cultural insights to be gained from the rapidly-growing field of African-American archaeology.

ABD 215 | THE AFRICAN AMERICAN RELIGIOUS EXPERIENCE | 4 quarter hours
(Undergraduate)
This course will examine the religious experience of African Americans and its African precursors through historical and literary resources, reflecting African Americans’ distinctive past and interaction with other elements of American culture. Cross-listed with REL 115.

ABD 218 | AFRICAN AMERICAN POLITICS | 4 quarter hours
(Undergraduate)
This course explores the evolution of African-American political participation from the mid-1800’s to the present. Topical areas include black political leadership and involvement in social movements (including abolitionism, nationalism, civil rights and the black power movements), electoral politics, political parties, urban politics, public policies, political culture, and as elected officials. Special attention will also be given to the influence of laws and the courts on African-Americans’ political participation.

ABD 220 | BLACKS AND LOVE | 4 quarter hours
(Undergraduate)
This course examines how writers represent gender and race in the romance genre. The course begins with a study of the literary elements that comprise popular romance novels. It also examines the design elements for their covers used primarily to attract women readers from varied racial/ethnic backgrounds, who, as major consumers of this genre, generate over a billion dollars in revenue annually. Next, attention will be devoted specifically to examining women writers and black readers of romance novels, who make up 25% of the billion dollar publishing industry. Questions to be addressed include: How does a writer’s gender and racial/ethnic identity shape the representations of race and gender in romance fiction and cover design? How have writers complicated the popular romance plot to address the issues of gender, race, class, and age? How do writers utilize the romance novel during specific historical periods to address social, political, and health issues? The course concludes by examining how the internet has transformed the writing, publishing, purchasing, and reading practices for the writers, publishers, and readers of romance novels with black characters.
ABD 229 | RACE, SCIENCE AND WHITE SUPREMACY | 4 quarter hours (Undergraduate)
Recently, scientists have come to question the concept of “race” as a reliable or accurate description of human populations, but the term is still understood to signify innate and essential biological difference. The concept of race originated in the 18th century with the work of European and American natural scientists. Although their original intention was to apply a taxonomic structure to human populations, the concept was quickly appropriated and used to support the domination and exploitation of people of color. Science provided a lens of objectivity that perpetuated biases, reinforced stereotypes and countenanced racism. This class will explore the tangled legacy of racial thinking and how scientists have marshaled evidence for and against ideologies of White supremacy and Black inferiority. We will discuss how Black bodies in particular have been scrutinized by natural scientists and medical professionals who sought to identify the physical traits the defined racial categories. Topics include the origin and use of race in science, phrenology, Eugenics, and the use of people of African descent as objects of scientific display and medical experimentation.

ABD 230 | STEREOTYPES AND BLACK IDENTITY | 4 quarter hours (Undergraduate)
Stereotypical representations of people of African descent have pervaded Western culture throughout the modern era. These images were disseminated along the trade routes of colonialism, from Africa to Europe, the Americas and Asia. Stereotypes of people of African descent have been a part of popular culture, commercial advertising, and scientific literature. This course will examine the origin and dissemination of the dehumanized image of “the Black body”. We will discuss the perpetuation of Black stereotypes and how these images have shaped Black identity in the post colonial world.

ABD 231 | PHILOSOPHY AND THE QUESTION OF RACE | 4 quarter hours (Undergraduate)
A philosophical inquiry into the history of the concept of race. Cross-listed with PHL 231.

ABD 232 | MIXED RACE AMERICAN IDENTITY | 4 quarter hours (Undergraduate)
The 1967 Supreme Court decision in the case of Loving vs. the State of Virginia overruled laws that prohibited individuals from different racial backgrounds from marrying. Since then, people from mixed racial and ethnic backgrounds have advocated for legal recognition of their status as members of more than one racial group. This course explores the transformation of these “interracial intimacies” from a cultural taboo to a source of personal identity. By placing their lives and experiences in the appropriate historical and cultural context, we will explore how people who identify as “mixed” negotiate the rigid boundaries of race in the United States.

ABD 233 | SURVEY OF AFRICAN DIASPORIC INTELLECTUAL THOUGHT | 4 quarter hours (Undergraduate)
This survey course examines the philosophical and critical thought from African American, Caribbean, and African philosophers, feminists, political, and radical intellectuals. The thinkers to be studied include, but are not limited to, W.E.B. Du Bois, Alain Locke, Zora Neale Hurston, Stuart Hall, bell hooks, Larry Neal, among others.

ABD 234 | BLACK AESTHETIC THOUGHT | 4 quarter hours (Undergraduate)
This course will examine the aesthetic thought and artistic movements that have emerged from Black creative intellectuals in the U.S. and globally. The course will examine Black aesthetics through various creative forms such as visual arts, cinema, music, and others. Figures examined in this course may include: W.E.B. Du Bois, Alain Locke, Zora Neale Hurston, Stuart Hall, bell hooks, Larry Neal, among others.

ABD 235 | HARLEM RENAISSANCE AND NEGRITUDE | 4 quarter hours (Undergraduate)
This interdisciplinary course will examine the diasporic literary and cultural movements known as the Harlem (or New Negro) Renaissance and the Negritude Movement. Through close attention to the essays, novels, and poetry from these movements, students will explore the connections between these two multifaceted cultural movements and their contributions to the growth of a global Black political and cultural consciousness. Authors to be studied include: Du Bois, Hughes, Locke, McKay, Cesaire and Senghor, among others.

ABD 236 | BLACK FREEDOM MOVEMENTS | 4 quarter hours (Undergraduate)
This course examines the movement for freedom by Black people in the US and throughout the African diaspora. Students will analyze the struggle for liberation in cultural, historical, and political contexts through the study of as anti-slavery and abolition movements, the Civil Rights movement, anti-colonial struggles, the Black Power movement, Black Lives Matter/Movement for Black Lives and the work of activists and scholars throughout the diaspora.

ABD 237 | PHILOSOPHIES OF AFRICA | 4 quarter hours (Undergraduate)
A study of the patterns of philosophical thinking from the African continent. Cross-listed with PHL 239.

ABD 240 | BLACK MUSIC IN AMERICAN CULTURE | 4 quarter hours (Undergraduate)
This course will focus on the historical development, cultural significance, political commentary, and social effects of Black music in the U.S. from the 1960s to the 1980s. Beginning with the rise of R&B and Soul in the 1960s, the course will continue on to examine innovations such as funk, disco and the emergence of hip hop. It considers the aesthetics and themes of black music and how they reflect the Black experience in the U.S. during the latter half of the 20th century, as well as the ways that the music, the themes, and the people evolve over that period.

ABD 241 | RELIGIOUS DIMENSIONS OF THE AFRICAN DIASPORA | 4-8 quarter hours (Undergraduate)
This course explores the dynamics of African religions throughout the Diaspora and the Atlantic world. It will pay particular attention to the variety of historical experiences and sacred institutions of African descent. Questions of the course include: how were these religions and their communities created?; how have they survived?; and how are African-based traditions perpetuated through ritual, song, dance, drumming, and healing practices? Specific attention will be given to one or more of the following: Yoruba religion and its New World offspring, Santeria, Voodoo and Candomble; Africanisms in American religion; gospel music; Islam; urban religions; and/or Vodun and Voodoo.
ABD 244 | AFRICAN DIASPORA WOMEN WRITERS | 4 quarter hours (Undergraduate)
This course examines fiction, poetry, drama, and other creative writings by African diaspora women writers with the purpose of studying how the writers from Africa and its diaspora configure themselves in literature. Students will engage how these writers engage topics such as literary form, feminism, gender, identity, politics, and community. Authors who studied in this course may include Aidaoo, Emecheta, Danticat, Cliff, Kincaid, Brand, Head, Hurston, Adichie, Lorde, among others.

ABD 245 | RACE AND ETHNICITY IN LITERARY STUDIES | 4 quarter hours (Undergraduate)
This course examines various ways in which race is constructed and, concurrently, how race as a "fiction" operates in literary studies. Literature presents and explores the ways in which the world is viewed and experienced by individuals in a particular society or social group. Since literature provides unique insights into different historical and cultural movements, studying how race is understood and deployed (explicitly and implicitly) in a text provides a powerful way to examine the fluidity of race and to compare how it is understood in different parts of the Black diaspora.

ABD 246 | INTRODUCTION TO AFRICAN ART | 4 quarter hours (Undergraduate)
This course is based on a series of important issues in the study of African art, such as medium and color, portraiture, the artist and innovation, relationships with language, royal patronage, divination, gender, aesthetics, Othering, and authenticity. The course will explore each of these concepts through a variety of artistic traditions from the continent. In this manner, students will gain basic theoretical tools which will enable them to work with art from across Africa.

ABD 247 | ANCIENT AFRICAN ART | 4 quarter hours (Undergraduate)
This course surveys a selection of artistic traditions from across the African continent beginning with the earliest attempts by humanity to visually represent complex thought until the Portuguese began trading along the coast of West Africa in the mid-fifteenth century. Emphasis is placed on demonstrating connectedness with a larger cultural environment, while also suggesting connections to future artistic traditions. Cross-listed with HAA 201.

ABD 248 | CLASSICAL AFRICAN ART | 4 quarter hours (Undergraduate)
This course surveys a selection of artistic traditions from across the African continent beginning with the arrival of the Portuguese along the coast of West Africa in the mid-fifteenth century until the age of African independence in the 1960s. While the impact of a European presence helps define the boundaries of this course, artistic response to that presence is but one theme. Interactions between African cultures and the impact of Islam are equally important considerations. Cross-listed as HAA 202.

ABD 249 | JAZZ AND THE DIASPORIC IMAGINATION | 4 quarter hours (Undergraduate)
This course will examine the role jazz has played in the cultural imagination of people across the African Diaspora. What does jazz symbolize for authors and artists, and how have they adapted jazz to fit their own aesthetic, ideological, and political needs? How has it been used in literature, visual art, politics, sociology (among others)? What are the different ways in which ‘jazz’ (itself a multifaceted idea) has been imagined, presented, and manipulated? Figures to be examined include: Amiri Baraka, Sonia Sanchez, Romare Bearden, Langston Hughes, Jackson Pollock, Billie Holiday, Ralph Ellison, Dizzy Gillespie, John Coltrane, among others.

ABD 251 | WORLD REFUGEE CRISIS | 4 quarter hours (Undergraduate)
This is a survey of global refugee crisis and internal displacement between 1945 and the present. The course will focus on the following issues and challenges: human rights, definitions and causes of crisis, internal/external displacements, ‘environmental’ refugees, protection and integration, refugee children, and conflict resolutions in post-war societies. Cross-listed with HST 241.

ABD 252 | POST-COLONIAL AFRICAN ART | 4 quarter hours (Undergraduate)
This course surveys African art from the age of African independence in the 1960s until the present day. The meaning of the term contemporary as it applies to African art is questioned in this course. The position of the artist between African artistic tradition and the global art market is also of vital importance. Cross-listed with HAA 203.

ABD 254 | AFRICAN POLITICS | 4 quarter hours (Undergraduate)
An introduction to African politics. The course will focus on the basic concepts, issues, and theoretical models used in studies of the dynamics of government and politics in Africa from the pre-colonial era to the contemporary period. Cross-listed with PSC 254.

ABD 255 | AFRICAN-AMERICAN HISTORY TO 1800 | 4 quarter hours (Undergraduate)
This course focuses primarily on the colonial era with an emphasis on topics such as the construction of race and gender, the Black Atlantic, the emergence of African diasporic cultures in the Americas, slavery, black political thought, resistance, and the Revolutionary War. Cross-listed as HST 246.

ABD 256 | AFRICAN-AMERICAN HISTORY, 1800-1900 | 4 quarter hours (Undergraduate)
The African experience in America beginning in the colonial era and lasting through the present day. This course will focus on a portion of that history—that spanning the 19th century. The course is organized thematically, with an emphasis on topics such as resistance, the construction of race, slavery and the law, gender and slavery, the nature of antebellum free black life, abolition, the Civil War, Reconstruction. Cross-listed as HST 247.

ABD 257 | AFRICAN-AMERICAN HISTORY, 1900 TO PRESENT | 4 quarter hours (Undergraduate)
The African experience in America is expansive, beginning in the colonial era and lasting through the present day. This course will focus on only a portion of that history-1905 to the present. The course will focus on the following issues and challenges: human rights, definitions and causes of crisis, internal/external displacements, ‘environmental’ refugees, protection and integration, refugee children, and conflict resolutions in post-war societies. Cross-listed with HST 241.

ABD 258 | AFRICAN AMERICAN HISTORY, 1900 TO PRESENT | 4 quarter hours (Undergraduate)
The African experience in America is expansive, beginning in the colonial era and lasting through the present day. This course will focus on only a portion of that history-1900 to the present. This course is organized thematically with an emphasis on topics such as migration, urbanization, segregation, 20th century constructions of blackness, arts & culture, African Americans and the World Wars, black political thought, freedom movements, and criminalization.
ABD 259 | THE GREAT MIGRATION AND BLACK IDENTITY | 4 quarter hours  
(Undergraduate)  
The largest internal migration in US history took place in the early 20th century when three million African Americans fled racial terrorism in the South to pursue economic opportunities in the North. They were joined by people of African descent from the Caribbean, leading to what is now known as the Great Migration. The movement had profound political, social and economic ramifications. It changed how White Americans saw African Americans and how African Americans saw themselves. This course will explore how the Great Migration shaped Black cultural identity in the 20th century. Topics will include racial terrorism in the South, education and political philosophies, and social movements.

ABD 260 | DIMENSIONS OF BLACK FAMILY LIFE | 4 quarter hours  
(Undergraduate)  
This course will introduce students to the study of Black family life in Africa and its Diaspora. Special attention will be given to the ways in which values and patterns of living and thought are communicated across generations (time) and transported across geography (space).

ABD 261 | RADICAL AESTHETICS OF HIP HOP | 4 quarter hours  
(Undergraduate)  
This course engages the interrelated art forms that comprise hip hop, a culture conceived by African American, Afro-Caribbean and Latino youth in the 1970s. In this course, students will explore hip hop culture's aesthetic strategies through a survey history of its four elements--emceeing, deejaying, bboying/bgirling, graffiti--and traces their wide influence in music, visual culture, dance, theatre, and politics. This course is interested in how hip hop culture has negotiated inequality through aesthetic practices that portray the fissures of the American dream while modeling alternatives.

ABD 262 | WHAT IS BLACK CINEMA? | 4 quarter hours  
(Undergraduate)  
What makes a black film a black film? Is a black film one made by a black director with a majority black cast and made for black audiences? What if the director of the film is non-black or it is made for a multicultural audience? Are these films still "black films?" Is black film a genre, a mode, or something else entirely? Do black filmmakers make films that are different than non-black filmmakers? These questions guide this course's investment in the idea of black film from the 1960s to the present. Throughout the course, students will consider the formal, cultural, historical, industrial, and political ramifications at stake when we assume the existence and relevance of the idea of the black film. We will address topics such as genre, class, gender, sexuality, authorship, spectatorship, both individually and intersectionally.

ABD 274 | WOMEN IN AFRICAN RELIGION AND CULTURE | 4 quarter hours  
(Undergraduate)  
A study of the role of religion and culture in the lives of women in Africa, introducing students to an "emic" (inside) interpretation of beliefs and practices of the triple religious heritage (Indigenous religions, Christianity and Islam), and critically evaluating their implications for women.

ABD 275 | BLACK FEMINIST THEORIES IN A U.S. CONTEXT | 4 quarter hours  
(Undergraduate)  
This course surveys the major figures, statements, and movements that shape Black feminist thinking, writing and activism in the United States. Figures examined include: bell hooks, Ida B. Wells Barnett, Mary Church Terrell, Angela Davis, Michelle Wallace, Audre Lorde, and Mark Anthony Neal, among others. Cross-listed with WGS 275.

ABD 285 | AFRO-HISPANIC LITERATURE IN TRANSLATION | 4 quarter hours  
(Undergraduate)  
This course explores how race, class, politics and culture find expression in Afro-Hispanic literature. We will read works that have been translated into English from their original Spanish versions and analyze how the use of language, imagery and narrative voice reflect the experience of people of African descent in the Spanish-speaking world.

ABD 290 | SPECIAL TOPICS | 4 quarter hours  
(Undergraduate)  
This course explores various issues stemming from African and Black peoples being gendered and racialized subjects. Specific topics may vary.

ABD 300 | AFRICAN ISLAM: ISLAMIC ART & ARCHITECTURE IN SUB-SAHARAN AFRICA | 4 quarter hours  
(Undergraduate)  
Focused study of the impact of Islam on the artistic traditions of sub-Saharan Africa. Rather than necessarily replacing previous art forms, this course investigates in what circumstances preexisting visual culture might be integrated with the requirements and needs of Islam. This approach necessitates an understanding that neither Islam nor African art are monolithic entities, but rather their interactions represent a wide variety of negotiations across the continent. Likewise, this course will consider specific historical circumstances to which Islamic art in sub-Saharan Africa has responded in terms of form and content. Cross-listed with HAA 302.

ABD 301 | AFRICAN ARCHITECTURE | 4 quarter hours  
(Undergraduate)  
This course examines a wide variety of issues pertinent to the study of architecture in Africa, highlighting above all else the diversity of traditions across the continent. Weekly themes are defined at times by materials, technology, type, geographical region, culture, or specific architectural elements. Examples of subjects studied include: earthen mosques of Mali; subterranean residences in Burkina Faso; nomadic tents;impluvial and courtyard traditions of Nigeria and Senegal; mural painting in Burkina Faso, Nigeria, and South Africa; Ethiopian rock cut churches; imperialist exploitation of Great Zimbabwe's legacy; and coral architecture of the Swahili Coast. Art history and related disciplines. Cross-listed with HAA 301.

ABD 303 | THEMES IN AFRICAN DIASPORA STUDIES | 4 quarter hours  
(Undergraduate)  
Recent scholarship argues that Africa is not limited to geography, but is found in the traditions and identities of many peoples around the world. This course will examine different major themes in the study of the African and Black diaspora. Specific topics may vary.

ABD 305 | PAN-AFRICANISM | 4 quarter hours  
(Undergraduate)  
The course will examine the often ambivalent place of Africa in the imaginations, cultures and politics of people in the African diaspora. Students will explore the contributions of African, African-American and Caribbean intellectuals in the formation of diasporic movements and Pan-African thought. We will ask, to what degree was the ideology of Pan-Africanism and the iconography of Africa employed to mobilize masses of black people around local and domestic issues? How important has a consciousness of Africa been to the construction of cultural identities in the diaspora, and how have class, gender, and race shaped or constrained those identities? Our goal is to develop further insights into how people of the African diaspora have continually reinvented and imagined the home of their ancestors, in turn reinventing and imagining themselves.
ABD 320 | AFRICAN AMERICAN SCIENCE FICTION | 4 quarter hours  
(Undergraduate)
This course studies the science fiction by Black writers as well as critical responses to these novels and writers. The course explores the treatment of gender, oppression and empowerment, historical implications (past, present, future) of the middle passage, chattel slavery, and the struggle for freedom.

ABD 336 | AFRICAN-AMERICAN POLITICAL THOUGHT | 4 quarter hours  
(Undergraduate)
Considers black political thought through a variety of ideological, political, legal and historical perspectives. First explores early efforts by blacks to challenge the racialized limitations of America’s core principles of liberty, equality and democracy in the contexts of abolitionism, the women’s suffrage movements, Manifest Destiny, and American industrialism. Then concentrates on the evolution of contemporary black political thought, with an emphasis on both conceptual diversity and continuity over time. Cross-listed with PSC 336.

ABD 345 | THE LITERATURE OF IDENTITY | 4 quarter hours  
(Undergraduate)
Cross-Cultural Study of self-discovery and identity as manifested in the literatures of self-awareness and self-definition. Authors to be studied include: Michael Anthony, Frantz Fanon, Jamaica Kincaid, George Lamming, V. S. Naipaul, and Jane Rhys.

ABD 348 | RELIGIONS IN AFRICA AND THE DIASPORA | 4 quarter hours  
(Undergraduate)
An advanced examination of the indigenous religions of Africa as they encounter other religious traditions throughout the world.

ABD 351 | RECONSTRUCTION AND THE RISE OF JIM CROW | 4 quarter hours  
(Undergraduate)
Covers the problems of reunion between the North and the South after the Civil War, including the struggle for African-Americans’ civil and political rights, the transition to a free labor economy in the South, and the eventual end of reconstruction and establishment of racial segregation in the South and the nation. Cross-listed with PSC 379.

ABD 365 | VOTING, REPRESENTATION, AND THE LAW | 4 quarter hours  
(Undergraduate)
This course explores the struggles of African Americans and women, as individuals who were excluded from the franchise on the basis of their being an African American, a woman, or both, to gain access to the ballot. The relation of women and African Americans to the ballot is worthy of investigation for two reasons. First, with the exception of 18 year olds, women and Black Americans are the two groups who have required amendments to the Constitution to secure their right to vote. Second, they share a history, often contentious, of political struggle. In addition, the course will investigate what this history of political struggle can tell us about American law, politics, and society.

ABD 369 | TOPICS IN PUBLIC LAW | 4 quarter hours  
(Undergraduate)
This course engages the research and analyses in the field of public law - how do political scientists, public policy analysts and others develop informed public policy and law. Topics vary from year to year.

ABD 370 | FEMINIST THEOLOGIES | 4 quarter hours  
(Undergraduate)
An exploration of women’s experience as a primary resource and norm for theology, focusing on themes of inclusion, exclusion, representation and liberation in particular social, political and historical contexts.

ABD 371 | AFRICAN- AMERICAN FICTION | 4 quarter hours  
(Undergraduate)

ABD 372 | AFRICAN AMERICAN DRAMA AND POETRY | 4 quarter hours  
(Undergraduate)
Survey of Black poetry and drama from 1865 to the present.

ABD 373 | TOPICS IN AFRICAN AMERICAN POETRY 1940-1960 | 4 quarter hours  
(Undergraduate)

ABD 374 | THE BLACK ARTS MOVEMENT | 4 quarter hours  
(Undergraduate)
This course looks at the intersection between political and artistic movements of the Black Power and Black Arts Movements. We will survey the aesthetic and political aspects of this era, including poetry, novels, drama, music, visual arts and film.

ABD 375 | RACE, MEDIA, AND REPRESENTATION | 4 quarter hours  
(Undergraduate)
This course examines signal representations of blackness in American media from the 19th century to the present. Students will probe the media's influence on perceptions of and possibilities afforded black people in the United States and abroad as well as black media makers attempts to proffer new visions.

ABD 379 | BLACK FEMINIST THEORY | 4 quarter hours  
(Undergraduate)
This course engages with the multiple versions of woman-centered theory and practice developed in the writings; activism, and other creative work of Black, particularly African American women, from the mid-nineteenth century to the twenty-first. While not all of these theorists would use the word feminist; all have in common the aim of empowering women’s lives, advocating for women for equal economic, political, and cultural access.

ABD 380 | TOPICS IN AFRICAN AMERICAN STUDIES | 4 quarter hours  
(Undergraduate)
This course examines figures, texts, cultures or issues in African American studies. Specific topics may vary by term.

ABD 382 | TOPICS IN AFRICAN DIASPORA STUDIES | 4 quarter hours  
(Undergraduate)
Topics vary. See schedule for titles and department website for specific descriptions.

ABD 386 | BLACK WOMEN'S LIVES | 4 quarter hours  
(Undergraduate)
This course is a variable topics course directed to the examination of topics such as black women’s cultural criticism, Black women in the arts, Black lesbian rights, Black women's participation in social movements, representation in the media, etc. Cross-listed with WGS 386.

ABD 390 | TOPICS IN POPULAR CULTURE IN THE BLACK DIASPORA | 4 quarter hours  
(Undergraduate)
This course explores various topics in popular culture studies through the lens of the African Diaspora, including music, film, television, popular literature and subcultural practices. Specific topics may vary by quarter.
imaging procedures. Students will continue to develop an increased
energies, half-lives, and principles of radionuclides in imaging and non-

Positron Emission Tomography (PET), and PET/CT images. The clinical
practicum is designed to promote independent critical thinking, balanced
responsibility, organization and accountability in the student. Students
will demonstrate competence in all procedures presented.

AHT 311 | DIAGNOSTIC NUCLEAR IMAGING CLINICAL PRACTICUM II | 4 quarter hours
(Undergraduate)
Supervised clinical education that gives the student the opportunity to perform a variety of patient procedures on both SPECT, SPECT/CT, PET and PET/CT imaging systems for all diagnostic, therapeutic, non-imaging in-vivo and in-vitro procedures. Clinical competencies developed in patient care, positioning techniques, analyzing images, and the selection of imaging parameters and collimators. Knowledge of integrated computer systems designed for use with clinical gamma cameras, Single Photon Emission Computed Tomography (SPECT), SPECT/CT, Positron Emission Tomography (PET), and PET/CT images. The clinical practicum is designed to promote independent critical thinking, balanced responsibility, organization and accountability in the student. Students will demonstrate competence in all procedures presented.

AHT 312 | CLINICAL NUCLEAR MEDICINE PROCEDURES I | 4 quarter hours
(Undergraduate)
Emphasis on theory and techniques of clinical procedures used in nuclear medicine imaging. Areas emphasized include patient care, developing acquisition parameters, imaging techniques, radionuclide identification, energies, half-lives, and principles of radionuclides in imaging and non-imaging procedures. Students will continue to develop an increased degree of competence in their performance of the skills related to critical thinking and problem solving.

AHT 313 | CLINICAL NUCLEAR MEDICINE PROCEDURES II | 4 quarter hours
(Undergraduate)
Emphasis on theory and techniques of clinical procedures used in nuclear medicine imaging. Areas emphasized include patient care, developing acquisition parameters, imaging techniques, radionuclide identification, energies, half-lives, and principles of radionuclides in imaging and non-imaging procedures. Students will continue to develop an increased degree of competence in their performance of the skills related to critical thinking and problem solving.

AHT 314 | MANAGEMENT AND METHODS OF PATIENT CARE I | 4 quarter hours
(Undergraduate)
Skills in problem solving, critical-thinking, and decision-making are developed as well as oral and written communication skills. Career skills are enhanced through the interview process, resume writing, and administrative duties including; budgeting, medical and legal considerations and political issues affecting health care. Special emphasis is placed on research methods, medical law and ethics, and scheduling guidelines. Focus on basic measures necessary to provide quality patient care. Basic principles of record keeping and maintaining confidentiality of information are explained.

AHT 315 | MANAGEMENT AND METHODS OF PATIENT CARE II | 2 quarter hours
(Undergraduate)
Skills in problem solving, critical-thinking, and decision-making are developed as well as oral and written communication skills. Career skills are enhanced through the interview process, resume writing, and administrative duties including; budgeting, medical and legal considerations and political issues affecting health care. Special emphasis is placed on research methods, medical law and ethics, and scheduling guidelines. Focus on basic measures necessary to provide quality patient care. Basic principles of record keeping and maintaining confidentiality of information are explained. (2 quarter hours)

AHT 316 | RADIATION BIOLOGY | 1 quarter hours
(Undergraduate)
Knowledge of cell structure and function as a basis for understanding cellular and organ responses to the effects of ionizing radiation, radionuclides and radiation oncology. Understanding units of exposure, organ dose calculation and body distribution. (1 quarter hour)

AHT 317 | MEDICAL TERMINOLOGY | 1 quarter hours
(Undergraduate)
The medical terminology course consists of a study of root words, prefixes, and suffixes of medical vocabulary. Also included are medical abbreviations and applicable symbols. A combination of learning exercises and chapter quizzes are utilized. Emphasis is on application of terminology through the use of chapter objectives, learning exercises, and critical thinking exercises. As an independent study, students may choose to progress more rapidly than the assignment schedule outlines. (1 quarter hour)
AHT 321 | MANAGEMENT AND METHODS PATIENT CARE | 2 quarter hours
(Undergraduate)
Content is designed to provide the student with foundational concepts and competencies in assessment and evaluation of the patient for service delivery. Psychological and physical needs and factors affecting treatment outcome will be presented and examined. Students will also get a better understanding of how race, gender, physical ability, sexual orientation, spirituality, healing and dying, and age play a role in cultural competence. Routine and emergency care procedures will be presented. Course will also include an orientation to hyperthermia, chemotherapy, body mechanics, nutrition for cancer patients, and an overview of radiation therapy patient side effects. (2 quarter hours)

AHT 322 | QUALITY MANAGEMENT | 2 quarter hours
(Undergraduate)
Content is designed to focus on the evolution of quality management (QM) programs and continuing quality improvement in radiation oncology. Topics will include the need for quality assurance (QA) checks; QA of the clinical aspects and chart checks, film checks; the various types of evaluations and tests performed on simulators, megavoltage therapy equipment, and therapy planning units; the role of radiation therapists in quality management programs; legal and regulatory implications for maintaining appropriate guidelines; and the role computers and information systems serve within the radiation oncology department. (2 quarter hours)

AHT 323 | CLINICAL PRACTICUM I | 2 quarter hours
(Undergraduate)
The overall objective of this course is to aid the student in achieving basic level technical skills through supervised practice of radiation therapy procedures on actual patients. Students will be required to complete some ARRT required clinical competency examinations during this course. (2 quarter hours)

AHT 324 | CLINICAL PRACTICUM II | 2 quarter hours
(Undergraduate)
The overall objective of this course is to aid the student in achieving basic level technical skills through supervised practice of radiation therapy procedures on actual patients. This is a continuation of Clinical Practicum I. Students will be required to complete all remaining ARRT required clinical competency examinations during this course. (2 quarter hours)

AHT 325 | INTRODUCTION TO RADIOLOGIC SCIENCES | 2 quarter hours
(Undergraduate)
This course provides the student therapist with the technical aspects of radiography equipment. Discussion will include orientation to the function and operation of radiography equipment. (2 quarter hours)

AHT 326 | RADIATION BIOLOGY | 3 quarter hours
(Undergraduate)
This course introduces the student to the effects of ionizing radiation and chemotherapeutic agents on living tissue. Emphasis is placed on the concept of the therapeutic ratio and the manipulation of influencing factors in order to affect patient treatment outcomes. (3 quarter hours)

AHT 327 | RADIATION SAFETY AND PROTECTION | 3 quarter hours
(Undergraduate)
The purpose of this course is to educate students regarding institutional, state and federal regulations controlling the sale and disposal of radiation-producing equipment and sources. Emphasis is placed on ALARA principles to define the health professional’s legal and ethical responsibility to minimize radiation dose to co-workers and patients, and oneself. (3 quarter hours)

AHT 329 | PATHOLOGY | 3 quarter hours
(Undergraduate)
This course introduces the student to the field of pathology with an emphasis on the oncologic disease processes. Topics range from discussion of pathology from the cellular level through various organ systems. Students are introduced to terminology related to the field of pathology as a whole and to the subspecialty of oncology specifically. (3 quarter hours)

AHT 330 | RADIATION SAFETY AND PROTECTION | 3 quarter hours
(Undergraduate)
Supervised practice and procedures for the receipt, handling, transporting, storage, usage, record keeping, disposal and decontamination of radioactive materials. Emphasis on licensing and regulations set forth by local, state and federal agencies. Academic and clinical instruction to provide the student with radiation safety techniques to minimize exposure to the patient, public, fellow workers and themselves. Regulations regarding therapeutic dosages and follow-up procedures. Focus on practical mathematics in nuclear medicine including radiation unit conversion, dose conversion, dose calculation, determination of specific activity, decay, and half-life calculation, counting efficiency, and statistics. (3 quarter hours)

AHT 331 | RADIATION DETECTION AND INSTRUMENTATION | 3 quarter hours
(Undergraduate)
Evaluation, maintenance and function of instrumentation used in imaging and in the laboratory. Principles and theory of PET/CT and scintillation camera operation and performance. Radiation measurement, event counting activity, pulse height spectra, detection efficiency, resolving time and statistics. Flood field and bar phantom use for assessing camera uniformity, relative sensitivity, spatial linearity and resolution testing. Quality assurance procedures for the PET scanner include radial, tangential and axial resolution, sensitivity, linearity, uniformity, attenuation accuracy, scatter determination and dead time corrections. Knowledge of the operations and maintenance of computer hardware and software. Emphasis on data collection, analysis and processing used in clinical imaging. Application of computer devices and memory usage. Emphasis on SPECT, SPECT/CT, PET and PET/CT quality control procedures. (3 quarter hours)

AHT 332 | RADIATION PHYSICS AND INSTRUMENTATION | 3 quarter hours
(Undergraduate)
Theory and physical principles associated with atomic structure, nuclear and quantum physics related to radioactive decay. Properties of the elements and the production of characteristic x and gamma rays, anger electrons and Bremsstrahlung. Instruction on the modes of decay, radiation dosimetry, and interaction of ionizing radiation with matter. Basic physics, instrumentation, and radiochemistry of SPECT (Single Photon Emission Computed Tomography), SPECT/CT, Positron Emission Tomography (PET), and PET/CT. (3 quarter hours)

AHT 333 | RADIONUCLIDE CHEMISTRY AND RADIOPHARMACY | 3 quarter hours
(Undergraduate)
The chemical, physical and biological properties of radiopharmaceuticals used in diagnosis and therapy. Emphasis is given to the preparation, calculation, identification, administration, and disposal of radiopharmaceuticals. Performance of all radionuclide quality control and quality assurance procedures. Principles of decay and half-life, tissue localization, chemical impurities, generator systems, dose preparation and techniques of good laboratory practices and cell labeling. (3 quarter hours)
AHT 334 | CLINICAL CORRELATION - PATHOLOGY | 3 quarter hours  
(Undergraduate)
Focus on the study of the structure and function of human cells, tissues, organs and systems. Clinical interpretation of organ systems with emphasis on immunology, and anatomy and physiology, which will provide a basis for understanding abnormal or pathological conditions as applied to nuclear medicine. Causes, symptoms, and treatments of disease are discussed as well as their effect on the images. In addition, the student is scheduled to observe the interpretation of images with the physician staff. (3 quarter hours)

AHT 335 | COMPUTED TOMOGRAPHY AND CROSS-SECTIONAL ANATOMY | 3 quarter hours  
(Undergraduate)
Introduction to the fundamental concepts and principles of computed technology and its role in medical imaging. Specific topics include physics & instrumentation of CT scanning, image production, and cross-sectional anatomy of the head, neck, thorax, abdomen, and pelvis. Emphasis placed on patient considerations, patient safety, and radiation protection. (3 quarter hours)

AHT 341 | RADIATION PHYSICS I | 3 quarter hours  
(Undergraduate)
Students are introduced to the principles and practice of applying ionizing radiation to the human body. Topics include discussion of radiation therapy equipment, including treatment units and computer planning systems with an emphasis on how this equipment is used to produce proper treatment planning and dose calculations, according to the radiation oncologist's prescription. Topics also include fundamental concepts of general physics and radiation physics, including the production of x-rays interactions with matter. (3 quarter hours)

AHT 342 | RADIATION PHYSICS II | 3 quarter hours  
(Undergraduate)
Students are introduced to the principles and practice of applying ionizing radiation to the human body. Topics include discussion of radiation therapy equipment, including treatment units and computer planning systems with an emphasis on how this equipment is used to produce proper treatment planning and dose calculations, according to the radiation oncologist's prescription. Radiation protection and quality assurance will also be covered. This course is a continuation of Radiation Therapy Physics I. (3 quarter hours)

AHT 343 | MEDICAL IMAGING AND PROCESSING | 2 quarter hours  
(Undergraduate)
Procedure for imaging human structure and their relevance to radiation therapy; topographical anatomy, radiographic and cross sectional anatomy. Identification of anatomic structures as demonstrated through various imaging modalities. (2 quarter hours)

AHT 344 | OPERATION ISSUES IN RADIATION THERAPY | 3 quarter hours  
(Undergraduate)
Content is designed to focus on various allied health operational issues. Continuing Quality Improvement (CQI) project development, evaluation, and assessment techniques will be emphasized. Human resource issues and regulations impacting the radiation therapist will be examined. Accreditation agencies and the licensed practitioner's role in the accreditation process will be presented. Billing and reimbursement issues will be covered. (3 quarter hours)

AHT 345 | PRINCIPLES AND PRACTICE OF RADIATION THERAPY | 2 quarter hours  
(Undergraduate)
Content is designed to provide an overview of cancer and the specialty of radiation therapy. The medical, biological, and pathological aspect, as well as the physical and technical aspects, will be discussed. This course will also include content designed to provide the student with fundamental concepts, theories, and application of healthcare laws and ethical standards implemented and practiced in quality management for radiation therapy. Analysis of legal terminology, sources of law and the litigation process as applied to health professionals will be evaluated. (2 quarter hours)

AHT 346 | PRINCIPLE AND PRACTICE OF RADIATION THERAPY II | 2 quarter hours  
(Undergraduate)
This course is a continuation of principles and practice of radiation therapy I. Critical thinking and the basics of ethical and clinical decision making are fostered in the student. The epidemiology, etiology, detection, diagnosis, patient condition, treatment, and prognosis of neoplastic disease will be presented, discussed, and evaluated in the relationship to histology, anatomical site, and patterns of spread. The radiation therapist's responsibility in the management of neoplastic disease will be examined and linked to the skills required to analyze complex issues and make informed decisions while appreciating the character of the profession. (2 quarter hours)

AHT 347 | TECHNICAL RADIATION ONCOLOGY | 2 quarter hours  
(Undergraduate)
This course provides the student therapist with the technical aspects of radiation therapy. Discussion will include orientation to the function and operation of radiation therapy equipment. The clinical lab component of this course provides a hands-on, sequential application, and clinical integration of concepts and theories in the radiation therapy clinic and the didactic portion of this course. Concepts of team practice, patient-centered and clinical practice will also be discussed. (2 quarter hours)

AHT 348 | TECHNICAL RADIATION ONCOLOGY | 3 quarter hours  
(Undergraduate)
This course is designed to focus on discussions of various treatment and simulation procedures of different pathologies. The lab component will continue to provide a hands-on, sequential application, and clinical integration of concepts and theories in the radiation therapy clinic. (3 quarter hours)

AHT 365 | URINE ANALYSIS AND BODY FLUIDS | 3 quarter hours  
(Undergraduate)
Body fluids such as urine, pleural, and spinal are examined to determine the kinds and numbers of body cells present. The students will master quantitative and qualitative testing of urine is done. This includes testing for pH, color, specific gravity, sugars and excessive amounts of protein. Urine and other body fluids are also examined for the presence of bacteria and parasites as well as crystals and casts formed by the kidneys.

AHT 371 | FUNDAMENTALS OF CLINICAL CHEMISTRY | 1 quarter hours  
(Undergraduate)
This course presents the development of fundamental laboratory skills laboratory operations and automation in a lecture format.
AHT 372 | APPLICATIONS OF CLINICAL CHEMISTRY | 3 quarter hours (Undergraduate)
This course in the clinical laboratory pertains to the acquisition of manual and automated laboratory skills to test patient samples utilizing complex instrumentation and understanding the principals of test procedures, instrumentation, quality control and approved safety practices. State-of-the-art automation and robotics enable the laboratory to provide critical diagnostic information quickly and accurately to physicians in such areas as the emergency department, intensive care, surgery and the neonatal intensive care unit. In addition, the Clinical Chemistry Laboratory offers testing for the assessment of many metabolic systems that can include cholesterol measurement, thyroid and reproductive hormone levels, and therapeutic drug monitoring. Students will work with up-to-date, computer-assisted technology to provide critical as well as routine testing for effective patient care.

AHT 373 | ADVANCED APPLICATIONS OF CLINICAL CHEMISTRY | 5 quarter hours (Undergraduate)
This is a lecture course presenting in depth theory, pathophysiology, and high level of problem solving commonly seen in the laboratory. This didactic portion of the program is presented by pathologists, PhD scientists and experienced Medical Laboratory Scientists.

AHT 374 | FUNDAMENTALS OF HEMATOLOGY | 1 quarter hours (Undergraduate)
This laboratory develops fundamental laboratory skills in Hematology. This experience includes lecture presentations, demonstrations, clinical observations and hands-on practical experience. Students learn to prepare and stain peripheral blood smears in preparation for counting and classification of the various types of red and white blood cells among other labs.

AHT 375 | CLINICAL HEMATOLOGY AND COAGULATION | 4 quarter hours (Undergraduate)
In the Clinical Hematology Laboratory students will master blood counts and cellular classification. They also learn how to determine whether the oxygen-carrying red blood cells are in a healthy state, an essential procedure for diagnosis of anemia. In addition, the students will be shown how to classify the cells in the bone marrow to assist the pathologist in the identification of leukemia and other blood disorders. Tests are conducted in the Coagulation section of the Hematology Laboratory to determine the presence or absence of factors essential to normal blood coagulation. Special procedures are performed to identify acquired and inherited deficiencies of the coagulation proteins.

AHT 376 | ADVANCED APPLICATIONS IN HEMATOLOGY AND COAGULATION | 4 quarter hours (Undergraduate)
This is a lecture course presenting in depth theory, pathophysiology, and high level of problem solving commonly seen in the laboratory. This didactic portion of the program is presented by pathologists, PhD scientists and experienced Medical Laboratory Scientists.

AHT 378 | FUNDAMENTALS OF CLINICAL MICROBIOLOGY | 1 quarter hours (Undergraduate)
The Microbiology Laboratory deals with the isolation and identification of potentially pathogenic microorganisms. In many cases the laboratory also determines the susceptibility of the etiologic agent to a variety of antibiotics. This laboratory is divided into Bacteriology, Mycology, Mycobacteriology, Parasitology, and Virology. Bacteriology is concerned with the various bacteria that may cause direct destruction of tissue or harmful sequelae. Throat, urine, stool, blood, wound and sputum cultures are some of the types of specimens received for processing.

AHT 379 | CLINICAL MICROBIOLOGY | 4 quarter hours (Undergraduate)
This course presents an ideal learning environment for the development of fundamental laboratory skills in Clinical Microbiology. This experience includes lecture presentations, demonstrations, clinical observations and hands-on practical experience. In this introductory student microbiology laboratory course, students learn to prepare and stain gram smears in order to identify microorganisms. The students will learn to prepare and read culture plates.

AHT 380 | ADVANCED APPLICATION OF MICROBIOLOGY | 5 quarter hours (Undergraduate)
This is a lecture course presenting in depth theory, pathophysiology, and high level of problem solving commonly seen in the laboratory. This didactic portion of the program is presented by pathologists, PhD scientists and experienced Medical Laboratory Scientists.

AHT 381 | APPLICATIONS OF CLINICAL VIROLOGY | 1 quarter hours (Undergraduate)
Virology course approaches the study of viruses and isolating viruses such as influenza, chicken pox, cytomegalovirus, and herpes from clinical specimens utilizing advanced molecular techniques. Students will learn to perform these routine methods and procedures commonly used identify these and other viruses. Highly sensitive nucleic acid amplification methods, including real-time PCR, are used to detect low concentrations of infectious agents such as Herpes simplex. Quantitative (viral load) tests for hepatitis C and HIV nucleic acid are used to monitor response to therapy. Analysis of mutated genes is performed to evaluate patients with clotting disorders, and clonal gene rearrangement studies are used in the diagnosis of lymphomas.

AHT 382 | PARASITOLOGY | 1 quarter hours (Undergraduate)
In the Parasitology course, specimens are examined for the presence of amoebae, malarial organisms, worms and their ova, and flagellates. Larger parasites, such as mites, fleas or ticks are also identified so the appropriate disease diagnosis can be made, treatment started, and public health concerns addressed.

AHT 383 | MYCOLOGY | 1 quarter hours (Undergraduate)
Mycology deals with fungi that may infect man on the surface of the skin (i.e., ringworm) or cause systemic complications (i.e., histoplasmosis). Mycobacteriology is the study of such organisms as that which causes tuberculosis.

AHT 384 | FUNDAMENTALS OF IMMUNOHEMATOLOGY | 1 quarter hours (Undergraduate)
The student will master the techniques of ABO blood grouping methods, Rh testing, crossmatching and identification of red blood cell antibodies. In addition, the student learns about the preparation and use of blood components and observes blood collection procedures including whole blood and apheresis donations, as well as hematopoietic progenitor cell collection. Blood bank activities require close coordination with the clinical care units, so students in this laboratory have a sense of direct involvement in patient care.
AHT 385 | FUNDAMENTALS OF IMMUNOHEMATOLOGY AND TRANSFUSION MEDICINE | 4 quarter hours (Undergraduate)
This basic laboratory course presents the development of fundamental laboratory skills in blood banking and transfusion medicine. This experience includes lecture presentations, demonstrations, clinical observations and hands-on practical experience. During the blood bank laboratory course, the student will master ABO & Rh phenotyping, the indirect antiglobulin test and identify simple red blood cell antibodies. Immediate spin and indirect antiglobulin crossmatch techniques are also learned.

AHT 386 | ADVANCED APPLICATIONS OF IMMUNOHEMATOLOGY | 3 quarter hours (Undergraduate)
This is a lecture course presenting in depth theory, pathophysiology, and high level of problem solving commonly seen in the laboratory. This didactic portion of the program is presented by pathologists, PhD scientists and experienced Medical Laboratory Scientists.

AHT 387 | FUNDAMENTALS OF IMMUNOPATHOLOGY | 1 quarter hours (Undergraduate)
This basic laboratory course presents an ideal learning environment for the development of fundamental laboratory skills in Immunology and serology. This experience includes lecture presentations, demonstrations, clinical observations and hands-on practical experience.

AHT 388 | CLINICAL IMMUNOPATHOLOGY | 2 quarter hours (Undergraduate)
The Immunopathology Laboratory performs state-of-the art testing in Flow Cytometry and Diagnostic Immunology. In Flow Cytometry special emphasis is placed on diagnosis of leukemias and lymphomas and monitoring of immunologic pathologies. Rotation through the Immunology section includes performance of protein chemistry and infectious disease serology; detection of tumor markers; and pregnancy and prenatal diagnosis.

AHT 389 | ADVANCED APPLICATION OF IMMUNOPATHOLOGY | 1 quarter hours (Undergraduate)
This is a lecture course presenting in depth theory, pathophysiology, and high level of problem solving commonly seen in the laboratory. This didactic portion of the program is presented by pathologists, PhD scientists and experienced Medical Laboratory Scientists.

American Sign Language (ASL)

ASL 101 | AMERICAN SIGN LANGUAGE I | 4 quarter hours (Undergraduate)
This course is a basic introduction to American Sign Language (ASL), the language used by Deaf people in the United States and most of Canada. This course will help students develop their expressive and receptive ASL skills. Students will also learn about Deaf culture since a language cannot be separated from its culture.

ASL 102 | AMERICAN SIGN LANGUAGE II | 4 quarter hours (Undergraduate)
This is the second Basic American Sign Language course in a series of ASL courses. Students will develop expressive and receptive ASL skills through discussions of topics such as giving directions, describing others, making requests, talking about family and occupations, attributing qualities to others, and talking about routines. Students will also learn about Deaf culture since a language cannot be separated from its culture.

ASL 103 | AMERICAN SIGN LANGUAGE III | 4 quarter hours (Undergraduate)
This is the third Basic American Sign Language course in a series of ASL courses. Students will develop expressive and receptive ASL skills through discussions of such topics as giving directions, describing others, making requests, talking about family and occupations, attributing qualities to others, and talking about routines. Students will also learn about Deaf culture since a language cannot be separated from its culture.

ASL 105 | INTERMEDIATE AMERICAN SIGN LANGUAGE I | 4 quarter hours (Undergraduate)
This is the second Basic American Sign Language course in a series of ASL courses. Students will develop expressive and receptive ASL skills through discussions of topics such as living situations, family and occupations, and daily routines or activities. In addition, students will develop storytelling skills. Throughout the session, readings about Deaf culture will also be incorporated since a language cannot be separated from its culture.

ASL 106 | INTERMEDIATE SIGN LANGUAGE III | 4 quarter hours (Undergraduate)
(Covers the equivalent of the second half of ASL 102 and all of ASL 103.) The second half of beginning American Sign Language. Students will develop expressive and receptive ASL skills through discussions of such topics as giving directions, describing others, making requests, talking about family and occupations, attributing qualities to others, and talking about routines. Students will also learn about Deaf culture, since a language cannot be separated from its culture.

ASL 107 | INTERMEDIATE AMERICAN SIGN LANGUAGE II | 4 quarter hours (Undergraduate)
This course is a continuation of American Sign Language (ASL), Level Two. It includes vocabulary-building and mastery of grammar through rigorous receptive and expressive language activities. Topics discussed in ASL include exchanges of personal information or life events, description of abstract objects, and continued enhancement of the cultural awareness intrinsic to those skills. ASL 103 or equivalent, including placement test or permission of instructor, is recommended.

ASL 108 | INTERMEDIATE AMERICAN SIGN LANGUAGE III | 4 quarter hours (Undergraduate)
(Covers the equivalent of ASL 102 and the first half of ASL 102.) The first half of beginning American Sign Language (ASL), the language used by Deaf people in the United States and most of Canada. This course will help students develop their expressive and receptive ASL skills. Students will also learn about Deaf culture since a language cannot be separated from its culture.

ASL 109 | INDEPENDENT STUDY | 0.5-8 quarter hours (Undergraduate)
Variable credit.

ASL 110 | INDEPENDENT STUDY | 0.5-8 quarter hours (Undergraduate)
Variable credit.

ASL 111 | INDEPENDENT STUDY | 0.5-8 quarter hours (Undergraduate)
Variable credit.
ASL 201 | ADVANCED COMMUNICATION I | 4 quarter hours (Undergraduate)
Advanced level intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 202 | ADVANCED COMMUNICATION II | 4 quarter hours (Undergraduate)
Advanced level intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. Continuation of ASL 201. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 203 | ADVANCED COMMUNICATION III | 4 quarter hours (Undergraduate)
Advanced level intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. Continuation of ASL 202. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 299 | INDEPENDENT STUDY | 0.5-8 quarter hours (Undergraduate)
Variable credit.

ASL 305 | AMERICAN SIGN LANGUAGE LITERATURE | 4 quarter hours (Undergraduate)
This course will focus on selected ASL videotapes and films ranging from the early 1900’s to the present. It shares similar elements and functions with any literature in any language. Students will study the historical background of deaf actors and actresses in silent films, analyze the content of stories, discuss grammatical features in ASL or ASL expressions signed by deaf people, and discuss the various signing registers and styles revealed in these contents. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 306 | ARTS IN THE DEAF COMMUNITY | 4 quarter hours (Undergraduate)
A study of arts in the deaf community including the history and movement of De’VIA. Students will develop awareness and recognition of Deaf professional artists and the respective meaning behind their work. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 310 | DEAF CULTURE | 4 quarter hours (Undergraduate)
This course is an introduction to concepts and issues in Deaf culture and the Deaf community. This course emphasizes the Deaf community as a linguistic and American cultural minority, the importance of language and education of the deaf people, as well as values, traditions, political activism and diversity in this group. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 311 | DEAF-BLIND COMMUNITY | 4 quarter hours (Undergraduate)
An introduction to various aspects of the deaf-blind community including cultural norms and modes of communication used with deaf-blind communities. Students will develop an understanding of the role of Support Service Provider (SSP) or sighted guide. Opportunities for hands-on experience and interaction with the deaf-blind community will be provided. This course will be open to students who may or may not have had prior experiences with the deaf-blind community. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 321 | ART OF TRANSLATION | 4 quarter hours (Undergraduate)
This course focuses on development of written English translations from ASL and verbal translation from ASL into English. This course will train students to focus on the meaning expressed in ASL concepts and provide proper translations. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 352 | ASL LINGUISTICS | 4 quarter hours (Undergraduate)
This course will help students understand the basic concepts of linguistics as they think critically about ASL structure, including the fundamental areas of phonology, morphology, syntax, semantics, and language in use. Also, it will help students compare and contrast ASL and English structures. Additionally, it will provide students with the ability to understand how people can communicate through different kinds of systems, including languages which have several features. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 353 | FINGERSPELLING | 4 quarter hours (Undergraduate)
This course will teach the theory behind fingerspelling and will train students on how to process serial information. Students will be able to identify invisible allophones and improve their receptive fingerspelling skills. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 354 | SOCIOLINGUISTICS FOR THE DEAF COMMUNITY | 4 quarter hours (Undergraduate)
This course focuses on issues affecting the Deaf community and studies the use of ASL in society, along with policies created for and attitudes towards the Deaf community. Students will broaden their understanding of the Deaf community by engaging in discourse analysis as well as interacting with the different populations in the Deaf community. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 355 | FOREIGN LANGUAGES ACROSS CURRICULUM | 2 quarter hours (Undergraduate)
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, and signing activities in ASL. Students must have the equivalent of 106 or higher ability in ASL to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

ASL 397 | SPECIAL TOPICS IN AMERICAN SIGN LANGUAGE | 4 quarter hours (Undergraduate)
See schedule for current offerings.

ASL 399 | INDEPENDENT STUDY | 0.5-8 quarter hours (Undergraduate)
Variable credit.

ASL 499 | INDEPENDENT STUDY | 0.5-8 quarter hours (Graduate)
Variable credit.
American Studies (AMS)

AMS 102 | INTRODUCTION TO U.S. POPULAR MUSIC STUDIES | 4 quarter hours
(Undergraduate)
Popular music is a commercial, mass-mediated art form that has enormous social impact, shaping our identities, tastes, and cultural understanding in ways that are both deeply personal and more broadly political. This course introduces students to the study of popular music in a number of ways: as a form of mass-produced music with a specific industrial and social history; as a media product differentiated industrially through different genres, producers, stars, and targeted audiences; as a cultural product that both reflects and produces meaning within specific historical and social contexts; and as a source of affective investment, identity formation, community and socio-political meaning for audiences. In our examination of popular music, we will focus largely on popular music's development as a mass media form within the United States, although popular music's international influence will be acknowledged as well. Within that context, we will examine the way popular music both maintains and disrupts cultural hierarchies of class and taste, as well as often simultaneously erasing and exposing social differences and inequalities (such as those of race, ethnicity, religion, sexuality, gender, language, age, region, ability, etc). A great deal of the course will involve actively listening to and analyzing popular music in its various forms and contexts; students will examine how popular music has impacted their own lives as well as those of others. Through our analysis of the complexities of popular music, we hope to better understand the significance of the role popular music has played and continues to play in shaping the cultures in which we live.

AMS 150 | PERSPECTIVES ON AMERICAN IDENTITIES | 4 quarter hours
(Undergraduate)
This course explores a variety of perspectives on what it means to be an American in the modern world, looking through polarities such as: inclusion and exclusion, urban and suburban life, localism and globalization, high culture and mass culture, wealth and poverty, freedom and incarceration.

AMS 200 | AMERICAN SOCIAL HISTORY AND CULTURE | 4 quarter hours
(Undergraduate)
This course will provide an overview of the central themes of American History from the colonial period to the present with a focus on social, popular, and cultural history.

AMS 201 | CRITICAL AMERICAN STUDIES | 4 quarter hours
(Undergraduate)
Using a range of interdisciplinary theories and methods, this course introduces students to critical American Studies as a field of scholarship that challenges the idea of the United States as socially and politically exceptional. Required course for AMS majors and minors.

AMS 202 | UNITED STATES POPULAR MUSIC HISTORY | 4 quarter hours
(Undergraduate)
This course introduces students to the historical significance of popular music in the United States from the 1890s to the present.

AMS 211 | AMERICAN EXPERIENCE: EARLY AMERICA TO 1860 | 4 quarter hours
(Undergraduate)
This course focuses on America before the Civil War. Students will engage in project-based work that will examine a variety of texts, as well as material and visual culture in order to examine the competing themes and diverse voices that form American experience during this era. AMS 200 or HST 181 recommended, but not required prior to enrolling in this course.

AMS 213 | AMERICAN EXPERIENCE: FROM 1860 TO 1941 | 4 quarter hours
(Undergraduate)
This course focuses on America between the Civil War and World War II. Students will engage in project-based work that will examine both visual culture and literature in order to examine the competing themes and diverse voices that form American experience during this era. AMS 200 or HST 182 recommended, but not required prior to enrolling in this course.

AMS 215 | AMERICAN EXPERIENCE: FROM 1941 TO PRESENT | 4 quarter hours
(Undergraduate)
This course focuses on America from World War II to the present. The course engages students in project-based works that utilizes multiple methodologies, primary sources, a range of texts, and material and visual culture. AMS 200 or HST 183 recommended, but not required prior to enrolling in this course.

AMS 220 | AMERICAN BUDDHISMS: RACE AND RELIGIOUS DIVERSITY | 4 quarter hours
(Undergraduate)
This course critically analyzes the origins of Buddhism in the United States in order to fully understand how and why Buddhism has flourished in Asian and White American communities, and to understand the conflict and controversy surrounding the racial dynamics of religious choice.

AMS 230 | ASIAN AMERICAN HISTORIES | 4 quarter hours
(Undergraduate)
This course introduces the pre-1965 comparative histories of people of Chinese, Japanese, Korean, Indian, Filipino, and Southeast Asian ancestry from their arrival in significant numbers in the United States beginning in the 19th century. Two questions orient this course: 1) whether there is an historical validity to the category of Asian American, and if so, the extent to which the category is relevant today in light of differences across gender, sexuality, class, ethnicity, and religion, among others; and 2) how the Asian Pacific American experience challenges and redefines American race relations to provide a more complex understanding of existing structures of power. Cross-listed with AAS 200.

AMS 240 | CHICAGO HISTORY, GEOGRAPHY, AND CULTURES | 4 quarter hours
(Undergraduate)
A history of the founding and development of Chicago from a frontier village to a major industrial, commercial and cultural center. The course will provide an interdisciplinary study of Chicago, with special attention to Chicago's urban geography, built environment (i.e., housing/architecture), neighborhood shifts, and diverse cultures. Cross-listed with HST 240 and GEO 231.
AMS 248 | WHITE RACISM | 4 quarter hours  
(Undergraduate)  
This seminar is an introduction to white studies and white racism. White racism is a set of socially organized attitudes, behaviors and beliefs about differences between Blacks and other groups of color in the United States. The focus is on how the color White is constituted as dominant in social life throughout the United States and Western Europe.

AMS 250 | IN THEIR OWN VOICES: AMERICAN AUTOBIOGRAPHY | 4 quarter hours  
(Undergraduate)  
This course presents a range of American autobiographies, from different places and from times ranging from Colonial to modern. The selected authors represent varying backgrounds and races.

AMS 261 | AMERICAN ETHNICITIES 1800-1945 | 4 quarter hours  
(Undergraduate)  
This course will be an exploration of the development of American ethnic communities and identities in the 19th and early 20th centuries. Students will examine the American experience through the lens of ethnic groups and racialized ethnic populations and consider how ethnicity has shaped and influenced American history. We will study the experiences of American ethnic groups based on historical, social, and political factors such as immigration and citizenship, slavery and racialization, gender and patriarchy, religion and family, and the relationships between and among ethnic groups.

AMS 265 | PACIFIC WORLD: NORTH AMERICA AND THE PACIFIC, 1776 - 1945 | 4 quarter hours  
(Undergraduate)  
This course will examine the nature of American identity in the west. Hawaii and California represent the extreme edge of the American frontier. The focus will be on the shifting meanings of "native" and "stranger." How did the status of indigenous peoples foster a sense of identity and place for migrants? How did immigrants understand their role in the political economy? How did racial discourses on the frontier shape the shifting definitions of citizenship? How did race affect America's ambivalent approach to imperialism?.

AMS 266 | MENTAL ILLNESS IN U.S. HISTORY AND CULTURE | 4 quarter hours  
(Undergraduate)  
This course examines dominant and shifting conceptions of mental illness in the United States during the 20th and 21st centuries. We will historically contextualize the course by examining major historical changes in medical thinking about mental illness, including degenerative (eugenic), psychoanalytic, and pharmaceutical (biomedical) approaches. We will also explore the evolving medical, social and institutional management of suffering people over time, including the employment of various physical and pharmacological therapies and the roles of asylums, hospitals, prisons, community centers and public homeless? spaces as holding areas. Drawing from a wide range of scholarly sources, including history, anthropology, sociology, medicine, and interdisciplinary cultural studies areas such as Disability Studies, Madness Studies, Gender/ Sexuality Studies and Feminist Studies, and Critical Race and Ethnic Studies, we will explore how normative standards of social behavior have been used to understand and define "illness" and "health," and the various ways impacted persons have responded to and at times resisted those definitions. This class will also take an intersectional approach, underlining how integrated systems of racism, classism, homophobia, sexism, ableism and colonialism have resulted in specific kinds of trauma that have made some social groups more vulnerable to medical coercion and abuse. Finally, we will analyze the historical and present strategies that mental health and disability justice advocates have employed to enact civil rights legislation, critique the medical/ pharmacological establishment, and promote alternative forms of therapy and care. Our examination will incorporate a variety of primary source materials, including popular histories and documentary films, mass media and creative works, medical archives, social media activity, legal documents, and oral histories.

AMS 275 | HISTORY OF SEX IN AMERICA 1: COLONIAL TO LATE NINETEENTH CENTURY | 4 quarter hours  
(Undergraduate)  
This course will provide an overview of the history of American sexuality from the colonial period to the late 19th century.

AMS 276 | HISTORY OF SEX IN AMERICA 2: LATE VICTORIANS TO THE PRESENT | 4 quarter hours  
(Undergraduate)  
This course will provide an overview of the history of American sexuality from the late nineteenth century to the present. Cross-listed with HST 276.
AMS 277 | LGBTQ+ HISTORY IN THE UNITED STATES, WORLD WAR II TO THE PRESENT | 4 quarter hours  
(Undergraduate)  
This course is a historical survey of LGBTQ+ -identified people's lives in the United States from World War II (1941) to the Present. We will focus in particular on the way in which LGBTQ+ identities have developed within cultural, social, and political contexts, such as World War II, the civil rights movements of the 1950s-1970s (including the Stonewall Uprising), consumer culture and mass media, the AIDS crisis, the rise of the Religious Right, the advent of gay academic scholarship and queer/transgender identities, the political diversification of the LGBTQ+ community, gay/lesbian marriage, and the growth of LGBTQ+ internet/social media communities and practices. We will examine both the larger national narrative of LGBTQ+ history and focus on the experience of particular groups, such as gay/lesbian activists in 1970s Chicago and transgender/gay ballroom performers. The term ?LGBTQ+? in the title of the course acknowledges how the words ?gay? and ?lesbian? themselves are historically specific, and that LGBTQ+ lives are multiple, complex, and ever-shifting. Although our emphasis here is on sexual and gendered aspects of identity, we will always view subjects as intersectional and multiply-identified according to, for example, class, race, ethnicity, religion, nationality, citizenship, indigenous status, and ability. In tracing the struggle for LGBTQ+ rights and expression and the social impact of LGBTQ+ people on American political institutions, culture and citizenry, we will draw on key historical documents, oral testimonies, academic criticism and theory, journalism, advertising, and popular culture.

AMS 280 | POLITICS AND HISTORY OF THE VIETNAM WAR | 4 quarter hours  
(Undergraduate)  
This course examines both the history of American involvement in Vietnam and the lasting effect on American politics and culture.

AMS 285 | HISTORY AND U.S. POPULAR MEDIA | 4 quarter hours  
(Undergraduate)  
This course examines United States history and popular media. Depending on the instructor, it may focus on how United States history has been depicted in popular media or it may emphasize the history and development of popular media. Contact instructor for syllabus.

AMS 290 | AMERICAN VOICES: TO 1860 | 4 quarter hours  
(Undergraduate)  
Focusing on the era prior to the United States Civil War, this course provides an integrated, multidisciplinary view of American culture and ideas, addressing the questions: "What is America? What does it mean to be an American?" The courses are focused on primary sources, mostly first person narratives and fiction, developing methods for analyzing and interpreting these sources.

AMS 291 | AMERICAN VOICES: FROM 1860 ONWARD | 4 quarter hours  
(Undergraduate)  
Focusing on the era after the United States Civil War, this course provides an integrated, multidisciplinary view of American culture and ideas, addressing the questions: "What is America? What does it mean to be an American?" The courses are focused on primary sources, mostly first person narratives and fiction, developing methods for analyzing and interpreting these sources.

AMS 292 | TOPICS IN AMERICAN STUDIES THEORIES AND METHODS | 4 quarter hours  
(Undergraduate)  
Variable topics that will prepare you to integrate a range of disciplinary understandings and methods into your written and oral analyses of American culture. Consult course schedule for current listings.

AMS 293 | TOPICS IN AMERICAN MATERIAL CULTURE AND THE BUILT ENVIRONMENT | 4 quarter hours  
(Undergraduate)  
Variable topics. Consult course schedule for current listings.

AMS 294 | TOPICS IN AMERICAN POLITICS, INSTITUTIONS, AND VALUES | 4 quarter hours  
(Undergraduate)  
Variable topics. Consult course schedule for current listings.

AMS 295 | SPECIAL TOPICS IN AMERICAN STUDIES | 4 quarter hours  
(Undergraduate)  
Special Topics in American Studies. Consult schedule for topic.

AMS 296 | TOPICS IN AMERICAN POPULAR CULTURE AND MEDIA | 4 quarter hours  
(Undergraduate)  
Variable topics. Consult course schedule for current listings.

AMS 297 | TOPICS IN AMERICAN RACE AND ETHNIC STUDIES | 4 quarter hours  
(Undergraduate)  
Variable topics. Consult course schedule for current listings.

AMS 298 | TOPICS IN AMERICAN SOCIAL AND LITERARY MOVEMENTS | 4 quarter hours  
(Undergraduate)  
Variable topics. Consult course schedule for current listings.

AMS 301 | SENIOR SEMINAR | 4 quarter hours  
(Undergraduate)  
The Senior Seminar is an integrative course conducted primarily as a colloquium. Emphasis will be placed on discussion and independent research and writing.

AMS 307 | or instructor permission is a prerequisite for this class.

AMS 328 | MOBILITY & THE STATE | 4 quarter hours  
(Undergraduate)  
In this course we explore the history, culture, and politics of migration along with an examination of the expanding borders of the United States. We analyze the varied mythology of the border as a danger zone, an intermediary zone, and a place of contact and conflict. We also look to the theorizations of the border as a site of cultural exchanges, resistance and critical negotiation; interchanges that impact the construction of race, ethnicity, sexuality and gender from both sides of the border. We examine issues relating to U.S. policies of immigration and labor movements as well as the economic and political consequences of globalization along the border region. Finally, we examine how the U.S. border has shifted and changed over time, critically challenging issues of political, cultural, and legal belonging.
AMS 329 | POWER, OPPOSITION, RESISTANCE: APPROACHES TO CRITICAL RACE AND ETHNIC STUDIES | 4 quarter hours (Undergraduate)
This seminar will serve as an introduction to key issues and methods in the comparative study of ethnicity and race. The course highlights an interdisciplinary approach to the study of systematic oppression in the United States, and the global implications of these structures. We will consider how Ethnic Studies presents a progressive intellectual challenge to global and local configurations of power in the name of global justice. Among our methods will be an intersectional theoretical analysis of the identities of race, gender, class, nation, sexuality, ability and religion. Readings will cover Kimberle Crenshaw’s and others theories of intersectionality, black feminist standpoint epistemology, postcolonial theory, mestiza feminism and other critical mixed race theories, queer critical theory, settler racism and state violence, as well as creative and political movements of resistance and social change.
AMS 201 is a prerequisite for this class.

AMS 340 | AMERICAN POPULAR CULTURE: 1890s - 1930s | 4 quarter hours (Undergraduate)
Students in this course will focus on the industrial developments, cultural significance and social effects of American Popular Culture institutions and products in the United States from 1890-1930s, including the rise of corporate nationalism in live performances such as vaudeville and radio, as well as the development of mass media industries including sheet music, advertising, records, and film. Discussions will include attention to industrial practices, textual properties, and audience reception of these cultural products.

AMS 352 | SEX, GENDER AND SOCIAL MEDIA | 4 quarter hours (Undergraduate)
This course focuses on the gendered and sex/sexuality content of major social media platforms and networking sites, such as Facebook, Youtube, Twitter, Pinterest, Reddit, and tumblr. We will ground our understanding of social media platforms in the context of established scholarship on social community development, cultural and media studies, and feminist and queer (LGBTQIA) studies. Although our emphasis is on sexual and gendered aspects of identity, we will always view subjects as multiply-identified according to, most prominently, class, race, ethnicity, religion, nationality, and ability. We will examine how these platforms offer new opportunities for sexual education, sexual and erotic/romantic expression, the negotiation and exploration of sexual and gender identities, and feminist/queer media criticism, social activism, and community. We will also explore the more troubling aspects of social media, particularly its connection with global capitalism and neoliberal ideology, as well as how these platforms have provided new forums for public attacks on women and queer people.

AMS 360 | AMERICAN FILM | 4 quarter hours (Undergraduate)
Analyzes cultural and cinematic histories and film as a social practice circulating cultural values as well as critiquing ideologies. Students will gain understanding of major critical and theoretical approaches and engage in research, critical thinking, and writing on topic areas. Variable specific topics. E.g. assimilation narratives, war in film, sports in film, Asian American film.

AMS 370 | THE MATERIAL CULTURE OF MODERN AMERICA | 4 quarter hours (Undergraduate)
AMS 370 combines historical archaeology and material culture studies to examine how material goods both shape and reflect American identity in the nineteenth and twentieth centuries.

AMS 371 | MATERIAL CULTURE OF EARLY AMERICA | 4 quarter hours (Undergraduate)
Combines historical archaeology and material culture studies to examine how material goods both shape and reflect American identity in the colonial period and early nineteenth century.

AMS 380 | TELEVISION AND AMERICAN IDENTITY | 4 quarter hours (Undergraduate)
This course is about how television represents Americans and how Americans have responded to these representations. The course engages in close textual analysis of several television texts, to familiarize students with television industry narrative structures and strategies, examines several specific representational struggles, and surveys and discusses the many ways in which television viewers and fans engage with the text.

AMS 386 | ADVANCED TOPICS IN AMERICAN POPULAR CULTURE AND MEDIA | 4 quarter hours (Undergraduate)
Variable topics. Consult course schedule for current listings.

AMS 387 | ADVANCED TOPICS IN GENDER AND SEXUALITY STUDIES IN THE U.S./AMERICAS | 4 quarter hours (Undergraduate)
The focus in this course will be to use the interdisciplinary lens of gender and sexuality to gain a deeper understanding of diverse cultural landscapes within the United States and/or the Americas. The course will draw from current academic perspectives including social and cultural history, the history of medicine and psychology, legal and political history, literature, mass media and/or gender studies. Variable emphasis on particular historical periods or topics will depend on the instructor. Please consult class schedule for most current offerings. This course is repeatable when different topics are taken.

AMS 388 | ADVANCED TOPICS IN AMERICAN SOCIAL AND LITERARY MOVEMENTS | 4 quarter hours (Undergraduate)
Variable topics. Consult course schedule for current listings.

AMS 392 | INTERNSHIP | 1-4 quarter hours (Undergraduate)
Internship. Majors and minors only. Variable credit. An American Studies major or minor is a prerequisite for this class.

AMS 393 | ADVANCED TOPICS IN AMERICAN MATERIAL CULTURE AND THE BUILT ENVIRONMENT | 4 quarter hours (Undergraduate)
Variable topics. Consult course schedule for current listings.

AMS 394 | ADVANCED TOPICS IN AMERICAN POLITICS, INSTITUTIONS, AND VALUES | 4 quarter hours (Undergraduate)
Variable topics. Consult course schedule for current listings.

AMS 395 | ADVANCED TOPICS IN AMERICAN STUDIES | 4 quarter hours (Undergraduate)
Topics in American Studies.

AMS 396 | AMERICAN STUDIES COLLOQUIUM | 12.00 quarter hours (Undergraduate)
These courses involve participation in events and/or conferences on selected topics related to American culture studies. Class participants attend and participate in events, keep a reflective journal connecting the events, do related readings, and write a reflective summary on the colloquium as a whole. Variable credit.
Animation (ANI)

ANI 101 | ANIMATION FOR NON-MAJORS | 4 quarter hours
(Undergraduate)
Course introduces a variety of basic animation techniques for cinema and gaming, such as hand-drawn, cutout, stop-motion and (very basic) 3D, with an emphasis on the use of computer technology. Examples of diverse animation genres and styles (experimental, cartoon, anime, special effects, computer games) from different cultures will be screened and discussed. Students will explore the unique qualities of the medium through a series of hands-on projects that can be adapted to their own personal interests. They will learn about professional animation process (storyboard and animatic) during the production of a final project that encourages them to consider the role and potential of animation in our society.

ANI 105 | MOTION GRAPHICS FOUNDATIONS | 4 quarter hours
(Undergraduate)
This course introduces the basic principles of composition, color, light, and motion as applied to cinema and animation. Design for screen, staging, effective use of text, graphical elements, video, and motion are covered. These skills will be applied in projects that stress conceptual and technical development.

ANI 150 | AFTER EFFECTS WORKSHOP | 2 quarter hours
(Undergraduate)
This class will introduce students to the fundamentals of After Effects, including key-framing, compositing and rendering. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)

ANI 151 | ADOBE ANIMATE WORKSHOP | 2 quarter hours
(Undergraduate)
This class will introduce students to the fundamentals of creating animation using Adobe Animate, including tweening and frame-by-frame drawn animation. This class does not cover Action Script programming. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)

ANI 152 | TVPAINT WORKSHOP | 2 quarter hours
(Undergraduate)
This workshop course offers a complete basic knowledge of using TVPaint animation software to produce hand-drawn animation. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. Prerequisite(s): none (2 quarter hours)

ANI 153 | HARMONY WORKSHOP | 2 quarter hours
(Undergraduate)
This workshop course offers a complete basic knowledge of using Toon Boom Harmony animation software to produce a hand-drawn animation. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. PREREQUISITE(S): None (2 quarter hours)

ANI 154 | DIGITAL PAINTING WORKSHOP | 2-2.25 quarter hours
(Undergraduate)
This course will investigate the image making possibilities of TVPaint and Photoshop in the creation of digital paintings and animations. The principles and practice of traditional painting (oil, acrylic and watercolor) will be applied to a digital image making practice, including the use of custom made brushes, filters, opacity, layer modes and texturing tools to create realistic and abstract imagery. PREREQUISITE(S): None.

ANI 155 | CINEMA 4D WORKSHOP | 2-2.25 quarter hours
(Undergraduate)
This course focuses on Maxon's Cinema 4D, a 3D package that is the standard for 3D motion graphics and title design work. The class will include demonstrations and workshops on the fundamentals of Cinema 4D and CINEMAIL, a plugin that acts as a bridge between After Effects and C4D. Tutorial topics will include: user interface, modeling, materials, lighting, cameras, 3D type, and compositing. Examples of work done by industry professionals will be examined each week. PREREQUISITE(S): None.

ANI 201 | ANIMATION I | 4 quarter hours
(Undergraduate)
This course is an introduction to the art and practice of animation. It is a studio-based class, which will emphasize learning through process, experimentation and creation. Students will explore the limitless possibilities of animated motion in the context of cinema, computer games and the Internet. All genres and styles are within the scope of this class, including Anime, cartoons, computer game art, experimental art and special effects. In addition to how, we will also explore and discuss why, as well as the role and potential of animation in our society and its place in other cultures. This course is designed for the student who wishes to pursue further study in the field, and provides intensive practice of the basic skills and methods through production. PREREQUISITE(S): ANI 105 or ART 105 or GD 105 or DES 141.

ANI 206 | HISTORY OF ANIMATION | 4 quarter hours
(Undergraduate)
This course is an introduction to the history and development of the field of animation. We will explore this subject from various perspectives: by chronology, from its prehistory before the invention of film to the present day; by form, including method and medium; by culture, comparing the US to Japan, Russia, Europe and others; by subject; and by personality, concentrating on the figures who have shaped the art form and continue to influence it through their example. Students are expected to bring an enthusiastic interest in the medium, and to devote serious effort to reading about, viewing, researching and discussing animation and the artists who have created it.
ANI 207 | ANIME HISTORY | 4 quarter hours
(Undergraduate)
This course is an Introduction to the history, development and cultural significance of Japanese animation. We will explore how historical and cultural concepts of Japan have translated to the screen, as well as the influence of economic forces and changing technology. Students will gain an insight into anime's origins and cultural influences through an examination of the World War II, post-war, mid- and late-twentieth-century historical periods of Japan. This class will analyze particular examples of anime and anime artists in their historical context, emphasizing the use of primary sources.

ANI 220 | STORYBOARDING I | 4 quarter hours
(Undergraduate)
This class will focus primarily on storyboarding and the aesthetic and practical uses of research, treatments, drawings, and found images as tools in the production of animations, films and game cinematics. Students will complete a series of assignments that will utilize different methods of finding inspiration to make a cohesive, narrative work. Various methods used in both commercial and independent productions will be presented as examples, and pre-production work from both live action and animated films will be viewed throughout the quarter. Students will create several storyboards for short films, write treatments, and research design options.

ANI 101 or ANI 201 or FILM 101 is a prerequisite for this class.

ANI 222 | ILLUSTRATION FOUNDATIONS | 4 quarter hours
(Undergraduate)
This course will focus on improving the basic skills needed for creating concept art and storyboards for animation and games. Areas of focus include practical perspective, technical rendering, observational drawing and color theory. These skills will be applied in basic prototyping projects. PREREQUISITE(S): GD 105 or ANI 105.

ANI 225 | MAKING COMICS | 4 quarter hours
(Undergraduate)
This course introduces students to the components of graphic narrative, including superhero and alternative comics, comic strips, manga, and graphic novels. Students will learn fundamental materials and techniques, including penciling and inking, digital painting and coloring, and publishing, and create their own graphic narratives. The course will also provide an overview of the history of comics and graphic storytelling, and their relation and importance to the art of animation. PREREQUISITE(S): ART 106.

ANI 226 | TRADITIONAL MATERIALS FOR ANIMATION | 4 quarter hours
(Undergraduate)
This course will have a rotating focus on various traditional art making practices to broaden animation students' visual vocabulary beyond the digital. Students will use hands-on art making processes and strategies to explore color theory, tone, volume, texture, line quality, as well as strategies to incorporate them into their animation practice. Topics may include: collage, sculpture, puppets, fiber arts, wet or dry media on paper. Course is repeatable with different topics.

ANI 230 | 3D DESIGN & MODELING | 4 quarter hours
(Undergraduate)
Students will use computer modeling to explore the principles of 3-dimensional design. Projects involving object, character and architectural modeling will emphasize the aesthetic concepts of spatial proportion (scale, angle and position), silhouette, negative space, rhythm, balance, light/shadow and texture. Students will emerge with the ability to create well designed 3D models, and be familiar with the basics of polygonal modeling, texturing, lighting and rendering for animation, computer games and cinema. PREREQUISITE(S): None.

ANI 231 | 3D ANIMATION | 4 quarter hours
(Undergraduate)
In this course, students will be introduced to animation in 3D through the use of traditional animation principles. Topics will include: animation fundamentals, keyframing, splining, animated cameras, rendering, and an introduction to rigging basic characters. Emphasis will be placed on using the computer as a tool to create animation for film and games. PREREQUISITE(S): ANI 230.

ANI 240 | ANIMATION PRODUCTION I | 4 quarter hours
(Undergraduate)
This course will concentrate on facilitating the student's production of animation projects. The topics of idea generation, experimentation, problem solving, planning and time management, and the process of critical analysis will be applied to the student's work, with the choice of animation technique, content and form left to the individual. Students will learn the importance of bringing projects to completion. ANI 321 and (ANI 201 or ANI 101) are prerequisites for this class.

ANI 260 | MOTION GRAPHICS | 4 quarter hours
(Undergraduate)
This course will introduce the student to effective communication using motion graphics, including its application in the areas of film titles, broadcast and commercial design, interactive media, and gaming. The combination of music, visuals and typography will be explored following the basic theories of kinetic composition and aesthetics. Students will study the history of the field, including the work of pioneers such as Norman McLaren, Saul Bass and Len Lye. PREREQUISITE(S): Sophomore Standing and one of the following: ANI 105, ANI 201, GD 105, ART 105, DC 205.

ANI 300 | 3D CHARACTER ANIMATION | 4 quarter hours
(Undergraduate)
This course explores the art and techniques for character performance in 3D. Students will study and employ fundamental principles for character animation beginning with the essentials of blocking and inbetweening, and continuing with core mechanics including walk cycles, expressions, and lip sync. Students are required to animate weekly shots culminating in a final lip synced character performance. ANI 231 is a prerequisite for this class.

ANI 301 | ADVANCED 3D CHARACTER ANIMATION | 4 quarter hours
(Undergraduate)
This course introduces advanced concepts in 3D character animation that are necessary for achieving professional quality results. Students will hone their skills through the study of advanced techniques for animating multiple characters, creating continuity, and building character through performance. An emphasis will be placed on the exploration of movement for developing personal style. PREREQUISITE(S): ANI 300.

ANI 310 | MOTION CAPTURE | 4 quarter hours
(Undergraduate)
This course is a workshop focusing on realistic character motion obtained through motion capture. Students will learn the motion capture pipeline, including character skinning and mapping, planning and directing motion capture sessions, applying motion to a character and motion editing. PREREQUISITE(S): ANI 231 or GPH 338.
ANI 315 | SOUND DESIGN FOR ANIMATION | 4 quarter hours  
(Undergraduate)  
This course will explore concepts and practical techniques students need in order to address many of the unique requirements associated with creating audio for animated films. Students will begin with an introduction to the aesthetics of film sound and audio production before moving on to build practical recording and mixing skills. Lectures, readings, and practical projects will give students a working knowledge of how to approach and create the immense range of styles of audio for animated films.

ANI 320 | HAND-DRAWN ANIMATION | 4 quarter hours  
(Undergraduate)  
This course is devoted to the complex aspects and techniques of classical drawn animation required to create convincing movement, frame to frame consistency, and character acting. Beginning with a review of the fundamentals and progressing to more complicated techniques, students will learn how to create unique and technically accomplished drawn animation as well as methods for its eventual clean-up, inking and coloring. Contemporary uses of digital technology to enhance production will be emphasized. PREREQUISITE(S): ANI 201 (or ANI 101) and ART 106.

ANI 321 | ANIMATION MECHANICS | 4 quarter hours  
(Undergraduate)  
Students in this course will rigorously investigate the foundational aspects of animation through traditional and digital methods. Basic principles, including timing, spacing and the abstraction of movement, will be analyzed and questioned through experimentation. Students will experience how the process of making work can be used to generate emergent ideas, and be challenged to push the art form beyond the accepted conventions.

ANI 201 (or ANI 101) is a prerequisite for this class.

ANI 322 | ANIMATION HISTORY & PRACTICE | 4 quarter hours  
(Undergraduate)  
The history of animation is explored with a focus on inspiring the students' own work. Students will be involved in an intense study of animation throughout history and around the world, and are required to view a large amount of work outside of class. Animations will be grouped by time period, theme, and/or technique. Through writing and group discussions they will examine the significance of the technique and subject matter. They will put this study into practice by creating short animated films based on their reactions to the films. PREREQUISITE(S): ANI 240.

ANI 324 | STORYBOARDING II | 4 quarter hours  
(Undergraduate)  
Students will elaborate on the skills from ANI 220 to create sophisticated pre-production for their own films, game cinematics and animations. Emphasis is placed on advanced story development, professional artistry and pre-visualization techniques such as converting a script to visual story reals or animatics. Students will complete the course with a fully-developed animatic for the story of their choosing.

ANI 220 is a prerequisite for this class.

ANI 325 | VISUAL STORYTELLING | 4 quarter hours  
(Undergraduate)  
This class focuses on storyboarding and animatics as key pre-production tools for animation, film, and game development projects. Areas of focus include narrative development, drawing, performance, and editing. Students will apply these techniques to create an animatic: a comprehensive time-based draft for a short film. PREREQUISITE(S): ANI 240.

ANI 326 | VISUAL CONCEPT DEVELOPMENT | 4 quarter hours  
(Undergraduate)  
This course focuses on visual development and style guides for animation, cinema and game projects. Coursework involves character design, environmental design, prop design, lighting, color, texture and layout. Students will practice visual research, drawing and an array of digital tools to build the skills necessary to create an immersive world with a cohesive look and feel. PREREQUISITE(S): ILL 200 and ANI 230.

ANI 327 | HAND-DRAWN CHARACTER ANIMATION | 4 quarter hours  
(Undergraduate)  
In this course, students will be introduced to the traditional art of hand-drawn character performance. Topics covered will include acting, body mechanics, volume, weight, walk cycles, dialogue and facial expression. PREREQUISITE(S): ANI 321.

ANI 328 | ANIMATION FIGURE STUDY I | 4 quarter hours  
(Undergraduate)  
This studio class will focus on the drawing of the figure for use in animation, storyboarding, and character design. Students will gain a solid foundation in posing, gesture, and anatomy, and will learn how to give a character a sense of emotion and purpose. Students will gain experience and improve their drawing technique through weekly assignments and in-class exercises, including drawing from a live model. In addition to the regular meetings with the instructor, this course will include an extra 90 minute figure study lab with model per week, supervised by a graduate assistant.

ART 218 and (ANI 201 or ANI 101) are prerequisites for this class.

ANI 329 | STORYBOARDING III | 4 quarter hours  
(Undergraduate)  
This course elaborates on the skills from ANI 324 Story Development. Students will develop advanced techniques for storyboarding, staging, pre-production, character development and performance to support their original narrative stories. Rigorous exercises will emphasize visually dynamic composition, figure drawing applied to storyboarding, editing, continuity and sophisticated use of camera. Students will complete a final advanced storyboard and animate edited with sound, which can be used as a portfolio piece for any aspiring storyboard artist.

ANI 324 is a prerequisite for this course.

ANI 330 | 3D CHARACTER MODELING | 4 quarter hours  
(Undergraduate)  
This course will instruct students in the process of 3D polygonal based character modeling. Students will learn professional techniques for building quad-based polygon meshes with an extra emphasis on proper topology to help prepare their model for rigging. Students will learn complete UV unwrapping for the entire figure as well as effective techniques for advanced texturing. PREREQUISITE(S): ANI 230 or GPH 250.

ANI 332 | 3D RIGGING | 4 quarter hours  
(Undergraduate)  
Students will study the processes and techniques for creating professional quality character rigs. Following a professional production workflow, students will create character skeletons, learn aesthetic and technical considerations for skinning, learn techniques for optimal parameterization, and learn to construct character animation controls. PREREQUISITE(S): ANI 231.
ANI 333 | ADVANCED 3D RIGGING | 4 quarter hours
(Undergraduate)
This course will teach students inorganic rigging of vehicles and machines as well as advanced techniques for characters such as blend shape facial expression setups and squash and stretch. Additional topics will include quadruped rigging and 3D scripting for creating user interfaces and automating complex processes. PREREQUISITE(S): ANI 230 and ANI 231.

ANI 334 | VIRTUAL CINEMATOGRAPHY | 4 quarter hours
(Undergraduate)
This course introduces real world cinematic techniques within a computer graphics environment. Emphasis is placed on camera movement, composition, pacing, lighting, and aesthetics. (VFX 200 or VFX 374) and ANI 230 are prerequisites for this class.

ANI 336 | 3D MODELING STUDIO | 4 quarter hours
(Undergraduate)
Students in this course will broaden and improve their overall skill set by learning a range of modeling techniques. Students will complete several smaller projects that cover topics including speed modeling, efficient low-poly modeling, hard surface modeling, projection texturing, and advanced UV unwrapping techniques. The course will culminate in a final project in which the student will propose and complete an advanced model of their own design. PREREQUISITE(S): ANI 230 or GPH 250.

ANI 337 | ENVIRONMENT MODELING | 4 quarter hours
(Undergraduate)
This course covers the planning, production and implementation of environment models for games. The term "environment model" includes landscape, exterior architecture, interior architecture, and both organic and man-made props. Topics include visual art direction, setting mood, developing narrative and cinematic lighting strategies. After creating assets in a modeling program, students will implement them in a game engine editor to learn about game engine requirements, limitations and pipeline. Prerequisite: ANI 230.

ANI 338 | 3D ORGANIC MODELING | 4 quarter hours
(Undergraduate)
In this course students will learn to create highly detailed creatures, characters, and props for both film and games. Students will learn a variety of techniques for working with high density polygon meshes and 3D painting in order to generate detailed texture and normal maps. This course will combine a traditional approach to sculpting and a foundation in human anatomy for quick generation of concepts for 3D models. An emphasis will be placed on developing efficient pipelines to streamline the entire process from modeling to rendering. PREREQUISITE(S): ANI 230.

ANI 339 | 3D TEXTURING AND LIGHTING | 4 quarter hours
(Undergraduate)
Students will study the processes and techniques for texturing and lighting in 3D. Procedures including preparing models for texturing, creating and manipulating shading networks, laying out UV's, and painting textures will be explored. Topics in lighting will be approached from the foundation of traditional cinematography with a focus on driving both mood and story. Students will utilize complimentary skills in lighting and texturing to create high quality renders for both still and moving images.

ANI 340 | ANIMATION PRODUCTION II | 4 quarter hours
(Undergraduate)
Students will build on the skills learning in Animation Production I, and produce more ambitious projects. They will be expected to exhibit sophisticated technique, storytelling and content, and work to develop as creative artists through self-critique. The successful planning and completion of projects on time is essential.

ANI 341 | ANIMATION PRODUCTION III | 4 quarter hours
(Undergraduate)
This course asks students to create a short animated film. Students are expected to demonstrate a high level of technical skill with animation and to exhibit maturity in concept development and storytelling. Successful planning and project management is critical.

ANI 342 | 3D ANIMATION PRODUCTION | 4 quarter hours
(Undergraduate)
In this course, students will build on their skills from Animation Production I to create animated films in 3D. Students will learn the essentials of 3D production including; creating 3D animations, setting up production pipelines, and using efficient techniques for modeling, rigging, and animating. Workflows for both individual and collaborative projects will be introduced. Students will be expected to exhibit sophisticated technique, storytelling and content, and work to develop as creative artists through self-critique. The successful planning and completion of projects on time will be an essential focus of the course. PREREQUISITE(S): ANI 220, ANI 231, and ANI 240.

ANI 343 | 3D ANIMATION FOR GAMES & CINEMATICS | 4 quarter hours
(Undergraduate)
In this course students will learn how to apply their animation skills for real-time interactive game development while simultaneously improving their knowledge of body mechanics and animation techniques. Students will learn how to develop core playable-character game animations such as run cycles and attacks, as well as how to implement these animations into a game engine and adjust parameters to achieve a finalized performance. Additional focus will be on learning to create cinematic shots centered around driving story and introducing important gameplay concepts.

ANI 344 | VISUAL DESIGN FOR GAMES | 4 quarter hours
(Undergraduate)
The stages of development in the visual direction of a video game will be identified and detailed, and students will participate in the creation of the visual art direction of a product, giving special attention to the design of 3D models and animation. Visual Design for Games topics include: creating visual direction, conceptualing, art bibles, art production, and post-production strategies. Students will create proposals, create concepts, iteratively create artwork, and analyze competitive products.

ANI 230 and (ANI 105 or GD 105 or ART 105) are prerequisites for this class.

ANI 345 | CHARACTER DESIGN | 4 quarter hours
(Undergraduate)
Students will be introduced to various methods of creating interesting and original character designs for animated films and games, and then put these approaches into practical use. Methods of creative conceiving will include drawing, collage, sculpture and 3D mock-ups. Fundamental visual design and color principles will be stressed, along with the basics of caricature. Students will utilize their character designs in an animated short. PREREQUISITE(S): ANI 230.
ANI 346 | GAME ART PIPELINE | 4 quarter hours
(Undergraduate)
This course is an overview of the game Technical Artist's job, from production to infrastructure roles. Students learn how to design, optimize, and troubleshoot the game art production pipeline. They study a range of game art technologies from particle effects, camera post-processing, physically-based materials, advanced lighting, procedural world creation and more in the Unity game engine. Projects include building a shared game project using Perforce (source control) workflow, analyzing game performance, building and troubleshooting character rigs, and more. ANI 230 and ANI 231 are prerequisites for this class.

ANI 347 | ART FOR GAME MODS | 4 quarter hours
(Undergraduate)
In this course, students will build on their skills from 3D Design & Modeling and 3D Environment Modeling to take an existing game in Unity and "re-skin" or modify it to create a different visual experience when played. They will work on collaborative projects while building good working knowledge of 3D art pipeline, materials, lighting, and game performance. They will be expected to exhibit proficiency in analyzing and understanding how game assets are constructed, breaking down and replacing components of existing art with their own, and debugging visual issues related to the introduction of new game assets. PREREQUISITE(S): ANI 230, ANI 337, and Junior standing.

ANI 348 | ANIMATION FIGURE STUDY II | 4 quarter hours
(Undergraduate)
This studio course utilizing a live model will build on the solid foundation for use in animation, storyboarding, and character design learned in Animation Figure Study I. Principles covered will include tilt and twist, flow, and rhythm in figure drawings. The composition of the poses will also be examined observing the graphic value of the figure in silhouettes. Students will gain a working knowledge of muscular and skeletal anatomy, and apply this in building human forms from both observation and imagination. In addition to the regular meetings with the instructor, this course will include an extra 90 minute figure study lab with model per week, supervised by a graduate assistant. ANI 328 is a prerequisite for this class.

ANI 350 | ANIMATION PRODUCTION STUDIO | 4 quarter hours
(Undergraduate)
This course uses the animation studio model to create a group project from start to finish. Students learn about the division of labor needed to produce larger projects as they experience working with others on a team. PREREQUISITE(S): ANI 240.

ANI 351 | ADVANCED MOTION CAPTURE STUDIO | 4 quarter hours
(Undergraduate)
This course will enable students with motion capture experience to advance their technical skills and gain experience with practical application in the motion capture studio. Emphasis will be placed on advanced skinning and mapping techniques as well as complex motion capture sessions involving sets, props, and multiple actors. Students will be required to plan, arrange, and direct their own sessions in the motion capture studio. PREREQUISITE(S): ANI 310 or ANI 450.

ANI 352 | 3D SCRIPTING | 4 quarter hours
(Undergraduate)
This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface. PREREQUISITE(S): ANI 230 and ANI 231.

ANI 353 | ADVANCED 3D SCRIPTING | 4 quarter hours
(Undergraduate)
In this course, artists and game designers will learn to use scripting to develop advanced tools and to automate complex processes for animation, modeling, and pipeline development. Through weekly projects students will learn to read, modify, and author scripts in order to bridge the artistic and technical features of a high end 3D software package. PREREQUISITE(S): ANI 352.

ANI 355 | STOP MOTION ANIMATION | 4 quarter hours
(Undergraduate)
The principles of stop motion character animation in real space are the emphasis of this intermediate level course. Students are introduced to basic armature building, lighting and scene composition, and the designing and fabrication of characters with a variety of materials. Contemporary uses of digital technology to enhance stop motion production will be explored. PREREQUISITE(S): ANI 251 or (ANI 101)

ANI 356 | EXPERIMENTAL ANIMATION | 4 quarter hours
(Undergraduate)
This course introduces strategies for an experimental approach to animation. Students will study how experimentation relates to both concept and technique, and examine the work of classic experimental animators. This is a production class that requires students to produce a series of short animations in a variety of processes and styles. PREREQUISITE(S): ANI 201 or ANI 101.

ANI 357 | HYBRID ANIMATION | 4 quarter hours
(Undergraduate)
This production course focuses on combining multiple animation techniques. Students will complete the assignments and final project using mixed media with the choice of animation techniques, content and form left to the individual or group. Topics include pixilation, rotoscoping, and creative use of green screen, among others. PREREQUISITE(S): ANI 201 or ANI 101.

ANI 358 | ADVANCED STOP MOTION ANIMATION | 4 quarter hours
(Undergraduate)
In this course, students will build on their skills from Stop Motion Animation to create more ambitious projects. Techniques will cover complex puppets, detailed character performance to dialogue, 3D printing as applied to animation, lighting and motion control operation for camera moves. An emphasis will be placed on craftsmanship and effectively combining elements for stop motion filmmaking. PREREQUISITE(S): ANI 355.

ANI 360 | 3D MOTION GRAPHICS | 4 quarter hours
(Undergraduate)
This course builds on motion graphics fundamentals covered in ANI260 Motion Graphics. In 3D Motion Graphics, students will work to develop a better understanding of how to develop a distinct visual style in both personal work and in work for clients. The course also focuses on gaining familiarity with contemporary styles and trends in professional motion graphics, and an awareness of Chicago-based motion graphics production. ANI 230 or ANI 260 or VFX 200 is a prerequisite for this class.
ANI 362 | TITLE DESIGN | 4 quarter hours  
(Undergraduate)  
This course explores the relationship between film and typography through an analysis of title design production in film, television, animation, and games. By studying examples from film and television history and the creative process behind those productions, students will develop an understanding of how to interpret and use typography to create narrative exposition on screen. Students will gain an appreciation and skill for working with text, image, and sound within time-based media that will add value, clarity, and sophistication to multimedia projects.

ANI 363 | CINEMA AND ART FOR ANIMATORS | 4 quarter hours  
(Undergraduate)  
This course will provide an overview of avant-garde film, video, and installation, and their relation to animation. Students will be introduced to the major styles and themes of alternative and experimental moving image work from the past hundred years. Cinema and Art for Animators places emphasis on moving image work that is not usually included in a survey of mainstream cinema or film history. Topics covered in the class include the avant-garde and kitsch, surrealism, experimental film, abstract animation, video art, camp, and video installation. In addition to readings, lectures and viewing films, videos, and installations, students will produce several animation projects that respond to the works and themes studied during the quarter.

ANI 364 | ANIMATION RESEARCH SEMINAR | 4 quarter hours  
(Undergraduate)  
This seminar introduces students to animation in the context of interdisciplinary thinking and creativity. Students will discuss their learning experiences across disciplines in the University, and practice making connections between this learning and their study of animation. PREREQUISITE(S): None.

ANI 365 | CINEMA, ANIMATION, AND ART | 4 quarter hours  
(Undergraduate)  
This seminar course focuses on animation and cinema from the standpoint of Modern and Contemporary art. Students study the major styles and themes of historical experimental film and video, and relate these topics to contemporary animation and independent cinema practices. Emphasis is placed on theory and criticism, and how it informs experimental work. Students are expected to discuss work and theory in a seminar setting, and to engage the class material in several research papers. PREREQUISITE(S): DC 233.

ANI 366 | 3D MOVIE PRODUCTION | 4 quarter hours  
(Undergraduate)  
This course provides an introduction to stereoscopy which is the creation of a 3D effect in still images and movies. The course covers the history of stereoscopy, the perceptual theories that make 3D images possible, and the technologies that can be used to create the effect of stereoscopic depth. Designed for both animators and live-action filmmakers, students taking this course will get hands-on experience producing stereoscopic images and movies using a variety of tools. PREREQUISITE(S): ANI 230 or DC 275.

ANI 370 | ACTING FOR ANIMATORS | 4 quarter hours  
(Undergraduate)  
This is acting training designed specifically for the needs of animators, as opposed to stage actors. Utilizing lecture/discussion, examination/ deconstruction of animated and live-action film clips, home assignments and a few simple in-class improvisations, this course provides the animator with the skills necessary to deliver dynamic animated character performance. Assessment measures include oral and written reflective analysis, short animated character sketches and class participation. PREREQUISITE(S): ANI 240.

ANI 371 | ANIMATED SERIES DEVELOPMENT | 4 quarter hours  
(Undergraduate)  
This course covers the preparation and development of an animated series pitch bible. Students will explore and critique successful and unsuccessful series pitches, and become familiar with the variety of options. Topics covered will include the artist-run show, world building, cast character development and design, show visual design, sample stories, and possible venues. Students will develop their own original show concept, characters, and sample stories. By the end of the quarter students will produce and pitch a presentable show bible for their series, including character designs, storyboards, and a sample pitch. If short that might be presented for an open call by a network.

ANI 372 | ANIMATED SERIES DEVELOPMENT | 4 quarter hours  
(Undergraduate)  
This course covers the preparation and development of an animated series pitch bible. Students will explore and critique successful and unsuccessful series pitches, and become familiar with the variety of options. Topics covered will include the artist-run show, world building, cast character development and design, show visual design, sample stories, and possible venues. Students will develop their own original show concept, characters, and sample stories. By the end of the quarter students will produce and pitch a presentable show bible for their series, including character designs, storyboards, and a sample pitch. If short that might be presented for an open call by a network.

ANI 375 | PROFESSIONAL PRACTICE FOR ANIMATORS AND GAME ARTISTS | 2 quarter hours  
(Undergraduate)  
Students will learn to prepare for and identify internship, employment, and graduate school opportunities. Students learn how to develop work for and prepare a portfolio/demo reel. The course will also include preparation of job search and promotional materials, including resumes. PREREQUISITE(S): ANI 240 or GAM 245 or DC 310 (2 quarter hours)

ANI 376 | POST-PRODUCTION WORKSHOP | 2 quarter hours  
(Undergraduate)  
This 2 credit course guides students through the final stages of post-production and completes the Animation Capstone sequence. Students will work closely with faculty to meet the needs specific to their Capstone projects. This workshop will also focus on distribution for completed films, including film festivals, online forums, and gallery exhibition. PREREQUISITE(S): ANI 395 (2 quarter hours)

ANI 377 | 3D DYNAMICS | 4 quarter hours  
(Undergraduate)  
This course will provide an introduction to dynamic simulation and effects in 3D animation. Topics to be covered include hair & fur, fluid dynamics, smoke & fire, particles and cloth. An emphasis will be placed on how these effects can enhance an idea or narrative, establish mood, or even be used as a basis for experimental animation. Students will use traditional animation and visual design principles as a basis for creating several small projects. PREREQUISITE(S): ANI 230 and ANI 231.

ANI 378 | 3D COMPOSITING | 4 quarter hours  
(Undergraduate)  
This course is designed to allow advanced compositors and animators to merge the 2D, 3D and/or live-action video worlds, drawing from a combination of techniques such as motion tracking, compositing, rotoscoping, hand-drawn, cut-out and 3D animation. The goals are to go beyond simply achieving technical proficiency, as we will also focus on learning principles of good animation in preparation for both artistic and commercial endeavors. PREREQUISITE(S): ANI 231.

ANI 380 | ANIMATION PROJECT BLUELIGHT | 4 quarter hours  
(Undergraduate)  
Production of an animated digital motion picture written by students or faculty within the School of Cinematic Arts. Students will work as crew under supervision of faculty members heading each of the various production areas. The goal is to work towards a completed animated digital motion picture suitable for festivals or distribution.
ANI 382 | DIGITAL PUPPET ANIMATION | 4 quarter hours  
(Undergraduate)  
This class will introduce advanced production pipelines and techniques of 2D digital puppeting, with a focus on industry-standard software such as After Effects, Animate, and Harmony. Students will learn the evolution of puppet animation throughout history, the basics of visual design, rigging, and animating specific to 2D puppeted characters. Lectures and creative projects will give students the practical knowledge to create an organized workflow. Resulting in the ability to work independently and collaboratively to create well-designed and animated 2D puppet animation.  
ANI 201 (or ANI 101) is a prerequisite for this class.

ANI 390 | TOPICS IN ANIMATION | 4 quarter hours  
(Undergraduate)  
Advanced study in animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 101 or ANI 201 or consent of the instructor.

ANI 393 | TOPICS IN 3D ANIMATION | 4 quarter hours  
(Undergraduate)  
Advanced study in 3D animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 230 or consent of the instructor.

ANI 394 | ANIMATION PROJECT I | 4 quarter hours  
(Undergraduate)  
This production-based course is the first half of a two-course sequence that provides the student with an Animation capstone experience. These courses connect the student's Animation coursework with their overall Liberal Studies coursework through three components: class lectures and discussions, independent analysis and reflection, and the creation of a significant animation project. Students will employ the knowledge they have learned and the skills they have acquired in all their Animation courses to date to produce a significant animation project. The course sequence is designed to be taken in two consecutive quarters. PREREQUISITE(S): ANI 341 or (ANI 340 and BFA Animation - Storyboarding and Character Design concentration) or (ANI 342 and BFA Animation-Game Art concentration)

ANI 396 | ANIMATION CAPSTONE WORKSHOP | 2-2.25 quarter hours  
(Undergraduate)  
This course allows students additional time to work with faculty on their Animation Capstone projects. Students will employ the knowledge they have learned and the skills they have acquired in all their Animation courses to date to produce a significant animation project. The course is only available to students enrolled in Animation Capstone courses ANI 394 and ANI 395. PREREQUISITE(S): Must be concurrently enrolled in ANI 394 or ANI 395.

ANI 394 or ANI 395 is a co-requisite for this class.

ANI 399 | INDEPENDENT STUDY | 1-8 quarter hours  
(Undergraduate)  
Independent study form and consent of instructor required. PREREQUISITE(S): Consent of dean. (Variable credit)

ANI 420 | HAND-DRAWN ANIMATION | 4 quarter hours  
(Graduate)  
This course is devoted to the complex aspects and techniques of classical drawn animation required to create convincing movement, frame to frame consistency, and character acting. Beginning with a review of the fundamentals and progressing to more complicated techniques, students will learn how to create unique and technically accomplished drawn animation as well as methods for its eventual cleanup, inking and coloring. Contemporary uses of digital technology to enhance production will be emphasized. PREREQUISITE(S): ANI 201 (or ANI 101)

ANI 421 | ANIMATION MECHANICS | 4 quarter hours  
(Graduate)  
Students in this course will rigorously investigate the foundational aspects of animation through traditional and digital methods. Basic principles, including timing, spacing and the abstraction of movement, will be analyzed and questioned through experimentation. Students will experience how the process of making work can be used to generate emergent ideas, and be challenged to push the art form beyond the accepted conventions. PREREQUISITE(S): None.

ANI 422 | ANIMATION HISTORY & PRACTICE | 4 quarter hours  
(Graduate)  
The history of animation is explored with a focus on inspiring the students' own work. Students will be involved in an intense study of animation throughout history and around the world, and are required to view a large amount of work outside of class. Animations will be grouped by theme and technique through writing and group discussions they will examine the significance of the technique and subject matter. They will put this study into practice by creating short animated films based on their reactions to the films. PREREQUISITE(S): None.

ANI 423 | 3D ANIMATION SURVEY | 4 quarter hours  
(Graduate)  
This course is intended as an intensive overview for graduate students with NO prior 3D experience. Topics include polygonal modeling tools, texturing, principles of 3D animation, basic rigging, camera, lighting and rendering. Animation graduate students with proof of previous 3D experience should consult their advisor to substitute any Major Elective for this course. PREREQUISITE(S): None.
ANI 425 | STORYBOARDING I | 4 quarter hours
(Graduate)
This class focuses on storyboarding and animatics as key pre-production tools for animation, film, and game development projects. Areas of focus include narrative development, drawing, performance, and editing. Students will apply these techniques to create an animatic: a comprehensive time-based draft for a short film.

ANI 426 | VISUAL CONCEPT DEVELOPMENT | 4 quarter hours
(Graduate)
This course focuses on visual development and styles guides for animation, cinema, and game projects. Coursework involves character design, environmental design, prop design, lighting, color, texture and layout. Students will practice visual research, drawing, and an array of digital tools to build the skills necessary to create an immersive world with a cohesive look and feel. PREREQUISITE(S): None.

ANI 427 | HAND-DRAWN CHARACTER ANIMATION | 4 quarter hours
(Graduate)
In this course, students will be introduced to the traditional art of hand-drawn character performance. Topics will include acting, body mechanics, volume, weight, walk cycles, dialogue and facial expression. PREREQUISITE(S): ANI 421.

ANI 428 | ANIMATION FIGURE STUDY I | 4 quarter hours
(Graduate)
This studio class will focus on the drawing of the figure for use in animation, storyboarding, and character design. Students will gain a solid foundation in posing, gesture, and anatomy, and will learn how to give a character a sense of emotion and purpose. Students will gain experience and improve their drawing technique through weekly assignments and in-class exercises, including drawing from a live model. In addition to the regular meetings with the instructor, this course will include an extra 90 minute figure study lab with model per week, supervised by a graduate assistant.

ANI 429 | STORYBOARDING III | 4 quarter hours
(Graduate)
This course elaborates on the skills from Storyboarding II. Students will develop advanced techniques for storyboarding, staging, pre-production, character development and performance to support their original narrative stories. Rigorous exercises will emphasize visually dynamic composition, figure drawing applied to storyboarding, editing, continuity and sophisticated use of camera. Students will complete a final advanced storyboard and animated edited with sound, which can be used as a portfolio piece for any aspiring storyboard artist.

ANI 465 is a prerequisite for this class.

ANI 430 | 3D CHARACTER ANIMATION | 4 quarter hours
(Graduate)
This course explores the art and techniques for character performance in 3D. Students will study and employ fundamental principles for character animation beginning with the essentials of blocking and inbetweening, and continuing with core mechanics including walk cycles, expressions, and lip sync. Students are required to animate weekly shots culminating in a final lip synced character performance. PREREQUISITE(S): ANI 423.

ANI 431 | ADVANCED 3D CHARACTER ANIMATION | 4 quarter hours
(Graduate)
This course introduces advanced concepts in 3D character animation that are necessary for achieving professional quality results. Students will hone their skills through the study of advanced techniques for animating multiple characters, creating continuity, and building character through performance. An emphasis will be placed on the exploration of movement for developing personal style. PREREQUISITE(S): ANI 300 or ANI 430.

ANI 432 | 3D RIGGING | 4 quarter hours
(Graduate)
Students will study the processes and techniques for creating professional quality character rigs. Following a professional production workflow, students will create character skeletons, learn aesthetic and technical considerations for skinning, learn techniques for optimal parametrization, and learn to construct character animation controls. ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 433 | ADVANCED 3D RIGGING | 4 quarter hours
(Graduate)
This class will teach students to rig organic and inorganic objects. Students will learn to rig a "stretchy spine" along with a more detailed facial set up for a character. Other topics will include inorganic object rigging, quadruped rigging and the use of 3D scripting in rigging. ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 434 | VIRTUAL CINEMATOGRAPHY | 4 quarter hours
(Graduate)
This course introduces real world cinematic techniques within a computer graphics environment. Emphasis is placed on camera movement, composition, pacing, lighting, and aesthetics. ANI 423 is a prerequisite for this course.

ANI 435 | 3D CHARACTER MODELING | 4 quarter hours
(Graduate)
This course will instruct students in the process of 3D polygonal based character modeling. Students will learn professional techniques for building quad-based polygon meshes with an extra emphasis on proper topology to help prepare their model for rigging. Students will learn complete UV unwrapping for the entire figure as well as effective techniques for advanced texturing. ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 436 | 3D MODELING STUDIO | 4 quarter hours
(Graduate)
Students in this course will broaden and improve their overall skill set by learning a range of modeling techniques. Students will complete several smaller projects that cover topics including speed modeling, efficient low-poly modeling, hard surface modeling, projection texturing, and advanced UV unwrapping techniques. The course will culminate in a final project in which the student will propose and complete an advanced model of their own design. ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.
ANI 437 | ENVIRONMENT MODELING | 4 quarter hours  
(Graduate)  
This course covers the planning, production and implementation of environment models for games. The term "environment model" includes landscape, exterior architecture, interior architecture, and both organic and man-made props. Topics include visual art direction, setting mood, developing narrative and cinematic lighting strategies. After creating assets in a modeling program, students will implement them in a game engine editor to learn about game engine requirements, limitations and pipeline.

ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 438 | 3D ORGANIC MODELING | 4 quarter hours  
(Graduate)  
In this course students learn a variety of modeling tools specially geared toward creating highly detailed and complex organic models for games or films. Various sculpting and texturing techniques available in organic modeling will be discussed as well as proper UV and polygon modeling methods. Students will also gain an understanding of how to build proper human anatomy structures. Students will learn how to create a proper art pipeline between modeling, sculpting, texturing and rendering software packages.

ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 439 | 3D TEXTURING AND LIGHTING | 4 quarter hours  
(Graduate)  
Students will study the processes and techniques for creating shaders and lighting setups for both cinematic and gaming environments. Techniques in UV mapping and projection mapping will be explored for both environments and character creation. Lighting will be approached from the foundation of traditional cinematography. Additional topics, including negative lighting and global illumination, will also be covered. PREREQUISITE(S): ANI 423 or Equivalent 3D Experience.

ANI 440 | COLLABORATIVE SHORT ANIMATED FILM | 4 quarter hours  
(Graduate)  
Students will work in small groups to produce short animated films from concept to completion using the media of their choice. Emphasis is placed on a collaborative environment for pitching ideas, visual development and creative problem-solving during production. Different studio methodologies and techniques will be discussed. Each team will face various technical and aesthetic challenges to complete a finished film.

ANI 231 (or ANI 453) is a prerequisite for this class.

ANI 441 | CHARACTER DESIGN | 4 quarter hours  
(Graduate)  
In this course, students will create animated films in 3D. Students will learn the essentials of 3D production including; creating 3D animations, setting up production pipelines, and using efficient techniques for modeling, rigging, and animating. Workflows for both individual and collaborative projects will be introduced. Students will be expected to exhibit sophisticated technique, storytelling and content, and work to develop as creative artists through self-critique. The successful planning and completion of projects on time will be an essential focus of the course. PREREQUISITE(S): ANI 423 and ANI 425.

ANI 442 | 3D ANIMATION PRODUCTION | 4 quarter hours  
(Graduate)  
In this course students will learn how to apply their animation skills for real-time interactive game development while simultaneously improving their knowledge of body mechanics and animation techniques. Students will learn how to develop core playable-character game animations such as run cycles and attacks, as well as how to implement these animations into a game engine and adjust parameters to achieve a finalized performance. Additional focus will be on learning to create cinematic shots centered around driving story and introducing important gameplay concepts.

ANI 423 is a prerequisite for this course.

ANI 443 | 3D ANIMATION FOR GAMES & CINEMATICS | 4 quarter hours  
(Graduate)  
In this course students will learn how to develop core playable-character game animations such as run cycles and attacks, as well as how to implement these animations into a game engine and adjust parameters to achieve a finalized performance. Additional focus will be on learning to create cinematic shots centered around driving story and introducing important gameplay concepts.

ANI 423 is a prerequisite for this course.

ANI 444 | VISUAL DESIGN FOR GAMES | 4 quarter hours  
(Graduate)  
The stages of development in the visual direction of a video game will be identified and detailed, and students will participate in the creation of the visual art direction of a product, giving special attention to the design of 3D models and animation. Visual Design for Games topics include: creating visual direction, concepting, art bibles, art production, and post-production strategies. Students will create proposals, create concepts, iteratively create artwork, and analyze competitive products. PREREQUISITE(S): ANI 446, ANI 425, ANI 105, GD 105, GPH 211 or ART 105 (or equivalent 2D design experience)

ANI 445 | CHARACTER DESIGN | 4 quarter hours  
(Graduate)  
Students will be introduced to various methods of creating interesting and original character designs for animated films and games, and then put these approaches into practical use. Methods of creative concepting will include drawing, collage, sculpture and 3D mock-ups. Fundamental visual design and color principles will be stressed, along with the basics of caricature. Students will utilize their character designs in an animated short.

ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 446 | GAME ART PIPELINE | 4 quarter hours  
(Graduate)  
This course is an introduction to the game technical artist's job. Students learn how to design, engineer, and troubleshoot the game art production pipeline. They study good practices and successful strategies for streamlining at different stages of production process. Projects include analyzing problems and then specifying out solutions, creating a workflow for producing and exporting assets to several platforms/ engines, and creating instructional documentation.

ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 447 | ART FOR GAME MODS | 4 quarter hours  
(Graduate)  
In this course, students will take an existing game in Unity and modify it to create a different visual experience when played. They will work on collaborative projects while building good working knowledge of 3D art pipeline, materials, lighting, and game performance. They will be expected to exhibit proficiency in analyzing and understanding how game assets are constructed, breaking down and replacing components of existing art with their own, and debugging visual issues related to the introduction of new game assets. PREREQUISITE(S): ANI 446 or ANI 444.
ANI 448 | ANIMATION FIGURE STUDY II | 4 quarter hours
(Graduate)
This studio course utilizing a live model will build on the solid foundation for use in animation, storyboarding, and character design learned in Animation Figure Study I. Principles covered will include tilt and twist, flow, and rhythm in figure drawings. The composition of the poses will also be examined observing the graphic value of the figure in silhouettes. Students will gain a working knowledge of muscular and skeletal anatomy, and apply this in building human forms from both observation and imagination. In addition to the regular meetings with the instructor, this course will include an extra 90 minute figure study lab with model per week, supervised by a graduate assistant.
ANI 428 is a prerequisite for this class.

ANI 450 | MOTION CAPTURE | 4 quarter hours
(Graduate)
This course is a workshop focusing on realistic character motion obtained through motion capture. Students will learn the motion capture pipeline, including character skinning and mapping, planning and directing motion capture sessions, applying motion to a character and motion editing.
ANI 231 or GPH 438 or ANI 423 or equivalent experience is a prerequisite for this class.

ANI 451 | ADVANCED MOTION CAPTURE STUDIO | 4 quarter hours
(Graduate)
This course will enable students with motion capture experience to advance their technical skills and gain experience with practical application in the motion capture studio. Emphasis will be placed on advanced skinning and mapping techniques as well as complex motion capture sessions involving sets, props, and multiple actors. Students will be required to plan, arrange, and direct their own sessions in the motion capture studio. PREREQUISITE(S): ANI 310 or ANI 450.

ANI 452 | 3D SCRIPTING | 4 quarter hours
(Graduate)
This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface.
ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 453 | ADVANCED 3D SCRIPTING | 4 quarter hours
(Graduate)
This is an intermediate course in scripting for a 3D production environment. Students will go beyond the introductory course to learn more advanced scripting techniques and practices. Students will learn how to assess a problem/opportunity in the production pipeline, spec out tools, build an effective tool and produce simple interfaces.
PREREQUISITE(S): ANI 452.

ANI 455 | STOP MOTION ANIMATION | 4 quarter hours
(Graduate)
The principles of stop motion character animation in real space are the emphasis of this intermediate level course. Students are introduced to basic armature building, lighting and scene composition, and the designing and fabrication of characters with a variety of materials. Contemporary uses of digital technology to enhance stop motion production will be explored. PREREQUISITE(S): ANI 201 (or ANI 101)

ANI 456 | EXPERIMENTAL ANIMATION | 4 quarter hours
(Graduate)
This course introduces strategies for an experimental approach to animation. Students will study how experimentation relates to both concept and technique, and examine the work of classic experimental animators. This is a production class that requires students to produce a series of short animations in a variety of processes and styles.
PREREQUISITE(S): ANI 201 or ANI 101.

ANI 457 | HYBRID ANIMATION | 4 quarter hours
(Graduate)
This production course focuses on combining multiple animation techniques. Students will complete the assignments and final project using mixed media with the choice of animation techniques, content and form left to the individual or group. Topics include pixilation, rotoscoping, and creative use of green screen, among others. PREREQUISITE(S): ANI 421.

ANI 458 | ADVANCED STOP MOTION ANIMATION | 4 quarter hours
(Graduate)
In this course, students will build on their skills from Stop Motion Animation to create more ambitious projects. Techniques will cover complex puppets, detailed character performance to dialogue, 3D printing as applied to animation, lighting and motion control operation for camera moves. An emphasis will be placed on craftsmanship and effectively combining elements for stop motion filmmaking. PREREQUISITE(S): ANI 455.

ANI 460 | ANIMATION GRADUATE SEMINAR | 4 quarter hours
(Graduate)
This seminar will explore the animator’s role in contemporary culture, including careers in entertainment, art, game development and education. A combination of guest speakers, critical readings, animation analysis and group discussion will help students lay a foundation for their graduate study in the field.

ANI 461 | MOTION GRAPHICS | 4 quarter hours
(Graduate)
This course introduces effective communication using motion graphics; including its application in the areas of film titles, broadcast and commercial design, interactive media, and gaming. The combination of music, animation, graphic design and typography will be explored following the basic theories of dynamic composition and aesthetics. A focus and analysis on Motion Graphics History, including abstract film, modernist television, computer art, synesthesia, and film title design, will be coupled with animation and design exercises, and simulated concept "pitch" presentations. An emphasis is placed on gaining familiarity with contemporary styles and trends in professional motion graphics, as well as state-of-the-art software and tools. Readings and responses will be due each week in addition to practical projects. Projects will include: 3 short fundamental exercises, a concept development and pitch presentation, a film title design project, and a 7-10 page research paper.

ANI 462 | TITLE DESIGN | 4 quarter hours
(Graduate)
This course explores the relationship between film and typography through an analysis of title design production in film, television, animation, and games. By studying examples from film and television history and the creative process behind those productions, students will develop an understanding of how to interpret and use typography to create narrative exposition on screen. Students will gain an appreciation and skill for working with text, image, and sound within time-based media that will add value, clarity, and sophistication to multimedia projects.
ANI 463 | 3D MOTION GRAPHICS | 4 quarter hours
(Graduate)
This course builds on motion graphics fundamentals covered in ANI 461 Motion Graphics. In 3D Motion Graphics, students will work to develop a better understanding of how to develop a distinct visual style in both personal work and in work for clients. The course also focuses on gaining familiarity with contemporary styles and trends in professional motion graphics, and an awareness of Chicago-based motion graphics productions. Students will also give a 30 minute teaching presentation on an assigned topic. PREREQUISITE(S): ANI 461.

ANI 465 | STORYBOARDING II | 4 quarter hours
(Graduate)
Students will elaborate on the skills from core storyboarding to create sophisticated pre-production for their own films, game cinematics and animations. Emphasis is placed on advanced story development, professional artistry and pre-visualization techniques such as converting a script to visual story reels or animatics. Students will complete the course with a fully-developed animatic for the story of their choosing. ANI 425 is a prerequisite for this class.

ANI 466 | CINEMA, ANIMATION AND ART | 4 quarter hours
(Graduate)
This seminar course focuses on animation and cinema from the standpoint of Modern and Contemporary art. Students study the major styles and themes of historical experimental film and video, and relate these topics to contemporary animation and independent cinema practices. Emphasis is placed on theory and criticism, and how it informs experimental work. Students are expected to discuss work and theory in a seminar setting, and to engage the class material in several research papers.

ANI 470 | ACTING FOR ANIMATORS | 4 quarter hours
(Graduate)
This is acting training designed specifically for the needs of animators, as opposed to stage actors. Utilizing lecture/discussion, examination/deconstruction of animated and live-action film clips, home assignments and a few simple in-class improvisations, this course provides the animator with the skills necessary to deliver dynamic animated character performance. Assessment measures include oral and written reflective analysis, short animated character sketches and class participation. PREREQUISITE(S): 421.

ANI 471 | ANIMATED SERIES DEVELOPMENT | 4 quarter hours
(Graduate)
This course covers the preparation and development of an animated series pitch bible. Students will explore and critique successful and unsuccessful series pitches, and become familiar with the variety of options. Topics covered will include the artist-run show, world building, cast character development and design, show visual design, sample stories, and possible venues. Students will develop their own original show concept, characters, and sample stories. By the end of the quarter students will produce and pitch a presentable show bible for their series, including character designs, storyboards, and a sample pitch animated or short that might be presented for an open call by a network. ANI 425 is a prerequisite for this class.

ANI 475 | 3D DYNAMICS | 4 quarter hours
(Graduate)
This course will provide an introduction to dynamic simulation and effects in 3D animation. Topics to be covered include hair and fur, fluid dynamics, smoke and fire, particles, and cloth. An emphasis will be placed on how these effects can enhance an idea or narrative, establish mood, or even be used as a basis for experimental animation. Students will use traditional animation and visual design principles as a basis for creating several small projects. ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 479 | 3D COMPOSITING | 4 quarter hours
(Graduate)
This class is designed to allow advanced compositors and animators to merge the 2D, 3D and/or live-action video worlds, drawing from a combination of techniques such as motion tracking, compositing, rotoscoping, hand-drawn, cut-out and 3D animation. The goals are to go beyond simply achieving technical proficiency, as we will also focus on learning principles of good animation in preparation for both artistic and commercial endeavors. ANI 231 or ANI 423 or equivalent experience is a prerequisite for this class.

ANI 480 | ANIMATION PROJECT BLUELIGHT | 4 quarter hours
(Graduate)
Production of an animated digital motion picture written by students or faculty within the School of Cinematic Arts. Students will work as crew under supervision of faculty members heading each of the various production areas. The goal is to work towards a completed animated digital motion picture suitable for festivals or distribution.

ANI 481 | SOUND DESIGN FOR ANIMATION | 4 quarter hours
(Graduate)
This class will explore concepts and practical techniques students need in order to address many of the unique requirements associated with creating audio for animated films. Students will begin with an introduction to the aesthetics of film sound and audio production before moving on to build practical recording and mixing skills. Lectures, readings, and practical projects will give students a working knowledge of how to approach and create the immense range of styles of audio for animated films.

ANI 482 | DIGITAL PUPPET ANIMATION | 4 quarter hours
(Graduate)
This class will introduce advanced production pipelines and techniques of 2D digital puppeting, with a focus on industry-standard software such as After Effects, Animate, and Harmony. Students will learn the evolution of puppet animation throughout history, the basics of visual design, rigging, and animating specific to 2D puppeted characters. Lectures and creative projects will give students the practical knowledge to create an organized workflow. Resulting in the ability to work independently and collaboratively to create well designed and animated 2D puppet animation. ANI 421 is a prerequisite for this class.

ANI 490 | TOPICS IN ANIMATION | 4 quarter hours
(Graduate)
Advanced study in animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 101 or ANI 201 or consent of the instructor.
ANI 493 | TOPICS IN 3D ANIMATION | 4 quarter hours (Graduate)
Advanced study in 3D animation focusing on a specific area each quarter. May be repeated for credit.

ANI 231 or ANI 423 or equivalent experience is a prerequisite for this course.

ANI 501 | MFA SHORT FILM I | 4 quarter hours (Graduate)
This course is part of a year-long project, and is continued in ANI 502 and 503. This series of courses will concentrate on facilitating the Animation MFA students’ production of a short, independently animated project. The short film project serves as a preparation for the students’ MFA thesis project in year two. The topics of idea generation, experimentation, problem solving, planning and time management, and the process of critical analysis will be applied to the student’s work, with the choice of animation technique, content and form left to the individual. Special attention will be devoted to discovering and developing each student’s personal voice. Technical demonstrations will be presented on an as-needed basis, depending on the nature of the students’ projects. In addition to the course instructor, students will be assigned two faculty mentors who will also provide individual feedback and technical advice. This course must be taken consecutively with ANI 502 MFA Short Film II and ANI 503 MFA Short Film III. PREREQUISITE(S): Open to Animation MFA students only.

Status as an MFA Animation student is a prerequisite for this course

ANI 502 | MFA SHORT FILM II | 4 quarter hours (Graduate)
This course is part of a year-long project, and is a continuation of ANI 501 and continued in ANI 503. This series of courses will concentrate on facilitating the Animation MFA students’ production of a short, independently animated project. The short film project serves as a preparation for the students’ MFA thesis project in year two. The topics of idea generation, experimentation, problem solving, planning and time management, and the process of critical analysis will be applied to the student’s work, with the choice of animation technique, content and form left to the individual. Special attention will be devoted to discovering and developing each student’s personal voice. Technical demonstrations will be presented on an as-needed basis, depending on the nature of the students’ projects. In addition to the course instructor, students will be assigned two faculty mentors who will also provide individual feedback and technical advice. This course must be taken consecutively with ANI 502 MFA Short Film II and ANI 503 MFA Short Film III. PREREQUISITE(S): Consent of dean and consent of instructor required. (Variable credit)

ANI 503 | MFA SHORT FILM III | 4 quarter hours (Graduate)
This course is part of a year-long project, and is a continuation of ANI 501 and 502. This series of courses will concentrate on facilitating the Animation MFA students’ production of a short, independently animated project. The short film project serves as a preparation for the students’ MFA thesis project in year two. The topics of idea generation, experimentation, problem solving, planning and time management, and the process of critical analysis will be applied to the student’s work, with the choice of animation technique, content and form left to the individual. Special attention will be devoted to discovering and developing each student’s personal voice. Technical demonstrations will be presented on an as-needed basis, depending on the nature of the students’ projects. In addition to the course instructor, students will be assigned two faculty mentors who will also provide individual feedback and technical advice. This course must be taken consecutively with ANI 501 MFA Short Film I and ANI 502 MFA Short Film II. Open to Animation MFA students only.

ANI 502 is a prerequisite for this class.

ANI 540 | ANIMATED SHORT FILM PART I | 2 quarter hours (Graduate)
This course and its continuation, ANI 541, will concentrate on facilitating the graduate students’ production of a short, independently animated project. The topics of idea generation, experimentation, problem solving, planning and time management, and the process of critical analysis will be applied to the students work, with the choice of animation technique, content and form left to the individual. We will have technical demonstrations on an as-needed basis, depending on the nature of your animations. This course must be taken consecutively with ANI 541 Animated Short Film Part II.

ANI 440 is a prerequisite for this class.

ANI 541 | ANIMATED SHORT FILM PART II | 2 quarter hours (Graduate)
This course is a continuation of ANI 540 Animated Short Film Part I. Throughout the quarter students will continue working on their films, meeting with the instructor for advising, and other students for group critiques. Students will also learn effective post-production strategies as they near completion of their first film. This course must be taken consecutively with ANI 540.

ANI 540 is a prerequisite for this class.

ANI 560 | GRADUATE TEACHING SEMINAR | 4 quarter hours (Graduate)
This seminar exposes students to effective methods and professional practices of teaching undergraduate and graduate students. A variety of approaches to course materials and projects will be introduced and discussed in detail. In addition to work in class, students will work closely with a faculty member in order to gain first-hand knowledge, including class observation, of practical aspects of creative and academic instruction. PREREQUISITE(S): none.

ANI 599 | INDEPENDENT STUDY | 1-8 quarter hours (Graduate)
Independent study form. PREREQUISITE(S): Consent of dean and consent of instructor required. (Variable credit)
ANI 601 | MFA THESIS PROJECT I | 4 quarter hours  
(Graduate)  
This course is part of a year-long three course sequence, and is continued in ANI 602 and 603. This series of courses will concentrate on facilitating the Animation MFA students’ production of their MFA thesis project. In addition to animated films, students are also encouraged to explore alternative animation solutions, including TV shows, installations, interactive/game projects, augmented/virtual reality, performance, and others. At the beginning of the quarter students will develop a thesis proposal, which must be approved by their MFA thesis committee and the course instructor before proceeding with production. Much of this course will consist of self-directed research and production by the student, supplemented by mentoring by the instructor and critique with the entire class. Students will also meet regularly with the members of their MFA thesis committee, who will provide individual feedback and technical advice. This course must be taken consecutively with ANI 602 MFA Thesis Project II and ANI 603 MFA Thesis Project III. PREREQUISITE(S): ANI 503; Open to Animation MFA students only.

ANI 602 | MFA THESIS PROJECT II | 4 quarter hours  
(Graduate)  
This course is part of a year-long three course sequence, and is a continuation of ANI 601 and continued in ANI 603. This series of courses will concentrate on facilitating the Animation MFA students’ production of their MFA thesis project. In addition to animated films, students are also encouraged to explore alternative animation solutions, including TV shows, installations, interactive/game projects, augmented/virtual reality, performance, and others. Much of this course will consist of self-directed research and production by the student, supplemented by mentoring by the instructor and critique with the entire class. Students will also meet regularly with the members of their MFA thesis committee, who will provide individual feedback and technical advice. This course must be taken consecutively with ANI 601 MFA Thesis Project I and ANI 603 MFA Thesis Project III. PREREQUISITE(S): ANI 601; Open to Animation MFA students only.

ANI 603 | MFA THESIS PROJECT III | 4 quarter hours  
(Graduate)  
This course is part of a year-long three course sequence, and is a continuation of ANI 601 and ANI 602. This series of courses will concentrate on facilitating the Animation MFA students’ production of their MFA thesis project. ANI 603 will prepare the student for the more self-directed completion phase of their MFA thesis project. In addition to animated films, students are also encouraged to explore alternative animation solutions, including TV shows, installations, interactive/game projects, augmented/virtual reality, performance, and others. Much of this course will consist of self-directed research and production by the student, supplemented by mentoring by the instructor and critique with the entire class. Students will also meet regularly with the members of their MFA thesis committee, who will provide individual feedback and technical advice. This course must be taken consecutively with ANI 601 MFA Thesis Project I and ANI 602 MFA Thesis Project II. PREREQUISITE(S): ANI 602; Open to Animation MFA students only.

ANI 639 | MFA PRE-THESIS | 4 quarter hours  
(Graduate)  
In this course the MFA student will develop the concept and pre-production of their thesis animation through workshops, critiques and assignments. Students will create inspiration and concept art, write a treatment, create a storyboard and animate as well as research design options to be used on their final film project in ANI 640 MFA Thesis Animation.

ANI 640 | MFA THESIS ANIMATION | 1 quarter hours  
(Graduate)  
This course is a three quarter class that will concentrate on the graduate students’ production, post-production and completion of their final thesis project. Students will have regular critique sessions with their three Thesis Advisors from the animation faculty. The student’s project will be presented to the committee upon completion. PREREQUISITE(S): ANI 639 (1 quarter hour)

ANI 701 | THESIS CONTINUATION | 0 quarter hours  
(Graduate)  
Non-credit. Students admitted to MFA program who have completed all the required coursework and who are regularly using the facilities of the University for thesis production and/or post-production are required to be registered each quarter of the academic year until the thesis and defense have been completed. Prerequisite(s): ANI 603 or ANI 640.

**Anthropology (ANT)**

**ANT 102 | CULTURAL ANTHROPOLOGY | 4 quarter hours  
(Undergraduate)**  
An introduction to current anthropological theories and methods for understanding human cultures from a comparative perspective; includes an analysis of human institutions such as religion, politics, and kinship, and the forces that change them in a variety of societies, small and large scale.

**ANT 103 | ARCHAEOLOGY | 4 quarter hours  
(Undergraduate)**  
An exploration of the science of archaeology, the study of past human behavior through material remains. Examines the ways archaeologists gather data and the methods used to analyze and interpret these data to learn about the past and how human societies evolved.

**ANT 104 | INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY | 4 quarter hours  
(Undergraduate)**  
This course will examine the biological history of the human species culminating with an exploration of human biological variation in the modern world. Principles of evolutionary theory and genetics will first be presented to provide a framework for the study of human evolutionary biology. The fossil evidence for human evolution will then be considered using comparative data from nonhuman primate ecology to help reconstruct prehistoric lives. Finally, features of biological modernity will be discussed. Particular attention will be given to how human populations utilized biological and behavioral mechanisms to adapt to their environments throughout evolutionary history. The course includes labs.

**ANT 105 | ANTHROPOLOGY THROUGH FILM | 4 quarter hours  
(Undergraduate)**  
This course is an introduction to cultural anthropology, the sub-discipline of anthropology concerned with contemporary human cultures, through film. The aim is to convey the anthropological perspective on behaviors and systems that people create. The course will emphasize fundamental concepts, methods, and theories used to study culture.

**ANT 106 | LANGUAGE AND CULTURE | 4 quarter hours  
(Undergraduate)**  
Definitions and features of language and communication, and their relationship to thought and culture. Topics include the classification of languages, language acquisition, linguistic variation, language communities, multilingualism, performance, and variability of language use.
ANT 107 | THE CULTURE OF BUSINESS | 4 quarter hours  
(Undergraduate)  
This course asks what role culture plays in business. We will explore the ways in which culture influences consumer decision-making, global business practices, marketing strategies, corporate ethics, and business education and training. By the end of the course, you will be familiar with the ideas, values, and concerns that underpin business practices and be able to apply your understanding of culture to the way you interact with the business world.

ANT 109 | FOOD AND CULTURE | 4 quarter hours  
(Undergraduate)  
Explores the concept of culture by focusing on people’s knowledge of food; it examines the local sameness and global peculiarity of people’s food preferences, considering tastes and environmental impacts, health implications, dietary restrictions, and other social impacts.

ANT 120 | SCIENCE OF ARCHAEOLOGY | 4 quarter hours  
(Undergraduate)  
Archaeology spans the academic worlds of the physical sciences and the social sciences. In this course, the physical science qualities of the discipline are introduced. Students explore the various ways archaeologists use model building, statistical inference, and evidence analysis to reconstruct past human experiences. The course includes two hour of lab and two hours of lecture/discussion per week.

ANT 130 | SCIENCE AND PSEUDOSCIENCE IN ARCHAEOLOGY | 4 quarter hours  
(Undergraduate)  
Pseudoarchaeology misuses science, logic, and the archaeological record to create misrepresentations or misinterpretations of the past. While some of these claims capture the imagination or are entertaining, they can also perpetuate conspiracy theories, racist, or nationalist beliefs, leading to misunderstandings of ancient cultures. Most archaeologists, however, see these claims as fringe ideas, labelling them “pseudoscience.” This course examines these different viewpoints by using science to assess assertions about extraordinary life forms, such as Bigfoot and “ancient aliens,” and claims about lost races of people and civilizations, including Atlantis. We will consider why some people are attracted to these theories, how they originated, “evidence” used to support them, and science used to debunk prevailing beliefs. Students will gain valuable critical thinking and information literacy skills, while also learning how archaeologists think and what constitutes solid archaeological research, and how scientific methods help uncover the past.

ANT 201 | ETHNOGRAPHIC RESEARCH METHODS | 4 quarter hours  
(Undergraduate)  
This course focuses on practicing data collection techniques used by qualitative researchers in the social sciences. Under the supervision of the instructor, students will design and implement a collaborative research project. The techniques to be used may include (but are not limited to) observation, structured and semi-structured interviewing, network analysis, and focused group interviewing. The experience gained in this course prepares students for research activities in future course work, graduate school and professional life. In addition to the practical hands-on training, the course also addresses issues of the relationship of theory to method, ethical concerns in research with human subjects, reflexivity and inter-subjectivity in qualitative research.

ANT 202 | ARCHAEOLOGICAL FIELD METHODS | 6 quarter hours  
(Undergraduate)  
This course introduces students to the basic field and laboratory methods used in archaeological research through hands on experience. Students will receive intensive field training in archaeological field methods including excavation, survey, mapping, record keeping, and illustration. The course introduces basic laboratory techniques such as artifact processing, identification, and curation. The methodological training will be integrated through emphases on the place of data collection in the archaeological research process, and the relationship between archaeological data and questions of historical and anthropological importance. This course will provide students with the essential basic field training in archaeology required for both applied work in cultural resource management and continued education in archaeology.

ANT 203 | PROFESSIONALISM AND ETHICS IN ANTHROPOLOGY | 4 quarter hours  
(Undergraduate)  
This class explores the many dimensions of what it means to be a professional anthropologist in both applied and academic areas. Students will learn about specialized resources for anthropologists (web resources, library resources, funding resources, career resources), and become familiar with the professional structure of the discipline. A large portion of the course will be devoted to the debate/discussion/exploration of ethical issues that challenge anthropologists through the use of real cases that have confronted researchers in the field, and through an evaluation of the ethical codes of conduct adopted by the primary professional organizations in anthropology.

ANT 204 | LINEAGES OF CULTURE THEORY | 4 quarter hours  
(Undergraduate)  
This course provides the student with a history of the culture concept tracing the lineages of thought about culture from the nineteenth century to the present. Readings and seminar discussions will present an explicit discussion of how ideas and understanding about culture have changed over time and will introduce students to the main branches of cultural theory. Students will develop the skills and confidence to work with the abstractions and concepts that underlie anthropological research. The course is reading and writing intensive.

ANT 206 | WORLD PREHISTORY | 4 quarter hours  
(Undergraduate)  
Placing an emphasis on both theory and the latest archaeological and multidisciplinary approaches this overview of world prehistory will look at a series of interesting problems and case studies that provide a taste of the richness of human creativity. Topics include the evolution from foraging lifestyles, through the increased control of nature by early farmers, to the rise of states and empires: this is an examination of the deep and tangled roots of today’s societies.
ANT 208 | WHY WE POST: THE ANTHROPOLOGY OF SOCIAL MEDIA | 4 quarter hours (Undergraduate)
This is an introduction to cultural anthropology using the specific question of why we post on social media to illustrate the research approaches and analytical practices of this discipline. It is designed from the ground up as an online course. To say that social media is a global technology is an understatement. However, to say that everyone in all the places on the globe use social the same way is a research question. The answer is different depending on what community we are visiting and who in the community we are talking to. The reasons why we might post here in Chicago are not universal. In this course, we will visit five different communities: an impoverished former mining town in Northern Chile, an IT complex in Southern India, a rural village in Central China, an industrial complex in Southern China, and a politically sensitive town in South East Turkey. We will meet the people who live there through text and video. We will survey the social media landscape. We will look at the images and selfies they post and the games they play. They will explain their social lives to us in their own (translated) words. We will hear about their economic, social, and political concerns. Finally, we will draw some tentative conclusions about the realities and the illusions of social media.

ANT 210 | AFRICAN CULTURES | 4 quarter hours (Undergraduate)
Survey of the people and cultures of Africa. Analysis of beliefs, customs, and social organization of traditional African cultures, and the forces of sociocultural change that have affected traditional patterns of life and are necessary to understand contemporary African societies. Formerly SOC 300.

ANT 220 | CULTURES OF EUROPE | 4 quarter hours (Undergraduate)
Explores the cultural features of the European experience using ethnographic sources. Focuses on European life at the local level, examines the implications of European Community integration on peoples' lives in various countries, and explores causes of conflict within and between national boundaries. (formerly SOC 300 Regional Ethnology: Peoples of Europe).

ANT 224 | MAYA HUMANITIES | 4 quarter hours (Undergraduate)
Students will read the Popul Vuh within the context of how it is interpreted and understood today by Maya intellectuals -- including but not limited to writers, poets, academics and activists. Readings will include work on the philosophy and ethics embedded in monte/milpa agriculture through study of short story, music, poetry, cuisine and plays. It will also address the intentionality of movement in indigenous voice from object to subject.

ANT 230 | CULTURES OF THE PACIFIC | 4 quarter hours (Undergraduate)
Explores traditional and contemporary cultures of the Pacific. A survey of Oceanic cultures from Australia, Melanesia, Micronesia, and Polynesia; consideration of the geography and geology of Pacific islands; and analysis of the history of contact between Pacific island peoples with Westerners and the consequences for life in the contemporary Pacific. (formerly SOC 300 Regional Ethnology: The Pacific Islands).

ANT 240 | CULTURES OF THE MIDDLE EAST | 4 quarter hours (Undergraduate)
Explores the cultures and societies of the contemporary Middle East. Focuses on everyday life and practices, such as religion, social organization, art and popular culture. Uses ethnographic sources to examine the historical influence of various civilizations and religions on contemporary Middle Eastern societies from North Africa to Iran.

ANT 250 | MATERIAL CULTURE OF MODERN AMERICA | 4 quarter hours (Undergraduate)
This course combines historical archaeology and material culture studies to examine how material goods both shape and reflect American identity. The course will take an historical approach beginning in the 17th century when most Americans wore homespun clothing and produced their own food, and continue to the 21st century and a time when Americans wear the national colors of Tommy Hilfiger and eat fast food lunches. Often such changes in material culture are characterized as the process of "modernization," and as such, the course will be centered on the relationship between material culture, American identity and conceptions of modernity. Cross-listed with AMS 370.

ANT 252 | MATERIAL CULTURE AND DOMESTIC LIFE | 4 quarter hours (Undergraduate)
This course explores the social, and economic dynamics of households through material culture. Specifically, this course looks at how material goods structure domestic life, reflect values surrounding family and kinship, and mediate the relationship between individual households and broader levels of social organization such as community, society, and culture.

ANT 254 | HISTORICAL ARCHAEOLOGY OF CHICAGO | 4 quarter hours (Undergraduate)
Students will be participating in an archaeological research project focusing on Chicago's past. The course will include an introduction to the concept of an archaeological research design. Students will engage in historical research using primary documents and analyze archaeological data to address specific research questions about Chicago's recent past. ANT 202 is a prerequisite for this course.

ANT 256 | MUSEUMS AND MATERIAL CULTURE | 4 quarter hours (Undergraduate)
This course explores and materiality and physicality of objects in their place and the places (museums, cultural, and educational institutions) in which they reside. Museums and material culture includes explorations of collecting, object biography; consumption; materials and materiality; provenance; exhibition and display; museums as civic institutions; object-based research techniques; and the relationship between anthropology, ethnographic practice, and museums.

ANT 270 | HUMAN EVOLUTION | 4 quarter hours (Undergraduate)
Principles of evolutionary theory and genetics will first be presented to provide a framework for the study of human evolutionary biology. Beginning with the earliest fossil evidence, the course will trace human evolution. Particular attention will be given to the forces of environment and sexual selection at work at various points in time. Data from nonhuman primate ecology will be used to help reconstruct prehistoric lives.

ANT 272 | INTRODUCTION TO MEDICAL ANTHROPOLOGY | 4 quarter hours (Undergraduate)
This course explores the interrelationships between culture and human health for the purposes of understanding the biosocial origins of disease, systems of treatment, and the global inequalities that shape disease patterns and access to health care resources.

ANT 274 | FORENSIC ANTHROPOLOGY | 4 quarter hours (Undergraduate)
This course separates fact from media fantasy in the application of anthropological knowledge to determining the cause of death. Specific case studies are presented that show the range of situations confronted by anthropologists who consult with law enforcement agencies.
ANT 280 | ARCHAEOLOGICAL FIELDWORK | 4 quarter hours (Undergraduate)
This course introduces students to the basic field and laboratory methods used in archaeological research through hands on experience. Students will receive intensive field training in archaeological field methods including excavation, survey, mapping, record keeping, and illustration. The course introduces basic laboratory techniques such as artifact processing, identification, and curation. The methodological training will be integrated through emphases on the place of data collection in the archaeological research process, and the relationship between archaeological data and questions of historical and anthropological importance. This course will provide students with the essential basic field training in archaeology required for both applied work in cultural resource management and continued graduate education in archaeology.

ANT 290 | SPECIAL TOPICS IN REGIONAL ETHNOLOGY | 4 quarter hours (Undergraduate)
Compares the patterns of sociocultural life in different societies within a particular geographic region in order to gain a general understanding of cultural themes, trends, and historical developments. Check current schedule of courses for specific topic. Course may be repeated for credit when title and content change.

ANT 314 | ANTHROPOLOGY OF GENDER | 4 quarter hours (Undergraduate)
This course exposes students to a variety of topics that address gender cross-culturally and from an anthropological perspective. We shall explore the cultural processes that shape the lives of men, women and transgendersed people across time and space.

ANT 317 | LANGUAGE, POWER AND IDENTITY | 4 quarter hours (Undergraduate)
Explores how communication patterns vary cross-culturally. Examines how the language people speak shapes their worldview and their ways of interacting with each other. Students learn basic techniques of analyzing conversations.

ANT 320 | HUMAN VARIATION | 4 quarter hours (Undergraduate)
Explores the interrelationships between culture, biology, and the environment in the shaping of social life, including human evolution, sexual differences, skin color, "race," body shape, and other aspects of human variation.

ANT 322 | COMMUNITY-BASED APPLIED PRACTICE | 6 quarter hours (Undergraduate)
This laboratory course in the applied anthropology sequence introduces students to the range of anthropological practice in the public and not-for-profit sector. Students will learn about the ways that anthropology has been and can be applied to initiate practical change in communities. In addition to learning the professional and ethical responsibilities of practicing anthropologists, students will also gain a practical experience working on an applied project. Human Subjects Research certification and an ethnographic methods is required for this class.

ANT 201, ANT 203 and senior standing are a prerequisite for this class.

ANT 324 | COLONIALISM TO GLOBAL SOCIETY | 4 quarter hours (Undergraduate)
This course examines long-term trends in the development of capitalist society in terms of both material and social organization from the 15th century to the present. Modeled on the core text, Europe and the People without History by Eric Wolfe, the course seeks to ground students in long-term processes of cultural development and change. These issues will be explored through a combination of archaeological and ethnographic perspectives and evidence.

ANT 326 | TRANSNATIONAL CULTURES | 4 quarter hours (Undergraduate)
This course examines the emergence of transnational culture in the modern world. The focus is on relationships and processes that link communities, such as trade, migration, and tourism, and the local experience of these global processes. While classroom discussion will be structured around critical readings of texts, self reflection and value consciousness will be encouraged. To this end, assignments will combine critical readings and guided experiential activities. Students will be tutored in techniques for giving professional style presentations. The course may vary according to faculty interest. Possible foci include labor migration, media, tourism, and/or global consumption.

ANT 328 | INTERNATIONAL APPLIED PRACTICE | 4 quarter hours (Undergraduate)
Examines various processes of sociocultural change, with emphasis on peoples undergoing or emerging from cultural, political, or economic oppression.

ANT 330 | CLIENT-BASED APPLIED PRACTICE | 4 quarter hours (Undergraduate)
This laboratory course introduces students to the use of anthropological methods and theories in the private, for-profit sector. Students will learn about the type of work anthropologists are performing in the corporate world such as design and marketing research, product usability studies, and cultural resource management. In addition to learning the professional and ethical responsibilities of practicing anthropologists, students will also gain a practical experience working on an applied project. Formerly ANT 316. ANT 203 is a prerequisite for this course.

ANT 342 | ANTHROPOLOGY OF FOOD MOVEMENTS AND PRACTICES | 4 quarter hours (Undergraduate)
The meaning we attach to the foods we eat changes with the shifts in markets, governmental regulation and commitments to particular diets. This course provides ethnographic observational field studies of these changing movements and practices, leading the student to insights into cultural processes generally, and dietary practices in particular. The field site varies with the instructor and campus.

ANT 346 | URBAN ANTHROPOLOGY | 4 quarter hours (Undergraduate)
Theories and methods of contemporary anthropology and other fields are used to analyze cities and urban life. Cross-culturally explores the processes of urbanization, urbanism (urban culture, subcultures, and ethnic lifestyles), and the notion of images of cities. Recommended for sophomore level or above.

ANT 356 | URBAN ETHNOGRAPHY | 4 quarter hours (Undergraduate)
Examines the city as a type of human settlement, focusing on the different forms, functions, images, and ideological perceptions of cities over time and across a number of different cultures. Formerly SOC 356.
ANT 358 | ARCHEOLOGY OF CITIES | 4 quarter hours  
(Undergraduate)  
This class provides a general overview of the archaeology of urban settlements. We will begin by asking the question "What is a city?" and look at the different theories that address the nature and origins of early urban settlements. To further examine this question we will focus on Cahokia, the largest prehistoric settlement in North America north of Mexico, and the city of Chicago, a well established urban, industrial center. The second portion of the class will take an even broader comparative approach towards the archeology of cities by applying the theories and insights gained in the first portion of the course to different world areas. Through these comparisons students will gain a deeper understanding of the diversity of urban forms across time and space, and consider the possibilities of cross-cultural similarities among prehistoric and early historic urban populations.

ANT 360 | ISSUES IN GLOBAL HEALTH | 4 quarter hours  
(Undergraduate)  
This course focuses on a specific health issue or set of issues in our world. The interrelationships between culture and health in this issue are examined.

ANT 361 | GLOBAL ISSUES IN WOMEN'S HEALTH | 4 quarter hours  
(Undergraduate)  
This course provides an overview of several critical issues in international women's health that illustrate the tension between biological-cultural and environmental explanations. We begin the semester by asking the question, "What does it mean to think anthropologically about women's health?" The course has an emphasis on how women themselves define, confront, manage and develop capacity to organize for better health in the face of societal pressures, structural violence and unequal access to resources. Students are also introduced to basic knowledge of epidemiological transitions, evolutionary medicine and situate Western medicine within the medical systems that have formed in the broader story of human history.

ANT 362 | GLOBAL HISTORY OF HEALTH | 4 quarter hours  
(Undergraduate)  
This course investigates the impact of infectious disease on human societies from the Paleolithic through the present day. Using the framework of the three epidemiological transitions, it examines the changes in human health associated with the origins of agriculture, the development of industrialization, and the processes of globalization. Throughout this vast sweep of human history, emphasis is placed on the influence of both biological and social factors on the manifestations of human disease.

ANT 374 | ANTHROPOLOGY AND MUSEUMS | 4 quarter hours  
(Undergraduate)  
The course examines the evolving relationships between anthropology and museums. From functional, historical, material and aesthetic perspectives, the relationships between the cultural contexts of objects and museums will be explored. Case studies, guest lectures and site visits (virtual and real) will be used to demonstrate evolving theory, practice, law and ethical implications of collecting objects. Many of the logistical aspects of the museum including the laws and mission statements will also be examined.

ANT 378 | MUSEUM EDUCATION | 4 quarter hours  
(Undergraduate)  
The specialized role of museum education is integral to developing and strengthening the museum's purpose as a public institution. This course explores the role of education in museums, emphasizing theory and practice. The class will examine concepts such as; the history and development of museum education, current issues, learning theories, techniques, creation of didactic materials, types of outreach, management policy, working with volunteers, and program evaluation.

ANT 380 | INTERNSHIP IN ANTHROPOLOGY | 4 quarter hours  
(Undergraduate)  
This course affords credit toward graduation for students involved in department approved internships.

ANT 382 | HERITAGE DISPLAYS AND MUSEUMS | 4 quarter hours  
(Undergraduate)  
This course examines the production and display of "culture" and "heritage" in public places worldwide, including tourist destinations, museums, and historic and commemorative sites. We will focus on the social and political implications of these processes and their relationship to anthropology. Museums were an early locus of anthropology and continue to be key sites for its public expression. In this course we will investigate "culture" on the loose and consider what studying the museum, tourism, and heritage industries can teach us about anthropology. Students will gain a deeper understanding of the concept of culture in anthropology. We will divide our time between reading, field trips to local museums and historic sites, and a hands-on class project.

ANT 384 | ARCHAEOLOGICAL ANALYSIS | 4 quarter hours  
(Undergraduate)  
The course is an introduction to the analysis of archaeological data, the interplay between the knowledge people have of the world and the remains and traces of their actions in it. We review the relevant culture theory needed to draw distinctions between analytical stances. We examine how the rhetoric of the research report changes as different analytical stances are selected.

ANT 386 | CULTURAL ANALYSIS | 4 quarter hours  
(Undergraduate)  
Introduction to cultural analysis, the interplay between the knowledge people have of the world and their actions in it; explores the rudiments of culture theory needed to draw distinctions between analytical stances; examines how the rhetoric of the research report changes as different analytical stances are selected.

ANT 388 | PROFESSIONAL RESEARCH TUTORIAL | 2-4 quarter hours  
(Undergraduate)  
This course helps anthropology majors prepare for professional presentations at conferences, research exposition, publications and theses. It uses data collected in another class. The student focuses on developing the communication techniques necessary to meet a professional standard. Honors program students complete the honors program in anthropology with this course. The course is registered using the independent study procedure on Campus Connect. The course is taken normally for 2 credits. Students writing an honors program thesis can take the course for 4 credits.

ANT 390 | SPECIAL TOPICS IN ANTHROPOLOGY | 4 quarter hours  
(Undergraduate)  
Variable topics in anthropology intended for advanced students. Explores special aspects or areas of anthropology based on particular interests and expertise of the instructor; course content and title will vary with the instructor. Check current schedule of courses for specific topic. Course may be repeated for credit when title and content change.
ANT 395 | SEMINAR IN ANTHROPOLOGY | 4 quarter hours (Undergraduate)
In-depth examination of selected topics in sociocultural anthropology, based either on a geographic area or theoretical theme. Check current schedule of courses for specific topic. Course may be repeated for credit when title and content change. Status as an Undergraduate Music student is a prerequisite for this course.

ANT 102 is a prerequisite for this course.

ANT 396 | SENIOR CAPSTONE SEMINAR | 4 quarter hours (Undergraduate)
A course for senior anthropology majors, which satisfies the Senior Year Capstone requirement of the Liberal Studies Program. Objectives of the course are: to afford students the opportunity to reflect on the influences in their lives (both in and outside of academics) that directed them toward anthropology as a field of study; to formulate ideas regarding the affect anthropology has on their way of viewing themselves in the world around them; and to pursue research on an anthropologist or anthropological topic. Status as an Undergraduate Music student is a prerequisite for this class.

ANT 397 | TRAVEL/STUDY | 2-4.5 quarter hours (Undergraduate)
Foreign study tours with lectures and research by special arrangement with sponsoring programs. May be taken for multiple credit when courses are not duplicated. Status as a Graduate Music student is a prerequisite for this class.

ANT 399 | INDEPENDENT STUDY | 2-4 quarter hours (Undergraduate)
Independent Study.

Applied Brass (APB)

APB 110 | EUPHONIUM | 1-4 quarter hours (Undergraduate)
Advanced individual instruction in euphonium performance at the undergraduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study. Status as an Undergraduate Music student is a prerequisite for this class.

APB 130 | FRENCH HORN | 1-4 quarter hours (Undergraduate)
Advanced individual instruction in french horn performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study. Status as an Undergraduate Music student is a prerequisite for this class.

APB 165 | TROMBONE | 1-4 quarter hours (Undergraduate)
Advanced individual instruction in trombone performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study. Status as an Undergraduate Music student is a prerequisite for this class.

APB 170 | TRUMPET | 1-4 quarter hours (Undergraduate)
Advanced individual instruction in trumpet performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study. Status as an Undergraduate Music student is a prerequisite for this class.

APB 175 | TUBA | 1-4 quarter hours (Undergraduate)
Advanced individual instruction in tuba performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study. Status as an Undergraduate Music student is a prerequisite for this class.

APB 410 | EUPHONIUM | 1-4 quarter hours (Graduate)
Advanced individual instruction in euphonium performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study. Status as a Graduate Music student is a prerequisite for this class.

APB 430 | FRENCH HORN | 1-4 quarter hours (Graduate)
Advanced individual instruction in french horn performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study. Status as a Graduate Music student is a prerequisite for this class.

APB 465 | TROMBONE | 1-4 quarter hours (Graduate)
Advanced individual instruction in trombone performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study. Status as a Graduate Music student is a prerequisite for this class.

APB 470 | TRUMPET | 1-4 quarter hours (Graduate)
Advanced individual instruction in trumpet performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study. Status as a Graduate Music student is a prerequisite for this class.

APB 475 | TUBA | 1-4 quarter hours (Graduate)
Advanced individual instruction in tuba performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study. Status as a Graduate Music student is a prerequisite for this class.

Applied Diplomacy (DPL)

DPL 200 | DIPLOMACY: ITS PAST AND PRESENT | 4 quarter hours (Undergraduate)
This course will introduce students to the origins of diplomacy and the manner in which it has evolved as a practice and as a field of study through the end of the 20th century, through examining the evolution of Club Diplomacy to Network Diplomacy, modern understandings of statecraft, negotiation, and liberal internationalism.
DPL 201 | DIPLOMACY: ITS PRESENT AND FUTURE | 4 quarter hours
(Undergraduate)
This course will explore the practice of diplomacy through an examination of non-Western state-sponsored diplomacy and the practices of non-state actor diplomats. Students will become acquainted with the many ways the field of diplomatic studies has expanded in recent decades, and will be introduced to the growing number of approaches to the practice of diplomacy which are broadening our understanding of who can be called a diplomat.

DPL 202 | TRANSPROFESSIONAL MEDIATION AND NEGOTIATION | 4 quarter hours
(Undergraduate)
This course will introduce students to the theory and practice of diplomatic mediation and negotiation in multiple vocational contexts, including the work of foreign service officers, non-state actors and grassroots diplomats.

DPL 203 | CITIZEN DIPLOMACY IN THE 21ST CENTURY | 4 quarter hours
(Undergraduate)
This course examines the practice of diplomacy at the grassroots level by diplomatic actors working in multiple vocations, including businesspeople, scientists, artists, religious leaders, community organizers and activists. Students will engage the phenomena of poly-lateral and omnilateral diplomacy, and their implications for promoting collaboration among governmental and non-state actor diplomats.

DPL 210 | LEADERSHIP AND DIPLOMACY | 4 quarter hours
(Undergraduate)
As our conceptions and practices of what it means to be a leader in everyday life shift in more values-based, applied, and multi-actor directions, this course examines the craft of diplomacy from a leadership perspective. It explores great-power, including U.S., leadership; revolutionary and post-colonial leadership; individual leadership at diplomatic missions abroad and within the United Nations system; moral leadership; middle-power and small-country leadership; regional leadership; and emerging non-state actor alternatives to state-based diplomatic leadership.

DPL 295 | SPECIAL TOPICS | 4 quarter hours
(Undergraduate)
Focused study on a specific topic which is complementary to the study and practice of Applied Diplomacy.

DPL 321 | REFUGEE AND FORCED MIGRATION | 4 quarter hours
(Undergraduate)
This course examines the integral role that different processes of mobility play in shaping today’s world: emigration, immigration, displacement, refugee and internally displaced persons flows. Students study the causes and effects of population movements including push-pull factors, demographic, economic, and political variables. Students also look at the role of state and non-state actors and organizations.

DPL 322 | CULTURE AND INEQUALITY | 4 quarter hours
(Undergraduate)
This course interrogates the concept of culture by showing the dynamic ways in which inequalities define and shape it. Students examine theories of culture and different approaches to studying culture to understand the relationship between the construction of cultural difference and social inequalities.

DPL 323 | NATURE, SOCIETY AND POWER | 4 quarter hours
(Undergraduate)
This course is an interdisciplinary exploration of environmental issues pertinent to international studies. The reproduction of human societies occurs in a symbiotic relationship with the natural world, yet in the modern era nature has come to be increasingly conceptualized as a resource. This course explores the repercussions of this instrumental separation of nature from culture and society. Our conceptions of nature range from the physical environment to the human body; and the course explores a range of related political, economic, ecological, and socio-cultural issues from theoretical, comparative, and practical perspectives. Issues explored include those of environmental justice and social and political equity, and questions such as who defines what constitutes environmental issues, who is included or excluded from environmental concerns, and who benefits or is harmed by environmental changes occurring as a result of social interventions.

DPL 350 | APPLIED DIPLOMACY SENIOR CAPSTONE | 4 quarter hours
(Undergraduate)
This course combines formal class work and independent research. Students will engage a theme in diplomatic studies which reflects their own vocational trajectory.

DPL 395 | SPECIAL TOPICS | 4 quarter hours
(Undergraduate)
Focused study on a specific topic which is complementary to the study and practice of Applied Diplomacy.

DPL 400 | DIPLOMACY: ITS FOUNDATIONS AND FUTURES | 4 quarter hours
(Graduate)
This course examines the history of diplomacy, the modern state of diplomacy engaging both normative and critical interpretations, and the possible futures of diplomacy through a transprofessional lens, including urban diplomacy, diplomacy and public health, diplomacy and human migration, diplomacy and critical ethnic studies, the critical analysis of diplomacy, and diplomacy and public service.

DPL 401 | TRANSPROFESSIONAL MEDIATION AND NEGOTIATION | 4 quarter hours
(Graduate)
This course will introduce students to the theory and practice of diplomatic mediation and negotiation in multiple vocational contexts, including the work of foreign service officers, non-state actors and grassroots diplomats.

DPL 402 | CITIZEN DIPLOMACY IN THE 21ST CENTURY | 4 quarter hours
(Graduate)
This course examines the practice of diplomacy at the grassroots level by diplomatic actors working in multiple vocations, including businesspeople, scientists, artists, religious leaders, community organizers and activists. Students will engage the phenomena of poly-lateral and omnilateral diplomacy, and their implications for promoting collaboration among governmental and non-state actor diplomats.

DPL 421 | MIGRATION AND FORCED MIGRATION | 4 quarter hours
(Graduate)
This course examines the integral role that different processes of mobility play in shaping today’s world: emigration, immigration, displacement, refugee and internally displaced persons flows. Students study the causes and effects of population movements including push-pull factors, demographic, economic, and political variables. Students also look at the role of state and non-state actors and organizations.
DPL 422 | CULTURE AND INEQUALITY | 4 quarter hours
(Graduate)
This course interrogates the concept of culture by showing the dynamic ways in which inequalities define and shape it. Students examine theories of culture and different approaches to studying culture to understand the relationship between the construction of cultural difference and social inequalities.

DPL 423 | NATURE, SOCIETY AND POWER | 4 quarter hours
(Graduate)
This course is an interdisciplinary exploration of environmental issues pertinent to international studies. The reproduction of human societies occurs in a symbiotic relationship with the natural world, yet in the modern era nature has come to be increasingly conceptualized as a resource. This course explores the repercussions of this instrumental separation of nature from culture and society. Our conceptions of nature range from the physical environment to the human body; and the course explores a range of related political, economic, ecological, and socio-cultural issues from theoretical, comparative, and practical perspectives. Issues explored include those of environmental justice and social and political equity; and questions such as who defines what constitutes environmental issues, who is included or excluded from environmental concerns, and who benefits or is harmed by environmental changes occurring as a result of social interventions.

DPL 495 | SPECIAL TOPICS | 4 quarter hours
(Graduate)
Focused study on a specific topic which is complementary to the study and practice of Applied Diplomacy.

DPL 499 | INDEPENDENT STUDY | 4 quarter hours
(Graduate)
Student-designed course incorporating reading and research conducted under faculty supervision.

Applied Keyboard (APK)

APK 150 | PIANO | 1-4 quarter hours
(Undergraduate)
Advanced individual instruction in piano performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APK 160 | HARPSICHORD | 1-4 quarter hours
(Undergraduate)
Advanced individual instruction in harpsichord performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APK 450 | PIANO | 1-4 quarter hours
(Graduate)
Advanced individual instruction in piano performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APK 460 | HARPSICHORD | 1-4 quarter hours
(Graduate)
Advanced individual instruction in harpsichord performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

Applied Music (APM)

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 126 | GERMAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level German diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 125 | ITALIAN DICTION I | 1 quarter hours
(Undergraduate)
Beginning level Italian diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 124 | ENGLISH DICTION | 1 quarter hours
(Undergraduate)
Beginning level English diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite and APV 100 is a corequisite for this class.

APM 127 | FRENCH DICTION I | 1 quarter hours
(Undergraduate)
Beginning level French diction for singers. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.
APM 225 | ITALIAN DICTION II | 1 quarter hours
(Undergraduate)
Intermediate level Italian diction for singers. (1 quarter hour)
APM 125 is a prerequisite for this class.

APM 226 | GERMAN DICTION II | 1 quarter hours
(Undergraduate)
Intermediate level German diction for singers. (1 quarter hour)
APM 126 is a prerequisite for this class.

APM 227 | FRENCH DICTION II | 1 quarter hours
(Undergraduate)
Intermediate level French diction for singers. (1 quarter hour)
APM 127 is a prerequisite for this class.

APM 242 | ACCOMPANYING CLASS I | 2 quarter hours
(Undergraduate)
An introduction to the role of the piano accompanist in vocal repertoire, and development of basic vocal coaching skills. A year-long sequence of courses. (2 quarter hours)
Status as an Undergraduate Keyboard student is a prerequisite and APK 150 and APM 300 is a corequisite for this class.

APM 244 | ACCOMPANYING CLASS II | 2 quarter hours
(Undergraduate)
An introduction to the role of the piano accompanist in wind instrumental repertoire, and development of basic vocal coaching skills. A year-long sequence of courses. (2 quarter hours)
Status as an Undergraduate Keyboard student is a prerequisite and APK 150 and APM 301 is a corequisite for this class.

APM 245 | ACCOMPANYING CLASS III | 2 quarter hours
(Undergraduate)
An introduction to the role of the piano accompanist in string instrumental repertoire, and development of basic vocal coaching skills. A year-long sequence of courses. (2 quarter hours)
Status as an Undergraduate Keyboard student is a prerequisite and APK 150 and APM 302 is a corequisite for this class.

APM 253 | INTRODUCTION TO ACTING FOR SINGERS | 2 quarter hours
(Undergraduate)
An introductory course in stage terminology and methods of preparation for stage performance. Class activities include reading assignments, discussions, and performances such as singing, spoken monologues and poems, and improvisation. (2 quarter hours)
Status as an Undergraduate Music student is a prerequisite for this class.

APM 254 | INTRODUCTION TO ACTING FOR SINGERS II | 2 quarter hours
(Undergraduate)
A course in stage terminology and methods of preparation for stage performance. Class activities include reading assignments, discussions, and performances such as singing, spoken monologues and poems, and improvisation. (2 quarter hours)
Status as an Undergraduate Music student is a prerequisite for this class.

APM 300 | ACCOMPANYING PRACTICUM FOR PIANISTS I: VOICE | 1 quarter hours
(Undergraduate)
An exploration of different styles of vocal repertoire, and the practice of accompanying vocalists in both studio and performance formats. (1 quarter hour)
Status as an Undergraduate Keyboard student is a prerequisite and APK 150 and APM 242 is a corequisite for this class.

APM 301 | ACCOMPANYING PRACTICUM FOR PIANISTS II: WINDS | 1 quarter hours
(Undergraduate)
An exploration of different styles of wind repertoire, and the practice of accompanying wind players in both studio and performance formats. (1 quarter hour)
Status as an Undergraduate Keyboard student is a prerequisite and APK 150 and APM 244 is a corequisite for this class.

APM 302 | ACCOMPANYING PRACTICUM FOR PIANISTS III: STRINGS | 1 quarter hours
(Undergraduate)
An exploration of different styles of string repertoire, and the practice of accompanying string players in both studio and performance formats. (1 quarter hour)
Status as an Undergraduate Keyboard student is a prerequisite and APK 150 and APM 245 is a corequisite for this class.

APM 303 | MUSICAL COACHING FOR SINGERS | 2 quarter hours
(Undergraduate)
Students meet in a masterclass format for musical and diction coaching in their current repertoire. (2 quarter hours)
Status as an Undergraduate Music student is a prerequisite for this class.

APM 304 | VOCAL COACHING II | 1 quarter hours
(Undergraduate)
The musical and dramatic performance of select vocal repertoire with special regard to recital material, integrating stylistic considerations, ornamentation, and cadenzas. (1 quarter hour)
An undergraduate vocal performance major is a prerequisite for this class.

APM 305 | SENIOR RECITAL | 2.00 quarter hours
(Undergraduate)
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed in the Senior year. This recital is required as partial fulfillment of the degree of Bachelor of Music in Performance. (2 quarter hours)
APB 110, APB 130, APB 165, APB 170, APB 175, APK 150, APK 160, APP 100, APS 127, APS 160, APS 180, APS 185, APS 190, APW 115, APW 120, APW 125, APW 135, or APV 100 is a corequisite for this class.

APM 306 | HARPSCICHORD PERFORMANCE PRACTICE | 2 quarter hours
(Undergraduate)
A practical introduction for pianists to the harpsichord, harpsichord repertoire from the late Renaissance to early Classical eras, and relevant performance practice and stylistic considerations. (2 quarter hours)
Status as a piano performance student or permission from the instructor is a prerequisite for this class.

APM 308 | BAROQUE PERFORMANCE PRACTICE-INSTRUMENTAL | 2 quarter hours
(Undergraduate)
This course focuses on the interpretation and performance of music from the Baroque era, concentrating primarily on 18th century literature. Open to all instrumentalists, students will study Baroque performance practice based on the treatises and various writings of the time, as well as current scholarly research of early music specialists. (2 quarter hours)
Status as an Undergraduate Music student is a prerequisite for this class.
APM 309 | MUSIC ENTREPRENEURSHIP | 2 quarter hours  
(Undergraduate)
Through opportunity creation, case study, discussion and peer evaluation, this course analyzes and simulates the professional performing arts marketplace, providing collaborative hands-on experience for performers and arts managers-in-training. In this course, performers will hone their musical point-of-view and create an original, self-produced performance opportunity in the DePaul community, with marketing materials and a business structure to support their project. Arts Management students will collaborate with performers on these projects, providing support to their colleagues in a way that models their future professional activities. Each student will also be responsible for analyzing a current successful model, identifying keys to success. This course is intended to bridge the transition from college to career, providing the artistic, career development and entrepreneurship training that have become essential in today's professional environment. Cross-listed with PAM 309. (2 quarter hours)
Status as an Undergraduate Music student is a prerequisite for this class.

APM 311 | WOODWIND PEDAGOGY | 2 quarter hours  
(Undergraduate)
This course is designed to provide students with an overview of the important aspects of woodwind pedagogy. Students will gain the necessary knowledge and skills to teach woodwind students of all ages and ability levels. (2 quarter hours)
Status as a Undergraduate Woodwind student is a prerequisite for this class.

APM 312 | BAROQUE ORNAMENTATION FOR PERFORMERS | 2 quarter hours  
(Undergraduate)
This class will be a cumulative survey of ornamentation, involving some improvisation, in Italian, French and German styles. Topics will cover the major Baroque composers and the principal forms and styles that a modern performer would encounter.
Status as an Undergraduate Music student is a prerequisite for this class.

APM 313 | MUSIC TECHNOLOGY FOR PERCUSSIONISTS | 1 quarter hours  
(Undergraduate)
This course will help students to understand the role of technology and electronics in the history and development of Western percussion. Students will learn the necessary skills to work with electronic sound sources, how to mic and record percussion instruments effectively and how to use technology and electronics in the performance, study, and analysis of major electro-acoustic works for percussion. (1 quarter hours)
Status as an Undergraduate Music student is a prerequisite for this class.

APM 315 | THE BUSINESS OF MUSIC FROM THE PERFORMER'S PERSPECTIVE | 2 quarter hours  
(Undergraduate)
Explorations of the business aspects of the performing musician. Topics will include unions, networking, freelancing, audition preparation, taxes, and ethics. (2 quarter hours)
Status as an Undergraduate Music student is a prerequisite for this class.

APM 319 | PERFORMANCE PRACTICE AND CRITIQUE | 2 quarter hours  
(Undergraduate)
This course will provide students with additional performance opportunities and will give them a chance to get critique from people not playing their instrument and, therefore, without the sympathy to its technical demands. Additionally, they will learn to criticize their peers in an appropriate and focused manner and will become better acquainted with the specifics of other instruments. (2 quarter hours)
Status as an Undergraduate Music student is a prerequisite for this class.

APM 328 | ORCHESTRAL REPERTOIRE FOR WOODWINDS I: LITERATURE PERFORMANCE | 2 quarter hours  
(Undergraduate)
Detailed study of significant woodwind orchestral literature, with special emphasis on improving ensemble skills. Each week will feature new repertoire to be rehearsed and performed during the class. (2 quarter hours)
Status as a Undergraduate Woodwind student is a prerequisite for this class.

APM 329 | WOODWIND ORCHESTRAL REPERTOIRE II: AUDITION PREPARATION | 2 quarter hours  
(Undergraduate)
An overview of orchestral woodwind audition repertoire with special emphasis on audition preparation and audition practice. Students will take several mock auditions over the course of the quarter to improve their understanding of the audition experience. (2 quarter hours)
Status as a Undergraduate Woodwind student who has passed the petition to major is a prerequisite for this class.

APM 332 | PIANO PEDAGOGY I | 2 quarter hours  
(Undergraduate)
Introduction to the field of piano teaching at the beginning through advanced elementary levels, with an emphasis on learning theories, instructional techniques, curriculum planning, studio organization and teaching materials. The first of a two course sequence. (2 quarter hours)
Status as an Undergraduate Keyboard student is a prerequisite for this class.

APM 333 | PIANO PEDAGOGY II | 2 quarter hours  
(Undergraduate)
An exploration of all aspects of intermediate level piano study, with emphasis on long/short term goals for musical/technical development, instructional techniques, teaching of functional and musicianship skills, survey of intermediate level teaching materials, grading and repertoire selection. The second of a two course sequence. (2 quarter hours)
Status as an Undergraduate Keyboard student is a prerequisite for this class.

APM 336 | VOICE PEDAGOGY | 2 quarter hours  
(Undergraduate)
Introduction to basic concepts of vocal pedagogy and the physiology of the singing voice. Through listening, evaluation, study, discussion, observation, and teaching, students will gain a better understanding of how to approach teaching beginning through advanced vocal students. (2 quarter hours)
An undergraduate vocal performance major is a prerequisite for this class.

APM 337 | ALEXANDER TECHNIQUE | 1 quarter hours  
(Undergraduate)
Introduction to the Alexander Technique as applied to musical performance. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.

APM 338 | ALEXANDER TECHNIQUE II | 1 quarter hours  
(Undergraduate)
This course continues the work begun in the Introduction to the Alexander Technique course. As students deepen their understanding and practice of the principles of Alexander Technique, they will continue to develop their awareness, improve their self-observation, and apply the principles to the practice and performance of their voice or chosen musical instrument. (1 quarter hour)
APM 337 is a prerequisite for this class.

</table>
APM 372 | ORCHESTRAL REPERTOIRE FOR BRASS | 2 quarter hours  
(Undergraduate)  
Study of standard orchestral repertoire for brass instruments. (2 quarter hours)  
An undergraduate brass performance major is a prerequisite for this class.

APM 373 | BRASS CONCEPTS | 2 quarter hours  
(Undergraduate)  
A study of brass literature, performance, and pedagogy. An introduction to professional career responsibilities and opportunities. (2 quarter hours)  
An undergraduate brass performance major is a prerequisite for this class.

APM 374 | BRASS INSTRUMENT PERFORMANCE STYLE | 2 quarter hours  
(Undergraduate)  
Survey of solo and orchestral performance styles through the principal composers of the 19th and 20th centuries. Analysis of new demands placed on performers in the 21st century. Study of stylistic concepts based on historical, technical, national, and aesthetic considerations. (2 quarter hours)  
APM 377 | GUITAR HISTORY AND LITERATURE I | 3 quarter hours  
(Undergraduate)  
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (3 quarter hours)  
Status as an Undergraduate Guitar Performance student is a prerequisite for this class.

APM 378 | GUITAR HISTORY AND LITERATURE II | 3 quarter hours  
(Undergraduate)  
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (3 quarter hours)  
Status as a Guitar Performance Major and APM 377 are prerequisites for this class.

APM 379 | GUITAR HISTORY AND LITERATURE III | 3 quarter hours  
(Undergraduate)  
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (3 quarter hours)  
Status as a Guitar Performance Major and APM 378 are prerequisites for this class.

APM 384 | STRING PEDAGOGY I | 2-3 quarter hours  
(Undergraduate)  
An introduction to the field of string teaching at the beginning through advanced levels, with an emphasis on traditional and Suzuki pedagogical approaches. A year-long sequence of courses. (2 quarter hours)  
Status as a String Performance, Guitar Performance, or Music Education Major is a prerequisite for this class.

APM 385 | STRING PEDAGOGY II | 2-3 quarter hours  
(Undergraduate)  
An introduction to the field of string teaching at the beginning through advanced levels, with an emphasis on traditional and Suzuki pedagogical approaches. A year-long sequence of courses. (2 quarter hours)  
Status as a String Performance, Guitar Performance, or Music Education major and APM 384 is a prerequisite for this class.

APM 386 | STRING PEDAGOGY III | 2-3 quarter hours  
(Undergraduate)  
An introduction to the field of string teaching at the beginning through advanced levels, with an emphasis on traditional and Suzuki pedagogical approaches. A year-long sequence of courses. (2 quarter hours)  
Status as a String Performance, Guitar or Music Education major and APM 385 is a prerequisite for this class.

APM 387 | STUDIO TEACHING AS A PROFESSION | 2 quarter hours  
(Undergraduate)  
Strategies and techniques for the professional studio teacher. (2 quarter hours)  
APM 389 | ADVANCED VOCAL DICTION | 1 quarter hours  
(Undergraduate)  
Advanced study of German, French, or Italian diction. Junior or senior status required. (1 quarter hour)  
APM 398 | INDEPENDENT STUDY | 4.00 quarter hours  
(Undergraduate)  
An in-depth study of an applied music topic under the supervision of a faculty member. (Departmental permission required). (variable credit)  
Status as a Music student is a prerequisite for this class.

APM 400 | OPERA WORKSHOP | 2 quarter hours  
(Graduate)  
An advanced course in opera repertoire; scenes of operas will be presented for public performance. (2 quarter hours)  
Status as a Graduate Music student is a prerequisite for this class.

APM 403 | MUSICAL COACHING FOR SINGERS | 2 quarter hours  
(Graduate)  
Students meet in a masterclass format for musical and diction coaching in their current repertoire. (2 quarter hours)  
APV 100 or APV 400 is a corequisite for this class.

APM 405 | GRADUATE RECITAL | 0 quarter hours  
(Graduate)  
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed during the graduate residence. This recital is required as partial fulfillment of the degree of Master of Music in Performance and for the post-Masters Certificate in Performance. (0 quarter hours)  
APB 410, APB 430, APB 465, APB 470, APB 475, APK 450, APK 460,APP 400, APS 427, APS 460, APS 480, APS 485, APS 490, APW 415, APW 420, APW 425, APW 435, APW 455, or APV 400 is a corequisite for this class.

APM 406 | HARPSCCORD PERFORMANCE PRACTICE | 2 quarter hours  
(Graduate)  
A practical introduction for pianists to the harpsichord, harpsichord repertoire from the late Renaissance to early Classical eras, and relevant performance practice and stylistic considerations. (2 quarter hours)  
Status as a Graduate Piano student or Music Performance certificate student is a prerequisite for this class.

APM 408 | BAROQUE PERFORMANCE PRACTICE-INSTRUMENTAL | 2 quarter hours  
(Graduate)  
This course focuses on the interpretation and performance of music from the Baroque era, concentrating primarily on 18th century literature. Open to all instrumentalists, students will study Baroque performance practice based on the treatises and various writings of the time, as well as current scholarly research of early music specialists. (2 quarter hours)  
Status as a Graduate Music student is a prerequisite for this class.
APM 409 | MUSIC ENTREPRENEURSHIP | 2 quarter hours
(Graduate)
Through opportunity creation, case study, discussion and peer evaluation, this course analyzes and simulates the professional performing arts marketplace, providing collaborative hands-on experience for performers and arts managers-in-training. In this course, performers will hone their musical point-of-view and create an original, self-produced performance opportunity in the DePaul community, with marketing materials and a business structure to support their project. Arts Management students will collaborate with performers on these projects, providing support to their colleagues in a way that models their future professional activities. Each student will also be responsible for analyzing a current successful model, identifying keys to success. This course is intended to bridge the transition from college to career, providing the artistic, career development and entrepreneurship training that have become essential in today's professional environment. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 411 | WOODWIND PEDAGOGY | 2 quarter hours
(Graduate)
This course is designed to provide students with an overview of the important aspects of woodwind pedagogy. Students will gain the necessary knowledge and skills to teach woodwind students of all ages and ability levels. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 412 | BAROQUE ORNAMENTATION FOR PERFORMERS | 2 quarter hours
(Graduate)
This class will be a cumulative survey of ornamentation, involving some improvisation, in Italian, French and German styles. Topics will cover the major Baroque composers and the principal forms and styles that a modern performer would encounter.
Status as a Graduate Music student is a prerequisite for this class.

APM 413 | MUSIC TECHNOLOGY FOR PERCUSSIONISTS | 1 quarter hours
(Graduate)
This course will help students to understand the role of technology and electronics in the history and development of Western percussion. Students will learn the necessary skills to work with electronic sound sources, how to mic and record percussion instruments effectively and how to use technology and electronics in the performance, study, and analysis of major electro-acoustic works for percussion. (1 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 414 | THE BUSINESS OF MUSIC FROM THE PERFORMER'S PERSPECTIVE | 2 quarter hours
(Graduate)
Explorations of the business aspects of the performing musician. Topics will include unions, networking, freelancing, audition preparation, taxes, and ethics. Seminar format. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 415 | ITALIAN DICTION/LANGUAGE LAB | 1 quarter hours
(Graduate)
This course is offered in conjunction with the first year of graduate vocal study, with an emphasis on the translation, pronunciation, grammatical understanding, and interpretation of Italian texts. (1 quarter hour)
Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 416 | GERMAN DICTION/LANGUAGE LAB FOR GRADUATE STUDENTS | 1 quarter hours
(Graduate)
This course is offered in conjunction with the first year of graduate vocal study, with an emphasis on the translation, pronunciation, grammatical understanding, and interpretation of German texts. (1 quarter hour)
Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 417 | FRENCH DICTION/LANGUAGE LAB FOR GRADUATE STUDENTS | 1 quarter hours
(Graduate)
This course is offered in conjunction with the first year of graduate vocal study, with an emphasis on the translation, pronunciation, grammatical understanding, and interpretation of French texts. (1 quarter hour)
Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 419 | PERFORMANCE PRACTICE AND CRITIQUE | 2 quarter hours
(Graduate)
This course will provide students with additional performance opportunities and will give them a chance to get critique from people not playing their instrument and, therefore, without the sympathy to its technical demands. Additionally, they will learn to criticize their peers in an appropriate and focused manner and will become better acquainted with the specifics of other instruments. (2 quarter hours)
Status as a Graduate Music Performance student (degree or certificate) is a prerequisite for this class.

APM 428 | ORCHESTRAL REPERTOIRE FOR WOODWINDS I: LITERATURE PERFORMANCE | 2 quarter hours
(Graduate)
Detailed study of significant woodwind orchestral literature, with special emphasis on improving ensemble skills. Each week will feature new repertoire to be rehearsed and performed during the class. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 429 | ORCHESTRAL REPERTOIRE FOR STRINGS | 2 quarter hours
(Graduate)
Study of standard orchestral repertoire for string instruments. (2 quarter hours)
Status as a Graduate String Performance student is a prerequisite for this class.

APM 432 | ORCHESTRAL REPERTOIRE FOR STRING BASS | 2.00 quarter hours
(Graduate)
Study of standard orchestral repertoire for string instruments. (2 quarter hours)
Status as a Graduate String Bass Performance student or Music Performance certificate student is a prerequisite for this class.

APM 433 | WOODWIND ORCHESTRAL REPERTOIRE II: AUDITION PREPARATION | 2 quarter hours
(Graduate)
An overview of orchestral woodwind auditions repertoire with special emphasis on auditions preparation and auditions. Students will take several mock auditions over the course of the quarter to improve their understanding of the audition experience. (2 quarter hours)
Status as a Woodwinds Performance student is a prerequisite for this class.
APM 437 | ALEXANDER TECHNIQUE | 1 quarter hours
(Graduate)
Introduction to the Alexander Technique as applied to musical performance. (1 quarter hour)
Status as a Graduate Music student is a prerequisite for this class.

APM 438 | ALEXANDER TECHNIQUE II | 1 quarter hours
(Graduate)
This course continues the work begun in the Introduction to the Alexander Technique course. As students deepen their understanding and practice of the principles of Alexander Technique, they will continue to develop their awareness, improve their self-observation, and apply the principles to the practice and performance of their voice or chosen musical instrument. (1 quarter hour)
APM 437 is a prerequisite for this class.

APM 440 | ORCHESTRAL CONDUCTING | 2 quarter hours
(Graduate)
This course is designed to train musicians in the art of understanding a score and in rehearsing any ensemble effectively. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 441 | ACCOMPANYING PRACTICUM | 1 quarter hours
(Graduate)
A practical examination of different styles of instrumental repertoire, and the art of accompanying vocalists (Fall Quarter) and instrumentalists (Winter and Spring Quarters) in both studio and performance formats. (1 quarter hour)
Status as a Graduate Piano student or Music Performance certificate student is a prerequisite for this class.

APM 442 | ACCOMPANYING CLASS | 2 quarter hours
(Graduate)
An in-depth study of the development of the specific skills necessary to effectively accompany vocal (Fall Quarter) and instrumental repertoire (Winter and Spring Quarters).
Status as a Graduate Piano student or Music Performance certificate student is a prerequisite for this class.

APM 446 | PERCUSSION PEDAGOGY | 2 quarter hours
(Graduate)
This course presents teaching techniques of all the major percussion instruments, for students of beginning through advanced levels of proficiency. The course includes an in-depth examination of pertinent published teaching materials, e.g. as method books and collections, as well as an exploration of techniques for motivating young students. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 447 | ORCHESTRAL REPERTOIRE: PERCUSSION | 2.00 quarter hours
(Graduate)
Study of standard orchestral repertoire. (2 quarter hours)
Status as a Graduate Percussion student is a prerequisite for this class.

APM 450 | CHORAL CONDUCTING AND ANALYSIS | 2 quarter hours
(Graduate)
Students will analyze, rehearse, and conduct repertoire for mixed chorus. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 453 | ADVANCED TECHNIQUES OF THE MUSIC STAGE | 2 quarter hours
(Graduate)
Study, coaching, rehearsal, and performance of music and opera. (2 quarter hours)
Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 460 | TOPICS IN PERFORMANCE | 1-4 quarter hours
(Graduate)
An in-depth investigation of a topic in performance studies. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 461 | PIANO LITERATURE | 2 quarter hours
(Graduate)
A study of brass literature, performance, and pedagogy. An introduction to professional career responsibilities and opportunities. (2 quarter hours)
Status as a Graduate Brass student is a prerequisite for this class.

APM 462 | ORCHESTRAL REPERTOIRE FOR BRASS | 1-2 quarter hours
(Graduate)
Study of brass literature, performance, and pedagogy. An introduction to professional career responsibilities and opportunities. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 464 | BRASS INSTRUMENT PERFORMANCE STYLE | 2 quarter hours
(Graduate)
Survey of solo and orchestral performance styles through the principal composers of the 19th and 20th centuries. Analysis of new demands placed on performers in the 21st century. Study of stylistic concepts based on historical, technical, national, and aesthetic considerations. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 467 | GUITAR HISTORY AND LITERATURE I | 3 quarter hours
(Graduate)
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (3 quarter hours)

APM 472 | ORCHESTRAL REPERTOIRE FOR BRASS | 1-2 quarter hours
(Graduate)
Study of standard orchestral repertoire for brass instruments. (2 quarter hours)

APM 474 | BRASS INSTRUMENT PERFORMANCE STYLE | 2 quarter hours
(Graduate)
Survey of solo and orchestral performance styles through the principal composers of the 19th and 20th centuries. Analysis of new demands placed on performers in the 21st century. Study of stylistic concepts based on historical, technical, national, and aesthetic considerations. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 477 | GUITAR HISTORY AND LITERATURE I | 3 quarter hours
(Graduate)
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (3 quarter hours)

APM 478 | GUITAR HISTORY AND LITERATURE II | 3 quarter hours
(Graduate)
Guitar History and Literature II. Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (3 quarter hours)

APM 479 | GUITAR HISTORY AND LITERATURE III | 3 quarter hours
(Graduate)
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (3 quarter hours)

APM 480 | GUITAR HISTORY AND LITERATURE IV | 3 quarter hours
(Graduate)
Guitar History and Literature IV. Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (3 quarter hours)
**Applied Professional Studies (AP)**

**AP 501 | PROFESSIONAL PLANNING PROSEMINAR | 4 quarter hours (Graduate)**

This seminar explores the aims of graduate education in relation to each student's focused program of study. In furthering the foundation for the Master of Arts degree in Applied Professional Studies, primary emphasis is placed on: a) enhancing facility with graduate level learning in the service of goals for personal/professional development; b) identifying paths and learning modalities available to in SCPS MAAPS; and c) selecting and developing a fitting focus area, to be expressed in a working draft of a detailed learning plan. To create the MAAPS learning plan, students build on their knowledge of content, standards, and issues in their field of professional study (Focus Area) and consider how Elements of Better Practice will impact their professional work. Structured track students will be introduced to the requirements of their track and all students will set up an Academic Committee that consists of the student Chairperson, the Faculty Mentor, and a Professional Advisor (an experienced professional in the student's Focus Area). Status as a MAAPS student or departmental permission is a prerequisite for this class.

**AP 502 | LEARNING PLAN REVIEW | 2 quarter hours (Graduate)**

Through this review process, students finalize their Graduate Learning Plans, convene their Academic Committees (comprised of themselves, their Professional Advisors, and their Faculty Mentors) to review their Learning Plans, and eventually submit their Learning Plans to the Graduate Student Program Review Committee (GSPRC) for final approval. (2 quarter hours)

Status as a MAAPS student or departmental permission is a prerequisite for this class.

**AP 504 | INVESTIGATING PROFESSIONAL PATHWAYS | 2 quarter hours (Graduate)**

In this course, students will use strategies of career mapping and field research along with principles of applied professional study to develop a professional pathway portfolio that will provide a current and solid foundation to their Focus Area in the MAAPS program. The course will build on student's existing professional training, experience, and networks and their current and evolving career goals, to create a customized portfolio to deepen the benefits from their degree requirements and guide their choices throughout the program. The portfolio will include current research into each student's field and into appropriate practice sites to ensure that they can put the concepts, theories and models they will learn in the MAAPS program to immediate and profitable use. To maximize efficiency, some career field research assignments in this course will be cross-listed with the MAAPS required course 450A, Managing and Assessing Information.

**AP 505 | FINDING AND MANAGING INFORMATION | 2 quarter hours (Graduate)**

This MAAPS/MSAT foundational course provides participants with skills in collecting, analyzing and synthesizing literature and resources in their respective area(s) of practice. Among these skills are: searching and accessing various sources; discerning credibility of sources; storing and retrieving information for oneself; constructing thematic literature reviews; and, citing sources using APA style. (2 quarter hours)

Status as a MAAPS or MSAT student is a prerequisite for this class.

---

**Applied Percussion (APP)**

**APP 100 | PERCUSSION | 1-4 quarter hours (Undergraduate)**

Advanced individual instruction in percussion performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

**APP 400 | PERCUSSION | 1-4 quarter hours (Graduate)**

Advanced individual instruction in percussion performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

---

**APM 486 | STRING PEDAGOGY | 2 quarter hours (Graduate)**

A study of the concepts and philosophies of teaching string instruments for beginners through advanced levels. In addition, approaches to coaching chamber music will be reviewed. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

**APM 487 | ADVANCED VOCAL DICTION | 1 quarter hours (Graduate)**

Advanced study in Italian, French and German diction, phrasing and text translation. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

**APM 488 | STUDIO TEACHING AS A PROFESSION | 2 quarter hours (Graduate)**

Strategies and techniques for the professional studio teacher. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

**APM 496 | VOICE PEDAGOGY | 2 quarter hours (Graduate)**

An introduction to basic concepts of vocal pedagogy and the physiology of the singing voice. Through listening, evaluation, study, discussion, observation, and teaching, students will gain a better understanding of how to approach teaching beginning through advanced vocal students. (2 quarter hours)

Status as a Voice graduate student is a prerequisite for this class.

**APM 498 | INDEPENDENT STUDY | 4.00 quarter hours (Graduate)**

An in-depth study of an applied music topic under the supervision of a faculty member. (variable credit)

Status as a Graduate Music student is a prerequisite for this class.

---

**APM 505 | FINDING AND MANAGING INFORMATION | 2 quarter hours (Graduate)**

This MAAPS/MSAT foundational course provides participants with skills in collecting, analyzing and synthesizing literature and resources in their respective area(s) of practice. Among these skills are: searching and accessing various sources; discerning credibility of sources; storing and retrieving information for oneself; constructing thematic literature reviews; and, citing sources using APA style. (2 quarter hours)

Status as a MAAPS or MSAT student is a prerequisite for this class.
AP 510 | MAIN THEORIES AND IDEAS | 2 quarter hours
(Graduate)
Through this competence area, students address knowledge and understanding of theories, models and/or theoretical frameworks, including implications for practice relevant to their individualized areas of focus. In areas where theories are not well established (e.g., in emerging fields of study or in unique combinations of fields), this area includes exploration of theories in related fields. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 520 | METHODS OF RESEARCH | 2 quarter hours
(Graduate)
Through this competence area, students address the systematic gathering of data and interpretation of findings as practiced within their areas of focus or related fields. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 528 | ASSESSMENT AND INTEGRATION I | 0.5 quarter hours
(Graduate)
Scheduled at intervals across the MAAPS Program, Assessment and Integration Sessions provide opportunity for students to meet with their faculty mentors for purposes of ongoing assessment and integration regarding all aspects of the program. (0.5 quarter hour)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 530 | SPECIALIZED SKILLS | 2 quarter hours
(Graduate)
Through this competence area, students identify, develop and demonstrate skills that are particular to their areas of focus and the context(s) in which these skills are applied. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 540 | COMMUNICATION MODES | 2 quarter hours
(Graduate)
Through this competence area, students identify, develop and demonstrate facility with communication modes relevant to their areas of focus. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 548 | ASSESSMENT AND INTEGRATION SEMINAR II | 0.5 quarter hours
(Graduate)
Scheduled at intervals across the MAAPS Program, Assessment and Integration Sessions provide opportunity for students to meet with their faculty mentors for purposes of ongoing assessment and integration regarding all aspects of the program. (0.5 quarter hour)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 550 | ORGANIZATIONAL AND/OR INTERPERSONAL DYNAMICS | 2 quarter hours
(Graduate)
Through this competence area, students address the human and structural issues relevant to professional practice in their areas of focus. This includes exploration regarding how professional practice per area of focus is affected by systems, technology, structure and other people. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 558 | ASSESSMENT AND INTEGRATION SEMINAR III | 0.5 quarter hours
(Graduate)
Scheduled at intervals across the MAAPS Program, Assessment and Integration Sessions provide opportunity for students to meet with their faculty mentors for purposes of ongoing assessment and integration regarding all aspects of the program. (0.5 quarter hour)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 560 | CHALLENGES FROM LARGER CONTEXTS | 2 quarter hours
(Graduate)
Through this competence area, students address the ability to situate their areas of focus (including their issues and problems) within one of the following contexts: the temporal context (historical development and future direction of the area of focus); the social/cultural context (relationship of the area of focus to its societal context); or, the international context (the state of the area of focus globally). (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 570 | ETHICAL ISSUES | 2 quarter hours
(Graduate)
Through this competence area, students address the relationship between beliefs and assumptions regarding humanity, good/evil, right/wrong, etc., and behavioral outcomes (including areas of conflict) relevant to their areas of focus. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 574 | REFLECTION IN/ON PRACTICE | 2 quarter hours
(Graduate)
Through this competence area, students address the interplay between thinking, doing and reflecting in order to generate new ways of mentally organizing ideas and identifying new possibilities to inform future practice their areas of focus. (2 quarter hours) Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 578 | ASSESSMENT AND INTEGRATION SEMINAR IV | 0.5 quarter hours
(Graduate)
Scheduled at intervals across the MAAPS Program, Assessment and Integration Sessions provide opportunity for students to meet with their faculty mentors for purposes of ongoing assessment and integration regarding all aspects of the program. (0.5 quarter hour)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 585 | SUPPLEMENTAL COMPETENCE I | 2 quarter hours
(Graduate)
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.
AP 586 | SUPPLEMENTAL COMPETENCE II | 2 quarter hours
(Graduate)
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (AP-586, AP-587, AP-588 and AP-589 collectively serve as a culmination option for the MAAPS degree.) (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 587 | SUPPLEMENTAL COMPETENCE III | 2 quarter hours
(Graduate)
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (AP-586, AP-587, AP-588 and AP-589 collectively serve as a culmination option for the MAAPS degree.) (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 588 | SUPPLEMENTAL COMPETENCE IV | 2 quarter hours
(Graduate)
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (AP-586, AP-587, AP-588 and AP-589 collectively serve as a culmination option for the MAAPS degree.) (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 589 | SUPPLEMENTAL COMPETENCE V | 2 quarter hours
(Graduate)
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (AP-586, AP-587, AP-588 and AP-589 collectively serve as a culmination option for the MAAPS degree.) (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 590 | PROF COMPETENCE: SPECIAL SUPPLEMENTAL | 1-6 quarter hours
(Graduate)
As an option to the Integrating Project, student may elect to develop and demonstrate an additional four areas of professional competence from among Theories, Research, Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues, and Reflection on Practice. (1 quarter hour)

AP 591 | INTEGRATING PROJECT PROPOSAL | 2 quarter hours
(Graduate)
Students develop and submit concise, well-honed documents proposing the nature and scope of their Final Integrating Projects. Topics being proposed are to be supported by relevant professional/scholarly literature and to include the use of appropriate method(s) of inquiry. (AP-591 and AP-592 serve as a culmination option for the MAAPS degree.) (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 592 | FINAL INTEGRATING PROJECT | 6 quarter hours
(Graduate)
In fulfillment of the approved Integrating Project Proposal (AP-591), students develop and submit an original, independently-conducted project that provides a significant contribution to their areas of focus. Such projects incorporate elements of theory and practice and demonstrate integration of liberal learning and focus area competencies from across the MAAPS Program. (AP-591 and AP-592 serve as a culmination option for the MAAPS degree.) (6 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

Applied Strings (APS)

APS 127 | GUITAR | 1-4 quarter hours
(Undergraduate)
Advanced individual instruction in guitar performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.
Status as an Undergraduate Music student is a prerequisite for this class.

APS 137 | HARP | 1-3 quarter hours
(Undergraduate)
Advanced individual instruction in harp performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.
Status as an Undergraduate Music student is a prerequisite for this class.

APS 160 | STRING BASS | 1-4 quarter hours
(Undergraduate)
Advanced individual instruction in string bass performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.
Status as an Undergraduate Music student is a prerequisite for this class.

APS 180 | VIOLA | 1-4 quarter hours
(Undergraduate)
Advanced individual instruction in viola performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.
Status as an Undergraduate Music student is a prerequisite for this class.

APS 185 | VIOLIN | 1-4 quarter hours
(Undergraduate)
Advanced individual instruction in violin performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.
Status as an Undergraduate Music student is a prerequisite for this class.
APS 190 | VIOLONCELLO | 1-4 quarter hours
(Undergraduate)
Advanced individual instruction in violoncello performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.

**Status as an Undergraduate Music student is a prerequisite for this class.**

APS 427 | GUITAR | 1-4 quarter hours
(Graduate)
Advanced individual instruction in guitar performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.

**Status as a Graduate Music student is a prerequisite for this class.**

APS 437 | HARP | 1-3 quarter hours
(Graduate)
Advanced individual instruction in harp performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.

**Status as a Graduate Music student is a prerequisite for this class.**

APS 460 | STRING BASS | 1-4 quarter hours
(Graduate)
Advanced individual instruction in string bass performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.

**Status as a Graduate Music student is a prerequisite for this class.**

APS 480 | VIOLA | 1-4 quarter hours
(Graduate)
Advanced individual instruction in viola performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.

**Status as a Graduate Music student is a prerequisite for this class.**

APS 485 | VIOLIN | 1-4 quarter hours
(Graduate)
Advanced individual instruction in violin performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.

**Status as a Graduate Music student is a prerequisite for this class.**

---

**Applied Technology (AT)**

**AT 580 | INTRODUCTION TO APPLIED TECHNOLOGY | 2 quarter hours**
(Graduate)
Through various learning processes (individual research and study, interactive sessions, individualized meetings with faculty, etc.), this seminar explores the aims of graduate education within the program of study leading to the Master of Science in Applied Technology?its purpose, scope, philosophy, key roles and processes. Special emphasis is placed on developing a baseline context for graduate study including a literature-based initial exploration into one?s specialized MSAT track. (2 quarter hours)

**Status as an MSAT student or departmental permission is a prerequisite for this class.**

**AT 587 | INDIVIDUALIZED WORK-BASED PROJECT | 4 quarter hours**
(Graduate)
In fulfillment of the approved project proposal, this project enables students to enhance and demonstrate their ability to investigate and contribute to (and/or problem-solve regarding) a work-based challenge applicable to their professional practice and MSAT track. In so doing, students deepen their self-managed inquiry, resourcefulness, initiative-taking and disciplined follow-through as advanced professionals. [Each student is advised to delay registering for AT-587 until after his/her project proposal is officially approved. Thereafter, as a graduate culmination project, there are no class-sessions associated with AT-587. Each student is to follow directives outlined in the official project approval material and initiate sessions with faculty as needed.]

**Status as an MSAT student or departmental permission is a prerequisite for this class.**

**AT 589 | INDIVIDUALIZED REFLECTIVE PRACTICE PROJECT | 4 quarter hours**
(Graduate)
In fulfillment of the approved project proposal, this project enables students to engage and expand their professional practice as reflective practitioners. Students enhance their ability to describe and analyze a particular method or process of reflection and apply it or they describe and analyze a particular aspect of their professional practice and demonstrate improved functioning through focused/applied reflection. In so doing, students deepen their self-managed inquiry, resourcefulness, initiative-taking and disciplined follow-through as advanced professionals. [Each student is advised to delay registering for AT-589 until after his/her project proposal is officially approved. Thereafter, as a graduate culmination project, there are no class-sessions associated with AT-589. Each student is to follow directives outlined in the official project approval material and initiate sessions with faculty as needed.]

**Status as an MSAT student or departmental permission is a prerequisite for this class.**

**AT 598 | CURRENT TOPICS IN APPLIED TECHNOLOGY | 1-8 quarter hours**
(Graduate)
Current Topics in Applied Technology.

**Status as an MSAT student or departmental permission is a prerequisite for this class.**
**Applied Voice (APV)**

**APV 100 | VOICE-STUDIO | 1-4 quarter hours**  
(Undergraduate)  
Advanced individual instruction in voice performance at the undergraduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.  
*Status as an Undergraduate Music student is a prerequisite for this class.*

**APV 415 | BASSOON | 1-4 quarter hours**  
(Graduate)  
Advanced individual instruction in bassoon performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.  
*Status as a Graduate Music student is a prerequisite for this class.*

**APV 420 | CLARINET | 1-4 quarter hours**  
(Graduate)  
Advanced individual instruction in clarinet performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.  
*Status as a Graduate Music student is a prerequisite for this class.*

**APV 425 | FLUTE | 1-4 quarter hours**  
(Graduate)  
Advanced individual instruction in flute performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.  
*Status as a Graduate Music student is a prerequisite for this class.*

**APV 435 | OBOE | 1-4 quarter hours**  
(Graduate)  
Advanced individual instruction in oboe performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.  
*Status as a Graduate Music student is a prerequisite for this class.*

**APV 455 | SAXOPHONE | 1-4 quarter hours**  
(Graduate)  
Advanced individual instruction in saxophone performance at the graduate level. Graduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 18 credits of applied lessons over their entire course of study.  
*Status as a Graduate Music student is a prerequisite for this class.*

**Applied Woodwinds (APW)**

**APW 115 | BASSOON | 1-4 quarter hours**  
(Undergraduate)  
Advanced individual instruction in bassoon performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.  
*Status as an Undergraduate Music student is a prerequisite for this class.*

**APW 120 | CLARINET | 1-4 quarter hours**  
(Undergraduate)  
Advanced individual instruction in clarinet performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.  
*Status as an Undergraduate Music student is a prerequisite for this class.*

**APW 125 | FLUTE | 1-4 quarter hours**  
(Undergraduate)  
Advanced individual instruction in flute performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.  
*Status as an Undergraduate Music student is a prerequisite for this class.*

**APW 135 | OBOE | 1-4 quarter hours**  
(Undergraduate)  
Advanced individual instruction in oboe performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.  
*Status as an Undergraduate Music student is a prerequisite for this class.*

**APW 155 | SAXOPHONE | 1-4 quarter hours**  
(Undergraduate)  
Advanced individual instruction in saxophone performance at the undergraduate level. Undergraduate music students are limited to 3 credits of applied lessons in any given quarter, and may not exceed a total of 36 credits of applied lessons over their entire course of study.  
*Status as an Undergraduate Music student is a prerequisite for this class.*

**Arabic (ARB)**

**ARB 101 | BASIC ARABIC I | 4 quarter hours**  
(Undergraduate)  
Arabic 101 is the first in a series of Arabic courses taught at DePaul. Students will be taught the basic skills needed to communicate in Arabic including comprehension, speaking, reading, and writing. Basic grammar will be introduced to facilitate communication. Students will be exposed to authentic Arabic materials from different Arab countries according to the students’ language skills and interests.

**ARB 102 | BASIC ARABIC II | 4 quarter hours**  
(Undergraduate)  
Arabic 102 is the second in a series of Arabic courses taught at DePaul. Students learn the basic skills needed to communicate in Arabic including comprehension, speaking, reading, and writing. Instruction will build on skills taught in Arabic 101. The main focus of the course will continue to be communicative skills, and grammar will be introduced to facilitate communication. The course will be taught mainly in Arabic using Modern Standard Arabic.
ARB 103 | BASIC ARABIC III | 4 quarter hours
(Undergraduate)
Arabic 103 is the third in a series of Arabic courses taught at DePaul. Students learn the basic skills needed to communicate in Arabic including comprehension, speaking, reading, and writing. Instruction will build on skills taught in Arabic 101 & 102. The main focus of the course will continue to be communicative skills, and grammar will be introduced to facilitate communication. The course will be taught mainly in Arabic using Modern Standard Arabic.

ARB 104 | INTERMEDIATE ARABIC I | 4 quarter hours
(Undergraduate)
Intermediate Arabic I is the first course of three intermediate Arabic courses that focus on taking students to the advanced level of proficiency by expanding their knowledge of Arab culture, building their vocabulary, and developing their grammar skills. Intermediate Arabic will focus on broadening students' knowledge of the Arabic language beyond the daily life topics. Students will be introduced to examples of authentic materials of Arabic Literature that include topics of general and professional interests, in order to increase students' comprehension skills and prepare them to understand the literary and cultural context of the Arabic language. In addition, this course will emphasize two main points: (1) how mastering grammar concepts is crucial for understanding Arabic texts as well as for communicating clearly in speech and writing, and (2) how the derivation system is key for developing vocabulary. ARB 103 or equivalent, including placement test or permission of instructor, is recommended.

ARB 105 | INTERMEDIATE ARABIC II | 4 quarter hours
(Undergraduate)
Intermediate Arabic II is the second course of three intermediate Arabic courses that focus on taking students to the advanced level of proficiency by expanding their knowledge of Arab culture, building their vocabulary, and developing their grammar skills. Intermediate Arabic will focus on broadening students' knowledge of the Arabic language beyond the daily life topics. Students will be introduced to examples of authentic materials of Arabic Literature that include topics of general and professional interests, in order to increase students' comprehension skills and prepare them to understand the literary and cultural context of the Arabic language. In addition, this course will emphasize two main points: (1) how mastering grammar concepts is crucial for understanding Arabic texts as well as for communicating clearly in speech and writing, and (2) how the derivation system is key for developing vocabulary. ARB 103 or equivalent, including placement test or permission of instructor, is recommended.

ARB 106 | INTERMEDIATE ARABIC III | 4 quarter hours
(Undergraduate)
Intermediate Arabic III is the third course of three intermediate Arabic courses. The course will focus on using the skills the students developed to effectively communicate in Modern Standard Arabic orally and in writing. Students will be introduced to authentic Arabic text and audio material from different Arab countries. Instruction will be provided mainly in Arabic using Modern Standard Arabic. Students are expected to speak and respond to questions in Arabic. This is an effective approach to language learning that emphasizes communicative abilities and helps to successfully transition students into upper level Arabic courses. ARB 105 or equivalent, including placement test or permission of instructor, is recommended.

ARB 130 | MOLILSAP STUDY ABROAD | 2 quarter hours
(Undergraduate)
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

ARB 197 | SPECIAL TOPICS IN ARABIC | 4 quarter hours
(Undergraduate)
See schedule for current offerings.

ARB 198 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)
Variable credit.

ARB 199 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)
Variable credit.

ARB 201 | ADVANCED ARABIC I | 4 quarter hours
(Undergraduate)
Advanced reading and comprehension, with emphasis on recognizing and understanding the perspectives and patterns of Arabic culture. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 202 | ADVANCED ARABIC II | 4 quarter hours
(Undergraduate)
Advanced practice in writing and composition, with emphasis on grammatical accuracy, text development skills, and vocabulary expansion. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 203 | ADVANCED ARABIC III | 4 quarter hours
(Undergraduate)
Advanced practice of oral skills in both formal and informal usage, with emphasis on correct pronunciation, sentence structure, appropriate vocabulary, and cultural context. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 297 | SPECIAL TOPICS IN ARABIC | 4 quarter hours
(Undergraduate)
See schedule for current offerings.

ARB 298 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)
Variable credit.

ARB 299 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)
Variable credit.

ARB 300 | ARABIC GRAMMAR | 4 quarter hours
(Undergraduate)
A comprehensive review of Arabic grammar with focus on its application to the development of communicative competence. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.
ARB 301 | ARAB BROADCAST MEDIA | 4 quarter hours  
(Undergraduate)  
This course improves students' competence in listening, reading comprehension, writing, and presentation skills in the content of Arab media. The main language of instruction will be Modern Standard Arabic (MSA), the language of Arab news. Both instructor and students will be using MSA as the main language for communication. Classroom instruction will assist students in acquiring and using Arabic vocabulary needed for understanding and analyzing authentic Arabic media material. The course will focus on five main topics: (1) Meetings and Conferences, (2) Demonstrations, (3) Elections, (4) Courts and Trails, and (5) Finance and Business. In addition to topics and vocabulary covered in the required textbooks, students will listen to and discuss authentic news items. They will also be exposed to Egyptian dialect. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 302 | ARABIC PRINT MEDIA | 4 quarter hours  
(Undergraduate)  
This course consists of intensive exposure to vocabulary and expressions characteristic of language used in Arab media. The course will rely on newspaper articles and authentic material in addition to the Media Arabic textbook. The focus of the course will be on enforcing vocabulary learned in ARB 301 that will assist students in understanding the content of Arab print Media and translating texts into English. Presentations and discussions will be used to enforce meaning and increase vocabulary retention and proper use. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 311 | ARABIC SHORT STORIES | 4 quarter hours  
(Undergraduate)  
A survey of the history and development of short stories in Arabic literature from various Arab countries with focus on language, content analysis, forms, and cultural content relevant to major elements of Arab culture. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 313 | ARABIC FILM | 4 quarter hours  
(Undergraduate)  
Survey of the development of Arabic films in the Arab world with examination of sample works from various periods that allow reflection on Arab culture and the social, political, and religious issues that define that culture. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 320 | BUSINESS ARABIC | 4 quarter hours  
(Undergraduate)  
Content-based instruction with focus on business vocabulary, syntax, and basic linguistic skills necessary for functioning in an Arab business context. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 330 | ARABIC TRANSLATION | 4 quarter hours  
(Undergraduate)  
Focuses on the thorough introduction to translation (including theory) and the latest technologies available to translators: web-based dictionaries, thesauruses, etc. Introduces students to various translation techniques and emphasizes the need for technical knowledge as required by specific fields. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 350 | ARABIC LITERATURE | 4 quarter hours  
(Undergraduate)  
This course introduces the students to Modern Arabic Literature in form, language, and content. It will focus on various genres, including poetry, drama, the novel, and short stories. Works by major Arab writers and poets representing various regions and content will be examined and analyzed to develop an appreciation for Arab literature and a deeper understanding of their portrayal of Arab culture. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 392 | INTERNSHIP | 1-8 quarter hours  
(Undergraduate)  
Variable credit. Includes readings, weekly reflections, and a final report.

ARB 395 | FOREIGN LANGUAGES ACROSS THE CURRICULUM | 2 quarter hours  
(Undergraduate)  
See schedule for current offerings.

ARB 397 | SPECIAL TOPICS IN ARABIC | 4 quarter hours  
(Undergraduate)  
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Arabic. Students must have the equivalent of 106 or higher ability in Arabic to take this two credit component. Please contact the Department of Modern Languages if you have questions about this courses or about language placement.

ARB 398 | STUDY ABROAD | 1-8 quarter hours  
(Undergraduate)  
Variable credit.

ARB 399 | INDEPENDENT STUDY | 0.5-8 quarter hours  
(Undergraduate)  
Variable credit.

ARB 400 | ARABIC GRAMMAR | 4 quarter hours  
(Graduate)  
A comprehensive review of Arabic grammar with focus on its application to the development of communicative competence. Cross-listed with ARB 300.

ARB 401 | ARAB BROADCAST MEDIA | 4 quarter hours  
(Graduate)  
This course improves students’ competence in listening, reading comprehension, writing, and presentation skills in the content of Arab media. The main language of instruction will be Modern Standard Arabic (MSA), the language of Arab news. Both instructor and students will be using MSA as the main language for communication. Classroom instruction will assist students in acquiring and using Arabic vocabulary needed for understanding and analyzing authentic Arabic media material. The course will focus on five main topics: (1) Meetings and Conferences, (2) Demonstrations, (3) Elections, (4) Courts and Trails, and (5) Finance and Business. In addition to topics and vocabulary covered in the required textbooks, students will listen to and discuss authentic news items. They will also be exposed to Egyptian dialect.
ARB 402 | ARABIC PRINT MEDIA | 4 quarter hours
(Graduate)
This course consists of intensive exposure to vocabulary and expressions characteristic of language used in Arab media. The course will rely on newspaper articles and authentic material in addition to the Media Arabic textbook. The focus of the course will be on enforcing vocabulary learned in ARB 301 that will assist students in understanding the content of Arab print Media and translating text into English. Presentations and discussions will be used to enforce meaning and increase vocabulary retention and proper use.

ARB 411 | ARABIC SHORT STORIES | 4 quarter hours
(Graduate)
A survey of the history and development of short stories in Arabic literature from various Arab countries with focus on language, content analysis, forms, and cultural content relevant to major elements of Arab culture. Cross-listed with ARB 311.

ARB 413 | ARABIC FILM | 4 quarter hours
(Graduate)
Survey of the development of Arabic films in the Arab world with examination of sample works from various periods that allow reflection on Arab culture and the social, political, and religious issues that define that culture. Cross-listed with ARB 313.

ARB 420 | BUSINESS ARABIC | 4 quarter hours
(Graduate)
Content-based instruction with focus on business vocabulary, syntax, and basic linguistic skills necessary for functioning in an Arab business context. Cross-listed with ARB 320.

ARB 430 | ARABIC TRANSLATION | 4 quarter hours
(Graduate)
Focuses on the thorough introduction to translation (including theory) and the latest technologies available to translators: web-based dictionaries, thesauruses, etc. Introduces students to various translation techniques and emphasizes the need for technical knowledge as required by specific fields. Cross-listed with ARB 330.

ARB 450 | ARABIC LITERATURE | 4 quarter hours
(Graduate)
This course introduces the students to Modern Arabic Literature in form, language, and content. It will focus on various genres including poetry, drama, the novel, and short stories. Work by major Arab writers and poets representing various regions and content will be examined and analyzed to develop an appreciation for Arab literature and a deeper understanding of their portrayal of Arab culture.

ARB 497 | SPECIAL TOPICS IN ARABIC | 4 quarter hours
(Graduate)
See schedule for current offerings.

ARB 498 | STUDY ABROAD | 4-8 quarter hours
(Graduate)
Variable credit.

ARB 499 | INDEPENDENT STUDY | 1-8 quarter hours
(Graduate)
Variable credit.

Art and Architecture, History of (HAA)

HAA 101 | INTRODUCTION TO AFRICAN ART | 4 quarter hours
(Undergraduate)
This course is based on a series of important issues in the study of African art, such as medium and color, portraiture, the artist and innovation, relationships with language, royal patronage, divination, gender, aesthetics, Othering, and authenticity. The course will explore each of these concepts through a variety of artistic traditions from the continent. In this manner, students will gain basic theoretical tools which will enable them to work with art from across Africa.

HAA 115 | INTRODUCTION TO ASIAN ART | 4 quarter hours
(Undergraduate)
An introduction to major developments of art and architecture across Asia including South Asia, Southeast Asia, the Himalayas, and East Asia. This course examines not only painting, sculpture, and architecture, but also gardens, ceramics, and prints. Special emphasis will be placed on religious arts of Buddhism and Hinduism, along with landscape and figural painting of China and Japan.

HAA 130 | INTRODUCTION TO EUROPEAN ART | 4 quarter hours
(Undergraduate)
This introductory-level course examines art historical methods and their application to a broad chronological survey of European art and architecture from pre-history to the twentieth century. Field trips to Chicago art institutions enhance the understanding of historical traditions and critical methods taught in class lectures and discussions.

HAA 145 | INTRODUCTION TO ARTS OF THE AMERICAS | 4 quarter hours
(Undergraduate)
What is distinctive about art created over time on the American continents? This class begins to answer this question by examining some of the principal developments in art history from the ancient indigenous cultures (particularly those of Meso- and South America), through the period of European colonialism (especially Spanish and English), to the modern art movements across the sovereign nations, including the United States and Canada. Since time permits only a sampling of artistic forms across time, lectures are often issue-oriented, with a focus on selected problems facing scholars. Periodic discussions allow students to weigh in on topics and offer their own critiques. This class argues that the distinctiveness of American visual forms springs from the heterogeneous cultural traditions that simultaneously divide and unify its inhabitants.
HAA 200 | SPECIAL TOPICS ON THE ART INSTITUTE | 4 quarter hours
(Undergraduate)
In coordination with the University’s partnership with the Art Institute of Chicago, this Special Topics class exploits an invaluable resource in our own city, to teach students about one or more specific collections or exhibitions. The class also works to think holistically about the development of the museum itself within the context of Chicago’s own social history. With an encyclopedic collection consisting of 11 distinct curatorial departments, the Art Institute is both museum and research institution, thus offering students the opportunity to explore ideas at a variety of important levels. Class lectures and activities will consider specific aspects of the museum’s art and architecture, remaining flexible enough in its format to accommodate opportunities provided by any special exhibitions that may be on display during a given quarter. Meetings will take place primarily in the classroom, with intermittent visits to the museum, both during and outside of class time.

HAA 201 | ANCIENT AFRICAN ART | 4 quarter hours
(Undergraduate)
This course surveys a selection of artistic traditions from across the African continent beginning with the earliest attempts by humanity to visually represent complex thought until the Portuguese began trading along the coast of West Africa in the mid-fifteenth century. Emphasis is placed on demonstrating connectedness with a larger cultural environment, while also suggesting connections to future artistic traditions.

HAA 202 | CLASSICAL AFRICAN ART | 4 quarter hours
(Undergraduate)
This course surveys a selection of artistic traditions from across the African continent beginning with the arrival of the Portuguese along the coast of West Africa in the mid-fifteenth century. While the impact of a European presence helps define the boundaries of this course, artistic response to that presence is but one theme. Interactions between African cultures and the impact of Islam are equally important considerations.

HAA 203 | POST-COLONIAL AFRICAN ART | 4 quarter hours
(Undergraduate)
This course surveys African art from the age of African independence in the 1960s until the present day. The meaning of the term contemporary as it applies to African art is questioned in this course. The position of the artist between African artistic tradition and the global art market is also of vital importance.

HAA 210 | AFRICAN AMERICAN ART: 1800 TO THE PRESENT | 4 quarter hours
(Undergraduate)
This course surveys the work of African American artists, from the nineteenth century to the present. Lectures will cover a wide range of visual media, including painting, sculpture, photography, art criticism and performances.

HAA 215 | CHINESE ART | 4 quarter hours
(Undergraduate)
This is a chronological survey of premodern Chinese art from antiquity to the nineteenth century. Special attention is given to sculpture and painting, but architecture and ceramics are also covered. There is an emphasis on prehistoric bronze vessels, Buddhist sculpture, and landscape painting of the Song through Qing periods.
HAA 230 | ART AND EMPIRE IN THE ANCIENT WORLD | 4 quarter hours
(Undergraduate)
This course explores the art of the ancient period (ca. 30,000 BCE - 330 CE) from a broad range of cultures and styles: from the Paleolithic cave paintings to the Roman Colosseum, from the pyramids of Egypt to the Parthenon in Greece. We consider how art, religion, urbanism, and writing profoundly affected the development of the ancient Mediterranean and Mesopotamian world. We analyze major stylistic trends and explore the relationship between art, culture, and religion. We also discuss the role of art in the hands of political leaders and the profound interconnectedness of ancient civilizations. Frequent discussions will analyze controversies in the study of ancient art and scrutinize topics such as gender, power, aesthetics, and authenticity.

HAA 231 | CONQUEST & CONVERSION: THE ART OF THE EARLY MIDDLE AGES | 4 quarter hours
(Undergraduate)
This course treats the art of the early Medieval period, which spans the fourth to the eleventh centuries CE and includes Roman, Celtic, Gothic, Merovingian, Anglo-Saxon, Carolingian, Viking, and Ottonian cultures. In thinking about factors such as historical context, dynamics of production, and audience, we will come to understand the role of art and architecture in announcing power and extent of territory, staging public rituals, proclaiming social status, inspiring faith, and accommodating the dead.

HAA 232 | AGE OF CATHEDRALS: THE ART OF THE LATER MIDDLE AGES | 4 quarter hours
(Undergraduate)
This course explores the art of the late Medieval period, which spans the eleventh to the fifteenth centuries CE in countries such as France, Germany, Italy, and England. In our study of the Romanesque and Gothic art and architecture, we will explore issues related to production, display, and function and, thereby, come to better understand a world marked by pilgrimage and the cult of relics, chivalry, pageantry, and conflict.

HAA 233 | THE ART OF CRUSADING | 4 quarter hours
(Undergraduate)
This course focuses on the Crusades. More specifically, it focuses on the world within which the Crusades were born and the Levantine kingdom built as a result of their initial success. Our study will depend on primary artistic, literary, and archaeological materials, as well as the secondary scholarship that has identified and interpreted these materials. Our understanding of this historical moment will be nuanced by the questions we ask of both. The payoff will be an appreciation for the religious, social, political, and artistic forces that defined the twelfth and thirteenth centuries in Europe and in the Mediterranean basin, leading as they did to such fascinating phenomena as pilgrimage, the cult of relics, chivalry, holy war, the rise of military orders, and the establishment of the Latin Kingdom of Jerusalem itself.

HAA 234 | BYZANTINE ART | 4 quarter hours
(Undergraduate)
This course explores the art of the Byzantine Empire from the founding of Constantinople in 330 CE to the fall of the city to the Ottomans in 1453. Lectures and readings focus primarily on how contemporaries understood and interacted with a diverse group of monuments and objects now classified as Byzantine art. Significant attention will be devoted to how works of art functioned in the service of imperial and ecclesiastical ideology. Discussions analyze how Byzantine art was appreciated and appropriated in both the medieval Mediterranean and in modern scholarship.

HAA 235 | RUSSIA: MEDIEVAL MOMENTS, IMPERIAL DAYS & WHITE NIGHTS IN NOVGOROD & ST. PETERSBURG | 4-8 quarter hours
(Undergraduate)
This study abroad program in Russia allows students the opportunity to explore Novgorod, the medieval trading empire and center of Orthodox spirituality and the Russian imperial gem of St. Petersburg, while studying medieval art and the history of Imperial Russia. Both cities have been designated UNESCO World Heritage Sites and showcase the best of medieval and modern Russia by providing one of the world's richest ensembles of urban planning, art, architecture, and historical treasures.

HAA 236 | NORTHERN RENAISSANCE ART | 4 quarter hours
(Undergraduate)
This course features the most significant works of art, their artists and patrons, the social and economic aspects of artistic production, and the dominant cultural issues that flowed brilliantly in Northern Europe - above all, in France, the Netherlands, Bohemia, and German-speaking lands - between 1300 and 1600, that is, during the volatile period of the Renaissance and outbreak of the Protestant Reformation. And although Flemish oil painting offers the most evident legacy of the Northern Renaissance to the casual museum visitor, this course also introduces the most important outputs in printmaking; sculpture; and the industrial arts, as in tapestry weaving and the fabrication of luxury articles in metalwork.

HAA 237 | ITALIAN RENAISSANCE ART | 4 quarter hours
(Undergraduate)
This course concentrates on the architecture and pictorial arts that flourished on the Italian peninsula between ca. 1300 and 1600, although selected forays are undertaken into comparative European and Asian cultures. Its content focuses on the most significant works of art and architecture, including the technical arts; the key personalities, above all, the artists and their patrons; and a broad range of cultural and political issues that affected artistic thinking and production.

HAA 238 | BAROQUE ART | 4 quarter hours
(Undergraduate)
Starting in 1600, from the vantage point of the Counter-Reformation and the rise of modern European states, Baroque Art covers the principal works of art and architecture; artists and patrons; and a wide sweep of social, religious, and political, conditions that impacted cultural thinking and production in the seventeenth century. Attention is focused on the most prominent artistic centers in Italy, the Spanish Netherlands, England, Spain, the Dutch Republic, and France. The in-class lectures with discussion are accompanied by field work to the Baroque collections of the Art Institute of Chicago.

HAA 239 | 19TH CENTURY EUROPEAN ART | 4 quarter hours
(Undergraduate)
This course is an introductory survey of major artists and movements in nineteenth century European art. This was a period of great change, both in the world and in the arts; it determined the modern world. This class primarily explores paintings and sculptures, but printmaking, photography, and architecture are drawn in as well. Artworks are treated as historical objects and texts with their own aesthetic properties, but also as reflective of major events such as the Industrial Revolution, political upheaval, and colonialism. Included is discussion of marginalized artists and populations, and connections to issues in the contemporary world.
HAA 240 | ART FROM 1900-1945 | 4 quarter hours
(Undergraduate)
This course examines the major artists, movements, and issues at play in the visual arts of Europe from 1900 to the outbreak of World War II. Lectures and class discussions address how modern art, often oppositional and contradictory in nature, responds to, reflects, or builds on the effects of modernization (i.e. urbanization, industrialization, and global capitalism). Modern art objects will be read for both stylistic innovation and for connections to specific historical developments. Significant themes addressed include the character and history of the avant-garde, the relationship between high art and mass culture, the changing identities and aims of the modern artist, and the institutional basis of art production.

HAA 242 | ART FROM 1945 - 1975 | 4 quarter hours
(Undergraduate)
This course considers the art and culture of Western Europe and the United States from World War II through the Vietnam War. Beginning with the period of high modernism, major art historical movements and highly distinct aesthetic practices will be examined in order to foreground the complex relations that exist between art making and specific socio-historical contexts. Topics to be addressed include the development of the arts after World War II, the role of art in a consumerist and spectacle-driven society, the dematerialization of the art object, and the shift from late modernist to postmodern sensibilities. Students will be introduced to a range of theoretical models which foreground structural and formal investigations, as well as issues of social and historical analysis.

HAA 243 | MAYA ART AND ARCHITECTURE | 4 quarter hours
(Undergraduate)
The "Classic Period" Maya (ca. 0-900 CE) are the source of modern interest for their graceful naturalism in a wide range of art forms and for their impressive architecture whose ruins today are found scattered across Southern Mexico, the Yucatan Peninsula, Guatemala, Belize, and Honduras. This class explores the political, social, economic and religious imperatives behind the soaring temples, intriguing ballcourts, stately public sculptures, delicately painted vases, complex manuscripts and much more. We will situate the art of the Maya relative to other Mesoamerican cultures, particularly those of the Olmec, Teotihuacan and Aztec, and with respect to the Spanish colonial invasion. Other themes include aesthetics, materiality, gender, interpretive methodologies, and the impact of hieroglyphics and calendrics on the study of Maya art.

HAA 244 | AZTEC, MAYA, OLMEC: MESOAMERICAN ART | 4 quarter hours
(Undergraduate)
This survey of art of the ancient Mesoamerica (ca. 1000 BCE - 1520 CE) focuses on the most artistically significant civilizations of Middle America and some of the difficulties encountered in studying them. Lectures explore visual traditions as diverse as the people they reflect; cultures to be covered include the Olmec, Maya, Teotihuacan, and Aztec. We consider the relationship between form and content, and the relationship between art and its social context, as much as we can understand it; however, especially because of the scarcity of primary source texts for the material, the class will also regularly raise questions of methodology in what is often identified as "pre-Columbian" scholarship.

HAA 245 | ART OF THE ANDES | 4 quarter hours
(Undergraduate)
This survey of art of the ancient Andes (ca. 1000 BCE - 1530 CE) focuses on the most artistically significant civilizations of South America and some of the difficulties encountered in studying them. Lectures explore visual traditions as diverse as the people they reflect; cultures to be covered include the Nazca, Moche, Tiahuanaco, Wari and Inca of Peru. We consider the relationship between form and content, and the relationship between art and its social context, as much as we can understand it; however, especially because of the scarcity of primary source texts for the material, the class will also regularly raise questions of methodology in what is often identified as "pre-Columbian" scholarship.

HAA 246 | ART IN THE SPANISH AMERICAN EMPIRE | 4 quarter hours
(Undergraduate)
This course offers a critical survey of the art of colonial Latin America (ca. 1520 - 1820), from the Caribbean to Mexico, Central America, and South America. Framed by the Spanish Conquest of the sixteenth century and Independence in the early nineteenth century, lectures will survey state-sanctioned arts of the iberial colonizers, including the foundations of the Catholic Church across the 'New World' landscape. Race will be a frequent issue of discussion as we consider both indigenous American and African participation in social realities and artistic practice in this colonial context.

HAA 247 | MODERN LATIN AMERICAN ART | 4 quarter hours
(Undergraduate)
This class is a survey of Latin American art created since the Wars of Independence which helped to create the modern nations in the nineteenth century (i.e. 1820s through the present). Lectures consider the struggle of artists to articulate newly sovereign identities through visual production, even as complicated relationships with Europe and increasingly, the United States, continue. Topics covered include Latin American modernism, surrealism, radical arts, and social realism, with a special consideration of post-revolutionary Mexican mural painting.

HAA 248 | MEXICAN ART | 4 quarter hours
(Undergraduate)
This survey situates the art of Greater Mexico in its rich historical context, from the territory on the eve of the Spanish Conquest to the early decades of the twenty-first century. From Aztec imperial art to colonial works, to efforts at nation-building through visual forms, the story of Mexican art is characterized by political and social change. Readings, lectures, and discussion will touch on critical issues of race, class, and gender, and take up themes such as miscegenation, indigenism, nationalism, and Mexico's place in the global art world. We will study famous works, such as the Aztec Calendar Stone, the Catholic image of the Virgin of Guadalupe, the post-revolutionary murals of Diego Rivera and the more intimate paintings of Frida Kahlo, but we will also consider less familiar art that has been equally important in the construction of Mexico and its identities.

HAA 260 | AMERICAN ART | 4 quarter hours
(Undergraduate)
This course examines American art (the British colonies and United States) from the colonial period to the mid-twentieth century. Works of art are examined both in relation to American social and cultural history and also as aesthetic objects. The overarching themes of the class include the “American-ness” of American art, the relationship between American and European art, the function and production of art, and the expanding definition of American expression through multicultural diversity.
HAA 263 | HISTORY OF INTERIOR DESIGN | 4 quarter hours  
(Undergraduate)  
A survey of the history of interior design as expressed in residential architecture, furniture, and the decorative arts from antiquity to the present. The aim of this class is to understand interiors and furnishings throughout history, considering their function, style, materials, and fabrication in relation to their cultures and to the built environment. To this end, students will learn to identify, analyze, and understand historic styles of interior design and furnishings within the larger context of the history of painting, sculpture, and architecture.

HAA 265 | HISTORY OF PHOTOGRAPHY | 4 quarter hours  
(Undergraduate)  
This course is a survey of the major works, artists, and movements from photography’s invention to the present day. Emphasis is placed on the major artists, subjects, and technical applications of the medium, as well as on the modernity of photography and its unique aesthetic qualities. This course will also consider the myriad purposes and social contexts for photography and examine a wide range of techniques from the camera obscura to recent developments in printing. Actual photographs are studied in class, on campus, and in field trips to regional collections. The course involves major readings that ask students to consider the role of photography in relations to race, gender, and politics. Many of the photographers under consideration are American and European, but examples of international imagery are included as well.

HAA 268 | HISTORY OF FILM | 4 quarter hours  
(Undergraduate)  
This course is a survey of the history of cinema and an introduction to the basic methods for analyzing films. Specifically, this course tracks the development of techniques for creating meaning using film within particular historical contexts and cinematic traditions such as narrative, documentary, and experimental film. We will focus on how meaning in film is conditioned by uses of camera, editing, lighting, mise-en-scène, sound, and acting as well as how these uses have been impacted by new technological developments in film production. Additionally, we will consider the significance of genre, the production system, and the impact of individual "auteurs" throughout the history of cinema.

HAA 273 | ANIME AND MANGA | 4 quarter hours  
(Undergraduate)  
This course examines the development of anime and manga in Japan from their inception to their explosion as international phenomena in recent decades. We consider anime and manga as forms of artistic expression that depend upon and parallel key Japanese visual forms of handscroll painting and woodblock prints. Students learn the ideas, ideals and values in Japanese cinematic and visual expression, and develop skills at analyzing anime and manga as artistic forms. The processes of drawing/creating anime and manga are considered; both form and content of anime and manga are discussed.

HAA 280 | PREMODERN ARCHITECTURE: ANCIENT SOCIETIES TO THE ENLIGHTENMENT | 4 quarter hours  
(Undergraduate)  
Social, economic, and political history of European and Mediterranean architecture, from Paleolithic times to the 1789 French Revolution. Topics include: classicism, the status and role of the architect, social struggle, patronage, and architectural technologies.

HAA 281 | MODERN ARCHITECTURE | 4 quarter hours  
(Undergraduate)  
World architecture from the 1789 French Revolution to the present. Examines the influence of industrial, technological, political and social change in the development of modernist and post-modernist architecture.

HAA 288 | COMPARATIVE URBANISM | 4 quarter hours  
(Undergraduate)  
An investigation of the origins and bases of non-American urban traditions, through the study of the genesis, form, functions, and social-cultural forces that shaped cities such as Paris, St. Petersburg, Istanbul, Calcutta, and Mexico City. This course is based in the Geography Department and is the equivalent of 200-level History of Art and Architecture course.

HAA 290 | ART HISTORICAL THEORY AND METHODOLOGY | 4 quarter hours  
(Undergraduate)  
This course looks at the theories and methodologies that belong to art history. This means that, rather than a given artistic period, geographical area, or theme, our focus will be on the ways in which works themselves have been interpreted and understood since the origin of the discipline, emphasizing the more reflective and critical approaches to art that have emerged as a result of contact with other disciplines (such as philosophy and comparative literature). Each weekly meeting will consist of discussions inspired by informational readings on a given methodological approach (such as structuralism, Marxism, psychoanalysis, post-colonialism, queer theory), as well as a number of specifically art historical texts exemplifying that particular approach. Our main goal for this class will be to develop an understanding of these theories and methodologies and to evaluate the advantages and disadvantages of their application.

HAA 291 | MUSEUM PROFESSION AND PRACTICE: CHICAGO MUSEUMS AS CASE STUDY | 4 quarter hours  
(Undergraduate)  
Museums rely upon the coordinated efforts of a wide range of professionals with experience drawn from various disciplines to assure their successful stewardship, operation, and sustainability. This course investigates the theories and practices of museums, examining the core functions within the museum profession, and the role of museums in contemporary society. Examining the Chicago museum community as a series of case studies, we will hear from representatives of Chicago’s leading museums as we consider models of best practices and the challenges currently facing museums in today’s cultural landscape.

HAA 297 | SPECIAL TOPICS IN HISTORY OF ART & ARCHITECTURE | 4 quarter hours  
(Undergraduate)  
Focused study on a specific topic from the history of art.

HAA 301 | AFRICAN ARCHITECTURE | 4 quarter hours  
(Undergraduate)  
This course examines a wide variety of issues pertinent to the study of architecture in Africa, highlighting above all else the diversity of traditions across the continent. Themes are defined at times by materials, technology, type, geographical region, culture, or specific architectural elements. Examples of subjects studied include: earthen mosques of Mali; subterranean residences in Burkina Faso; nomadic tents; impluvial and courtyard traditions of Nigeria and Senegal; mural painting in Burkina Faso, Nigeria, and South Africa; Ethiopian rock cut churches; imperialist exploitation of Great Zimbabwe’s legacy; and coral architecture of the Swahili Coast.
HAA 302 | AFRICAN ISLAM: ISLAMIC ART & ARCHITECTURE IN SUB-SAHARAN AFRICA | 4 quarter hours
(Undergraduate)
Focused study of the impact of Islam on the artistic traditions of sub-Saharan Africa. Rather than necessarily replacing previous art forms, this course investigates in what circumstances preexisting visual culture might be integrated with the requirements and needs of Islam. This approach necessitates an understanding that neither Islam nor African art are monolithic entities, but rather their interactions represent a wide variety of negotiations across the continent. Likewise, this course will consider specific historical circumstances to which Islamic art in sub-Saharan Africa has responded in terms of form and content.

HAA 310 | TOPICS IN ART AND ARCHAEOLOGY | 4 quarter hours
(Undergraduate)
This course addresses issues of archaeology relevant to the study of visual culture from the ancient to the contemporary world. This course is based in the Department of Anthropology and is the equivalent of a 300-level History of Art and Architecture course.

HAA 316 | GODS AND MORTALS: THE ART OF THE ANCIENT GREEKS | 4 quarter hours
(Undergraduate)
This course looks at the ancient Greek world, focusing on the events, traditions, and beliefs that culminated, on the one hand, in the birth of democracy and the defeat of Xerxes and, on the other hand, in the building of the Parthenon and the sculpting of the Nike of Samothrace. In so doing, we will come to understand above all the heavy burden placed on art and architecture at this time and in this place, charged as it was with soliciting the gods, establishing power, celebrating battles, ritualizing entertainment, and remembering the dead. And along the way we will challenge long held assumptions related to the meaning and function of ancient Greece's most fundamental artistic forms, techniques, and subjects.

HAA 320 | ART AND POWER IN PAGAN AND EARLY CHRISTIAN ROME | 4 quarter hours
(Undergraduate)
This class focuses on the art of the Roman Empire, an empire that began pagan and ended Christian. In practical terms, it will move from Augustus in the first century BCE to Justinian in the sixth century CE, with geographical coverage ranging from Jerusalem to (modern day) northern England. Our task will be to examine the artistic forms that came to identify this civilization via structures that dwarfed the natural world and figural likenesses that made the absent present to appreciate their efficacy. On the one hand, this examination will provide a deep and broad understanding of the role art plays in the building of empire; on the other, it will provide a vivid sense of art’s part in maintaining the appearance of continuity despite radical change. Thus, we will watch as the artistic forms that once defined a pagan world are adopted enthusiastically by its Christian replacement, marking the subtle transformations that articulate new beliefs, facilitate new devotion, and charge spaces for new rituals.

HAA 325 | OLD EmpIRES AND NEW Gods: CULTURAL CONFRONTATIONS IN LATE ANTIQUITY | 4 quarter hours
(Undergraduate)
This course focuses on how a clash of cultures and the emergence of new religions impacted the arts of the eastern Mediterranean in late antiquity (300 to 700 CE). It explores interactions between the Byzantine and Sasanian empires, as well as the creation of local and religious identities through art. It also investigates how the diverse religious climate (Christianity, Judaism, Paganism, Zoroastrianism, Islam) contributed to visual expression in the region.

HAA 328 | THE POWER OF PIETY: ICONS, RELICS, AND MIRACLES IN THE MEDIEVAL WORLD | 4 quarter hours
(Undergraduate)
This course examines the intersection of personal devotion, public spirituality, and performance of faith in the medieval world. Probing a range of objects that give material expression to the desire for tangible links to the sacred and reminders of supernatural presence in the medieval world, the course analyzes miraculous objects that we now categorize as works of art. Objects under discussion include a category broadly defined as reliquaries, fragments of the True Cross, images "not made by human hands;" and miraculous icons.

HAA 331 | ART OF THE CRUSADES: CRUSADES AS MEDITERRANEAN EXCHANGE | 4 quarter hours
(Undergraduate)
This course considers the Crusades from multiple perspectives (Byzantine, Latin, Muslim) and explore how politics, religion, and culture influenced the art of the medieval Mediterranean. The Crusades are analyzed in the broader context of pilgrimage, the search for the divine, and the desire to seize control of and purify holy sites. The course focuses on works of art created when the cultures of the Mediterranean came into both contact and conflict.

HAA 332 | ROMANESQUE ART AND ARCHITECTURE | 4 quarter hours
(Undergraduate)
Scholars in the nineteenth century designated Western European monuments, especially architecture and sculpture created between the eleventh and twelfth centuries, as "Roman-like" in character or "Romanesque," in order to acknowledge certain linkages they perceived between the characteristics of this era's architectural and visual language and that of the distant Roman past. Recent scholarship emphasizes not only large-scale works of art, architecture, and sculpture, crucial in an age of Pilgrimage and Crusades, but also small-scale works, such as illuminated manuscripts, metalwork, and coins and seals, as essential for an understanding of medieval visual culture. This class considers the broad spectrum of significant works of art produced during this period from shifting points of view, aesthetic or formalist toward function, agency, presentation and reception.

HAA 333 | GOTHIC ART AND ARCHITECTURE | 4 quarter hours
(Undergraduate)
This course examines the art, architecture, history, and culture of the so-called Gothic era (twelfth - fifteenth centuries), the age of the great European cathedrals. Reigning supreme in most of Europe in the thirteenth and fourteenth centuries, the Gothic style marks an era of unparalleled building activity and one of the most fertile and productive periods in the history of Western art. Special emphasis will be given to the aesthetic, structural, and spiritual aspects of cathedrals and other great churches and their contents, primarily in France and England, as reflections and embodiments of the sacred aspirations and devout character of the era. The artistic and architectural production (buildings, sculptures, illuminated manuscripts, paintings, sacred or liturgical objects, stained glass, etc.) of the period will be studied in its original context, with close attention paid to questions of social and political function, cultural meaning, and historical circumstance.
HAA 335 | MICHELANGELO | 4 quarter hours  
(Undergraduate)  
This course examines the extraordinary life, times and creations of Michelangelo Buonarroti (1475-1564), one of the most significant figures in the history of Western art. Sculptor, painter, architect, and poet, Michelangelo lived during the Italian Renaissance, an age that witnessed a flourishing artistic, scientific, and humanistic culture. During a career that spanned over seven decades, Michelangelo created famous lasting masterpieces, including the Vatican Pieta, David, Moses, the Sistine Chapel ceiling, and the papal church of St. Peter's. Who is this irascible and solitary genius, this devout Catholic and fierce Republican Florentine, who cavorted and lived with popes and princes, and fashioned works that profoundly influenced Western civilization? How do his brilliant achievements define, express, and illuminate the time, place, and culture in which he lived? Drawing on a variety of primary and secondary sources, this course seeks to understand an eccentric artist whose dazzling aesthetic productivity left a lasting mark on the art of future generations up to the modern period.

HAA 360 | DUCHAMP AND DADAISM | 4 quarter hours  
(Undergraduate)  
This course examines the artworks and biography of Marcel Duchamp (1887-1968) and explores the major world cities where Dadaism occurred. Duchamp was among the most important artists of the modern era, his intriguing and challenging artworks redefining art altogether. No other modern artist influenced contemporary art so significantly. Another focus will be the cultural movement known as Dadaism (1916-24), a delicious anti-art movement begun in Zurich, Switzerland, during the absurd, bloody First World War. After contextualizing Dada in relation to modern art, the course explores its manifestations in various world centers. Along the way, we will encounter the works of many of its most important figures, many of whom were women. Besides the inherent value of looking closely at the cultural moment of an important historical figure, the study of Dadaism has special relevance because of its timeless iconoclasm and spirit of creative experimentation. This class includes close readings of primary and field-defining secondary texts, informed class discussions and lectures, as well as trips to area museums.

HAA 365 | ART SINCE 1975 | 4 quarter hours  
(Undergraduate)  
This course addresses visual art production of a global context from the end of the Vietnam War to the present. Taking postmodernism as its starting point, the nature of contemporary art practice will be examined as it is redefined by new technologies and media, such as video, installation, performance, and digital art, and through an investigation of critical theoretical models. Traditional media, such as painting and sculpture, will also be assessed as a crucial part of this shifting terrain. Major themes considered include questions of identity and subject formation, the relationship between art and its audience, changing notions of artistic value, and the impact of globalization. Throughout, students will be exposed to the issues and ideas relevant to cultural production today, while simultaneously developing the visual and conceptual tools for critically analyzing contemporary art.

HAA 366 | TOPICS ON WOMEN AND ART | 4 quarter hours  
(Undergraduate)  
Historically courses on women and art were created as a supplement to the canon of art history taught in the standard art history survey, which celebrated the genius of the heroic white male artist. In many ways, however, these classes became a separate canon of women artists that was never truly integrated into the discipline and was narrow in terms of examining questions of class, ethnicity, race, religion, age, ability, etc. This course departs from this model and instead focuses on feminist theories of art applied to specific case studies investigating topics such as, problems of art historical categorization for women artists, performance as sites of resistance against violence, performing gender in visual images, and feminist activist collaborations.

HAA 370 | CONTEMPORARY ARCHITECTURAL THEORY AND PRACTICE | 4 quarter hours  
(Undergraduate)  
Study of contemporary debates in architecture and urban planning. This course explores economic, social, and political aspects of architectural theory through a case study of a contemporary monument or city plan.

HAA 371 | HISTORIC CATHOLIC CHURCH ARCHITECTURE OF CHICAGO | 4 quarter hours  
(Undergraduate)  
This course will examine the urban development and architectural heritage of Greater Cairo, Egypt since the reconstruction of the fortress of Babylon in the Roman period, through the establishment of Cairo itself in 969, and until the present. Cairo has always been a crossroads of cultures, set between Africa, Europe, and the Middle East. It has been home to significant Jewish, Christian and Muslim populations who have been impacted by the various ruling dynasties who have held sway there, including the Byzantines, early Islamic rulers, Tulunids, Shi’a Fatimids, and later Sunni Ayyubids, Mamluks, and Ottomans. In the 20th century, rapid expansion has produced extreme pressures on transportation networks and housing. The solution to such problems of intense urbanization has been to build satellite cities including a projected new capital to the east that will connect the Nile to the Red Sea shipping industry, following in the footsteps of the past.

HAA 372 | KYOTO (WORLD CITIES) | 4 quarter hours  
(Undergraduate)  
This course explores the art, architecture, and urban plan of Kyoto, the ancient capital of Japan. Kyoto became the seat of government and the home of the imperial court in 794 CE, and it continued to serve as the cultural and religious center of the land until the nineteenth century. This course considers major artistic developments as they relate to main sites in Kyoto, especially palaces, temples, and shrines. The eras covered extend from the Heian to the Meiji period.
HAA 375 | MEXICO CITY (WORLD CITIES) | 4 quarter hours (Undergraduate)
From its origins as Tenochtitlan, the preordained capital of the Aztec Empire, through its identification as a “new Rome” dominated by the Spanish Crown in the Viceregal period, to its status as the largest metropolitan area in the Western Hemisphere (and the second largest in the world), Mexico City was born to impress the imagination. This class explores the development of the great city of Mexico in light of major historical events and cultural expressions. Discussions will focus especially on urban planning, key architecture, outdoor sculpture, and public spectacles over the centuries.

HAA 376 | ROME (WORLD CITIES) | 4 quarter hours (Undergraduate)
Few cities in the world match Rome for its antiquity, imperial heritage, historic, religious and cultural importance, spectacular art and architecture, and rich urban landscape. Traditionally believed to have been founded by Romulus and Remus, descendants of Aeneas, in 753 BCE, and subsequently ruled by Etruscan kings; Rome’s public buildings, communal baths, and fortifications suggested that Rome was urbanized as early as the sixth century BCE. After the expulsion of their Etruscan monarchs, Romans established the Republic, which evolved into the Roman Empire when Octavian, grand nephew of Julius Caesar, became Augustus, Rome’s first emperor, princeps or first citizen. Along with subsequent emperors determined to turn Rome into a magnificent city worthy to be the capital of a great empire, Augustus used architecture and the built environment as massive symbols of power, authority, and legitimacy. The Catholic Church embraced this lesson when the imperial pagan capital became the capital of Western Christendom and the seat of the papacy. This class explores the city of Rome from its ancient origins through the seventeenth century and focuses on the major art and architectural developments that define this unique urban space.

HAA 378 | HEAVENLY AND EARTHLY JERUSALEM (WORLD CITIES) | 4 quarter hours (Undergraduate)
This class focuses on the city of Jerusalem. The uniqueness of Jerusalem stems from its status as a sacred place in Judaism, Christianity, and Islam. In this class we will explore the physical city of Jerusalem with its monuments, contested holy sites, and changing architecture. We will also analyze representations of the imagined heavenly Jerusalem, for which many believers intensely yearned. The class will focus on Jerusalem from the second through the sixteenth centuries: from its destruction by Roman armies to its last pre-modern construction phase during the Ottoman period. We will discuss how different religious groups mapped meaning and marked holiness in the urban fabric of Jerusalem. This class will consider some of the following issues: art and architecture, politics, religion, urban planning, and patronage.

HAA 379 | PARIS AND VICINITY TO CIRCA 1870 (WORLD CITIES) | 4 quarter hours (Undergraduate)
This course is designed to explore the arts and architecture, and urban planning of Paris and its vicinity, from the period of the Old Regime to ca. 1870. This span more or less coincides with the art historical periods from the Renaissance to early Impressionism. The course material weaves artistic works and projects into the greater cultural, political, and social fabric of the realm, and includes, among other outstanding personalities, the towering impact of Vincent de Paul, in order to expose the student to a variety of cross-disciplinary perspectives. Several class sessions are scheduled at the Art Institute of Chicago.

HAA 380 | CHICAGO ARCHITECTURE AND URBANISM (WORLD CITIES) | 4 quarter hours (Undergraduate)
This course investigates contemporary historiographic debates and new archival evidence surrounding research on Chicago architecture and urbanism. In addition to participating in lectures and discussions, students also meet separately to discuss scholarly debates as well as their individual research proposals.

HAA 390 | SENIOR CAPSTONE | 4 quarter hours (Undergraduate)
This is the culminating course of the art history major. Its project is twofold. On the one hand, it continues the critical thinking work of your previous art history courses, turning now to topics that define and occupy the field in general, rather than topics that define and occupy a specific period or geographical area and rather than topics related to methodology. These topics (such as cultural seeing, audience, material, the market, looting, etc.) will allow us to examine a variety of object and monument types in urban and non-urban settings from different cultures and different historical contexts. While some are of longstanding concern and others more recent, together they underscore art history’s inherent interdisciplinarity and the breadth of issues that affect the study of art and architecture. On the other hand, this course continues the writing and research work of a single previous art history course, facilitating the expansion of a paper of your choosing. This expansion will be accompanied by readings and staged assignments that are designed to deepen your existing argument, or to push it in new and complementary directions, and to tighten and clarify your prose and your use of textual and material evidence. The result will be a substantial and sophisticated treatment of an art historical object, monument, or subject. Formerly HAA 399.

Declared major in History of Art and Architecture and (senior status required or juniors with instructor permission).

HAA 391 | THE EVOLVING MUSEUM: HISTORIES AND CONTEMPORARY CHALLENGES | 4 quarter hours (Undergraduate)
This course examines the history and philosophy of museums and provides a framework to consider how the museum’s role in society has changed over time. Compelling issues such as the museum’s responsibility as a public institution and ethical considerations in collections acquisition and stewardship will be discussed. Case studies, guest lectures, and site visits to museums will inform history and theory by highlighting current museum practice and contemporary challenges in the museum field.

HAA 394 | MUSEUM STUDIES INTERNSHIP | 4 quarter hours (Undergraduate)
This course is a unique opportunity for students to gain valuable training in the museum field and work closely with professional museum staff on meaningful projects. Students will be matched with museum sites in consultation with the instructor. In addition to internship responsibilities, students will produce a reflective journal and document their field work in a digital portfolio. This course is designed for History of Art and Architecture majors and Museum Studies minors. Students should contact the instructor once they have registered for the class (at least three weeks prior to the start of the quarter) to discuss museum site placement.

HAA 395 | INTERNSHIP | 1-12 quarter hours (Undergraduate)
To be arranged with the Career Center and in consultation with advisory. Junior or Senior standing and status as an Art, Media and Design major or Art minor or consent of instructor is a prerequisite for this class.
HAA 397 | SPECIAL TOPICS/HISTORY OF ART & ARCHITECTURE | 4 quarter hours
(Undergraduate)
Focused study on a specific topic from the history of world art.

HAA 398 | INDEPENDENT STUDY | 1-4.5 quarter hours
(Undergraduate)
Independent work in the student’s field of study under faculty supervision. Available only to upper-level students with demonstrated capacity for self-motivated study.

HAA 400 | CHICAGO ARCHITECTURE AND URBANISM | 4 quarter hours
(Graduate)
Chicago Architecture And Urbanism.

HAA 401 | GRADUATE TOPICS/HISTORY OF ART & ARCHITECTURE | 4 quarter hours
(Graduate)
Graduate-level, intensively researched investigations into topics from the history of art and architecture taught by an instructor with a research specialty in that topic.
Graduate standing or department consent is a prerequisite of this class.

HAA 402 | DIGITAL MAPPING AND ART HISTORY | 4 quarter hours
(Graduate)
This course explores the questions raised by digital humanities in art history through a specific focus on the digital mapping of art historical questions. Students will focus on advanced discussions of digital mapping but also apply these theoretical and methodological concerns to art historical problems. We will use the Harvard WorldMap program which is a complement to the more advanced GIS work available in the Geography component of the certificate. WorldMap is a tool that has both pedagogical and analytic potential for art history. Students will address the big issues in digital mapping while constructing maps around such art historical subjects as modern architecture in Chicago, women artists in Chicago, muralism in Chicago, and other select topics.
Graduate standing or department consent is a prerequisite of this class.

HAA 405 | ART AND CRAFT OF THEATRE (ACT) | 4 quarter hours
(Undergraduate)

ACT 200 | MAKING PLAYS: THEATER AND THE ART OF PRODUCTION | 4 quarter hours
(Undergraduate)
Through lecture, discussion, projects and actual theatre attendance, students explore the human nature of the theatrical impulse and its evolution into theatrical form. Plays and readings deal with issues of gender identity, sexual orientation, and sexuality in performance. Students follow the process of specific drama productions from script to stage and examine the artistic process and the role that sexuality and gender play in performance and rehearsal.

ACT 209 | SKETCH COMEDY | 4 quarter hours
(Undergraduate)
Live performances of sketch comedy present theatre in one of its most elemental forms. With a focus on actors and text rather than technical elements, stagings of sketch revues explore the relationship between audience and artist in a dynamic and revealing way. This course will explore both the theoretical underpinnings of comedy and the practical techniques for the creation of this work. The class will examine as literature this work that is often overlooked by critics and theorists because of its perception as a "low" art form.

ACT 213 | SCI-FI AND OTHER GENRE FICTION IN THEATRE | 4 quarter hours
(Undergraduate)
Science Fiction, Horror, Fantasy, and Superhero as genres of fiction are prevalent in popular culture and successful (almost saturated) in Film, Television, Prose Literature, Graphic Novels, and other forms of storytelling media. Why, then, are they underrepresented in the world of the theatre? And why are the few more well-known examples of these genres in theatre so often unsuccessful, commercially and critically? How can these genres translate to the stage successfully? Which technical characteristics of the theatre and of the theatrical language of storytelling are advantages and disadvantages for bringing these genres to life, as opposed to the other media in which they are more prevalent and successful? This course will attempt to answer these questions by examining extant theatrical works of "genre" fiction and their financial successes and critical receptions. We will also examine critically-acclaimed pieces of "genre" fiction in other media to determine why those pieces were successful and how to translate that success to the stage.

ACT 215 | PLAYS ABOUT SPORTS | 4 quarter hours
(Undergraduate)
There is a curious relationship between sports and theatre; that is to say, the inherent theatricality of sports and the inherent athleticism of theatre. A significant component in this relationship is the concept of performance and what that entails. We speak of high-performance cars and trucks, we applaud and then discuss, blog, and tweet (sometimes to an extraordinary degree) the performances of both athletes and actors, we talk about academic performance, we see performing seals, dolphins, and whales at Shedd Aquarium, a member of the clergy performs a wedding ceremony, and the list continues. A highly contested term, performance is bound to the team role as it relates to sports, theatre, and everyday life. What is your role on the team? What role were you cast in? What is your role in the company? The team role is aligned with function and also with the context in which the "role is played. More than anything perhaps, both sports and theatre deal with highly charged relationships. In the plays that we will examine in the course, it is the sport itself that serves as both the context of and trigger for the relationships that are created, strengthened, weakened, or in the worst-case scenarios, totally shattered.
ACT 216 | SCREEN TO STAGE | 4 quarter hours  
(Undergraduate)
There is a long and storied tradition of adapting plays to film. Glengarry Glen Ross, Chicago, A Few Good Men, Harvey, Romeo + Juliet - the list goes on and on. More recently, however, there has been a continuing trend in the opposite direction: major works of theatre, particularly Broadway musicals, are adaptations of films. This course will examine this trend from several angles. We will discuss some of the reasons for this trend, we will discuss the challenges inherent in translating work written for film to the techniques of the stage, and we will compare and contrast artistic, critical, and financial successes and failures of plays adapted from films.

ACT 217 | THE ART OF STORYTELLING | 4 quarter hours  
(Undergraduate)
Storytelling is one of our oldest art forms. By exploring stories in performance and writing, students acquire the tools necessary to sculpt and perform their own stories. Then, students discover how storytelling can be used in multiple applications - from marketing to change management to human resources to diversity training. Through discussion, projects, and viewing live and recorded performance, students understand the art and building blocks of good storytelling. Studying different forms will illuminate the connection between content and form. Stories have the power to change people and this class explores how and why.

ACT 223 | INTRODUCTION TO IMPROVISATION | 4 quarter hours  
(Undergraduate)
Improvisation for the theatre was originally developed as a means of bringing diverse populations of people together in a creative, non-competitive, environment. Improvisation for performance was developed by The Compass Players and The Second City and has influenced generations of theatre artists from Alan Arkin to Tina Fey. The essentials of improvisation, however, remain applicable to everyone. In this course, sessions will include theatre games, ensemble building exercises, and scene structures. We will explore how the practice of improvisation creates opportunities for connection, creativity, and spontaneity. This class is for anyone who wants to enhance their abilities to act and interact with others.

ACT 241 | ARE WE STILL FABULOUS?: QUEER IDENTITY IN CONTEMPORARY DRAMA | 4 quarter hours  
(Undergraduate)
Born out of ACT UP and the AIDS militant movement of the late 1980s and early 1990s, Queer Nation concerned itself with the issue of gay and lesbian enfranchisement and power. They created the battle cry, "We're here, we're queer, we're fabulous, get used to it," thereby granting the gay community ownership of the word "fabulous." Fabulousness not only became a new manifesto for queer politics and camp, but also became synonymous with irony, tragic history, defiance, gender-fuck, glitter, and drama. Currently, young playwrights have shifted the visor of gay drama from overtly political dramas to stories of identity and love. In replacing direct political messages with more personal appeals for social progress, is contemporary gay drama still fabulous? By interpreting and analyzing the most current queer plays, reading critical and reflective essays, and through discussion, students in the course will decide for themselves if "fabulous" is a thing of the past or stronger than ever in the present.

ACT 242 | STAGE DIRECTION FOR NON-MAJORS | 4 quarter hours  
(Undergraduate)
This course is designed to introduce students to the director's craft. The focus is on the director's relationship to text through the analysis of playscripts and the use of that analysis to plan an interpretation of a play. Analysis will come from a variety of perspectives-personal, psychological, social, and historical. In addition to preparing and presenting their projects, students will attend performances and write papers in response. The class combines lecture, discussion, group exercises, and in-class activities.

ACT 244 | DRAMATIC WRITING FOR NON-MAJORS | 4 quarter hours  
(Undergraduate)
This course is designed as an introduction to the process of playwriting. The emphasis is on the exploration of a range of techniques and tools available to the playwright. Through the completion and discussion of a series of writing exercises, the class will examine the various elements of playwriting. Particular attention will be paid to the connections between form and meaning. Work for the course will include weekly exercises, written responses to plays in production, and the presentation of projects. Instructional methods will include lecture, discussion, group exercises, and in-class activities. The final project of the class will be the completion of a draft of a 10-minute play.

ACT 250 | AMERICAN FUNNY: STAGE COMEDY FROM GROUCHO MARX TO TINA FEY | 4 quarter hours  
(Undergraduate)
We're a funny people. We like to watch people be funny. AMERICAN FUNNY is a survey course that looks at American comedy in theatre from the early 20th century to the present day. We view performances of plays on video, read and write about American plays and playwrights, and discuss what is special about going to the theatre. We explore a historical progression of comedy, different types of comedy, the development of the American Comic Hero, and how comedy brings us together as theatregoers and as Americans.

ACT 251 | STAGE TO SCREEN: CINEMATIC TRANSLATIONS OF THE DRAMATIC CANON | 4 quarter hours  
(Undergraduate)
It is almost always the case that audiences are introduced to the dramatic canon with cinematic translations of the great plays, rather than actual productions. In this course we will examine what elements theatre and film share as well as what elements one or the other medium possesses exclusively if any. What is lost or, indeed gained in cinematic translation? What is the notion of theatricality? What cannot be translated to the film? What societal elements come into play when translating a play for the screen? Socio-political and historical milieu of the original plays will be examined as well as those of the screenplays.

ACT 253 | THEME PARK THEATRE | 4 quarter hours  
(Undergraduate)
Theme parks have become contemporary equivalents of the ancient Greek theatre festivals - places where the citizenry gather to revisit the myths and history of the community. While much has been written about theme parks from the perspective of cultural studies, urban planning, and commerce, little attention has been paid to their function as performance or theatre. In this class we will attempt to develop criteria for evaluating theme park attractions as works of art. How do theme parks fulfill or challenge traditional definitions of theatre? What is the relationship between audience and performer? Can/should theme parks aspire to do more than entertain? How are stories told physically and architecturally? How have theme parks influenced theatre and other art forms?
ACT 255 | ANGELS, PUNKS AND RAGING QUEENS: THE ECLECTIC QUILT OF AIDS DRAMA | 4 quarter hours 
(Undergraduate)
Acquired Immune Deficiency Syndrome (AIDS) has left an indelible mark on both the history and culture of the world. While fear and loss can paralyze, they can also mobilize. In addition to destroying generations of artists, AIDS has become what some call “the great unifier,” giving voice to a new generation of theatre artists. But what are these voices? Cries for social change? Political rants? Stories of remembrance? Lessons to educate? All of the above? What does AIDS mean when it appears onstage in a performance? By interpreting and analyzing plays from both national and global AIDS perspectives, reading critical and reflective essays, and through discussion, students in the course will discover how the ritual of theatre has been used to create the eclectic quilt of voices that is AIDS drama.

ACT 257 | WRITING LOCALLY, THINKING GLOBALLY: INTERNATIONAL THEATRE FOR YOUNG AUDIENCES DRAMATIC LITERATURE | 4 quarter hours 
(Undergraduate)
While writing and performing for their local communities, various international artists have made a global impact on the field of theatre for young audiences. This course is an investigation of the principles, procedures, and practices of theatre for young audiences playwrights and artists worldwide. Through analysis of readings, lectures, workshops, and discussions students will explore the skills and aesthetic techniques that theatre creators from around the globe use to communicate with their audiences. By examining historical, theoretical, and artistic intercontinental connections, students will hopefully gain further appreciation and understanding of the contemporary, global theatre for young audiences (TYA) field.

ACT 290 | ACTING AND PERFORMANCE | 4 quarter hours 
(Undergraduate)
Students work on basic performance skills through individual and group exercises in acting, voice and speech and movement. Can be taken by non-Theatre School students.

ACT 300 | VOICE AND DICTION: FOR BROADCAST AND COMMUNICATION | 4 quarter hours 
(Undergraduate)
Description: This course provides specific and constructive instruction on how students can improve their diction and voice quality. It is especially aimed at students who wish to pursue careers involving some form of voice work - for example, theatre and broadcast journalism students. The course will focus on improving vocal clarity and sound, through group meetings and individual coaching. This course is only open to Journalism majors who have completed the prerequisite of JOUR 330 or permission of the instructor.

ACT 301 | MODERN DANCE | 4 quarter hours 
(Undergraduate)
This artistic dance course will focus on technique, individual and group improvisation, choreography, the art of making dances and how to view dance in performance. Designed for all levels of experience, the class will give attention to body awareness and alignment, physical strength and flexibility, expressive and creative movement in the modern dance style to a variety of musical accompaniment.

ACT 302 | MODERN DANCE II | 4 quarter hours 
(Undergraduate)
This course is a continuation from Modern Dance for Non-Majors. The course focuses on technique, individual and group improvisation, partnering, principles of choreography, the art of making dances, and the skill of motivating feedback. Learning how to view and critique dance in performance, students will attend a selected dance concert to review. Class will include more advanced experiences with body awareness and alignment, physical strength and flexibility, expressive and original movement in the modern dance style to live percussion accompaniment. Students with previous training who haven't taken PRF 301/ Modern Dance I may contact the instructor for permission to enroll in Modern Dance II.

ACT 380 | ADVANCED ACTING AND PERFORMANCE | 4 quarter hours 
(Undergraduate)
This course is a continuation of PRF 290 and will allow students who have completed the introductory course further exploration in performance by applying basic acting skills to the presentation of short plays and scenes from modern dramatic literature. PRF 290 is a prerequisite for this class.

ACT 500 | VOICE AND DICTION: FOR BROADCAST AND COMMUNICATION | 4 quarter hours 
(Graduate)
This course provides specific and constructive instruction on how students can improve their diction and voice quality. It is especially aimed at students who wish to pursue careers involving some form of voice work - for example, theatre and broadcast journalism students. The course will focus on improving vocal clarity and sound, through group meetings and individual coaching. This course is only open to Journalism majors who have completed the prerequisite of JOUR 330.

Art, Media, and Design (ART)

ART 101 | DIGITAL FOUNDATIONS | 4 quarter hours 
(Undergraduate)
This course will develop creative thinking through a variety of visual explorations in digital media. Photoshop and Illustrator will be introduced and applied to the creation of digital images within the context of contemporary art and design. Offered every Quarter.

ART 104 | CREATING ART | 4 quarter hours 
(Undergraduate)
A studio course that uses visual problems and critical discussions to develop creative and perceptual abilities; relates these abilities to the principles of art in cultural and historic contexts (non-art majors). Offered every Quarter and Summer Session.

ART 105 | TWO-DIMENSIONAL FOUNDATIONS | 4 quarter hours 
(Undergraduate)
This course is an introduction to fundamental concepts, terminology, materials, and skills necessary for effective visual communication using two-dimensional media. Through studio projects, students gain practical experience in the planning, production, and evaluation of 2D works of art and design, and gain an understanding of the relationship between form and content. Through lectures, reading, writing, critiques and discussions, students will gain an understanding of the relationship between form and content, and be introduced to the theoretical and historical context specific to two-dimensional art forms. Offered every Quarter.
ART 106 | BEGINNING DRAWING | 4 quarter hours
(Undergraduate)
Introduction to composition, line and rendering in black and white
drawing media. Basic techniques for descriptive and expressive use of
drawing media. Offered every Quarter and Summer Session.
ART 107 | THEATRE DRAWING I | 2 quarter hours
(Undergraduate)
The first in a three quarter sequence of general drawing courses
exclusively for students enrolled in the Theater School.
ART 108 | THEATRE DRAWING II | 2 quarter hours
(Undergraduate)
ART 107 and a student in the Theatre School or consent of instructor is a
prerequisite for this course.
ART 109 | THEATRE DRAWING III | 2 quarter hours
(Undergraduate)
LIBERAL LEARNING SEMINARS (18 credits) - The Liberal Learning
Seminars are designed to enable students to develop key liberal learning
skills (self-assessment, self-managed learning, critical-creative-
 systemic thinking, interpersonal relations, communication effectiveness
and values-based decision-making) through participation in a series
of seminars. Both skills and seminar topics are deemed critical to all
professionals regardless of individualized areas of expertise.
ART 110 | BEGINNING PAINTING | 4 quarter hours
(Undergraduate)
An introduction to basic organizational and technical concepts in
painting. The preparation and proper use of materials is also stressed.
Offered every Quarter.
ART 105 (or GD 105 or ANI 105 or ART 106 or instructor consent) is a
prerequisite for this class.
ART 113 | THREE DIMENSIONAL FOUNDATIONS | 4 quarter hours
(Undergraduate)
This course is an introduction to fundamental concepts, terminology,
materials, and skills necessary for effective visual communication
using three-dimensional media. Through studio projects, students gain
practical experience in the planning, production, and evaluation of 3D
works of art and design, and gain an understanding of the relationship
between form and content. Through lectures, reading, writing, critiques and
discussions, students will gain an understanding of the relationship
between form and content, and be introduced to the theoretical and
historical context specific to three-dimensional art forms. Offered every
Quarter.
ART 114 | FOUR DIMENSIONAL FOUNDATIONS | 4 quarter hours
(Undergraduate)
This course is an introduction to fundamental concepts, terminology,
materials and skills necessary for effective visual communication using
four-dimensional or time-based media in three general categories:
performance art, video art and interactive art. Each of these unique
art forms incorporates the presence and manipulation of time as an
essential element. Through studio projects, students gain practical
experience in the planning, production, and evaluation of 4D works of art
and design, and gain an understanding of the relationship between form
and content. Through lectures, reading, writing, critiques and discussions,
students will gain an understanding of the relationship between form
and content, and be introduced to the theoretical and historical context
specific to time-based art (4D) forms.
ART 115 | BEGINNING SCULPTURE | 4 quarter hours
(Undergraduate)
An introduction to traditional and contemporary approaches to sculpture
with an emphasis on clay modeling, plaster casting and carving. Studio
core course. Offered every Quarter.
ART 117 | INTRODUCTION TO 3D PRINTING | 4 quarter hours
(Undergraduate)
This course will extend students' knowledge and experience in the
practical and conceptual aspects of contemporary studio art practice
by introducing desktop 3D printing technology. The class will focus on
basic methods and materials, idea development, and the incorporation
of interdisciplinary thinking. Students will design simple forms with 3D
modeling software, utilize and/or modify existing 3D forms from open
online resources, and learn how to operate the printer. The course will
provide students the opportunity to explore new tools and skills, while
maintaining a focus on the development of meaningful content in their
work. Through projects, readings, slideshows, discussions, examples
from art history and contemporary culture, students will actively
participate in the evolving relationship between art and technology.
Cross-listed with ART 217.
ART 101 or consent of instructor is a prerequisite for this class.
ART 200 | ART & ARTISTS IN CONTEMPORARY CULTURE | 4 quarter
hours
(Undergraduate)
This course will use a mixed lecture/discussion format and thematic
approach to consider works on art and design produced in the last 30
years as a means of contextualizing recent works of art. The primary
approach to this material will be from the perspective of the artist
(artists or designer), for whom art theory, criticism and history are crucial
tools for developing effective and meaningful work. For that reason, this
class will be taught by studio faculty. The class will make extensive use
of the city's contemporary museums, galleries, exhibitions and works
of public art to emphasize the social, economic and political context
from which works of art and design emerge as indicators or signposts of
contemporary cultural concerns. Offered every Quarter.
ART 204 | VISUAL COMMUNICATION | 4 quarter hours
(Undergraduate)
A multi-media studio course exploring the visual principles of
communication. Students learn to examine, deconstruct, and experiment
with structures of visual communication through research, process,
and divergent thinking methods. Offered Autumn Quarter in even years.
ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are
prerequisites for this class.
ART 205 | COLOR THEORY AND APPLICATION | 4 quarter hours
(Undergraduate)
Explorations into the use of color in both paint and computer
applications. Offered Autumn and Spring Quarters.
ART 105 or ANI 105 or GD 105 or permission of instructor is a
prerequisite for this class.
ART 206 | INTERMEDIATE DRAWING | 4 quarter hours
(Undergraduate)
Continued development and exploration into the rendering of space with
an introduction to a wider range of drawing media and contemporary
art applications in drawing. Offered Autumn Quarter and most Spring
Quarters.
ART 106 or consent of instructor is a prerequisite for this class.
ART 209 | DRAWING SPECIAL TOPICS | 4 quarter hours
(Undergraduate)
This course focuses on specialties in drawing not encompassed by the general art curriculum. Offered most Autumn Quarters and TBA.

ART 206 or ART 218 or permission of instructor is a prerequisite for this class.

ART 210 | INTERMEDIATE PAINTING I | 4 quarter hours
(Undergraduate)
A development of skills and concepts beyond the basic level. Problems that stress advanced concepts of theme, color and spatial design are studied. Offered Autumn and Spring Quarters.

ART 110 (or instructor consent) is a prerequisite for this class.

ART 211 | INTERMEDIATE PAINTING II | 4 quarter hours
(Undergraduate)
Intermediate Painting II.

ART 210 is a prerequisite for this course.

ART 212 | WATERCOLOR PAINTING | 4 quarter hours
(Undergraduate)
The investigation of aqueous medium in thin transparent washes, using a variety of subjects. Spontaneity of medium is stressed in order to capture the nuance of color and light. Offered Winter Quarter in even years.

ART 105 or ART 106 or instructor permission is a prerequisite for this course.

ART 213 | SPACE DESIGN | 4 quarter hours
(Undergraduate)
Application of three-dimensional principles to basic issues of space and object design. Introduction to professional presentation techniques.

ART 113 and ART 115 or consent of instructor is a prerequisite for this class.

ART 214 | CERAMIC SCULPTURE | 4 quarter hours
(Undergraduate)
An exploration of ceramic techniques for constructing and firing expressive sculptural forms.

ART 113 or consent of instructor is a prerequisite for this class.

ART 215 | INTERMEDIATE SCULPTURE | 4 quarter hours
(Undergraduate)
Introduction to basic wood and metal working techniques for producing constructed sculpture. Focuses on modern and contemporary issues in sculpture. Offered Winter Quarter.

ART 115 or consent of instructor is a prerequisite for this class.

ART 217 | ADVANCED THREE-DIMENSIONAL DESIGN | 4 quarter hours
(Undergraduate)
Advanced investigation of three dimensional design concepts. Course is a sequel to ART 213.

ART 113, ART 115 and ART 213 or consent of instructor is a prerequisite for this class.

ART 218 | FIGURE DRAWING | 4 quarter hours
(Undergraduate)
Learning to draw the human figure through the study of anatomy combined with various drawing concepts and processes. Offered every Quarter and Summer Session.

ART 106 or consent of instructor is a prerequisite for this class.

ART 219 | BEGINNING FIGURE SCULPTURE | 4 quarter hours
(Undergraduate)
This course provides opportunities for learning how to represent the dynamic human figure in three dimensions and welcomes students with no experience in figure studies as a first introduction to the figure. All class work will be done from a nude model. Home assignments will consist of figure drawings either from departmental Open Studio Figure Drawing sessions or from assigned figure drawings of great masters. Students will be taught basic technical and eye/hand coordination skills necessary to depict the human figure three dimensionally as well as basic understanding of the proportions of the human figure and ability to implement them. This course will also introduce students the concept of the human figure as a dynamic three dimensional entity. Students will have an opportunity to work from a nude model for nine weeks, examining human anatomy, body proportions and different gesture poses.

ART 106 or ART 115 or instructor permission is a prerequisite for this course.

ART 220 | THINKING PHOTOGRAPHY | 4 quarter hours
(Undergraduate)
This is a course taking a critical and historical look at "the arts of mechanical reproduction" and lens-based image making. As a lecture class, it may include some very basic shooting exercises assigned that could easily be carried out by "snapshot" or disposable cameras - either film or digital. Formerly ART 118. Offered every Quarter.

ART 223 | LIGHT, COLOR, AND PHOTOGRAPHY | 4 quarter hours
(Undergraduate)
Principles of image making with lenses, mirrors and photographic processes. Discusses the physical properties of light and color including those used in laser and holography.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

ART 224 | BEGINNING DIGITAL PHOTOGRAPHY | 4 quarter hours
(Undergraduate)
This course introduces students to the digital camera (DSLR) and editing platforms as tools for creative and expressive use of the photographic medium. Proper use of camera functions and file management will be learned in tandem with editing strategies using adobe software. Lighting strategies and inkjet printing will be introduced in a fully equipped Mac lab. This course emphasizes the concepts, theory, and history of the photographic medium within the context of contemporary art. Students will produce their own photographs by digital means and engage in discussion and critical analysis of images and image aesthetics.

Suggested prior course: ART 101: Digital Foundations. Offered every Quarter and Summer Session.

ART 225 | BEGINNING PHOTOGRAPHY | 4 quarter hours
(Undergraduate)
This course is an introduction to the aesthetics, processes, and theory of black & white film photography. Techniques of chemical-based film development, darkroom printing, and image editing will be introduced. Strategies of exposure, framing and lighting will be explored as means for developing a meaningful photographic language. Emphasis will be given to understanding and using the camera as a tool for personal inquiry and experimentation. Additionally, this course will focus on the role and impact of the photographic image in both historical and contemporary contexts. Suggested prior course: ART 105: 2D Foundations. Offered every Quarter.
while building positive systems that support all life. how we must reduce our negative impact on systems that support all life. The underlying theme is the connection between culture and nature, and local demonstrations will illustrate the theme of restorative design; and excellence will be explored through the examination of case studies; as well as sustainable design in modern cultures. The environmental and urban design. We will explore the history and practice of eco-design, including graphic, product, architecture, landscape architecture and digital print output in combination with painting and drawing media. Students are introduced to the creation of text-based art. This course covers the history and contemporary practice of artists and designers that create works exclusively using text. Assignments emphasize formal and conceptual treatment of materials and processes, for screen printing artworks. Printing methods utilize hand-cut stencils, screen filler, and photomask techniques. Offered every Quarter. ART 101 or ART 105 or GD 105 or ANI 105 or ART 106 or DES 141 or instructor consent is a prerequisite for this class. ART 226 Video Art is an introductory level course designed to familiarize students with the uses of video in a variety of artistic practices. These encompass non-narrative treatments in multiple forms that may include single and multi-use of monitors and projection, installation, and performance. Students will learn to use video editing software in this class. The department provides video and audio equipment. Offered Winter Quarter annually. ART 227 Digital Art is an introductory level course designed to familiarize students with the uses of digital art in a variety of artistic practices. These encompass non-narrative treatments in multiple forms that may include single and multi-use of monitors and projection, installation, and performance. Students will learn to use digital art editing software in this class. The department provides digital art equipment. Offered Spring Quarter. ART 101 or consent of instructor is a prerequisite for this class. ART 245 Painting: Mixology is an introductory level course designed to teach students the essential equipment, materials, and processes, for screen printing artworks. Painting methods utilize hand-cut stencils, screen filler, and photo-emulsion techniques. Offered every Quarter. ART 101 or ART 105 or GD 105 or ANI 105 or ART 106 or DES 141 or instructor consent is a prerequisite for this class.
ART 290 | ART WORKSHOP SELECTED TOPICS | 4 quarter hours
(Undergraduate)
A variety of specific topics are explored that are not encompassed by the general art curriculum. May be repeated for up to 8 credits with different topics.

ART 291 | MURAL PAINTING | 4 quarter hours
(Undergraduate)
This class has a central focus on the art of mural making. Students will have hands on experience as they design and execute a mural at a predetermined site. The mural will be executed as a small scale illustration board piece in the classroom during the last part of the quarter and installed at a real venue. The students will also learn the strategy and design factors of planning a mural piece of their own. The class functions as a studio class as it meets for 6 hours weekly. A minimum of 25 service hours is required. Drawing or painting experience at the collegiate level is highly recommended for this class. This class is certified for cbSL and JYEL credit. Offered Spring Quarter.

ART 292 | COMMUNITY VIDEO PRODUCTION | 4 quarter hours
(Undergraduate)
The heavy emphasis on experiential learning of this course will combine classroom instruction on documentary video production with student fieldwork. Over the course of the term, students will plan, produce and substantially complete a videotape project for a community client. Through the production of a video project specifically designed for a community group and how the creation of a finished video can address some of those needs. Students will work to produce projects that are thoughtful, important and technically polished. This class is certified for cbSL and JYEL credit.

ART 293 | CHINA IN TRANSITION: SOCIAL PERSPECTIVES IN FILM & PHOTOGRAPHY IN CONTEMPORARY CHINA | 4 quarter hours
(Undergraduate)
The course content will engage a wide range of issues such as the tension and history of the women’s rights movement, the reconstruction of values in gender and sexuality, and the ever-changing urban infrastructures in the economically driven culture. Film and photography are the rising new media for documenting and responding to social issues by scholars, filmmakers and artists expressing the Chinese experience. The methodology of this class will deconstruct and decode three common cultural stereotypes: American representations of China, Chinese official representations of itself, and universal representations of one’s experiences as a traveler. Through dialogue and cross-reading materials, we compare films, photography, sites/field trips, interviews and journalistic materials to search for the reality and social issues beneath the visual representation. This course emphasizes the aesthetic, the theory and the hands-on experience of using video and photography during the trip (including a brief lecture on composition, framing and digital photography and/or possible video shooting techniques). We will share finished assignments in group critiques and reading discussions - in both cases, they will be the primary means of evaluation in class. In a critique, students will present their work for response and analysis in relation to the given assignment through a class discussion. This dialogue is intended to be evaluative, to provide constructive criticism and to develop critical thinking skills.

ART 294 | GENIUS LOCI: ROMAN ARCHETYPES OF PLACE IN VISUAL CULTURE | 4 quarter hours
(Undergraduate)
This is a semester long study trip to Rome that offers a thematic studio/art history experience concerned with the role that Rome has played in shaping our understanding of place as expressed in visual culture. This course will include such topics as: the influence of Roman approaches to urban organization and development; the influence of national academies in Rome on Western developments in art and architecture, Piranesi and the articulation of utopic and dystopic models derived from Roman culture; the spatial collage of Roman architectural enveloping and fragmentation; illusion and perspective as perceptual puzzle and ideological signifier; and Pasquino and the expression of vox populi in public space. The unique circumstance of urban Rome, where 2500 years of building activity are embedded in the fabric of contemporary life, offers an opportunity to involve students in an interdisciplinary examination of how human needs and desires shape our built environment and are shaped by it.

ART 302 | TOPICS IN THE HISTORY OF CINEMA | 4 quarter hours
(Undergraduate)
Courses on the history of cinema that explore the form, content and historical significance of the media. Taught in the College of Communication with cross-list in Art.
ART 304 | THE PHOTOGRAPHIC BOOK | 4 quarter hours  
(Undergraduate)  
Since the inception of the photographic process in the early 19th century, one of the primary ways photographers have disseminated their work is through the book form. In this course we will consider the history, examples and practice of the photobook. Students will be expected to photograph a major subject over the course of the term, edit and sequence your photographs and layout and produce a finished, bound photobook through an online publisher. In addition to the history of the photobook, processes of organization and editing will be explored through basic shooting and sequencing exercises. Both film and digital cameras may be used for the course. Offered Winter Quarter in odd years.

ART 224 or ART 225 or permission of instructor is a prerequisite for this class.

ART 306 | ADVANCED DRAWING | 4 quarter hours  
(Undergraduate)  
An advanced course in historical and contemporary approaches to issues and techniques of drawing. Offered Winter Quarter.

ART 206 or ART 218 or instructor consent is a prerequisite for this class.

ART 309 | DIGITAL SCULPTURE | 4 quarter hours  
(Undergraduate)  
The methods and materials of desktop 3D printing technology will be integrated with traditional and contemporary sculpture, such as woodworking, casting, assemblage, and installation. This "hybrid" approach will provide students the opportunity to develop and explore new tools and skills, while maintaining a focus on the development of meaningful content in their artwork.

ART 113 or ART 115 or consent of instructor is a prerequisite for this class.

ART 310 | ADVANCED PAINTING I | 4 quarter hours  
(Undergraduate)  
Development of advanced skills in painting with work in a more independent approach to concepts and techniques. Offered Autumn and Spring Quarters.

ART 210 (or ART 245 or instructor consent) is a prerequisite for this class.

ART 311 | ADVANCED PAINTING II | 4 quarter hours  
(Undergraduate)  
Advanced Painting II. Offered Autumn and Spring Quarters.

ART 315 or consent of instructor is a prerequisite for this class.

ART 312 | FIGURE PAINTING | 4 quarter hours  
(Undergraduate)  
An introduction to the study of the painted figure in environmental settings. Light, color and spatial illusion are stressed.

ART 105 and ART 106 or consent of instructor is a prerequisite for this class.

ART 313 | PERFORMANCE/INSTALLATION ART | 4 quarter hours  
(Undergraduate)  
In this upper level course students will utilize their previously acquired skills and background from their respective areas of specialty (painting, drawing, sculpture, photo, video, sound, web and computer application etc) in a new conceptual and spatial context by creating specific environments (installation) and using their bodies in those environments (performance). These hybrid art projects will be presented in a real space and live performance format. Additionally using video and photo documentation as sources, students will create another project in digital format. Students will have the option to concentrate on only one aspect of the course; either installation or performance using either digital or non digital (or combined) formats for their projects.

One 200-level studio course or instructor permission is a prerequisite for this course.

ART 315 | ADVANCED SCULPTURE | 4 quarter hours  
(Undergraduate)  
Exploration of advanced sculptural themes and techniques determined by the student in consultation with the instructor. Offered Winter Quarter.

ART 215 or consent of instructor is a prerequisite for this class.

ART 316 | ADVANCED SCULPTURE II | 4 quarter hours  
(Undergraduate)  
Sequel course to ART 315 to allow the completion of extensive projects.

ART 315 or consent or instructor is a prerequisite for this class.

ART 317 | ADVANCED FIGURE SCULPTURE | 4 quarter hours  
(Undergraduate)  
This course will provide an expansion and enrichment of skills in modeling the human figure for students with a basic background in the figure. All class work will be done from a nude model. Home assignments will consist of figure drawings either from departmental Open Studio Figure Drawing sessions or from assigned figure drawings of great masters. Students in this course will further develop their technical and eye/hand coordination skills necessary to depict the human figure three dimensionally in a more professional manner as well as full understanding of the proportions of the human figure and the ability to implement them freely in a dynamic human figure. Course will also point towards the potential possibility of the exploration, conceptualization and interpretation of the human figure within the contemporary art context or other applications related to the students’ interests.

ART 215 or ART 218 or ART 219 or instructor permission is a prerequisite for this course.

ART 318 | ADVANCED FIGURE DRAWING | 4 quarter hours  
(Undergraduate)  
As a sequel to ART 218 this course provides a more in depth study of figure drawing with emphasis on the refinement of drawing skills, the exploration of different drawing materials and techniques while considering the expressive value of figurative work.

ART 218 (or consent of instructor) is a prerequisite for this course.

ART 321 | INTERMEDIATE DIGITAL PHOTOGRAPHY | 4 quarter hours  
(Undergraduate)  
This course builds on ART 224, further emphasizing the aesthetic and conceptual possibilities of digital photography. Through project-based experimentation, students deepen their critical engagement with photographic tools while producing conceptually driven bodies of work. Refined use of the DSLR camera and editing tools takes place through hands-on image production and process-oriented critique. Additionally, this course explores historically established uses of the photographic medium and their relation in the digital context. Offered Winter Quarter annually.

ART 224 or instructor permission is a prerequisite for this course.
ART 323 | INTERMEDIATE PHOTOGRAPHY | 4 quarter hours  
(Undergraduate)  
This course continues the aesthetic development and processes of film-based, black & white photography through a refinement of techniques and conceptual practices. Large and medium-format cameras are introduced along with fiber-based printing, additional lighting and exposure strategies, and darkroom print finishing techniques. Emphasis is on developing and enhancing critical approaches to subject matter through project-based, hands-on experimentation and critical discussion.  
ART 225 or consent of instructor is a prerequisite for this class.

ART 324 | INTERMEDIATE PRINTMAKING | 4 quarter hours  
(Undergraduate)  
An intermediate course designed for students who have had previous technical experience with various printmaking media. This course enables students to investigate personal concerns and objectives through an ambitious and concentrated body of work. An emphasis is placed on the development of personal imagery and aesthetic goals.  
Offered Autumn Quarter, Spring Quarter, and Summer Session.  
ART 229 or instructor permission is a prerequisite for this course.

ART 325 | ADVANCED PHOTOGRAPHY PROJECTS | 4 quarter hours  
(Undergraduate)  
Advanced Photography Projects is a course emphasizing individual artistic practice through project-driven approaches to photography. Students will generate conceptually challenging and visually refined photographs using analog and/or digital means. Coursework incorporates student presentations of their artwork, critical discussion and analysis, and the creation of a refined, edited and complete body of work or portfolio. Additional forms such as the photographic book, large-scale printing, and hybrid film/digital approaches may be explored.  
Offered Spring Quarter annually.  
Two photography courses, at least one of which at the 300 level or instructor permission are prerequisites for this course.

ART 326 | SPECIAL TOPICS IN EXPERIMENTAL VIDEO ART | 4 quarter hours  
(Undergraduate)  
Advanced explorations of video as a form of artistic expression. Each course will have a unique focus, such as installation art, video and performance, experimental narrative or experimental documentary. This course may be repeated for credit assuming a change in topic. HD Digital cameras will be provided by the art department. Hands-on skills will be developed and projects will be edited in Final Cut Express.  
ART 226 or instructor permission is a prerequisite for this course.

ART 327 | ADVANCED COMPUTER GRAPHICS | 4 quarter hours  
(Undergraduate)  
Builds on skills learned in ART 227. Explores specific areas of graphics and design; exposes students to advanced software including Director 5, Painter 4, Illustrator 6.0, Morph 2.5, and Claris Home Page.  
ART 227 is a prerequisite for this class.

ART 328 | DOCUMENTARY PHOTOGRAPHY | 4 quarter hours  
(Undergraduate)  
Exploration of photographic concepts and techniques used in artistic, journalistic and sociological documentation.  
ART 225 or consent of instructor is a prerequisite for this class.

ART 329 | ADVANCED DIGITAL PHOTOGRAPHY | 4 quarter hours  
(Undergraduate)  
Advanced Digital Photography focuses on artistic practice through inventive use of the photographic medium and refined engagement with digital tools. Students will focus on self-directed, in depth projects culminating in a high quality portfolio. Additionally, students will be engaging in large-scale inkjet printing and advanced digital workflow. This course also encourages experimentation with unconventional approaches to the photographic object. Students in this course should be prepared to work with their chosen topic independently, create thesis projects for presentations, and participate in group discussions and critiques. Offered Fall Quarter annually.  
ART 224 and ART 321

ART 330 | INTERMEDIATE PRINTMAKING: INTAGLIO | 4 quarter hours  
(Undergraduate)  
Exploring various methods and techniques in intaglio printing with an emphasis on both traditional and modern approaches. Techniques may include forms of etching, engraving, drypoint, mezzotint, or aquatint.  
ART 229 or instructor permission is a prerequisite for this course.

ART 331 | INTERMEDIATE PRINTMAKING: SCREEN PRINTING | 4 quarter hours  
(Undergraduate)  
An intermediate level screen printing course enabling students to take a more independent approach to the concepts, themes, techniques, and aesthetic of their work. Emphasis will be on conceptual development of a series of works as well as refining skills and techniques. Offered every Quarter.  
ART 231 or (instructor consent) is a prerequisite for this class.

ART 332 | TOPICS IN PHOTOGRAPHIC PRACTICE | 4-12 quarter hours  
(Undergraduate)  
Focused investigations of specific aesthetic, technical or conceptual issues in the practice of photography.  
ART 224 or ART 225 or consent of instructor is a prerequisite for this class.

ART 333 | COMPUTER APPLICATIONS FOR DESIGN: PRE-PRESS | 4 quarter hours  
(Undergraduate)  
Builds on skills learned in ART 228. Explores specific areas of graphics and design focusing on pre-press, and exposes students to advanced software. It is highly recommended students take ART 358 before taking this class.  
ART 227, ART 228, ART 260, and ART 264 or consent of instructor is a prerequisite for this class.

ART 334 | PORTFOLIO | 4 quarter hours  
(Undergraduate)  
In this course students review previous course projects and prepare a final portfolio of their own artistic identity and presentation in preparation for artistic practice, graduate study, and related career opportunities. Visiting professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development.  
ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.
ART 338 | FIGURE DRAWING IN CONTEXT | 4 quarter hours  
(Undergraduate)  
A studio course ending the ART 218 Figure Drawing and ART 318 Advanced Figure Drawing sequence to study the figure in a contemporary context emphasizing independent research and ideation of different topics related to the human figure.  
ART 318 (or consent of instructor) is a prerequisite for this course.  

ART 345 | ADVANCED PAINTING: MIXOLOGY | 4 quarter hours  
(Undergraduate)  
This course is the sequel to ART 245 Painting: Mixology and as such is a content driven course with emphasis on understanding medium and material as symbol and idea. The course will offer students a more in-depth understanding of materials and techniques studied in ART 245 as well as prepare them for more conceptually advanced work in painting.  
Offered Winter Quarter in odd years.  
ART 210 (or ART 245 or instructor consent) is a prerequisite for this class.  

ART 348 | GRAPHIC ART IN THE PUBLIC REALM | 4 quarter hours  
(Undergraduate)  
This course enables students to research varied communities, complex information systems, processes, tools, and materials involved in visual communications. Students establish working relationships as individuals and in teams that utilize their skills to effectively communicate to an audience beyond the classroom. Objectives of the course include: creating awareness of current local community social issues, supporting students' development of independent and collaborative work habits, examining issues of social responsibility of the artist, integrating research-based learning and production skills, and assessing the social impact of a completed project. Offered Spring Quarter in odd years.  
ART 101 and (ART 105 or ANI 105 or GD 105) or consent of the instructor are prerequisites for this class.  
ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.  

ART 358 | GRAPHIC ART | 4 quarter hours  
(Undergraduate)  
This course explores word and image within the realm of visual art, including analysis of meaning and structure, layout and composition, and format and production. Students are introduced to theory, history and analysis of graphic art through studio projects, readings, writing and critiques. Offered Winter quarter in odd years.  
ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.  

ART 359 | PRINT MEDIA | 4 quarter hours  
(Undergraduate)  
Students develop a sensitivity and nuanced understanding of printed matter through hands-on methods of alternative research and experimental studio assignments. Students are introduced to concepts and the experience of viewing and producing multi-page documents including artists' books, magazines, and zines as well as posters and other forms of printed matter. Emphasis is placed on expanding and creating new ways to understand how printed matter can perform. Offered Spring Quarter in odd years. ART 101 and (ART 105 or ANI 105 or GD 105) or consent of the instructor are prerequisites for this class.  
ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.  

ART 360 | ILLUSTRATION | 4 quarter hours  
(Undergraduate)  
Investigation of black-and-white and color media and introduction to the techniques, imagery, and functions of illustration in graphic design. Offered Spring quarter in even years.  
ART 106 and (ART 101 or ART 105 or ANI 105 or GD 105) or instructor permission are prerequisites for this course.  

ART 361 | PACKAGE DESIGN | 4 quarter hours  
(Undergraduate)  
Focuses on current design trends with projects utilizing properties of materials such as paper, plastics, and glass.  
ART 101, ART 105, ART 227, ART 260, ART 264 and ART 358 are prerequisites for this class.  

ART 363 | ADVERTISING DESIGN | 4 quarter hours  
(Undergraduate)  
Explores the function and practice of design in advertising in both social and art historical contexts. It is highly recommended students take ART 358 before taking this class.  
ART 227, ART 260 and ART 264 or consent of instructor is a prerequisite for this class.  

ART 364 | COMPUTER APPLICATIONS IN ART | 4 quarter hours  
(Undergraduate)  
Use of Photoshop and Illustrator in the design and execution of paintings, drawings, and prints.  
ART 101, ART 105, ART 106 and ART 110 or consent of instructor is a prerequisite for this class.  

ART 366 | DRAWING PROJECTS | 4 quarter hours  
(Undergraduate)  
Students will explore and identify drawing topics of personal interest from an interdisciplinary perspective based on previous and current ideas, course studies, and major and minor degree programs. Individual student interests and ideas will inform the development of a thematic approach to drawing. The selected individual themes will then be researched, explored, and applied to the creation of a completed body of drawing works or as a series of final drawings, in the format of a visual mini thesis drawing project. ART 101 or ART 224 or GD 151 or knowledge of Photoshop and/or experience with a digital SLR camera is highly recommended. Offered Spring Quarter.  
Completion of two of the following courses is a prerequisite for this class: ART 206, ART 218, ART 306, ART 318, ART 338 or ART 229 or instructor permission.  

ART 377 | PHOTOJOURNALISM | 4 quarter hours  
(Undergraduate)  
Introduction to the theoretical and technical foundations of photography with exploration of the medium's aesthetic, documentary and narrative purposes within the context of photojournalism. Cross-listed as JOUR 276.
ART 382 | STUDENTS TEACHING ART IN THE ELEMENTARY CLASSROOM | 4 quarter hours
(Undergraduate)
This course brings DePaul students into a Chicago grade school to incorporate art into the curriculum. It is a hybrid course that involves some Independent Study in which the students organize their schedule in conjunction with a grade school classroom teacher, and some required classes that they must attend on campus at a prescribed time and day. Students are off campus for approximately 10 class sessions. At the start of the quarter, students are given a theoretical background in community-based art education, ethical issues, and social engagement. Working in teams, students will observe in the classrooms to gain a sense of the grade school community and the existing curriculum. DePaul students will then develop and teach a specific lesson plan in collaboration with the classroom teacher. The objective will be to produce a creative learning experience that co-mingles art and a core subject such as science or social studies. Teaching this art integrated lesson will be an essential aspect of the learning experience. Students will meet back at the DePaul classroom at designated intervals for information, reflection, and the analysis of their experience and their impact on the grade school community, in relation to the theoretical examples from the beginning of the course. These reflections take varied forms: discussion, role-playing exercises, presentations, and papers. Approved for JYEL and cbSL credit. Formerly ART 283.

ART 383 | SERVICE LEARNING IN THE ARTS INTERNSHIP | 4 quarter hours
(Undergraduate)
Each student will be matched with a not-for-profit art-related organization, based on the student’s interests and abilities in the visual arts as well as the organization’s needs, which will provide the student with a practical and career-centered experience. An interview with the instructor at least one week prior to the beginning of the quarter is required (email the instructor). This class can be taken for Experiential Learning credit. Offered Autumn Quarter.

ART 384 | ART-RELATED INTERNSHIPS WITH FOR-PROFIT ORGANIZATIONS | 4 quarter hours
(Undergraduate)
This is a four credit hour supervision class for any Art major or minor who has arranged for an internship with a For-Profit organization to do art-related activity. The class would be viewed as Independent Study, and the students do many of the same activities as in ART 383. This class can be taken for JYEL credit.

ART 385 | WEB ART & DESIGN I | 4 quarter hours
(Undergraduate)
This course is an introduction to web-based art (or net art). Students learn the basic skills and conceptual framework necessary to develop multimedia works of art that can only exist online. Offered Winter Quarter in odd years. ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.

ART 386 | WEB ART & DESIGN II | 4 quarter hours
(Undergraduate)
Students will analyze and produce web art projects with an emphasis on the psychological, social and cultural framework of a web based environment. Students will develop focused and independent research methods and technical skills specific to their web art practice that will expand on the fundamental principals of user interaction and an integration of image, time, motion and sound.

ART 227, ART 228, ART 264 and ART 385 or consent of instructor is a prerequisite for this class.

ART 387 | MULTIMEDIA DESIGN | 4 quarter hours
(Undergraduate)
The course introduces students to a grounding in the design and execution of intensive multimedia project using Macromedia Director. Students will learn to combine text, images, and sound within a 4D environment.

ART 101, ART 105, ART 227, ART 228 and ART 264 are prerequisites for this class.

ART 390 | ADVANCED STUDIO PROBLEMS | 4 quarter hours
(Undergraduate)
Intensive studio experience for students who have completed the requirements in their media specialty.

ART 392 | SENIOR STUDIO SEMINAR | 4 quarter hours
(Undergraduate)
An intensive capstone seminar of contemporary art theory and studio practice in the student’s area of concentration. Required for graduation in Studio Art and in Media Arts.

Senior standing, ART 394 and status as an Art, Media and Design major or Art Minor or consent of instructor is a prerequisite for this course.

ART 393 | SENIOR PROJECT STUDIO | 4 quarter hours
(Undergraduate)
In this capstone course students work on advanced self-directed project(s) with an emphasis on developing a cohesive research methodology, artist statement and refined finalized works ready for presentation. Juniors may attend with instructor's consent.

ART 394 | PROFESSIONAL PRACTICE IN THE STUDIO | 4 quarter hours
(Undergraduate)
An intensive art seminar introducing students to the professional, business, and legal skills needed to manage a career in Studio Art, Graphic Art or Photography and Media Art.

Senior standing and status as an Art, Media and Design major or minor are prerequisites for this course.

ART 395 | SPECIAL TOPICS IN ART | 4-12 quarter hours
(Undergraduate)
Focuses on special topics and techniques not encompassed by the general art curriculum.
ART 396 | INTERNSHIP | 1-12 quarter hours
(Undergraduate)
Arranges fieldwork or employment in the student's field of study. Utilizes the extensive professional studios and art institutions of Chicago and other international art facilities as well. Up to 12 hours of credit.
Junior or Senior standing and status as an Art, Media and Design major or Art minor or consent of instructor is a prerequisite for this class.
ART 399 | INDEPENDENT STUDY | 1-4.5 quarter hours
(Undergraduate)
Independent work in the student's field of study under faculty supervision. Available only to upper-level students with demonstrated capacity for self-motivated study.
ART 405 | ADVANCED ART STUDIO | 4-8 quarter hours
(Graduate)
Advanced projects in Studio Art, Media Art, and Graphic Art. ART 101 and ART 105 or consent of instructor is a prerequisite for this class.
ART 406 | GRADUATE DRAWING | 4 quarter hours
(Graduate)
An advanced and rigorous approach to historical and contemporary issues, applications and techniques of drawing. ART 306 (or equivalent) and ART 318 (or equivalent) or portfolio or instructor consent are prerequisites for this course.
ART 418 | GRADUATE FIGURE DRAWING | 4 quarter hours
(Graduate)
Encourages the application of perceptual and media skills gained in figure drawing to more advanced and ambitious works on paper. ART 306 (or equivalent) and ART 318 (or equivalent) or portfolio or instructor consent are prerequisites for this course.
ART 427 | DIGITAL ART | 4 quarter hours
(Graduate)
Digital art applications in Studio Art and Media Arts. Offered Spring Quarter in even years.
ART 101 and ART 105 or consent of instructor is a prerequisite for this class.
ART 460 | WEB ART AND DESIGN | 4 quarter hours
(Graduate)
Web Art and Design study and explorations. ART 101 and ART 105 or consent of instructor is a prerequisite for this class.
ART 461 | PHOTOGRAPHY AND MEDIA ART | 4 quarter hours
(Graduate)
Selected Topics in Art and Photography.
ART 476 | DRAWING PROJECTS (GRADUATE) | 4 quarter hours
(Graduate)
Students will explore and identify drawing topics of personal interest from an interdisciplinary perspective based on previous and current ideas, course studies, and undergraduate degree programs. Individual student interests and ideas will inform the development of a thematic approach to drawing. The selected individual themes will then be researched, explored, and applied to the creation of a completed body of drawing works or a series of final drawings, in the format of a visual mini thesis drawing project. ART 406 (or equivalent) and ART 418 (or equivalent) or portfolio review or instructor consent are prerequisites for this course.
ART 489 | VIDEO ART | 4 quarter hours
(Graduate)
An advanced level course designed to introduce students to the uses of video within a variety of artistic practices including installation, projection and performance as well as linear, single-channel non-narrative, non-documentary pieces. This course will take a "theory/practice" approach. Instruction will combine a study of the historical uses of video in the art world as well as the theoretical and critical perspectives on the practices of a wide range of artists who use video. Hands-on application of these concepts will be applied to the students' own work, culminating in a finished project by the end of the term which will be edited in the computer applications Dreamweaver, Flash and Fireworks. Basic literacy with Macintosh platform is required.
ART 490 | ADVANCED TOPICS IN ART, MEDIA AND DESIGN | 1-8 quarter hours
(Graduate)
Intensive studio art experience in the student's media of choice. May be taken for variable credit.

Arts and Ideas (AI)
AI 147 | ETHICS: HOW GOOD PEOPLE MAKE TOUGH CHOICES | 2 quarter hours
(Undergraduate)
Through life's many lessons, we have learned how to make a decision between what is the right thing to do and what is simply wrong. We can differentiate between good and evil, truth and lies, etc. However, most of our dilemmas do not stem from deciding the correct path, when we are faced with right and wrong decisions. What most often puts us into a quandary is deciding between what is right and what is right. In other words when good people are faced with tough choices, on what basis do they make their decisions? In an era of perceived ethical incertitude and moral skepticism, students will examine how decisions are made based on one of many ethical systems. Students will learn about various ethical systems, and ethicists, such as utilitarianism, deontology, Kant, Aristotle, and Gillian, just to name a few. By the end of the course students should be able to apply their knowledge of moral, ethical and social issues, and have a better understanding of how the tough decisions they make could impact others. (2-4 quarter hours)

AI 152 | EXPLORING THE ART MUSEUM | 2 quarter hours
(Undergraduate)
Museums have been a respected and trusted measurement of artistic accomplishment. In this course, the student will examine the museum’s role as collector, conservator and educator. The student will investigate the traditional role of the art museum, its collection, practices and programs as well as its efforts to integrate new media into its collection. The course also investigates repatriation, which is the ownership of ancient and cultural heritage and other issues that affect the museum such as censorship and funding. Finally it will look at how we value art as a commercial commodity. (2-4 quarter hours)

AI 153 | THE ART OF SPEECHMAKING | 2 quarter hours
(Undergraduate)
In this class, students will use tools based in the imagination, principles of design, and standard dramatic practice to create a unique, personal experience for an audience. Speech, whether we call it dramatic or declamatory, has the potential to move the masses. In this course, you will develop a personal approach and construct effective presentations that harness the power of their voice and body. (2 credit hours)
AI 155 | ANALYZING LEADERSHIP | 2 quarter hours (Undergraduate)
This course provides a framework from which to identify and analyze leadership. Leadership occurs in all aspects of life, including: business, politics, sports, society, religion, family, education, and culture. But what is leadership? The Merriam-Webster on-line dictionary defines leadership as "the act or an instance of leading," which provides us with little insight. On further investigation, however, the dictionary defines "lead" as [guide] on a way especially by going in advance. Where there is a leader, then, someone or something must follow. This course first explores the interrelationship between a leader and his or her followers and looks at the effect they have on each other. "Good" leadership traits (i.e., effective) and "bad" leadership traits (i.e., ineffective) are then studied from the perspectives of the leaders, the followers, and outsiders. Finally, this course takes a look at leadership from an international perspective. (2-4 quarter hours)

AI 157 | ENGLAND: CATHEDRALS, A PILGRIMAGE | 2-4 quarter hours (Undergraduate)
The inspiration and faith which combined to produce the magnificent cathedrals in England are worthy subjects of study for students of art, history, architecture and religion. This Spring Break study abroad course brings students to some of the most important cathedrals in the world to provide opportunities for such important study. On this program, participants will gain valuable understandings of religion, art, and culture as they simultaneously engage with present day British culture and attempt to unravel its rich and complex past. SNL Students must register for three to four competencies between the two quarters. For more information, please visit the study abroad website or contact the instructor. (2-6 quarter hours)

AI 160 | IT'S ONLY ROCK AND ROLL: MAKING MUSIC THE OLD FASHIONED WAY | 2 quarter hours (Undergraduate)
For many, music is an integral part of everyday life. It is also deeply ingrained in most cultures. Music is used by individuals, businesses and societies to entertain, soothe, excite, and arouse. Music is basically a series or combination of pleasing sounds but how is music made? How do we know what is pleasing and what is not? The answers to these questions and others demonstrate that music is also a field where science and art meet. In this class, we will explore how sound is physically created and how specific sounds have been turned into music over the centuries. Through experimentation, we will examine the physical and mathematical properties of sound and musical instruments. We will also create simple musical instruments and share the experience of creating musical pieces. No musical experience is needed to take this class. (2-4 quarter hours)

AI 167 | DIGITAL PHOTOGRAPHY | 2 quarter hours (Undergraduate)
Students learn in this course to take artistic digital photos. They will analyze photos they have taken prior to the course and discuss if they fulfill criteria to be seen as art. Several theories of artistic expression will be discussed. Rules of composition, light, exposure, colors, etc. will be reflected upon. In a second step the students will develop the competence to alter their digital photos with a program like "Photoshop Elements". They will be able to change the expression of their photos and combine different shots, creating their personal piece of art. As a final product, students will create a portfolio with about 5 photos including detailed descriptions of their work. (2-4 quarter hours)

AI 170 | CREATIVITY AND ENTREPRENEURSHIP | 2 quarter hours (Undergraduate)
IPads. Smart Phones. The automobile. These inventions, once unknown and now taken for granted, required years of imagining, experimentation and innovative thinking. While we value the end product, we are often unaware of the underlying creative/creating process. This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. This course will explore contemporary approaches to the creative process based on the human capacity to imagine, to explore and, ultimately, to create. These are core skills for anyone pursuing a career as an entrepreneur or simply in search of ways to explore innovation. (2 credit hours)

AI 172 | MAKING POEMS: AN INTRODUCTION TO VERSE | 2 quarter hours (Undergraduate)
Making poems will be a creative writing offering that teaches metrics and verse forms, poetry the old-fashioned way. Topics will include metric feet, rhyme, lines, and verse forms. For example, students will learn about the iambic foot, write some iambic lines of various lengths, and finally use the iambic line to write a sonnet. Rap poetry with its structured rhythms and elaborate rhyming is another possibility. This "formalist" approach promotes a kind of creativity that is strongly infused with craft and discipline in contrast to the "spoken word" or confessional approaches to making poems. This class involves making audio recordings of your poems; students will be required to purchase a headset/microphone and download and install free software. (2-4 quarter hours)

AI 176 | CREATIVE WRITING | 2 quarter hours (Undergraduate)
Designed to help you explore the art of writing stories, either stories that are "made-up" or stories based on lived experience. You will be required to complete six fiction-writing exercises, and either one short story, one autobiographical story, or one story based on an oral history collected by the you. In addition, you write a final essay in which you reflect on your learning and experience in the course. (2-4 quarter hours)

AI 181 | CREATING ORIGINAL DIGITAL ART | 2 quarter hours (Undergraduate)
The course will focus on electronic visual art, and because of the amount of material to be covered, will not include audio or animation art. Student will look at what constitutes "art", then look at how original art could be created using technological tools, such as Microsoft Paint, Pixel-based art, such as Microsoft Graphics in PowerPoint, Digital Photography and PhotoShop; digital short-movies, and Digital Animation using Freeware GIF Animation software. (2-4 quarter hours)

AI 185 | THE BEATLES AND THE CREATIVE PROCESS | 2 quarter hours (Undergraduate)
The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition. (2-4 quarter hours)
AI 202 | LONDON ALIVE: IN THEATERS, MARKETS AND MUSEUMS | 2-4 quarter hours
(Undergraduate)
Join SNL in London for a course about performance and representation. Theater, live performance, museum collections and street markets are integral parts of English cultural history; they also represent Britain’s international heritage. London theaters celebrate English history, culture and language, and carry the banner of the English artistic imagination into the future. London’s museums make it one of the most visited cities in the world for the range of its collected artifacts and images. Outside the theater and museum doors, markets teem with life, creating a magical intersection of past with present and future, of art with life and politics, of cultural stasis with social change. (2-4 quarter hours)

AI 203 | ART AND TRANSFORMATION | 2-4 quarter hours
(Undergraduate)
What’s the difference between change and development? Between action and inspiration? Between mobility and transition? Between planned change and transformation? If you can answer all those questions, try this: What’s the difference between the creative contributions of painter Leonardo da Vinci and CEO Walter Isaacson? This course explores how art can serve as a guidepost during key phases in the adult experience, especially those involving transition periods like healing, growth, and personal and professional change. Students look at cases of major change agents throughout history who became catalysts for cultural transformation in part because of the impact of important works of art. The students will engage with diverse examples of art that have influenced important thought leaders and change agents of the past and present to become catalysts for major transformations in the human experience. Students will learn how significant products of the creative process? in this case, great works of art? can encapsulate, reflect, and even activate the process of personal as well as social change, and how each of us can participate in the alchemical process of reflection, inspiration, and action that can result in transformation of inner and even worlds. Art and Transformation introduces learners to a variety of works of art and the people they influenced, a group that will eventually include the learners themselves. It presents a range of ways to approach the arts and to use them as tools of inspiration, self-reflection, communication, and growth. Divided into four units (Art and Personal Transformation, Art and Cultural Transformation, Art and Leisure, and Art and Work), the class presents multidisciplinary examples of literature (poetry, fiction, essays, memoir), as well as film and other visual arts. Students will consider art both from the perspective of the artist him/herself as well as that of major thought leaders and change agents whose contributions to society have been motivated by an engagement with art that acted as a catalyst for system shifts in areas of personal and cognitive growth, cultural and political change, as well as the transformation of the world of work in the 21st century. Ultimately this course is an investigation of art itself as a change agent that has much to tell us about the past, the present, and ourselves. (2-4 hours)

AI 204 | CREATIVE ENTREPRENEURSHIP | 2 quarter hours
(Undergraduate)
IPads. Smart Phones. The automobile. These are inventions, once unknown and now taken for granted, required years of imagining, experimentation and unconventional thinking. While we value the end of the process (the product), we are often uncomfortable with the creative/creating process. The process of imagining, conceptualizing and articulating this ‘new?’ requires skills we often label ‘creative?. This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. Contemporary ideas about creativity are often tied to images of the past - from mad scientists to mystical muses. But modern science tells us something else about the creative mind. This course will explore contemporary approaches to the creative process based the human capacity to imagine, to explore and ultimately, to create. These are core skills for anyone in pursuing a career as an entrepreneur, or simply in search of ways to explore innovation. In this course, we will examine the ideas of three major thinkers form the world of creativity, disruption and entrepreneurship. We will then explore where these ideas converge on topics including, risk, the random, intuition and innovation. (2-4 quarter hours)

AI 211 | ANALYZING AUSTEN’S PRIDE AND PREJUDICE | 2 quarter hours
(Undergraduate)
Jane Austen must have known something about universal truths. Her novel, Pride and Prejudice, which begins with the sentence quoted above, was first published in 1813. Still in print today, it has also been made into at least eleven movies, four of which were released since 2000, including a Mormon and a Bollywood version. In this class, we will read the novel in the context of the gender and class norms at the time Austen wrote her book and then consider how Austen’s exploration of universal truths is reinterpreted in more contemporary film versions of this novel. In exploring Austen’s creation and the many reinterpretations of her work, we will use both analytic and creative writing assignments as well as class discussion to examine how context informs creativity and how creativity informs analysis. You most definitely do not need to be a creative writer to take this class. (2-4 quarter hours)

AI 215 | FILM NOIR | 2 quarter hours
(Undergraduate)
In this course we will screen and discuss select noir films and develop skills of viewing and analyzing them closely. Highlighted topics will include the concept of genre in film; the relationship of genre codes to creativity; the dynamics of form and content; the tension between commerce and art; the auteur theory; psychologies of the divided self; representations of masculinity and femininity; and the question of what these films say about American society, post-World War II. (2-4 quarter hours)
**AI 217 | MINDFULNESS MEDITATION | 2 quarter hours**
(Undergraduate)
Mindfulness meditation provides many different ways to broaden our awareness of the world around us, heighten our powers of concentration, deepen our understanding of our experience, and cultivate creative and transformative ways of being in the world. Many approaches to mindfulness meditation draw on ancient religious and spiritual traditions from around the world. So mindfulness meditation is compatible with and can enhance whatever religious or spiritual commitments you may have. But mindfulness meditation does not require religious or spiritual interpretations. It can be practiced as a very powerful path to becoming a creative, healthy and effective adult. In this course, you will learn what mindfulness meditation is and various ways in which it can be practiced. We will explore in particular how mindfulness meditation can enhance creativity, address the ethical challenges of contemporary life, and foster collaborative learning. Class sessions will involve extensive practice in mindfulness meditation, listening and dialogue. You will be expected to maintain and reflect on a daily mindfulness meditation practice for the duration of the course. (2-4 quarter hours)

**AI 225 | GREAT MUSIC IN CHICAGO | 2 quarter hours**
(Undergraduate)
The course introduces people to three of the most exciting and rewarding institutions in Chicago music: the world-famous Chicago Symphony Orchestra at Symphony Center downtown; the fabulous training orchestra of the Chicago Symphony Orchestra, known as the Civic Orchestra, also downtown; and live top-name jazz at the Jazz Showcase. We learn the background of these institutions, the nature of the arts they perform, and the terms used to describe and appreciate those forms. Most importantly, we experience, in person, the great music that they play! (2-4 quarter hours)

**AI 254 | RESISTANCE DURING THE HOLOCAUST AND WORLD WAR II | 2 quarter hours**
(Undergraduate)
This course explores the history of the Holocaust in the context of the Second World War (1939-1945) with a central focus on examples of resistance to discrimination, fascism and oppression. We will explore varied forms of opposition including armed resistance, spiritual resistance, resistance through writing and identity preservation. We will read autobiographies, view documentary and dramatic films, and use museum resources to develop our understanding of resistance. Required activities include a visit to the Illinois Holocaust Museum and Education Center (Skokie, IL). We will also consider the implications of this history for making ethical choices in our world today. (2-4 quarter hours)

**AI 255 | SELF EXPLORATION: INSIDE OURSELVES, OUTSIDE WITH OTHERS | 2 quarter hours**
(Undergraduate)
Exploring the self can be a very personal and satisfying experience, but can also provide clues as to how you interact with others, accomplish daily tasks and how to become a more happy, productive and respected individual. Students engage in self reflection in a collaborative learning format where they learn about themselves, share the process with a learning partner and observe the trends and conclusions of the class. Topics to be explored include family origins, gender perspectives, personality traits and development, self awareness and identity, creativity, and professional and moral perspectives. This course will operate in a blended hybrid format with meetings that link students in the classroom with others through live video interaction. You will have the option to attend either on campus or online for the five scheduled bi-weekly meetings. In addition, participation in the online discussion forum is required. This course is cross listed as CCA 255 and AI 255. (2-4 quarter hours)

**AI 256 | WORKPLACE AND PROFESSIONAL ETHICS | 2 quarter hours**
(Undergraduate)
This hybrid-learning course is open to all DePaul undergraduates. It provides a thorough grounding in the theoretical and applied nature of work-based ethical decision-making. We engage the tenets and assumptions of four major ethical perspectives, using them to examine the meanings and implications of morality in professional life. Using the tools of reason, we investigate obstacles to ethical decision-making in one’s and others’ professional behavior, and apply our learning in the writing of a personal ethical code. (2-4 quarter hours)

**AI 282 | LEISURE FOR WELL-BEING | 2 quarter hours**
(Undergraduate)
The pursuit of happiness for most people is an important aim in life. A personal feeling of well-being includes "emotional happiness" and the rational satisfaction with one’s own life. In this course you will attempt to define the term "well-being" and discover its relationship with other concepts such as mental health and life satisfaction. How does physical exercise influence well-being? How do positive and negative life events influence well-being? Do good social relationships guarantee happiness? Do the expectations one has in life with regard to income influence well-being? Is it important to set goals to achieve a high level of well-being? These and other questions will be addressed in this course. You will try to define some of things a person can do to increase his or her level of well-being. Others’ ideas serve as common course content, as presented in the material assigned to this course. You will be asked to participate actively and critically, to work individually and in study groups, using your own experience as a field of analysis and reflection. Active group participation will foster a harmonic, interactive environment, which might increase positive relationships among students and foster a feeling of well-being throughout this course. (2-4 quarter hours)
AI 285 | WORK, PLAY, REST: NAVIGATING COMPLEXITIES OF ADULT LIFE | 2 quarter hours (Undergraduate)

Adult life has become complex. With expectations from family, school, work, home, social pressures, technology and social media, it sometimes feels impossible to keep up. When the news bombards us or becomes frightening, and the world around us feels uncertain, how do we make sense of things and find our way forward? In this course, we will begin from the place that human beings are full of creativity, ingenuity, resourcefulness, generosity and hope. Our very lives and the world around us will be our subject matter - our need to work, our bodies' need for rest, and our enjoyment of leisure and recreation. Where does stress, expectation and anxiety come from, how are these held in the body, and what can we do about it? And, how has story, movement, music and sound, humor, popular entertainment and fun helped humans get through the day, navigate relationships, and find more ease? By engaging in simple creative practices in and out of class and considering what might be useful for individual and collective well being, the goal is for students to create a toolbox of approaches for navigating life's complexities to carry forward beyond the class. (2-4 quarter hours)

AI 286 | NEW ORLEANS IN SONG, STORY & STRUGGLE | 2 quarter hours (Undergraduate)

The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry - music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, r&b, zydeco and funk. We will situate these art forms in social, historical and political context and examine the complex processes of invention and adaptation which have shaped them; in that regard, we will particularly highlight the development of early jazz in this unique metropolis which, though residing at the tip of North America, has been called "the capitol of the Caribbean." We will make use of Thomas Brothers' pioneering study Louis Armstrong's New Orleans as well as musical performances by the likes of Professor Longhair, the Neville Brothers, Wynton Marsalis and Dr. John. We will also learn about the carnivalesque culture of New Orleans, a pursuit that will take us into what might be called the secret history of Mardi Gras. In addition, we will read two striking literary works by artists who have a background in and fascination with the crescent city. Kate Chopin's groundbreaking novella The Awakening and Tennessee Williams' spine-tingling one-act play Suddenly, Last Summer. Moreover, we will consider the role played by New Orleans in American history and imagination as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level. (2-4 quarter hours)

AI 322 | PROBLEMS AND ISSUES IN CONTEMPORARY ETHICS | 2 quarter hours (Undergraduate)

An introduction to moral philosophy with emphasis on the conflict between "moral relativism" (or "subjective" ethics) on the one hand and "moral realism" (or "objective" ethics) on the other. During the course you will be introduced to classic theories and leading figures in the history of ethics, from Plato and Aristotle to Kant and Nietzsche. Course content will focus on issues (e.g., poverty, drug use, capital punishment, sexual behavior, euthanasia, biomedical research, animal rights, political violence) at the center of contemporary ethical debate in the United States and throughout the world. (2-4 quarter hours)
AAS 208 | CHINA'S CULTURAL SOFT POWER AND ITS FUTURE | 4 quarter hours
(Undergraduate)
Within three decades, China has transformed from an impoverished and self-secluded nation into a global powerhouse challenging the world's status quo. Through select soft power theoretical perspectives, this course will explore three primary questions: 1) what are China's cultural soft power resources? 2) how does China wield its cultural soft power? 3) how do we view China's future? The class will analyze multiple aspects of Chinese culture and its contemporary society and understand the prospects of China in the next generation. We will focus on the dramatic social cultural changes in China in the past decades that reflect its cultural soft power or lack thereof and explore its long-term impact on the rest of the world. The readings and class discussions will engage topics on China's historical dynamics, cultural traditions, contemporary societal changes, politics, economy, and international relations. Students will be exposed to and analyze comparative views analyzing and predicting China's future.

AAS 209 | CHINESE YOUTH CULTURES | 4 quarter hours
(Undergraduate)
As China's economic and political influence grows on the world stage, it has become increasingly important to understand China's youth who as the next generation of leaders and workers will unquestionably shape the country's trajectory, and ultimately the world's geopolitical, economic, and cultural landscape. It is well documented that China's millennials and their younger siblings have witnessed greater and faster socioeconomic and demographic changes than previous generations. This course is designed to help students understand and analyze what it means to be young in such a fast-changing country that is ruled by one Party but continuously exposed to intense globalization.

AAS 210 | ASIAN ART | 4 quarter hours
(Undergraduate)
An introduction to major developments of art and architecture across Asian cultures including South Asia, Southeast Asia, the Himalayas, and East Asia and their counterparts in America. This course examines not only painting, sculpture, and architecture, but also gardens, ceramics, and prints. Special emphasis will be placed on religious arts of Buddhism and Hinduism, along with landscape and figural painting. Cross-listed with HAA 115.

AAS 211 | BUDDHIST ART | 4 quarter hours
(Undergraduate)
This course explores the traditional visual culture of the Buddhist world, examining art as a reflection of religious belief and practice. The works come from South Asia, Southeast Asia, East Asia, and America. An emphasis is placed on painting, sculpture, and architecture made for or related to Buddhist practice. Cross-listed with HAA 220.

AAS 214 | JAPANESE ART | 4 quarter hours
(Undergraduate)
This is a chronological survey of premodern Japanese art, from the prehistoric era to the Meiji period (1868-1911). Topics covered include painting, sculpture, and architecture, as well as decorative arts, prints, and garden design. Special attention is given to Buddhist and Shinto religious arts, along with screen painting and woodblock prints. Cross-listed with HAA 216.

AAS 215 | INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY | 4 quarter hours
(Undergraduate)
This course charts the political, social and economic transformation of the developing countries (Africa, Asia, Latin America, Caribbean, Pacific Islands) into a global economy dominated by the 'developed' countries (North America, Europe and Japan). This process, termed 'GLOBALIZATION,' results from the operation of the global market mechanism, the activities of Transnational Corporations (TNCs) and the programs of the International Financial Institutions (IFIs). Cross-listed with GEO 215.

AAS 216 | CHINESE ART | 4 quarter hours
(Undergraduate)
This is a chronological survey of premodern Chinese art from antiquity to the nineteenth century. Special attention is given to sculpture and painting, but architecture and ceramics are also covered. There is an emphasis on prehistoric bronze vessels, Buddhist sculpture, and landscape painting of the Song through Qing periods. Cross-listed with HAA 215.

AAS 217 | ARTS OF INDIA AND THE HIMALAYAS | 4 quarter hours
(Undergraduate)
This is a chronological survey of premodern arts of the subcontinent of South Asia and the Himalayas. We start with the Indus Valley Civilization and move through the nineteenth century, including Mughal arts. Special attention is given to the emergence of figural imagery in Buddhist and Hindu sculptural arts, and the development of religious architectural forms from early stupas and cave temples to later shrines. Cross-listed with HAA 217.

AAS 218 | ARTS OF THE SILK ROAD | 4 quarter hours
(Undergraduate)
This course will examine the visual history of the Silk Road, focusing on works of art and architecture created in Central Asia. We not only consider the prehistoric, ancient and medieval arts of this region, but we also investigate the modern development of a romanticized notion of the Silk Road and the imperial interest in acquiring treasures from the Silk Road. Today we frequently hear about the legacy of the Silk Road in promoting multicultural exchange. However, the Silk Road has long been affected by the expansionist agendas of empires. From the time of Alexander the Great (356-323 B.C.E.) through the period of Genghis Khan (1162-1227) and on, there have been military leaders who have led their armies into Silk Road lands seeking territory, riches, and glory. Cross-listed with HAA 218.

AAS 219 | K-POP & ITS GLOBAL CULTURAL INFLUENCE | 4 quarter hours
(Undergraduate)
This course examines the increasing visibility and global dissemination of Korean popular culture, representatively K-pop. Looking through various social causes concerned with the dissemination of Korean popular culture (e.g., Korean entertainment industry, online K-pop fandom communities, race and gender systems in K-pop), this course will help students critically consume and understand Korean pop culture. By exploring various global cultural forces that are at work in the production and consumption of Korean pop culture, students will learn controversial topics around global culture and cultivate their global sense beyond Euro-American perspectives. Throughout the semester, students will do so by working both individually and in groups on a series of projects designed to further their understanding of Korean pop culture and its ramifications in the global digital era.
AAS 220 | AMERICAN BUDDHISM | 4 quarter hours
(Undergraduate)
This course critically analyzes the origins of Buddhism in the United States in order to fully understand how and why Buddhism has flourished in Asian and White American communities, and to understand the conflict and controversy surrounding the racial dynamics of religious choice. Cross-listed with AMS 220.

AAS 221 | RELIGION IN SOCIETY: SOUTH ASIA | 4 quarter hours
(Undergraduate)
Focusing on South Asia, this course will explore how religion is both embedded in, and dynamically interacts with, the wider socio-cultural contexts of which it is a part. We will examine how religious ideas constitute and are constituted by social forces such as race, caste, class, gender, and sexuality both in South Asia as well as within the wider diaspora. We will analyze how religious ideas are re-shaped as people negotiate the changing social, economic and political circumstances of everyday life and construct self and identity in our increasingly transnational world.

AAS 222 | RELIGION AND CONFLICT IN SOUTH ASIA | 4 quarter hours
(Undergraduate)
Religion has become central to conflict in contemporary South Asia. This course examines the relationship between religion and conflict both within and between nations in South Asia. It will examine how religion fuels conflict as well as how religion is used to find a nonviolent resolution to conflict. It will also analyze how religion is used to challenge and resist victimization, marginalization, silencing, and indeed violence during conflict. Finally, the course will examine how the cultural politics of class, gender, ethnicity, and sexuality constitute and are constituted by religion.

AAS 223 | TALES OF INDIA | 4 quarter hours
(Undergraduate)
Before the modern nation-states of India and Pakistan came into being, the term "India" referred to the South Asian region, a region that has been and is the home of many cultures and societies. These cultures have also reached beyond the region to create rich and paradoxical diaspora experiences in Europe and the Americas. Tales of India will explore a variety of literatures, ancient and contemporary, that illuminate the worlds of South Asian peoples in their homelands and in the transnational life of the diaspora. Themes will include love, power, religious meaning/religious identity, and cultural difference.

AAS 224 | HINDU THOUGHT AND CULTURE | 4 quarter hours
(Undergraduate)
An exploration of Hinduism as a civilization whose key reference points are religious in the sense understood in the West (ritual and transcendence), yet which finds expression in a "high culture" of literary works, political and social theory, art and architecture, music and dance, and folk and popular stories, songs and plays. Cross-listed with REL 242.

AAS 225 | RELIGION AND SOCIAL ENGAGEMENT: SOCIALLY ENGAGED BUDDHISM | 4 quarter hours
(Undergraduate)
An investigation of the ways in which various religious traditions engage the social order. Traditions, persons and movements that form the focus of the course will vary from section to section (in this case the focus is on Buddhism). The course will integrate theory and practice in studying forms of religious engagement. All students will perform some service to a community or within a community organization or agency.

Sophomore standing or above is a prerequisite for this class.

AAS 226 | ETHICAL WORLDS: MORAL ISSUES ACROSS CULTURES: ATOM BOMB DISCOURSE | 4 quarter hours
(Undergraduate)
An exploration of religion and ethics from a comparative and international perspective. Ethical dimensions of diverse world traditions (in this case the development and use of atomic weaponry) will be investigated within their own particular historical and cultural contexts, and students will be asked to consider and evaluate their own ethical orientations in the light of these studies.

AAS 227 | BEYOND PARASITE: SOUTH KOREAN CULTURE THROUGH FILM | 4 quarter hours
(Undergraduate)
In 2012 the explosion of "Gangnam Style" on YouTube helped to usher in a new generation of American K-Pop addicts and interest in Korea culture. In 2019 Parasite became the first non-English film to win the Academy Award for best picture and driving a new wave of interest in yet another underappreciated genre of Korean cultural creation. It also brought new global attention to the domestic social issues that it depicted in South Korea concerning class, gender, race, and economic development. Changes and challenges in Korean society are reflected in its cultural products such as film. This course examines Korean society, culture, and history through the lens of cinema while critically engaging contemporary local and global social issues. This course will critically examine films from various periods of Korean history such as postwar cinema, the renaissance of the 1990s-2000s, and the modern era which will include blockbusters, independent films, and Academy Award winning masterpieces. Through an examination of recurring themes such as tradition, national division, gender, colonialism, and identity, students will learn to analyze, evaluate, and engage with Korean film media while improving their intercultural communication skills. No prior knowledge of Korea or the Korean language is necessary and all films will have English subtitles.

AAS 228 | ROMANCE IN ASIA: LOVE AND GLOBALIZATION | 4 quarter hours
(Undergraduate)
How is globalization shaping who and how we love? Globalization is transforming the social and economic reality that young people in Asia must navigate in order to find love. They seek to create intimate relationships that satisfy their emotional, material and erotic desires, as previous modes of relationship formation increasingly fail to fit the new realities of contemporary Asia. This course examines diverse social landscapes in South Korea, Japan, China, India, and South East Asia where traditional forms of dating, marriage, and social reproduction are in upheaval. Globalization has brought about rapid but dissimilar social changes to this region such as increased inequality, growing elderly populations, and steep male to female ratio imbalances. Advances in rapid forms of communication and transportation also bring these disparate places together through cross-border marriage and online dating. This course surveys experiences in Asia of how intimacy and love are shaped, contested, and negotiated in daily life, in dialogue with changing gender expectations, social hierarchies, and increasing interdependence.
AAS 233 | THE RISE OF MODERN CHINA | 4 quarter hours
(Undergraduate)
Examines the history of Chinese civilization from the 18th century to the present. We will survey the height of the authority of the Qing Imperial government, its dissolution in the 19th century, and the creation of a revolutionary China in the 20th century. Topics include the Opium War and China's foreign relations, the introduction of Westernized technology and education, and the rise of Communism under the leadership of Mao Zedong. Also considers the ways in which our contemporary understanding of China is formed by recent developments in the media - Chinese news and film. Cross-listed with HST 233.

AAS 238 | JAPANESE FILM ARTS | 4 quarter hours
(Undergraduate)
This course examines the development of cinema as an artistic form in Japan, from its inception in the early twentieth century to its explosion as an international phenomenon in recent decades. The Japanese cinematic experience is considered as visual expression that parallels key Japanese arts of handscroll painting and woodblock prints. We discuss such genres as samurai films, fantasy tales, monster movies, yakuza thrillers, and science fiction anime. Among the masterpieces studied are Ozu’s Tokyo Story, Kurosawa’s Rashomon, Itami’s Funeral, and Miyazaki’s Spirited Away. Issues addressed in relation to these films include artistic expression, technological progress, national identity, social unrest, and religious concern.

AAS 239 | RELIGION AND ETHICS IN JAPANESE FOODSCAPES | 4 quarter hours
(Undergraduate)
What would be your last meal? We may all have to reflect on this question once or twice in our lives. The potential diversity of our responses to this question suggests that our relation to food can be quite personal and intimate, as well as cultural and social. In this regard, investigating food is a powerful analytical tool for understanding ourselves and our relations with our surroundings. In particular, in Japan, many TV programs on food, including quiz shows, dramas, and documentaries, have been produced and have garnered attention. Thus, the course equips students with a grasp of the Japanese culture from the vantage point of food, and the benefit of a personal self-reflection and understanding. Studying food in Japan, with particular attention to the underpinnings of religious doctrines, spiritual sensibilities, and ethical implications will inform students not only of the cultural ethos of Japan, but also of its social and political orders. Students will explore how Japanese writers engaged the modern era. This was the period when modern literature, more specifically the novel (shosetsu), was emerging internationally as a new technology of state-building. Modern Japan was highly literate with a flourishing popular culture that included diverse literary forms (high and low) that would be refashioned, contested and sometimes abandoned as the institution of literature was established by the turn of the 20th century, although not without ongoing contestation. Themes may include: the West, Orientalism and Counter-Orientalism; protest literature by women, workers and ethnic minorities; and modernism and modernity. Authors may include: Higuchi Ichiyö, Natsume Soseki, Yosano Akiko, Akutagawa Ryunosuke, Kobayashi Takiji, Murakami Haruki, and others. Cross-listed with MOL 240.

AAS 240 | MODERN JAPANESE LITERATURE | 4 quarter hours
(Undergraduate)
This course is an introduction to the major authors and works of Japan’s modern period, from the 18th century through the 21st century. We will examine writers, works, and literary institutions in historical context to explore how Japanese writers engaged the modern era. This was the period when modern literature, more specifically the novel (shosetsu), was emerging internationally as a new technology of state-building. Modern Japan was highly literate with a flourishing popular culture that included diverse literary forms (high and low) that would be refashioned, contested and sometimes abandoned as the institution of literature was established by the turn of the 20th century, although not without ongoing contestation. Themes may include: the West, Orientalism and Counter-Orientalism; protest literature by women, workers and ethnic minorities; and modernism and modernity. Authors may include: Higuchi Ichiyö, Natsume Soseki, Yosano Akiko, Akutagawa Ryunosuke, Kobayashi Takiji, Murakami Haruki, and others. Cross-listed with MOL 240.

AAS 241 | RELIGION IN CHINESE HISTORY, SOCIETY, AND CULTURE | 4 quarter hours
(Undergraduate)
An exploration of the Chinese religious landscape, focusing on social and practical dimensions of Chinese religion, such as state rituals and private cults, liturgies and individual practices of Taoist priests and adepts, politico-religious ideas that inspired popular messianic movements throughout Chinese history, and interrelations of Buddhist and Taoist clergies and institutions in the state. Cross-listed with REL 241.

AAS 242 | LITERATURE AND RELIGION IN CHINA | 4 quarter hours
(Undergraduate)
An exploration of religious themes reflected in diverse forms of Chinese story literature from ancient to contemporary times. Cross-listed with REL 248.

AAS 243 | BUDDHIST THOUGHT IN CULTURAL CONTEXT | 4 quarter hours
(Undergraduate)
An exploration of the Buddhist tradition, using original sources, from its beginnings in ancient India to a world religion with strong roots in the US. Students will discover how Buddhism interacts with cultures from Sri Lanka and Thailand to China, Japan and Tibet. Although this course is online, students in the region will have the opportunity to practice meditation at a Chicago zendo and tour the Buddhist art at the Chicago Art Institute. Cross-listed with REL 243.

AAS 244 | TRADITIONS OF CHINESE POPULAR CULTURE | 4 quarter hours
(Undergraduate)
Promotes an understanding of Chinese worldview and life in the perspective of the common Chinese people from ancient to modern times. Based on historical and modern texts in translation, some historical and ethnographic studies, as well as visual and aural materials, the course explores gender and generational relations and conflicts, ancestor veneration, the worlds of ghosts and gods, festivals, art, and entertainment, but also aspects of misery and social unrest. Although the course will draw largely on popular and entertaining sources, it will also pay attention to historical developments, the relationship between popular and elite traditions, as well as sociological and anthropological issues arising from these contexts. Cross-listed with REL 246.
AAS 245 | RELIGION IN JAPANESE HISTORY, SOCIETY, AND CULTURE | 4 quarter hours (Undergraduate)
Explores the specific interplay between religion and culture in Japan. Taking historical and cultural factors into account, it considers prehistoric Japanese religion, ancient imperial myths, the assimilation of Buddhism, Confucianism, and continental (Chinese/Korean) culture, the religious and aesthetic worlds of the court nobility and the warrior class, popular mountain cults, the revival and systematization of Shinto, the impact of western culture, Japanese ultranationalism, and the religious situation in the post-war period. Cross-listed with REL 245.

AAS 246 | ASIAN FOREIGN POLICY | 4 quarter hours (Undergraduate)
This course surveys the international relations of selected Asian countries. For each country, the course presents the basic historical background shaping foreign relations, introduces the external and domestic influences on foreign policy, and identifies emerging international challenges. It examines both the economic and military-security dimensions of Asian foreign relations. Cross-listed with PSC 246.

AAS 247 | LITERATURE AND RELIGION IN JAPAN | 4 quarter hours (Undergraduate)
Focuses on the pervasive influence of religious thought and sentiment on Japanese literature from ancient to modern times and explores the intricate relationship between religion, aesthetics, and the arts in Japanese culture. Considers original works including ancient Japanese mythology and poetry, the memoirs of court ladies and Buddhist hermits, romance, epics, folktales and social satire, with attention to their historical, social, religious and social dimensions, as well as to the individual experience expressed in them. Cross-listed with REL 247.

AAS 248 | CHINESE CALLIGRAPHY | 4 quarter hours (Undergraduate)
An introduction to the art of Chinese calligraphy. Hands-on practice as well as history and theory of the art. This course is open to students with no background in Chinese calligraphy, language, literature, or culture. Cross-listed with MOL 248.

AAS 249 | JAPANESE WOMEN'S LITERARY MASTERPIECES | 4 quarter hours (Undergraduate)
The course begins over 1000 years ago with masterpieces of world literature including The Tale of Genji and classical poetry, traverses through the modern period of New Women Bluestocking and arrive in the 21st century to reflect on the richness of Japanese women?s writings across time and space. * No prior knowledge of Japanese language, history or culture.

AAS 250 | CHINESE CINEMA: A WINDOW ON CHINA | 4 quarter hours (Undergraduate)
This course studies Chinese cinema, the visualized artistic reflection of Chinese society, ideology, and culture from four perspectives: Historical, directorial, thematic, and artistic. It will cover the history of Chinese cinema, from the birth of the first Chinese film through the Silent Age, 1st Golden Age, 2nd Golden Age, Pre- and-Post-War Era, Pre- and-Post "Cultural Revolution" Period, and the Fifth Generation up to the emerging Sixth generation and beyond. Through substantial exposure and analysis of selected movie classics and subsequent classroom discussions, students will be well informed about the major developments and trends of each period in the history of Chinese cinema. Students will also explore the historical backgrounds, artistic characteristics, and key directors and stars of important Chinese movies as well as cinematic terminologies, the formation of Chinese cinematic theories, and innovative cinematic techniques.

AAS 251 | SOUTH ASIA TO C. 900 C.E.: THE STONE AGE TO THE GOLDEN AGE | 4 quarter hours (Undergraduate)
The course follows the development of the history of the region from the earliest phases of human settlement, the first civilization in the Indus valley, and the formation of the Mauryan and Gupta empires. It will analyze the growth of different state structures from tribal/lineage based state to these great empires. It incorporates the rise of regional states and the growing importance of trade to linking South Asia with the West. It will also examine the development of different religious traditions from Vedic Brahmanism to Buddhism to Jainism and the very early days of Islam in the region. The central question of this course will be how to contextualize the relationship between structures like family, law, caste, community, state and the tumultuous changes in the subcontinent over this long period. Cross-listed with HST 151.

AAS 252 | SOUTH ASIA, C. 900 TO 1707: SULTANS, MUGHALS, AND ISLAMIC EMPIRES | 4 quarter hours (Undergraduate)
The course begins with the transformation of society from the ‘ancient’ to the ‘medieval’, and compares this to developments in Europe in the feudal age. It then incorporates specific political, social, and cultural developments in South Asia that came about with the establishment of powerful Islamic states in a region where Muslims were a minority. These issues will inform the analysis of the Ghaznavid and Ghurid invasions, the Delhi Sultanate, the Vijayanagara empire and the Mughal empire. The course will end with the Marathas and the decline of the Mughal empire, and the rising influence of the British. The central themes concern how the state, economy, culture, and society developed in the period when Islam became firmly embedded in South Asia. Cross-listed with HST 152.

AAS 253 | ASIAN POLITICS | 4 quarter hours (Undergraduate)
An introduction to contemporary government and politics in Asia, focusing on China and Japan, with comparative reference to other Asian and non-Asian political systems. Special attention will be made to the emerging political and economic role of the Pacific Rim.

AAS 254 | SOUTH ASIA, 1707 - 1947: RISE AND FALL OF THE BRITISH RAJ | 4 quarter hours (Undergraduate)
The course begins with the decline of the Mughal Empire, and then moves to examine the British empire, the nationalist movement and finally to independence and partition in 1947. The central questions of this course continue to be relevant in the post-colonial period: how we understand the distinctive form of modernity that has developed in South Asia. Taking a comparative approach as often as possible, the course examines the fundamental ways that Britain was as transformed by the development of its empire as was colonial India. The course constantly deconstructs easy binaries of self and others/ East and West by examining the differences within Indian and British society. Cross-listed with HST 153.

AAS 263 | JAPAN TO C. 1200 | 4 quarter hours (Undergraduate)
Follows the formation of a unified state in central Japan during the 5th and 6th centuries. Considers the influence of Korean immigrants and Chinese philosophy and statecraft on the unification of Japan in early antiquity. Explores rise of Japan's aristocratic court culture in Nara and Kyoto as well as powerful Buddhist institutions and the emergence of the warrior class in Eastern Japan. Cross-listed with HST 263.
AAS 264 | JAPAN, CA. 1200-1800 | 4 quarter hours
(Undergraduate)
Follows the emergence of the warrior class and the system of dual political authority until the 14th century, with the imperial court in Kyoto and the samurai elite in Kamakura. Continues with an examination of the early modern processes of urbanization and the growth of a monetary economy, changes in social organization, major cultural innovations, and religious/intellectual movements. Cross-listed with HST 264.

AAS 265 | JAPAN, C. 1800 - PRESENT | 4 quarter hours
(Undergraduate)
Follows the radical transformation of Japanese politics, society, and economy with the commercialization of the countryside, the weakening of samurai rule, and increased, often hostile, contact with Western imperialist nations. Explores expansion of Japan as an imperialist nation from the middle of the 19th century and the lasting legacy of that expansion in the region. Explores WWII and postwar political, economic, social changes in contemporary Japan. Cross-listed with HST 265.

AAS 266 | EAST ASIA, C.1800-PRESENT | 4 quarter hours
(Undergraduate)
Begins with the reshaping of East Asian relations from the late 18th century following the realignment of the region after the expulsion of European Catholic missionaries. Follows the radical shift in the relations between these countries as they all sought to respond to the imperial challenges that the West imposed. Explores the central role of Japan and its effort to build an empire in and beyond East Asia from the late 19th century through its defeat in World War II and the lasting historical legacy of that history in the region. Cross-listed with HST 163.

AAS 267 | WORLD ECONOMY: STATES, MARKETS AND LABOR | 4 quarter hours
(Undergraduate)
This course introduces students to competing economic and political frameworks that analyze the interaction of states, markets and societies. The overall theme of the course is the spread of capitalism and the tandem disembedding of economic relations from social relations beginning with the Industrial Revolution in the 18th century through to the early 21st century.

AAS 272 | ANIME AND MANGA | 4 quarter hours
(Undergraduate)
This course examines the development of anime and manga in Japan from their inception to their explosion as international phenomena in recent decades. We consider anime and manga as forms of artistic expression that depend upon and parallel key Japanese visual forms of handscroll painting and woodblock prints. Students learn the ideas, ideals and values in Japanese cinematic and visual expression, and develop skills at analyzing anime and manga as artistic forms. The processes of drawing/creating anime and manga are considered; both form and content of anime and manga are discussed. Cross-listed with HAA 273.

AAS 273 | GLOBAL ASIAN LITERATURE | 4 quarter hours
(Undergraduate)
Introduction to selected authors, genres, and topics in Asian American or Asian diasporic literature from the mid-nineteenth century to the present. Variable emphasis on different groups, genres, or historical periods. WRD 103 or HON 100 is recommended for this course. Cross-listed with ENG 273.

AAS 287 | INTRODUCTION TO ASIAN PHILOSOPHY | 4 quarter hours
(Undergraduate)
What must we do in order to live a good life? In this class, we will examine this question through our study of Asian philosophy. In particular, we will ask -- do we have a duty to serve society? what is the relationship among desire, happiness, knowledge and virtue? what is the relationship among the human, the divine, and the world? While this class will be an introduction, it will not be primarily a survey. Rather we will examine and discuss several texts in depth, representing four of the philosophical traditions in South and East Asia -- Hinduism, Buddhism, Confucianism, and Daoism. The objectives of the course are to gain an understanding of Asian philosophy while exploring some of our own philosophical questions about the purpose and meaning of life.

AAS 305 | RELIGION AND CULTURE IN SOUTH ASIA | 4 quarter hours
(Undergraduate)
This course examines the interplay between religion and society in pre-modern and contemporary South Asia. The course will use such materials as epic texts, poetry, novels, journalism, film, music and art to explore how religion, gender, social class and politics are experienced in the lives of people in India and Pakistan. Cross-listed with REL 305.

AAS 315 | THE STATE & ECONOMIC GROWTH IN EAST ASIA | 4 quarter hours
(Undergraduate)
A survey course focused upon key geographical factors contributing to the emergence of Japan as an international economic leader, and the rapid development of the People's Republic of China, Taiwan, Hong Kong, and South Korea, among others, as global economic players. Cross-listed with GEO 315.

AAS 324 | JAPANESE POPULAR CULTURE | 4 quarter hours
(Undergraduate)
Globally celebrated for its creativity, world-building, and complexity, Japanese pop culture?including anime, manga, J-pop, drama, collectible figurines, cosplay, tv drama, film, and video games?continues to push the boundaries of what it means to be human in the 21st century. Students will strengthen skills to analyze screen arts and other cultural products with specialized attention to how the content is conveyed in historical context. Themes include cyber-physical blending, gender-bending and performance, historical memory, national identity, and what it means to be human.

AAS 325 | QUEER JAPAN | 4 quarter hours
(Undergraduate)
This course surveys representations of same-sex sexuality from the 14th century to the present day in Japan. We will explore the intersection of history, politics, art, and culture through historiography, literature, film, photography, music, cartoons, and animation, examining "traditional" male-male sexuality, the emergence of the modern era of texts reflecting female-female sexuality, as well as the formation of new consciousness and subjectivities throughout the 20th century and into the 21st. Cross-listed with MOL 325.

AAS 337 | ASIAN AMERICAN MEDIA REPRESENTATION | 4 quarter hours
(Undergraduate)
This course examines the ways in which Americans of Asian descent are portrayed in popular media such as television, film, newspapers, and advertisement.
AAS 338 | ASIAN CULTURE AND COMMUNICATION | 4 quarter hours (Undergraduate)
Reviews major Asian philosophical and religious traditions such as Hinduism, Confucianism, Taoism, and Buddhism and examines how these traditions influence and affect Asian cultures and communication behaviors, particularly communication among Indians, Chinese, Japanese, Koreans, and Asian Americans in various contexts. Cross-listed with INTC 338.

AAS 341 | ZEN MIND | 4 quarter hours (Undergraduate)
A study of the thought and practice of Zen Buddhism, focusing on the role of Zen in shaping ideas, ethics and the arts in Japan and America. Cross-listed with REL 342.

AAS 342 | ASIAN POLITICAL ECONOMY | 4 quarter hours (Undergraduate)
This course offers an overview of the geopolitics, culture and history behind the “East Asian Miracle.” It provides students with the tools to analyze the core theories, actors, and current and historical events in the study of the international relations, business, politics, and economy of Asia. Cross-listed with PSC 343.

AAS 343 | JAPANESE AMERICAN HISTORY IN THE US/CHICAGO | 4 quarter hours (Undergraduate)
The second course in a sequence of three content-based courses designed for advanced high learners and native speakers of Japanese to discuss authentic cultural, historical, or literary materials. Topics vary with offering: see current schedule for details. Recommended for students who have completed JPN 201-202-203 and JPN 311-312-313, or have equivalent proficiency in Japanese.

AAS 344 | YOGA AND TANTRA | 4 quarter hours (Undergraduate)
An examination of the history, philosophy and cultural meaning of body-oriented liberative techniques as they developed on the Indian subcontinent and Himalayan region in Hinduism and Buddhism. Students registering for this course are expected to have studied one or both of these traditions in courses such as REL 142, 143, 242, or 243, or in other courses. Background in theory is also useful. Cross-listed with REL 344.

AAS 345 | MORAL PHILOSOPHY, POLITICAL POWER, & RELIGION IN PRE-MODERN CHINA | 4 quarter hours (Undergraduate)
An exploration of the major traditions informing pre-modern Chinese perspectives on morality, politics, social and personal formation, as well as cosmological and religious anchoring. Topics include Confucianism, Mohism, early Daoism, Legalism, correlative cosmology, liturgical Daoism, Buddhism, Neo-Confucianism, and also China's traumatic encounter with western power and thought. The course not only addresses comparative issues concerning Chinese values in relation to western views, but also questions common comparative constructs such as those contrasting religion & power, individualism & communalism, and tradition & modernity. Cross-listed with REL 343.

AAS 350 | ETHNIC MINORITY YOUTH: ADAPTATION, IDENTITY AND DEVELOPMENT | 4 quarter hours (Undergraduate)
Utilizing an ecological systems perspective, this course examines the challenges and resiliencies faced and acquired by ethnic minority youth. This course will closely examine developmental issues during adolescence that are complicated by being an ethnic minority, or child of immigrant parents. Issues examining the intersection of socio-political power dynamics, with acculturation/cultural adaptation, ethnic identity formation, and intergenerational family conflict will particularly be examined.

AAS 351 | JAPANESE POLITICS | 4 quarter hours (Undergraduate)
This course examines the meeting of the ancient and the modern in the context of 21st century politics in Japan. Exploring political, economic, and cultural practices and institutions, this class provides an in-depth understanding of Japan’s political system from its origins in samurai traditions to current challenges facing Japan's democracy and economy. Cross-listed with PSC 350.

AAS 352 | CHINESE POLITICS | 4 quarter hours (Undergraduate)
This course examines the political system of China and the major domestic issues in contemporary Chinese politics. The course explores the rise and early governance of the Chinese Communist Party, the economic and political developments since the start of the reform (post 1978) era, and the main political challenges facing Chinese society today. Cross-listed with PSC 352.

AAS 363 | YELLOW PERIL/YELLOW POWER: ASIAN AMERICANS IN THE MEDIA | 4 quarter hours (Undergraduate)
This seminar course explores the landscape of popular and visual culture in the U.S. along the axes of race, ethnicity, class, gender, and sexuality and cultural "difference." Using an intersectional and interdisciplinary approach, the course also examines Asian Pacific Islander American representation and cultural production. Cross-listed with CMNS 563.

AAS 367 | LITERATURE OF THE VIETNAM WAR | 4 quarter hours (Undergraduate)
This course examines novels, short stories, and essays on the Vietnam war and its aftermath, Vietnamese society, literature of the Vietnam Era.

AAS 373 | KYOTO (WORLD CITIES) | 4 quarter hours (Undergraduate)
Explores the art, architecture, and urban plan of Kyoto, the ancient capital of Japan. Kyoto became the seat of government and the home of the imperial court in 794, and it continued to serve as the cultural and religious center of the land until the nineteenth century. This course considers major artistic developments as they relate to main sites in Kyoto, especially palaces, temples, and shrines. The eras covered extend from the Heian to the Meiji period.
AAS 385 | INTERNATIONAL ADVERTISING | 4 quarter hours
(Undergraduate)
This course informs students about the complexity and nuances of marketing communications in the global marketplace. We will explore the factors affecting the views of funny TV commercials from Japan, emotional short films from Thailand, controversial ads from China, and many more interesting ad campaigns from around the globe. Understand why Asian marketers made the ads the way they are as we talk about the theories behind cultural dimensions. As we progress, we learn not only about advertising but cultures. How do people from other countries behave and why. This course is perfect for someone who wants to understand the nuances of cultural difference and learn about the Asian way to advertise.

AAS 395 | INDEPENDENT STUDY IN GLOBAL ASIAN STUDIES | 4-8 quarter hours
(Undergraduate)
Independent study. Variable credit.

Bilingual-Bicultural Education (BBE)

BBE 96 | 100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED | 0 quarter hours
(Undergraduate)
Required of all Bilingual Bicultural students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses. (0 credit hours)

BBE 97 | 100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED | 0 quarter hours
(Graduate)
Required of all Bilingual Bicultural students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses. (0 credit hours)

BBE 300 | TEACHING ELEMENTARY ENGLISH LANGUAGE LEARNERS:
THEORY, POLICY AND PRACTICE | 4 quarter hours
(Undergraduate)
This introductory course offers candidates a foundation in the critical elements in the education of English Language Learners (ELL) in the Elementary grades: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Emphasis is given to the linguistic process in an individual’s acquisition of two languages and the context in which both languages are developed alongside academic attainment. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students’ backgrounds and experiences. Teaching practices, curriculum development, appropriate instructional materials and assessments are examined. Family/community relations and partnerships, as well engagement of advocacy are also explored. Current federal and state policies related to ELLs are addressed. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

BBE 301 | TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS
AND DIALECT SPEAKERS ACROSS THE CURRICULUM | 4 quarter hours
(Undergraduate)
This course provides educators across disciplines in the middle and high school grades foundational knowledge for teaching and assessing English learners (ELs) and speakers of non-dominant varieties of English. The course focuses on fundamental concepts of second language acquisition in various language learning contexts, teaching and assessing English as a second language, policy and law relating to ELs’ education, and the importance of maintaining ELs? home language(s) and culture(s). The course analyzes factors that influence the acquisition of first and second languages, including linguistic, cognitive, political, social, cultural and affective dimensions. Interdisciplinary perspectives of second language development in classroom practice is also addressed.

TCH 302 or SEC 364 is a prerequisite for this class.

BBE 302 | BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT | 4 quarter hours
(Undergraduate)
Reviews theory and application of curriculum development to bilingual instructional programs, such as design, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal bilingual education program models are examined and analyzed. Includes a review of multiethnic literature and literacy that advocates for students' self-concept, acceptance, and sense of identity (includes 15 clinical hour requirement).

BBE 304 | LANGUAGE, LITERACY AND CULTURE | 4 quarter hours
(Undergraduate)
This course examines the linguistic, cultural, and social contexts in which culturally and linguistically diverse communities operate and their relation to educational practices. The class addresses sociolinguistic and multicultural perspectives on language and cultural diversity within and outside the U.S. Case studies examined in class readings provide the conceptual framework for multicultural education in the context of language and literacy development. This course is designed to assist future and current teachers in attaining an expanded understanding on the linguistic, cultural, and sociocultural theoretical frameworks that are at the core of educational transformation and social justice in the US. The course also aims to examine educators’ roles in creating culturally and linguistically responsive curricula for diverse students. Topics include language and ethnicity, language and identity, language and social class, literacy practices, language standardization, language discrimination, dialects, language loss, and heritage languages. Includes clinical hour requirement.

BBE 305 | THEORETICAL FOUNDATIONS IN BILINGUAL EARLY CHILDHOOD DEVELOPMENT | 4 quarter hours
(Undergraduate)
This course is designed to equip bilingual childhood teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, socio-political and legal foundations of bilingual education programs in the United States. It will examine different models of language education programs: immersion, ESL pullout, transitional bilingual education, maintenance bilingual, enrichment or dual language. It will also address psycholinguistic and sociolinguistic principles upon which they are based.
BBE 306 | FOUNDATIONS OF ENGLISH AS SECOND LANGUAGE INSTRUCTION IN EARLY CHILDHOOD EDUCATION | 4 quarter hours
(Undergraduate)
Candidates explore English as a Second Language (ESL) theory and practice as it applies to young children and their families. Candidates also study the sociocultural, pedagogical, linguistic, and political issues underlying current models of education for non-English speaking children, as well as models for ESL instruction in early childhood settings. Critical emphasis is placed upon theories that support young learners in second language acquisition.

BBE 307 | EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS | 4 quarter hours
(Undergraduate)
Examines assessment procedures, including standardized and performance-based, as well as ethical standards and practices used in the assessment of culturally and linguistically diverse students. Equity and legal issues related to assessment practices, research, first and second language acquisition, bilingualism, cultural and sociopolitical issues related to assessment are discussed. Emphasizes existing biases in assessment and non-discriminatory assessment practices and policies. National, state, and local assessment policies are examined. Includes clinical hour requirement.

BBE 310 | SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE | 4 quarter hours
(Undergraduate)
This course is designed to explore a specific area of study in the field of linguistics, such as sociolinguistics, psycholinguistics, applied linguistics, language planning and policy, and cognitive bilingualism, among other related topics. The particular focus of study will vary and change as the course is offered. Includes clinical hour requirement.

BBE 311 | FUNDAMENTALS OF ENGLISH LANGUAGE LEARNER EDUCATION | 4 quarter hours
(Undergraduate)
This introductory course offers candidates a foundation in the critical elements in the education of ELLs: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Teaching practices, curriculum development, selection of instructional materials, use of appropriate language and content assessments are examined. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

BBE 316 | SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION | 4 quarter hours
(Undergraduate)
Presents theoretical constructs of bilingual schooling from early childhood through adult in the U.S. and other multilingual societies from historical, theoretical and sociocultural perspectives. Emphasizes issues in bilingual education related to the sociocultural and legal aspects of language policy and bilingual education in the U.S. The historical trajectory of language policy and bilingual education in the U.S. is discussed in reference to Native American languages and early European settlers’ language schooling practices. The focus shifts to 20th and 21st century bilingual education and immigration policies that have influenced both the advocacy for and opposition to bilingual education as well as the movement to make English the official language in the U.S.

BBE 320 | ANALYZING RESEARCH ON IDENTITY, CULTURE & LANGUAGE EDUCATION | 4 quarter hours
(Undergraduate)
Introduces students to, and engages them in reading, research design within the context of bilingual-bicultural education and second language learning and instruction. Students will consider important linguistic and sociocultural issues in language education as examined with various research methods, including quantitative, qualitative, and mixed methods. Students will conduct and present a mini-action research project about their own learning and development, and will write a cogent review of literature about a personally meaningful topic, problem, or issue related to language and culture education. (Includes 15 clinical hour requirement.)

BBE 310 and at least 4 BBE courses (or equivalent) is a prerequisite for this class.

BBE 324 | METHODS OF TEACHING ENGLISH AS A SECOND LANGUAGE | 4 quarter hours
(Undergraduate)
This course introduces instructional methods, approaches, strategies and materials for teaching English language learners. Particular importance is placed on the relationship of reading and writing development to second language acquisition, teaching language and content, and fostering cognitive development through the four domains of reading, writing, speaking and listening. Includes clinical hour requirement.

BBE 325 | BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL | 4 quarter hours
(Undergraduate)
Analyzes and evaluates methods and materials used in bilingual education and ESL programs. Stresses effective instructional strategies and best practices in first and second language literacy development and content learning. Reviews language teaching approaches and cooperative models of learning relating to development of reading and writing in the first and second language. Presents the acquiring language through content learning versus learning language programs. Investigates appropriate first language usage in bilingual classrooms, focusing on the different content areas, appropriate terminology for native language instruction, and the study of language distribution issues (includes 1.5 clinical hour requirement).

BBE 326 | THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE | 4 quarter hours
(Undergraduate)
This course introduces key foundational theories of English as a second language and world language education that form the basis of our development as language education practitioners and professionals. The course explores theories of language, theories of learning and learners from early childhood to adult, and theory-driven teaching, as well as the philosophical paradigms that inform them. Foundational theories are introduced as problem-solving tools that provide interdisciplinary perspectives of English as a second language and world language education, and as frameworks for critically reading literature on language education theory, research, and methods.
BBE 330 | LATINOS AND EDUCATION | 4 quarter hours
(Undergraduate)
This course examines historical and current issues related to the education of Latinos in the US that includes PK-12 and higher education. The course explores the sociolinguistic, theoretical, historical, sociocultural, legal, and political contexts that shape the educational experience of Latinos in the US. Demographic trends and data are examined in light of the various characteristics that make up the diverse Latino population. The course also analyses the theoretical, historical, and political constructs of bilingual schooling and the underlying assumptions and implications for Latino students. Current research conducted by prominent scholars in the field are presented and examined. The course considers factors that influence, positively or negatively, the educational attainment of Latino students. The readings and class discussions emphasize how power relations in the wider society influence patterns in Latino education outcomes and policy-making. The course also examines assumptions, arguments, and interpretations of current and past legislation in regards to the education of Latinos in the US.

BBE 350 | ENGLISH LANGUAGE LEARNERS IN THE MIDDLE GRADES | 4 quarter hours
(Undergraduate)
Presents an introduction to the field of English as a second language, with attention to fundamental concepts of second language acquisition in various language learning contexts. The course analyzes possible factors that influence the acquisition of the first and second language, including linguistic, cognitive, social, and affective dimensions. Emphasis is given not only to the linguistic process in individuals? acquisition of two languages, but also the social, cultural, political, and educational context in which both languages are developed alongside academic attainment. Discusses interdisciplinary perspectives of second language acquisition and their application to classroom practices. This introductory course is designed for mainstream educators and covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs. ***This course counts toward ESL endorsement. Co-requisites for this course are MGE 301 and MGE 311. In this course, students will: 1. MGE 300 and Junior standing are prerequisites for this class.

BBE 355 | HOW ENGLISH WORKS: ENGLISH SYNTAX FOR ESL AND BILINGUAL EDUCATION TEACHERS | 4 quarter hours
(Undergraduate)
This course examines the structure of English from a descriptive linguistic framework. It addresses the inner workings of the English language through objective investigation of the lexical, phrasal, and clausal structures of the language to provide ESL and bilingual education teachers the syntactic foundation of the language they will teach. Topics include parts of speech, constituency, phrase structure, clause types, complements versus adjuncts, question formation, tense, negation, and the grammar of dialects. Additionally, this course will provide special emphasis on how these areas of English grammar interface with Common Core and WIDA standards for ELLs.

BBE 360 | SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION | 4 quarter hours
(Undergraduate)
This course is an introduction to the theoretical study of second, world and heritage language acquisition (SLA) from a generative and psycholinguistic perspective. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and second language acquisition; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second, world and heritage language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences. Includes clinical hour requirement.

BBE 366 | FIRST AND SECOND LANGUAGE ACQUISITION | 4 quarter hours
(Undergraduate)
This course examines principles, processes, theories, and research in first and second language acquisition and bilingualism with implications for language teaching. The course provides an introduction to the fields of first and second language acquisition (SLA) that include universal, individual, and social features and dimensions of the second language learning process that determine the nature and path of acquisition. These features include age and critical periods; cross-linguistic influences; role of the environment; cognitive contributions; interlanguage variability; linguistic features; motivation; and affect. Socio-cultural and sociopolitical aspects of second language acquisition and bilingualism are also discussed. Includes clinical hour requirement.

BBE 370 | LANGUAGE, LITERACIES AND CULTURES | 4 quarter hours
(Undergraduate)
This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world through reading and writing the word. Especial focus is placed on these topics as they pertain to the extent research on language, literacy, and culture represented in language communities, as well as in the literature, art, music, and popular culture of those communities as a means of advocating for students’ sense of identity as global citizens. Includes clinical hour requirement.
BBE 400 | TEACHING ELEMENTARY ENGLISH LANGUAGE LEARNERS: THEORY, POLICY AND PRACTICE | 4 quarter hours (Graduate)
This introductory course offers candidates a foundation in the critical elements in the education of English Language Learners (ELL) in the Elementary grades: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Emphasis is given to the linguistic process in an individual’s acquisition of two languages and the context in which both languages are developed alongside academic attainment. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students’ backgrounds and experiences. Teaching practices, curriculum development, appropriate instructional materials and assessments are examined. Family/community relations and partnerships, as well as advocacy, are also explored. Current federal and state policies related to ELLs are discussed. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

BBE 402 | DESIGNING LANGUAGE PROGRAMS | 4 quarter hours (Graduate)
Reviews theory and application of curriculum development to bilingual instructional programs, such as design, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal bilingual education program models are examined and analyzed. Includes a review of multiethnic literature and literacy that advocates for students’ self-concept, acceptance, and sense of identity. Includes clinical hour requirement.

BBE 404 | LANGUAGE, LITERACY AND CULTURE | 4 quarter hours (Graduate)
This course examines the linguistic, cultural, and social contexts in which culturally and linguistically diverse communities operate and their relation to educational practices. The class addresses sociolinguistic and multicultural perspectives on language and cultural diversity within and outside the U.S. Case studies examined in class readings provide the conceptual framework for multicultural education in the context of language and literacy development. This course is designed to assist future and current teachers in attaining an expanded understanding on the linguistic, cultural, and sociocultural theoretical frameworks that are at the core of educational transformation and social justice in the US. The course also aims to examine educators’ roles in creating culturally and linguistically responsive curricula for diverse students. Topics include language and ethnicity, language and identity, language and social class, literacy practices, language standardization, language discrimination, dialects, language loss, and heritage languages. Includes clinical hour requirement.

BBE 406 | SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION | 4 quarter hours (Graduate)
Presents theoretical constructs of bilingual schooling from early childhood through adult in the U.S. and other multilingual societies from historical, theoretical and sociocultural perspectives. Emphasizes issues in bilingual education related to the sociocultural and legal aspects of language policy and bilingual education in the U.S. The historical trajectory of language policy and bilingual education in the U.S. is discussed in reference to Native American languages and early European settlers’ language schooling practices. The focus shifts to 20th and 21st century bilingual education and immigration policies that have influenced both the advocacy for and opposition to bilingual education as well as the movement to make English the official language in the U.S.

BBE 407 | EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS | 4 quarter hours (Graduate)
Examines assessment procedures, including standardized and performance-based, as well as ethical standards and practices used in the assessment of culturally and linguistically diverse students. Equity and legal issues related to assessment practices, research, first and second language acquisition, bilingualism, and cultural and sociopolitical issues related to assessment are discussed. Emphasizes existing biases in assessment and non-discriminatory assessment practices and policies. National, state, and local assessment policies are examined. Includes clinical hour requirement.

BBE 408 | BILINGUAL EARLY CHILDHOOD DEVELOPMENT THEORETICAL FOUNDATIONS | 4 quarter hours (Graduate)
This course is designed to equip bilingual and second language teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, political and legal foundations of bilingual education programs in the United States. It will examine different models of bilingual programs and the psycholinguistic and sociolinguistic principles upon which they are based.

BBE 409 | ENGLISH AS A SECOND LANGUAGE INSTRUCTIONAL FOUNDATIONS IN EARLY CHILDHOOD SETTINGS | 4 quarter hours (Graduate)
Candidates explore English as a Second Language (ESL), theory, and practice as it applies to young children and their families. Candidates also study the socio-cultural, pedagogical, linguistic, and political issues underlying current models of education for non-English speaking children, as well as models for ESL instruction in early childhood settings. Critical emphasis is placed upon theories that support young learners in second language acquisition.
BBE 411 | FUNDAMENTALS OF ENGLISH LANGUAGE LEARNER EDUCATION | 4 quarter hours (Graduate)

This introductory course offers candidates a foundation in the critical elements in the education of English Language Learners (ELL): second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Emphasis is given to the linguistic process in an individual's acquisition of two languages and the context in which both languages are developed alongside academic attainment. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students' backgrounds and experiences. Teaching practices, curriculum development, selection of instructional materials, use of appropriate language and content assessments are examined. Family/community relations and partnerships, as well engagement of advocacy are also explored. Current federal and state policies related to ELLs are also addressed. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

Status as a Graduate Education student is a prerequisite for this class.

BBE 425 | BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL | 4 quarter hours (Graduate)

Analyzes and evaluates methods and materials used in bilingual education and ESL programs. stresses effective instructional strategies and best practices in first and second language literacy development and content learning. Reviews language teaching approaches and cooperative models of learning relating to development of reading and writing in the first and second language. Presents the acquiring language through content learning versus learning language programs. Investigates appropriate first language usage in bilingual classrooms, focusing on the different content areas, appropriate terminology for native language instruction, and the study of language distribution issues. Includes clinical hour requirement.

BBE 450 | ENGLISH LANGUAGE LEARNERS IN THE MIDDLE GRADES | 4 quarter hours (Graduate)

Presents an introduction to the field of English as a second language, with attention to fundamental concepts of second language acquisition in various language learning contexts. The course analyzes possible factors that influence the acquisition of the first and second language, including linguistic, cognitive, social, and affective dimensions. Emphasis is given not only to the linguistic process, but also to cultural, political, and educational context in which both languages are developed alongside academic attainment. Discusses interdisciplinary perspectives of second language acquisition and their application to classroom practices. This introductory course is designed for mainstream educators and covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs. **This course counts toward ESL endorsement.** Co-requisites for this course are MGE 401 and MGE 411. In this course, students will: 1.

MGE 400 is a prerequisite for this class.

BBE 451 | TEACHING DUAL LANGUAGE LEARNERS IN EARLY CHILDHOOD: THEORY, POLICY AND PRACTICE | 4 quarter hours (Graduate)

This introductory course is designed for early childhood educators and leaders, and covers the academic, linguistic, and socio-emotional needs of young dual language learners (English Learners). This course builds the foundation for the effective learning and teaching of dual language learners (DLLs) in the early childhood context. The course covers: second language acquisition, culture and diversity, policies and law, family involvement, state required second language development standards, advocacy, and assessment. The course analyzes possible factors that influence the acquisition of the first and second language, including linguistic, cognitive, social, and affective dimensions. The consequences of additive and subtractive bilingualism for dual language learners?

cognitive development, academic progress, linguistic processing, and metalinguistic abilities are addressed. Cross-cultural aspects are addressed in the contexts of integrating and celebrating their cultural diversity in school/center contexts. Family/community relations and partnerships, as well engagement of advocacy are also explored. Current federal and state policies related to ELLs are addressed.

BBE 466 | FIRST AND SECOND LANGUAGE ACQUISITION | 4 quarter hours (Graduate)

This course examines principles, processes, theories, and research in first and second language acquisition and bilingualism with implications for language teaching. The course provides an introduction to the fields of first and second language acquisition (SLA) that include universal, individual, and social features and dimensions of the second language learning process that determine the nature and path of acquisition. These features include age and critical periods; cross-linguistic influences; role of the environment; cognitive contributions; interlanguage variability; linguistic features; motivation; and affect. Sociocultural and sociopolitical aspects of second language acquisition and bilingualism are also discussed. Includes clinical hour requirement.

BBE 474 | READING AND ELLS | 4 quarter hours (Graduate)

This course examines current theories of second language acquisition, literacy teaching and learning for English language learners (ELLs), and explores the relationships between the first and second language as it relates to the approach to teaching for transfer with ELLs. This course links theory and practice by examining pedagogical approaches that most effectively promote ELLs reading and writing development. Multicultural and multilingual characteristics of ELLs are also discussed as they relate to their literacy development. Other factors that impact the academic achievement of ELLs in relation to literacy include sociocultural, sociolinguistic, and sociopolitical dimensions of teaching ELLs. This course is designed to assist teachers with a specialization in reading to develop expanded understandings of theoretical and pedagogical perspectives related to the literacy and language processes of students learning English as a new language. In addition, literacy assessment in the first and second language represented by standardized testing as well as authentic performance-based evaluations are also presented.
BBE 476 | BILITERACY PRACTICES: SECONDARY/ADULT | 4 quarter hours (Graduate)
Analyzes and evaluates current research and pedagogical approaches used in second language programs in relation to literacy instruction in the secondary and adult classroom settings. The course focuses on effective instructional strategies and best practices in first and second language literacy development. Special attention is given to content area learning in relation to acquiring literacy skills in a second language for secondary students. The course reviews language and literacy instructional approaches and cooperative models of learning related to the development of reading and writing in the first and second language. Discussions center on issues of acquiring language and literacy skills through content instruction as well as authentic and performance-based assessment. Investigates appropriate first and second language development in bilingual, ESL and foreign language classrooms, focusing on the different aspects of literacy and subject matter learning (includes 15 clinical hour requirement).

BBE 490 | MULTICULTURAL AND MULTILINGUAL CHILDREN’S LITERATURE | 4 quarter hours (Graduate)
This course will use multicultural and multilingual children’s books to survey pluralism and linguistic diversity. Students will analyze folk and modern literature, including application of literacy and culturally responsive criteria to these selections. Students will explore means of teaching using multicultural literature to encourage diverse learners and learning styles. Students will evaluate literature for its literary value as well as cultural acceptability. Students will read a broad variety of current multicultural literature for children and young adults. Students interested in specializing in one specific age group or grade level may focus their literature selections on literature appropriate for specific ages. Genres of children’s and young adult literature will be examined and criteria for selection and renewing collections for school and public libraries will be discussed. Notable authors, poets, and illustrators of children’s and young adult literature will be studied with an emphasis on those who contribute to bilingual, multilingual, and multicultural, and multiethnic collections. The use of children’s and young adult literature to develop literacy, particularly for ELLs will be studied and the use of children’s and young adult literature in meeting national, state, and district standards will be discussed. Children’s and young adult literature will be examined from diverse perspectives in particular literature reflecting African American, Asian, Latino, and Native American cultures. However, students will read literature from all cultural groups including traditional children’s and young adult literature.

BBE 501 | TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM | 4 quarter hours (Graduate)
This course provides educators across disciplines in the middle and high school grades foundational knowledge for teaching and assessing English learners (ELs) and speakers of non-dominant varieties of English. The course focuses on fundamental concepts of second language acquisition in various language learning contexts, teaching and assessing English as a second language, policy and law relating to ELs’ education, and the importance of maintaining ELs’ home language(s) and culture(s). The course analyzes factors that influence the acquisition of first and second languages, including linguistic, cognitive, political, social, cultural and affective dimensions. Interdisciplinary perspectives of second language development in classroom practice is also addressed. TCH 402 or T&L 425 is a prerequisite for this class.

BBE 510 | SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE | 4 quarter hours (Graduate)
This course is designed to explore a specific area of study in the field of linguistics, such as sociolinguistics, psycholinguistics, applied linguistics, language planning and policy, and cognitive bilingualism, among other related topics. The particular focus of study will vary and change as the course is offered. Includes clinical hour requirement.

BBE 520 | ANALYZING RESEARCH ON IDENTITY, CULTURE & LANGUAGE EDUCATION | 4 quarter hours (Graduate)
Introduces students to, and engages them in reading, research designed within the context of bilingual-bicultural education and second language learning and instruction. Students will consider important linguistic and sociocultural issues in language education as examined with various research methods, including quantitative, qualitative, and mixed methods. Students will conduct and present a mini-action research project about their own learning and development, and will write a cogent review of literature about a personally meaningful topic, problem, or issue related to language and culture education. For many students, this paper forms the beginning stages of their BBE Masters thesis or M.Ed. paper. (Includes 15 clinical hour requirement.)

SCG 410 or SCG 610 and at least 5 BBE courses (or equivalent) is a prerequisite for this class.

BBE 524 | METHODS OF TEACHING ENGLISH AS A SECOND LANGUAGE | 4 quarter hours (Graduate)
This course introduces instructional methods, approaches, strategies and materials for teaching English language learners. Particular importance is placed on the relationship of reading and writing development to second language acquisition, teaching language and content, and fostering cognitive development through the four domains of reading, writing, speaking and listening. Includes clinical hour requirement.

BBE 526 | THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE | 4 quarter hours (Graduate)
This course introduces key foundational theories of English as a second language and world language education that form the basis of our development as language education practitioners and professionals. The course explores theories of language, theories of learning and learners from early childhood to adult, and theory-driven teaching, as well as the philosophical paradigms that inform them. Foundational theories are introduced as problem-solving tools that provide interdisciplinary perspectives of English as a second language and world language education, and as frameworks for critically reading literature on language education theory, research, and methods.
BBE 530 | LATINOS AND EDUCATION | 4 quarter hours (Graduate)
This course examines historical and current issues related to the education of Latinos in the US that includes PK-12 and higher education. The course explores the sociolinguistic, theoretical, historical, sociocultural, legal, and political contexts that shape the educational experience of Latinos in the US. Demographic trends and data are examined in light of the various characteristics that make up the diverse Latino population. The course also analyzes the theoretical, historical, and political constructs of bilingual schooling and the underlying assumptions and implications for Latino students. Current research conducted by prominent scholars in the field is presented and examined. The course considers factors that influence, positively or negatively, the educational attainment of Latino students. The readings and class discussions emphasize how power relations in the wider society influence patterns in Latino education outcomes and policy-making. The course also examines arguments, assumptions, and interpretations of current and past legislation in regards to the education of Latinos in the US.

BBE 554 | METHODS OF TEACHING ESL: ELEMENTARY | 4 quarter hours (Graduate)
The course provides an in-depth study of instructional approaches and curricular designs for the second language elementary classroom setting. Presents reviews and critiques specific methods and strategies for teaching second language learners, as well as comparative methods of learning the first and second language. Emphasizes methods for implementing constructivist strategies such as cooperative learning, thematic approach, flexible grouping, and sheltered instruction. The course provides guidelines for planning effective lessons using both thematic units and content-based subject matter. A critical focus of this course is on teaching and learning ESL through the content areas for elementary students (includes 15 clinical hour requirement).

BBE 555 | HOW ENGLISH WORKS: ENGLISH SYNTAX FOR ESL AND BILINGUAL EDUCATION TEACHERS | 4 quarter hours (Graduate)
This course examines the structure of English from a descriptive linguistic framework. It addresses the inner workings of the English language through objective investigation of the lexical, phrasal, and clausal structures of the language to provide ESL and bilingual education teachers the syntactic foundation of the language they will teach. Topics include parts of speech, constituency, phrase structure, clause types, complements versus adjuncts, question formation, tense, negation, and the grammar of dialects. Additionally, this course will provide special emphasis on how these areas of English grammar interface with Common Core and WIDA standards for ELLs.

BBE 556 | METHODS OF TEACHING ESL: SECONDARY/ADULT | 4 quarter hours (Graduate)
The course explores the theoretical underpinnings and the applications of second-language theories and cultural knowledge to ESL teaching methodology and curriculum design in secondary and adult classroom settings. In addition, various approaches to second language teaching and learning as well as methods for modifying lessons to suit the needs of second-language learners to enhance their acquisition and use of English are presented. Concentrates on assisting educators in the development of appropriate strategies for teaching speaking, listening, reading, writing, and grammar in ESL environments. A major focus of this course is on teaching and learning ESL within the content areas through effective lesson planning using both thematic units and content-based subject matter. The course explores constructivist approaches such as sheltered language instruction (includes 15 clinical hour requirement).

BBE 560 | SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION | 4 quarter hours (Graduate)
This course is an introduction to the theoretical study of second, world, and heritage language acquisition (SLA) from a generative and psycholinguistic perspective. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and second language acquisition; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second, world and heritage language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences. Includes clinical hour requirement.

BBE 570 | LANGUAGE, LITERACIES AND CULTURES | 4 quarter hours (Graduate)
This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world through reading and writing the world. Special focus is placed on these topics as they pertain to the extent research on language, literacy, and culture represented in language communities, as well as in the literature, arts, music, and popular culture of those communities as a means of advocating for students’ sense of identity as global citizens. Includes clinical hour requirement.

BBE 588 | INDEPENDENT STUDY IN BILINGUAL BICULTURAL EDUCATION | 1-4 quarter hours (Graduate)
Permission required. (1 credit hour)

BBE 589 | THESIS RESEARCH IN BILINGUAL-BICULTURAL EDUCATION | 4 quarter hours (Graduate)
A student writing a thesis registers for this course for four quarter hours of credit. When the thesis research and writing of the thesis are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.
BBE 599 | LEADERSHIP IN EDUCATING LINGUISTICALLY DIVERSE LEARNERS | 4 quarter hours (Graduate)
The course is designed for educators who currently are or will be serving in a leadership capacity involving linguistically and culturally diverse learners. The purpose of this course is to develop foundational knowledge of the theories, research, policies, and practices related to the education of English language learners. The aim is to support current and future education leaders in constructing a well-informed basis of the critical elements of ELL education that include: second language acquisition, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course examines various pedagogical and assessment constructs related to teaching ELLs, including state mandated standards and assessments such as ACCESS and WIDA standards.

BBE 600 | REGISTERED STUDENT IN GOOD STANDING | 0 quarter hours (Graduate)
Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)
Status as a Graduate Education student is a prerequisite for this class.

BBE 608 | CAPSTONE IN BILINGUAL-BICULTURAL EDUCATION | 0 quarter hours (Graduate)
Culminating experience(s) that help(s) students acquire the qualities of professionalism and leadership needed to play a significant role in one's professional education community. Students are expected to situate and understand educational issues in a larger context; keep current in and be able to organize and present a body of research on an education-related question; connect research with practical, professional activity; demonstrate mastery of a sub-field of a discipline; write in a format that meets accepted scholarly criteria and participate in an ongoing professional conversation. A final product such as master's paper(s), comprehensive exam, or collection of professional work products is required. (0 credit hours)

BBE 625 | CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING) | 0 quarter hours (Graduate)
Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms. (0 credit hours)
Status as a Graduate Education student is a prerequisite for this class.

BBE 699 | LEADERSHIP IN EDUCATING CULTURALLY DIVERSE LEARNERS | 4 quarter hours (Graduate)
The course is designed for educators who currently are or will be serving in a leadership capacity involving linguistically and culturally diverse learners. The purpose of this course is to develop foundational knowledge of the theories, research, policies, and practices related to the education of English language learners. The aim is to support current and future education leaders in constructing a well-informed basis of the critical elements of ELL education that include: second language acquisition, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course examines various pedagogical and assessment constructs related to teaching ELLs, including state mandated standards and assessments such as ACCESS and WIDA standards.
Status as an EDD student with a Global Catholic Educational Leadership concentration is a prerequisite for this class.

Biological Sciences (BIO)

BIO 104 | EVOLUTION AND SOCIETY | 4 quarter hours (Undergraduate)
In this course you will learn to identify questions that can or cannot be answered by science, the assumptions made by science, how evidence is connected to predictions, and evaluate the role of communication and peer-review to promote scientific progress. It also includes current and foundational issues in evolution starting with Darwin's voyage of the Beagle, the Darwinian Natural Selection Theory, and the impact of evolution on disease and society.

BIO 105 | THE SCIENCE BEHIND HUMAN HEALTH | 4 quarter hours (Undergraduate)
In this course, students will study the causes of health problems and how they are treated in order to develop their understanding of the nature and process of science. Students will learn how to recognize common problems with scientific studies and how to distinguish good science from pseudoscience. Genetics and nutrition will be key topics; hormonal disorders and infectious diseases will also be touched upon. By the end of the course, students will be better equipped to assess the quality of health science and other scientific information that they will encounter in the future.

BIO 110 | EVOLUTION IN HEALTH AND MEDICINE | 4 quarter hours (Undergraduate)
This course examines how scientists are increasingly incorporating evolutionary thinking and research methods in medicine and health sciences. Throughout the course, emphasis will be placed on how the scientific method works and how scientists go about answering pressing questions related to human health. By the end of the course, students should have a greater appreciation of the value of science and how our place in the natural world relates to the health challenges that we face.

BIO 115 | INTRODUCTION TO BIOLOGY | 4 quarter hours (Undergraduate)
Deals with the scientific method, biological chemistry, structure, function, and heredity of cells and organisms, evolution and ecology. Cannot receive credit for both BIO 115 and BIO 155, No credit for Biology majors or minors.
BIO 118 | MARINE BIOLOGY | 4 quarter hours
(Undergraduate)
Study of marine diversity, marine ecosystems, and connections between oceans and humans. Student cannot receive credit for both BIO 118 and 160. No credit for Biology majors or minors.
LSP 120 is a prerequisite for this class.

BIO 120 | THE SCIENCE AND ART OF VISION | 4 quarter hours
(Undergraduate)
This Science as a Way of Knowing course will survey how our understanding of visual system function and our perception of the visual arts has developed through scientific inquiry. We will examine hypotheses about the evolution of human vision and the nature of visual anomalies, and will discuss creative efforts to evaluate these hypotheses. We will review questions that remain unresolved, and identify related technical and/or ethical constraints. Basic knowledge of visual processing will be applied to explore how artists employ techniques that interface with the visual system to create specific impressions.

BIO 121 | INFECTIOUS DISEASES AND IMMUNITY | 4 quarter hours
(Undergraduate)
This course is designed to introduce students to the world of microorganisms, especially those which cause infectious diseases and to explain how the immune system protects the body against these organisms. Cannot receive credit for both BIO 121 and BIO 161. No credit for Biology majors or minors.

BIO 122 | INTRODUCTION TO PALEOBIOLOGY | 4 quarter hours
(Undergraduate)
This course focuses on the concepts and practices of paleobiology, the scientific study of the biology of extinct organisms preserved as fossils. No credit for Biology majors or minors.

BIO 126 | BRAIN AND BEHAVIOR | 4 quarter hours
(Undergraduate)
Examines basic concepts in neurobiology. Specifically how the brain is organized, how it sends messages throughout the body, and how these messages turn into daily activities such as seeing, eating, and walking. How these behaviors are altered due to disease or injury of the brain is also discussed. Cannot receive credit for both BIO 126 and BIO 162. Formerly BIO 206. No credit for Biology majors or minors.

BIO 128 | STRESS, HORMONES AND THE NERVOUS SYSTEM | 4 quarter hours
(Undergraduate)
A study and discussion of the basic concepts of stress and stressors, and their effects on the functioning of the Nervous System, the Endocrine System and the Immune System; the feedback influence of hormones and neurochemicals on cerebral processing, and the relation of these phenomena to health and behavioral medicine. Formerly BIO 208. No credit for Biology majors or minors or Neuroscience majors.

BIO 134 | HOW THE HUMAN BODY WORKS | 4 quarter hours
(Undergraduate)
Fundamentals of human body functions through an examination of organs and organ systems. The quantitative component of this course will explore the concepts of scientific discovery through structured out-of-class projects. Cannot receive credit for both BIO 202 and BIO 134. Formerly BIO 224. No credit for Biology majors or minors.

BIO 155 | INTRODUCTION TO BIOLOGY WITH LABORATORY | 4 quarter hours
(Undergraduate)
This lecture-laboratory course deals with the scientific method, biological chemistry, structure and function of cells, organs, and organ systems, heredity, evolution and ecology. Course includes a laboratory experience involving biological concepts discussed in class. Cannot receive credit for both BIO 115 and BIO 155. No credit for Biology majors or minors.

BIO 156 | FOOD, FUEL FOR LIFE | 4 quarter hours
(Undergraduate)
Food from a biological perspective: defined at the chemical and biochemical level and as it fuels life through metabolism and nutrition. Other topics include improving foods by traditional breeding and new genetic engineering technology, food production, sustainable agriculture; food safety issues, and feeding world populations. No credit for Biology majors or minors.

BIO 160 | MARINE BIOLOGY WITH LAB | 4 quarter hours
(Undergraduate)
Study of marine diversity; marine ecosystems; and connections between oceans, the atmosphere, and humans. Lecture-Laboratory. Cannot receive credit for both BIO 118 and BIO 160. No credit for Biology majors or minors.
LSP 120 is a prerequisite for this class.

BIO 161 | INFECTIOUS DISEASES AND IMMUNITY WITH LABORATORY | 4 quarter hours
(Undergraduate)
This course includes a laboratory experience to reinforce concepts and introduce students to practical aspects of disease causing microorganisms. Cannot receive credit for both BIO 121 and BIO 161. No credit for Biology majors or minors.

BIO 162 | THE BRAIN: BIOLOGY AND BEHAVIOR | 4 quarter hours
(Undergraduate)
Explores basic concepts in neurobiology, including the organization and evolution of the vertebrate system, how the nervous system sends messages through the body and how these messages are translated into the variety of human behaviors. Alterations in behavior due to brain disease or injury is also discussed. The laboratory elaborates on lecture material and provides insight into how scientific reasoning and testing can help to discover how the brain works. Cannot receive credit for both BIO 126 and BIO 162. Formerly BIO 239. No credit for Biology majors or minors or Neuroscience majors.

BIO 166 | INTRODUCTION TO PLANT BIOLOGY WITH LAB | 4 quarter hours
(Undergraduate)
This course deals with the characteristic features of higher plants, plant products that are beneficial to humans, structure, physiology and ecology of cultivated plants, and modern horticultural and genetic approaches to the improvement of plants and plant productivity. No credit for Biology majors or minors.
BIO 183 | NATURAL HISTORY OF THE GALAPAGOS | 4 quarter hours  
(Undergraduate)  
This course is designed to present students with the diversity and unique life forms that exist on the Galapagos Islands and the nearby coastal region of Ecuador. The organisms of the Galapagos Islands are isolated from the mainland of South America, resulting in a large number of animal and plant species found only on these islands. This course will cover the ecosystems, geology, and plant/animal adaptations of these islands, and on the way in which these unique adaptations relate to the ecological pressures found on the islands and the surrounding marine environment. Comparisons between mainland and island populations will be discussed to help demonstrate the way in which new ecological pressures on isolated ancestral populations can give rise to evolution.

BIO 191 | GENERAL BIOLOGY I FOR SCIENCE MAJORS | 4 quarter hours  
(Undergraduate)  
Focuses on the unity of life: its biochemical and cellular makeup and functions, the acquisition and utilization of energy, and the storage and utilization of genetic information. Lecture-laboratory. MAT 130 is a prerequisite for this class.

BIO 192 | GENERAL BIOLOGY II FOR SCIENCE MAJORS | 4 quarter hours  
(Undergraduate)  
Introduction to evolution, ecology, organismal development and diversity. Lecture-laboratory. A grade of C- or higher in BIO 191 is a prerequisite for this class.

BIO 193 | GENERAL BIOLOGY III FOR SCIENCE MAJORS | 4 quarter hours  
(Undergraduate)  
Deals primarily with diversity and development within the plant and animal kingdoms including basic principles of physiology. Lecture-laboratory. A grade of C- or higher in BIO 192 is a prerequisite for this class.

BIO 200 | HUMAN ANATOMY | 4 quarter hours  
(Undergraduate)  
Structure of the human body with an emphasis on gross anatomy. Lecture-laboratory. Lecture covers human anatomy; laboratory emphasis on feline dissection. At least Sophomore Standing is a prerequisite for this course.

BIO 201 | HUMAN PHYSIOLOGY | 4 quarter hours  
(Undergraduate)  
Introduction to concepts and mechanisms of human organ system function including respiratory, cardiovascular, renal, muscular, nervous, endocrine and digestive systems. Lecture-laboratory. Primarily for Health Science majors. No credit for Biology majors or minors. Cannot receive credit for both BIO 200 and BIO 134. At least Sophomore Standing is a prerequisite for this course.

BIO 202 | BIOSTATISTICS | 4 quarter hours  
(Undergraduate)  
A survey of a variety of statistical methods used to analyze biological data. BIO 193 or instructor consent is a prerequisite for this class.

BIO 209 | PLANT BIOLOGY | 4 quarter hours  
(Undergraduate)  
A study of plant evolution, diversity, reproduction, developmental plant anatomy, regulation of plant growth and development, and plant physiology. BIO 193 is a prerequisite for this class.

BIO 210 | MICROBIOLOGY | 4 quarter hours  
(Undergraduate)  
Biology of microorganisms with emphasis on viruses, bacteria, fungi, and protozoa. Lecture-laboratory. A grade of C- or better in BIO 193 is a prerequisite for this class.

BIO 215 | ECOLOGY | 4 quarter hours  
(Undergraduate)  
This course provides a broad survey of ecological principles and methods of lab and field investigation, using ecological theory to explain patterns observed in nature. Topics link interactions between organisms and their environment to their consequences in populations, communities, and ecosystems, including: the distribution and abundance of organisms in nature; factors that influence population size, growth and regulation; species interactions; community organization and diversity; and ecosystem level processes focused on moving energy and matter among living and nonliving parts of the environment. Labs involve applying ecological methods and sampling techniques to better understand ecological concepts and to gain an increased awareness of the organization and complexity in the natural world. Labs emphasize hypothesis testing and experimental design, the analysis of ecological data, and communicating research findings. BIO 193 is a prerequisite for this class.

BIO 220 | PRINCIPLES OF BIOTECHNOLOGY | 4 quarter hours  
(Undergraduate)  
This course will address aspects of the research and methodologies used in Modern Biotechnology, and place the field in the context of current societal and ethical concerns. Lecture-laboratory. BIO 191 and BIO 192 and BIO 193 are prerequisites for this class.

BIO 225 | PHYSIOLOGY OF POVERTY | 4 quarter hours  
(Undergraduate)  
Low socioeconomic status is associated with psychological stress, nutritional challenges, and toxin exposure, in addition to low access to high-quality healthcare and education often discussed. In the US, it is also inseparable from racism, on a personal and structural level. This course will consider the effects of these stressors in driving cardiovascular, metabolic, immunological, and neurological diseases that contribute to striking disparities in quality of life and lifespan. With the support of lecture introductions, students will interpret data from basic research, biomedical studies, and epidemiology, and integrate them with public health and sociological perspectives. Documentaries and popular texts will contextualize these data and foster reflection and discussion in class meetings. By the end of the course, students will be able to apply what they have learned from the breadth of their scientific and liberal arts coursework to understand the critical challenges in addressing the impacts of socioeconomic inequality on human health. BIO 193 is a prerequisite for this class.

BIO 230 | EPIDEMIOLOGY | 4 quarter hours  
(Undergraduate)  
This course will involve the study of the frequency and distribution of human disease. Students will learn how the health of a population is measured, and how medical interventions are quantitatively evaluated. Students will analyze data from historical and modern health studies, including population surveys, case-control studies, cohort studies, and clinical trials for prevention and treatment. BIO 206 is a prerequisite for this class.
BIO 235 | EVOLUTION | 4 quarter hours  
(Undergraduate)  
This lecture/laboratory course will examine basic selection, population genetics, development, speciation, extinction, systematics, and the history of evolution. In the lab, students will learn some of the modern research methods used in the study of evolution.  
BIO 193 is a prerequisite for this class.

BIO 250 | CELL BIOLOGY | 4 quarter hours  
(Undergraduate)  
Fundamentals of cell form and function studied at the molecular and organelle level, including basic cellular biochemistry, ultrastructure and physiology. Lecture-laboratory.  
A grade of C- or better in BIO 193 and a grade of C- or better in CHE 134 (or CHE 138 or CHE 144) are prerequisites for this class.

BIO 260 | GENETICS | 4 quarter hours  
(Undergraduate)  
Transmission of heritable traits, nature of genetic material, manner of its expression, its mutability, and its significance with respect to organismal and species variation. Lecture-laboratory.  
A grade of C- or better in BIO 193 is a prerequisite for this class.

BIO 270 | COMPARATIVE VERTEBRATE ANATOMY | 4 quarter hours  
(Undergraduate)  
This lecture-laboratory course explores the diversity, anatomy, and evolution of vertebrates. The laboratory portion includes dissection and observation of various vertebrates.  
BIO 192 and BIO 193 are a prerequisite for this class.

BIO 290 | TOPICS IN BIOLOGY | 2-4 quarter hours  
(Undergraduate)  
Occasional courses offered at intermediate levels. See the schedule of classes for current offerings. 2 or 4 quarter hours.  
Sophomore standing is a prerequisite for this class.

BIO 301 | ANIMAL BEHAVIOR | 4 quarter hours  
(Undergraduate)  
An exploration of the types of animal behavior and modifiers of behavior as based on neuroendocrine function, with special emphasis on Felids. Lecture - Field Studies. Laboratory required.  
BIO 191, BIO 192, BIO 193, BIO 206 and (BIO 215 or BIO 235) are prerequisites for this class.

BIO 302 | STUDENT LABORATORY INSTRUCTION | 4 quarter hours  
(Undergraduate)  
Student Laboratory Instruction. Completion of course requires student to serve as teaching assistant for biology laboratory course in the following quarter.

BIO 303 | INTRODUCTION TO SCIENTIFIC RESEARCH | 4 quarter hours  
(Undergraduate)  
Introduction to Scientific Research. Course requires that student has had (or currently having) experience in scientific research.

BIO 304 | FIELD METHODS FOR BIOLOGISTS | 4 quarter hours  
(Undergraduate)  
The course will focus on the methods needed to initiate and undertake observations on Midwest ecosystems. Students will learn methods and put into practice the tools required to begin a site inventory and to assess population characteristics. The data gathered by the class will be archived and used as a starting point for subsequent studies. Each student will have an original research project involving extensive field work in nature.  
Junior Standing or above is a prerequisite for this class.

BIO 306 | RESEARCH METHODS & APPLIED BIOSTATISTICS | 4 quarter hours  
(Undergraduate)  
Approaches to conducting research and a variety of statistical approaches will be discussed and used to answer questions applied to biological data. A computer lab will introduce and use the statistical software program R for graphing and statistically analyzing biological data sets. Includes such topics as: study design, data management, presenting data, analysis of variance (one-way and multi-factor), analysis of covariance, multiple regression, logistic regression, and AIC model selection.  
BIO 206 is a prerequisite for this class.

BIO 307 | ANIMAL PHYSIOLOGY | 4 quarter hours  
(Undergraduate)  
Physiology is a branch of biology dealing with the functions of living organisms; it addresses questions that relate to how living organisms work. This lecture-laboratory course focuses on the physiology of a broad range of animals including both vertebrates and invertebrates. The primary objectives of the course are (1) to define many of the physiological challenges experienced by animals living in different environments (respiratory gas exchange, temperature regulation, ion and water balance, etc.) and (2) to study the strategies and physiological mechanisms involved in dealing with these challenges. Although this course will take a broad approach examining many interesting physiological adaptations, students will learn to appreciate that there are far more similarities between how different animals do things than there are differences. (Cannot receive credit for both BIO 307 and BIO 308. Cannot receive credit for BIO 307 if credit already earned for BIO 310.)  
A grade of C- or better in BIO 250 is a prerequisite for this class.

BIO 308 | HUMAN PHYSIOLOGY | 4 quarter hours  
(Undergraduate)  
Physiology is a branch of biology dealing with the functions of living organisms; it addresses questions that relate to how living organisms work. This lecture-laboratory course focuses on human physiology at the organ system level. The human approach has immediate personal relevance; most of us are interested in how the human body solves the basic problems associated with life. The primary objectives of the course are (1) to define many of the physiological problems experienced by the human body (respiratory gas exchange, body nutrition, temperature regulation, body fluid regulation, etc.), (2) to study the concepts and mechanisms involved in solving these problems, and (3) to evaluate the effects of various disease states (e.g., emphysema, hypertension, renal failure, fever, hypercholesterolemia, diabetes) on normal body function. Although this course focuses on the human organism, the concepts and mechanisms to be addressed are applicable to a broad range of other vertebrates. (Cannot receive credit for both BIO 307 and BIO 308. Cannot earn credit for BIO 308 if received credit for BIO 310.)  
A grade of C- or better in BIO 250 is a prerequisite for this class.
**BIO 309 | PLANT PHYSIOLOGY | 4 quarter hours**  
(Undergraduate)  
The purpose of this course is to provide students with the opportunity to take a detailed look at how vascular plants function. Specifically to understand what biochemical life sustaining processes are occurring in the plant, what a plant needs from the environment, and how a plant reacts to and influences its environment. The general topics that will be covered in this course include: 1) The properties of water and its function in plants; 2) Substances moved in plants and the pathways involved in this movement; 3) Mineral uptake and roles of essential elements; 4) Intermediary metabolism and metabolic regulation as they pertain to plants; and 5) Control of plant growth and development. The laboratory portion of this course will be used to reinforce and expand upon the topics covered in lecture.  

**BIO 250 or instructor consent is a prerequisite for this class.**

**BIO 311 | HISTOLOGY | 4 quarter hours**  
(Undergraduate)  
A Lecture/Laboratory course covering the microscopic structure of the tissues that make up animal organs. The development of these tissues as well as their relationship to the principles of gross anatomy, physiology, cell biology and molecular biology is stressed.  

**A grade of C- or better in BIO 193 is a prerequisite for this class.**

**BIO 312 | TOPICS IN EXERCISE PHYSIOLOGY | 4 quarter hours**  
(Undergraduate)  
This course provides an introduction to exercise physiology to enable exploration of current research topics in the field. Weekly discussion and presentation of articles from peer-reviewed journals will reinforce and elaborate on concepts covered in lecture. Topics include: muscle structure and bioenergetics, cardiovascular and respiratory responses to exercise, human evolution and endurance, training and adaptation, nutrition and ergogenic aids, and the relationships between exercise, health, and longevity.  

**BIO 250 or instructor consent is a prerequisite for this class.**

**BIO 315 | TOPICS IN ECOLOGY | 4 quarter hours**  
(Undergraduate)  
The focus of this course is to read and critique classic papers in ecology and to connect their foundational ideas with modern research and understanding.  

**BIO 191, BIO 192, BIO 193 and BIO 215 are a prerequisite for this class.**

**BIO 316 | PHYCOLOGY | 4 quarter hours**  
(Undergraduate)  
Introduction to algae with emphasis on taxonomy, morphology, ultrastructure, physiology, life histories of freshwater and marine species. Lecture-laboratory. Cross-listed as BIO 416.  

**BIO 193 is a prerequisite for this class.**

**BIO 317 | AQUATIC BIOLOGY | 4 quarter hours**  
(Undergraduate)  
The study of biological, physical and chemical phenomena in freshwater environments. Emphasis on organisms and their ecology. Lecture-laboratory.  

**BIO 191, BIO 192, BIO 193 and BIO 215 are a prerequisite for this class.**

**BIO 318 | FIELD STUDIES IN MARINE AND ESTUARINE BIOLOGY | 4 quarter hours**  
(Undergraduate)  
This course is designed for science majors with an interest in marine and estuarine biology and will examine the primary objectives of the course are: 1) to explore the diversity of marine and estuarine life; 2) to understand the manner in which physical and biological factors influence biological diversity in marine systems; 3) to understand the role that humans play in shaping these dynamics; and 4) to develop professional connections and gain real-life experiences in marine science.  

**BIO 191, BIO 192, BIO 193 and (BIO 215 or BIO 235) or instructor consent are a prerequisite for this class.**

**BIO 319 | TOPICS IN BEHAVIORAL PARASITOLOGY | 4 quarter hours**  
(Undergraduate)  
This course is designed for science majors and graduate students with an interest in animal behavior, ecology, evolution, health science, veterinary science and parasitology. The course adopts an integrative approach to the study of Behavioral Parasitology, which draws on modern developments in the fields of Animal Behavior, Parasitology, Ecology and Evolution. The primary objectives of the course are to: 1) explore the diverse relationships that occurs between parasite infection and host behavior; 2) understand proximate mechanisms that underlie behavioral manipulation by parasites; 3) explore the ecological and evolutionary impacts of behavioral manipulation in nature; 4) extend findings from animal systems to human-related issues (health, psychology); 5) develop familiarity with reading and interpreting primary literature. The teaching approach will be primarily discussion- and presentation-based and will be highly-interactive in nature.  

**BIO 191 and BIO 192 and BIO 193 and (BIO 215 or BIO 235) are prerequisites for this class; or consent of instructor.**

**BIO 320 | ADVANCED MICROBIOLOGY | 4 quarter hours**  
(Undergraduate)  
Advanced microbiology lecture-lab course designed for science majors and graduate students that will focus on developing technical and critical thinking skills in the field of microbiology. Labs will involve independent or small group research projects.  

**BIO 210 and Junior standing (or consent of instructor) are prerequisites for this class.**

**BIO 321 | MOLECULAR METHODS IN ECOLOGY AND EVOLUTION | 4 quarter hours**  
(Undergraduate)  
This course will provide hands-on experience in methods of detecting and analyzing molecular variation in nature. By the end of the course, students should be competent employing molecular markers to answer a wide variety of basic questions in ecology and evolution.  

**BIO 215 or BIO 235 is a prerequisite for this class.**

**BIO 325 | PALEOBIOLOGY | 4 quarter hours**  
(Undergraduate)  
This lecture/laboratory course will introduce students to various principles of paleobiology and to provide a broad survey of important taxonomic groups. This course will cover topics such as: the concept of geologic time, evolution, extinction, morphology, taxonomic classification, fossilization, paleoecology, biogeography, and biostratigraphy. The laboratory portion of the course will reinforce the lecture topics and offer an opportunity to examine fossil specimens and compare them with modern forms.  

**BIO 192, BIO 193 and (BIO 215 or BIO 335) or instructor’s consent are a prerequisite for this class.**
BIO 330 | DEVELOPMENTAL BIOLOGY | 4 quarter hours
(Undergraduate)
A survey of developmental phenomena in animals from fertilization to sexual maturity. Students will gain a current understanding of the genetic, cellular, and environmental mechanisms that shape the body and its major organs.
BIO 250 and BIO 260 are a prerequisite for this class.

BIO 331 | TOPICS IN DEVELOPMENTAL BIOLOGY | 4 quarter hours
(Undergraduate)
This seminar course examines the current embryological literature using both evolutionary and molecular perspectives. Previous student-led topics include: how early embryos are organized, the signals controlling left-right asymmetry, the evolutionary origin of feathers and the development of the retina.
BIO 330 or 360 is a prerequisite for this class.

BIO 332 | POPULATION ECOLOGY | 4 quarter hours
(Undergraduate)
This course covers concepts and models in population ecology and their applications for predicting population trends and disease spread across populations, understanding conservation biology approaches, and the sustainable management of wildlife populations.
ENV 250 or BIO 215 is a prerequisite for this class.

BIO 335 | CONCEPTS IN EVOLUTION | 4 quarter hours
(Undergraduate)
Study of evolution and diversity in the living world. Lecture only.
BIO 235 or (BIO 215 and BIO 260) are a prerequisite for this class.

BIO 339 | CELLULAR NEUROBIOLOGY | 4 quarter hours
(Undergraduate)
This course examines the cellular and molecular mechanisms of neuronal function and the changes that occur in processes such as learning and memory. Emphasis on electrophysiology, synaptic communication, and cellular signaling. Cross-listed with BIO 439 and NEU 339.
BIO 250 (or PSY 377 or HLTH 301) is a prerequisite for this class.

BIO 340 | BEHAVIORAL NEUROSCIENCE | 4 quarter hours
(Undergraduate)
Explores the organization of the nervous system on a gross anatomical level and based on functional units. The emphasis is on understanding how individual behaviors are produced by different neural systems and how these individual behaviors integrate into the activities of whole organisms. Formerly Systems Neurobiology. Cross-listed as BIO 440.
NEU 201 (or BIO 339 or NEU 339 or BIO 310 or BIO 308 or BIO 307 or HLTH 301 or PSY 377) is a prerequisite for this class

BIO 341 | TOPICS IN NEUROBIOLOGY | 4 quarter hours
(Undergraduate)
A seminar course examining current topics in neurobiology. Original readings will include both current review and classic neuroscience articles.
BIO 340 (or BIO 339 or NEU 339 or BIO 342 or PSY 377) is a prerequisite for this class.

BIO 342 | COGNITIVE NEUROSCIENCE | 4 quarter hours
(Undergraduate)
This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.
NEU 201 (or BIO 339 or BIO 340 or BIO 341 or PSY 377) is a prerequisite for this class.

BIO 345 | TOPICS IN PALEOBIOLOGY | 4 quarter hours
(Undergraduate)
A seminar course examining various topics in paleobiology (the study of ancient life) including morphological concepts, macroevolutionary processes, extinction events, phylogenetic systematics, paleoecology, paleobiogeography, and the adequacy of the fossil record. Readings include classic and recent articles in the fields of paleobiology.
BIO 192, BIO 193 and (BIO 215 or BIO 235) or instructor's consent are a prerequisite for this class.

BIO 347 | TOPICS IN MEDICAL BACTERIOLOGY | 4 quarter hours
(Undergraduate)
This course will address current topics of concern and research in medical bacteriology. Students participating in this course will explore key concepts used in bacterial pathogenesis and learn how to critically appraise recent research papers in the field.
BIO 210 or BIO 250 or consent of instructor are prerequisites for this class.

BIO 348 | THE BIOLOGY OF INFECTION | 4 quarter hours
(Undergraduate)
This course will provide students with detailed knowledge of medically important bacteria. The course will first examine common events in infections and the body's responses to infection. We will highlight in these studies the changes in both hosts and pathogens as strategies of infection and immunity evolve relative to one another. Within this framework we will examine a spectrum of infectious diseases in detail.
BIO 210 and BIO 370 are a prerequisite for this class.

BIO 349 | TOPICS IN MICROBIOLOGY AND BIOTECHNOLOGY | 4 quarter hours
(Undergraduate)
This course will address current topics of concern and research in microbiology and biotechnology. Students participating in this course will explore fundamental concepts being used and new discoveries and emerging technologies in microbiology and biotechnology. Students will learn how to critically appraise recent research papers in these fields.
BIO 210 or BIO 220 or consent of instructor is a prerequisite for this class.

BIO 352 | ADVANCED COMPARATIVE PHYSIOLOGY | 4 quarter hours
(Undergraduate)
Comparative and environmental approach to the functions and mechanisms of vertebrate organ systems. Selected topics will be addressed using a lecture/discussion/seminar format. Cross-listed as BIO 452.
BIO 250 is a prerequisite for this class.

BIO 355 | GENETIC TOXICOLOGY | 4 quarter hours
(Undergraduate)
This course will deal with the study of agents that damage the genome or alter the proper functioning of the genome that can lead to disease in humans. Topics covered will include basic spectrum of genetic damage and chromosomal effects, mechanisms of mutations, DNA repair, genetic assays used for evaluation of genetic toxicity, health consequences of genetic damage, including cancer and inheritable mutations, and the current position of US government and global regulatory agencies on the issues of genetic toxicology.
BIO 250 is a prerequisite for this class.

BIO 360 | MOLECULAR BIOLOGY | 4 quarter hours
(Undergraduate)
Study of biology at the molecular level, focusing on the regulation of gene expression and the principles of genetic engineering. Lecture-laboratory.
BIO 250 and BIO 260 are prerequisites for this class.
BIO 361 | TOPICS IN MOLECULAR BIOLOGY | 4 quarter hours  
(Undergraduate)  
Discussion and seminars in selected areas of molecular biology. Cross-listed as CHE 461.  
BIO 360 is a prerequisite for this class.

BIO 362 | BIOINFORMATICS FOR BENCH SCIENTISTS | 4 quarter hours  
(Undergraduate)  
Study how high-throughput technologies like whole-genome sequencing have changed biological research, and learn to use computers in real research tasks such as primer design, DNA sequencing, homology searches, sequence alignment, and more. Cross-listed with BIO 462.  
BIO 191, BIO 192, BIO 193 and BIO 260 are a prerequisite for this class.

BIO 365 | PRINCIPLES OF TOXICOLOGY | 4 quarter hours  
(Undergraduate)  
A study of the adverse effects of chemicals on living organisms, including the chemical natures, kinetics, dose-response relationships, metabolism, and mechanisms of action of various toxins and toxicants.  
BIO 193 and (CHE 234 or CHE 238) are a prerequisite for this class.

BIO 369 | INTRODUCTION TO STEM PEER MENTORING | 4 quarter hours  
(Undergraduate)  
This course is designed for undergraduates who will be mentoring students in the College of Science and Health. The purpose of the course is to prepare mentors to welcome STEM students into the culture of the scientific community at DePaul. Mentors will encourage their peers to use tools and resources designed to help them build a sense of belonging and achieve academic success. The course will include readings, presentations, and activities, which will support the student's development as a peer mentor. Students will reflect on their experiences to inform their efforts in creating a supportive learning environment for their peers.

BIO 381 | TOPICS IN CANCER | 4 quarter hours  
(Undergraduate)  
This course is a seminar based course that discusses current topics in the field of cancer biology from a cellular and molecular perspective. This course demonstrates the recent advances made in the most common cancers in the western world, toward etiology, diagnosis, therapy and prevention. Scientific articles taken from peer-reviewed scientific journals will illustrate available and potential chemotherapeutic approaches towards achieving a treatment for the most common cancers.  
BIO 250 is a prerequisite for this class.

BIO 385 | MAMMALIAN REPRODUCTION | 4 quarter hours  
(Undergraduate)  
Molecular, cellular, physiological, and behavioral aspects of mammalian reproduction. Mechanisms and strategies used by mammals in reproductive processes including sexual differentiation, gamete production, puberty, reproductive hormone cyclicity, neuroendocrine control mechanisms, pregnancy, parturition, and reproductive behavior.  
Cross-listed with BIO 485.

BIO 370 | IMMUNOBIOLOGY | 4 quarter hours  
(Undergraduate)  
Basic factors governing immune phenomena and antigen-antibody reactions. Lecture-laboratory. Cross-listed as BIO 471.  
BIO 250 or BIO 260 is a prerequisite for this class.

BIO 375 | INTRODUCTION TO PHARMACOLOGY | 4 quarter hours  
(Undergraduate)  
Introduction to Pharmacology will explore the relationships between an organism and its response to an administered drug. This will include: 1) How drugs are administered to the body 2) What is their fate once in the body, i.e. Pharmacokinetics 3) What their mechanisms actions are - i.e. Pharmacodynamics, and 4) Adverse reactions to drugs. We will explore these relationships in different physiological systems of the human body including (but not limited to) the nervous system, circulatory system, digestive system and endocrine system. Lastly, this course will provide an understanding of the pharmaceutical system by providing a framework to explore how drugs are discovered, produced, tested, and regulated.

One of the following is a prerequisite for this class: BIO 307, BIO 308, BIO 310, HLTH 301, HLTH 302, or NEU 201

BIO 380 | CANCER BIOLOGY | 4 quarter hours  
(Undergraduate)  
This course will explore the cellular and molecular aspects of cancer. Topics will include the pathology and epidemiology of cancer, the origin and spread of cancer, hereditary and familial cancers, cancer associated genes and strategies of cancer therapy.  
BIO 250 and BIO 260 are a prerequisite for this class.
BIO 388 | RESEARCH METHODS IN BIOLOGY | 4 quarter hours
(Undergraduate)
Research Methods in Biology is a methods-based course designed for science majors that will focus on learning a variety of cutting edge methods used by biologists to carry out research. Throughout the course, students will develop an in-depth understanding and appreciation for one or two research methods which are associated with projects they will undertake as part of BIO 389 (Research in Field Biology). Biology is a very broad field, so your chosen method(s) may end up being based in any of a variety of sub-fields including cell biology, physiology, biochemistry, molecular biology, ecology or evolution. In order to utilize methods to collect biological data you will need to ‘become an expert’. In this course you will learn that being an expert means more than just ‘following a recipe’. An expert will also understand the theory behind how their method works and appreciate the history of how the method was developed over time (and by whom). An expert will also understand the specifics of how all of the required equipment works (including how it is properly maintained and calibrated) and how to properly collect or prepare any samples/chemicals needed to carry out the process. Finally you will learn how to analyze the data you collect and how to interpret it while acknowledging what limitations may be associated with your data. Research Methods in Biology is a hands-on course. You will learn your method(s), you will practice and you will become an expert. To test whether you are an expert, you will be challenged to teach the method to your peers and produce a detailed methods handout which others can use to carry out the method on their own. This means you will also be taught the methods selected by your peers. Finally, you will collect data utilizing your method to complete your chosen research project in BIO 389.
(BIO 191, BIO 192 and BIO 193) and (one of the following: BIO 206, BIO 215, BIO 235, BIO 250, BIO 260, BIO 307, BIO 308, BIO 309, BIO 310) or instructor consent are prerequisites for this class. BIO 389 is a co-requisite.

BIO 389 | RESEARCH IN FIELD BIOLOGY | 4 quarter hours
(Undergraduate)
BIO 389/489 is a research-intensive course designed for science majors and graduate students that will focus on developing skills of collaborative field-based research. Throughout the course, students (working in groups of 2 or 3) will utilize the scientific method to develop and carry out an original research project. Students will utilize the primary literature to learn the current state of research in an area that interests them, then use that knowledge to develop a novel question they can test with a field-based experiment. Data collected will be analyzed and results compiled into a publication quality paper. Students will then present their study to their peers in the form of an oral or poster presentation.

Study Abroad Course
BIO 390 | SPECIAL TOPICS | 4 quarter hours
(Undergraduate)
Occasional courses offered at an advanced level. See the schedule of classes for current offerings. Cross-listed as BIO 490.
Junior or Senior standing is a prerequisite for this class.

BIO 392 | EXTRAMURAL INTERNSHIP | 4 quarter hours
(Undergraduate)
An opportunity for students to integrate their academic experience with real-world work situations; supervision is provided by a member of the DePaul Faculty in the Biological Sciences and the private or public enterprise. 0-4 credit hours.
At least Sophomore standing and a declared Biological Sciences major, or by arrangement with the Biology internship director or department permission are prerequisites for this class.

BIO 395 | BIOLOGY CAPSTONE SEMINAR | 4 quarter hours
(Undergraduate)
The aim of this course is to integrate current biological view(s) of humanity with the perspectives of the liberal studies curriculum. Students will develop and debate topics that demonstrate mastery of the biology core curriculum (cell biology, genetics, physiology and ecology) while touching on history, philosophy, ethics and the law.

BIO 397 | MENTORED RESEARCH EXPERIENCE IN BIOLOGY | 2-4 quarter hours
(Undergraduate)
The faculty research mentor and student will work together to formulate a research question based on current biological knowledge and the scientific literature. They will develop hypotheses to guide designing and conducting experiments to test the hypotheses. Under faculty supervision, the student will analyze their data and propose follow up experiments. The results and conclusions will be reported in a final project which may be a poster or oral presentation, or research manuscript. In addition, the student will reflect on how the project activities and experiences have contributed to their personal growth as a scientist and their future career plans. Relevant safety and ethical training will be based on the specific proposed research.

BIO 399 | INDEPENDENT STUDY | 1-4.5 quarter hours
(Undergraduate)

BIO 400 | DEVELOPMENT OF TOPICS FOR RESEARCH | 4 quarter hours
(Graduate)
The purpose of this course is to help graduate students in formulating research questions and design methods while improving written expression and oral presentation skills. Students will, with the guidance of a faculty member, undertake a detailed investigation of a topic, formulate a potential research project in that area, and present their proposal orally to the faculty at the end of the quarter.

BIO 401 | INDEPENDENT STUDY | 2-4 quarter hours
(Graduate)
Experimental and/or Library study of selected topics in the life sciences. A-Cell Biology, B-Immunobiology, C-Developmental Biology, D-Physiology, E-Endocrinology, F-Genetics, G-Structural Biology, H-Ecology, I-Molecular Biology. J-Neurobiology. Offered in the Autumn, Winter, Spring and Summer quarters. 2 or 4 quarter hours.

BIO 402 | INTRODUCTION TO GRADUATE STUDIES | 2 quarter hours
(Graduate)
Presents the biology faculty and facilities. Various research and teaching methods in biology will be explored. Required of all graduate students. Formerly BIO 495.

BIO 403 | DEVELOPMENT OF TOPICS FOR RESEARCH | 4 quarter hours
(Graduate)
The purpose of this course is to help graduate students in formulating research questions and design methods while improving written expression and oral presentation skills. Students will, with the guidance of a faculty member, undertake a detailed investigation of a topic, formulate a potential research project in that area, and present their proposal orally to the faculty at the end of the quarter.

Status as a graduate Biology student (MA or MS) is a prerequisite for this class.
**BIO 406 | RESEARCH METHODS & APPLIED BIOSTATISTICS | 4 quarter hours**
*(Graduate)*
Approaches to conducting research and a variety of statistical approaches will be discussed and used to answer questions applied to biological data. A computer lab will introduce and use the statistical software program R for graphing and statistically analyzing biological data sets. Includes such topics as: study design, data management, presenting data, analysis of variance (one-way and multi-factor), analysis of covariance, multiple regression, logistic regression, and AIC model selection.

**Status as a graduate Biology student (MA or MS) is a prerequisite for this class.**

**BIO 409 | PLANT PHYSIOLOGY | 4 quarter hours**
*(Graduate)*

**BIO 412 | TOPICS IN EXERCISE PHYSIOLOGY | 4 quarter hours**
*(Graduate)*
This course provides an introduction to exercise physiology to enable exploration of current research topics in the field. Weekly discussion and presentation of articles from peer-reviewed journals will reinforce and elaborate on concepts covered in lecture. Topics include: muscle structure and bioenergetics, cardiovascular and respiratory responses to exercise, human evolution and endurance, training and adaptation, nutrition and ergogenic aids, and the relationships between exercise, health, and longevity.

**BIO 415 | TOPICS IN ECOLOGY | 4 quarter hours**
*(Graduate)*
The focus of this course is to read and critique classic papers in ecology and to connect their foundational ideas with modern research and understanding.

**BIO 416 | PHYCOLOGY | 4 quarter hours**
*(Graduate)*
Introduction to algae with emphasis on taxonomy, morphology, ultrastructure, physiology, life histories of freshwater and marine species. Lecture-laboratory.

**BIO 417 | AQUATIC BIOLOGY | 4 quarter hours**
*(Graduate)*
The study of biological, physical and chemical phenomena in fresh water and marine environments. Emphasis on organisms and their interactions. Lecture-laboratory.

**BIO 419 | TOPICS IN BEHAVIORAL PARASITOLOGY | 4 quarter hours**
*(Graduate)*
This course is designed for science majors and graduate students with an interest in animal behavior, ecology, evolution, health science, veterinary science and parasitology. The course adopts an integrative approach to the study of Behavioral Parasitology, which draws on modern developments in the fields of Animal Behavior, Parasitology, Ecology and Evolution. The primary objectives of the course are to: 1) explore the diverse relationships that occurs between parasite infection and host behavior; 2) understand proximate mechanisms that underlie behavioral manipulation by parasites; 3) explore the ecological and evolutionary impacts of behavioral manipulation in nature; 4) extend findings from animal systems to human-related issues (health, psychology); 5) develop familiarity with reading and interpreting primary literature. The teaching approach will be primarily discussion- and presentation-based and will be highly-interactive in nature.

**BIO 420 | ADVANCED MICROBIOLOGY | 4 quarter hours**
*(Graduate)*
Advanced microbiology lecture-lab course designed for science majors and graduate students that will focus on developing technical and critical thinking skills in the field of microbiology. Labs will involve independent or small group research projects.

**BIO 421 | MOLECULAR METHODS IN ECOLOGY AND EVOLUTION | 4 quarter hours**
*(Graduate)*
This course will provide hands-on experience in methods of detecting and analyzing molecular variation in nature. By the end of the course, students should be competent employing molecular markers to answer a wide variety of basic questions in ecology and evolution. Cross-listed with BIO 321.

**BIO 425 | CELLULAR EVENTS IN THE IMMUNE RESPONSE | 4 quarter hours**
*(Graduate)*
Analysis of cellular and subcellular interactions in the immune response. Lecture, seminar, discussion. BIO 470 recommended.

**BIO 430 | DEVELOPMENTAL BIOLOGY | 4 quarter hours**
*(Graduate)*
A survey of developmental phenomena in animals from fertilization to sexual maturity. Topics include gametogenesis, early cell divisions, organ formation, metamorphosis, regeneration, birth defects, stem cells, reproductive technology and mammalian cloning. Lecture-laboratory.

**BIO 431 | TOPICS IN DEVELOPMENTAL BIOLOGY | 4 quarter hours**
*(Graduate)*
This seminar course examines the current embryological literature using both evolutionary and molecular perspectives. Previous student-led topics include: how early embryos are organized, the signals controlling left-right asymmetry, the evolutionary origin of feathers and the development of the retina. BIO 430 or BIO 460 recommended.

**BIO 432 | POPULATION ECOLOGY | 4 quarter hours**
*(Graduate)*
This course covers concepts and models in population ecology and their applications for predicting population trends and disease spread across populations, understanding conservation biology approaches, and the sustainable management of wildlife populations. ENV 250 or BIO 215 is a prerequisite for this class.

**BIO 435 | CONCEPTS IN EVOLUTION | 4 quarter hours**
*(Graduate)*
Study of evolution and diversity in the living world. Lecture only.

**BIO 439 | CELLULAR NEUROBIOLOGY | 4 quarter hours**
*(Graduate)*
This course examines the cellular and molecular mechanisms of neuronal function and the changes that occur in processes such as learning and memory. Emphasis on electrophysiology, synaptic communication, and cellular signaling. Cross-listed as BIO439, NEU339, NEU439.

**BIO 440 | BEHAVIORAL NEUROSCIENCE | 4 quarter hours**
*(Graduate)*
An examination of the ways in which neural systems underpin behavior with an emphasis on vertebrates. In this course, behavior is understood in its broadest sense, from the functioning of organs and organ systems to the activities of whole organisms. Formerly Systems Neurobiology. Lecture-Laboratory.
BIO 441 | TOPICS IN NEUROBIOLOGY | 4 quarter hours (Graduate)
A seminar course examining current topics in neurobiology. Original readings will include both current review and classic articles in the fields of neurobiology, neuroethology and the related neurosciences. BIO 439 or BIO 440 is recommended.

BIO 442 | COGNITIVE NEUROSCIENCE | 4 quarter hours (Graduate)
This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.

BIO 445 | TOPICS IN PALEOBIOLOGY | 4 quarter hours (Graduate)
A seminar course examining various topics in paleobiology (the study of ancient life) including morphological concepts, macroevolutionary processes, extinction events, phylogenetic systematics, paleoecology, paleobiogeography, and the adequacy of the fossil record. Readings include classic and recent articles in the fields of paleobiology.

BIO 447 | TOPICS IN MEDICAL BACTERIOLOGY | 4 quarter hours (Graduate)
This course will address current topics of concern and research in medical bacteriology. Students participating in this course will explore key concepts used in bacterial pathogenesis and learn how to critically appraise recent research papers in the field.

BIO 448 | THE BIOLOGY OF INFECTION | 4 quarter hours (Graduate)
This course will provide students with detailed knowledge of medically important bacteria. The course will first examine common events in infections and the body's responses to infection. We will highlight in these studies the changes in both hosts and pathogens as strategies of infection and immunity evolve relative to one another. Within this framework we will examine a spectrum of infectious diseases in detail. BIO 470 is recommended.

BIO 449 | TOPICS IN MICROBIOLOGY AND BIOTECHNOLOGY | 4 quarter hours (Graduate)
This course will address current topics of concern and research in microbiology and biotechnology. Students participating in this course will explore fundamental concepts being used and new discoveries and emerging technologies in microbiology and biotechnology. Students will learn how to critically appraise recent research papers in these fields.

BIO 452 | ADVANCED COMPARATIVE PHYSIOLOGY | 4 quarter hours (Graduate)
Comparative and environmental approach to the function and mechanisms of vertebrate organ systems. Selected topics in comparative physiology will be addressed using a lecture/discussion/seminar format.

BIO 455 | GENETIC TOXICOLOGY | 4 quarter hours (Graduate)
This course will deal with the study of agents that damage the genome or alter the proper functioning of the genome that can lead to disease in humans. Topics covered will include basic spectrum of genetic damage and chromosomal effects, mechanisms of mutations, DNA repair, genetic assays used for evaluation of genetic toxicology, health consequences of genetic damage, including cancer and inheritable mutations, and the current position of US government and global regulatory agencies on the issues of genetic toxicology. BIO 260 is a prerequisite for this class.

BIO 460 | MOLECULAR BIOLOGY | 4 quarter hours (Graduate)
Study of biology at the molecular level, focusing on the regulation of gene expression and the principles of genetic engineering. Lecture-laboratory. Cross-listed as BIO 360.

BIO 461 | TOPICS IN MOLECULAR BIOLOGY | 4 quarter hours (Graduate)
Discussion and seminars in selected areas of molecular biology.

BIO 462 | BIOINFORMATICS FOR BENCH SCIENTISTS | 4 quarter hours (Graduate)
Study how high-throughput technologies like whole-genome sequencing have changed biological research, and learn to use computers in real research tasks such as primer design, DNA sequencing, homology searches, sequence alignment, and more. Cross-listed with BIO 362.

BIO 465 | PRINCIPLES OF TOXICOLOGY | 4 quarter hours (Graduate)
A study of the adverse effects of chemicals on living organisms, including the chemical natures, kinetics, dose-response relationships, metabolism, and mechanisms of action of various toxins and toxicants.

BIO 471 | IMMUNOBIOLOGY | 4 quarter hours (Graduate)
Basic factors governing immune phenomena and antigen antibody reactions. Lecture-laboratory.

BIO 475 | INTRODUCTION TO PHARMACOLOGY | 4 quarter hours (Graduate)
Introduction to Pharmacology will explore the relationships between an organism and its response to an administered drug. This will include: 1) How drugs are administered to the body 2) What is their fate once in the body, i.e. Pharmacokinetics 3) What their mechanisms actions are - i.e. Pharmacodynamics, and 4) Adverse reactions to drugs. We will explore these relationships in different physiological systems of the human body including (but not limited to) the nervous system, circulatory system, digestive system and endocrine system. Lastly, this course will provide an understanding of the pharmaceutical system by providing a framework to explore how drugs are discovered, produced, tested, and regulated. Cross-listed with BIO 375.

BIO 480 | CANCER BIOLOGY | 4 quarter hours (Graduate)
This course will explore the cellular and molecular aspects of cancer. Topics will include the pathology and epidemiology of cancer, the origin and spread of cancer, hereditary and familial cancers, cancer associated genes and strategies of cancer therapy.
BIO 481 | TOPICS IN CANCER | 4 quarter hours
(Graduate)
This course is a seminar-based course that discusses current topics in the field of cancer biology from a cellular and molecular perspective. This course demonstrates the recent advances made in the most common cancers in the western world, toward etiology, diagnosis, therapy and prevention. Scientific articles taken from peer-reviewed scientific journals will illustrate available and potential chemotherapeutic approaches towards achieving a treatment for the most common cancers.

BIO 485 | MAMMALIAN REPRODUCTION | 4 quarter hours
(Graduate)
Molecular, cellular, physiological, and behavioral aspects of mammalian reproduction. Mechanisms and strategies used by mammals in reproductive processes including sexual differentiation, gamete production, puberty, reproductive hormone cyclicity, neuroendocrine control mechanisms, pregnancy, parturition, and reproductive behavior. Cross-listed with BIO 385.

BIO 486 | INTRODUCTION TO ENDOCRINOLOGY | 4 quarter hours
(Graduate)
A study of hormones as chemical regulators of development, growth, metabolism, homeostasis, reproduction, response to stress, and behavior; as well as hormone synthesis, chemistry, mechanisms of action, and endocrine gland structure.

BIO 488 | ADVANCED ENDOCRINOLOGY | 4 quarter hours
(Graduate)
Analysis of non-hypothalamic-hypophyseal pathways for hormonal regulation of the structure, function and biochemistry of hard tissues, calcium metabolism, and regulation of glucose metabolism. Lecture-seminar. BIO 486 is recommended.

BIO 489 | RESEARCH IN FIELD BIOLOGY | 4 quarter hours
(Graduate)
BIO 389/489 is a research-intensive course designed for science majors and graduate students that will focus on developing skills of collaborative field-based research. Throughout the course, students (working in groups of 2 or 3) will utilize the scientific method to develop and carry out an original research project. Students will utilize the primary literature to learn the current state of research in an area that interests them, then use that knowledge to develop a novel question they can test with a field-based experiment. Data collected will be analyzed and results compiled into a publication-quality paper. Students will then present their study to their peers in the form of an oral or poster presentation.

BIO 490 | SPECIAL TOPICS | 4 quarter hours
(Graduate)
Occasional courses offered at the graduate level. See schedule for current offerings.

BIO 491 | MASTER OF ARTS SEMINAR | 4 quarter hours
(Graduate)
A seminar course dealing with current readings in the biological sciences. Students will evaluate and interpret these readings both orally and in writing.

BIO 494 | COMMUNICATING SCIENCE | 4 quarter hours
(Graduate)
Students will refine their oral and written presentation skills using their own research as the subject. The components of an effective research talk, poster presentation, and formal thesis will be examined. Students will have several opportunities to present their research and to receive and participate in peer review. This course is required for second-year Biology MS students.

Status as a graduate Biology student (MA or MS) is a prerequisite for this class.

BIO 495 | INTRODUCTION TO GRADUATE STUDY | 2 quarter hours
(Graduate)
Presenting the biology faculty and facilities. Various research and teaching methods in biology will be explored. Required of all graduate students.

BIO 496 | RESEARCH | 2-8 quarter hours
(Graduate)
Experimental work in selected areas of biology. These studies do not necessarily relate to a thesis. Autumn, Winter, Spring, Summer. Laboratory. Two or four quarter hours.

BIO 498 | RESEARCH FOR MASTER’S THESIS | 2-8 quarter hours
(Graduate)
Original study of a specific biological problem leading to a thesis.

BIO 499 | THESIS RESEARCH | 2-8 quarter hours
(Graduate)
Original study of a specific biological problem leading to a thesis.

BIO 502 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)
Students who have completed their coursework and are actively working on the requirements for the Master’s thesis (MS), or final project (MA), must enroll in candidacy continuation each quarter of the academic year until the Master’s requirement has been completed. This course carries the equivalent of half-time enrollment status. Course requires graduate program director approval and proof of work each quarter. Pass/No Pass grading. (0 credit hours)

BIO 503 | CANDIDACY MAINTENANCE | 0 quarter hours
(Graduate)
This course is meant for Master’s students not actively working on their thesis. It is only used to maintain active student status. It will not give the student full- or half-time enrollment status and will not permit deferment of student loans. Course requires graduate program director approval each quarter. (0 credit hours)

Business Administration (BADM)

BADM 110 | ESSENTIALS OF TRAINING | 2 quarter hours
(Undergraduate)
This is a 5-week, 1-competence course in Employee Training and Development. Students will learn the basic processes of employee training and development, including needs assessment, theories of learning and behavior change, training design to support appropriate selection or development of training, delivery of training, issues of transfer, and assessment of results. (2 quarter hours)
BADM 120 | ESSENTIALS OF COACHING | 2 quarter hours  
(Undergraduate)  
Effective coaching has long been recognized as a key element of success in the world of sports. More recently, a new breed of coaches has emerged to help people transform their personal and professional lives. In this course, we will explore the theories, concepts, and techniques of personal life and business coaching. Students will learn about the history of coaching, its uses in personal and professional development and practical applications. Working individually, in pairs, and in small groups, students will practice coaching skills and keep a detailed learning journal. This course will be highly experiential and collaborative in nature. Students will learn concepts of coaching for personal development and professional effectiveness. In addition, students will learn models of collaborative learning and will apply one recognized model in the exploration of their coaching practice in the course. (2 credit hours)  

BADM 208 | SALES AND MARKETING MANAGEMENT FOR BUSINESS TODAY | 4 quarter hours  
(Undergraduate)  
Sales Management is one of the most important jobs in business today. It is the focal point for managing customer relations, and is critical for sustaining profitability and growth. It draws on a broad spectrum of skills and offers many desirable career paths for both entry level as well as experienced workers. Sales Management techniques are applicable in a wide variety of business settings, and the basic framework and details apply in all of them. The purpose of this course is to present a practical, contemporary framework for Sales Management. It starts with basic sales analysis techniques for determining company position in the market. From there it explores modern sales techniques for facilitating the customer’s buying decision. It then covers the major Sales Management job functions, such as Territory Management and Sales Training. The course concludes with a discussion of leadership and psychological skills that make for Sales Management excellence. Students will learn Sales Management via course lectures, textbook reading, Internet searches and independent research on the company they work for.  

BADM 209 | THE HEART OF THE ENTREPRENEUR | 2 quarter hours  
(Undergraduate)  
Entrepreneurs are an integral part of a thriving economy yet the aspects of successful entrepreneurship remain a mystery. This course takes a detailed look at the characteristics of successful and unsuccessful entrepreneurs, enabling the students to acquire a personal understanding of what it takes to start a new business venture. This course is especially targeted for those interested in starting their own business or aspiring to be an employee within an innovative business. (2 credit hours)  

BADM 214 | ENTREPRENEURIAL ACCOUNTING | 4 quarter hours  
(Undergraduate)  
Entrepreneurial Accounting is a thorough coverage of financial and management accounting topics in an economically challenging business environment. Clear principles and procedures are used to demonstrate the complete accounting cycle in any type of organization: For-Profit or Non-Profit. General purpose financial statements are prepared and examined from a fundamental understanding of how for-profit and non-profit businesses operate in a dynamic and changing business marketplace. Specifically, the reach of this course will be on a global environment that is characterized by a high degree of uncertainty. We will examine a variety of accounting challenges faced by business from an international perspective. This will have important implications on the way a company becomes more competitive and thus profitable. As such each of you will be assigned a company on day one of class to manage through a series of accounting dilemmas often both inside and outside our borders. As you acquire the requisite skills (throughout the term) to meet those challenges you'll execute decisions that will change the management course of the company. It is through this individual decision making that you'll learn what works and what doesn't and why. This is not a static accounting course. Your decisions will have an impact on the direction of the company. We will also cover a series of topics that will enhance your understanding of financing techniques and options through detailed ratio-analysis. This will advance your ability to understand and seek creative financing for any ideas you might have in the future. This is essential if you have that entrepreneurial spark that just needs some financial backing and support to get started. As this is an accounting course we would expect some proficiency in basic quantitative/mathematical ability. You should also be able to use a calculator reasonably well. (4 quarter hours)  

BADM 223 | ACCOUNTING AND FINANCE PRINCIPLES | 4 quarter hours  
(Undergraduate)  
In this course, we will examine the role of accounting and financial management in the preparation, reporting and analysis of financial information. This topic is particularly important in today's economically challenging business world. Accounting and Finance concepts and principles serve as the bookends for our exploration. Clear principles and procedures are used to capture financial data, which can then be used to make economic and financial decisions. Specifically, the objective of this course is to present the fundamentals of accounting and finance to assist the non-accountant in understanding the financial statements of an organization and how financial information can be used in the management planning, control, and decision-making processes of both profit and non-profit seeking enterprises. Accounting is often called the language of business and as such, it is appropriate that as participants in the economic activities of our society we should have enough knowledge of this language to make informed decisions and judgements about our role in these economic activities. We will also cover a series of topics that will enhance your understanding of financial information, financing techniques and options through financial and ratio-analysis. This will advance your ability to understand and make relevant financing and investment decisions or develop viable future business strategies. (4 credit hours)
BADM 224 | ECONOMY, SOCIETY, AND SUSTAINABILITY IN THE 21ST CENTURY | 4 quarter hours
(Undergraduate)
This course targets undergraduate and postgraduate students who want to familiarize with economic principles, but do not intend to major in economics. No prior economic coursework is required. Students learn to develop an understanding of the use of analytical and data-handling tools. At the same time, they benefit from an accessible yet complete primer of economic principles and concepts that are essential to understand economic policymaking and the role of politics, as well as a host of issues facing our societies, such as: economic prosperity and inequality; economic efficiency and fairness in policymaking; institutions, power, and inequality; the labor market and unemployment; production and the market mechanism, etc. The course operates on the premise that the Economy shouldn't constitute the sole focus of public and private decisionmakers, and that equal attention should be devoted to two other essential dimensions of the human condition, Society and the Environment. (4 quarter hours)

BADM 231 | FINANCIAL PLANNING | 4 quarter hours
(Undergraduate)
This course will help students organize their financial lives by learning and implementing selected principles of accounting, finance, and management. The course will address value and risk determination by dealing specifically with the analysis of one’s financial status, goal setting and planning, and decision making. Risk analysis, savings and investment principles, taxes, debt management, retirement, and estate considerations are areas which guide the financial management of individuals and businesses alike. (4 quarter hours)

BADM 239 | BUSINESS, TECHNOLOGY AND OUR GLOBAL FUTURE | 4 quarter hours
(Undergraduate)
Students will study the latest changes in the fields of intercultural communication and leadership development in today's global corporations, including reading interviews from some of the world’s leaders in manufacturing, energy, telecommunications, and health care from 26 countries. This course combines hard science with cutting-edge organizational research-based case studies in today's trans-cultural global corporations. Students study key behaviors needed today to be successful in a global corporation, including cultural self-awareness, frame-shifting, inviting the unknown, third-way solutions, etc. Students will also study how “disruptive technologies”, mobile internet, automation of knowledge work, cloud technology, next generation genomics, 3D printing, advanced materials, and renewable energy are changing and will continue to revolutionize global corporations. This course concludes with an analysis of the effects of social justice and corporate social responsibility on today’s global corporations. (4 quarter hours)

BADM 244 | STATISTICAL REASONING: UNDERSTANDING AND USING STATISTICS | 4 quarter hours
(Undergraduate)
This course will teach students the basic concepts of statistics. Students will investigate topics including descriptive statistics, correlation, normal distributions, probability, sampling distributions and hypothesis testing. By the end of this course, students will be able to complete a statistical analysis of datasets using Microsoft Excel as the primary tool. Considerable time will also be devoted to discussing how statistics are used and abused.
BADM 310 | GENDER IN BUSINESS AND LEADERSHIP | 4 quarter hours (Undergraduate)
Women’s work is never done. Not only are women mothers and wives, but these days the expectation is that women will take on leadership roles outside the home as well. What makes a woman a leader? How did the workplace differ when women were not corporate leaders? Who are today’s prominent female leaders and how are they shaping our future? In this course, learners will study the lives and contributions of various important women from business, politics, and social action. Students will assess equality in management and leadership, the psychological make up of the woman leader, and the ways in which women’s contributions to leadership differ from men’s. Furthermore, the class will endeavor to define leadership, its consequences, and its personal ramifications. Students should expect to read extensively about the lives and characteristics of contemporary women who have surfaced in leadership roles. Learners will also identify women leaders in their own workplaces and communities and assess their involvement in the corporation and/or general public. (4 quarter hours)

BADM 313 | CHANGE MANAGEMENT: THEORY & PRACTICE | 2 quarter hours (Undergraduate)
Change management is a common term for all the processes, skills and practices used to prepare individuals, managers, and leaders to implement organizational changes. Simply put managing change, although difficult, is about the people side of change. Over this 5-weeks course theories, practices, and people management skills that are the foundation of sustainable change will be studied. The course emphasis is on deepening SCPS students’ understanding of the challenges and opportunities associated with being an effective change advocate and creating successful change outcomes. (2 credit hours)

BADM 315 | ECONOMICS FOR DECISION-MAKING | 4 quarter hours (Undergraduate)
The purpose of this course is to provide the modern consumer living in a global economy fueled by unabated technological progress, with basic notions to understand the path that has led to sustained prosperity in the past many decades. The focus is on endowing students, as householders, with conceptual tools to make optimal financial and consumer decisions throughout the lifecycle. That theoretical foundation is reinforced and exemplified with a wealth of practical applications offered through a student-friendly online interactive learning platform, which also provides a convenient means to complete weekly assignments. That online platform will help students relate what they learn to their everyday experience as economic agents. The course is divided into two modules, microeconomic and macroeconomic. The microeconomic module studies the market mechanism. Topics covered include scarcity, opportunity costs, the law of diminishing returns, the trade principle of comparative advantage, the mechanism of the price system, the laws of demand and supply, the impact of market interventions by the government, etc. In the macroeconomic module, topics covered include the workings of the gross domestic product (GDP), of inflation and unemployment, of money and banking, the role of fiscal and monetary policy, etc. The course will visit the relevance of balancing the requirements of economic growth (efficiency in the use of inputs) with the necessity of attending to the needs of both society (need for equity) and the environment (need for sustainability). Students will also discussed at length the economic implications of topics of heightened public interest, such as the Great Recession of 2008-2009 and the coronavirus pandemic that unleashed itself on the world around the onset of the year 2020. Throughout the course, we will refer to the idea that knowledge of economics leads to practical, informed decisions that can help us minimize cost and maximize return and satisfaction as voters and taxpayers participating actively in the economy. (4 credit hours)

BADM 318 | UNDERSTANDING FINANCIAL STATEMENTS | 4 quarter hours (Undergraduate)
Business managers as well as investors must have a basic understanding of financial statements as not only a management tool but also as a way of communicating the financial and operational well-being of a company. This course teaches students the essential elements of financial statements, their interpretation and their impact on investors and society. This is a particularly important topic and skill in light of the recent corporate financial reporting scandals plaguing Wall Street and the nation. (4 quarter hour)

BADM 329 | DATABASE DEVELOPMENT FOR MANAGING INFORMATION | 4 quarter hours (Undergraduate)
Using MS Office tools suite (in particular Access), this course takes students through the entire process for building a database system that will be used to capture, store and present information. In addition to database concepts like designs, reports and SQL queries, the students will discuss and analyze relationships between technology and society.
BADM 330 | LAW IN THE BUSINESS ENVIRONMENT | 4 quarter hours  
(Undergraduate)  
The influence of the law is far-reaching in the corporate world. Whether an entrepreneur, manager, administrative assistant, union employee, nonunion employee, sales representative, purchasing agent, etc., the law ultimately affects how we make decisions in the work arena. This course allows students to discover the wide range of laws affecting America’s business environment. Students will learn how the law is established and developed, and be provided with tools to recognize potential legal issues that arise in daily business operations. The curriculum considers the impact of the law in the global workplace, and in commerce, business operations, employer/employee relationships, and in the regulatory environment.

BADM 334 | HUMAN RESOURCE AND TALENT DEVELOPMENT FUNDAMENTALS FOR MANAGERS | 4 quarter hours  
(Undergraduate)  
This course is designed as an introduction to the practices of human resources (HR) in a corporate environment. It will target the practices that managers need to know such as recruiting, training, hiring, and terminating employees as well as the basics of HR law. Additional content that will be addressed includes headcount management, performance appraisals, learning & development, compensation basics, and grievance processes. This course will equip managers with the information they need to know without making them Human Resource experts but rather how to work effectively with their HR counterparts. (4 hours)

BADM 335 | RISK MANAGEMENT IN THE WORKPLACE | 4 quarter hours  
(Undergraduate)  
This overview course in risk management will introduce managers to the various types of risk that needs to be managed in the workplace. Numerous areas such as operational risk, market risk, global risk, and customer risk will be investigated. While this course is not to create students who will be experts in risk management this course will allow them to identify and analyze areas of potential risk to the assets of their organization. Students will use case studies to ensure that proper communication happens for key risks within the organization. (4 hours)

BADM 340 | IMPLEMENTING CORPORATE TRAINING PROGRAMS | 4 quarter hours  
(Undergraduate)  
In this course, students will learn about the strategic process of effectively and efficiently implementing a corporate training program based on business drivers from design stages through measurement of results. This process includes defining requirements and success criteria, designing the process, implementing and powerfully communicating the program to the learners, and then understanding how to measure the success of the program. It is imperative to measure and report on the trends of the program and to understand why it is important. Using methodology and models that have been successful in numerous global and domestic companies, students in this course will create their own plan for implementation, communication, and measurement to ensure success in their future training program implementations. (4 quarter hours)

BADM 345 | EMOTIONAL INTELLIGENCE AT WORK | 4 quarter hours  
(Undergraduate)  
One's IQ (intelligence quotient) alone does not predict success in the workplace or in life. Emotional intelligence (EI) plays a vital role as well. This course provides an introduction to the field of emotional intelligence, evidence of its impact on individuals and organizations, and strategies for applying it in multiple settings. Participants will deepen their understanding of EI by exploring the research literature and completing an assessment of EI provided by 6 Seconds (http://www.6seconds.org). Strategies for applying EI to increase one’s success and satisfaction at work and in other social contexts will also be explored. There are a several models of emotional intelligence, each with a measure used by individuals to create a profile of EI abilities, used as the basis for learning and development. Some focus more directly on the workplace or on therapeutic settings. The Six Seconds’ model of EI is designed to have broad application and enable individuals to draw on EI across the various dimensions of their lives. (4 credit hours)

BADM 359 | ETHICAL BUSINESS BEHAVIOR | 4 quarter hours  
(Undergraduate)  
Ethical Business Behavior explores the ethical issues that business decision-makers face and examines the moral principles that are used to help resolve these issues. Ethical decisions in the workplace can have tremendous influence on the individuals and the corporations involved. The outcomes of unethical behavior can affect reputations, trust and career path. Results have been as severe as loss of employment, physical harm to individuals, corporate bankruptcy and even impacts to the economy. Students are placed in decision-making roles through exercises, case studies and role-playing. Reasoning skills are honed through identification of ethical issues and alternative means to analyze these issues. Ethical behavior is evaluated using analytical skills to apply ethical concepts to business situations. (4 quarter hours)

Business Law (BLW)

BLW 201 | LEGAL & ETHICAL ASPECTS IN THE BUSINESS ENVIRONMENT | 4 quarter hours  
(Undergraduate)  
Legal and Ethical Aspects in the Business Environment. Study of the nature and philosophy of law including ethical perspectives and fundamental concepts and legal principles of sales contracts, product liability, business organizations, and employment law including ethical and social responsibilities in the managerial process.  
Sophomore standing is a prerequisite for this class.

BLW 202 | COMMERCIAL PAPER AND SALES | 4 quarter hours  
(Undergraduate)  
History of negotiable instruments and sales law from the days of the Law Merchant through Articles II and III of the Uniform Commercial Code; discussions of promissory notes, drafts, sales, bulk sales, and recent trends.  
BLW 201 or ACC 370 is a prerequisite for this class.

BLW 203 | BUSINESS ORGANIZATIONS | 4 quarter hours  
(Undergraduate)  
Types of business organizations; emphasis on Partnership and Corporation. Relations of parties to one another, and to third parties; comparisons between the two types and mechanics of forming and operating each.  
BLW 201 or ACC 370 is a prerequisite for this class.
This course introduces students to the growing role of big data and the quantitative strategies that businesses employ to inform decisions. Students will analyze business cases in which data have helped businesses make better decisions, exposing them to real world applications of analytics. The course will also introduce students to some basic statistical techniques and spreadsheet software, which students will use to analyze specific business problems.

BUS 211 | DEVELOPING AN ENTREPRENEURIAL MINDSET | 4 quarter hours
(Undergraduate)
Learn the fundamentals of the entrepreneurial process from the discovery of an opportunity to the development and launch of a new solution.
Explore entrepreneurial firms, business trends, market and industry analysis, business models, growth strategies, financing new ventures, and presenting a solution. Interactive assignments will allow students to gain an appreciation for the entrepreneurial mindset.
Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

BUS 212 | MARKETING, CONSUMER BEHAVIOR & YOU | 4 quarter hours
(Undergraduate)
Explore the exciting world of marketing to learn how product, price, distribution, and promotions are integrated to build brands. Gain a greater understanding of positioning, market segmentation, the sales process, decision making and marketing plan development. Conduct an in-depth study of the meaning of marketing in everyday life. Interactive discussions encourage the examination of constantly evolving marketing tools and the wide variety of employment opportunities in the industry.
Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

BUS 213 | ECONOMICS FOR EVERYBODY | 4 quarter hours
(Undergraduate)
Explore the beauty and usefulness of economics and learn the economic way of thinking by studying cases and real-world examples that teach you the basic tools of economics. Use economic thinking for decision-making in business and life, and learn how economics can help us make the world a better place.
Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

BUS 214 | MAKING FINANCIAL DECISIONS | 4 quarter hours
(Undergraduate)
Uniting essential elements of accounting and finance, learn how to use financial information to make critical business decisions. Develop an understanding of financial statements and use this information in the decision making process. Learn how to analyze corporate performance, find efficiencies and determine an organization’s worth.
Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

BUS 215 | BIG DATA STORYTELLING | 4 quarter hours
(Undergraduate)
In the world of Big Data, data visualization tools are essential for analyzing large amounts of information. Create effective visuals to focus attention on trends, outliers, and patterns for data-driven decision-making in the business world. Interactive student assignments focus on best practices and explore personal style to create engaging, informative, and compelling visual stories in business. Explore industry trends and employment opportunities using data visualization in the global marketplace.
Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

Business Studies (BUS)

BUS 102 | BUSINESS ANALYTICS | 4 quarter hours
(Undergraduate)
This course introduces students to the growing role of big data and the quantitative strategies that businesses employ to inform decisions. Students will analyze business cases in which data have helped businesses make better decisions, exposing them to real world applications of analytics. The course will also introduce students to some basic statistical techniques and spreadsheet software, which students will use to analyze specific business problems.
Catholic Studies (CTH)

CTH 110 | THE CHRISTIAN EXPERIENCE | 4 quarter hours (Undergraduate)
An introductory course surveying the range of traditions that have emerged within the Christian movement, and offering an historical perspective on the life and thought of Christian communities, and their prospects for the future. Cross-listed as REL 110.

CTH 180 | INTRODUCTION TO CATHOLICISM | 4 quarter hours (Undergraduate)
An examination of the breadth of the Catholic experience from a 1st-century Jewish religious movement to a 21st-century global religion.

CTH 181 | INTRODUCTION TO WORLD CATHOLICISM | 4 quarter hours (Undergraduate)
This course examines the Roman Catholic tradition in its global dimensions, specifically the implications of the shift of the majority of Catholics from the global North to the global South—Africa, Asia, and Latin America—over the course of the twentieth century. The course explores such themes as the expansion of Catholicism in Africa and Asia, the decline of Catholicism in Latin America, European missionary movements in the South, the adaptation of Catholicism to African and Asian and Latin American cultures, Catholic politics in the South, and different images of Christ in poor countries. This course will adopt a multidisciplinary approach to these questions, using history, theology, literature, sociology, and art.

CTH 182 | THE LATINO RELIGIOUS EXPERIENCE IN THE UNITED STATES | 4 quarter hours (Undergraduate)
An examination of the diverse nature of Latino religion, from its indigenous roots to its institutional forms, within the social and political context of American culture. Cross-listed with REL 113.

CTH 183 | THEMES IN CATHOLIC SOCIAL THOUGHT | 4 quarter hours (Undergraduate)
An initial, systematic examination of major themes in modern Catholic social thought. Cross-listed as CTH 183.

CTH 190 | METHODS OF BIBLICAL INTERPRETATION | 4 quarter hours (Undergraduate)
This course will survey methods of biblical interpretation. Literary, historical, cultural, and theological methodologies will be studied and applied to Old and New Testament texts.

CTH 202 | CATHOLICS AND SCRIPTURE | 4 quarter hours (Undergraduate)
This course serves as an introduction to the content of the Old and New Testaments and to Catholic ways of reading Scripture. The course will cover, for example, passages from Genesis, Exodus, the historical writings, the prophets, the Gospels, and the letters of Paul. The course will also treat questions of canon, interpretation, and the relation of Scripture to tradition. Formerly CTH/REL 190 Catholicism and Biblical Interpretation/Interpreting Sacred Texts.

CTH 203 | WHAT CATHOLICS BELIEVE | 4 quarter hours (Undergraduate)
This course will cover the basic elements of Catholic belief, following the pattern of the Nicene Creed. The course will deal with God, Jesus Christ, salvation, the Holy Spirit, the Church, sacraments, and the afterlife, as these ideas have been discussed and debated in classical, modern, and contemporary periods.

CTH 205 | CATHOLICISM IN WORLD HISTORY I: JESUS TO 1500 | 4 quarter hours (Undergraduate)
A study of the development of the Catholic Church from the time of Jesus to the Renaissance. Religious movements, piety and art as well as theology and ecclesiastical history will be examined. Cross-listed as REL 213 and HST 261.

CTH 206 | CATHOLICISM IN WORLD HISTORY II: MODERN & POST-MODERN TIMES | 4 quarter hours (Undergraduate)
A study of the development of Catholicism since 1500 exploring the Catholic Reformation, Catholicism’s encounter with the Enlightenment, the missionary movement and the Catholic Church in the United States. Cross-listed with REL 214 and HST 262.

CTH 209 | THEORIES OF THE CHURCH: CONCEPTS AND CONTROVERSIES | 4 quarter hours (Undergraduate)
Introduction to several ecclesiologies that co-exist in Catholicism. Both historical and contemporary ecclesiologies will be considered. Cross-listed as PSC 335.

CTH 210 | CATHOLIC SOCIAL TEACHING | 4 quarter hours (Undergraduate)
The Catholic Church is perhaps the largest provider of health care in the world. From sophisticated Catholic hospital systems to small rural clinics, the Church continues the legacy of healing begun by Jesus. This course will study global healthcare as an essential dimension of Catholic Social teaching. The course will study different models of healthcare services being provided by the Catholic Church in different parts of the world. It will focus particularly on ethical and socio-cultural analysis of the option for the poor as a main thrust of Catholic social teaching vis-a-vis the preferential option which diseases make for the poor. The course will ask the question: Why are the poor and the marginalized the most vulnerable and susceptible to diseases and are the Catholic healthcare agencies meeting this challenge in different parts of the world? The case studies for this course will be based on the work of Catholic hospitals and faith-based healthcare agencies fighting infectious diseases like Coronavirus, Ebola, and HIV/AIDS and infant mortality and maternal mortality among the poor in non-Western societies. The course will also look at best practices on how the healthcare needs of refugees and migrants are being supported particularly during humanitarian crisis.

CTH 212 | ANCIENT ISRAEL: HISTORY, LITERATURE AND RELIGION | 4 quarter hours (Undergraduate)
The development of Judaism from Moses to the Rabbinic era with special attention to social and historical questions. Cross-listed with REL 232.

CTH 213 | THE NEW TESTAMENT | 4 quarter hours (Undergraduate)
A critical investigation of the New Testament. Topics include the earliest Christian writings (letters of Paul), the production of “gospels” about Jesus, and the development of early churches in the context of ancient history and society. Cross-listed with REL 233.

CTH 214 | THE HISTORICAL JESUS | 4 quarter hours (Undergraduate)
An investigation of the early Christian Gospels and other sources for reconstructing the life of Jesus of Nazareth. The relation of historical reconstruction and religious interpretation, and the significance of conflicting interpretations of Jesus, will also be considered. Cross-listed as REL 238.
CATHOLIC STUDIES (CTH)

CTH 215 | VARIETIES OF EARLY CHRISTIANITY | 4 quarter hours (Undergraduate)
An examination of multicultural diversity in early Christianity through a study of materials excluded from the New Testament canon; Christian apologists defending the church against pagan intellectuals and Roman imperial magistrates; comparisons of early Christian fiction and ancient Greek novels; and an examination of Gnostic writings. Cross-listed as REL 234.

CTH 216 | PAUL AND HIS INFLUENCE IN EARLY CHRISTIANITY | 4 quarter hours (Undergraduate)
A critical study of Paul's literary remains as primary sources for reconstructing the development of the Christian movement, focusing on Paul's communities, ethics and theology. Early interpretations and assessments of Paul will also be considered. Cross-listed as REL 235.

CTH 218 | THE BIBLE AS LITERATURE | 4 quarter hours (Undergraduate)
This course is an introduction to the major stories and literary genres of the Bible, e.g. myths, poems, parables, gospels, letters.

CTH 220 | EARLY CATHOLIC HISTORY: ORIGINS AND EXPANSION | 4 quarter hours (Undergraduate)
This course is an introduction to the history of the Catholic Church and the evolution of Christian thought and practices, from the early Church to the thirteenth century. The course will cover the emergence of Christian communities throughout the Near East, Europe, Asia, and North Africa, and study these communities in their cultural, social, and political contexts through foundational texts and works of art. Main topics: The Early Church; Councils and Heresies; Missions in Northern Europe; Charlemagne, Carolingians and a new Roman Empire; Monasticism; Eastern Orthodoxy; Christianity and Islam (the Age of the Crusades); the Mystical Tradition; the Investiture Controversy. Cross-listed with REL 206 and HST 218.

CTH 221 | CATHOLIC HISTORY MEDIEVAL TO MODERN: REFORM AND REVOLUTION | 4 quarter hours (Undergraduate)
This course provides an overview of the history of Catholicism and its interactions with political and social history from 1200 to the French Revolution. The main topics of the class are the origin of the Universities and Scholasticism; St. Francis and St. Dominic and their impact on Medieval Society; the Challenges to Papal Monarchy; Humanism and Erasmus; the impact of the Reformation; the Council of Trent; the geographic discoveries of the New World; the Enlightenment and the Scientific Revolution; the Catholic Church and the French Revolution. Cross-listed with REL 207 and HST 219.

CTH 222 | CATHOLICISM IN THE MODERN AGE: SECULAR AND SACRED | 4 quarter hours (Undergraduate)
This course will offer a survey of the political, cultural and intellectual history of the Catholic Church from 1789 through the early twenty-first century. It will include discussions of the Catholic Church in relation to the French Revolution; the Catholic Church and the formation of modern nation-states (including, inter alia, the unification of Italy and the German Kulturkampf); the relation between the Church and Liberalism; intellectual movements like theological Modernism and ressourcement theology; the First Vatican Council; the Church, Fascism and Communism; the Second Vatican Council; the Emergence of a Global Church, Latin American Liberation Theology, and more. Cross-listed with REL 208 and HST 220.

CTH 223 | THE SECOND VATICAN COUNCIL | 4 quarter hours (Undergraduate)
A detailed exploration of the history, issues, personalities, theologies and results of Vatican II studied against the backdrop of modernity and post-modernity.

CTH 226 | ROMAN CATHOLIC SPIRITUAL LITERATURE | 4 quarter hours (Undergraduate)
A study of the foundational religious experiences that underlie the Roman Catholic tradition, of the narratives they generate, and of their representations in various media such as poetry, music, myths, sacred legends and apologetic stories.

CTH 228 | MEDIEVAL MYSTICS IN EUROPE: 1000-1600 A.D. | 4 quarter hours (Undergraduate)
The evolution of theories and experiences of human union with God, and of varied Christian spiritual paths and practices as described in mystical literature, saint's lives, religious art and music. Emphasis on the monastic, urban and courtly institutional context of the documents. Cross-listed with HST 213.

CTH 229 | CATHOLICISM AS A SPIRITUAL PATH | 4 quarter hours (Undergraduate)
An experience-centered study of the relationship between contemplation and action, prayer and service, liturgy and social justice, personal religious experience and the wider experience of Catholics. Both historical as well as contemporary spiritualities will be explored. Cross-listed as REL 284.

CTH 230 | THINKING ABOUT GOD | 4 quarter hours (Undergraduate)
This course centers on the question of the relationship between reason and faith, between as it were "thinking" and "God." According to the Catholic tradition, reason's search for wisdom initiated by such classical thinkers as Plato and Aristotle is fulfilled in Christian faith. As such, it regards philosophy "as a mode of reflection that holds God as the source of all being and action and brings multiple disciplines together into a lived synthesis" (Vision Statement, Department of Catholic Studies). This holistic vision entails theses regarding the character of reason as open to theology and faith as an extension of reason. It entails the Christian doctrines of the Logos, the Trinity, revelation, and sin. It requires careful considerations of the human person's powers of intellect and will. It extends to considerations of the relationship between the theological virtues of faith, hope, and charity that in turn extend to all of the moral life. And it must offer an account of reasonableness that begins to answer the challenges of Nominalism, the Reformation, the Enlightenment, and postmodernity. Possible topics of a more interdisciplinary nature include the public/private distinction, the compatibility of science and religion, and the validity of truth claims in a pluralistic world.

CTH 231 | ROMAN CATHOLIC LITURGY | 4 quarter hours (Undergraduate)
A study of the emergence, meaning and dynamics of community, and of the interaction between community and ritual in the Roman Catholic tradition. Cross-listed as REL 281.
CTH 233 | LA MORENITA DE CHICAGO: FAITH, CULTURE AND IDENTITY IN MEXICAN CATHOLICISM | 4 quarter hours
(Undergraduate)
The course will enable the students to "read" the image of Our Lady of Guadalupe in distinct contexts, especially in the light of the struggle of the Mexican Catholic community in Chicago and will allow them to think and write about the image of la Morenita de Chicago (an affectionate term used by Mexican-Americans to refer to the image that literally translates as "the brown-skinned woman of Chicago"). The learning process will lead to an integration of varied personal experiences, guided theological reflection, and the common study of history, art, culture, and politics.

CTH 238 | ANCIENT PHILOSOPHY | 4 quarter hours
(Undergraduate)
A study of selected thinkers and issues from ancient Greece. Cross-listed with PHL 293.

CTH 239 | MEDIEVAL PHILOSOPHY | 4 quarter hours
(Undergraduate)
A study of selected thinkers and issues from the Medieval period. Cross-listed as PHL 294.

CTH 240 | TOPICS IN CATHOLIC THOUGHT | 4 quarter hours
(Undergraduate)
A study of selected topics and controversies.

CTH 241 | VIRTUE ETHICS | 4 quarter hours
(Undergraduate)
The intellectual framework for this course is a rich strand in the Catholic moral tradition called virtue ethics. Virtue ethics begins with the universal human question: how can I be happy? Its answer is in part the diverse activities that make up happiness called virtues. This course focuses on primary sources.

CTH 243 | ROMAN CATHOLIC THEOLOGICAL THINKING | 4 quarter hours
(Undergraduate)
A study of the Roman Catholic tradition of "faith seeking understanding" examining the content and the process of emergence of Catholic beliefs about such matters as God, sin, Jesus Christ, revelation, the church and eschatology. Cross-listed with REL 280.

CTH 244 | DEBATES ABOUT GOD | 4 quarter hours
(Undergraduate)
A study of classical and contemporary arguments regarding the existence and meaning of "God" as developed in a variety of theistic traditions. Cross-listed as REL 200.

CTH 246 | INTRODUCTION TO CHRISTIAN ETHICS | 4 quarter hours
(Undergraduate)
This course is an introductory study of the basic themes of Christian ethics. Particular attention will be paid to the Roman Catholic moral tradition, including such topics as the virtues, the natural law, moral decision-making and narrative. Cross-listed as REL 201.

CTH 247 | ROMAN CATHOLIC SOCIAL THOUGHT IN CONTEXT | 4 quarter hours
(Undergraduate)
A study of Roman Catholicism's understanding of its relation to the social world, including such matters as the relation between Church and state, and the moral authority of the Church, and of its teaching on such issues as social ethics, politics and economics. Cross-listed with REL 283.

CTH 248 | CONTEMPORARY MORAL ISSUES | 4 quarter hours
(Undergraduate)
A study of the relations between religious beliefs and moral action to be carried out through an examination of the ethical and moral response of Catholicism to selected moral issues such as war and peace, sexual behavior, etc.

CTH 249 | NATURE, COSMOS AND GOD: CATHOLICISM AND SCIENCE | 4 quarter hours
(Undergraduate)
A constructive correlation of Catholic thought and contemporary scientific theory about the origins and development of the universe. Modern and contemporary cosmologies will be put into dialogue with Christology, Trinity and Incarnation. A particular concern will be today's environmental crisis and an authentically Christian response.

CTH 250 | ART IN THE SPANISH AMERICAN EMPIRE | 4 quarter hours
(Undergraduate)
This course offers a critical survey of the art of colonial Latin America (circa 1520s-1820s), from the Caribbean to Mexico, Central America, and South America. Framed by the Spanish Conquest of the 16th century and independence in the early 19th century, lectures will survey state-sanctioned arts of the Iberian colonizers, including the foundations of the Catholic Church across the "New World" landscape. Race will be a frequent issue of discussion as we consider both indigenous American and African participation in social realities and artistic practice in this colonial context. Cross-listed with HAA 246 and LST 246.

CTH 251 | CATHOLIC THEMES IN CONTEMPORARY CINEMA | 4 quarter hours
(Undergraduate)
This course will explore and examine the interaction of Catholic themes, symbols, and images through Hollywood and foreign films. Students are required to analyze films outside of class, give oral presentations, and compose papers on selected films. Cross-listed with HAA 319.

CTH 252 | BYZANTINE ART | 4 quarter hours
(Undergraduate)
This course will explore the art of the Byzantine Empire from the founding of Constantinople in A.D. 330 to the fall of the city to the Ottomans in 1453. Lectures and readings will primarily focus on how contemporaries understood and interacted with a diverse group of monuments and objects now classified as Byzantine art. Significant attention will be devoted to how works of art functioned in the service of imperial and ecclesiastical ideology. Discussions will analyze how Byzantine art was appreciated and appropriated in both the medieval Mediterranean and in modern scholarship. Cross-listed with HAA 234.

CTH 253 | CONQUEST AND CONVERSION: THE ART OF THE EARLY MIDDLE AGES | 4 quarter hours
(Undergraduate)
This course explores the art of the Medieval period from a broad range of cultures: Early Christian, Byzantine, Islamic, Carolingian, and Ottonian. We will discuss major stylistic trends and explore the relationship between art, culture, and religion. Works of art will be evaluated in terms of their social functions in the societies that produced them and our analysis will incorporate the perspectives of both the producers (patrons, artists) and consumers of art. Cross-listed as HAA 231.
CTH 254 | THE AGE OF CATHEDRALS: THE ART OF THE LATER MIDDLE AGES | 4 quarter hours (Undergraduate)
This course will explore the art of the late Medieval period from a broad range of cultures and styles: Byzantine, Romanesque, Gothic, and Islamic. We will discuss major stylistic trends and explore the relationship between art, culture, and religion. Works of art will be evaluated in terms of their social functions in the societies that produced them and our analysis will incorporate the perspectives of both the producers (patrons, artists) and consumers of art. Cross-listed as HAA 232.

CTH 255 | ANCIENT AND MEDIEVAL ART | 4 quarter hours (Undergraduate)
A survey of the principal works of architecture, sculpture, painting and the industrial arts created in the Mediterranean basin and in Europe from the Byzantine through the Gothic age.

CTH 256 | ITALIAN RENAISSANCE ART | 4 quarter hours (Undergraduate)
This course provides an overview of the history of Italian Renaissance art and architecture in Italy's primary centers of artistic production. Cross-listed as HAA 237.

CTH 257 | BAROQUE ART | 4 quarter hours (Undergraduate)
Starting in 1600, from the vantage point of the Counter-Reformation and the rise of modern European states, Baroque Art covers the principal works of art & architecture; artists and patrons; and a wide sweep of social, religious, and political, conditions that impacted cultural thinking and production in the 17th century. Attention is focused on the most prominent artistic centers in Italy, the Spanish Netherlands, England, Spain, the Dutch Republic, and France. The in-class lectures with discussion are accompanied by field work to the Baroque collections of the Art Institute of Chicago. Cross-listed as HAA 238.

CTH 258 | NORTHERN RENAISSANCE ART | 4 quarter hours (Undergraduate)
This course features the most significant works of art, their artists & patrons, the social and economic aspects of artistic production, and the dominant cultural issues that flowed brilliantly in Northern Europe - above all, in France, the Netherlands, Bohemia, and German-speaking lands - between 1300 and 1600, during the volatile period of the Renaissance and the outbreak of the Protestant Reformation. Although Flemish oil painting offers the most evident legacy of the Northern Renaissance to the casual museum visitor, this course also introduces the most important outputs in printmaking, sculpture, and the industrial arts, as in tapestry weaving and the fabrication of luxury articles in metalwork. Cross-listed with HAA 236.

CTH 260 | ART, LITURGY AND LIFE | 4 quarter hours (Undergraduate)
This class examines how beauty and its antithesis, ugliness, permeate Catholic life and thought. Students will be introduced to the topic by considering examples from a variety of media, including ritual, painting, sculpture, architecture, crafts, and mural art. The students will learn not only how works of art accompany the performance and celebration of worship but also how Christians have learned to discern the living presence of the incarnate form of the divine Word within both art and liturgy. This course will demonstrate with concrete examples how art in Catholicism is the nexus that joins spirituality and liturgy. Theoretical orientation can be gleaned from the Christian theological tradition (St. Augustine, Hans Urs von Balthasar), Christian aesthetic theory (Jacques Maritain, Flannery O'Connor, Walker Percy, or Alejandro Garcia Rivera), liturgical reformers (Odo Cassel, Louis Bouyer, or Virgil Michel), or the document of Vatican II on liturgy, namely, Sacrosanctum Concilium.

CTH 261 | CATHOLIC FAITH AND MUSICAL EXPRESSION | 4 quarter hours (Undergraduate)
An investigation of the relationship between Catholic life and music. The development of Catholic service music (masses, canticles, hymns, motets, etc.) as well as religious choral works may be studied.

CTH 264 | CATHOLICISM AND LITERATURE | 4 quarter hours (Undergraduate)
Christianity claims that the Word of God became flesh in a human being. It also claims that the story of this human being is found in a book, and that a specific community has protected the proper interpretation of this book. Whatever else Christianity is, it is a history of people telling stories. In this course, we will examine six different genres that Christians have used to tell their story. These are: criticism, gospel, poem, memoir, novel, and short story. The course will introduce students both to different types of literary genres and to essential ideas in Christian theology. These ideas include: prayer, conversion, sacraments, and the like.

CTH 265 | LITERATURE AND THE SACRED | 4 quarter hours (Undergraduate)
How human beings across cultures express their intimations of ultimate meaning in a variety of genres ranging from aphorisms and autobiographies to mythic and fictional narratives. Cross-listed with REL 223.

CTH 266 | CONTEMPORARY SPIRITUAL MEMOIRS | 4 quarter hours (Undergraduate)
Religious faith is not simply a matter of doctrine or abstract ideas. It is a way of life. In this course, we will examine how five authors describe their own faith – its joys, its struggles, and how it shapes their own lives. We will read selections from memoirs by Thomas Merton, Flannery O'Connor, Kaya Oakes, Amy Andrews and Jessica Griffith, and Richard Rodriguez.

CTH 270 | JESUS ACROSS CULTURES | 4 quarter hours (Undergraduate)
A study of the multiple and diverse (primarily theological, but also literary, artistic and philosophical) historical and contemporary images of Jesus, as a way of understanding the diversity of the Christian tradition and its impacts on society, and of understanding the issue of plurality or diversity itself in religious traditions. Cross-listed with REL 273.

CTH 271 | ROMAN CATHOLICISM’S ENCOUNTER WITH OTHER RELIGIONS | 4 quarter hours (Undergraduate)
A study of how Roman Catholicism understands and responds to other religious traditions, other ways of being religious, and how the encounter with those other traditions affects Roman Catholicism’s understanding of itself and its teachings. Cross-listed with REL 285.

CTH 273 | HISTORY OF THE CATHOLIC CHURCH IN THE U.S. | 4 quarter hours (Undergraduate)
This course traces the developments of the Catholic Church from the missionary enterprise to the position of a major social, political and economic institution. The course will examine the manner in which the hierarchical institution of the Catholic Church has related to the Liberal ideal of American Democracy. Cross-listed with HST 243.
CTH 274 | IRELAND: RELIGION AND THE CONTEMPORARY "TROUBLES" | 4 quarter hours
(Undergraduate)
An examination of the role of two Christian denominations (Protestant and Roman Catholic) in the more recent "Troubles" in the north of Ireland. Attempts to discover the contributions of religious differences in fueling and resolving the animosities between the Unionist and Republican sides; studies the social-historical dimension of the troubles and the Protestant and Catholic religious activities and official responses to them. Cross-listed with IRE 103.

CTH 275 | MEDIEVAL PEOPLE: 400 TO 1400 A.D. | 4 quarter hours
(Undergraduate)
The important components of European society during the Middle Ages, including rulers, knights, and peasants, churchmen and nuns, urban merchants, intellectuals, and artisans. Who were these Medieval people, what differentiated them, how did they interact with each other, and how and why did these interactions change over time? Cross-listed with HST 171.

CTH 276 | CATHOLICISM IN AFRICA | 4 quarter hours
(Undergraduate)
This course will study African Catholicism: (1) as a religious heritage dating back to the first century, reaching its climax in the conquest of Alexandria and the entrenchment of the Roman Empire in Africa; (2) as a cross-cultural and socio-political movement which has affected and changed Africa through the Trans-Atlantic Slave Trade, Colonialism, Western Missionary activities in Africa, Western education and the integration of Africa into global Christianity and World Catholicism; (3) as an unique and contemporary African Christian religious movement with her own identity, mission, and character which is redefining the future of Christianity beyond the African continent. Key themes: African church history, African spirituality, African Traditional Religions and cultures, African ecology, church and development in Africa, biblical and Pentecostal movements in Africa; religion and peace, religion and social transformation in Africa.

CTH 277 | CATHOLICISM AND THE FAMILY | 4 quarter hours
(Undergraduate)
An historical and theological study of the family in Catholic life and thought. Images of family life in contemporary film and literature will be given special consideration.

CTH 278 | RELIGION AND EDUCATION IN WESTERN culture | 4 quarter hours
(Undergraduate)
A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

CTH 279 | GOD, JUSTICE AND REDEMPTIVE ACTION | 4 quarter hours
(Undergraduate)
A practicum and seminar combining student participation in social outreach programs with an examination of the theological and ethical issues raised therein. Students will volunteer at a field site for the quarter.

CTH 280 | RELIGION AND EDUCATION IN WESTERN CULTURE | 4 quarter hours
(Undergraduate)
A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

CTH 281 | RELIGION AND EDUCATION IN WESTERN CULTURE | 4 quarter hours
(Undergraduate)
A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

CTH 282 | GOD, JUSTICE AND REDEMPTIVE ACTION | 4 quarter hours
(Undergraduate)
A practicum and seminar combining student participation in social outreach programs with an examination of the theological and ethical issues raised therein. Students will volunteer at a field site for the quarter.

CTH 283 | RELIGION AND EDUCATION IN WESTERN CULTURE | 4 quarter hours
(Undergraduate)
A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

CTH 284 | RELIGION AND EDUCATION IN WESTERN CULTURE | 4 quarter hours
(Undergraduate)
A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

CTH 285 | RELIGION AND EDUCATION IN WESTERN CULTURE | 4 quarter hours
(Undergraduate)
A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

CTH 286 | RELIGION AND EDUCATION IN WESTERN CULTURE | 4 quarter hours
(Undergraduate)
A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

CTH 287 | RELIGION AND EDUCATION IN WESTERN CULTURE | 4 quarter hours
(Undergraduate)
A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

CTH 288 | IRELAND, 1450-1800, CONQUEST, COLONIZATION & REBELLION | 4 quarter hours
(Undergraduate)
This course offers a survey of Irish history from the end of the middle ages to the union of Ireland and Great Britain in 1800. It traces the ways in which Ireland was brought under great English (later British) control through processes of agreement, conquest and colonization; and the ways in which various groups within Ireland sought to resist such developments. Cross-listed with HST 266 and IRE 101.

CTH 289 | IRELAND, 1800 - 2000 | 4 quarter hours
(Undergraduate)
Survey of Irish history from 1800 to 2000. Examines the course of Irish history from the Act of Union (creating the United Kingdom), through the struggles and reforms of the 19th century (Catholic Emancipation, the Famine and Irish diaspora, Fenianism, Land Reform and Home Rule), to the creation of the modern nation-state of the 20th century (the Easter Rising, partition and civil war, the role of Eamon deValera, the Republic, and the Troubles). Topics include the contributions of Irish culture and its influence in Europe and the world. Cross-listed with HST 268 and IRE 102.

CTH 290 | THE LIFE AND TIMES OF VINCENT DE PAUL | 4 quarter hours
(Undergraduate)
A study of Vincent de Paul in his cultural and religious context.

CTH 291 | WOMEN AND SAINT VINCENT DE PAUL | 4 quarter hours
(Undergraduate)
The changing roles of women in 17th century France, the importance of women in Vincent de Paul's life, the key relationships of Vincent with Madame de Gondi, Jane de Chantel and Louise de Marillac will be studied in depth. The flowering of Vincent's new conception of possibilities for women in the Ladies of Charity, the Daughters of Charity and other groups of women will be explored.

CTH 292 | NOTABLE VINCENTIAN WOMEN | 4 quarter hours
(Undergraduate)
An historical study of the Vincentian charism and how notable women embraced the Vincentian mission in roles of service as wives, mothers, widows, educators, nurses, spiritual leaders, and advocates for those who are poor. Among such women are Louise de Marillac, Elizabeth Bayley Seton, Rosalie Rendu, etc.

CTH 293 | THE ART OF CRUSADING | 4 quarter hours
(Undergraduate)
This course focuses on the Crusades. More specifically, it focuses on the world within which the Crusades were born and the Levantine kingdom built as a result of their initial success. Our study will depend on primary artistic, literary, and archaeological materials, as well as the secondary scholarship that has identified and interpreted these materials. Our understanding of this historical moment will be nuanced by the questions we ask of both. The payoff will be an appreciation for the religious, social, political, and artistic forces that defined the twelfth and thirteenth centuries in Europe and in the Mediterranean basin, leading as they did to such fascinating phenomena as pilgrimage, the cult of relics, chivalry, holy war, the rise of military orders, and the establishment of the Latin Kingdom of Jerusalem itself. Cross-listed with HAA 233 and HST 211.
CATHOLICISM | 4 quarter hours
CTH 295 | OZANAM: A VINCENTIAN LIFE | 4 quarter hours
(Undergraduate)
Catholics have an outstanding experience of social justice and action. For years they have advocated for a fairer economy and reduction of inequalities. In the context of Covid-19 crisis, Pope Francis called again for solidarity and debt relief for poor nations (April 2020). Lay and religious Vincentians have actively contributed to this reflection. Frederic Ozanam (1813-1853) is one of the most famous. Romantic, writer, historian and economist, politician, journalist, traveler, warm friend, passionately in love of his family, he founded the Society of St. Vincent de Paul when he was a student. It is now a charity of 800,000 members in one hundred countries, including the USA. This course will explore the brief but rich life of a man who faced a divided society, and look at how his legacy is relevant for us. It will encourage students to look for parallels between past and present situations, to discover other Vincentians (men and women) and practices oriented to social justice and action. The course is based on lectures, readings, videos, Vincentian materials, interviews, and presentations.

CATHOLICISM | 4 quarter hours
CTH 336 | THEORIES OF INTERPRETATION | 4 quarter hours
(Undergraduate)
 Philosophical hermeneutics and biblical interpretation. Cross-listed with PHL 355.

CATHOLICISM | 4 quarter hours
CTH 337 | GREEK AND MEDIEVAL THOUGHT | 4 quarter hours
(Undergraduate)
 A study of selected thinkers and issues from the ancient Greek and Medieval periods.

CATHOLICISM | 4 quarter hours
CTH 338 | EARLY MODERN PHILOSOPHY | 4 quarter hours
(Undergraduate)
 A study of some of the main philosophers and philosophical movements from the 17th to the 19th centuries. Cross-listed as PHL 295.

CATHOLICISM | 4 quarter hours
CTH 339 | PHILOSOPHY SINCE KANT | 4 quarter hours
(Undergraduate)
 A study of some of the most influential thinkers of the last 150 years. PHL 100 or HON 105 is a prerequisite for this course.

CATHOLICISM | 4 quarter hours
CTH 341 | LIBERATION THEOLOGY: THEORY AND PRACTICE | 4 quarter hours
(Undergraduate)
 Focuses upon the ideas and practices of a radical movement for the transformation of Christianity and for social justice that originated in the “Basic Christian Communities” of Latin America and spread from there to North America and the Third World. Cross-listed as REL 351 and PAX 331.

CATHOLICISM | 4 quarter hours
CTH 350 | LOVE IN THE CHRISTIAN TRADITION | 4 quarter hours
(Undergraduate)
 Christians claim that “God is love” (1 John 4:8). In this course, we will examine representative texts in the Christian tradition that try to understand what it could mean to say that God is love. We will read texts from the Bible through the early, medieval, modern, and contemporary Church. These texts will include works of theology, philosophy, and literature.

CATHOLICISM | 4 quarter hours
CTH 354 | SPECIAL TOPICS IN CATHOLIC THOUGHT | 4 quarter hours
(Undergraduate)
 Special topics in Catholic Thought; see schedule for current offerings.

CATHOLICISM | 4 quarter hours
CTH 369 | SPECIAL TOPICS IN THE ART, MUSIC AND LITERATURE OF CATHOLICISM | 4 quarter hours
(Undergraduate)
 Special topics in the Art, Music and Literature of Catholicism; see schedule for current offerings.

CATHOLICISM | 4 quarter hours
CTH 383 | GOD, JUSTICE AND REDEMPTIVE ACTION I | 2 quarter hours
(Undergraduate)
 A practicum and seminar combining student participation in social outreach programs with an examination of the theological and ethical issues raised therein. Students will volunteer at a field site for the quarter.

CATHOLICISM | 4 quarter hours
CTH 384 | THE CULTURE OF AMERICAN CATHOLICS | 4 quarter hours
(Undergraduate)
 A sociological and historical investigation of the culture of American Catholics, with special attention to the literary works of contemporary American Catholic writers including Flannery O’Connor, Mary Gordon and Walker Percy. Cross-listed with REL 384 and MLS 464.

CATHOLICISM | 4 quarter hours
CTH 385 | THE CATHOLIC CHURCH IN WORLD POLITICS | 4 quarter hours
(Undergraduate)
 Catholicism as it affects (and is affected by) world politics. Various topics might include war and peace, global economy, immigration, nationalism, etc. Cross-listed with PSC 345.

CATHOLICISM | 4 quarter hours
CTH 386 | SPECIAL TOPICS IN THE SOCIAL DIMENSION OF CATHOLICISM | 4 quarter hours
(Graduate)
 SPECIAL TOPICS IN THE SOCIAL DIMENSION OF CATHOLICISM.

CATHOLICISM | 4 quarter hours
CTH 389 | THE CULTURE OF AMERICAN CATHOLICS | 4 quarter hours
(Undergraduate)
 A practicum and seminar combining student participation in social outreach programs with an examination of the theological and ethical issues raised therein. Students will volunteer at a field site for the quarter.

CATHOLICISM | 4 quarter hours
CTH 391 | VINCENT DEPAUL: THE MAN AND THE SAINT | 4 quarter hours
(Undergraduate)
 In this course, students will study St. Vincent de Paul in his cultural and religious context, including a trip to Vincentian locations in France. Students will reflect upon their time abroad, linking their experiential activity to a detailed academic exploration of St. Vincent’s life.

CATHOLICISM | 4 quarter hours
CTH 392 | GOD, JUSTICE AND REDEMPTIVE ACTION II | 2 quarter hours
(Undergraduate)
 A practicum and seminar combining student participation in social outreach programs with an examination of the theological and ethical issues raised therein. Students will volunteer at a field site for the quarter.

CATHOLICISM | 4 quarter hours
CTH 393 | SENIOR SEMINAR | 4 quarter hours
(Graduate)
 SENIOR SEMINAR.

CATHOLICISM | 4 quarter hours
CTH 397 | INTERNSHIP | 4 quarter hours
(Graduate)
 INTERNSHIP.

CATHOLICISM | 4 quarter hours
CTH 399 | ADVANCED STUDY | 1-6 quarter hours
(Graduate)
 Independent Study.

Catholic Theological Union (CTU)

CTU 410 | TOPICS IN RELIGIOUS STUDIES | 3-4.5 quarter hours
(Graduate)
 Select Topics in Religious Studies. Course Taught at the Catholic Theological Union.

CTU 420 | TOPICS IN CATHOLIC STUDIES | 3-4.5 quarter hours
(Graduate)
 Select Topics in Catholic Studies. Course Taught at the Catholic Theological Union.
Chemistry (CHE)

**CHE 100 | OUR CHEMICAL WORLD | 4 quarter hours**  
(Undergraduate)  
A course for non-science majors that develops the essential concepts of chemistry with some focus on applications of these methods and ideas toward a particular aspect of human activity or condition. Only one of series 100-102 may be taken for credit.

**CHE 101 | EXPLORING MATTER | 4 quarter hours**  
(Undergraduate)  
A course for non-science majors that develops the fundamental concepts of chemistry with experimental exploration to complement the methods and ideas encountered in reading and discussion in class. Only one of series 100-102 may be taken for credit.

**CHE 102 | MOLECULES THAT SHAPED THE WORLD | 4 quarter hours**  
(Undergraduate)  
A course for non-science majors that presents how molecules and basic chemical concepts have shaped our world. Introductory concepts in chemistry, focusing on atomic and molecular structure and reactivity, will be placed in the larger context of the development of modern human civilization and culture. Topics of discussion may include the roles molecules have played in shaping: cuisine, energy, health, medicine, fashion, environmental policy, and others.

**CHE 103 | ENVIRONMENTAL CHEMISTRY | 4 quarter hours**  
(Undergraduate)  
A discussion and laboratory exploration of the technological origins, effects, and control of environmental pollutants.

**CHE 104 | CHEMICALS, DRUGS AND LIVING SYSTEMS | 4 quarter hours**  
(Undergraduate)  
A discussion of the molecular basis of the interaction of specific chemical compounds (chiefly pharmaceuticals and drugs) with living organisms.

**CHE 105 | EXPLORING NUTRIENTS/SCIENCE OF NUTRITION | 4 quarter hours**  
(Undergraduate)  
A discussion and laboratory exploration of the chemical molecules which supply nutrients for living organisms. This course also includes a quantitative project, applicable to the individual student, to enhance the understanding of the principles of nutrition.

**CHE 106 | GEOCHEMISTRY | 4 quarter hours**  
(Undergraduate)  
This course for non-science majors that introduces students to basic chemical and geological concepts through a discussion of the chemical principles and scientific laws governing the composition and chemical transformation of the components making up the Earth. Major topics include the scientific method, reporting and treatment of quantitative data, introduction to the basic principles of matter, chemical reactivity, and radioactive decay.

**CHE 107 | PROTEINS AND THEIR GENES | 4 quarter hours**  
(Undergraduate)  
A discussion and laboratory introduction to many aspects of proteins: their chemical structures, biological functions, how genes store the information to make them, and how changes in genes can lead to changes in proteins, and to cancer and other diseases.

**CHE 109 | FORENSIC CHEMISTRY | 4 quarter hours**  
(Undergraduate)  
Discussion and laboratory exploration of the application of modern science to problems in criminology, evidence, art, and archaeology.

**CHE 116 | GENERAL, ORGANIC AND BIOLOGICAL CHEMISTRY I | 3 quarter hours**  
(Undergraduate)  
First course of a two-quarter sequence designed to introduce the physical and chemical properties of molecules. This course will cover: atomic and molecular structure, the states of matter, description of gases, preparation of solutions, acid/base chemistry, reactions and equilibrium and introduction to structure and conventional drawing of organic molecules.

**CHE 117 | GENERAL, ORGANIC AND BIOLOGICAL CHEMISTRY LABORATORY I | 1 quarter hours**  
(Undergraduate)  
This laboratory course introduces students to basic chemical laboratory techniques, while providing hands-on experience and applications related to CHE 116 course material.

**CHE 118 | GENERAL, ORGANIC AND BIOLOGICAL CHEMISTRY II | 3 quarter hours**  
(Undergraduate)  
Second course of a two-quarter sequence designed to introduce the physical and chemical properties of molecules. This course will cover: basic reactivity of organic functional groups relevant to biological systems, description of biomolecules (proteins, carbohydrates, nucleic acids and lipids), enzyme and vitamin chemistry, nucleic acid and protein synthesis and metabolic pathways and energy production.

C- or better in CHE 116 and CHE 117 are prerequisites for this class.

**CHE 119 | GENERAL, ORGANIC AND BIOLOGICAL CHEMISTRY LABORATORY II | 1 quarter hours**  
(Undergraduate)  
This laboratory course continues to practice basic laboratory skills learned in CHE 117, while introducing new organic and biochemical techniques related to CHE 118 course material.

C- or better in CHE 116 and CHE 117 are prerequisites for this class.

**CHE 120 | GENERAL CHEMISTRY IP | 5 quarter hours**  
(Undergraduate)  
This introductory course for science majors covers the same subject matter and sequence of topics as that of CHE 130, however this course includes additional coverage of fundamental chemistry concepts and more in-class time devoted to developing problem-solving skills. CO-REQUISITE(S): CHE131 and MAT 130 if math placement indicates MAT 130 (5 quarter hours)

Placement by the Chemistry Placement Test is a prerequisite for this class. CHE 131 is a co-requisite for this class. MAT 130 may be a co-requisite for this class (determined by Math placement test score).

**CHE 122 | GENERAL CHEMISTRY IIP | 5 quarter hours**  
(Undergraduate)  
Second course of three in the General Chemistry series that covers the same material as that of CHE 132, however this course includes additional coverage of fundamental chemistry concepts and more in-class time devoted to developing problem-solving skills. CO-REQUISITE(S): CHE133 (5 quarter hours)

A grade of C- or better in (CHE 120 or CHE 130) and in CHE 131 are prerequisites for this class. CHE 133 is a co-requisite for this class.
CHE 128 | BASIC CHEMICAL CONCEPTS | 3 quarter hours
(Undergraduate)
This course develops the fundamental concepts of chemistry and basic quantitative reasoning. This course is suitable to prepare students to take General Chemistry I (CHE130 or CHE 136). (3 quarter hours)
CHE 129 and MAT 130 or higher are a corequisite for this class.
CHE 129 | BASIC CHEMICAL CONCEPTS LABORATORY | 1 quarter hours
(Undergraduate)
Laboratory course to be taken in conjunction with CHE128. (1 quarter hour)
CHE 128 and MAT 130 or higher are a corequisite for this class
CHE 130 | GENERAL CHEMISTRY I | 3 quarter hours
(Undergraduate)
This introductory course for science majors emphasizes the composition of matter, atomic and molecular structure, bonding and chemical reactions. It is the first in the three-course sequence of General Chemistry. CO-REQUISITE(S): CHE131 (3 quarter hours)
MAT 130 and (CHE 120 or (CHE 128 & CHE 129) or (FYSC 128 & FYSC 129) or placement by the Chemistry Placement Test) are prerequisites for this class. CHE 131 is a co-requisite for this class.
CHE 131 | GENERAL CHEMISTRY I LABORATORY | 1 quarter hours
(Undergraduate)
Laboratory course to be taken in conjunction with CHE 120 or CHE 130. The experimental techniques provide hands-on experience with the course material in CHE 120 and CHE 130. CO-REQUISITE(S): CHE 120 or CHE 130 (1 quarter hour)
Either CHE 120 or CHE 130 is a co-requisite for this class.
CHE 132 | GENERAL CHEMISTRY II | 3 quarter hours
(Undergraduate)
Second course of three in the General Chemistry series. Topics discussed include: states of matter, phase transitions, properties of solutions, kinetics and equilibrium. CO-REQUISITE(S): CHE 133 (3 quarter hours)
A grade of C- or above in CHE 131 and (CHE 122 or CHE 120 or CHE 130) are prerequisites for this class. CHE 133 is a co-requisite for this class.
CHE 133 | GENERAL CHEMISTRY LABORATORY II | 1 quarter hours
(Undergraduate)
Laboratory course to be taken in conjunction with CHE 122 or CHE 132. The experimental techniques learned in lab provide hands-on experience with the course material in CHE 122 and CHE 132. CO-REQUISITE(S): CHE 122 or CHE 132 (1 quarter hour)
A minimum grade of C- in (CHE 120 or CHE 130) and in CHE 131 are prerequisites for this class. CHE 122 or CHE 132 is a corequisite for this class.
CHE 134 | GENERAL CHEMISTRY III | 3 quarter hours
(Undergraduate)
Third of three courses in the General Chemistry sequence. Topics discussed include: chemical equilibrium in aqueous solution (acids and bases, solubility, complex ion formation), thermodynamics (entropy and free energy), electrochemistry, chemistry of d-block elements and descriptive chemistry. CO-REQUISITE(S): CHE 135 (3 quarter hours)
A minimum grade of C- in (CHE 122 or CHE 132) and in CHE 133 are prerequisites for this class and CHE 135 is a corequisite for this class.
CHE 135 | GENERAL CHEMISTRY LABORATORY III | 1 quarter hours
(Undergraduate)
Laboratory course to be taken in conjunction with CHE 134. The experimental techniques provide hands-on experience with the course material in CHE 134. CO-REQUISITE(S): CHE 134 (1 quarter hour)
A minimum grade of C- in (CHE 122 or CHE 132) and in CHE 133 are prerequisites for this class and CHE 134 is a corequisite for this class.
CHE 136 | GENERAL CHEMISTRY I | 5 quarter hours
(Undergraduate)
This course is a rigorous introductory course in general chemistry covering topics such as composition of matter, atomic and molecular structure, bonding and chemical reactions, common states of matter, properties of solutions, phase transitions. Students must coregister for CHE 137, the laboratory course. (5 quarter hours)
MAT 130 or higher and a grade of C- or higher in (CHE 128 and CHE 129) or successful completion of (FYSC 128 and FYSC 129) or placement by Chemistry Assessment exam) are prerequisites for this class.
CHE 137 | GENERAL CHEMISTRY I LABORATORY | 1 quarter hours
(Undergraduate)
Laboratory course to be taken in conjunction with CHE 136. This laboratory course introduces students to basic chemical laboratory techniques. (1 quarter hour)
MAT 130 or higher and a grade of C- or higher in (CHE 128 and CHE 129) or successful completion of (FYSC 128 and FYSC 129) or placement by Chemistry Assessment exam) are prerequisites for this class.
CHE 138 | GENERAL CHEMISTRY II | 5 quarter hours
(Undergraduate)
This course is a continuation of CHE136 covering topics including kinetics, chemical equilibrium in aqueous solution (acids and bases, solubility, complex ion formation), thermodynamics (entropy and free energy), electrochemistry, chemistry of d-block elements and descriptive chemistry. Students must coregister for CHE 139, the laboratory course. (5 quarter hours)
A minimum grade of C- in CHE 136 and CHE 137 is a prerequisite for this class.
CHE 139 | GENERAL CHEMISTRY II LABORATORY | 1 quarter hours
(Undergraduate)
This laboratory course is a continuation of CHE137, emphasizing additional quantitative and qualitative laboratory techniques to coincide with CHE138 content. (1 quarter hour)
A minimum grade of C- in CHE 136 and CHE 137 is a prerequisite for this class.
CHE 140 | UNIVERSITY CHEMISTRY I | 3 quarter hours
(Undergraduate)
The subject matter and sequence of topics are similar to that of the General Chemistry sequence (CHE 130-132-134), however this course is designed for students who are prepared for a more thorough and systematic study of chemistry including increased emphasis on the connection between chemical and physical topics. This is the first of a three-course sequence of University Chemistry. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 141. (3 quarter hours)
MAT 131 and completion of the Chemistry Assessment Examination is a prerequisite for this class.
CHE 141 | UNIVERSITY CHEMISTRY LABORATORY I | 1 quarter hours
(Undergraduate)
Laboratory course to be taken in conjunction with CHE 140. This course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE140. Students must co-register for the lecture companion course, CHE140. (1 quarter hour)
MAT 131 and completion of the Chemistry Assessment Examination is a prerequisite of this class.
CHE 142 | UNIVERSITY CHEMISTRY II | 3 quarter hours
(Undergraduate)
Second course of three in the University Chemistry sequence. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 143. (3 quarter hours)
A grade of C- or higher in CHE 140 and CHE 141 is a prerequisite for this class.

CHE 143 | UNIVERSITY CHEMISTRY LABORATORY II | 1 quarter hours
(Undergraduate)
Laboratory course to be taken in conjunction with CHE 142. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 142. Students must co-register for the lecture companion course, CHE142. (1 quarter hour)
A grade of C- or higher in CHE 140 and CHE 141 is a prerequisite for this class.

CHE 144 | UNIVERSITY CHEMISTRY III | 3 quarter hours
(Undergraduate)
Third course of three in the University Chemistry sequence. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 145. (3 quarter hours)
A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class. A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class.

CHE 145 | UNIVERSITY CHEMISTRY LABORATORY III | 1 quarter hours
(Undergraduate)
Laboratory course to be taken in conjunction with CHE 144. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 144. Students must co-register for the lecture companion course, CHE144. (1 quarter hour)
A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class. A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class.

CHE 202 | APPLIED PROBABILITY AND STATISTICS | 2 quarter hours
(Undergraduate)
This is a lecture course that introduces students to concepts related to the statistical analysis of experimental data, covering material from uncertainty, significant figures, and propagation of errors through least squares fitting to descriptions and applications of several statistical distributions. (2 quarter hours)
A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145) is a prerequisite and CHE 204 is a co-requisite for this class.

CHE 204 | ANALYTICAL CHEMISTRY | 3 quarter hours
(Undergraduate)
Use of equilibrium chemistry to solve problems of chemical analysis in acid-base, solubility, metal-ligand complex, and electrochemical systems. CO-REQUISITE: CHE 205. (3 quarter hours)
A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and 145) is a prerequisite for this class. CHE 205 is a co-requisite.

CHE 205 | ANALYTICAL CHEMISTRY LABORATORY | 1 quarter hours
(Undergraduate)
Laboratory to be taken in conjunction with CHE 204. Methods include wet chemistry and instrumental techniques of analysis. CO-REQUISITE(S): CHE 204. (1 quarter hour)
A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145) is a prerequisite for this class. CHE 204 is a co-requisite.

CHE 228 | SURVEY OF ORGANIC CHEMISTRY | 3 quarter hours
(Undergraduate)
This one-quarter course gives students an overview of the fundamentals of organic chemistry and its applications in health and environmental sciences. This is a survey course meant for students who do not need to learn a full year of organic chemistry. Emphasis is on the structure, function, and reactivity of the major classes of organic compounds. This course meets for six hours per week: three hours of traditional lecture and three hours of lab. The course is suitable for nursing and environmental science students; it does not substitute for any traditional organic chemistry course. CO-REQUISITE(S): CHE 229. (3 quarter hours)
A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) is a prerequisite for this class.

CHE 229 | SURVEY OF ORGANIC CHEMISTRY LABORATORY | 1 quarter hours
(Undergraduate)
Laboratory to be taken in conjunction with CHE 229. CO-REQUISITE(S): CHE 228. (1 quarter hour)
A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) is a prerequisite for this class.

CHE 230 | ORGANIC CHEMISTRY I | 3 quarter hours
(Undergraduate)
First in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecule and the language and fundamental concepts of organic chemistry, including: structure and bonding; acid-base reactions; functional groups; thermodynamics and kinetics of organic reactions; stereochemistry; substitution and elimination reactions of alkyl halides. (3 quarter hours)
A minimum grade of C- in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) is a prerequisite for this class.

CHE 231 | ORGANIC CHEMISTRY LABORATORY I | 1 quarter hours
(Undergraduate)
Laboratory to be taken in conjunction with CHE 230. (1 quarter hour)
A minimum grade of C- in ((CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145) is a prerequisite for this class. CHE 230 is a corequisite for this class.

CHE 232 | ORGANIC CHEMISTRY II | 3 quarter hours
(Undergraduate)
Second in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules. Specific topics investigated include the reactivity and synthesis of alcohols, ethers, epoxides, alkenes, alkanes, conjugated, and aromatic compounds. To be taken in conjunction with CHE 233. (3 quarter hours)
A minimum grade of C- in CHE 230 and CHE 231 is a prerequisite for this class. CHE 232 is a corequisite for this class.
CHE 233 | ORGANIC CHEMISTRY LABORATORY II | 1 quarter hours (Undergraduate)
Laboratory to be taken in conjunction with CHE 232. (1 quarter hour)
A minimum grade of C- in CHE 230 and CHE 231 is a prerequisite for this class. CHE 233 is a corequisite for this class.

CHE 234 | ORGANIC CHEMISTRY III | 3 quarter hours (Undergraduate)
Third in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules. Specific topics investigated include the reactivity and synthesis of carbonyl compounds; amines; and bio-molecules. To be taken in conjunction with CHE 225. (3 quarter hours)
A minimum grade of C- in CHE 232 and CHE 233 is a prerequisite for this class. CHE 235 is a corequisite for this class.

CHE 235 | ORGANIC CHEMISTRY LABORATORY III | 1 quarter hours (Undergraduate)
Laboratory to be taken in conjunction with CHE 234. (1 quarter hour)
A minimum grade of C- in CHE 232 and CHE 233 is a prerequisite for this class.

CHE 236 | ORGANIC CHEMISTRY I | 5 quarter hours (Undergraduate)
First in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules, and the language and fundamental concepts of organic chemistry. Specific topics that are covered include the following: structure and bonding; acids and bases; functional groups; thermodynamics and kinetics of organic reactions; alkanes; stereochemistry; alkyl halides and nucleophilic substitution; elimination reactions; alcohols, ethers and epoxides; alkenes; alkynes; oxidation and reduction. CO-REQUISITE(S): CHE 237. (5 quarter hours)
C- or better in CHE 134 and CHE 135 or (CHE 138 and CHE 139) are a prerequisite for this class.

CHE 237 | ORGANIC CHEMISTRY I LABORATORY | 1 quarter hours (Undergraduate)
Laboratory to be taken in conjunction with CHE 236. CO-REQUISITE(S): CHE 236. (1 quarter hour)
C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) are a prerequisite and CHE 236 is a corequisite for this class.

CHE 238 | ORGANIC CHEMISTRY II | 5 quarter hours (Undergraduate)
Second in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules, and the language and fundamental concepts of organic chemistry. Specific topics that are covered include the following: conjugation, resonance, and dienes; benzene and aromatic compounds; electrophilic aromatic substitution; carboxylic acids; organometallic reagents; carbonyl substitution and addition reactions; aldehydes and ketones; carbonyl condensation reactions; amines; bio-molecules. To be taken in conjunction with CHE 239. (5 quarter hours)
A minimum grade of C- in CHE 236 and CHE 237 is a prerequisite for this course.

CHE 239 | ORGANIC CHEMISTRY II LABORATORY | 1 quarter hours (Undergraduate)
Laboratory to be taken in conjunction with CHE 238. (1 quarter hour)
A minimum grade of C- in CHE 236 and CHE 237 is a prerequisite for this course.

CHE 261 | INSTRUMENTAL ANALYSIS | 4 quarter hours (Undergraduate)
A lecture and lab course examining instrumentation in chemical analysis. Areas of focus include electronics and measurement theory, applied measurement statistics, chromatography, spectroscopy, and electroanalytical instruments and their applications.
Grades of C- or better in both CHE 204 and CHE 205 are prerequisites for this class.

CHE 264 | ATMOSPHERIC CHEMISTRY | 3 quarter hours (Undergraduate)
Atmospheric chemistry with a focus on physical and chemical processes in the troposphere and stratosphere. CO-REQUISITE(S): CHE 265. (3 quarter hours)
C- or better in CHE 204 and CHE 205 are prerequisites for this course.

CHE 265 | ATMOSPHERIC CHEMISTRY LABORATORY | 1 quarter hours (Undergraduate)
Laboratory to be taken in conjunction with CHE 264, with emphasis placed on gas phase and particulate measurements. CO-REQUISITE(S): CHE 264. (1 quarter hour)
C- or better in CHE 204 and CHE 205 are prerequisites for this class.

CHE 268 | SOLID WASTE CHEMISTRY | 3 quarter hours (Undergraduate)
Fundamental chemical processes involved in the processing of solid wastes. CO-REQUISITE(S): CHE 269. (3 quarter hours)
C- or better in CHE 204 and CHE 205 are prerequisites for this course.

CHE 269 | SOLID WASTE CHEMISTRY LABORATORY | 1 quarter hours (Undergraduate)
Laboratory to be taken in conjunction with CHE 268. CO-REQUISITE(S): CHE 268. (1 quarter hour)
C- or better in CHE 204 and CHE 205 are prerequisites for this course.

CHE 302 | QUANTUM CHEMISTRY | 3 quarter hours (Undergraduate)
This is the first course in a three-quarter long physical chemistry sequence. This course focuses on quantum mechanics: a theoretical description of matter at the microscopic level. The energy levels of atoms and molecules will be derived; spectroscopic applications will be explored. Students must co-register for the laboratory companion course, CHE 303. (3 quarter hours)
(C- or better in CHE 204 and CHE 205) and (MAT 149 or MAT 152 or MAT 162 or MAT 172) and PHY 172 are prerequisites for this class.

CHE 303 | EXPERIMENTAL PHYSICAL CHEMISTRY | 1 quarter hours (Undergraduate)
Laboratory to be taken in conjunction with CHE 302. Introduction to essential skills and techniques of experimental physical chemistry. Topics include the use of data analysis software, computational methods, basic spectroscopy, and technical writing. CO-REQUISITE(S): CHE 302. (1 quarter hour)
(C- or better in CHE 204 and CHE 205) and (MAT 149 or MAT 152 or MAT 162 or MAT 172) and PHY 172 are prerequisites for this course.
CHE 304 | THERMOCHEMISTRY | 3 quarter hours  
(Undergraduate)  
This is the second course in a three-quarter long physical chemistry sequence. This course explores the molecular-scale effects of quantum mechanics and thermodynamics. The understanding of quantum mechanics gained during CHE 302 is extended into the molecular regime, with a focus on bonding. The basic principles of thermodynamics are explored in detail. These principles are then applied to build up a detailed understanding of chemical equilibria and the properties of various states of matter. Students must co-register for the laboratory companion course, CHE 305. (3 quarter hours)  
C- or better in CHE 302 and CHE 303 are a prerequisite for this class.

CHE 305 | EXPERIMENTAL PHYSICAL CHEMISTRY II | 1 quarter hours  
(Undergraduate)  
Laboratory to be taken in conjunction with CHE 304. The goal of this laboratory course is to teach students essential skills and techniques of physical chemistry. Experimental work will focus on electronic spectroscopy and thermodynamics. CO-REQUISITE(S): CHE 304. (1 quarter hour)  
C- or better in CHE 302 and CHE 303 are a prerequisite for this class.

CHE 306 | Kinetics and Statistical Thermodynamics | 3 quarter hours  
(Undergraduate)  
This is the third course in a three-quarter long physical chemistry sequence. This course focuses on the connection between quantum mechanics and thermodynamics, as well as chemical kinetics. Topics discussed may include: kinetics, molecular dynamics, statistical mechanics, and transport properties. Students must co-register for the laboratory companion course, CHE 307. (3 quarter hours)  
C- or better in CHE 304 and CHE 305 are prerequisites for this course.

CHE 307 | EXPERIMENTAL PHYSICAL CHEMISTRY III | 1 quarter hours  
(Undergraduate)  
Laboratory to be taken in conjunction with CHE 306. The goal of this laboratory course is to teach students essential skills and techniques of physical chemistry. CO-REQUISITE(S): CHE 306. (1 quarter hour)  
C- or better in CHE 304 and CHE 305 are prerequisites for this course.

CHE 308 | PHYSICAL CHEMISTRY FOR BIOLOGICAL SCIENCE | 3 quarter hours  
(Undergraduate)  
This course will cover various topics from the field of physical chemistry with an emphasis on applications to biological systems. Topics will include: quantum mechanics, thermodynamics, kinetics, and statistical mechanics. In all cases, the focus will be on the application of these topics to biological molecules, including DNA, RNA, and proteins. Laboratory experiments will complement lecture topics, and may include examinations such as protein folding, isothermal calorimetry for protein-protein interactions, differential scanning calorimetry, and spectroscopic investigations of protein and DNA structure.  
BIO 193, (C- or better in CHE 134/135, CHE 204/205), (PHY 150/151/152 or 170/171/172), and (MAT 147/148/149 or 150/151/152 or 160/161/162 or 170/171/172) are prerequisites for this class. CHE 309 is a co-requisite for this class.

CHE 309 | PHYSICAL CHEMISTRY FOR BIOLOGICAL SCIENCES LAB | 1 quarter hours  
(Undergraduate)  
Laboratory experiments will complement lecture topics, and may include examinations such as protein folding, isothermal calorimetry for protein-protein interactions, differential scanning calorimetry, and spectroscopic investigations of protein and DNA structure.  
BIO 193, (C- or better in CHE 134/135, CHE 204/205), (PHY 150/151/152 or 170/171/172), and (MAT 147/148/149 or 150/151/152 or 160/161/162 or 170/171/172) are prerequisites for this class. CHE 308 is a co-requisite for this class.

CHE 310 | NUCLEAR CHEMISTRY | 4 quarter hours  
(Undergraduate)  
This is a course for advanced undergraduates and graduate students. The course emphasizes the theory of radioactive decay, nuclear properties, mass-energy systematics, and nuclear applications.  
(C- or better in CHE 205) and (PHY 152 or PHY 172) are prerequisites for this course.

CHE 318 | BIOPHYSICAL CHEMISTRY | 4 quarter hours  
(Undergraduate)  
This course is designed for advanced undergraduate students with an interest in the interdisciplinary field of biophysics. The course will focus on several subfields of biophysical chemistry, including: fluorescence as a tool in biophysics; protein folding; biophysical applications of single molecule fluorescence, atomic force microscopy, X-ray crystallography, mass spectrometry, and NMR spectroscopy. Additional topics will be selected by students from a list of possible choices.  
C- or better in CHE 302 or CHE 308 or CHE 340 is a prerequisite for this class.

CHE 320 | INTERMEDIATE INORGANIC CHEMISTRY | 3 quarter hours  
(Undergraduate)  
Lecture course emphasizing synthesis, structure and reactions of metal ligand compounds of general and biological interest. CO-REQUISITE(S): CHE 321. (3 quarter hours)  
C- or better in (CHE 234 and CHE 235) or (CHE 238 and CHE 239) are a prerequisite for this class.

CHE 321 | INTERMEDIATE INORGANIC CHEMISTRY LABORATORY | 1 quarter hours  
(Undergraduate)  
Laboratory to be taken in conjunction with CHE 320. CO-REQUISITE(S): CHE 320. (1 quarter hour)  
C- or better in (CHE 234 and CHE 235) or (CHE 238 and CHE 239) are a prerequisite for this class.

CHE 326 | ORGANOMETALLIC CHEMISTRY | 3 quarter hours  
(Undergraduate)  
Organometallic chemistry is the study of compounds that contain a metal-carbon bond, and thus unites the fields of organic and inorganic chemistry. Organometallic compounds are commonly employed throughout various chemical sub-industries for the synthesis of pharmaceuticals, liquid crystals, polymer precursors, fragrances, hormones and more. This course will provide an introduction to the fundamental structure and bonding of organometallic complexes, while offering an in depth study of the unique reaction mechanisms by which metals, particularly transition metals, react with organic molecules. Applications of these compounds and reactions to real-world industrial processes will also be presented to highlight the tremendous utility of this chemistry. Students must co-register for the laboratory companion course, CHE 327. (3 quarter hours)  
C- or better in (CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.
CHE 327 | ORGANOMETALLIC CHEMISTRY LABORATORY | 1 quarter hours (Undergraduate)  
Laboratory to be taken in conjunction with CHE 326. This course is designed to provide the student with a thorough introduction to the experimental techniques utilized by practicing chemists in the synthesis, isolation, and characterization of organic compounds. CO-REQUISITE(S): CHE 326. (1 quarter hour)  
C- or better in (CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

CHE 330 | SENIOR CAPSTONE IN THE PHYSICAL SCIENCES | 4 quarter hours (Undergraduate)  
Capstone in the Physical Sciences. A course for graduating chemistry and physics majors to integrate physical science experience with non-scientific fields.

CHE 332 | POLYMER SCIENCE | 3 quarter hours (Undergraduate)  
This course has been designed to expose students to various aspects of polymer science. The course will focus on the synthesis, structure, and properties of an array of both synthetic and natural polymers. Students will learn the means by which various classes of polymers are prepared and characterized, with an emphasis on the mechanisms of formation, including: free radical, cationic, anionic, condensation, and transition metal-mediated and catalyzed polymerization methods. The course will also highlight differences in the physical properties of polymers, and how such differences can be controlled and exploited for practical purposes. Students will also be introduced to more modern macromolecular materials including dendrimers and nanostructures. The applications of the polymers discussed in the course will also be presented in order to provide context for the real-world utility of these materials. Students must register for the co-requisite laboratory companion course, CHE 333.  
C- or better in (CHE 234 and CHE 235) or (CHE 238 and CHE 239) are prerequisites for this course and CHE 333 is a co-requisite for this class.

CHE 333 | POLYMER SCIENCE LAB | 1 quarter hours (Undergraduate)  
Laboratory to be taken in conjunction with CHE 332. This course is designed to provide students with practical skills in the area of polymer science. The course will cover topics related to the synthesis, isolation, and characterization of polymeric materials. Students must be coregistered for the lecture course CHE 332.  
C- or better in (CHE 234 and CHE 235) or (CHE 238 and CHE 239) are prerequisites for this course and CHE 333 is a co-requisite for this class.

CHE 334 | NANOMATERIALS AND NANOTECHNOLOGY | 4 quarter hours (Undergraduate)  
Nanotechnology is a well-established sector of our technology economy, driving much of the function of modern electronics. Nanomaterials and nanotechnology are also thriving research fields, both in industry and academia. This course will prepare students to work in this exciting and growing field. In the first section of the course we will explore what it means for something to be a nanomaterial, and how the properties of nanomaterials can be determined. In the second section of the course we will explore several nanotechnologies, identifying the mechanisms that facilitate the special functions of the nanomaterials used to produce them. Students will also get hands-on experience creating nanomaterials in a laboratory.  
A minimum grade of C- in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) is a prerequisite for this class.

CHE 340 | BIOCHEMISTRY I | 3 quarter hours (Undergraduate)  
First in a three-course sequence, directed at those who wish an in-depth exploration of modern biochemistry. This course covers the structures and functions of the four major macromolecules, concentrating on enzyme kinetics and regulation. CO-REQUISITE(S): CHE 341. The general biology sequence is strongly recommended. (3 quarter hours)  
A grade of C- or better in (CHE234 and CHE 235) or (CHE 238 and CHE 239) is a prerequisite for this course.

CHE 341 | EXPERIMENTAL BIOCHEMISTRY I | 1 quarter hours (Undergraduate)  
Laboratory to be taken in conjunction with CHE 340. This course will introduce classic and modern techniques for isolating and characterizing biological molecules. Topics covered will include buffer preparation; amino acid analysis; detection, quantification, and purification of proteins; enzyme kinetics; purification, amplification, and analysis of DNA; protein stabilization; and molecular interaction analysis. CO-REQUISITE(S): CHE 340. (1 quarter hour)  
A grade of C- or better in (CHE234 and CHE 235) or (CHE 238 and CHE 239) is a prerequisite for this course.

CHE 342 | BIOCHEMISTRY II | 3 quarter hours (Undergraduate)  
Second in a three-course sequence, directed at those who wish an in-depth exploration of modern biochemistry. This course covers energy metabolism and biosynthetic pathways, with emphasis on their coordinated regulation. CO-REQUISITE(S): CHE 343. (3 quarter hours)  
C- or better in CHE 340 and CHE 341 are a prerequisite for this class.

CHE 343 | EXPERIMENTAL BIOCHEMISTRY II | 1 quarter hours (Undergraduate)  
Laboratory to be taken in conjunction with CHE 342. Applications of basic techniques from CHE 341: DNA cloning and transformation; protein expression, purification, and characterization; and advanced biophysical methods. CO-REQUISITE(S): CHE 342. (1 quarter hour)  
C- or better in CHE 340 and CHE 341 are a prerequisite for this class.

CHE 344 | BIOCHEMISTRY III | 3 quarter hours (Undergraduate)  
Third in a three-course sequence, directed at those who wish an in-depth exploration of modern biochemistry. This course covers metabolism, nucleic acid structure and replication, transcription and translation. Also included are methods of biotechnology and an introduction to reading the primary literature. CO-REQUISITE(S): CHE 345. (3 quarter hours)  
C- or better in CHE 342 and CHE 343 are a prerequisite for this class.

CHE 345 | EXPERIMENTAL BIOCHEMISTRY III | 1 quarter hours (Undergraduate)  
Laboratory to be taken in conjunction with CHE 344. This course will introduce students to bioinformatics methods including protein function prediction and structure analysis, DNA/protein sequence analysis and alignment, and special topics laboratory techniques. CO-REQUISITE(S): CHE 344. (1 quarter hour)  
C- or better in CHE 342 and CHE 343 are a prerequisite for this class.
CHE 346 | PRINCIPLES OF BIOCHEMISTRY | 4 quarter hours
(Undergraduate)
This course covers the key topics in biochemistry. These include non-covalent interactions, acid/base chemistry, chemical and three-dimensional structures of proteins/nucleic acids/lipids, hemoglobin oxygen binding, cytoskeletal and motor proteins, enzyme mechanisms/kinetics, membrane and membrane proteins/transport, signaling, energy metabolism and biosynthesis. Formerly CHE 240. This course is not intended for students majoring in chemistry and does not count as a CHE 250+ in-depth course for the major.
C- or better in CHE 232 or CHE 238 is a prerequisite for this class.

CHE 348 | CHEMICAL BIOLOGY | 4 quarter hours
(Undergraduate)
This course introduces students to a new discipline spanning the fields of chemistry and biology in which chemical techniques and tools, often compounds produced through synthetic chemistry are used to study and manipulate biological systems in an effort to unravel biological problems and systems. The course will take a case study approach. Techniques encountered in the case study will be studied in depth. Primary literature will be used extensively in the in depth case study.
C- or better in CHE 340 is a prerequisite for this class.

CHE 360 | MEDICINAL CHEMISTRY | 4 quarter hours
(Undergraduate)
This course emphasizes organic chemical principles and reactions vital to drug design and drug action in the human body. Medicinal chemists design molecules that alter phenomena operating at the overlap of chemistry, biochemistry, cell biology, and pharmacology. This course introduces the conceptual frameworks and methods employed in drug development using case histories and mechanisms of clinically important drugs as illustrative examples.
C- or better in CHE 234 or CHE238 are prerequisites for this course.

CHE 362 | DRUGS AND TOXICOLOGY | 4 quarter hours
(Undergraduate)
This course covers the chemical and biological analysis of the metabolism and distribution of drugs, toxins and chemicals in animals and humans, and the mechanism by which they cause therapeutic and toxic responses. Metabolism and toxicity as a basis for drug development, metabolic polymorphisms and biomarkers of exposure are also covered.
C- or better in CHE 234 or CHE238 are prerequisites for this class.

CHE 364 | NUTRITION | 4 quarter hours
(Undergraduate)
This is a one-quarter course focused on the advanced chemical aspects of human nutrition. The topics include the nutritive and toxic content of foods and health effects, a review of basic metabolic processes, nutrient transport and storage systems, cell signaling and regulation, and hormonal regulation and fuel utilization.
C- or better in CHE 234 or CHE 238 and CHE 340 are a prerequisite for this class.

CHE 376 | COMPUTATIONAL CHEMISTRY | 4 quarter hours
(Undergraduate)
This course is designed to provide an accessible and practical introduction to computational chemistry. The course provides an overview of different methods commonly used in the field ranging from classical to quantum mechanical ab initio and density functional methods. PREREQUISITE(S): CHE302.
C- or better in CHE 302 is a prerequisite for this class.

CHE 378 | APPLIED SPECTROSCOPY | 4 quarter hours
(Undergraduate)
This course serves as an introduction to the methods of structural and spectral analysis typically employed in the identification of organic molecules. Many instrumental techniques exist for the investigation of chemical structures, each of which provides unique information about the composition and structure of a compound. This course does not heavily emphasize the theoretical aspects of spectroscopy and instrumentation, but focusing primarily on the application of these techniques through the interpretation of spectra of organic molecules, and reaction mixtures.
C- or better in (CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

CHE 392 | INTERNSHIP | 4 quarter hours
(Undergraduate)
Experiential learning experience in a government agency, industrial firm, business, or non-profit organization. (variable credit)

CHE 394 | SEMINAR | 2 quarter hours
(Undergraduate)
This course is required for all chemistry majors. This course is designed to enhance your ability to: critically read and summarize scientific literature, thoughtfully listen to a scientific seminar, articulate questions regarding a scientific seminar, and orally present a scientific paper. (2 quarter hours)

CHE 397 | RESEARCH | 1-4 quarter hours
(Undergraduate)
This course allows a student to work with a faculty member on a research project. Faculty consent and research contract are required to register for the course. This course may be completed in one to four quarters at the discretion of the research advisor. The student is expected to gain skills in laboratory techniques and procedures in pursuing answers to a research project. (variable credit)

CHE 398 | CHEMISTRY THESIS | 1-4 quarter hours
(Undergraduate)
This course requires faculty-guided experimental exploration of a research topic and both written (thesis) and oral (seminar and defense) presentation of results. This course is typically completed in two or three quarters (though it may be completed in one quarter at the discretion of the research advisor). The student is expected to gain skills in laboratory techniques and procedures in pursuing answers to a research project. (variable credit)
Junior standing is a prerequisite for this class.

CHE 399 | CHEMISTRY THESIS | 1-4 quarter hours
(Undergraduate)
This course is required for all chemistry majors. This course is designed to: present to the Chemistry students and faculty the student will interpret and draw conclusions from the research advisor. The student is expected to gain skills in laboratory techniques and procedures in pursuing answers to a research project. "with honors" from the department. This course may be taken more than one time for credit. (variable credit)

CHE 399 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)
Independent study of chemistry on an informal basis by an individual in consultation with a department faculty member. Department consent required. (variable credit)
CHE 422 | INORGANIC STRUCTURE AND REACTIVITY | 4 quarter hours  
(Graduate)  
One of two courses in inorganic chemistry for advanced undergraduates and graduate students in the M.S. program. The course emphasis is variable, but topics covered will include the structure of inorganic compounds and inorganic reaction chemistry.

CHE 424 | GROUP THEORY | 4 quarter hours  
(Graduate)  
One of two courses in inorganic chemistry for advanced undergraduates and graduate students in the M.S. program. The course emphasis is variable, but the primary topics will be group theory and its application to inorganic compounds.

CHE 430 | POLYMER SYNTHESIS | 4 quarter hours  
(Graduate)  
This course focuses on the key synthetic organic chemistry methods for making polymers and coatings. A detailed consideration is given to the three types of polymerization reactions: step, chain, and ring-opening polymerizations. Practical application of polymer chemistry in society is a theme throughout the course.

CHE 431 | POLYMER SYNTHESIS LABORATORY | 2 quarter hours  
(Graduate)  
The goal of this lab course is to expose students to experimental polymer chemistry. This course focuses on the key synthetic methods for making polymers and basic structural characterization techniques. Practical application of polymer chemistry in society is a theme throughout the course. (2 quarter hours)

CHE 432 | PHYSICAL CHEMISTRY OF POLYMERS | 4 quarter hours  
(Graduate)  
This course looks at the broad subject of the physical chemistry of polymers and coatings. A detailed consideration is given to the role of molecular conformation and configuration in determining the physical behavior of polymers. Practical application of physical polymer chemistry in society is a theme throughout the course.

CHE 434 | POLYMER CHARACTERIZATION | 4 quarter hours  
(Graduate)  
This course looks at the broad subject of polymer characterization. A detailed consideration is given to major methods of analysis of chemical structure, molecular weight, morphology, and rheology. Practical application of polymer characterization in society is a theme throughout the course.

CHE 435 | POLYMER CHARACTERIZATION LABORATORY | 2 quarter hours  
(Graduate)  
The goal of this lab course is to expose students to hands-on polymer characterization techniques. This course will focus on the basic characterization techniques for determining structure and physical properties of polymers. Practical application of polymer characterization is a theme throughout the course. (2 quarter hours)

CHE 436 | POLYMER TECHNOLOGY | 4 quarter hours  
(Graduate)  
This course looks at the broad subject of the polymer and coatings technology. A detailed consideration is given to polymerization processes, and polymer and coatings processing. Practical application of polymer and coatings technology in society is a theme throughout the course.

CHE 438 | MATERIAL SCIENCE | 4 quarter hours  
(Graduate)  
This course looks at the broad subject of the materials science with emphasis on theory and applications of metals, ceramics, polymers, coatings and composites from atomic and macroscopic points of view. Practical application of materials science is a theme throughout the course.

CHE 442 | PROTEIN STRUCTURE AND FUNCTION | 4 quarter hours  
(Graduate)  
One of two courses in biochemistry for advanced undergraduates and graduate students in the M.S. program. An in-depth exploration of protein structure and function, this course surveys the common experimental and bioinformatics methods used by modern biochemists to study protein structure, folding, evolution, engineering, conformational dynamics, and enzymatic reactivity. Students will gain experience with and working knowledge of online databases and tools used by biochemists to formulate and test hypotheses related to the topics of the course.

CHE 444 | ADVANCED TOPICS IN PROTEIN BIOCHEMISTRY | 4 quarter hours  
(Graduate)  
One of two courses in biochemistry for advanced undergraduates and graduate students in the M.S. program. Discussion and seminars in selected areas.

CHE 450 | ADVANCED MECHANISTIC ORGANIC CHEMISTRY | 4 quarter hours  
(Graduate)  
One of two courses in organic chemistry for advanced undergraduates and graduate students in the M.S. program. This course emphasizes physical organic chemical models and experimental methods that are used to understand, predict, and control the outcomes of reactions in organic chemistry.

CHE 452 | ADVANCED SYNTHETIC ORGANIC CHEMISTRY | 4 quarter hours  
(Graduate)  
One of two courses in organic chemistry for advanced undergraduates and graduate student in the M.S. program. Discussion and seminars in selected areas.

CHE 454 | ADVANCED MECHANISTIC ORGANIC CHEMISTRY | 4 quarter hours  
(Graduate)  
One of two courses in organic chemistry for advanced undergraduates and graduate students in the M.S. program. This course emphasized classic and modern synthetic methods.

CHE 464 | COATINGS SCIENCE AND TECHNOLOGY | 4 quarter hours  
(Graduate)  
This course will provide a concise review of the current scientific understanding in the field of polymer and coatings science with numerous practical applications to produce a basic understanding of polymers and coatings technology.

CHE 466 | COATINGS PROPERTIES AND APPLICATIONS | 4 quarter hours  
(Graduate)  
This course will provide a concise review of basic principles involved in the characterization, properties, applications, and performance of coatings.
CHE 470 | STATISTICAL THERMODYNAMICS | 4 quarter hours
(Graduate)
One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE470 is a course designed to provide an in-depth presentation of thermodynamics from a molecular perspective. The course builds upon foundations given in undergraduate courses on quantum chemistry, and thermochemistry. Starting with some basic principles of probability and probability distribution, it proceeds to the Boltzmann distribution law, and an introduction to microcanonical ensembles; then using the expressions of the quantum energy levels of some simple models, a systematic exploration of the proper formulation, evaluation, and application of partition functions is given. In short, this course develops a methodology to compute thermodynamic properties of macroscopic systems from knowledge of the quantized energies of individual molecules.

CHE 472 | MOLECULAR DYNAMICS | 4 quarter hours
(Graduate)
One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE472 builds upon topics covered in a typical undergraduate-level course on chemical kinetics. Here, focus is placed on kinetics at the molecular level with an aim to understand how a reaction system behaves as it passes over a potential energy surface. Depending on time and student interest, specific topics in this course may include reaction rate theory, scattering theory, and surface interactions. Computer simulations may also be incorporated in this course.

CHE 474 | ADVANCED QUANTUM CHEMISTRY | 4 quarter hours
(Graduate)
One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE474 is focused on quantum mechanics and will build on fundamental principles introduced in undergraduate quantum chemistry, including an examination of the particle-in-a-box, rigid rotor, and harmonic oscillator models. More advanced quantum mechanical topics such as the Dirac representation, wave packet motion, and time-dependent perturbation theory may also be explored. These topics can be used to understand phenomena such as coherent control of reactions, vibrational energy redistribution, and electronic energy transfer. The primary goals of this course are to: 1) increase students’ understanding of quantum mechanical principles; 2) apply quantum mechanics to spectroscopic problems; and 3) expose students to modern literature related to quantum mechanics.

CHE 480 | SPECIAL TOPICS IN ANALYTICAL CHEMISTRY | 4 quarter hours
(Graduate)
This course may be any topic related to chemical analysis, such as mass spectrometry, electrochemical analysis, principles of chromatography, polymer properties, coatings, sampling methods, design of experiments, etc. This course may be repeated if the topics are different.

CHE 482 | SPECIAL TOPICS IN BIOCHEMISTRY | 4 quarter hours
(Graduate)
This course may cover any topic related to biochemistry or medicinal chemistry. This course may be repeated if the topics are different.

CHE 484 | SPECIAL TOPICS IN INORGANIC CHEMISTRY | 4 quarter hours
(Graduate)
This course may cover any topic related to inorganic chemistry. This course may be repeated if the topics are different.

CHE 486 | SPECIAL TOPICS IN ORGANIC CHEMISTRY | 4 quarter hours
(Graduate)
This course may cover any topic related to organic chemistry. This course may be repeated if the topics are different.

CHE 488 | SPECIAL TOPICS IN PHYSICAL CHEMISTRY | 4 quarter hours
(Graduate)
This course covers specific topics in the area of physical chemistry. Examples of topics include single molecule techniques, molecular electronic spectroscopy, interaction of electromagnetic radiation with particulate matter, and hydrogen bonding. This course may be repeated if the topics are different.

CHE 490 | ADVANCED PROBABILITY AND STATISTICS | 4 quarter hours
(Graduate)
This course introduces students to statistical methods that can be used in error analysis of experimental data. Computers are used to apply concepts discussed in lecture to actual data sets. Offered: Winter of even-numbered years. Familiarity with Excel or a modern programming language is strongly recommended.

CHE 494 | SCIENCE WRITING AND COMMUNICATION | 4 quarter hours
(Graduate)
The goal of this course is to prepare students to be effective writers and communicators in academic and industrial settings. The course is organized around learning how to write a scientific argument via modules that cover the nature of scientific fact, different genres of scientific writing (e.g., reports and proposals), writing collaboratively and presenting a scientific argument to a stakeholder audience.

CHE 497 | RESEARCH | 1-12 quarter hours
(Graduate)
This course requires independent experimental exploration under the supervision of a faculty member. Thesis students must write a thesis based on their research project and successfully complete a two-part oral exam. The first part of the examination consists of the thesis presentation and defense; the second part is an oral examination concerning the student’s general knowledge of chemistry. (variable credit)

CHE 499 | INDEPENDENT STUDY | 4.00 quarter hours
(Graduate)
This course is for Master’s students. Topic of the course varies. Credit hours vary. Course requires graduate program director approval each quarter.

CHE 502 | CANDIDACY MAINTENANCE | 0 quarter hours
(Graduate)
This course is meant for Master’s students. Topic of the course varies. Credit hours vary. Course requires graduate program director approval each quarter.

Chinese (CHN)

CHN 101 | BASIC CHINESE I | 4 quarter hours
(Undergraduate)
This course is an introduction to the study of standard modern Chinese, often referred to as Mandarin. It adopts the modern Chinese phonetic system, hanyupinyin, using simplified characters. This course aims at functional proficiency by developing the four aspects of communicative capabilities -- listening, speaking, reading, and writing -- through intensive practice. It also strives to improve students’ structural accuracy, which in turn will increase functional proficiency, by dealing with the grammatical rules in such a way that students can internalize them. As language and culture interact with each other, this course will also help students gain insights into the Chinese people, their life, culture, customs and habits.
**CHN 101S | BASIC CHINESE I FOR SUMMER | 6 quarter hours**  
(Undergraduate)  
(Covers the equivalent of CHN 101 and the first half of CHN 102.) The first half of beginning Chinese (Mandarin). Listening to, speaking, reading, and writing Chinese in a cultural context for the beginning student.

**CHN 102 | BASIC CHINESE II | 4 quarter hours**  
(Undergraduate)  
This course is the second part of the three-quarter sequence on Basic Chinese. It helps students develop basic conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing although students are also exposed to the traditional form of Chinese characters throughout the course.

**CHN 103 | BASIC CHINESE III | 4 quarter hours**  
(Undergraduate)  
This course continues to broaden and strengthen the foundation of Chinese language in both written and spoken formats. Based on knowledge gained in Basic Chinese I and II in terms of the origin and the elements of Chinese characters, the course expands students' collection of Chinese words and phrases to apply in both reading and writing. With the understanding of the phonetic systems of spoken Chinese as well as the structure of Chinese characters, students will continue to reflect on their learning and will share methods used to retain what they have learned in the class. The course combines language study with the exploration of Chinese culture and history.

**CHN 103S | BASIC CHINESE III FOR SUMMER | 6 quarter hours**  
(Undergraduate)  
(Covers the equivalent of the second half of CHN 102 and all of CHN 103.) The second half of beginning Chinese (Mandarin). Further work on the basic elements of the Chinese language, spoken as well as written, with due regard to the cultural context of Chinese expression. CHN 101S or equivalent is recommended.

**CHN 104 | INTERMEDIATE CHINESE I | 4 quarter hours**  
(Undergraduate)  
This course is the first part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 103 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 105 | INTERMEDIATE CHINESE II | 4 quarter hours**  
(Undergraduate)  
This course is the second part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 104 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 106 | INTERMEDIATE CHINESE III | 4 quarter hours**  
(Undergraduate)  
This course is the third part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 105 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 110 | INTENSIVE BASIC CHINESE I (FOR PARTICIPANTS IN STARTALK PROGRAM) | 4 quarter hours**  
(Undergraduate)  
An intensive introduction to reading, writing, and speaking Mandarin in a cultural context for the beginning student. For participants in the STARTALK PROGRAM.

**CHN 111 | INTENSIVE BASIC CHINESE II (FOR PARTICIPANTS IN STARTALK PROGRAM) | 6 quarter hours**  
(Undergraduate)  
An intensive introduction to reading, writing, and speaking Mandarin in a cultural context for the beginning student; continues CHN 110. For participants in the STARTALK Program.

**CHN 117 | INTENSIVE BASIC CHINESE I | 6 quarter hours**  
(Undergraduate)  
This is part I of a two-course sequence of hybrid Basic Chinese which is equivalent to the 1st-year sequence CHN101-102-103. The hybrid course is offered in two modules: Online Learning Module (OLM) in which students learn the online content on our course website and finish online assignments during the weekdays and the Face-to-Face Module (FtFM) in which you take tests and have conversational practices in a weekly class meeting every Friday afternoon. The class will focus on developing students' basic conversational and literary proficiency in Mandarin Chinese.

**CHN 118 | INTENSIVE BASIC CHINESE II | 6 quarter hours**  
(Undergraduate)  
This is part II of a two-course sequence of hybrid Basic Chinese which is equivalent to the 1st-year sequence CHN101-102-103. The hybrid course is offered in two modules: Online Learning Module (OLM) in which students learn the online content on our course website and finish online assignments during the weekdays and the Face-to-Face Module (FtFM) in which you take tests and have conversational practices in a weekly class meeting. The class will focus on developing students' basic conversational and literary proficiency in Mandarin Chinese. CHN 117 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 130 | MOLILSAP STUDY ABROAD | 2 quarter hours**  
(Undergraduate)  
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.
CHN 141 | INTENSIVE CHINESE | 4 quarter hours  
(Undergraduate)  
Students will be encouraged to engage in primary research and field work, visiting local Asian American communities and community-based organizations. While the course will provide students with an introduction to issues linked to community-rooted research in Chicago, it will also enhance an awareness of the challenges of integrating: media or popular representations with reality; theory with practice, and "objective" research with social advocacy. Gaining new perspectives, students will be empowered to apply such knowledge and research skills in conducting a study of any community, particularly those that are least understood, such as the Asian American communities. Through such studies, students will take active roles in bringing such communities from the margins to the center of investigation, contributing to academic and popular interests.

CHN 197 | SPECIAL TOPICS IN CHINESE | 4 quarter hours  
(Undergraduate)  
See schedule for current offerings.

CHN 198 | STUDY ABROAD | 1-8 quarter hours  
(Undergraduate)  
Variable credit.

CHN 199 | INDEPENDENT STUDY | 0.5-8 quarter hours  
(Undergraduate)  
Variable credit.

CHN 201 | ADVANCED CHINESE I | 4 quarter hours  
(Undergraduate)  
This is the first course of third-year Chinese. Students will improve their communicative competence in all four areas of listening, speaking, reading, and writing. Emphasis will be on expansion of vocabulary, the mastery of more complex structural patterns and grammatical concepts, as well as the students’ ability to apply in actual communication what they have learned in the classroom. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 202 | ADVANCED CHINESE II | 4 quarter hours  
(Undergraduate)  
This course is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 203 | ADVANCED CHINESE III | 4 quarter hours  
(Undergraduate)  
This course is the third part of the three-quarter sequence in Advanced Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 208E | CHINA’S CULTURAL SOFT POWER AND ITS FUTURE | 4 quarter hours  
(Undergraduate)  
TAUGHT IN ENGLISH. Soft power is a political term coined by Joseph Nye in the 1980s to refer to a country’s ability to attract and persuade other countries without coercion. According to certain metrics, a country’s soft power can be measured by the quality of a country’s political institutions, the extent of its cultural appeal, the strength of its diplomatic network, the global reputation of its higher education system, the attractiveness of its economic model, and a country’s digital engagement with the world. Within three decades, China has transformed from an impoverished and self-secluded nation into a global powerhouse challenging the world’s status quo. This course will explore China’s soft power by analyzing multiple aspects of Chinese culture and its contemporary society and understand the prospects of China in the next generation. We will focus on the dramatic social cultural changes in China in the past decades that reflect its soft power or lack thereof and explore its long-term impact on the rest of the world. The readings and class discussions will engage topics on China’s historical dynamics, unique cultural traditions, politics, economy, and international relations. Students will be exposed to and analyze comparative views analyzing and predicting China’s future.

CHN 209E | CHINESE YOUTH CULTURES | 4 quarter hours  
(Undergraduate)  
TAUGHT IN ENGLISH. As China’s economic and political influence grows on the world stage, it has become increasingly important to understand China’s youth who as the next generation of leaders and workers will unquestionably shape the country’s trajectory, and ultimately the world’s geopolitical, economic, and cultural landscape. It is well documented that China’s millennials and their younger siblings have witnessed greater and faster socioeconomic and demographic changes than previous generations. This course is designed to help students understand and analyze what it means to be young in such a fast-changing country that is ruled by one Party but continuously exposed to intense globalization.

CHN 211 | LANGUAGE AND SOCIETY IN MODERN CHINA | 4 quarter hours  
(Undergraduate)  
This course explores contemporary society and culture through readings and discussions about the features and history of languages spoken in Mainland China, Taiwan, and Hong Kong. The course explores the mutual influence between language and cultural traditions including, social practices and values; the recent economic boom, the Internet; and English. The course is designed as a companion course to the intensive Chinese language study in the Chinese Summer Abroad program in Shanghai. The pre-travel portion of the course helps prepare students for their stay in Shanghai by introducing them to the general features of the society, culture and history. The on-site and post-travel portions will engage students in reflection, analysis and understanding of the experience. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 248E | CHINESE CALLIGRAPHY | 4 quarter hours  
(Undergraduate)  
TAUGHT IN ENGLISH. This course provides an introduction to the art of Chinese calligraphy. Hands-on practice as well as history and theory of the art. This course is open to students with no background in Chinese calligraphy, language, literature, or culture.
CHN 250E | CHINESE CINEMA -- A WINDOW ON CHINA | 4 quarter hours
(Undergraduate)
TAUGHT IN ENGLISH. This course studies Chinese cinema, the visualized artistic reflection of Chinese society, ideology, and culture from four perspectives: Historical, directorial, thematic, and artistic. It will cover the history of Chinese cinema, from the birth of the first Chinese film through the Silent Age, 1st Golden Age, 2nd Golden Age, Pre- and Post-War Era, Pre- and Post "Cultural Revolution" Period, and the Fifth Generation up to the emerging Sixth generation and beyond. Through substantial exposure and analysis of selected movie classics and subsequent classroom discussions, students will be well informed about the major developments and trends of each period in the history of Chinese cinema. Students will also explore the historical backgrounds, artistic characteristics, and key directors and stars of important Chinese movies as well as cinematic terminologies, the formation of Chinese cinematic theories, and innovative cinematic techniques.

CHN 252 | INTRODUCTION TO COMMERCIAL CHINESE | 4 quarter hours
(Undergraduate)
This course will help students develop basic interpretive, presentational, and interactive skills that are needed in business-related Chinese social contexts. Students will learn pertinent vocabulary, idiomatic expressions, cultural information and etiquette in four conversational contexts as presented in four units in this course. Mandarin Chinese is used in the majority of instruction, although English is also employed to explain certain cultural information and relevant business etiquette. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 297 | SPECIAL TOPICS IN CHINESE | 4 quarter hours
(Undergraduate)
See schedule for current offerings.

CHN 298 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)
Variable credit.

CHN 299 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)
Variable credit.

CHN 301 | ADVANCED SPEAKING | 4 quarter hours
(Undergraduate)
This course is designed to help post-intermediate students of Chinese develop advanced-level Mandarin speaking skills. Students will acquire new vocabulary, structural patterns and language registers that will allow students to comprehend and discuss issues in Chinese in various social contexts. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 302 | ADVANCED READING | 4 quarter hours
(Undergraduate)
This course is designed to help post-intermediate students of Chinese to develop reading and writing skills in standard (Mandarin) Chinese, dealing with intermediate to advanced texts with carefully designed exercises to guide comprehension and strengthen reading and writing strategies. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 303 | ADVANCED WRITING | 4 quarter hours
(Undergraduate)
This course is the third section of the fourth-year Chinese sequence with the aim of helping students develop advanced-level reading and writing skills in standard (Mandarin) Chinese. This course will focus on developing students' writing skills on formal and abstract topics. Students will also be exposed to various genres of written Chinese such as newspaper, magazines, and contemporary novels. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 305 | TANG DYNASTY LITERATURE AND CULTURE | 4 quarter hours
(Undergraduate)
This is an introductory course to the history, art and interpretation of Tang Poetry, the zenith of classical Chinese poetry. Introductory readings are in English, and original poems in simplified and traditional Chinese will be selected for reading and discussion. Attention will also be given to the rewriting of Chinese literature in the age of globalization. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 319 | CONTEMPORARY CHINESE LITERATURE | 4 quarter hours
(Undergraduate)
This is a survey course of Chinese literary history of the past seven decades in the contexts of Chinese historical and cultural circumstances. Students will examine representative works of the major literary genres such as poetry, novel (in excerpt), short story, drama (in excerpt), and the most recent online forms, such as blog essay. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 320 | CHINESE FOR BUSINESS | 4 quarter hours
(Undergraduate)
This course is designed to help students who have finished at least three years of Chinese language learning to develop advanced-level Mandarin Chinese skills and cultural knowledge that are needed in Chinese-speaking business contexts. The focus will be on international business activities that involve Chinese-speaking professionals. You will develop relevant vocabulary, oral and literate skills, cultural information and etiquette that are needed when conducting business tasks in Chinese-speaking contexts. Mandarin Chinese is used as the primary language in class although English may be occasionally employed. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 321 | TRANSLATION | 4 quarter hours
(Undergraduate)
Boosted by globalization and the Internet, the demand for translators is on the rise. This demand creates career opportunities for people with the knowledge of a second language. Chinese 321 - Translation Practice and Theories - is designed to help Chinese-language students grasp the skills and theories needed to render Chinese-to-English and English-to-Chinese translations. Through hands-on practice, a survey of major theories of translation, group and class discussions, and lectures, this course will teach students how to comprehend source texts accurately and deeply from both linguistic and cultural perspectives; how to express faithfully, fully, and coherently in the target language the idea of a source text; how to apply grammatical rules, rhetorical devices, diction, etc. in translation; how to use editing skills to enhance translation results; and how to use different language styles to render different materials. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.
CHN 330 | MODERN CHINESE LITERATURE: 1919 - 1949 | 4 quarter hours
(Undergraduate)
This course studies some of the highlights of modern Chinese literature since the May 4th Movement in 1919 to the pre-Mao era in 1949—literature produced during a period of unprecedented historical upheavals and that itself has been an arena for political, cultural, and aesthetic conflicts. Through a close study of some of the significant fiction, drama, and poetry students will not only gain a keen understanding of the central themes of modern Chinese but also a better understanding of modern Chinese society. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 331 | CHINESE CLASSIC FICTION: JOURNEY TO THE WEST | 4 quarter hours
(Undergraduate)
Conceived and cultivated by the essence of nature for millions of years, out of a rock on the east subcontinent sprang a stone egg, which then turned into a monkey. This monkey, with miraculous fighting skills he had learned from a mysterious master, later became the disciple of a famous Buddhist monk and guarded him, with two other disciples in the incarnation of a pig-man and a water-man, through a long-and-danger-ridden journey to the West to seek sutra. What is hidden behind the mission of the journey? What is the purpose of this magic fiction? We will answer all these questions in this course. This course is designed for students with native-like Mandarin Chinese proficiency to develop deeper understanding of Chinese culture and critical literary analysis skills needed to appreciate one of the best-known Chinese classic literature.

CHN 354 | INTRODUCTION TO CHINESE LINGUISTICS | 4 quarter hours
(Undergraduate)
This course is aimed to introduce students to modern Mandarin Chinese linguistics. Students will explore the historical evolution of Chinese and understand the basic characteristics of Mandarin. CHN 106 or equivalent recommended. Cross-listed with CHN 454.

CHN 360 | CHINESE POPULAR CULTURE AND SOCIAL MEDIA | 4 quarter hours
(Undergraduate)
The course aims to survey contemporary Chinese pop culture in city life as well as social, cultural, and political dynamics shaped by and reflected in Chinese social media. Print and online media reports, excerpts from popular TV shows, films, documentaries, and literature will be used as reading and class discussion materials. Language use in various media genres will be discussed as well. Students are expected to use Mandarin Chinese as the primary language in the classroom. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 370 | CHINESE CULTURE THROUGH FILM | 4 quarter hours
(Undergraduate)
This course is a survey course in which a selection of films from the internationally acclaimed "new Chinese cinema" are used to help students better understand the history, politics, society and economy of China in different decades of the twentieth century. Students will place each film in its historical context, considering both its aesthetic form and sociopolitical content. Although both English and Mandarin will be used in class, students need to have good command of the Chinese language to understand and discuss sociolinguistic issues in certain films. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 395 | FOREIGN LANGUAGES ACROSS THE CURRICULUM | 2 quarter hours
(Undergraduate)
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Chinese. Students must have the equivalent of 106 or higher ability in Chinese to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

CHN 397 | SPECIAL TOPICS IN CHINESE | 4 quarter hours
(Undergraduate)
See schedule for current offerings.

CHN 398 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)

CHN 399 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)
Variable credit.

CHN 401 | ADVANCED SPEAKING | 4 quarter hours
(Graduate)
Advanced practice of speaking skills in Mandarin, focusing on expanding vocabulary and information needed for the discussion of topics in the target language. Three years of college study or equivalent knowledge recommended.

CHN 402 | ADVANCED READING | 4 quarter hours
(Graduate)
Advanced practice of reading skills in Mandarin, focusing on increasing vocabulary and reinforcement of grammatical knowledge, using textual clues to find the meanings of unknown words.

CHN 403 | ADVANCED WRITING | 4 quarter hours
(Graduate)
Advanced practice of writing skills in Mandarin, focusing on standardized formal writing practices ranging from the writing of letters to the writing of essays, including both descriptive and expository styles. Students in this course will develop vocabulary, expressions, and reading and writing strategies through working with historical texts. They are also expected to develop deeper understanding of the content, as well as the special historical and cultural contexts, of the selected texts. All assignments will be submitted in Mandarin Chinese.

CHN 405 | TANG DYNASTY LITERATURE AND CULTURE | 4 quarter hours
(Graduate)
This is an introductory course to the history, art and interpretation of Tang Poetry, the zenith of classical Chinese poetry. All the introductory readings are in English, and original poems in simplified and traditional Chinese will be selected for reading and discussion. Attention will also be given to the rewriting of Chinese literature in the age of globalization.

CHN 419 | CONTEMPORARY CHINESE LITERATURE | 4 quarter hours
(Graduate)
This is a survey course to the Chinese literary history of the past seven decades in the contexts of Chinese historical and cultural circumstances. Students will examine representative works of the major literary genres such as poetry, novel, short story, drama, and the most recent online forms, such as blog essay.

CHN 420 | CHINESE FOR BUSINESS | 4 quarter hours
(Graduate)
This course aims to develop advanced-level oral and literary skills that are needed in business-related Chinese social contexts. Cultural information will be covered as an integral part of business communication.
CHN 421 | TRANSLATION | 4 quarter hours
(Graduate)
Boosted by globalization and the Internet, the demand for translators is on the rise. This demand creates career opportunities for people with the knowledge of a second language. Chinese 421 - Translation Practice and Theories - is designed to help Chinese-language students grasp the skills and theories needed to render Chinese-to-English and English-to-Chinese translations. Through hands-on practice, a survey of major theories of translation, group and class discussions, and lectures, this course will teach students how to comprehend source texts accurately and deeply from both linguistic and cultural perspectives; how to express faithfully, fully, and coherently in the target language the idea of a source text; how to apply grammatical rules, rhetorical devices, diction, etc. in translation; how to use editing skills to enhance translation results; and how to use different language styles to render different materials.

CHN 430 | MODERN CHINESE LITERATURE: 1919 - 1949 | 4 quarter hours
(Graduate)
This course studies some of the highlights of modern Chinese literature since the May 4th Movement in 1919 to the pre-Mao era in 1949—literature produced during a period of unprecedented historical upheavals and that itself has been an arena for political, cultural, and aesthetic conflicts. Through a close study of some of the significant fiction, drama, and poetry, students will not only gain a keen understanding of the central themes of modern Chinese but also a better understanding of modern Chinese society.

CHN 454 | INTRODUCTION TO CHINESE LINGUISTICS | 4 quarter hours
(Graduate)
This course introduces students to modern Mandarin Chinese linguistics. Students will explore the historical evolution of Chinese and understand the basic characteristics of Mandarin.

CHN 460 | CHINESE POPULAR CULTURE AND SOCIAL MEDIA | 4 quarter hours
(Graduate)
The course aims to survey contemporary Chinese pop culture in city life as well as social, cultural, and political dynamics shaped by and reflected in Chinese social media. Print and online media reports, excerpts from popular TV shows, films, documentaries, and literature will be used as reading and class discussion materials. Language use in various media genres will be discussed as well. Students are expected to use Mandarin Chinese as the primary language in the classroom.

CHN 470 | CHINESE CULTURE THROUGH FILM | 4 quarter hours
(Graduate)
Survey of major twentieth-century Chinese films illustrating the history, politics, society and economy of modern China, with special attention to the continuity between tradition and modernity.

CHN 496 | PRACTICUM IN CHINESE INSTRUCTION | 4 quarter hours
(Graduate)
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

CHN 497 | SPECIAL TOPICS IN CHINESE | 4 quarter hours
(Graduate)
See schedule for current offerings.

CHN 498 | STUDY ABROAD | 1-8 quarter hours
(Graduate)
Variable credit.

CHN 499 | INDEPENDENT STUDY | 1-8 quarter hours
(Graduate)
Variable credit.

Communication (CMN)

CMN 101 | INTRODUCTION TO HUMAN COMMUNICATION | 4 quarter hours
(Undergraduate)
This course offers students a broad overview of the mass media (print, film, video, recorded music, radio, television and the internet) with a particular focus on how these media impact our everyday lives. Students will develop critical frameworks for understanding how power operates across the media spheres of production, circulation, representation and reception. Attention is placed on how the social categories of race, class, gender, sexuality, ethnicity, age and nationality inform each of these media spheres. The course also considers how recent developments in digital technologies, media convergence and globalization have transformed our media culture.

CMN 102 | INTRODUCTION TO MASS COMMUNICATION | 4 quarter hours
(Undergraduate)
This course introduces students to modern Mandarin Chinese linguistics. Students will explore the historical evolution of Chinese and understand the basic characteristics of Mandarin.

CMN 103 | INTERCULTURAL COMMUNICATION | 4-6 quarter hours
(Undergraduate)
Examines the relationships between and among different cultural contexts and identities from a communication standpoint. Explores differences and similarities in cultural values, norms, and communication behaviors between and among diverse cultures and develops intercultural competence. Critiques stereotypes and increases cultural sensitivity, especially related to race, ethnicity, sexuality, and gender.

CMN 104 | PUBLIC SPEAKING | 4 quarter hours
(Undergraduate)
Introduction to the effective communication skills required for public speaking in organizational and public settings. The course stresses the important role public speaking plays in a democratic society and encourages students to address topics of a political and/or social nature. The course emphasizes the process of researching, preparing and presenting a variety of speeches. Additionally, it includes units on delivery and performance skills, effective use of language for the spoken word, clear organization of messages, critical listening and thinking skills, and tailoring messages to a variety of audiences in a diverse society.

CMN 105 | INTRODUCTION TO DIGITAL MEDIA SKILLS | 4 quarter hours
(Undergraduate)
This course introduces students to the necessary skills for digital media content creation. Students learn about conceptual and technical skills related to digital media. The course provides an introduction to tools and platforms used to produce online content.

CMN 280 | INTRODUCTION TO DIGITAL MEDIA SKILLS | 4 quarter hours
(Undergraduate)
This course introduces students to the necessary skills for digital media content creation. Students learn about conceptual and technical skills related to digital media. The course provides an introduction to tools and platforms used to produce online content.

CMN 292 | ADOBE CREATIVE CLOUD WORKSHOP | 2 quarter hours
(Undergraduate)
This course offers students hands-on experience using Adobe Creative Cloud software in a communication and media context. Topics include Premiere, InDesign, Photoshop, and Illustrator. Students may take a maximum of 8 credit hours of CMN 292 applied to their major with a maximum of 8 hours.
CMN 294 | IDENTIFYING YOUR MARKETABLE SKILLS | 2 quarter hours
(Undergraduate)
In this 2-credit course, you will learn how to prepare for the job market
while you are still in school. Coursework includes exploring career
options, identifying skills employers need and you already have,
developing a great resume and learning how to present both your
academic accomplishments and relevant skills to impress potential
employers. Please note that this course is open to students of all majors.
However, it will be most beneficial to those interested in the field of
communication.

CMN 394 | MAKING THE MOST OF YOUR COMMUNICATION INTERNSHIP
| 4 quarter hours
(Undergraduate)
PREREQ(S): Completed Communication Internship orientation session
and internship director approval to meet eligibility requirements. Students
must have an internship and begin working on or before Nov. 1, 2018.
Must be able to work 100 hours by December 14. For instructions on how
to obtain department consent, visit https://communication.depaul.edu/
internships/Pages/internship-credit.aspx. Submit your internship
proposal at by Nov. 16. DESCRIPTION: This course is for communication
majors and minors who meet eligibility requirements. Students will learn
career planning skills, explore the organizations in which they work,
gain an understanding of how they contribute to their organizations,
and discuss societal and world issues as they affect their workplaces.
The final project is a career e-portfolio. CMN 394 fulfills the Experiential
Learning Requirement. If you have completed the requirement already, the
course will be counted as an elective in your major.

CMN 395 | COMMUNICATION INTERNSHIP SPECIAL TOPICS | 4 quarter
hours
(Undergraduate)
PREREQ(S): Completed Communication Internship orientation session
and internship director approval to meet eligibility requirements. Must
be taken concurrently with an approved internship. Students are required
to work 10 hours per week at their internships while enrolled in the
course. CMN 395 is for communication majors and minors who meet
eligibility requirements. Students will integrate their work experience
with a course that facilitates learning, researching and practicing
proactive and strategic approaches to career planning in consultation
with their supervisors and other coworkers. These include identifying
and communicating transferable skills, and developing and utilizing
a new network of professional contacts that will prepare students
for continued gainful employment after graduation. CMN 395 fulfills
the Experiential Learning Requirement. If you have completed the
requirement already, the course will be counted as an elective in your
major. For instructions on how to obtain department consent, visit
https://communication.depaul.edu/internships/undergraduate/Pages/
default.aspx.

CMN 396 | CAPSTONE IN COMMUNICATION | 4 quarter hours
(Undergraduate)
Making a difference: Communication Senior Capstone. Exploration of
student skills, knowledge and interests, as well as how these might have
a concrete contribution to contemporary society. Students cannot earn
credit for both CMN396 and PRAD396.
Status as a College of Communication major with senior standing is a
prerequisite for this class.

CMN 397 | RESEARCH PRACTICUM | 1-4 quarter hours
(Undergraduate)
The research practicum offers the high-achieving student the opportunity
to connect with a faculty expert to train in a specialized communication
research method and/or to achieve hands-on practice in conducting
scholarly research more generally. The research practicum may take
various forms. For example, the student may become part of an ongoing
research project led by the faculty member in order to learn and practice
particular research methods. Typical activities may include data
gathering, data analysis, interpretation of results, and writing research
reports. In contrast, the student may wish to learn about a particular
research method practiced by the faculty expert but not available in
a regular undergraduate course offering. In this case, the research
practicum would be a course of study focusing on specialized research
method(s) with agreed upon readings and assignments for this purpose.
PREREQUISITE(S): Approval from program chair and associate dean.

CMN 398 | STUDY ABROAD | 4 quarter hours
(Undergraduate)
Expand international learning opportunities that effectively prepare
students to be successful, innovative leaders and community members
in a diverse global society. NOTE: CMN 398 meets the Junior Year
Experiential learning requirement. To count for MCS credit, topic of Study
Abroad must be approved by program director to count for History/
Criticism elective.

CMN 399 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)
The independent study offers the high-achieving student the opportunity
to develop a specialized course of study with a faculty expert. The goal of
the independent study is for the student to investigate the scholarship of
a particular sub-discipline of communication by delving into its theories,
critical concepts and current scholarly research with the guidance of a
faculty member. The independent study option is intended for students
who have demonstrated a mastery of course content, and who would
benefit from a sustained, focused collaboration with a faculty member
in order to produce an independent scholarly project. PREREQUISITE(S):
Approval from instructor, program chair, and associate dean.

CMN 591 | INTERNSHIP | 4 quarter hours
(Graduate)
PREREQ(S): Completed Graduate Communication Internship
orientation workshop and internship director approval to meet eligibility
requirements. Must be taken concurrently with an approved internship.
Students are required to work 10 hours per week at their internships.
Students will reflect on their internship experience through a variety
of assignments that will prepare them for gainful employment after
graduation.
Status as a Graduate Communication student is a prerequisite for this
class.
CMN 592 | INDEPENDENT STUDY | 1-12 quarter hours (Graduate)
The independent study offers the high-achieving student, who has succeeded in attaining substantial learning in a communication subspecialty, the opportunity to develop a specialized course of study with a faculty expert. The goal of the independent study is for the student to master scholarship of a particular area of study in communication by delving into its theories, critical concepts and current scholarly research. The independent study option is intended for students who have demonstrated a mastery of course content, and who would benefit from a sustained, focused collaboration with a faculty member in order to produce an independent scholarly project. PREREQUISITE(S): Approval from instructor and college. Status as a Graduate Communication student and Director Consent is a prerequisite for this class.

CMN 593 | RESEARCH PRACTICUM | 4 quarter hours (Graduate)
The research practicum offers the high-achieving student, who has succeeded in attaining substantial learning in a communication subspecialty, the opportunity to connect with a faculty expert to train in a specialized communication research method and/or to achieve hands-on practice in conducting scholarly research more generally. The research practicum may take various forms. For example, the student may become part of an ongoing research project led by the faculty member, and the research practicum would provide an opportunity for the student to apply previously studied research methods to the research project. Typical activities include data gathering, data analysis, interpretation of results, and writing research reports. In contrast, the student may wish to learn about a particular research method practiced by the faculty expert but not available in a regular graduate course offering. In this case, the research practicum would be a course of study focusing on specialized research method(s) with agreed upon readings and assignments for this purpose. PREREQUISITE(S): Approval from instructor and college. Status as a Graduate Communication student is a prerequisite for this class.

CMN 598 | STUDY ABROAD | 4 quarter hours (Graduate)
Expand international learning opportunities that effectively prepare students to be successful, innovative leaders and community members in a diverse global society.

Communication Studies (CMNS)

CMNS 205 | COMMUNICATION, CULTURE AND COMMUNITY | 4 quarter hours (Undergraduate)
Examines the relationships among culture, communication, institutions, and public and private life. Students explore the possibilities and problems of contemporary forms of community through service in community organizations or through extensive individual or group research projects. The course also fulfills the junior year experiential learning requirement through community based service learning.

CMNS 211 | INTERPERSONAL COMMUNICATION | 4 quarter hours (Undergraduate)
An introduction to the factors that shape communication between two people. Topics include self-concept formation, perception, message formation, verbal and nonverbal communication, active listening, and defensiveness. (Formerly RELC 211)

CMNS 221 | HOW LANGUAGE WORKS: INTRODUCTION TO LINGUISTICS | 4 quarter hours (Undergraduate)
The focus of this course is on linguistics as the study of how language works in the minds and brains of its speakers, taking an approach that focuses on the mental representation of language. We develop a theory of language knowledge that includes knowledge of sound systems, sentence structure, and meaning, and along the way we investigate data from diverse languages to illustrate how linguists think and reason. We also draw connections between linguistic knowledge and other types of cognition, as well as connections between linguistics and related fields, including philosophy, psychology, and neuroscience.

CMNS 230 | PERFORMANCE: COMMUNICATION, CREATIVITY AND THE BODY | 4 quarter hours (Undergraduate)
Introduction to performance studies, examining the persuasive, cultural, and artistic dimensions of embodied communication. Through “on our feet” engagement, students will study the role of identity, aesthetics, space, genre, and literary form in their experience with cultural texts, including poetry, prose, and narratives. Involves critical and creative analyses of texts in preparation and reflection of live performance. The course explores how the body, voice, and movement are central to artistry and meaning. (Formerly INTC 230)

CMNS 280 | INTRODUCTION TO DIGITAL MEDIA SKILLS | 4 quarter hours (Undergraduate)
This course introduces students to the necessary skills for digital media content creation. Students learn about conceptual and technical skills related to digital media. The course provides an introduction to tools and platforms used to produce online content.

CMNS 282 | STATISTICS IN HUMAN COMMUNICATION | 4 quarter hours (Undergraduate)
The study of human communication involves observing patterns in human interaction and message behavior. This course introduces students to the statistics most relevant to the field of human communication. Course activities emphasize quantitative reasoning: the measurement of communication variables; performing statistical analyses (e.g., correlation, regression, t-test, ANOVA); interpreting and communicating statistical results; and ethical considerations in data collection, analysis, and research conclusions. LSP 120 is a prerequisite for this class.

CMNS 290 | COMMUNICATION WORKSHOP (VARIABLE TOPICS) | 2 quarter hours (Undergraduate)
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (2 quarter hours)

CMNS 291 | RESEARCH METHODS | 4 quarter hours (Undergraduate)
This course is an introduction to the study of communication through the observation and analysis of empirical (i.e. aspects of the observable world) data. It will stress how to form appropriate questions from the theories (or hunches, dreams etc.) and rigorously test these propositions (quantitatively and qualitatively) to see how well they correspond to the world outside ourselves. An added benefit of the course will be to show how to be a more informed judge of the claims of others. The format of the course is lecture/discussion. Students cannot earn credit for both CMNS 291 and PRAD 291.
CMNS 300 | MUSIC INDUSTRIES AND CULTURE | 4 quarter hours
(Undergraduate)
This course critically examines music as a form of cultural communication and as a media industry. Students learn about historical changes in the music business, contemporary issues that industry insiders negotiate, do-it-yourself alternatives to mainstream industry practices, and how music functions as a unique source for collective fandom. Cannot earn credit in conjunction with "MCS 368: Music Industries" class.

CMNS 301 | AUDIO DOCUMENTARY | 4 quarter hours
(Undergraduate)
This course uses hands-on projects so that students can explore the steps in the process of creating an audio documentary. Through practical application students consider questions that surround the interpretation of cultural experience. Additionally, students analyze a variety of approaches to audio documentary in an effort to understand better this significant form of storytelling.

CMNS 304 | COMMUNICATION, CODING & ENTREPRENEURSHIP | 4 quarter hours
(Undergraduate)
Students from College of Computing and Digital Media and the College of Communication will use communication theory to solve problems by implementing web-based solutions using an entrepreneurial framework. Students will learn how communication theory and web design can complement each other to create a web/app-based business. No coding experience needed for communication students.

CMNS 305 | PERFORMANCE STUDIES | 4 quarter hours
(Undergraduate)
The course traces the shift from the field of Oral Interpretation to the emergence of Performance Studies as a discipline, with particular attention to the primary theorists and practitioners who have set the foundation and scope of the field of Performance. Taking an historical approach to the development of the field, the course will explore performance epistemologies, performative methodologies, and performative theories, offering students the opportunity to study and engage contemporary approaches to performance research.

CMNS 306 | TOPICS IN PRESENTATION | 4 quarter hours
(Undergraduate)
Courses offer advanced analysis of presentational forms. Students will enact presentational theories in relational, small group, or public communication contexts.

CMNS 307 | TOPICS IN POLITICAL AND SOCIAL COMMUNICATION | 4 quarter hours
(Undergraduate)
Examines intensively one or more issues in the Culture and Communication Track. The topics differ each term focusing on a particular area of discourse such as environmental communication, political communication, and sexuality and communication. (Formerly INTC 307)

CMNS 308 | TOPICS IN INTERCULTURAL COMMUNICATION | 4 quarter hours
(Undergraduate)
Examination of the application of linguistic and rhetorical theories to various specializations in cultural discourse. The course focuses each term on one particular area such as semiotics, language acquisition, or language and power. (Formerly INTC 308)

CMNS 309 | INTERNATIONAL/GLOBAL COMMUNICATION | 4 quarter hours
(Undergraduate)
As the world has become immensely and intricately connected through immigration/diaspora, travel, technology, and intercultural trade, it's imperative to equip ourselves with knowledge and understanding of the dynamic and complex international cultures as well as the impact of globalization on individual countries. This course is intended to introduce concepts, theories, practices, and experiences of international/global communication from scholarly research and empirical studies. It focuses on issues of history, power relations, cultural norms and practices, intersectionality of identities, effects of media/social media, international conflict, and community building through dialogues and common goals in the international/global context.

CMNS 311 | TOPICS IN RELATIONAL COMMUNICATION | 4 quarter hours
(Undergraduate)
Explores specialized topic within the field of interpersonal communication. Past topics have included: emotions & communication, gender & its relation to interaction, the "social construction" of interpersonal realities, etc. (Formerly RELC 311)

CMNS 312 | EVOLUTION AND COMMUNICATION | 4 quarter hours
(Undergraduate)
This seminar explores how communication, across a variety of topics, can be understood with respect to the theory of evolution. Specifically, this course examines how millions of years of human evolution influences how people interact in their personal and social relationships. (Formerly RELC 312)

CMNS 313 | NONVERBAL COMMUNICATION | 4 quarter hours
(Undergraduate)
This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include: physical appearances, gestures, face and eye behavior, vocalics, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts. (Relational, Group, Organizational) (Formerly RELC 313)

CMNS 314 | FAMILY COMMUNICATION | 4 quarter hours
(Undergraduate)
This course surveys topics relevant to understanding communication phenomena in the setting of the family. Topics include: family systems, patterns, meaning, themes, roles and types, family life cycles, stressors and conflict, changing family forms and contexts. (Relational, Group, Organizational) (Formerly RELC 314)

CMNS 315 | HEALTH COMMUNICATION | 4-6 quarter hours
(Undergraduate)
This survey course examines communication as the principle means by which health care is delivered, understood, and experienced. The course surveys the theory and practice of communication as it relates to health in a range of contexts (e.g. interpersonal, small group, organizational, public and/or mediated contexts) with a particular emphasis on critical thinking.
CMNS 317 | PERFORMANCE OF RITUAL | 4 quarter hours
(Undergraduate)
Participating in and performing rituals is part of what makes us human. Rituals develop and define cultural life. Rituals in modern life include macro events like the transfer of power in a government as well as micro rites of passage, known as ?coming of age? events, whether defined experientially (acquiring a driver?s license) or chronologically (turning 21). Here in the United States, many so-called rituals have an ambiguous purpose while others are clearly defined. In this course we will be looking at a range of rituals and the communicative and symbolic elements connected to the performance of them. We will examine, for example, the ritual of acquiring a tattoo, voting, participation in a marriage ceremony, rituals surrounding birth and death, as well as the absence of rituals for life-changing events (i.e. divorce/break up and miscarriage). We will ask as many questions as we answer: What roles do ritual, myth, and symbol play in human experience and everyday life? How do rituals reflect, produce, or deflect reality? How do they reinforce socio-political power structures while potentially providing options for resistance?

CMNS 318 | CLOSE RELATIONSHIPS | 4 quarter hours
(Undergraduate)
This course examines the role of communication in the development, maintenance, and deterioration of romantic attachments. Topics include attraction, intimacy and self-disclosure, attachment beliefs, jealousy, satisfaction, commitment, trust, betrayal, conflict, autonomy, interdependence, etc. (Relational) (Formerly RELC 318)

CMNS 319 | THE DARK SIDE OF PERSONAL RELATIONSHIPS | 4 quarter hours
(Undergraduate)
This course explores the "dark side" of interpersonal communication by examining the growing literature on the troubling or problematic aspects of close relationships. Topics covered include relational dilemmas, relational control and dominance, hurtful messages, paradoxic communication, social predicaments, relational transgressions, privacy violations, physical abuse, verbal aggression, etc. (Formerly RELC 319)

CMNS 320 | DECEPTIVE COMMUNICATION | 4 quarter hours
(Undergraduate)
Explores the use of deceptive communication in social and personal relationships from a range of theoretical perspectives including ethics, evolutionary biology, linguistics, social and developmental psychology and jurisprudence. (Formerly RELC 320)

CMNS 321 | CULTURAL AND SYMBOLIC CRITICISM | 4 quarter hours
(Undergraduate)
Introduction to the critical methodologies of rhetorical analysis. Students are instructed in ways to become more reflective consumers of discourse by examining how rhetoric instructs reality, shapes the social and political agenda and engages questions of ethics, power and persuasion. The course promotes a critical awareness of the role symbols play in influencing human perception, attitude, and action in a diverse culture. (Formerly INTC 321)

CMNS 322 | SOCIAL MOVEMENTS | 4 quarter hours
(Undergraduate)
This course examines the rhetoric of social movements throughout American History. As a rhetoric class, the focus is primarily on the symbolic creation of movements in order to provide background of the political and social events that gave rise to the movement. Using readings from a variety of sources, we will investigate the discursive construction of power as it relates to society and politics. The class will take a case-study approach to examining social movement rhetoric, exploring the discourse that has served to resist oppressive, or perceptively oppressive, systems. (Formerly INTC 322)

CMNS 324 | CULTURE OF CONSUMPTION | 4 quarter hours
(Undergraduate)
Introduces students to the critique of our consumer culture. Teaches students how to be critical consumers and understand how to be critical consumers and understand how we consume lifestyles, images, aesthetics, and desire through our shopping patterns. Provides theoretical, observational, and critical tools that allow students to critique patterns of consumption, the production of culture through consumption, and how consumption is a means of communication. (Formerly INTC 324)

CMNS 325 | PROMOTING SUSTAINABLE PRACTICES | 4 quarter hours
(Undergraduate)
Provides a foundation in the communication skills necessary for achieving conservation goals. Introduces communication approaches such as social marketing, citizen participation, public campaigns, and environmental interpretation that have proven effective in the work of conservation professionals. (Formerly INTC 325)

CMNS 326 | ENVIRONMENTAL POLITICS AND RHETORIC | 4 quarter hours
(Undergraduate)
Rhetorical perspective on environmental public discourse. Course also explores the relationship between rhetorically constituted ideas about nature and the development of political and social ideas, institutions, and practices that inform our understanding of the human place in the environment. (Formerly INTC 326)

CMNS 327 | RESEARCHING RELATIONSHIPS | 4 quarter hours
(Undergraduate)
Researching Relationships provides an overview of the concepts, methods and tools by which interpersonal/relational research is designed, conducted, interpreted, and critically evaluated. Quantitative, qualitative, and critical interpersonal/relational research will be examined. The primary goals of the course are to help students become knowledgeable consumers and producers of relational communication research by developing skills in gathering, organizing, interpreting and presenting research information using informed, competent, and ethical methods.

CMNS 328 | HISTORY OF RHETORIC AND COMMUNICATION | 4 quarter hours
(Undergraduate)
Offers an overview of historical foundations of the communication field. Examines how the formulations of rhetoric by various thinkers derived from cultural, religious, and political contexts shape human consciousness and communication patterns. Students read primary and secondary materials on classical rhetoric and rhetoric of diverse cultures. The course promotes an understanding and appreciation of antiquity and development of ideas over time in relation to current cultural and communicative patterns. (Formerly INTC 328)

CMNS 329 | PERSUASION | 4 quarter hours
(Undergraduate)
Explores major theoretical assumptions of current persuasion research. Examines causes and effects of effective and ineffective persuasion. Analyzes persuasive skills and strategies for a variety of persuasion applications, e.g. political, interpersonal, intercultural, and advertising. (Formerly RELC 329)
CMNS 330 | TOPICS IN PERFORMANCE | 4 quarter hours
(Undergraduate)
Advanced study in performance focusing on a specific genre each quarter such as: Poetry, Fiction, Nonfiction, Drama or Chamber Theater. Other possibilities include: performing autobiography; life performances; ritual, ceremony, and storytelling; and radio and television performances. (Formerly INTC 330)

CMNS 331 | COMMUNICATION FIELDWORK | 4 quarter hours
(Undergraduate)
Provides students with experience conducting qualitative research, including data collection techniques, data coding and analysis, as well as interpretation of data and writing ethnographic reports. In addition to providing practical hands-on training in ethnographic research, this course serves to explore the theory, ethics, and politics behind various research methodologies. (Formerly INTC 331)

CMNS 333 | CULTURES IN CONVERSATION | 4 quarter hours
(Undergraduate)
Whenever we communicate, we show parts of our identities, perspectives, values, and norms. In short, when we interact with others, we reveal culture. Because we are cultural beings and we each belong to various cultural groups, interactions can often backfire and misunderstandings may occur. This course teaches a specialized way to listen for culture in conversation in order to become competent and successful communicators no matter the context. Whether you are navigating difficult relationships with family and friends, or attempting to succeed at work and school, this course will help you learn strategies to decipher cultures in conversation and become competent navigators of cultural misunderstandings.

CMNS 334 | URBAN COMMUNICATION | 4 quarter hours
(Undergraduate)
Examines relationships between material features of the city and symbolic representations of urban life (e.g., photography, film, songs, public discourse) with the goal of understanding the city as a site of communication. Special attention is paid to expressions of hope for and fear of the city. (Formerly INTC 334)

CMNS 335 | LATINX COMMUNICATION, ADVOCACY AND COMMUNITY BUILDING | 4 quarter hours
(Undergraduate)
Students will examine the relationships between Latino cultures, communication, institutions, and public and private life. Message crafting and relationship building for strategic objectives will be examined through the lens of multiculturalism. This course will teach students how to manage diversity issues for Latino community organizations, management, and policy advocacy.

CMNS 336 | STORYTELLING: COMMUNICATION AS NARRATIVE | 4 quarter hours
(Undergraduate)
Scholars suggest that the oldest form of communication is storytelling. Narrative theories and methodologies form a substantive core throughout the history of human communication praxis. This course responds to the contemporary resurgence of narrative and highlights its communicative aspects. Rooted in both the oral and literary traditions, this course builds and enhances skills for those who would like to use storytelling in various ways including: 1) storytelling as a teaching tool, 2) giving structure to personal narratives, 3) developing a repertoire of stories, and 4) improving general presentation skills.

CMNS 337 | ASIAN-AMERICAN MEDIA REPRESENTATIONS | 4 quarter hours
(Undergraduate)
The course takes an interdisciplinary approach in the analysis of the media images and explores issues of power, identity, race, gender, class, sexual orientation and the interaction of these factors in the representation of Asian Americans. (Formerly INTC 337)

CMNS 338 | ASIAN CULTURE AND COMMUNICATION | 4 quarter hours
(Undergraduate)
Reviews major Asian philosophical and religious traditions such as Hinduism, Confucianism, Taoism, and Buddhism and examines how these traditions influence and affect Asian cultures and communication behaviors, particularly communication among Indians, Chinese, Japanese, Koreans, and Asian Americans in various contexts. (Formerly INTC 338)

CMNS 339 | PERFORMANCE OF GENDER & SEXUALITY | 4 quarter hours
(Undergraduate)
This course is designed to give students an opportunity to experiment, explore, and reflect upon the performative dimensions of gender and sexuality. Using aesthetic performance as a point of entry, students will view, analyze, and generate performance work that interrogates the communicative, political, and transformative potentials of embodied actions. With an emphasis on the intersections of gender and sexuality, the course will move through three units of reading, discussion, viewing, and performance creation. (Formerly INTC 329)

CMNS 340 | COMMUNICATING & DATING | 4 quarter hours
(Undergraduate)
The goal of this course is provide students with a research-based understanding of the role of communication within dating relationships. Accordingly, this course traces the life-cycle of a dating relationship. Specifically, this course begins by examining initial interactions that are potentially romantic and could turn into dating interactions. Next, the course focuses on how people engage in dating relationships and the factors that influence relationships. Finally, the course concludes with what happens after dating (i.e., long term commitment/marriage, relational termination, or the death of a partner). (Formerly RELC 340)

CMNS 341 | COMMUNICATION NETWORKS IN A DIGITAL AGE | 4 quarter hours
(Undergraduate)
This course will cover theoretical explanations of processes of computer-mediated communication (CMC). In particular, students will explore explanations related to the production of online identity performance and the formation and maintenance of networked relationship connections. Students will analyze current arguments regarding social media use and apply theory and research regarding CMC to real world situations.

CMNS 342 | LIVING ONLINE | 4 quarter hours
(Undergraduate)
An overview of how people use communication technology in their everyday life. Examines a variety of communication technology in interpersonal and organizational contexts. Focus is on the appropriate and effective use of mediated communication and surveys issues including trust, privacy, identity, and relational communication.
CMN 103 is a prerequisite for this class.

This course focuses on communication at the intersections of paid work and family life. Students will approach work/family “balance” as an essentially communicative process. Throughout the quarter, students will critically analyze how communication and discourse at micro-(interpersonal), meso-(organizational), and macro-(cultural) levels enables and constrains individuals and organizations as they navigate and manage the work/family interface.

CMNS 344 | MINDFULNESS | 4 quarter hours
(Undergraduate)
This course examines the role of mindfulness in everyday interaction. It explores how mindfulness practices can influence how people related to each other, create mutually beneficial partnerships, and help each other achieve their personal, social and relational goals. This course also examines how to apply the knowledge and skills regarding mindfulness to other contexts through the entrepreneurial process. In other words, how can principles of mindfulness be used to create value for others?

CMNS 345 | THE DARK WEB | 4 quarter hours
(Undergraduate)
The World Wide Web has developed into an incredibly powerful social force creating a new world of opportunities for human interaction, for better and for worse. This course examines the digital underworld also known as the Dark Web. The Dark Web is a sprawling yet secretive network, which provides a haven for behavior that may or may not be illegal, but is often deemed radical, unethical or immoral. Literature that examines the difficulty in maintaining the delicate balance between privacy and protection, as well as freedom and regulation in virtual spaces will be covered. Students will explore topics including trolling, exploitative content, illegal markets, and cryptocurrencies.

CMNS 346 | SOCIAL MEDIA RESEARCH METHODS | 4 quarter hours
(Undergraduate)
This course provides an overview of methodological choices for analyzing social media platforms, users, and messages. Students will learn a variety of techniques and concepts including reading analytic reports, basics of social network analysis, language processing, data visualization, and content analysis. Students will also engage in forming appropriate research questions and ethical considerations in internet research.

CMNS 347 | THE POLITICS OF HIP HOP CULTURE | 4 quarter hours
(Undergraduate)
This course examines "the political" in hip hop culture. Thus, it is not an appreciation of hip hop culture; this is, instead, a rigorous theory-based course that interrogates hip hop culture for its political potential for social equality and change. In this course, we will grapple with theories on how popular culture, representations of blackness and power intersect within the context of hip hop. This course examines "the political" in hip hop culture. Thus, it is not an appreciation of hip hop culture; this is, instead, a rigorous theory-based course that interrogates hip hop culture for its political potential for social equality and change. In this course, we will grapple with theories on how popular culture, representations of blackness and power intersect within the context of hip hop. We will also interrogate various media texts (film, music, television, and "new media") in relation to the multiple ways in which hip hop culture has been defined. Among the issues we engage are the constructions and representations of blackness, black images in popular culture, and how hip hop culture relates to underlying factors such as globalization, hyper-commodification, racism, sexism, hetero-normativity, classism, and resistance.
CMN 103 is a prerequisite for this class.

CMNS 348 | COMMUNICATING HEALTH, RACE AND REPRODUCTIVE RIGHTS | 4 quarter hours
(Undergraduate)
This course examines "the political" that arises from women's bodies and reproductive rights and practices. In this course, we will grapple with theories on how race, media representations of blackness and power intersect within the context of the female body. We will begin with a theoretical framework for our readings and discussions then we will delve into the history of women and reproduction as it relates to power; this history will focus primarily on women of the Black Diaspora which will include indigenous women of the Americas and Latinas. We will also interrogate various race-based case studies as both a force for change and for reinforcing hegemonic discourse. Among the issues we will engage are the constructions and representations of blackness and how race and reproduction relates to underlying factors such as globalization, racism, sexism, classism, and resistance. A crucial part of our task in this course is to think critically and complexly about the roles of race and racism as it pertains to the female body and reproduction within our contemporary world.
CMN 103 is a prerequisite for this class.

CMNS 349 | DIGITAL MEDIA LAW AND ETHICS | 4 quarter hours
(Undergraduate)
This course covers fundamental principles of law and ethics with specific attention to uses and applications of digital communication technologies. The class explores the interplay of law (the rights and freedoms granted to citizens under the First Amendment and the Universal Declaration of Human Rights) and applied ethics (the range of civic and professional responsibilities under consideration as citizens exercise these rights) with a focus on critical issues concerning communication technology. Emphasis will be placed on the legal privileges, regulatory limitations, and ethical issues that specifically concern digital media and information technologies within the broader context of communication law and ethics. The course focuses on legal rights and ethical responsibilities within the American framework but also includes comparative analysis with other nations and cultures to empower students to appreciate and contrast other legal and ethical decision-making frameworks.

CMNS 355 | CONFLICT MANAGEMENT | 4 quarter hours
(Undergraduate)
Examines the process of conflict in interpersonal and organizational contexts. Focuses upon the causes, types, and theories of conflict as well as upon practical approaches to dispute resolution. Topics include: social cognition, emotion, and power in conflict; personal conflict style(s); cultural and contextual factors; conflict tactics and messaging; destructive versus constructive interaction cycles; and negotiation and resolution strategies.

CMNS 360 | RELATIONAL, GROUP, AND ORGANIZATIONAL THEORY | 4 quarter hours
(Undergraduate)
This course surveys relevant theoretical developments in the field of communication. While exploring the major theoretical paradigms that inform and guide the study of human communication, students receive insight into the significance and meaning of their own day-to-day communication activities and discover how theories provide complementary and viable explanations for analyzing as well as assessing the impact of communication in relational, group and organizational contexts.
CMNS 361 | GENDER AND COMMUNICATION | 4 quarter hours (Undergraduate)
Students will discover the intricate relationship between gender, communication, and culture. The course focuses on how gender influences communication, how gender gets communicated, and how communication reflects, refracts, shapes, and revises our understandings of gender and what it means to be gendered beings. Further, the course asks what role culture plays in the communication of our gendered identities. Students work toward recognizing societal expectations of gender while discovering how we may use communication, as gendered beings, in order to improve our lives, both individually and collectively.

CMNS 362 | SOUND AND VISION | 4 quarter hours (Undergraduate)
This course introduces students to unique ways that photography and audio documentary can blend together. The course will combine documentary and experimental production to help students learn to create audio documentary and visual projects and to work in mixed-media contexts.

CMNS 363 | CLIMATE CHANGE COMMUNICATION | 4 quarter hours (Undergraduate)
Individuals make up their minds on climate change, energy development, and other science of pressing public policy importance through a complex set of factors: values, demographics, political ideology, and so on. Journalists, strategic communicators, scientists, and policy analysts need to be able to communicate effectively with diverse public audiences on climate and energy topics. This course is oriented from a science communication perspective and draws on social scientific research on communicating on climate change and energy issues. We will take a human perspective on climate issues and focuses on the social, political and cultural aspects of climate change. The course covers best practices for promoting and facilitating public dialogue on climate change policy and global energy systems. Topics covered include: climate change public opinion and knowledge, media portrayals of climate change and its societal effects, climate skepticism and denial, psychological factors that contribute to values and beliefs on climate science, journalism and covering climate issues, framing and developing narratives on climate impacts, and climate change in popular culture. Students will conduct original research to analyze and evaluate climate change communication. For the final project, students have the option of completing a major journalistic reporting project, designing an advocacy or marketing campaign, or conducting a research project. (Cross-listed with JOUR 311)

CMNS 365 | ARGUMENTATION, ADVOCACY, AND DELIBERATION | 4 quarter hours (Undergraduate)
The primary purpose of this course is to equip students with a heightened capacity for reasoning so that they will be better prepared to participate in argumentation, advocacy, and deliberation in a number of contexts (academic, work place, public life). This course focuses on critical thinking, effective argumentation, and civil dialogue. Students in the class will develop and evaluate reasoned arguments; practice the skills of critical thinking; and deliver class presentations.

CMNS 366 | COMMUNICATION, TECHNOLOGY AND SOCIETY | 4 quarter hours (Undergraduate)
Survey of a variety of contemporary and historical issues related to the introduction and diffusion of communication technologies in society. Especially examines how new technologies, particularly the Internet, are transforming the communication landscape. Emphasis on issues of intellectual property, surveillance, privacy, regulation, message construction, and access will be central to this course.

CMNS 367 | PERFORMANCE FOR SOCIAL CHANGE | 4 quarter hours (Undergraduate)
There is no greater obstacle facing our culture right now than the intensified divisions that exist in our politics and the inability to speak with and listen to those who do not agree with our positions. As a special topics course focusing on polarization in our society, this class will focus on the role of performance and creative intervention (theater, poetry, aesthetics communication) as a tool to facilitate dialogues across difference. Practical and applied in its design, this course will call for students to examine what it means to seek out and sit with differences in perspective, listen to differences in understanding and work to bridge disparate worldviews. Students will challenge their own communication practices, engage and practice difficult dialogues, script, and stage performance work that works to foster discussion within and across disagreement.

CMNS 369 | PERFORMANCE OF HUMOR | 4 quarter hours (Undergraduate)
This course provides a critical and performative exploration into the role of humor and comedy in our social world. Often layered, complex, and contested, the communicative and critical workings of humor mark an ongoing site of cultural struggle, cultural tension, and heated debate. This course engages humor from a performative lens, which calls for us to consider the embodied, contextual, relational, historical, and political dimensions of comedy. The first unit in the course offers a broad theoretical framework to discuss the doings of humor, as well as providing a foundational class vocabulary in the concepts of satire, irony, parody, ideology, performance, performativity, and the absurd. The second section looks to the construction of the ironic persona as a site of humor and a tool for cultural criticism, reflection, and parody. The third unit, coinciding with the November election, looks to political satire as a tool for questioning, challenging, and complicating sedimented cultural systems, performances, and beliefs. Finally, the last unit broadens out our understanding of comedy to explore the notion of harmony, looking to humor as a space for disrupting hierarchies of power and building alternative forms of community.

CMNS 371 | PERFORMANCE OF RITUAL | 4 quarter hours (Undergraduate)
Participating in and performing rituals is part of what makes us human. Rituals develop and define cultural life. Rituals in modern life include macro events like the transfer of power in a government as well as micro rites of passage, known as ?coming of age? events, whether defined experientially (acquiring a driver?s license) or chronologically (turning 21). Here in the United States, many so-called rituals have an ambiguous purpose while others are clearly defined. In this course we will be looking at a range of rituals and the communicative and symbolic elements connected to the performance of them. We will examine, for example, the ritual of acquiring a tattoo, voting, participation in a marriage ceremony, rituals surrounding birth and death, as well as the absence of rituals for life-changing events (i.e. divorce/break up and miscarriage). We will ask as many questions as we answer: What roles do ritual, myth, and symbol play in human experience and everyday life? How do rituals reflect, produce, or deflect reality? How do they reinforce socio-political power structures while potentially providing options for resistance?.
CMNS 373 | INTERPERSONAL COMMUNICATION, POWER, AND SOCIAL JUSTICE | 4 quarter hours
(Undergraduate)
This course is organized around the central question: how does interpersonal communication reinforce, maintain, or resist dominant power relations in our relationships, families, organizations, and communities? In it, students will apply critical interpersonal communication scholarship and theory to a range of topics, with a focus on how interpersonal interactions contribute to the equitable or inequitable distribution of wealth, opportunities, and privileges in society.

CMNS 377 | SPECIAL TOPICS IN COMMUNICATION STUDIES: CUSTOMER SERVICE COMMUNICATION | 4 quarter hours
(Undergraduate)
CMNS 382 | APPLIED RESEARCH METHODS IN COMMUNICATION STUDIES | 4 quarter hours
(Undergraduate)
In this course, students apply quantitative research methods to answer questions about human communication. Students pose research questions, select and design quantitative measures, collect quantitative data, conduct descriptive and inferential statistical analyses, and interpret results.

LSP 121 (or MAT 137 or MAT 242 or PSY 240 or SOC 279) is a prerequisite for this course.

CMNS 393 | COMMUNICATION STUDIES PRACTICUM | 2 quarter hours
(Undergraduate)
Structured and supervised student participation in group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours. Written permission of supervising faculty member and of the departmental chair is necessary before registration.

CMNS 377 | SPECIAL TOPICS IN COMMUNICATION STUDIES: CUSTOMER SERVICE COMMUNICATION | 4 quarter hours
(Undergraduate)
CMNS 382 | APPLIED RESEARCH METHODS IN COMMUNICATION STUDIES | 4 quarter hours
(Undergraduate)
In this course, students apply quantitative research methods to answer questions about human communication. Students pose research questions, select and design quantitative measures, collect quantitative data, conduct descriptive and inferential statistical analyses, and interpret results.

LSP 121 (or MAT 137 or MAT 242 or PSY 240 or SOC 279) is a prerequisite for this course.

CMNS 401 | INTRODUCTION TO CONFLICT RESOLUTION | 4 quarter hours
(Undergraduate)
This course is designed to provide an overview of conflict resolution theories, techniques, and strategies. Students will learn about various approaches to conflict resolution, including mediation, negotiation, and collaborative problem-solving. The course will also explore the role of communication in conflict resolution.

CMNS 402 | INTERPERSONAL COMMUNICATION, POWER, AND SOCIAL JUSTICE | 4 quarter hours
(Undergraduate)
This course is organized around the central question: how does interpersonal communication reinforce, maintain, or resist dominant power relations in our relationships, families, organizations, and communities? In it, students will apply critical interpersonal communication scholarship and theory to a range of topics, with a focus on how interpersonal interactions contribute to the equitable or inequitable distribution of wealth, opportunities, and privileges in society.

CMNS 403 | SPECIAL TOPICS IN COMMUNICATION STUDIES: CUSTOMER SERVICE COMMUNICATION | 4 quarter hours
(Undergraduate)
CMNS 382 | APPLIED RESEARCH METHODS IN COMMUNICATION STUDIES | 4 quarter hours
(Undergraduate)
In this course, students apply quantitative research methods to answer questions about human communication. Students pose research questions, select and design quantitative measures, collect quantitative data, conduct descriptive and inferential statistical analyses, and interpret results.

LSP 121 (or MAT 137 or MAT 242 or PSY 240 or SOC 279) is a prerequisite for this course.

CMNS 404 | COMMUNICATION IN CULTURAL CONTEXTS | 4 quarter hours
(Undergraduate)
This course examines the relationship between culture and communication in various international and co-cultural contexts. It analyzes theories, concepts, personal narratives, and empirical studies on intercultural and multicultural communication. It engages students in dialogues and reflections of the readings and familiarizes students with various approaches to intercultural communication studies. The course aims to develop students' self-reflectivity, critical thinking and analytical skills in the observation, interpretation, and understanding of communication in various cultural contexts. Formerly CMN 501.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

CMNS 506 | SEMINAR IN INTERPERSONAL COMMUNICATION | 4 quarter hours
(Graduate)
This course focuses on communication between individuals in the context of personal and professional relationships. Various theoretical and methodological approaches to the study of interpersonal communication, major interpersonal communication dynamics and processes, and contemporary concerns of interpersonal communication researchers and practitioners will be discussed. Students will critique and apply interpersonal scholarship to address communication problems in personal and professional contexts.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

CMNS 507 | ATTACHMENT & RELATIONAL COMMUNICATION | 4 quarter hours
(Graduate)
This course will explore the unique role that attachment styles play in the formation, maintenance, and deterioration of close relationships. Attachment theory will be used to examine how working models of self and other influence patterns of interaction among relational partners. Topics will include how attachment styles influence self-disclosure, conflict resolution, jealousy and deceptive communication. Students will also explore communicative strategies for dealing with attachment related problems.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 509 | SPECIAL TOPICS IN MULTICULTURAL COMMUNICATION | 4 quarter hours
(Graduate)
Course covers a variety of topics that address theories about multicultural communication such as culture, gender, sexual orientation, race, and ethnicity.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 511 | TOPICS IN INTERPERSONAL COMMUNICATION | 4 quarter hours
(Graduate)
Explores specialized topics within the field of relational communication. Past topics have included emotions and communication, gender and its relationship to interaction, and the social construction of interpersonal realities.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
CMNS 513 | NONVERBAL COMMUNICATION | 4 quarter hours  
(Graduate)

Nonverbal messages are important as we typically monitor our own nonverbal messages less, but believe others nonverbal messages more than their verbal messages. Likewise, research suggests that 65% of our communication is based on nonverbal messages and some estimates are as high as 93%. Clearly such messages are important, yet we spend little time examining such messages. That said, the goal of this course is to provide you with a research based overview of a variety of nonverbal messages, that is, everything we communicate without using our words. This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include physical appearances, gestures, face and eye behavior, vocalic, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 522 | COMMUNICATING IDENTITY | 4 quarter hours  
(Graduate)

Focuses on the rhetorical theories and practices through which various cultural groups within the US. construct a sense of identity. The course examines different rhetorical forms and strategies through an analysis of the rhetorical situations, texts and artifacts of various cultural groups.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 523 | GENDERED COMMUNICATION | 4 quarter hours  
(Graduate)

Examines research into the ways the various aspects of communication are affected by and affect the social construction of gender. Topics covered include language and language usage differences, interaction patterns and perceptions of the sexes generated through language and communication. (Cross-listed as MLS 445/WMS 440).  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 524 | NARRATIVES IN HEALTH CARE | 4 quarter hours  
(Graduate)

Focusing on the performance and narrative paradigms of communication studies, the course will survey uses of performance and narrative methods to consider health communication relationships. Narrative and narrative performance are sites of health communication issues for marginalized populations, difficult conversations, and alternate means of reporting. For example, narrative and narrative performance are increasingly being used as part of medical curriculum, as a means to train health care professionals to understand the experiences of their patients, encourage deep listening, and foster different professional-patient relations. For cancer, HIV/AIDS, and other patients, performance becomes a means of speaking into mainstream and dominant discourses of health and to actively shape discourses from their own subjectivities. This increases the visibility of health care experiences in their gendered, sexualized, and racialized dimensions. Finally, narrative and narrative performance offers an additional means of visibility in catalyzing change in public, legislative, scholarly and relational arenas.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 525 | COMMUNICATION TRAINING FOR INTERNATIONAL WORK | 4 quarter hours  
(Graduate)

Examines and contrasts the management philosophies of different cultures around the world, paying special attention to how European and Asian organizational practices influence structure, culture and communication within American corporations.  
Status as a College of Communication Graduate Student, Organizational Diversity MBA Student or department consent is a prerequisite to this class.

CMNS 527 | ASSESSMENT AND INTERVENTION IN ORGANIZATIONS | 4 quarter hours  
(Graduate)

Organizations are symbolic realities constructed by humans in communication. In other words, organizations are creations, and both organizational members and observers need to comprehend them as such. Communication 527 is devoted to preparing you to become communication professionals able to understand organizations through the analysis of organizational patterns of meaning and expectations. Communication professionals help organizations to improve communication by (1) identifying differences between actual and desired conditions of communication and (2) devising ways to close the gap between actual and desired states. The first function involves organizational communication evaluation (gathering, analyzing, and interpreting data about an organization’s communication processes). The second function is referred to as intervention (actions taken to improve organizational communication). People who perform organizational communication evaluation and intervention may be members of the organization or outside agents brought in to perform specific projects. This class will focus on the role of the communication professional in the maintenance and change of organizational communication functions, structures, and the communication processes that occur at various systems levels, including dyads, groups, intercultural and multicultural relations, and organization-wide network processes.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 528 | THE SOCIAL CONSTRUCTION OF HEALTH AND ILLNESS | 4 quarter hours  
(Graduate)

Beginning with foundational theories and principles of social construction, the course examines cases illustrating socially-constructed features of healthcare. We discuss (a) medicine as a gendered and hierarchical institution, (2) specialized languages used to describe/construct specific illnesses (e.g. anorexia and obesity, addiction, depression, HIV/AIDS), and (3) how constructed realities become internalized through primary and secondary socialization within the family, through media, and through encounters with the health care system.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
CMNS 529 | TOPICS IN ORGANIZATIONAL AND MULTICULTURAL COMMUNICATION | 4 quarter hours  
(Graduate)  
This course offers students a variety of special topic areas related to organizational and multicultural communication. Students will have opportunities to delve more deeply into each topic area working with instructors who have specialized expertise in that area. Typical topics include but are not limited to Global Workplaces and International Management, Organizational Identity, Critical Theory, and Latino(a) Representation.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 530 | INSTRUCTIONAL DEVELOPMENT | 4 quarter hours  
(Graduate)  
This course is designed to assist in understanding the principles necessary for effective design, delivery and evaluation of instruction based on awareness of differing learning styles, subject content, the educational setting, and learning outcomes. This course examines issues related to instructional development by emphasizing the components that are critical in the development, delivery, and assessment of quality teaching and learning experiences in both academic and organizational settings. Students will have the opportunity to implement instructional strategies in the class setting.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 532 | INTRODUCTION TO TRAINING AND DEVELOPMENT | 4 quarter hours  
(Graduate)  
This course provides an introduction to training and its relationship to organizational problem solving. Basic and advanced training strategies are taught within the context of developing organizations. Organizations often have in house training and development specialists that facilitate on-going organizational change processes. The functions of such human relations specialists are explored and the kinds of communication knowledge, competencies and skills needed to enact such functions are examined.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 541 | ORGANIZATIONAL COMMUNICATION AND CULTURE | 4 quarter hours  
(Graduate)  
The central purpose of this course is to introduce students to the role communication plays in organizational life. Throughout the quarter, attention will be devoted to examining the various theoretical perspectives from which organizational communication can be viewed, and selectively surveying major content topics and current issues in the organizational communication literature.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 542 | MULTICULTURAL COMMUNICATION IN THE WORKPLACE | 4 quarter hours  
(Graduate)  
Multicultural issues affect the communication of organizational members on a day-to-day basis. This course examines multicultural issues in professional settings. It provides students with knowledge about co-cultural communication patterns, which will enhance their own ability to interact. Further, it demonstrates how multicultural communication can be an organizational asset.  
Status as a College of Communication Graduate Student, Organizational Diversity MBA Student or department consent is a prerequisite to this class.

CMNS 543 | COMMUNICATION AND ORGANIZATIONAL CHANGE | 4 quarter hours  
(Graduate)  
Change in an organization implies change in communicative processes at the individual, dyadic, group and systemic levels. Communication variables that define patterns of interaction within these organizational contexts will be examined as well as key issues that might cause communication difficulties.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 545 | COMMUNICATION AND TECHNOLOGY | 4 quarter hours  
(Graduate)  
Communication and Technology explores the process through which technological and social systems co-create or invent each other. As such, this course not only examines the role that new communication technologies play in shaping our social systems and the organizations within them, but also looks at how social, cultural, economic and legal contexts influence the development and emergence of these technologies.  
Status as a College of Communication Graduate student or Experience Design student or department consent is a prerequisite for this class.

CMNS 548 | TEAMS, DIVERSITY AND LEADERSHIP | 4 quarter hours  
(Graduate)  
Modern organizations are increasingly interested in shifting their organizational structures toward the goal of creating self-managed work teams. Therefore, the current communication graduate greatly benefits from knowledge and experience with two interdependent aspects of group dynamics: decision-making under conditions of uncertainty, and the philosophy and practice of developing groups into self-managed teams. The December quarter version of this course will combine a relatively brief period of lecture/discussion with a teamwork intensive action learning component towards the goal of making each student competent to either spearhead a change to self-managed work teams in their own organization (if called upon to do so), or to understand and weather this change in work mode without stress.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 549 | SPECIAL TOPICS IN ORGANIZATIONAL COMMUNICATION | 4 quarter hours  
(Graduate)  
Course covers a variety of topics that address theories about organizational communication such as group processes, conflict management, and leadership.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
CMNS 552 | RELATIONSHIPS AND INFLUENCE IN THE WORKPLACE | 4 quarter hours  
(Graduate)  
This course explores the process by which communicators attempt to accomplish their goals. In particular, this course covers theories of persuasion, strategic message design (creating messages that take into account multiple audiences and goals), and how the inferential process influences decision-making.  
Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

CMNS 563 | MULTICULTURAL MEDIA REPRESENTATIONS | 4 quarter hours  
(Graduate)  
This course examines both representational practices and theories that are informed by multicultural perspectives. It explores ways in which scholars and media practitioners have dealt with the epistemological problem of “difference” The course may take up topics such as race, class, age, and sexual orientation as categories of difference that have informed and continue to inform academic inquiries. The course also looks at historical and/or contemporary media texts, and analyzes them through these methods.  
Status as a College of Communication Graduate Student, Critical Ethnic Studies Student or department consent is a prerequisite to this class.

CMNS 570 | INTRODUCTION TO DIGITAL CMN | 4 quarter hours  
(Graduate)  
This course will provide students with a detailed critical introduction to the field of digital communication. Topics will include practical applications of digital communication across disciplines: communication studies, journalism, public relations, advertising, media and cinema studies, and communication technology. This class will offer students a glimpse of those disciplines and allow them to integrate them all together. Additionally, this course will provide an entry point for students into the program who have had little experience with either digital technology or communication courses. Ideally, this course would be a critical introduction to the field.  
Status as a student in Digital Communication and Media Arts (CDM or College of Communication) or the Digital Communication Certificate or department consent is a prerequisite for this class.

CMNS 573 | WORK/LIFE COMMUNICATION AND WELLNESS | 4 quarter hours  
(Graduate)  
Work/life at all levels is enacted through communication, as individuals take up, contest, and re-inscribe work/life boundaries and negotiate work/life conflicts with other social and institutional actors. This seminar examines the communication theory and practice of work/life management at the individual, dyadic, familial, and organizational levels. Topics include family, health, and labor policy; organizational wellness initiatives and interventions; and the pursuit of personal work/life "balance" across the life course.  
Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.

CMNS 581 | QUALITATIVE RESEARCH METHODS | 4 quarter hours  
(Graduate)  
Introduction to qualitative approaches to research in communication. The course includes a systematic review and application of ethnography, unstructured interviewing, personal document analysis, historical research, and critical practice. Addresses the rationale, method, and theory of each qualitative approach to research in addition to placing emphasis upon data collection and interpretation.  
Status as a College of Communication Graduate Student, Critical Ethnic Studies Student or department consent is a prerequisite to this class.

CMNS 582 | QUANTITATIVE RESEARCH METHODS | 4 quarter hours  
(Graduate)  
Introduces students to quantitative approaches to research and basic statistics. Topics include research design and control, survey construction, measurement and other general research issues, nonparametric statistics, correlation, the t-test and analysis of variance.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 583 | RESEARCH METHODS | 4 quarter hours  
(Graduate)  
Focuses on developing an understanding of appropriate quantitative and qualitative research methodologies and relevant descriptive and inferential statistics for the investigation of both practical and theoretical problems in the study of communication. By considering the nature, concepts, and logic of the research enterprise, permits a critically informed assessment of published research, including data gathering and data analysis procedures.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 584 | METHODOLOGICAL TOPICS | 4 quarter hours  
(Graduate)  
This course is a special topics course in research methods, wherein students study and practice a specialized approach to data collection and knowledge generation. Students will engage the philosophical foundations and practical methodological operations of the study of human communication from a specific research perspective.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 585 | THE POLITICS OF HIP HOP CULTURE | 4 quarter hours  
(Graduate)  
This course examines "the political" in hip hop culture. Thus, it is not an appreciation of hip hop class; this is, instead, a rigorous theory-based course that interrogates hip hop culture for its political potential for social equality and change. In this course, we will grapple with theories on how popular culture, representations of blackness and power intersect within the context of hip hop. This course examines "the political" in hip hop culture. Thus, it is not an appreciation of hip hop class; this is, instead, a rigorous theory-based course that interrogates hip hop culture for its political potential for social equality and change. In this course, we will grapple with theories on how popular culture, representations of blackness and power intersect within the context of hip hop. We will also interrogate various media texts (film, music, television, and "new media") in relation to the multiple ways in which hip hop culture has been defined. Among the issues we engage are the constructions and representations of blackness, black images in popular culture, and how hip hop culture relates to underlying factors such as globalization, hyper-commodification, racism, sexism, hetero-normativity, classism, and resistance.  
Status as a Communication and Media graduate student is a prerequisite for this class.
CMNS 586 | COMMUNICATING HEALTH, RACE AND REPRODUCTIVE RIGHTS | 4 quarter hours (Graduate)
This course examines "the political? that arises from women's bodies and reproductive rights and practices. In this course, we will grapple with theories on how race, media representations of blackness and power intersect within the context of the female body. We will begin with a theoretical framework for our readings and discussions then we will delve into the history of women and reproduction as it relates to power; this history will focus primarily on women of the Black Diaspora which will include indigenous women of the Americas and Latinas. We will also interrogate various race-based case studies as both a force for change and for reinforcing hegemonic discourse. Among the issues we will engage are the constructions and representations of blackness and how race and reproduction relates to underlying factors such as globalization, racism, sexism, classism, and resistance. A crucial part of our task in this course is to think critically and complexly about the roles of race and racism as it pertains to the female body and reproduction within our contemporary world.
Status as a Communication and Media graduate student is a prerequisite for this class.

CMNS 590 | COMMUNICATION WORKSHOP (VARIABLE TOPICS) | 2 quarter hours (Graduate)
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (2 quarter hours)
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 592 | INDEPENDENT STUDY | 4 quarter hours (Graduate)
Students will be guided in the development of a special project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member. (Variable credit).
Status as a Graduate Communication student and Director Consent is a prerequisite for this class.

CMNS 594 | DCMA THESIS 1 | 4 quarter hours (Graduate)
Enroll in CMNS 594 during the term before you plan on taking Thesis II. This is a graded, 4-credit hour course. Tuition is charged and loan deferment is available. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. This class is for DCMA students in the Digital Communication concentration and follows DMA 695.
A concentration in Digital Communication and CMNS 594 are prerequisites for this class.

CMNS 595 | DCMA THESIS II | 4 quarter hours (Graduate)
Enroll in CMNS 595 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged and loan deferment is available. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. This class is for DCMA students in the Digital Communication concentration and follows DMA 695.
A concentration in Digital Communication and CMNS 594 are prerequisites for this class.

CMNS 596 | GRADUATE CAPSTONE | 4 quarter hours (Graduate)
The graduate capstone course is designed to accompany the completion of an exit project, an option to fulfill the requirements for an M.A. in the following programs: Organizational and Multicultural, Relational Communication, and Health Communication. Under the mentorship of a faculty member, students will design and create an exit project as guided by their chosen committee. The students in the course will serve as peer collaborators for one another, providing resources throughout the exit project process. The purpose of an exit project is to allow students the flexibility to create a meaningful work product that integrates the graduate coursework, which is distinctly separate from the thesis and comprehensive exam options. To enroll in this course, students must complete and submit the requisite paperwork with the signature of their exit project committee members along with a proposal of the exit project.
Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.

CMNS 599 | RESEARCH THESIS | 4 quarter hours (Graduate)
Enroll in CMNS 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.
Status as a Graduate Communication student and Director Consent is a prerequisite for this class.

CMNS 601 | ACTIVE DEGREE COMPLETION | 0 quarter hours (Graduate)
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires thesis/project advisor and graduate director approval and proof of work each quarter. Enrollment in this course allows access to the library and other campus facilities. This course carries half-time enrollment status and eligibility for loan deferment and student loans. This course is graded as pass/fail. (0 credit hours)
Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.
CMNS 602 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)
This is a 0-credit hour course that requires permission from the graduate
director. Students can enroll in this course if they are finishing a course
in which they received an incomplete (IN) and are not registered for any
other regular credit-bearing courses in the quarter they plan to finish
the incomplete. Enrollment in this course is limited to the two quarters
following the quarter of the original incomplete (IN) grade. Enrollment in
this course allows access to the library and other campus facilities. This
course does not carry any enrollment status. Students enrolled in this
course are not eligible for loan deferment or student loans. This course is
not graded. (0 credit hours)
Status as a Graduate Communication student is a prerequisite for this
class.

Community Service Studies (CSS)

CSS 101 | CATHOLIC SOCIAL TEACHING AND REFLECTION | 1-4 quarter
hours
(Undergraduate)
CSS 101 is a mandatory year-long course sequence for all students
serving as tutors at San Miguel schools and Visitation Catholic
Elementary through the Stean’s Center Catholic Schools Initiative.
Utilizing the pastoral cycle of “See, Judge, and Act” within the Catholic
Social Tradition, students will critically reflect on their tutoring experience
as it relates to local economic, cultural and political issues surrounding
the Englewood and Back of the Yards neighborhoods. In addition they
will explore a variety of domestic and global justice issues through
the lens of Catholic Social Teaching. Through this hermeneutic, they
will gain a familiarity with terms and concepts to more thoroughly
analyze and critique social systems. The students will also learn more
about the Dominican and LaSallian charism towards marginalized
populations and reflect on their own personal responsibility as members
of a community bound to their religious mission. As a service-enhanced
course, students will actively engage in critical reflection and dialogue
on their tutoring experience through the use of readings, videos, guest
speakers, group projects/presentations, and designated field trips to
related organizations. Variable credit.

CSS 201 | CRITICAL COMMUNITY ENGAGEMENT | 4 quarter hours
(Undergraduate)
This course explores the relationship between social justice movements
and non-profit organizations in the U.S. by providing a structure within
which students can learn about issues and theory and the organizational
settings in which they are serving.

CSS 300 | INTRODUCTION TO NON-PROFIT MANAGEMENT | 4 quarter
hours
(Undergraduate)
This course provides students with an understanding of the functioning
of the organizations that conduct the vital work of the non-profit sector.
Students will complete the course with the knowledge base to be
effective program managers and board members in these organizations.

CSS 310 | RESTORATIVE JUSTICE: ENGAGEMENT WITH THE PRISON | 4
quarter hours
(Undergraduate)
This course will provide an opportunity for students to 1) reflect
deeply on the meaning of justice, 2) examine institutionalized forms of
justice, and, above all, 3) explore alternative models of justice. Using
a dialectic process, students will actively scrutinize theories of justice
and investigate issues and movements of social justice. Additionally,
they will be asked to consider how each of these areas informs the
other, since theories often influence as well as emerge from issues and
movements. Assumptions about crime and justice will be considered by
comparing and contrasting retributive and restorative paradigms. The
role of offender, victim and community will be analyzed in the context
of crime and justice. Students will also look into programs in restorative
justice to discern their outcome effectiveness.

CSS 311 | MASCULINITY, JUSTICE AND LAW | 4 quarter hours
(Undergraduate)
This course examines the social practices as well as the legal and
institutional culture of masculinity. We will explore the sociocultural,
historical and political debates surrounding masculinity and address
why it is frequently thought to be "in crisis." Focusing on a number of
different sociopolitical movements, we shall consider the construction
of masculinity in relation to other social theories, including feminism and
postcolonial theory. Furthermore, the effects of various types of violence,
and strategies for intervention and prevention shall be addressed.

CSS 312 | LAW AND POLITICS: PRISON POLICIES AND RESTORATIVE
JUSTICE | 4 quarter hours
(Undergraduate)
This course is about the intersections between law and politics. The
learning outcomes for this course include helping students understand
the U.S. Constitution, civil liberties and civil rights; the tensions between
democracy and the rule of law. The course readings will address
restorative justice, community service, redemption, and social justice. We
will apply particular concepts from readings, lectures, etc. to an analysis
of lived experiences in the American penal system. Collaborating with
the Inside-out program, we will examine the ethics of drug sentencing,
"three strikes and you are out" sentencing laws, mass incarceration,
felon disenfranchisement, and prison-based gerrymandering. The main
course assignment asks students to frame a constitutional amendment
to rectify one of the issues covered in the course. Their amendments
must reflect a thorough understanding of the legal, political, and ethical
aspects of the issue they wish to address.
CSS 320 | COMMUNITY FOOD SYSTEMS | 4 quarter hours  
(Undergraduate)  
This course offers a critical analysis of the concept of community food systems as they have been employed as an alternative to the global agro-food system. Readings, lectures, films, guest speakers, site visits, and field projects will provide students with an overview of emerging community-driven efforts at producing, distributing and consuming food. Emphasis will be placed on (1) local, community-based food projects within urban contexts in North America; (2) whether or not these projects constitute more environmentally, socially, and economically sustainable approaches to provisioning households, neighborhoods, towns and cities; and (3) the degree to which such projects enhance the control over, accessibility to, and healthiness of food. Students will gain an understanding of the current global food system in relation to producing, processing, packaging, transporting, marketing, and eventually discarding food. Comparisons will be drawn with emerging local production, distribution and procurement processes driven by the interests of community groups and organizations concerned with health and nutrition, the environment and social justice. There will be a specific focus on the application of community food systems in urban sectors where access to fresh food is challenged, for example, as a result of historical patterns of racial segregation and social exclusion. Students will gain an understanding of such challenges through engaging in field projects in support of local food production and distribution within Chicago communities.

CSS 330 | COMMUNITY PARTICIPATORY ACTION RESEARCH DESIGN | 4 quarter hours  
(Undergraduate)  
This course traces the development of Participatory Action Research (PAR) though a number of different prisms including positivism, feminism, post-modernism and experiential learning pedagogies and examines the influence of discourses of power and inequality on this research methodology.

CSS 340 | MINDFULNESS AND ACTIVISM | 4 quarter hours  
(Undergraduate)  
This course will introduce students to the spiritual and secular uses of mindfulness to further their understanding of themselves and others and to consider its implications for social change. Mindfulness is “the intentional, accepting and non-judgmental focus of one’s attention on the emotions, thoughts and sensations occurring in the present moment”; scientific research demonstrates that mindfulness is a powerful vehicle for advancing social relationships and individual health. Students will learn about the history of, contemporary practice, and scientific research on mindfulness in Buddhism, Christianity, and secular health venues through texts, reflection papers, research, and outreach and curriculum development to community partner sites in the Chicago community.

CSS 350 | CRITICAL ISSUES IN PUBLIC EDUCATION: THE CHICAGO CONTEXT | 4 quarter hours  
(Undergraduate)  
This course is a community-based service learning course that requires both “service” in and critical reflection of student experiences in public schools. Students in this course will engage critically with the challenges in public education. Issues explored in this course include: privatization of schooling, punitive accountability measures and sanctions, over-testing, tracking, and, zero tolerance disciplinary policies. Additionally, this class will address the systemic structures that lie at the foundation of these issues including the intersections of differences in race, class, gender, culture, sexual preference, religion, and nationality.

CSS 378 | COMMUNITY-BASED TECHNOLOGY PROJECTS | 4 quarter hours  
(Undergraduate)  
Using an Asset-based Community Development (ABCD) approach, students will work with a community partner to assess urban community web needs, then develop and implement a Web solution. This course provides a systematic and thorough introduction to project management theory, terms and concepts, while students learn the technical, cultural, and interpersonal skills necessary to successfully manage a web project through the project development life cycle. Concepts are reinforced via interactive in-class case study and reflection exercises; the course culminates in a web project for the community partner.

CSS 390 | SPECIAL TOPICS IN COMMUNITY SERVICE STUDIES | 4 quarter hours  
(Undergraduate)  
Special topics in Community Service Studies are designed to cover emerging or specialized issues in community service, development, nonprofit management, and/or social and global responsibility.

CSS 395 | COMMUNITY INTERNSHIP | 4 quarter hours  
(Undergraduate)  
Community Internship exposes students to career potentials in non-profit and government agencies through an intensive internship experience in a community organization.

CSS 399 | INDEPENDENT STUDY | 1-4 quarter hours  
(Undergraduate)  
Independent study. Enrollment by instructor and/or with approval by program director. Variable credit.

Comparative Literature (CPL)

CPL 210 | GREAT IDEAS, THE INDIVIDUAL AND SOCIETY I | 4 quarter hours  
(Undergraduate)  
Classical Antiquity and the Middle Ages Representative works from the Bible, ancient Greek and Roman literature, and European literature of the Middle Ages. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Homer, Sappho, Aeschylus, Sophocles, Euripides, Hippocrates, Aristophanes, Plato, Aristotle, Cicero, Lucretius, Ovid, Seneca, Plutarch, Augustine, Maimonides, Dante. Formerly ISP 210.

CPL 211 | GREAT IDEAS, THE INDIVIDUAL AND SOCIETY II | 4 quarter hours  
(Undergraduate)  
This course entails close reading and discussion of significant texts in Western culture from the Renaissance to the Enlightenment. Readings will reflect different genres and perspectives. Potential authors may include, for example, Machiavelli, Erasmus, Pisan, Luther, Teresa of Avila, Cervantes, Montaigne, Descartes, Locke, Voltaire, Wollstonecraft, Swift, Equiano, and Rousseau. Cross-listed with HST 234.

CPL 212 | GREAT IDEAS, THE INDIVIDUAL AND SOCIETY III | 4 quarter hours  
(Undergraduate)  
The Modern Era Representative works of European literature from the French Revolution to the modern period. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Hegel, Kierkegaard, Marx, Melville, Flaubert, Nietzsche, Freud. Formerly ISP 212.
CPL 240 | VOICES OF WAR AND PEACE; ART, LITERATURE AND FILM | 4 quarter hours
(Undergraduate)
This course is an overview of the ways in which the arts, including literature and film, portray warfare and the attempts to end violence and build reconciliation and peace. Cross-listed with PAX 240.

CPL 242 | PICTURES OF INJUSTICE: NARRATIVE ARTS IN SOCIAL JUSTICE MOVEMENTS | 4 quarter hours
(Undergraduate)
This course will critically examine social justice themes in documentary and feature films in order to consider the role film and filmmaking can play in social justice movements. Together, we will carefully analyze a wide variety of films with the goal of critically examining their representations of race, gender, class and their depiction of agency of their subjects. We will also examine the storytelling and technical techniques used by filmmakers and how those techniques support the goals of filmmakers. Finally, we will examine case studies of activists who are using film and film-making as a part of movements for social justice. Students will leave this course with a better understanding of the ethics of filmmaking and the use of film in social movements. They will be more critical consumers of media and more familiar with a variety of social justice issues. Cross-listed with PAX 242.

CPL 301 | EPIC AND ROMANCE | 4 quarter hours
(Undergraduate)
Study of examples of heroic literature from a variety of cultures, including Western and non-Western civilizations.

CPL 302 | COMEDY | 4 quarter hours
(Undergraduate)
Study of important examples of dramatic comedy; selections may range from ancient times to the present day with some attention to the relevant theories of comedy (Aristotle, Freud, Bergson, Frye, etc.).

CPL 303 | TRAGEDY | 4 quarter hours
(Undergraduate)
Study of important examples of dramatic tragedy; selections may range from ancient times to the present day with some attention to the relevant theories of tragedy.

CPL 304 | THE NOVEL | 4 quarter hours
(Undergraduate)
Study of the novel, any period or subgenre (historical, picaresque, romantic, realist etc.) from any given area or country with some attention to the literary theory of the particular novels in question.

CPL 305 | AUTOBIOGRAPHICAL/CONFESSIONAL LITERATURE | 4 quarter hours
(Undergraduate)
Study of autobiographical/confessional literature; selections may range from ancient times to the present day from any given area or country with some attention to the relevant theories of these genres.

CPL 306 | UTOPIAN LITERATURE | 4 quarter hours
(Undergraduate)
Study of utopian literature; selections range from the Renaissance to the present day. Readings are discussed within the context of relevant political and social theory.

CPL 311 | REVOLUTIONARY LITERATURE | 4 quarter hours
(Undergraduate)
Study of revolutionary literature in any of its manifestations and genres in specific areas and periods.

CPL 312 | THE LITERATURE OF IDENTITY | 4 quarter hours
(Undergraduate)
Cross-cultural study of self-discovery and identity as manifested in the literatures of self-awareness and self-definition (African-American, Hispanic, gay/lesbian, etc.).

CPL 313 | FEMINIST LITERATURE | 4 quarter hours
(Undergraduate)
Cross-cultural synchronic or diachronic study of feminist literature.

CPL 319 | TOPICS IN COMPARATIVE LITERATURE | 4 quarter hours
(Undergraduate)
Selected topics on any theme from comparative literature.

CPL 355 | CONTEMPORARY CRITICISM | 4 quarter hours
(Undergraduate)
An overview of contemporary criticism from Russian formalism to post-modernism.

Composition (COM)

COM 300 | ORCHESTRATION | 4 quarter hours
(Undergraduate)
Ranges, sonorities and characteristics of woodwind, brass, percussion and string instruments; orchestral studies of representative works through the 19th century; arrangements for orchestral ensembles. Status as an undergraduate composition major is a prerequisite for this class.

COM 301 | 16TH CENTURY COUNTERPOINT | 4 quarter hours
(Undergraduate)
Species counterpoint in two and three parts; melodic, formal and "harmonic" practices in Renaissance polyphony; free composition in the style; analysis and in-class performances of Renaissance motets and mass settings as well as original student compositions. Status as an undergraduate composition major is a prerequisite for this class.

COM 302 | 18TH CENTURY COUNTERPOINT | 4 quarter hours
(Undergraduate)
Contrapuntal techniques of Bach and Handel; analysis, composition, and in-class performances of solo and ensemble works in the style. Assignments include composition of inventions and fugues. Status as an undergraduate composition major is a prerequisite for this class.

COM 303 | 20TH CENTURY COUNTERPOINT | 4 quarter hours
(Undergraduate)
Exploration of contrapuntal techniques using 20th century vocabularies; analysis of selected compositions from the 20th-century, including works of Ives, Schonberg, Webern, Bartok, Hindemith, Ligeti and others as well as music of very recent times. Status as an undergraduate composition major is a prerequisite for this class.

COM 305 | ANALYTICAL STUDIES | 4 quarter hours
(Undergraduate)
Use of various analytical techniques for detailed studies of selected compositions from the common-practice period through the present day. Status as an undergraduate composition major is a prerequisite for this class.
COM 313 | INTRODUCTION TO COMPOSITION | 2-4 quarter hours
(Undergraduate)
Basic composition. Recommended as preparatory for intended composition majors. This course may be repeated for credit. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

COM 315 | COMPOSITION | 1-4 quarter hours
(Undergraduate)
Exploration of 20th and 21st century techniques through creative projects and possible analytical assignments. Projects are designed to lead to the completion of compositions for a variety of performance media, culminating in the senior composition project.

Status as a Composition student is a prerequisite for this class.

COM 316 | COMPUTER ASSISTED COMPOSITION | 4 quarter hours
(Undergraduate)
The purpose of this course is to offer composition majors an introduction to the use of computers in the implementation of generative and formal strategies for music composition.

Status as an Undergraduate Music student is a prerequisite for this class.

COM 320 | ORCHESTRATION II | 4 quarter hours
(Undergraduate)
A survey of orchestral practices and techniques from the last 100 years. Assignments include analysis, notation, and orchestration.

Status as an undergraduate composition major and COM 300 are prerequisites for this class.

COM 326 | ELECTRO-ACOUSTIC MUSIC I | 4 quarter hours
(Undergraduate)
Introduction to the history and literature of electro-acoustic music. Introduction to electronic tools and techniques, including MIDI sequencing, timbral manipulation, and digital sampling.

Status as an Undergraduate Music student is a prerequisite for this class.

COM 327 | ELECTRO-ACOUSTIC MUSIC II | 4 quarter hours
(Undergraduate)
Introduction to digital video and multimedia composition and delivery. Further study in the history, literature, and analysis of electro-acoustic music.

COM 326 is a prerequisite for this class.C

COM 360 | TOPICS IN COMPOSITION | 2-4 quarter hours
(Undergraduate)
An in-depth investigation of a topic in composition. (2 quarter hours)

Status as an undergraduate composition major is a prerequisite for this class.

COM 398 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)

An in-depth study of a composition topic under the supervision of a faculty member. (Departmental permission required). (variable credit)

Status as a Undergraduate Music student is a prerequisite for this class.

COM 399 | FINAL COMPOSITION PROJECT | 1 quarter hours
(Undergraduate)
Completion of a final composition project for a large ensemble of six minutes or more. The specific ensemble is to be determined by the student and the composition department and work for this project will be a part of composition lessons throughout the student's senior year.

Status as an Undergraduate Music student is a prerequisite for this class.

COM 405 | ANALYTICAL STUDIES | 4 quarter hours
(Graduate)
The study and practice of specific analytical techniques as related to specific works from the common practice period through the present day.

Status as a Graduate Music student is a prerequisite for this class.

COM 415 | COMPOSITION | 1-4 quarter hours
(Graduate)
The study of advanced compositional issues at the graduate level which will culminate in quarterly projects as well as a final composition project.

Status as a Graduate Composition student is a prerequisite for this class.

COM 416 | COMPUTER ASSISTED COMPOSITION | 4 quarter hours
(Graduate)
The purpose of this course is to offer composition majors an introduction to the use of computers in the implementation of generative and formal strategies for music composition.

Status as a Graduate Composition student is a prerequisite for this class.

COM 420 | ORCHESTRATION II | 4 quarter hours
(Graduate)
The study of significant notation, orchestration and instrumentation practices and techniques from the last 75 years. Course activities include consistent score analysis as well as demonstrations of extended instrumental techniques. Projects include orchestral transcriptions and the creation of short works for specific instrumental combinations.

Status as a Graduate Composition student is a prerequisite for this class.

COM 421 | SEMINAR IN COMPOSITION | 2 quarter hours
(2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

COM 444 | NOTATIONAL SEMINAR: NOTATION, COMPOSITION, & SOUND STRUCTURES | 4 quarter hours
(Graduate)
A study of some of the most relevant notational issues that have emerged in western music since WWII.

Status as a Graduate Music student is a prerequisite for this class.

COM 445 | TWENTIETH CENTURY MUSIC TOPICS | 4 quarter hours
(Graduate)
A review of significant 20th century literature and techniques as partial preparation for the comprehensive exam.

Status as a Graduate Composition student is a prerequisite for this class.

COM 446 | NEW MUSIC COMPOSITION SEMINAR | 4 quarter hours
(Graduate)
Analysis of compositional and notation techniques as found in significant new works from the last twenty-thirty years for chamber ensembles or orchestral ensembles. Students will develop weekly presentations on specific works that will eventually be presented at the department’s weekly meeting sessions and will also develop a minimum 10 page paper on one-two works.

Status as a Graduate Composition student is a prerequisite for this class.

COM 447 | NON-WESTERN SOUND AND CONCEPT IN CONTEMPORARY MUSIC | 4 quarter hours
(Graduate)
This class will consist of two major elements: one is a survey of the non-western influences in question and the second is the application of non-western influences to actual composition. The final goal of the class is to produce a small scale composition, which demonstrates the application of non-western music ideas.

Status as a Graduate Composition student is a prerequisite for this class.
GPH 205 | HISTORICAL FOUNDATIONS OF VISUAL TECHNOLOGY | 4 quarter hours
(Undergraduate)
This course is a survey of the development, application and meaning of visual technologies in a wide range of world cultures from pre-history to the present. It traces the unique intersection of mathematics and physical culture that marks design science, as it has been realized in a variety of human societies. The course includes works of art that emphasize those mathematical and geometric elements that are antecedent to contemporary graphic technology.

GPH 211 | PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS I | 4 quarter hours
(Undergraduate)
An introduction to the visual, non-verbal principles incorporated in the effective presentation of on-screen environments. This course emphasizes the use of two-dimensional elements and their organization.

GPH 212 | PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS II | 4 quarter hours
(Undergraduate)
Further experience with the visual, non-verbal principles incorporated in effective presentation of on-screen environments. This course emphasizes the use of three-dimensional elements, spaces and their organization. PREREQUISITE(S): ART 105, GD 105, GPH 211 or HCI 402.

GPH 213 | PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS III | 4 quarter hours
(Undergraduate)
An introduction to the visual and communication principles for the structure and organization of time-based digital environments. Introduction to standard 2D animation software applications. PREREQUISITE(S): GPH 211 or GD 105 or equivalent.

GPH 250 | DIGITAL MODELING I | 4 quarter hours
(Undergraduate)
Introduction to 3D object modeling with an emphasis on visual applications and prototype design. Students will work with basic spatial operations in surface modeling and CAD interfaces and will produce an original object from pattern with computer-aided manufacture. Prerequisite: GPH 212.

GPH 255 | HAND PROTOTYPING FOR GRAPHIC VISUALIZATION | 4 quarter hours
(Undergraduate)
Paper prototyping techniques for pre-screen image design including form rendering, rapid visualization, descriptive geometry, and iconographic diagramming. Students will work from initial sketch versions through client presentation. PREREQUISITE(S): ART 106 and (GPH 211 or GD 105)

GPH 259 | DESIGN GEOMETRY | 4 quarter hours
(Undergraduate)
An historical and practical introduction to the visual applications of geometry. This CAD-based survey covers constructive geometry, surface symmetry, projective geometry, polyhedrons and spheroids through the discussion of historical precedents and practicum exercises.

GPH 269 | GRAPHIC GEOMETRIES | 4 quarter hours
(Undergraduate)
An historical and practical introduction to the visual applications of geometry. This CAD-based survey covers constructive geometry, surface symmetry, projective geometry, polyhedrons and spheroids through the discussion of historical precedents and practicum exercises. Graduate standing is a prerequisite for this class.

GPH 279 | SCIENCE AND DESIGN OF SUNDIALS | 4 quarter hours
(Undergraduate)
This course explores ancient and early modern understanding of the cosmos and how this was successfully modeled into the sundial. About half of the course lectures are historical, while others explain the astronomy, geography and geometry used to design the dial. During lab sessions students design and create their own sundials.

GPH 321 | COMPUTER GRAPHICS DEVELOPMENT I | 4 quarter hours
(Undergraduate)
This course presents the fundamental mathematical foundations of graphics including an introduction to the basic geometric constructions of points, vectors, transformations, matrices and homogeneous coordinates. The course will explore applications of these mathematical techniques to rendering 3D scenes and lighting and shading surfaces in 3D. Advanced topics will include several key techniques from computational geometry such as the computation of object intersections and applications to rendering 3D scenes and object collisions. The focus of this course is on building the software from scratch rather than using a graphics application programming interface (API) so that students will gain a deeper understanding of the techniques they will be using in later courses through an API such as OpenGL or Direct3D. PREREQUISITES: CSC 300 or CSC 383 or CSC 393.

CSC 300 or CSC 383 or CSC 393 is a prerequisite for this class.

GPH 325 | SURVEY OF COMPUTER GRAPHICS | 4 quarter hours
(Undergraduate)
(Formerly GPH 371) A survey of basic 3D techniques, including interaction of light and color. The relationship between visual effect and geometry. Visual effects of rendering, texturing and lighting algorithms. Procedurally based modeling and an introduction to procedural animation techniques. PREREQUISITE(S): CSC 212 or ISM 330.

GPH 329 | COMPUTER GRAPHICS DEVELOPMENT II | 4 quarter hours
(Undergraduate)
Basic graphics architecture. Coordinate systems. Three-dimensional representations and transformations. Simple visible-surface algorithms. Introduction to illumination. Gouraud and Phong shading. Antialiasing. Texture mapping and elements of animation. Students create a graphics package using a high-level graphics API such as OpenGL. PREREQUISITE(S): CSC 361 and (GAM 325 or GPH 321)
CSC 361 and (GAM 325 or GPH 321) are prerequisites for this class.
GPH 336 | SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION | 4 quarter hours
(Undergraduate)

GPH 329 or GPH 350 is a prerequisite for this class.

GPH 338 | SURVEY OF 3-D ANIMATION | 4 quarter hours
(Undergraduate)
(Formerly titled Computer Animation Survey). Use of a commercially-based animation package for the purpose of communicating a narrative or visual information. Animation of transformations, deformations, cameras, and lights. Forward / inverse kinematics for character rigging. Prerequisites: ANI 201 and either GPH 325 or GPH 250.

GPH 339 | ADVANCED RENDERING TECHNIQUES | 4 quarter hours
(Undergraduate)
An introduction to shading techniques for highly realistic computer generated imagery. Texturing basics. Design, acquisition and application of layered textures to produce realistic dirt and aged surfaces. Turntables. Basic illumination and reflectance models. Elements of procedural texturing for organic surface materials such as wood and marble. The course includes an introduction to an industry standard shading language that is a powerful prototyping tool for both offline and real-time rendering environments. Students work in teams to produce convincingly organic environments. PREREQUISITE(S): GPH 325 or GPH 321 or (ANI 339 and GPH 355)

GPH 340 | PROCEDURAL SHADING | 4 quarter hours
(Undergraduate)
Procedural pattern generation, creating patterns such as marble and wood with noise, moving beyond the Phong illumination model. Gaussian distributions and the Ward anisotropic model, BRDFs. Non-photorrealistic rendering techniques such as "toon" shading and painterly techniques. PREREQUISITE(S): GPH 339.

GPH 341 | ADVANCED LIGHTING TECHNIQUES | 4 quarter hours
(Undergraduate)
Simple local models such as Phong, extensions to Phong (HDR), ray-traced lighting and shadows, soft shadow generation using shadow maps, radiosity for producing ambient lighting and photon mapping for calculating realistic refracted light. Theory, lighting features supported, efficiency, and practical considerations for choosing the model in production. PREREQUISITE(S): GPH 339.

GPH 345 | DIGITAL SURFACE MODELING | 4 quarter hours
(Undergraduate)
This course is an upper level exploration of digital modeling in NURBS environments. Students will learn to creatively apply analytic methods of form production and scenic presentation suitable for application to design and engineering, medical and forensic visualization, and testing. In general this course will prepare students for 3-D graphic applications outside of the entertainment industry while rounding out their modeling skills for that industry, too. PREREQUISITE(S): GPH 212 or GPH 259 or ANI 230.

GPH 346 | SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION | 4 quarter hours
(Undergraduate)

GPH 329 or GPH 350 is a prerequisite for this class.

GPH 348 | RIGGING FOR ANIMATION | 4 quarter hours
(Undergraduate)
Readying 3D characters and other models for animation. Skeleton chains, joint orientations, and degrees of freedom. IK solvers, including single chains, rotation and splines. Methods for computing weights for skinning body and face, including semi-automated approaches. Considerations for mechanical objects, animals and low-polygon models. PREREQUISITE(S): GPH 338 or ANI 201.

GPH 350 | DIGITAL MODELING II | 4 quarter hours
(Undergraduate)
Advanced experience in object modeling and prototype design. Students will work with more sophisticated form relationships, reverse engineering and textures, and will produce an original object from slicing with computer-aided manufacture. PREREQUISITE(S): GPH 250.

GPH 355 | 3D SCRIPTING FOR ANIMATORS | 4 quarter hours
(Undergraduate)
This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface. Prerequisites: ANI 230 or GPH 338.

GPH 358 | COMPUTER GRAPHICS AUTOMATION | 4 quarter hours
(Undergraduate)
Covers the use of scripting and other automation techniques to generate computer graphics and animation. Emphasis on the benefits and differences of scripting languages compared to conventional graphics programming. Using commercially available scripting environments, students will generate rich, interesting graphics and animations that would not be possible with the conventional user interface. PREREQUISITE(S): ISM 330 or CSC 212 or GPH 355 or CSC 242.

GPH 360 | MODELING SPACES | 4 quarter hours
(Undergraduate)
The digital design and modeling of environmental spaces with attention to human use parameters. PREREQUISITE(S): GPH 250.

GPH 372 | PRINCIPLES OF COMPUTER ANIMATION | 4 quarter hours
(Undergraduate)
(Formerly CSC 372) This course will cover a range of topics in introductory 3D Computer Animation. Topics covered will include key framing, interpolation, hierarchies, inverse kinematics, particle systems, and the basics of physically based simulation and modeling. PREREQUISITE(S): GPH 329 or GPH 370.

GPH 329 or GPH 370 is a prerequisite for this class.
GPH 375 | ADVANCED GRAPHICS DEVELOPMENT | 4 quarter hours
(Undergraduate)
(Formerly CSC 375) Survey of standards and current modular technology for 2D and 3D graphics software development. Use of software development toolkits to create "plug-ins" and other modularly organized functionality enhancements for selected commercially available graphics packages. PREREQUISITE(S): GPH 329 or permission of instructor.

GPH 380 | VISUALIZATION | 4 quarter hours
(Undergraduate)
An in depth introduction to a wide range of visualization techniques focusing on medical and scientific applications. Introduction to programming using a visualization package, use of color for feature extraction and enhancement, false color mapping techniques, reconstruction techniques, iso surface generation, stream lines and ribbons, spatial set operations and projections of higher-dimensional data sets. Prerequisite(s): GPH 325.

GPH 387 | FORENSIC ANIMATION | 4 quarter hours
(Undergraduate)
Techniques and issues in forensic animation. Application of modeling and rendering to the recreation of time-based events for legal purposes. Survey of research and interview techniques. Demonstrative recreation and physically-based recreation. Issues of accuracy, verification, certification and ethics. Students research and recreate an event with forensic value. Possible project areas include motor vehicle incidents, aviation events, product liability, medicine, and trademark infringement. Prerequisites: GPH 338 or ANI 231.

GPH 388 | PRODUCTION PIPELINE TECHNIQUES | 4 quarter hours
(Undergraduate)
An essential aspect of CGI is the skill to effectively manage data for an entire show, and to know how to monitor renders and image processes with the end result of assembling the finished animation. Students taking this course will gain hands-on experience in render queue management, automated file/image processing and manipulation, disk resource management, data archiving, conversion of outside vendor media and scripting tools to automatic common tasks and improve workflow. Students will work in teams to complete large-scale asset management and rendering projects. Prerequisites: CSC 212 or CSC 262.

GPH 389 | REAL-TIME GRAPHICS TECHNIQUES | 4 quarter hours
(Undergraduate)
This course will cover the basic algorithms and techniques used in today’s real-time graphics systems. Topics will include the following: an introduction to computational geometry including computation with polygonal meshes. Alternate scene representations for efficient geometry culling, including BSP trees and oct-trees. Bounding volume hierarchies, box-trees and R-trees, and application to geometry culling. Programmable graphics hardware and its applications to geometric deformations and surface rendering. PREREQUISITE(S): GPH 329 or GAM 370.

GPH 395 | COMPUTER GRAPHICS SENIOR PROJECT | 4 quarter hours
(Undergraduate)
A group project involving analysis, design, creation, implementation and testing of a large project such as an animation, an interactive multimedia presentation or a video game. Portfolio creation and critique. Discussion of strategies for graduate school and the job market. PREREQUISITE(S): GPH 388 or GPH 372.

GPH 399 | INDEPENDENT STUDY | 1-8 quarter hours
(Undergraduate)
Variable credit. PREREQUISITE(S): Consent of dean.

GPH 425 | SURVEY OF COMPUTER GRAPHICS | 4 quarter hours
(Graduate)
Expression of visual intent through geometry and procedure. A survey of basic 3D techniques, including interaction of light and color. Visual effects of rendering, texturing, and lighting algorithms. Procedural modeling techniques and an introduction to procedurally-based texturing and animation. PREREQUISITE(S): CSC 212.

GPH 436 | FUNDAMENTALS OF COMPUTER GRAPHICS | 4 quarter hours
(Graduate)
An accelerated introduction to the graphics development environments and to graphical programming. Provides an in depth discussion of the basic mathematical language of computer graphics: vectors, transformations, homogeneous coordinates and their associated data structures. Advanced topics will include sampling theory and interpolation. Also provides a basic introduction to industry standards in graphics development, including specifying transformations and viewing parameters. PREREQUISITE(S): CSC 393 and MAT 150.

GPH 438 | COMPUTER ANIMATION SURVEY | 4 quarter hours
(Graduate)
Survey of methods used in computer animation. This course uses commercially available software packages to teach techniques for animation and digital video production. The techniques covered include storyboarding, key frame animation, audio and video editing. PREREQUISITE(S): GPH 425 or GPH 469.

GPH 448 | COMPUTER GRAPHICS SCRIPTING | 4 quarter hours
(Graduate)
Covers the use of scripting to generate computer graphics and animation. Emphasis on the benefits and differences of scripting languages compared to conventional graphics programming. Using commercially available scripting environments, students will generate complex graphics and animations that would not be possible with the conventional user interface. PREREQUISITE(S): GPH 438.

GPH 450 | DIGITAL MODELING | 4 quarter hours
(Graduate)
Introduction to 3D object modeling with an emphasis on visual applications and prototype design. Students will work with basic spatial operations in surface modeling and CAD interfaces and will produce an original object from pattern with computer-aided manufacture. PREREQUISITE(S): HCI 470.
GPH 469 | COMPUTER GRAPHICS DEVELOPMENT | 4 quarter hours
(Graduate)
Basic graphics architecture. Coordinate systems. Three-dimensional representations and transformations. Simple visible-surface algorithms. Introduction to illumination. Gouraud and Phong shading. Antialiasing. Texture mapping and elements of animation. Students create a graphics package using a high-level graphics API such as OpenGL. PREREQUISITE(S): CSC 461 and (GAM 425 or GPH 436)
CSC 461 and (GAM 425 or GPH 436) are prerequisites for this class.

GPH 470 | FORENSIC ANIMATION | 4 quarter hours
(Graduate)
Techniques and issues in forensic animation. Application of modeling and rendering to the recreation of time-based events for legal purposes. Survey of research and interview techniques. Demonstrative recreation and physically-based recreation. Issues of accuracy, verification, certification and ethics. Students research and recreate an event with forensic value. Possible project areas include motor vehicle incidents, aviation events, product liability, medicine, and trademark infringement.

GPH 536 | SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION | 4 quarter hours
(Graduate)

GPH 469 or GAM 470 is a prerequisite for this class.

GPH 538 | RIGGING FOR ANIMATION | 4 quarter hours
(Graduate)
Readying 3D characters and other models for animation. Skeleton chains, joint orientations, and degrees of freedom. IK solvers, including single chains, rotation and splines. Methods for computing weights for skinning body and face, including semi-automated approaches. Considerations for mechanical objects, animals and low-polygon models. PREREQUISITE(S): GPH 438.

GPH 539 | ADVANCED RENDERING TECHNIQUES | 4 quarter hours
(Graduate)
An in-depth examination of texturing techniques for highly realistic computer generated imagery. Design and implementation of layered textures to produce realistic dirt and aged surfaces. Cost analysis of advanced illumination and reflectance models, including environment and shadow mapping, and ambient occlusion. Procedural texturing including pattern generation and the application of noise to produce organic surfaces. Shader development using an industry standard. Prototyping for both offline and real-time rendering environments. Students work in teams to produce convincingly organic environments. PREREQUISITE(S): GPH 425 or GPH 436 or (ANI 439 and GPH 355)

GPH 540 | PROCEDURAL SHADING | 4 quarter hours
(Graduate)
Procedural pattern generation, creating patterns such as marble and wood with noise. Moving beyond the Phong Illumination model: Gaussian distributions and the Ward anisotropic model, BRDFs. Non-photorealistic rendering techniques such as “toon” shading and painterly techniques. PREREQUISITE(S): GPH 539.

GPH 541 | ADVANCED LIGHTING TECHNIQUES | 4 quarter hours
(Graduate)
Simple local models such as Phong, extensions to Phong (HDRI), ray-traced lighting and shadows, soft shadow generation using shadow maps, radiosity for producing ambient lighting and photon mapping for calculating realistic refracted light. Theory, lighting features supported, efficiency, and practical considerations for choosing the model in production. PREREQUISITE(S): GPH 539.

GPH 560 | MODELING SPACES | 4 quarter hours
(Graduate)
The digital design and modeling of environmental spaces with attention to human use parameters. PREREQUISITE(S): any GPH 400-level course or consent of instructor.

GPH 565 | DESIGNING FOR VISUALIZATION | 4 quarter hours
(Graduate)
Sources of graphical integrity and sophistication. Data-Ink maximization. Data density. The use of color to enhance features in data sets and the communication of information. Effective use of space and time. Use of 3D techniques to display multi-dimensional data. The use of isosurfaces and volumetric techniques to display features of data sets. Students will use a programmable system to produce their visualizations and will learn how to use procedural techniques to express graphical intent. (Only one of GPH 570 and GPH 565 may be taken for credit) Prerequisite(s): GPH 448 and HCI 470.

GPH 570 | VISUALIZATION | 4 quarter hours
(Graduate)
(Formerly CSC 570) Reconstruction techniques. Voxel classification and isosurface generation. Spatial set operations. Projections of higher-dimensional data sets. Data feature enhancement. False color mapping. Survey of applications in science, engineering and medicine. PREREQUISITE(S): GPH 469 or GAM 470.

GPH 469 or GAM 470 is a prerequisite for this class.

GPH 572 | PRINCIPLES OF COMPUTER ANIMATION | 4 quarter hours
(Graduate)
(Formerly CSC 572) This course will cover a range of topics in introductory 3D Computer Animation. Topics covered will include key framing, interpolation, hierarchies, inverse kinematics, particle systems, and the basics of physically based simulation and modeling. PREREQUISITE(S): GPH 469.

GPH 575 | ADVANCED GRAPHICS DEVELOPMENT | 4 quarter hours
(Graduate)
Survey of standards and current modular technology for 2D and 3D graphics software development. Use of software development toolkits to create "plug-ins" and other modularly organized functionality enhancements for selected commercially available graphics packages. PREREQUISITE(S): GPH 448 and (GPH 469 or GAM 470)

GPH 448 and (GPH 469 or GAM 470) are prerequisites for this class.
**Computer Science (CSC)**

**CSC 200 | SURVEY OF COMPUTING | 4 quarter hours**  
(Undergraduate)  
This introductory course explores various careers in the field of information technology. A hands-on component will deal with state of the art personal computer operating systems, applications, database systems, Internet, email, and basic website construction. The structure of the course utilizes both classroom lectures and computer classroom labs. This course is geared toward the non-major and assumes no prior knowledge or experience in Computer Science.

**CSC 208 | ETHICS IN TECHNOLOGY | 4 quarter hours**  
(Undergraduate)  
Information Technology and the rapid pace in which it has advanced have had a tremendous impact on our lives. Changes have been swift and the human capacity to deal with them is limited. It has been said that our technology has outpaced our humanity. This course will research the new responsibilities technology presents and our ability to deal with these changes in an ethical manner. Students will employ ethical frameworks, which integrate computer science and ethics, to develop the skills required to examine different sets of assumptions and question them. Case studies will provide a historical perspective for analysis.

**CSC 211 | PROGRAMMING IN JAVA I | 4 quarter hours**  
(Undergraduate)  
Introduction to programming in Java and problem solving. Variables, data types, input/output, using objects and methods from the standard classes (such as String and Scanner), control structures, writing methods, arrays. Solving problems with algorithms and implementing algorithms in Java. (Not for CS majors)

**CSC 212 | PROGRAMMING IN JAVA II | 4 quarter hours**  
(Undergraduate)  
Intermediate programming in Java and problem solving. Writing Java programs with multiple classes: constructors, visibility modifiers, static members, accessor and mutator methods, and arrays of objects. Inheritance, polymorphism, and interfaces. Sorting arrays of primitive data and arrays of objects. Exception handling. (Not for CS majors)  
**CSC 221 is a prerequisite for this class.**

**GPH 580 | HARDWARE SHADING TECHNIQUES | 4 quarter hours**  
(Graduate)  
This class explores the current trends in programmable computer graphics hardware. Modern graphics processing units (GPUs) are becoming increasingly powerful and fully programmable parallel processing units. They make extremely sophisticated effects in computer graphics, such as shadows, displacement maps, skinning, motion blur, reflections and refractions, possible in real-time scenes. In addition these increasingly general programmable units are being used for far more general computing problems from traditional searching and sorting algorithms to computational problems in physics such as the diffusion equation and fluid flow. In this course we will explore the applications of hardware shading to computer graphics, including advanced lighting, shading and surface effects. As time allows, we will explore other applications such as physics and computer science. Prerequisites: GPH 469 or GAM 470.  
**GPH 469 or GAM 470 is a prerequisite for this class.**

**GPH 595 | TOPICS IN GRAPHICS | 4 quarter hours**  
(Graduate)  
May be repeated for credit. PREREQUISITE(S): Permission of instructor.
CSC 241 | INTRODUCTION TO COMPUTER SCIENCE I | 4 quarter hours
(Undergraduate)
An introduction to problem solving, algorithms and structured programming using a higher-level programming language. The course will focus on skills for developing algorithms, and for writing and debugging programs. Students will learn how and when to use loops, conditionals, and functional abstractions in the context of problems motivated by real world applications.
MAT 130 or above or equivalent or Mathematics Diagnostic test placement into MAT 140 is the prerequisite for this class.

CSC 242 | INTRODUCTION TO COMPUTER SCIENCE II | 4 quarter hours
(Undergraduate)
An intermediate course in problem solving, algorithms and programming. Programming skills are further strengthened through more complex and larger programming assignments. The assignments will also be used to introduce different Computer Science areas (e.g. a Client/Server application for the Distributed Systems area). Classes and object oriented programming are motivated and introduced.
CSC 241 is the prerequisite for this class.

CSC 243 | INTRODUCTION TO COMPUTER SCIENCE FOR PROGRAMMERS | 4 quarter hours
(Undergraduate)
An accelerated course covering the essentials of programming, with a focus on problem-solving, structured programming, and algorithm design. The concepts covered include collection types, conditional and iterative structures, functions, file input/output, exceptions, namespaces, recursion, and Internet client programming. Students are expected to have successfully completed at least one high-level, object-oriented programming class prior to enrollment.
MAT 130 or above or equivalent or Mathematics Diagnostic test placement into MAT 140 is the prerequisite for this class.

CSC 250 | COMPUTERS AND HUMAN INTELLIGENCE | 4 quarter hours
(Undergraduate)
Students taking this course will study human problem-solving and its simulation by computers. Artificial intelligence, pattern recognition and learning programs will be discussed. PREREQUISITE(S): Familiarity with basic computer productivity tools and the Web.

CSC 270 | FROM FIREFLIES TO FACEBOOK: THE SCIENCE OF NETWORKS | 4 quarter hours
(Undergraduate)
This course explores complex systems both natural and man-made, characterized by the relationships between interacting entities. Network structures can be found in the Internet and its many applications, but also in social relationships, marketplaces, ecosystems, even cells. We will examine a wide range of networks including technological, social, and natural. Students will learn basic concepts from graph theory, algorithms and network analysis, apply tools for extracting, analyzing and visualizing network properties, using data sets drawn from a variety of areas.
LSP 120 is a prerequisite for this class.

CSC 281 | WORKSHOP: JAVA FOR PROGRAMMERS | 2-2.25 quarter hours
(Undergraduate)
This course introduces students to the Java programming language and eclipse development environment.
CSC 241 or CSC 243 is a prerequisite for this class.

CSC 282 | WORKSHOP: LINUX FOR PROGRAMMERS | 2-2.25 quarter hours
(Undergraduate)
This course provides an introduction to Linux, the command-line environment, C programming, and version control.
CSC 241 or CSC 243 is a prerequisite for this class.

CSC 299 | INTERNSHIP | 4 quarter hours
(Undergraduate)
This course satisfies the junior year experiential learning requirement. In cooperation with local employers, this course offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Admission to the program requires consent of internship course instructor. Current work experience plus classroom time is required. Supervisor evaluation will contribute to the final grade.

CSC 300 | DATA STRUCTURES I | 4 quarter hours
(Undergraduate)
This is the first course in a two-course sequence on data structures using Java. The course introduces basic Java programming, reviews recursion, introduces asymptotic notations, and focuses mainly on linear data structures including arrays, linked lists and their variants, stacks and queues, and data structures supporting disjoint-set operations. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. The applications covered highlight and exploit the unique characteristics of the data structures, and emphasize problem solving and recursive thinking.
CSC 242 or CSC 243 is the prerequisite for this class.

CSC 301 | DATA STRUCTURES II | 4 quarter hours
(Undergraduate)
This is the second course in a two-course sequence on data structures using Java. The course focuses mainly on the following data structures, their analysis, and their applications: trees (search trees, balanced search trees), heaps, associative arrays, hash tables, and data structures for representing graphs. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. The applications discussed highlight and exploit the unique characteristics of the different data structures, and emphasize problem solving and recursive thinking.
CSC 300 and MAT 140 are prerequisites for this class.

CSC 308 | FRAMEWORKS FOR WEB APPLICATION DEVELOPMENT | 4 quarter hours
(Undergraduate)
This course introduces concepts, techniques, technologies and APIs for web application development. The main focus of the course is on the Model-View-Controller design pattern employed by modern full-stack web frameworks. Concepts and techniques covered include client/server programming, database abstraction APIs, and asynchronous JavaScript. Examples of full-stack MVC frameworks include Ruby-on-Rails (written in Ruby), Django and TurboGears (written in Python).
CSC 374 is a prerequisite for this class.
CSC 309 | C++ FOR PROGRAMMERS | 4 quarter hours  
(Undergraduate)  
This course covers the essentials of C and C++ programming, focusing primarily on the topics of memory management and object-oriented programming. Topics include pointers and dynamic allocation, operator overloading, copy constructors and destructors, inheritance and polymorphism.  
(CSC 242 or CSC 243) or proficiency in another programming language is a prerequisite for this class.

CSC 321 | DESIGN AND ANALYSIS OF ALGORITHMS | 4 quarter hours  
(Undergraduate)  
Techniques for designing algorithms including: analyzing algorithms (big-O, recurrence relations) and divide-and-conquer (quicksort, mergesort). Additional topics chosen from: the greedy method, dynamic programming, backtracking, branch-and-bound and string matching.  
(CSC 301 or CSC 393) and MAT 140 are prerequisites for this class.  
MAT 141 is recommended.

CSC 325 | TIME SERIES ANALYSIS AND FORECASTING | 4 quarter hours  
(Undergraduate)  
The course introduces students to statistical models for time series analysis and forecasting. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, volatility models (GARCH-type, GARCH-M type, etc.), forecasting evaluation and diagnostics checking. The course will emphasize applications to financial data, volatility modeling and risk management. Real examples will be used throughout the course. PREREQUISITE(S): CSC 212 or CSC 224 CSC 262 or CSC 309 and (CSC 232 or MAT 356) or consent of instructor.

CSC 327 | PROBLEM SOLVING FOR CONTESTS | 2-2.25 quarter hours  
(Undergraduate)  
This course prepares students to compete in programming contests. More broadly, it covers problem solving techniques in an informal, fun, and hands-on setting. This course will improve your analytical and programming skills and is thus recommended for all students and not just the competitors among us. This course can be taken for credit twice.  
CSC 301 is a prerequisite for this class.

CSC 331 | SCIENTIFIC COMPUTING | 4 quarter hours  
(Undergraduate)  
This course presents fundamental numerical algorithms for solving problems in scientific computing and computational finance. Areas covered include: error analysis, computer arithmetic, linear algebra, optimization problems, numerical integration (solvres), ordinary differential equations (ODE). The emphasis of the course is on the design of the algorithms, and their analysis. Algorithms will be implemented using mathematical software.  
((CSC 242 or CSC 243) and MAT 152) or by permission of instructor

CSC 333 | CRYPTOLOGY | 4 quarter hours  
(Undergraduate)  
Introduction to the methods of cryptography and cryptanalysis. Topics include classical cryptography (codes, substitution ciphers, transposition ciphers), block and stream ciphers (Feistel networks, DES), and public key cryptography (RSA, Key agreement, signature schemes). Optional topics include zero-knowledge protocols, quantum cryptography, and history.  
(CSC 300 or IT 313) and MAT 140 are prerequisites for this class.

CSC 343 | INTRODUCTION TO OPERATING SYSTEMS | 4 quarter hours  
(Undergraduate)  
An advanced course on operating system design and implementation. Process management and scheduling, memory management, file systems, device drivers, access control, and virtualization will be covered. The emphasis of the course will be on implementing components of a functional operating system.  
CSC 301 and CSC 373 and CSC 374 are prerequisites for this class.

CSC 344 | AUTOMATA THEORY AND FORMAL GRAMMARS | 4 quarter hours  
(Undergraduate)  
An introduction to the most important abstract models of computation and their applications: finite state machines and pushdown automata. Explores the relationship between regular expressions and formal grammars and automata. PREREQUISITE(S): CSC 301 and MAT 141.  
CSC 301 and MAT 141 are prerequisites for this class.

CSC 347 | CONCEPTS OF PROGRAMMING LANGUAGES | 4 quarter hours  
(Undergraduate)  
(CSC 301 or CSC 393) and CSC 373 are prerequisites for this class.

CSC 348 | INTRODUCTION TO COMPILER DESIGN | 4 quarter hours  
(Undergraduate)  
An overview of the design of a compiler for a general purpose programming language; tools for designing the components of the compiler; implementing the compiler; runtime environments.  
CSC 301 and CSC 373 and CSC 347 are prerequisites for this class.

CSC 352 | DATABASE PROGRAMMING | 4 quarter hours  
(Undergraduate)  
Programming in a large-scale relational database environment using procedural languages. Topics covered in the course include: procedural extension of query languages, runtime error handling, subprograms (procedures and functions), packages, database triggers, dynamic query language. Optional topics include transaction management, reliability, and security.  
(PT 240 or CSC 355) and (CSC 212 or CSC 242 or CSC 243 or CSC 300 or CSC 309) are prerequisites for this class.

CSC 353 | ADVANCED DATABASE CONCEPTS | 4 quarter hours  
(Undergraduate)  
An introduction to advanced selected topics in databases. Possible topics include: object-oriented databases, distributed databases, intelligent and deductive databases, temporal databases, multimedia databases, spatial and geographic databases, fuzzy databases, mobile databases, data mining and data warehousing, as well as emerging issues and concepts in database design, implementation and management.  
IT 240 or CSC 355 and (CSC 212 or CSC 242 or CSC 243 or CSC 300 or CSC 309) are prerequisites for this class.

CSC 355 | DATABASE SYSTEMS | 4 quarter hours  
(Undergraduate)  
An introduction to modern database systems; the course covers the traditional concepts and techniques of database systems including the relational model, SQL, indexes and normalization as well as a selection of advanced topics such as constraints and triggers, transactions, database programming, semi-structured data, and recursive SQL.  
CSC 301 or CSC 393 is a prerequisite for this class.
CSC 357 | EXPERT SYSTEMS | 4 quarter hours  
(Undergraduate)  
A study of the development of expert systems. Students will use commercial packages to develop standalone and embedded expert systems. Topics will include rule-based systems, decision trees, forward and backward chaining, inference, reasoning with uncertainty, and intelligent agents.  
CSC 301 or CSC 393 is a prerequisite for this class.

CSC 358 | SYMBOLIC PROGRAMMING | 4 quarter hours  
(Undergraduate)  
Concepts of symbolic programming as embodied in the language LISP. Basic data and control structures of LISP, symbolic expressions, the interpreter, functions, recursion, iteration. Techniques for prototyping and building conceptually advanced systems in an environment that encourages procedural and data abstraction. Advanced topics may include Prolog, intelligent tutoring systems, intelligent agents, and natural language processing. Assignments will focus on basic AI techniques, but the class is intended for anyone who will need to rapidly develop large complex systems.  
CSC 301 or CSC 393 is a prerequisite for this class.

CSC 360 | WEB APPLICATIONS | 4 quarter hours  
(Undergraduate)  
This course covers the design and development of single-page web applications and their interaction with web services. Possible topics include: HTML; JavaScript/TypeScript; RxJS; Frameworks such as Angular and/or React; Node.js; programming and security models for browsers; client-side web applications with local storage; HTTP, proxies, and caching.  
CSC 347 and CSC 376 are prerequisites for this course.

CSC 361 | OPTIMIZED C++ | 4 quarter hours  
(Undergraduate)  
Implementation techniques to improve the performance and resource usage of C++ programs. This class will provide low level understanding of C++'s internal behavior that can be exploited to create faster performing software. Identify existing SISD (single instruction single data) implementation and refactor into SIMD (single instruction multiple data) to improve math centric software segments. Understand a system's dynamic memory usage to design and implement a custom high performance memory system. Topics include: performance enhancements through extended SIMD instruction set, dynamic memory usage, caching, implicit behavior, C++ language extensions, algorithms, streaming and profiling.  
(CSC 301 or CSC 393) and CSC 373 are prerequisites for this class.

CSC 362 | OPTIMIZED C++ MULTITHREADING | 4 quarter hours  
(Undergraduate)  
Applied C++ concurrency and multithreading fundamentals. Basic threading concepts: process model, threads, stacks, fibers, mutexes, semaphores, atomicos, and events. Understanding synchronous/asyncronous interactions and behavior of threads. Using managed thread pools and queues in applications. Understanding advanced C++ language features relating to the memory model and the threading support.  
(CSC 361 or SE 350 or GAM 372) is a prerequisite for this class.

CSC 371 | MOBILE APPLICATION DEVELOPMENT FOR IOS | 4 quarter hours  
(Undergraduate)  
This course introduces the core issues associated with application development for mobile devices using the iOS platform. Students will learn the Swift language, the XCode IDE, UIKit and other frameworks, the elements and architecture of the user interfaces, and more. Students will be exposed to the iOS system architecture including memory management, MVC, delegates and threads. Topics will also include understanding and handling of multi-touch events, gestures, and motion events. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374.  
(CSC 301 or CSC 383 or CSC 393) and CSC 374 are prerequisites for this class.

CSC 372 | MOBILE APPLICATION DEVELOPMENT FOR ANDROID | 4 quarter hours  
(Undergraduate)  
This course introduces the core issues associated with application development for mobile devices using the Android platform. Students will learn the Eclipse IDE, frameworks, the elements and architecture of user interfaces, graphics, and more. Students will be exposed to the Android system architecture, including Views, Widgets, Resources, Adapters, Intents and Activities. Topics will also include understanding and handling of threads, multi-touch events, gestures, and motion events. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374.  
(CSC 301 or CSC 383 or CSC 393) and CSC 374 are prerequisites for this class.

CSC 373 | COMPUTER SYSTEMS I | 4 quarter hours  
(Undergraduate)  
A course on computer systems topics, focusing on machine-level programming and architecture and their relevance for application programming. Information representations, assembly language, C programming, and debuggers, processor architecture. PREREQUISITE: (CSC 393 or CSC 300) and MAT 140.  
(CSC 393 or CSC 300) and MAT 140 are prerequisites for this class.

CSC 374 | COMPUTER SYSTEMS II | 4 quarter hours  
(Undergraduate)  
A course on computer systems topics, focusing on operating systems components and their relevance for application programming. Caching, memory hierarchy, performance optimization, linking, processes, virtual memory, dynamic memory allocation, system level I/O. PREREQUISITE: CSC 373.  
CSC 373 is the prerequisite for this class.

CSC 375 | INTRODUCTION TO ROBOTICS | 4 quarter hours  
(Undergraduate)  
An introduction to the field of Robotics. Topics include history of robotics, kinematics, control theory, and sensor theory. A large portion of class time will be lab based, building and programming robots using the Lego Mindstorms NXT Robotics Kit. The programming will be using a C derivative and knowledge of C and general systems concepts is required. PREREQUISITE(S): CSC 373 and CSC 374.  
CSC 373 and CSC 374 are prerequisites for this class.
CSC 376 | DISTRIBUTED SYSTEMS | 4 quarter hours
(Undergraduate)
An introduction to distributed systems. Topics may include: architecture of distributed systems; networking; datagram-oriented and stream-oriented protocols; network programming (for example, the sockets API); remote procedure call and remote method invocation; processes and threads; code migration; software agents; naming of non-mobile and mobile entities; cryptography and security. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374. (CSC 301 or CSC 383 or CSC 393) and CSC 374 are prerequisites for this class.

CSC 379 | TECHNOLOGY PARTNERSHIPS IN URBAN SCHOOLS | 4 quarter hours
(Undergraduate)
Students in this course will have the opportunity to assess urban community needs in the technology arena and develop skills in assisting and developing methods for "bridging the digital divide" that exists. As a result, the student will be able to make a substantial difference in an underprivileged academic community group. This course is a CDM-sponsored community-based service learning course. Any student enrolled in this course can also satisfy the junior year experiential learning requirement.

CSC 380 | FOUNDATIONS OF ARTIFICIAL INTELLIGENCE | 4 quarter hours
(Undergraduate)
An in-depth survey of important concepts, problems, and techniques in artificial intelligence, including search, knowledge representation, logical reasoning, and reasoning with uncertainty. A particular focus and a unifying theme of the course will be the concept of intelligent agents. No prior knowledge of AI is required. The course is particularly suitable for graduate and advanced undergraduate students who want to gain the technical background necessary to build intelligent systems, or who want to prepare for more advanced work in AI. The concepts and techniques learned in this course will be directly applicable to many other areas of computer science including software design, distributed systems, databases, and information management and retrieval. PREREQUISITE(S): CSC 301 or CSC 393. CSC 301 or CSC 393 is a prerequisite for this class.

CSC 381 | INTRODUCTION TO DIGITAL IMAGE PROCESSING | 4 quarter hours
(Undergraduate)
Components of an image processing system and its applications, elements of visual perception, sampling and quantization, image enhancement by histogram equalization, color spaces and transformations, introduction to segmentation (edge detection algorithms), and morphological image processing. PREREQUISITE(S): MAT 150 or MAT 262. MAT 150 or MAT 262 are prerequisites for this class

CSC 382 | APPLIED IMAGE ANALYSIS | 4 quarter hours
(Undergraduate)
Image analysis from classical computational imaging techniques to deep learning techniques. Fundamentals of computational image analysis in terms of image information extraction and modeling of image patterns. Specific topics include, but are not limited to: image segmentation, multi-scale representation, shape analysis, texture analysis, Fourier analysis, wavelets, Gabor and fractal analysis, and template matching. Deep learning models to extract image representations automatically. Classical and deep learning imaging techniques applied and compared in the context of different image analysis tasks such as image representation, segmentation, classification, retrieval, and object recognition. Applications of these techniques for autonomous driving, biometrics, sports analytics, smart and connected communities, and biomedical and health informatics. PREREQUISITE(S) CSC 381. CSC 381 is a prerequisite for this class.

CSC 386 | REAL-TIME NETWORKING (FORMERLY GAM 390) | 4 quarter hours
(Undergraduate)
Applied real-time networking fundamentals. Topics include low-level TCP/UDP socket programming, serialization of data for network transportation, deterministic data flow and queuing in applications, dynamic configuration and session communications. Students will explore issues related to performance-based networking in different topologies: client/server and peer to peer. Students will create and build real-time applications using different protocols (TCP, UDP, RUDP) with active network simulation of loss, delayed, corrupted and out of order data packets. PREREQUISITE(S): GAM 372 or (SE 350 and CSC 361) or GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

CSC 388 | REAL-TIME MULTITHREADED ARCHITECTURE | 4 quarter hours
(Undergraduate)
Real-time constrained multithreaded architecture. Topics include multithreaded handle development, inter-thread communication, creating systems for user-defined callbacks, asynchronous loading and streaming of resources, non-blocking threading synchronization, design patterns and data driven messaging with time delivery constraints Exploration of multithreaded interfaces to maintain uniqueness and control for contested resources. Wrapping and integrating a multithreaded solution into an application will be analyzed. Students will design, develop and implement a multithreaded real-time application (i.e. Audio engine) that integrates existing single and multithreaded middleware libraries. PREREQUISITE(S): GAM 372 or (CSC 361 and SE 350) or GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

CSC 389 | THEORY OF COMPUTATION | 4 quarter hours
(Undergraduate)
Advanced topics in the mathematical foundations of computation. Topics may include random access and Turing machines, recursive functions, algorithms, computability and computational complexity, intractable problems, NP-complete problems. PREREQUISITE(S): CS321 or CS344. CSC 321 or CSC 344 is a prerequisite for this class.

CSC 391 | MOBILE APPLICATION DEVELOPMENT FOR IOS II | 4 quarter hours
(Undergraduate)
This course will cover advanced topics in mobile application development for iOS. The topics covered will be made explicitly by the course instructor when the course is offered. PREREQUISITE(S): CSC 371. CSC 371 is a prerequisite for this class.
CSC 392 | MOBILE APPLICATION DEVELOPMENT FOR ANDROID II | 4 quarter hours
(Undergraduate)
This course will cover advanced topics in mobile application development for Android. The topics covered will be made explicit by the course instructor when the course is offered. PREREQUISITE(S): CSC 372.
CSC 372 is a prerequisite for this class.
CSC 393 | DATA STRUCTURES IN C++ | 4 quarter hours
(Undergraduate)
This course covers the design, implementation, application and analysis of algorithms on a variety of data structures, including lists, stacks, queues, trees, heaps, hash tables and graphs. Implementation is done in C++, in particular with the use of templates and the C++ standard template library (STL). PREREQUISITE(S): CSC 309.
CSC 309 is a prerequisite for this class.
CSC 394 | SOFTWARE PROJECTS | 4 quarter hours
(Undergraduate)
Students will be provided with experience in team design, implementation and testing of a large software project. PREREQUISITE(S): CSC 301 or CSC 393 or UOX 360.
CSC 301 or CSC 393 or UOX 360 is a prerequisite for this class.
CSC 395 | RESEARCH COLLOQUIUM | 2 quarter hours
(Undergraduate)
The research colloquium series features informal talks by a variety of speakers including DePaul faculty, students, and guests from the academic and business communities. The lectures feature new creative and scholarly works that encompass the disciplines and areas of interest of the School of Computing. The talks are free and open to all who are interested, though only students who register can obtain academic credit. Every quarter, a different set of speakers will be invited. PREREQUISITE(S): WRD 204 and (CSC 321 or CSC 376 or CSC 355) (2 quarter hours)
WRD 204 and (CSC 321 or CSC 376 or CSC 355) are prerequisites for this class.
CSC 397 | TOPICS IN COMPUTER SCIENCE | 2-4 quarter hours
(Undergraduate)
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): Consult the instructor (2 quarter hours)
CSC 398 | INTERNSHIP | 1-8 quarter hours
(Undergraduate)
This course does not carry Experiential Learning credit. In cooperation with local employers the computer science program offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Academic credit is variable and admission to the program requires consent of internship advisor. Supervisor evaluation will contribute to the final grade. This course is repeatable for 8.00 credit hours.
CSC 399 | INDEPENDENT STUDY | 1-8 quarter hours
(Undergraduate)
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None. (variable credit)
CSC 400 | DISCRETE STRUCTURES FOR COMPUTER SCIENCE | 4 quarter hours
(Graduate)
This course covers the basic mathematical tools essential for solving problems in computer science. The mathematical topics are presented with emphasis on their applications in computer science. The topics covered include: logic and set theory, relations, functions, graphs, and counting and probability.
CSC 401 | INTRODUCTION TO PROGRAMMING | 4 quarter hours
(Graduate)
An introduction to programming with a focus on problem solving, structured programming, and algorithm design. Concepts covered include data types, expressions, variables, assignments, conditional and iterative structures, functions, file input/output, exceptions, arrays and an introduction to user-defined classes.
CSC 402 | DATA STRUCTURES I | 4 quarter hours
(Graduate)
A first course on data structures in Java for graduate students. The course introduces Java programming from within the context of data structures. The course covers arrays, linked lists, stacks and queues, data structures supporting disjoint-set operations, and discusses recursion and performance analysis. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. PREREQUISITE(S): CSC 401.
CSC 401 is a prerequisite for this class.
CSC 403 | DATA STRUCTURES II | 4 quarter hours
(Graduate)
This is the second course on data structures in Java for graduate students. The course covers trees, heaps, associative arrays, hash tables, tries, and data structures for representing graphs. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. PREREQUISITE(S): CSC 401.
CSC 402 is a prerequisite for this class.
CSC 404 | ACCELERATED C++ | 4 quarter hours
(Graduate)
This introductory graduate course covers the essentials of C++ programming. Topics include encapsulation, inheritance, polymorphism, dynamic memory allocation, casting, pointer arithmetic, operator overloading, templates, and the Standard Template Libraries.
CSC 401 is a prerequisite for this class.
CSC 406 | SYSTEMS I | 4 quarter hours
(Graduate)
This introductory graduate course covers the essentials of C++ programming. Topics include encapsulation, inheritance, polymorphism, dynamic memory allocation, casting, pointer arithmetic, operator overloading, templates, and the Standard Template Libraries.
CSC 401 is a prerequisite for this class.
CSC 407 | SYSTEMS II | 4 quarter hours
(Graduate)
This introductory graduate course on computer systems topics, focusing on machine-level programming and architecture and their relevance for application programming. Information representations, assembly language and debuggers, processor architecture, program optimization, memory hierarchy and caching. Students are recommended to finish CSC 400 before enrolling in this course. PREREQUISITE(S): CSC 401.
CSC 401 is a prerequisite for this class.
CSC 408 | MOBILE APPLICATION DEVELOPMENT FOR ANDROID I | 4 quarter hours
(Graduate)
This introductory graduate course on mobile application development for Android. The topics covered will be made explicit by the course instructor when the course is offered. PREREQUISITE(S): CSC 372.
CSC 372 is a prerequisite for this class.
CSC 412 | TOOLS AND TECHNIQUES FOR COMPUTATIONAL ANALYSIS | 4 quarter hours
(Graduate)
Use of mathematical software to explore basic concepts in linear algebra and calculus. Scripting for symbolic and computational processing. Emphasis is on applications in computer science, finance, data mining, and computer vision. PREREQUISITE(S): None.

CSC 421 | APPLIED ALGORITHMS AND STRUCTURES | 4 quarter hours
(Graduate)
This course covers techniques for designing and analyzing algorithms and structures in the context of computer application development. Examples will come from Internet, WWW, database, and computer system applications. Fundamental topics such as running-time analysis, searching and sorting within various structures, divide-and-conquer and dynamic programming will be covered. PREREQUISITE(S): CSC 400 and CSC 403.
CSC 400 and CSC 403 are prerequisites for this class.

CSC 426 | RESEARCH METHODS AND PRACTICE IN COMPUTING | 4 quarter hours
(Graduate)
The course is intended to help students understand the process of and issues related to doing scientific research in computing or related areas. Topics covered include how to develop an effective research proposal, how to critically evaluate or review a scientific research paper, how to use appropriate research methods in scientific research, key elements of a publishable paper or a dissertation, ethics and professional responsibility in scientific research. The course is intended for PhD students in Computer and Information Sciences or for students who are interested in pursuing a research career. PREREQUISITE(S): PhD status or consent of instructor.
PhD status or consent of instructor is a prerequisite for this class.

CSC 431 | SCIENTIFIC COMPUTING | 4 quarter hours
(Graduate)
This course presents fundamental numerical algorithms for solving problems in scientific computing and computational finance. Areas covered include: error analysis, computer arithmetic, linear algebra, optimization problems, numerical integration (solvers), ordinary differential equations (ODE). The emphasis of the course is on the design of the algorithms, and their analysis. Algorithms will be implemented using mathematical software. PREREQUISITE(S): (CSC 401 and two quarters of calculus) or instructor permission.
CSC 401 and two quarters of calculus (or instructor permission) are prerequisites for this course.

CSC 435 | DISTRIBUTED SYSTEMS I | 4 quarter hours
(Graduate)
An introduction to distributed systems. Topics may include: architecture of distributed systems; networking; datagram-oriented and stream-oriented protocols; network programming (for example, the sockets API); remote procedure call and remote method invocation; processes and threads; code migration; software agents; naming of non-mobile and mobile entities; cryptography and security. PREREQUISITE(S): CSC 403 and CSC 407.
CSC 403 and CSC 407 are prerequisites for this class.

CSC 436 | WEB APPLICATIONS | 4 quarter hours
(Graduate)
This course covers the design and development of modern web applications and their interaction with web services. The primary focus is on client-side web applications using AJAX-techniques to access web services. Possible topics include: HTML5; JavaScript/TypeScript; MVC and single-page application programming models, e.g., AngularJS; programming and security models for browsers; client-side web applications with local storage; data synchronization; HTTP, proxies, and caching; Node.js; RESTful web services. PREREQUISITE(S): CSC 435 and CSC 447.
CSC 435 and CSC 447 are prerequisites for this class.

CSC 438 | FRAMEWORK FOR WEB APPLICATION DEVELOPMENT | 4 quarter hours
(Graduate)
This course introduces concepts, techniques, technologies and APIs for web application development. The main focus of the course is on the Model-View-Controller design pattern employed by modern full-stack web frameworks. Concepts and techniques covered include client/server programming, database abstraction APIs, and asynchronous javascript. Examples of full-stack MVC frameworks include Ruby-on-Rails (written in Ruby), Django and TurboGears (written in Python). PREREQUISITE: CSC 407.
CSC 407 is a prerequisite for this class.

CSC 439 | COMPUTER SECURITY | 4 quarter hours
(Graduate)
This course covers core principles of computer security. Topics include: user authentication; access control (discretionary, mandatory, role-based); security auditing; database security; software security, common vulnerabilities, and secure coding practices; malicious software; and operating system security. Prerequisite(s): CSC 407.
CSC 407 is a prerequisite for this class.

CSC 440 | CRYPTOLOGY | 4 quarter hours
(Graduate)
Introduction to the methods of cryptography and cryptanalysis. Topics include classical cryptography (codes, monaalphabetic and polyalphabetic substitution ciphers, transposition ciphers), modern block ciphers (such as DES, AES), and public key cryptography (such as RSA). Optional topics include zero-knowledge protocols, information theory, coding theory, error-correcting codes, steganography, stream ciphers, hashing algorithms, quantum cryptography, elliptic curve cryptography, and history. PREREQUISITE(S): CSC 403.
CSC 403 is a prerequisite for this class.

CSC 443 | INTRODUCTION TO OPERATING SYSTEMS | 4 quarter hours
(Graduate)
An advanced course on operating system design and implementation. Process management and scheduling, memory management, file systems, device drivers, access control, and virtualization will be covered. The emphasis of the course will be on implementing components of a functional operating system. PREREQUISITE: CSC 403 and CSC 407.
CSC 403 and CSC 407 are prerequisites for this class.

CSC 444 | AUTOMATA THEORY AND FORMAL GRAMMARS | 4 quarter hours
(Graduate)
An introduction to the most important abstract models of computation and their applications: finite state machines and pushdown automata. Explores the relationship between regular expressions and formal expressions and automata. PREREQUISITE(S): CSC 400 and CSC 403.
CSC 400 and CSC 403 are prerequisites for this class.
CSC 447 | CONCEPTS OF PROGRAMMING LANGUAGES | 4 quarter hours (Graduate)
Programming paradigms and language concepts: functional programming; comparison of object-oriented languages; type systems for functional and object-oriented languages; runtime systems for functional and object-oriented languages. A variety of programming languages will be used to illustrate concepts, e.g., JavaScript, Ruby, Scala, Scheme. PREREQUISITE(S): CSC 403 and CSC 406.
CSC 403 and CSC 406 are prerequisites for this class.

CSC 448 | COMPILER DESIGN | 4 quarter hours (Graduate)
Design and structure of high level languages. Lexical scan, top down and bottom up syntactic analysis. Syntax directed translation and LR(k) grammars. PREREQUISITE(S): CSC 447.
CSC 447 is a prerequisite for this class.

CSC 452 | DATABASE PROGRAMMING | 4 quarter hours (Graduate)
Programming in a large-scale relational database environment using procedural languages. Topics covered in the course include: procedural extension of query languages, runtime error handling, subprograms (procedures and functions), packages, database triggers, dynamic query language. Optional topics include transaction management, reliability, and security.
(CSC 453 or IS 451 or CSC 455 or DSC 450) and (CSC 401 or IT 411) are prerequisites for this class.

CSC 453 | DATABASE TECHNOLOGIES | 4 quarter hours (Graduate)
A core graduate course in database design and implementation. Topics include database implementation and queries in SQL, logical design or relational databases, storage and indexes, database programming, and emerging database models. PREREQUISITE(S): CSC 403.
CSC 403 is a prerequisite for this class.

CSC 454 | DATABASE ADMINISTRATION AND MANAGEMENT | 4 quarter hours (Graduate)
This course is designed to give students a comprehensive foundation in database administration and management. The course provides a conceptual understanding of the database architecture and how its components work and interact with one another. Topics covered in this course include: database architecture, capacity planning, installation and maintenance, network configuration, security management, utilities and tools, industry standards and guidelines, database management techniques and practices. PREREQUISITE(S): CSC 451 or CSC 453 or CSC 455.

CSC 457 | EXPERT SYSTEMS | 4 quarter hours (Graduate)
A study of the development of expert systems. Students will use commercial packages to develop standalone and embedded expert systems. Topics will include rule-based systems, decision trees, forward and backward chaining, inference, reasoning with uncertainty, and intelligent agents. PREREQUISITE(S): CSC 403.
CSC 403 is a prerequisite for this class.

CSC 458 | SYMBOLIC PROGRAMMING | 4 quarter hours (Graduate)
Concepts of symbolic programming as embodied in the language LISP. Basic data and control structures of LISP: symbolic expressions, the interpreter, functions, recursion, iteration. Techniques for prototyping and building conceptually advanced systems in an environment that encourages procedural and data abstraction. Advanced topics may include Prolog, intelligent tutoring systems, intelligent agents, and natural language processing. Assignments will focus on basic AI techniques, but the class is intended for anyone who will need to rapidly develop large complex systems. PREREQUISITE(S): CSC 403.
CSC 403 is a prerequisite for this class.

CSC 461 | OPTIMIZED C++ | 4 quarter hours (Graduate)
Analysis and implementation techniques to improve the performance and resource usage of C++ programs. This class will provide low level understanding of C++’s internal behavior that can be exploited to create faster performing software. Analysis of existing software to help identify and remedy execution performance issues related to data layout, processor caching, unintended compiler interactions, algorithmic considerations, data containers and supplied subsystems. Topics include: performance enhancements through SIMD instruction set, dynamic memory usage, caching, implicit behavior, C++ language extensions, algorithms, streaming and profiling. PREREQUISITE(S): CSC 400 and CSC 403 and CSC 406.
CSC 400 and CSC 403 and CSC 406 are prerequisites for this class.

CSC 468 | PROGRAMMING INTERACTIVE DATA VISUALIZATION FOR THE WEB | 4 quarter hours (Graduate)
This course covers the fundamentals of data visualization and how to build interactive visualizations from scratch. Topics include implementing common visualizations with JavaScript and D3 (e.g. scatter plots), techniques for more complex types of data (e.g. hierarchical, geospatial, network), and adapting existing implementations of advanced visualizations to new applications. The final project involves building a custom interactive visualization with a python back-end and a D3 front-end.
SE 450 OR SE 456 OR CSC 438 OR CSC 447 is a prerequisite for this class.

CSC 471 | MOBILE APPLICATION DEVELOPMENT FOR IOS | 4 quarter hours (Graduate)
This course introduces the core issues associated with application development for mobile devices using the iOS platform. Students will learn the Swift language, the XCode IDE, UIKit and other frameworks, the elements and architecture of the user interfaces, and more. Students will be exposed to the iOS system architecture including memory management, MVC, delegates and threads. Topics will also include understanding and handling of multi-touch events, gestures, and motion events. PREREQUISITE(S): CSC 403 and CSC 407.
CSC 403 and CSC 407 are prerequisites for this class.
CSC 472 | MOBILE APPLICATION DEVELOPMENT FOR ANDROID | 4 quarter hours
(Graduate)
This course introduces the core issues associated with application development for mobile devices using the Android platform. Students will learn the Eclipse IDE, frameworks, the elements and architecture of user interfaces, graphics, and more. Students will be exposed to the Android system architecture, including Views, Widgets, Resources, Adapters, Intents and Activities. Topics will also include understanding and handling of threads, multi-touch events, gestures, and motion events. PREREQUISITE(S): CSC 403 and CSC 407.
CSC 403 and CSC 407 are prerequisites for this class.
CSC 475 | INTRODUCTION TO ROBOTICS | 4 quarter hours
(Graduate)
An introduction to the field of Robotics. Topics include history of robotics, kinematics, control theory, and sensor theory. A large portion of class time will be lab based, building and programming robots using the Lego Mindstorms NXT Robotics Kit. The programming will be using a C derivative and knowledge of C and general systems concepts is required. CSC 403 and CSC 421 are prerequisites for this class.
CSC 480 | ARTIFICIAL INTELLIGENCE I | 4 quarter hours
(Graduate)
The course provides an in-depth survey of important concepts, problems, and techniques in artificial intelligence, including heuristic and adversarial search, constraint satisfaction problems, logical reasoning, reasoning with uncertainty, and machine learning. A particular focus and a unifying theme of the course will be the notion of intelligent agents and their implementation.
CSC 403 is a prerequisite for this class.
CSC 481 | INTRODUCTION TO IMAGE PROCESSING | 4 quarter hours
(Graduate)
The course is a prerequisite for more advanced Visual Computing (VC) courses and the students will be challenged to implement VC algorithms for real world applications. The topics covered in the course include: components of an image processing system and its applications, elements of visual perception, sampling and quantization, image enhancement by histogram equalization, color spaces and transformations, introduction to segmentation (Edge detection), and morphological image processing. PREREQUISITE(S): CSC 412 or consent of instructor.
CSC 412 or consent of instructor is a prerequisite for this class.
CSC 482 | APPLIED IMAGE ANALYSIS | 4 quarter hours
(Graduate)
Image analysis from classical computational imaging techniques to deep learning algorithms. Fundamentals of computational image analysis in terms of image information extraction and modeling of image patterns. Specific topics include, but are not limited to: image segmentation, multi-scale representation, shape analysis, texture analysis, Fourier analysis, wavelets, Gabor and fractal analysis, and template matching. Deep learning models to extract image representations automatically. Classical and deep learning imaging techniques applied and compared in the context of different image analysis tasks such as image representation, segmentation, classification, retrieval, and object recognition. Applications of these techniques for autonomous driving, biometrics, sports analytics, smart and connected communities, and biomedical and health informatics. PREREQUISITE(S) CSC 481. CSC 481 is a prerequisite for this class.
CSC 484 | ETHICS IN ARTIFICIAL INTELLIGENCE | 4 quarter hours
(Graduate)
The course examines a broad range of real ethical issues that we face in a future that includes artificially intelligent computational agents, widespread intelligent mining of big data and possibly even artificial sentience. In addition, students will discuss the ethical issues raised by the combined intelligence of brain-machine intelligent systems, and also the cognitive limits of the human mind from a computational perspective. This is a lecture / discussion survey class, with background readings.
CSC 480 is a prerequisite for this class.
CSC 485 | NUMERICAL ANALYSIS | 4 quarter hours
(Graduate)
CSC 486 | REAL-TIME NETWORKING (FORMERLY GAM 490) | 4 quarter hours
(Graduate)
Applied real-time networking fundamentals. Topics include low-level TCP/UDP socket programming, serialization of data for network transportation, deterministic data flow and queuing in applications, dynamic configuration and session communications. Students will explore issues related to performance-based networking in different topologies: client/server and peer to peer. Students will create and build real-time applications using different protocols (TCP UDP RUDP) with active network simulation of loss, delayed, corrupted and out of order data packets. Architecture of different bandwidth compression and estimation techniques will be investigated. Research of wireless ad hoc networks such as Bluetooth and ZigBee will be explored.
PREREQUISITE(S): CSC 461 and (SE 456 or SE 450)
CSC 461 and (SE 456 or SE 450) are prerequisites for this class.
CSC 489 | THEORY OF COMPUTATION | 4 quarter hours
(Graduate)
Advanced topics in the mathematical foundations of computation. Topics may include random access and Turing machines, recursive functions, algorithms, computability and computational complexity, intractable problems, NP-complete problems. PREREQUISITE(S): CSC 444 or CSC 421.
CSC 444 or CSC 421 is a prerequisite for this class.
CSC 491 | MOBILE APPLICATION DEVELOPMENT FOR IOS II | 4 quarter hours
(Graduate)
This course will cover advanced topics in mobile application development for iOS. The topics covered will be made explicit by the course instructor when the course is offered. PREREQUISITE(S): CSC 471.
CSC 471 is a prerequisite for this class.
CSC 492 | MOBILE APPLICATION DEVELOPMENT FOR ANDROID II | 4 quarter hours
(Graduate)
This course will cover advanced topics in mobile application development for Android. The topics covered will be made explicit by the course instructor when the course is offered. PREREQUISITE(S): CSC 472.
CSC 472
CSC 500 | RESEARCH COLLOQUIUM | 2 quarter hours  
(Graduate)
The research colloquium consists of weekly talks by a variety of speakers including faculty, students, and guests from the academic and business communities. The lectures feature new creative and scholarly works that encompass the disciplines and areas of interest of the School of Computing. Student evaluation is based on attendance as well as an online journal with reflections on each of the presentations. The educational objectives are to expose students to creative and scholarly research at DePaul and elsewhere, and to engage students in the thought process of identifying and solving challenging research problems.  
PREREQUISITE(S): None (variable credit)

CSC 503 | PARALLEL ALGORITHMS | 4 quarter hours  
(Graduate)
Development, implementation, and applications of parallel algorithms. Models of parallel computation. Parallel sorting, searching and graph algorithms, as well as other parallel algorithms, will be studied and implemented on both simulated and actual parallel machines.  
PREREQUISITE(S): CSC 421.  
CSC 421 is a prerequisite for this class.

CSC 521 | MONTE CARLO ALGORITHMS | 4 quarter hours  
(Graduate)
A course about the use of random numbers for numerical computation with particular emphasis on implementation issues and applications in science and finance. Covered topics include: pseudo random number generators, the inversion method, the accept-reject method, discrete event simulations, multi-dimensional integration, the Metropolis and the Bootstrap algorithms.  
(CSC 402 or CSC 404 or DSC 430) and DSC 423 or consent of instructor are prerequisites for this class.

CSC 525 | COMBINATORIAL OPTIMIZATION | 4 quarter hours  
(Graduate)
This course defines and introduces the concepts and techniques needed to formulate and model optimization problems. A set of fundamental problems in combinatorial optimization will be covered together with their applications. The emphasis will be on the design and analysis of algorithms for such problems. The computational complexity of this set of problems (easy/hard to solve/approximate) will be discussed, and techniques for coping with intractable problems will be introduced.  
PREREQUISITE(S): CSC 421.  
CSC 421 is a prerequisite for this class.

CSC 528 | COMPUTER VISION | 4 quarter hours  
(Graduate)
Introduction to computer vision, including fundamentals of image formation, camera imaging geometry, feature detection and matching, stereo, and motion analysis. Basic methods and modern deep learning models for applications that include camera calibration, depth recovery from video, motion estimation and tracking, image and video, image search, and new image generation. Focus on the mathematics of these methods and models. Development of modern techniques such as convolutional neural networks for optical flow estimation and object detection, and generative adversarial networks for artificial image generation.  
PREREQUISITE(S): CSC 481.  
CSC 481 is a prerequisite for this class.

CSC 531 | INTRODUCTION TO BIOINFORMATICS | 4 quarter hours  
(Graduate)
An introduction to the field of Bioinformatics, which is computational modeling of biological and biochemical processes. Some programming in Java will be involved. Little biological knowledge will be assumed: any required will be taught in the course. Topics will include genomics, biological databases, sequence alignment (longest common subsequence), phylogenetic trees, and protein folding. Prerequisites: CSC 421 and SE 450.  
CSC 421 and SE 450 are prerequisites for this class.

CSC 534 | SOFTWARE DEVELOPMENT FOR LIMITED AND EMBEDDED DEVICES | 4 quarter hours  
(Graduate)
This course will focus on the unique aspects, tools, and techniques of developing software applications for limited and embedded devices, such as set-top boxes and smart cards. Formerly CSC 542.  
PREREQUISITE(S): SE 450.  
SE 450 is a prerequisite for this class.

CSC 535 | FORMAL SEMANTICS OF PROGRAMMING LANGUAGES | 4 quarter hours  
(Graduate)
PREREQUISITE(S): CSC 447.  
CSC 447 is a prerequisite for this class.

CSC 536 | DISTRIBUTED SYSTEMS II | 4 quarter hours  
(Graduate)
Advanced course that introduces the techniques required to build large-scale, highly available, fault tolerant distributed systems. Covers the distributed algorithms (e.g., vector clocks, consistent hashing, gossip protocols, Merkle trees, Paxos/Raft algorithms) that solve the fundamental problems (e.g., synchronization, replication and replica consistency, fault tolerance) in building such systems. Focus is on problems and solutions relevant to systems that store and process massive data sets and the design decisions behind current large-scale distributed database systems.  
CSC 435 is a prerequisite for this class.

CSC 538 | VISION SYSTEMS | 4 quarter hours  
(Graduate)
Vision Systems will cover the geometry of computer vision as well as a survey of working vision systems to include 1) Content-based Image Retrieval Systems; 2) Object Detection and Tracking Systems; 3) Medical Visual Systems; 4) Robotic Navigation Systems.  
PREREQUISITE(S): CSC 528.  
CSC 528 is a prerequisite for this class.

CSC 540 | MOBILE APPLICATION DEVELOPMENT II | 4 quarter hours  
(Graduate)
This course will cover advanced topics in mobile and wireless application development. The topics covered will be made explicit by the course instructor when the course is offered.  
PREREQUISITE(S): CSC 471.  
CSC 471 is a prerequisite for this class.
CSC 453 | SPATIAL DATABASES & GEOGRAPHIC INFORMATION SYSTEMS | 4 quarter hours (Graduate)
This course considers how spatial databases work within a GIS, how data is structured, stored, indexed, retrieved, and displayed. Other topics may include fuzzy spatial databases, temporal spatial databases, and multiple criteria spatial decision making. The class will consist of hands-on work with commercial products, as well as investigating the state-of-the-art research in the field. Prerequisites: CSC 453 or CSC 455. CSC 453 or CSC 455 or DSC 450 is a prerequisite for this class.

CSC 457 | ADVANCED TOPICS IN PROGRAM LANGUAGES | 4 quarter hours (Graduate)
A project-based course on advanced topics related to programming languages and programming environments. The course does not have any formal exams or homework assignments, but participants are expected to read papers on current research, actively participate in discussions, and complete a significant course project. PREREQUISITE(S): Instructor consent required.

CSC 458 | ADVANCED COMPILER DESIGN | 4 quarter hours (Graduate)
Emphasis on practical problems in implementing compilers, data flow analysis, code optimization, error analysis. Discussion of compiler generators. As a class project, students will write a compiler. PREREQUISITE(S): CSC 448.

CSC 448 is a prerequisite for this class.

CSC 549 | DATABASE SYSTEM IMPLEMENTATION | 4 quarter hours (Graduate)
This is an advanced database course that covers issues in DBMS implementation. Topics covered in this course include: physical data organizations, indexing and hashing, query processing and optimization, database recovery techniques, transaction management, concurrency control, and security. PREREQUISITE(S): CSC 453.

CSC 549 is a prerequisite for this class.

CSC 540 | DATABASE SYSTEM CONCEPTS | 4 quarter hours (Graduate)
This course considers how spatial databases work within a GIS, how data is structured, stored, indexed, retrieved, and displayed. Other topics may include fuzzy spatial databases, temporal spatial databases, and multiple criteria spatial decision making. The class will consist of hands-on work with commercial products, as well as investigating the state-of-the-art research in the field. Prerequisites: CSC 453 or CSC 455. CSC 453 or CSC 455 or DSC 450 is a prerequisite for this class.

CSC 552 | CONCURRENT SOFTWARE DEVELOPMENT | 4 quarter hours (Graduate)
Fundamentals and techniques of developing concurrent object-oriented applications, using a patterns-based approach. Concepts covered include: threads, synchronization and object locking, thread blocking and deadlock, safety and liveness, state-dependent action and concurrency control. Formerly SE 552. PREREQUISITE(S): SE 450 and CSC 407. SE 450 and CSC 407 are the prerequisites for this class.

CSC 553 | ADVANCED DATABASE CONCEPTS | 4 quarter hours (Graduate)
An introduction to advanced selected topics in databases. The topics include: intelligent and deductive databases, temporal databases, multimedia databases, spatial and geographic databases, fuzzy databases, mobile databases, data mining and data warehousing, as well as emerging issues and concepts in database design, implementation and management. PREREQUISITE(S): CSC 453.

CSC 553 is a prerequisite for this class.

CSC 554 | ADVANCED DATABASE MANAGEMENT | 4 quarter hours (Graduate)
In this class, we will discuss concepts, technologies, guiding principles, processes and best practices in managing database environment to meet high availability, scalability, and compliance needs. Organizations with business critical applications must reduce their risk of downtime, manage database environment efficiently and ensure data meets compliance requirements effectively. IT now has additional responsibilities to secure and manage information in alignment with legal, records management and regulations. This class explores methods and techniques to achieve the availability needs and also focuses on how to protect the database against disasters by maintaining multiple copies of the databases in separate locations, synchronized in real-time. Students learn to design and manage key business resumption functions including disaster recovery plans and business continuity plans. Data governance challenges will be discussed along with solutions including data life cycle management, preservation, retention, and disposition. PREREQUISITE(S): CSC 453 or CSC 454.

CSC 554 is a prerequisite for this class.

CSC 555 | MINING BIG DATA | 4 quarter hours (Graduate)
Introduction to fundamentals of distributed file systems and map-reduce technology (e.g., Hadoop); tuning map-reduce performance in a distributed network. Algorithms and tools for mining massive data sets and discussion of current challenges. Applications in clustering, similarity search, classification, data warehousing (e.g., Hive), machine learning (e.g., Mahout).

(CSC 453 or DSC 450) and (DSC 441 or CSC 480) or (MAT 491 and MAT 449) are prerequisites for this class.

CSC 557 | FOUNDATIONS OF COMPUTER SECURITY | 4 quarter hours (Graduate)
This course provides an overview of foundational techniques in the specification and verification of computer systems in the presence of malicious attackers. Topics may include: formal models of interaction, attacker models, robust safety properties such as confidentiality and authenticity, information flow properties such as noninterference, and tools such as model checkers, type checkers and theorem provers. Formerly 557. PREREQUISITE(S): CSC 439.

CSC 557 is a prerequisite for this class.
CSC 559 | SOFTWARE ENGINEERING FOR FINANCIAL MARKETS | 4 quarter hours  
(Graduate) 
This course focuses on software engineering issues in creating a financial engine that drives automation and execution in a financial market. The course will cover different types of financial engines from back-office to front-office, exchange matching engines, data gathering engines, trading engines and straight through processing. The emphasis will be on the engines themselves rather than the financial models beneath them. Students will be required to work individually and/or in teams and create a financial engine. This is a project course and it will put students in the role of a domain architect who will need the skills required to communicate with financial traders and software engineers at the same time. PREREQUISITE(S): CSC 404 and (CSC 431 or CSC 521 or CSC 425)  
CSC 404 and (CSC 431 or CSC 521 or CSC 425 or DSC 425) are prerequisites for this class.  
CSC 562 | OPTIMIZED C++ MULTITHREADING | 4 quarter hours  
(Graduate) 
Software architecture of applied C++ concurrency and multithreading fundamentals. Basic threading concepts: process model, threads, stacks, fibers, mutexes, semaphores, atomic and events. Leveraging advanced C++ language features relating to the memory model and the threading support in large multithreaded architectures. Architecting lock-based and lock-free concurrent data structures in applications. Designing a threaded management system to control the access and reuse of threads in applications. Designing multithreaded architecture for real-time performance.  
CSC 588 is the prerequisite for this class.  
CSC 575 | INTELLIGENT INFORMATION RETRIEVAL | 4 quarter hours  
(Graduate) 
Examination of the design, implementation, and evaluation of information retrieval systems. The focus is on the underlying retrieval models, algorithms, and system implementations. Also examined is how an effective information search and retrieval is correlated with the organization and description of information to be retrieved. Topics include: automatic indexing; thesaurus generation; Boolean, vector-space, and probabilistic models; clustering and classification; information filtering; distributed IR on the WWW; intelligent information agents; IR system evaluation; information visualization; and natural language processing in IR. Throughout the course, current literature from the viewpoints of both research and practical retrieval technologies both on and off the World Wide Web will be examined. PREREQUISITE(S): CSC 403.  
CSC 403 (or Data Science MS students)  
CSC 576 | COMPUTATIONAL ADVERTISING | 4 quarter hours  
(Graduate) 
Computational advertising is the problem of finding the best advertisement for a given user in a given on-line context. It is a complex and emerging area at the intersection of quantitative marketing, web search, data mining, recommendation, optimization, and algorithmic game theory. Students will read current scientific papers and explore a range of models both mathematically and empirically. Students can choose from three types of final course projects: implementation projects, research papers, or data analysis projects. Prerequisite(s): IS 467 or CSC 478 or ECT 584.  
IS 467 or DSC 441 or CSC 478 or ECT 584 or DSC 484 is a prerequisite for this class.  
CSC 577 | RECOMMENDER SYSTEMS | 4 quarter hours  
(Graduate) 
Recommender systems offer personalized access to online information in product catalogs, social media networks, and document collections, among other applications. This class will introduce students to a range of approaches for building recommender systems including collaborative, content-based, knowledge-based, and hybrid methods. Students will implement recommendation algorithms using an open-sourced toolkit and conduct experimental evaluations. PREREQUISITE(S): (CSC 412 and CSC 478) or (CSC 403 and IS 467)  
(CSC 412 and (CSC 478 or DSC 478)) or (CSC 403 and (IS 467 or DSC 441)) are the prerequisites for this class.  
CSC 578 | NEURAL NETWORKS AND DEEP LEARNING | 4 quarter hours  
(Graduate) 
Course focuses on the algorithms, implementation, and application of neural networks for learning about data. It will present how neural networks represent data and learn in supervised and unsupervised contexts with applications to language processing, classification, and regression problems. Topics include learning algorithms, and optimization methods, deep learning methods for deriving deep representations from surface features, recursive networks, Boltzmann machines and convolutional networks.  
CSC 412 and (DSC 478 or CSC 480) are prerequisites for this class.  
CSC 580 | ARTIFICIAL INTELLIGENCE II | 4 quarter hours  
(Graduate) 
The course provides an in-depth coverage of advanced concepts and techniques in artificial intelligence. The topics include advanced concepts in optimization; Markov decision processes; reinforcement learning; and advanced machine learning techniques such as support vector machines, kernel regression, ensemble classification, spectral and density-based clustering, and multi-layer neural networks. These topics will be explored in the context of modern intelligent applications such as recommender systems, text and natural language processing, chat bots, and image recognition.  
CSC 412 and CSC 480 are the prerequisites for this class.  
CSC 583 | NATURAL LANGUAGE PROCESSING | 4 quarter hours  
(Graduate) 
This course introduces the fundamental concepts and theory of Natural Language Processing (NLP) and computational linguistics.&nbsp;NLP is a field in Artificial Intelligence devoted to creating computer systems which understand and produce human languages.&nbsp;Topics include language models, sentiment analysis, parsing, information extraction and neural language models. The course will explore the theoretical aspects of these topics and their practical implementations through case studies and projects.  
(DSC 478 and CSC 480) or CSC 578 are prerequisites for this class.  
CSC 587 | COGNITIVE SCIENCE | 4.5 quarter hours  
(Graduate) 
A study of the relationships between our knowledge of human and computer intelligence. Levels of analysis of intelligent system, examples of cognitive models, and exposure to current publications, with an emphasis on those related to human computer interaction. Students will participate in the design and testing of models of human intelligence, both experimentally and using computer models.  
CSC 403 or HCI 460 is a prerequisite for this class.
CSC 588 | REAL-TIME MULTITHREADED ARCHITECTURE | 4 quarter hours (Graduate)
Real-time constrained multithreaded architecture. Topics include multithreaded handle development, inter-thread communication, creating systems for user-defined callbacks, asynchronous loading and streaming of resources, non-blocking threading synchronization, design patterns and data driven messaging with time delivery constraints. Design and implementation of thread safe data management with atomic non-blocking synchronization. Exploration of real-time data driven messaging to allowing the run-time object data to control the behavior an application. Students will design, develop and implement a multithreaded real-time application (i.e. Audio engine) that integrates existing single and multithreaded middleware libraries. PREREQUISITE(S): CSC 461 and (SE 456 or SE 450)
CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

CSC 589 | TOPICS IN DATABASE | 2-4 quarter hours (Graduate)
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult with course instructor. (variable credit)

CSC 590 | TOPICS IN USER INTERFACES | 2-4 quarter hours (Graduate)
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult with course instructor. (variable credit)

CSC 591 | TOPICS IN ALGORITHMS | 2-4 quarter hours (Graduate)
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

CSC 592 | TOPICS IN COMPUTER VISION AND PATTERN RECOGNITION | 4 quarter hours (Graduate)
This is an independent study course. May be repeated for credit. PREREQUISITE(S): CSC 482 or CSC 528.

CSC 594 | TOPICS IN ARTIFICIAL INTELLIGENCE | 2-4 quarter hours (Graduate)
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

CSC 595 | TOPICS IN COMPUTER SCIENCE | 2-4 quarter hours (Graduate)
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

CSC 598 | TOPICS IN DATA ANALYSIS | 2-4 quarter hours (Graduate)
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

CSC 599 | INDEPENDENT STUDY | 1-8 quarter hours (Graduate)
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None. (variable credit)

CSC 601 | MASTER'S RESEARCH CONTINUATION | 0 quarter hours (Graduate)
Non-credit. This course is intended for master's degree students who have completed all course registration requirements and who are regularly using the facilities of the University for study and research, thesis or project completion. These students are required to be registered in this course each quarter of the academic year until all requirements have been completed. PREREQUISITE(S): Completion of required courses. Independent Study form required. (0 credit hours)

CSC 675 | CAPSTONE IN ARTIFICIAL INTELLIGENCE | 4 quarter hours (Graduate)
The course provides an opportunity for students to apply the skills and knowledge learned in the classroom to real world challenges. Students work in teams to implement an AI empowered solution to a critical problem. Students will also read scientific papers in the field to review and compare related work. At the end of the course, students submit a report summarizing their approach and describing the intelligent information system they developed.
CSC 580 and CSC 578 and CSC 583 are prerequisites for this class.

CSC 690 | RESEARCH SEMINAR | 1-4 quarter hours (Graduate)
Readings and discussion on current research topics. PREREQUISITE(S): Consent of the instructor. (variable credit)

CSC 695 | MASTER'S RESEARCH | 1-4 quarter hours (Graduate)
Students interested in a more in-depth study of a particular area will register for this course and work with a faculty member (not necessarily their academic advisor) on a research project. The work involved may include system development, empirical studies, or theoretical work. 4 credit hours of CSC 695 replaces one 500level elective course in student's degree program. This course can be taken for 1-4 credit hours for up 8 credit-hours. PREREQUISITE(S): Consent of research advisor. Independent study form required. Students must successfully complete the foundation courses prior to their first enrollment in CSC 695. (variable credit)

CSC 696 | MASTER'S RESEARCH | 0 quarter hours (Graduate)
A student who has made a significant contribution to a research project, through work done in 8 credit-hours CSC 695, may choose to complete the Master's Research option. During the second of the two quarters, the student must submit a technical report detailing the results of the research project. This report must be approved by the student's research supervisor and the faculty advisor, at which point it will be made available to the public as a CDM Departmental Master's Research Technical Report. The transcript will show the Research project title as the course topic.
CSC 697 | GRADUATE INTERNSHIP | 1-4 quarter hours (Graduate)
In cooperation with local employers, the graduate program offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. This course is variable credit and may be taken for one to four credits. This course may be repeated for a maximum of four credits total. Admission to the internship program requires consent of the Instructor and a Student Services Advisor. International students may complete curricular practical training (CPT) through this class provided they first obtain CPT authorization from the Office for International Students and Scholars (OISS) before beginning the internship. (1 quarter hour)

CSC 698 | MASTER'S THESIS | 0 quarter hours (Graduate)
A student who has made an original contribution to the area (typically through 8 credit-hours' worth of work done in CSC 695, but not necessarily) may choose to complete a Master's Thesis. The student and the student's research advisor form a Master's Thesis Committee. The student submits to the committee a thesis detailing the original results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for this course and the transcript will show the thesis title as the course topic. PREREQUISITE(S): Successful defense of a Master's Thesis. (variable credit)

CSC 699 | RESEARCH | 1-12 quarter hours (Graduate)
PREREQUISITE(S): Research course supervised by an instructor. Independent Study Form required. Variable credit. Can be repeated for credit. (variable credit)

CSC 701 | FULL-TIME CANDIDACY CONTINUATION | 0 quarter hours (Graduate)
Non-credit. Students in the doctoral degree who have completed their course credit requirements are required to be registered each quarter of the academic year until the exams, dissertation and final examination have been completed. Registration through independent study form requires certification that the student is actively working on exams and/or thesis under the advisor’s supervision. This course carries the equivalent of full-time enrollment status.

CSC 702 | PART-TIME CANDIDACY CONTINUATION | 0 quarter hours (Graduate)
Non-credit. Students in the doctoral degree who have completed their course credit requirements are required to be registered each quarter of the academic year until the exams, dissertation and final examination have been completed. Registration through independent study form requires certification that the student is actively working on exams and/or thesis under the advisor’s supervision. This course carries the equivalent of part-time enrollment status.

Core Curriculum Arts and Ideas (CCA)

CCA 147 | ETHICS: HOW GOOD PEOPLE MAKE TOUGH CHOICES | 4 quarter hours (Undergraduate)
Through life's many lessons, we have learned how to make a decision between what is the right thing to do and what is simply wrong. We can differentiate between good and evil, truth and lies, etc. However, most of our dilemmas do not stem from deciding the correct path, when we are faced with right and wrong decisions. What most often puts us into a quandary is deciding between what is right and what is right. In other words when good people are faced with tough choices, on what basis do they make their decisions? In an era of perceived ethical incertitude and moral skepticism, students will examine how decisions are made based on one of many ethical systems. Students will learn about various ethical systems, and ethicists, such as utilitarianism, deontology, Kant, Aristotle, and Gillian, just to name a few. By the end of the course students should be able to apply their knowledge of moral, ethical and social issues, and have a better understanding of how the tough decisions they make could impact others. (4 quarter hours)

CCA 152 | EXPLORING THE ART MUSEUM | 4 quarter hours (Undergraduate)
Museums have been a respected and trusted measurement of artistic accomplishment. In this course, the student will examine the museum's role as collector, conservator and educator. The student will investigate the traditional role of the art museum, its collection, practices and programs as well as its efforts to integrate new media into its collection. The course also investigates repatriation, which is the ownership of ancient and cultural heritage and other issues that affect the museum such as censorship and funding. Finally it will look at how we value art as a commercial commodity. (4 quarter hours)

CCA 153 | THE ART OF SPEECHMAKING | 2 quarter hours (Undergraduate)
In this class, students will use tools based in the imagination, principles of design, and standard dramatic practice to create a unique, personal experience for an audience. Speech, whether we call it dramatic or declamatory, has the potential to move the masses. In this course, you will develop a personal approach and construct effective presentations that harness the power of their voice and body. (2 credit hours)

CCA 154 | STRESS REDUCTION USING HUMOR AND SPIRITUALITY | 2 quarter hours (Undergraduate)
Stress affects the body in dramatic ways, and is a major contributing factor in chronic and degenerative diseases. We will understand/describe the physiology and biochemistry of stress and, more importantly, apply effective methods to reduce and manage it. Effective stress reduction and burnout prevention then become important health, wellness, productivity and disease prevention strategies for individuals, schools, businesses, the medical industry and the culture. The effective stress reduction techniques include breathing, biofeedback, humor, spiritual exploration, connection and inspiration. The holistic paradigm of body, mind and spirit supports our informed search for meaning, connection, calm productivity and enhanced health (2 quarter hours)
CCA 176 | CREATIVE WRITING | 4 quarter hours  
(Undergraduate)  
Students learn in this course to take artistic digital photos. They will analyze photos they have taken prior to the course and discuss if they fulfill criteria to be seen as art. Several theories of artistic expression will be discussed. Rules of composition, light, exposure, colors, etc. will be reflected upon. In a second step the students will develop the competence to alter their digital photos with a program like "Photoshop Elements". They will be able to change the expression of their photos and combine different shots, creating their personal piece of art. As a final product, students will create a portfolio with about 5 photos including detailed descriptions of their work. (2-4 quarter hours)

CCA 170 | CREATIVITY AND ENTREPRENEURSHIP | 2 quarter hours  
(Undergraduate)  
IPads. Smart Phones. The automobile. These inventions, once unknown and now taken for granted, required years of imagining, experimentation and innovative thinking. While we value the end product, we are often unaware of the underlying creative/creating process. This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. This course will explore contemporary approaches to the creative process based on the human capacity to imagine, to explore and, ultimately, to create. These are core skills for anyone pursuing a career as an entrepreneur or simply in search of ways to explore innovation. (2 credit hours)

CCA 172 | MAKING POEMS: AN INTRODUCTION TO VERSE | 4 quarter hours  
(Undergraduate)  
Making poems will be a creative writing offering that teaches metrics and verse forms, poetry the old-fashioned way. Topics will include metric feet, rhyme, lines, and verse forms. For example, students will learn about the iambic foot, write some iambic lines of various lengths, and finally use the iambic line to write a sonnet. Rap poetry with its structured rhythms and elaborate rhyming is another possibility. This "formalist" approach promotes a kind of creativity that is strongly infused with craft and discipline in contrast to the "spoken word" or confessional approaches to making poems. This class involves making audio recordings of your poems; students will be required to purchase a headset/microphone and download and install free software.

CCA 176 | CREATIVE WRITING | 4 quarter hours  
(Undergraduate)  
Designed to help you explore the art of writing stories, either stories that are "made-up" or stories based on lived experience. You will be required to complete six fiction-writing exercises, and either one short story, one autobiographical story, or one story based on an oral history collected by the you. In addition, you write a final essay in which you reflect on your learning and experience in the course. (4 quarter hours)

CCA 185 | THE BEATLES AND THE CREATIVE PROCESS | 4 quarter hours  
(Undergraduate)  
The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition.

CCA 202 | LONDON ALIVE: IN THEATERS, MARKETS AND MUSEUMS | 4 quarter hours  
(Undergraduate)  
Join SNL in London for a course about performance and representation. Theater, live performance, museum collections and street markets are integral parts of English cultural history; they also represent Britain's international heritage. London theaters celebrate English history, culture and language, and carry the banner of the English artistic imagination into the future. London's museums make it one of the most visited cities in the world for the range of its collected artifacts and images. Outside the theater and museum doors, markets teem with life, creating a magical intersection of past with present and future, of art with life and politics, of cultural stasis with social change. (4 quarter hours)

CCA 211 | ANALYZING AUSTEN'S PRIDE AND PREJUDICE | 4 quarter hours  
(Undergraduate)  
Jane Austen must have known something about universal truths. Her novel, Pride and Prejudice, which begins with the sentence quoted above, was first published in 1813. Still in print today, it has also been made into at least eleven movies, four of which were released since 2000, including a Mormon and a Bollywood version. In this class, we will read the novel in the context of the gender and class norms at the time Austen wrote her book and then consider how Austen's exploration of universal truths is reinterpreted in more contemporary film versions of this novel. In exploring Austen's creation and the many reinterpretations of her work, we will use both analytic and creative writing assignments as well as class discussion to examine how context informs creativity and how creativity informs analysis. You most definitely do not need to be a creative writer to take this class. (4 quarter hours)

CCA 215 | FILM NOIR | 2 quarter hours  
(Undergraduate)  
In this course we will screen and discuss select noir films and develop skills of viewing and analyzing them closely. Highlighted topics will include the concept of genre in film; the relationship of genre codes to creativity; the dynamics of form and content; the tension between commerce and art; the auteur theory; psychologies of the divided self; representations of masculinity and femininity; and the question of what these films say about American society, post-World War II. (2 quarter hours)
CCA 217 | MINDFULNESS MEDITATION | 4 quarter hours
(Undergraduate)
Mindfulness meditation provides many different ways to broaden our awareness of the world around us, heighten our powers of concentration, deepen our understanding of our experience, and cultivate creative and transformative ways of being in the world. Many approaches to mindfulness meditation draw on ancient religious and spiritual traditions from around the world. So mindfulness meditation is compatible with and can enhance whatever religious or spiritual commitments you may have. But mindfulness meditation does not require religious or spiritual interpretations. It can be practiced as a very powerful path to becoming a creative, healthy and effective adult. In this course, you will learn what mindfulness meditation is and various ways in which it can be practiced. We will explore in particular how mindfulness meditation can enhance creativity, address the ethical challenges of contemporary life, and foster collaborative learning. Class sessions will involve extensive practice in mindfulness meditation, listening and dialogue. You will be expected to maintain and reflect on a daily mindfulness meditation practice for the duration of the course. (4 quarter hours)

CCA 220 | YOGA: PHILOSOPHIES AND PRACTICES | 2-4 quarter hours
(Undergraduate)
This course combines an introduction to yoga and meditation techniques with an examination of the scientific and philosophical knowledge of yoga to improve health. Course is appropriate for beginners; no previous experience needed. Mats and props provided.

CCA 225 | GREAT MUSIC IN CHICAGO | 4 quarter hours
(Undergraduate)
The course introduces people to three of the most exciting and rewarding institutions in Chicago music: the world-famous Chicago Symphony Orchestra at Symphony Center downtown; the fabulous training orchestra of the Chicago Symphony Orchestra, known as the Civic Orchestra, also downtown; and live top-name jazz at the Jazz Showcase. We learn the background of these institutions, the nature of the arts they perform, and the terms used to describe and appreciate those forms. Most importantly, we experience, in person, the great music that they play!

CCA 227 | ART AND SELF | 2 quarter hours
(Undergraduate)
Although we take dozens of selfies, there are internal aspects to the interior self that a photo will miss. A Journal/sketchbook can hold ideas and act as a reflection of internal meanderings. During 5 weeks, we will explore the contemplative drawing practices of mandala (Hindu/Buddhist from East Asia), mind maps (popularized by 20th Century psychology), and dream drawings (First Nations peoples of Australia and South America). Students will use these methods to reflect on their own lives, drawing and writing in their ‘image journal’. These ideas will be mined to create a self-portrait. No prior experience in art is necessary to succeed in this course. Students will supply their own art materials and find a quiet practice space. (2 quarter hours)

CCA 231 | VISIBLE & INVISIBLE CITIES | 4 quarter hours
(Undergraduate)
This course looks at THE CITY through the lenses of four philosophical domains: ontology, epistemology, ethics and aesthetics. Through carefully curated short readings of the most important texts of classical, modern, and contemporary writers, students will be introduced to the big philosophical questions in these four domains as they apply to life in a great city.

CCA 250 | INTRODUCTION TO RECREATION AND SPORTS MANAGEMENT | 4 quarter hours
(Undergraduate)
This course will expose students to management theory, principles, administrative processes and functions with emphasis upon ethical practices and management procedures in recreation and sports. The course includes the examination of the roles, interrelationships, and uses of diverse leisure delivery systems to promote community development and equitable business practices. Focus will also be placed on understanding career options in the Recreation and sport industry and preparing for employment.

CCA 251 | PROGRAMMING PRINCIPLES AND APPLICATIONS IN RECREATION AND SPORTS | 4 quarter hours
(Undergraduate)
Foundation for designing, planning, delivering, and managing recreation and sport events. Recreation and sport programming is the overall management process in which leisure service professionals plan, promote, conduct, supervise, and evaluate program services within the context of a specific organization. This course is designed to provide students with an understanding of recreation and sport programming in a variety of settings and situations for diverse participants.

CCA 255 | SELF EXPLORATION: INSIDE OURSELVES, OUTSIDE WITH OTHERS | 4 quarter hours
(Undergraduate)
Exploring the self can be a very personal and satisfying experience, but can also provide clues as to how you interact with others, accomplish daily tasks and how to become a more happy, productive and respected individual. Students engage in self reflection in a collaborative learning format where they learn about themselves, share the process with a learning partner and observe the trends and conclusions of the class. Topics to be explored include family origins, gender perspectives, personality traits and development, self awareness and identity, creativity, and professional and moral perspectives. This course will operate in a blended hybrid format with meetings that link students in the classroom with others through live video interaction. You will have the option to attend either on campus or online for the five scheduled bi-weekly meetings. In addition, participation in the online discussion forum is required. This course is cross listed as CCA 255 and AI 255 (4 quarter hours)

CCA 256 | WORKPLACE AND PROFESSIONAL ETHICS | 4 quarter hours
(Undergraduate)
This hybrid-learning course is open to all DePaul undergraduates. It provides a thorough grounding in the theoretical and applied nature of work-based ethical decision-making. We engage the tenets and assumptions of four major ethical perspectives, using them to examine the meanings and implications of morality in professional life. Using the tools of reason, we investigate obstacles to ethical decision-making in one’s and others’ professional behavior, and apply our learning in the writing of a personal ethical code. (2-4 quarter hours)
CCA 281 | LIBERAL ARTS IN ACTION: BRAVE NEW WORLD AND NINETEEN EIGHTY-FOUR: DIVERGING DYSTOPIAS | 2-6 quarter hours (Undergraduate)
The Liberal Arts in Action course directs students to analyze an engaging topic—in this case, the two preeminent dystopian fictions of the last 100 years, Aldous Huxley's Brave New World and George Orwell's Nineteen Eighty-Four—from multiple perspectives in the liberal arts. Students strengthen their problem-solving skills by drawing upon the ideas and methods of three different liberal arts disciplines. The learning activities clarify how the liberal arts can be put into action to ponder and address problems. The course strengthens students' development of critical thinking and academic writing across the curriculum. Students also will learn about resources that will be useful for their academic success at DePaul.

CCA 285 | WORK, PLAY, REST: NAVIGATING COMPLEXITIES OF ADULT LIFE | 4 quarter hours (Undergraduate)
Adult life has become complex. With expectations from family, school, work, home, social pressures, technology and social media, it sometimes feels impossible to keep up. When the news bombards us or becomes frightening, and the world around us feels certain, how do we make sense of things and find our way forward? In this course, we will begin from the place that human beings are full of creativity, ingenuity, resourcefulness, generosity and hope. Our very lives and the world around us will be our subject matter—our need to work, our bodies' need for rest, and our enjoyment of leisure and recreation. Where does stress, expectation and anxiety come from, how are these held in the body, and what can we do about it? And, how has story, movement, music and sound, humor, popular entertainment and fun helped humans get through the day, navigate relationships, and find more ease? By engaging in simple creative practices in and out of class and considering what might be useful for individual and collective well being, the goal is for students to create a toolbox of approaches for navigating life's complexities to carry forward beyond the class. (4 quarter hours)

CCA 322 | PROBLEMS AND ISSUES IN CONTEMPORARY ETHICS | 4 quarter hours (Undergraduate)
An introduction to moral philosophy with emphasis on the conflict between "moral relativism" (or "subjective" ethics) on the one hand and "moral realism" (or "objective" ethics) on the other. During the course you will be introduced to classic theories and leading figures in the history of ethics, from Plato and Aristotle to Kant and Nietzsche. Course content will focus on issues (e.g., poverty, drug use, capital punishment, sexual behavior, euthanasia, biomedical research, animal rights, political violence) at the center of contemporary ethical debate in the United States and throughout the world. (4 quarter hours)

CCA 342 | LEARNING ART HISTORY THROUGH THE ART INSTITUTE OF CHICAGO | 4 quarter hours (Undergraduate)
The Art Institute of Chicago is one of the nation's premiere art museums, with a collection that offers wide opportunities for the study of art. This course will examine great paintings in the museum from the Middle Ages up to contemporary works. Students will deepen their knowledge of art history and how to study a painting, develop an overall knowledge of major periods and trends, as well as gain insights into the lives of the artists. Students will also gain a knowledge of the museum itself as a starting off point for further studies. Class will meet at the Art Institute, Michigan and Adams, at the front information desk. (4 quarter hours)

CCA 357 | CATHEDRALS OF ENGLAND: A PILGRIMAGE | 4 quarter hours (Undergraduate)
This study abroad program brings students to England—London, York, Canterbury, and other sites—to experience among the most impressive medieval cathedrals in the world. The travel segment is designed as a pilgrimage to the cathedrals because that is how people in the Middle Ages visited them, but also because that form of travel was, like the Silk Road, an early form of international commerce. As with globalization today, medieval pilgrimage involved people bringing not just goods but ideas across national borders, irrevocably impacting and being impacted by the cultures through which they traveled. As with pilgrimage, students in this program will share a collaborative journey of discovery and cultural exchange as they engage with England's medieval past and its post-Brexit present.

CCA 365 | JAZZ AND CHICAGO | 2 quarter hours (Undergraduate)
This short course will introduce the student to the pleasures and enrichment of jazz. Students will learn what jazz is, learn about its fascinating history and some of its most influential players, and learn about the special role that Chicago has played—and still does—play in great jazz. In the classroom we'll hear records, view videos, engage the instructor in question-and-answer sessions, and hear stories about this unique musical art form and Chicago's ongoing role in it. The instructor, a jazz writer and longtime jazz drummer, will enliven the course with personal anecdotes covering a considerable part of Chicago jazz history. (2 credit hours)

CCA 367 | EXPRESSIVE ARTS THERAPY | 4 quarter hours (Undergraduate)
This course offers a multi-arts approach in which different art modalities are woven into the therapeutic process as appropriate to a client's situation. It is grounded not in any particular techniques or media but in the capacity of the arts to respond to human suffering. Various arts—poetry, movement, drawing, painting, journaling, improvisation, music, and sculpture—are used in a supportive setting to facilitate growth and healing. Expressive arts processes have been used successfully in almost all psychotherapeutic contexts, ranging from work with the severely ill to the facilitation of human growth and potential. There is a growing use of the arts in health education, hospice work, and in community art projects especially after catastrophic events. The class will be conducted in a workshop format in which theoretical content will be combined with experiential learning. Lecture, discussion, audio-visual presentation, experiential exercise, guest speakers, and field trips comprise the structure of the class.

CCA 396 | INTRODUCTION TO ART THERAPY | 4 quarter hours (Undergraduate)
This experiential class will introduce students to concepts of art therapy and other expressive arts. It will address the therapeutic use of art making by people who experience illness, trauma, or challenges in living, as well as by people who seek personal development and general well being. By participating in expressive arts activities and reflecting on the products and processes, students will learn how art therapy can help people increase awareness of self and others, cope with symptoms, stress, and traumatic experiences; enhance cognitive abilities; and enjoy the life-affirming pleasures of making art.
Core Curriculum Human Community (CCH)

CCH 110 | ESSENTIALS OF TRAINING AND DEVELOPMENT | 2 quarter hours
(Undergraduate)
This is a 5-week, 1-competence course on Employee Training and Development. Students will learn the basic processes of employee training and development, including needs assessment, theories of learning and behavior change, training design to support appropriate selection or development of training, delivery of training, issues of transfer, and assessment of results. (2 quarter hours)

CCH 116 | PSYCHOLOGY OF MALE DEVELOPMENT | 4 quarter hours
(Undergraduate)
This course focuses on the development of boys from infancy through adulthood within socio-cultural context. We therefore address in addition to gender, the impact of race, ethnicity, class and related issues of societal/governmental failures when it comes to non-voting children. We cover why boys have more trouble at school, more problems with anger, and more incarcerations than girls or boys of higher social class, but our focus will be on their capacities and how those in power can help them thrive rather than present obstacles in their path from birth onwards. In my work in Chicago schools from Englewood to Rogers Park, I found young boys and teens very capable of caring and empathy but not reinforced by adults to develop these skills. This course suggests ways to change that and help teachers, parents and society not stereotype boys or give up on them so early in life. We will focus on how boys can develop fully as men of character and care, who can succeed in relationships, as parents, at work and in their community. We will learn of advocacy work to convince society to improve the conditions in which boys live.

We will view workshops including feminist Judith Jordan's "Raising Competent and Connected Boys" and learn of local and national efforts to support young boys development.

CCH 118 | MAKING SOCIAL CHANGE: THE LEGACY OF THE 1960'S | 2 quarter hours
(Undergraduate)
In the first twenty years following World War II, Americans participated in the democratic process and in civil society in record numbers. They participated in public meetings, belonged to labor unions, joined churches, and formed professional societies. These civic structures and habits of involvement empowered citizens to believe they could make a difference in their communities and laid the groundwork for some of the major social movements of the second half of the 20th Century. Civil rights, second-wave feminism, gay rights, and Latino rights all have their roots in the 1960's and continued their work over the following decades. In this class, we will explore civic engagement through the lens of our recent history. We will look at how these movements developed and analyze how they achieved their goals. We will take lessons from our predecessors and apply them to our own efforts to make a contribution to the lives of people in our local, national or global communities. (2 quarter hours)

CCH 140 | WRITING WITH SOURCES: APA STYLE AND CITATIONS | 2 quarter hours
(Undergraduate)
Writing Toolkit courses introduce, deepen and provide practical engagement with specific topics in writing and rhetoric. These online courses allow students to engage with their peers and instructors through asynchronous and synchronous elements. In Writing with Sources: APA Style and Citations, students will deepen their understanding of correct ways to use secondary sources in academic writing. Students will practice summarizing, paraphrasing, synthesizing, and citing source material, while gaining a deeper knowledge of the basic components and moves needed to write a paper using APA Style.

CCH 141 | CONFRONTING WRITER'S BLOCK | 2 quarter hours
(Undergraduate)
Writing Toolkit courses introduce, deepen and provide practical engagement with specific topics in writing and rhetoric. These online courses allow students to engage with their peers and instructors through asynchronous and synchronous elements. In this course, students will explore the potential causes of writer's block and practice strategies for overcoming it.

CCH 142 | MECHANICS OF GOOD WRITING | 2 quarter hours
(Undergraduate)
Writing Toolkit courses introduce, deepen, and provide practical engagement with specific topics in writing and rhetoric. These online courses allow students to engage with their peers and instructors through asynchronous and synchronous elements. In this course, students will learn how to improve the style, clarity, and correctness of their writing. The course will help students expand their knowledge and build confidence in their control of writing mechanics including, rules of grammar, sentence structure, word choice, parts of speech, and punctuation. Students will learn how to fix the most common mistakes that writers make. They will also learn when, why, and how to break the rules. Through weekly readings, discussions, and short, focused work using a current writing assignment of their own, students will identify and address areas for improvement in their writing.

CCH 155 | ANALYZING LEADERSHIP | 4 quarter hours
(Undergraduate)
This course provides a framework from which to identify and analyze leadership. Leadership occurs in all aspects of life, including: business, politics, sports, society, religion, family, education, and culture. But what is leadership? The Merriam-Webster on-line dictionary defines leadership as "the act or an instance of leading," which provides us with little insight. On further investigation, however, the dictionary defines "lead" as [guide] on a way especially by going in advance. Where there is a leader, then, someone or something must follow. This course first explores the interrelationship between a leader and his or her followers and looks at the effect they have on each other. "Good" leadership traits (i.e., effective) and "bad" leadership traits (i.e., ineffective) are then studied from the perspectives of the leaders, the followers, and outsiders. Finally, this course takes a look at leadership from an international perspective. (4 quarter hours)
CCH 165 | CHINA: MONEY, POWER AND THE 21ST CENTURY | 4 quarter hours
(Undergraduate)
The greatest migration of people in the history of the world is occurring right now, in China. Hundreds of millions of people, whose families have lived in rural China for thousands of years, are moving to rapidly urbanizing cities. This course analyzes, through the voices of the Chinese people, the dramatic impact of this social and economic revolution upon families and individuals. These changes are having a worldwide impact upon economics, trade and the new world order. Through lecture/discussions, videos, readings, on-line discussion boards and independent research, students will have the opportunity to form their own viewpoints as to the impact of globalization upon one of the oldest civilizations on earth. (4 quarter hours)

CCH 192 | THE ART, SCIENCE AND PSYCHOLOGY OF FOOD | 4 quarter hours
(Undergraduate)
We have many connections to food. Food sustains us but it has meaning that extends far beyond basic nutrition. Eating is an individual pleasure and comfort, a tool for creating and sustaining social bonds, and a way to express one's cultural identity. Food is tied to many aspects of life including culture, politics, agriculture and the environment. Americans have become disconnected from both the production of our food and from the joy of eating it and suffer from food related health problems such as diabetes, obesity and eating disorders. In this class we will explore the myriad of food-related habits and choices, that determine how what and why we eat. This experiential class moves beyond specific dietary guidelines by presenting concepts and skills that will help you reframe your connections with food. We will explore the multiple dimensions of food and eating from an individual, community and national level. We will explore the true meaning of nourishment. Topics include: identifying personal eating styles, mindful eating exercises, the slow food movement, locating Chicago food deserts, a field trip to a popular Chicago organic garden/restaurant, guest speaker from a Chicago restaurant mural artist, examining types of hunger and nourishment, and issues involving food and ritual, food and story, food and psychology, food and art. We will combine art, film clips, lectures, field trip, research, and mindful eating skills.

CCH 203 | RESILIENCE FOR CIVIC ENGAGEMENT | 2 quarter hours
(Undergraduate)
It can be meaningful and invigorating to contribute to change in your community and the world... and, it may also be exhausting! When the causes in the world we care about feel urgent and pressing, our ability to rest and recover often fall to the wayside, and we may not feel we have permission to take time out. In fact, in these times finding ways to be resilient is vital and enhances our ability to contribute. Beyond adaptability and bouncing back, resilience skills involve how we cope with adversity, practice mindfulness, and stay connected to others and our purpose. In this short course, our very lives and the world around us will be our subject matter. Students will tap into their unique creativity and imagination to identify what resilience practices serve their personal wellbeing and their ability to meaningfully contribute to a changing world.

CCH 206 | BANNED IN BOSTON | 4 quarter hours
(Undergraduate)
Boston is a city of many faces. It’s a world class city from a cultural and educational perspective, but it’s small compared with its old rival, New York City, or the so called Second Cities of the US, Chicago and Los Angeles. Boson is filled with riches made from old money profits but is poor in economic growth and population. It is the go-to place for American history, yet has competition for that title from neighbors like Philadelphia and Washington DC. With such internal paradoxes and external competitors, why choose a travel course to Boston?
Here’s why: no matter where you were born, if you live in America, you have been influenced by Boston and its tumultuous history. John and Abigail Adams, Alexander Graham Bell, Oliver Wendell Holmes, and John Kennedy all lived for a time in Boston, as did Emily Dickenson, Robert Frost, Malcolm X, and Matt Damon. The list of famous Bostonians is as long as Boston’s history. Participants in this course will gain knowledge of key figures and events in Boston’s late 18th and early 19th century political and cultural history through online and classroom learning prior to embarking on a journey of discovery that will make history and culture come alive. During the 3 day weekend on-site portion of the course, we will walk the famous Freedom Trail. We will visit the church that preserves a young volunteer bell ringer’s signature and learn that this was how the adult Paul Revere knew how to break into that bell tower that led to the famous "one if by sea, two if by land" signal that got the American Revolution off on the right foot. We will walk through Copley Square to view Copley's famous portrait of Paul Revere. We will ponder the empty frames that once held the priceless paintings stolen from the Isabella Stewart Garner Museum. We will view rare and forbidden books at the Boston Athenaeum as we learn what Banned in Boston actually means. When we return to campus we will reflect on the legacy of revolutionary era Boston which informs the Boston of today and the country's current conversation on democracy and freedom. In this domestic travel course centered on this most pivotal of US Cities, participants will visit historic sites, visit Boston's famous art collections, and experience its diverse neighborhoods like Boston Common, Beacon Hill, and the North End. Issues such as Boston's immigrant populations, its fame as a seat of American higher education, its connection to events in American history, and its economic output will be discussed in the preparatory classes as well as onsite. (4 quarter hours)

CCH 209 | CONSUMER BEHAVIOR INSIGHTS | 4 quarter hours
(Undergraduate)
In the Consumer Behavior Insights course, students explore the processes that consumers use to make decisions. Understanding of consumer segments is developed and applied to create communication strategies using a decision-making framework. Through coursework, students demonstrate an understanding of various topics including how market intelligence is collected, market segmentation, the impact of various cultural influences on behavior, elements of persuasive communication and development of consumer-oriented strategies. Cultural norms influence receptivity to marketing communication messages. In-depth consumer knowledge of a sub-cultural segment is learned and applied as students conduct market research. Based on analysis, students develop communication objectives, positioning statements and strategies for consumer communication. The role of mass media is examined in two distinct areas. Mass media influence cultural values by reinforcing norms for consumer needs and wants. Mass media are also important means for communication of targeted advertising messages. (4 quarter hours)
CCH 219 | THE FIGHT FOR HUMAN RIGHTS: ONE WOMAN’S CRUSADE | 4 quarter hours
(Undergraduate)
Helen Prejean is a leading human rights activist in the United States. For the past 30 years, she has helped shape conversation about equal treatment for all within the criminal justice system, especially persons of color and the materially poor. Dead Man Walking, the eyewitness account of her experience accompanying condemned prisoners to execution, has had a major influence on discussion of violence, poverty, civil rights, criminal law, and social justice. In this course, we use her work and interact with her personally to study power inequities across race and class lines that perpetuate injustice and examine her strategies for reform.

CCH 220 | FRAUD IN REAL WORLD ORGANIZATIONS | 2 quarter hours
(Undergraduate)
In this 5-week course, students will learn about common fraud schemes in the workplace, how to recognize them, the proper actions to take in response, and the long-term effects of undiscovered fraudulent acts. Students will achieve objectives by using online interactive scenarios designed to sharpen detective skills, reading articles focused on prevalent fraud schemes, and completing activities to learn how to prevent fraud in their own organizations. The course is geared to those with little or no accounting experience.

CCH 221 | PROFESSIONAL SPEAKING SKILLS FROM ZOOM TO ROOM | 2 quarter hours
(Undergraduate)
Authentic, credible oral communication is paramount to attain professional and personal success. The purpose of this course is to hone each student’s ability to orally communicate effectively and with ease. Regardless of the starting point - as a beginner or a seasoned speaker - we will identify personal strengths and improvement areas, then work upward from there. To accommodate today’s high demand for online communication (Zoom, Google Meet, WebEx, et al), instruction will focus on both virtual and in-person delivery. With an emphasis on the professional environment, we will explore a variety of common scenarios. Students will gain practical techniques to boost performance and shine - ranging from formal presentations to meeting facilitations to impromptu speaking. Because we represent different industries, backgrounds, and experience levels, we will employ a mix of individual and collaborative activities. The latter will ensure that we are capitalizing on resources within our unique learning group. Students will be encouraged to select topics relevant to their respective careers or areas of study. As well, students have the option to work on their real-life speaking scenarios(s), provided it fits within the assignment parameters. (2 credit hours)

CCH 222 | FACILITATIVE DIALOGUE | 4 quarter hours
(Undergraduate)
Verbal communication is an essential component in virtually every aspect of our interpersonal lives. The focus of this course is to study those situations and settings where we need to facilitate appropriate dialogue in order to arrive at a solution in the face of potentially emotional volatility. As examples, these conversations can include: confronting an uncooperative coworker, assessing alleged wrongdoing by a student, addressing resistance in a patient, or meeting the needs of a disgruntled customer. In these situations, our own behavioral and verbal actions are important determinants in the direction, duration, and consequences of the interaction. Given the potential for us to be verbally accosted, hostility confront, and/or be inappropriately blamed, we often have to manage our own emotions in addition to trying to engage in facilitative dialogue. Students will examine the processes involved in emotionally volatile situations including how our emotional and physiological state work in these situations. Students will learn a framework to more effectively manage the situation in order to arrive at an acceptable outcome. This course is appropriate for those in human resources, patient- and service-oriented industries, counseling, education, leadership development, and other settings where facilitative dialogue is necessary.

CCH 223 | GAMIFICATION | 2 quarter hours
(Undergraduate)
This course will focus on introducing students to the various ways in which games are used to educate, train, and motivate people towards non-game goals. Students will learn the basic principles of how gamification works, analyze examples of gamification in practice, learn various tools for creating a gamified experience, and design a gamified training exercise for adult learners.

CCH 224 | SOCIAL MEDIA ANALYTICS & MEASUREMENT | 2 quarter hours
(Undergraduate)
How do you know if your social media posts are taking off? This course focuses on looking at data behind social media likes, retweets, and upvotes to analyze and determine what works. Students will learn how to collect and analyze data, differentiate the importance of various statistics, use different measurement tools, and learn advanced measurement tactics.

CCH 230 | FRANCE AND THE SILVER SCREEN: MODERN HISTORY THROUGH FRENCH CINEMA | 2 quarter hours
(Undergraduate)
This course will explore central issues in the history of modern France through the lens of cinematic representations analyzed in historical context. Students will deepen their knowledge of the events and figures in French history and examine change and continuity in such phenomena as the rise of the politically-conscious urban working-class. We will also consider how French society has confronted gender difference and religious pluralism. This course also includes a focus on representations of war and militarism in film, particularly considering the rise of anti-militarist film in the aftermath of the First World War, and the role of violence in colonialism struggles in Algeria and Vietnam. This course will interpret the ways in which films portray historical events and how films contribute to public understanding of history. No prior knowledge of French language is required; all films will be in French with English subtitles.
CCH 233 | LEGACIES OF SLAVERY AND ABOLITION IN ILLINOIS | 4 quarter hours
(Undergraduate)
Understanding our history can empower us to contribute to the present, and even more so when it is the history in our own backyard. This course will unpack the complex history of the presence of slavery in Illinois, including pro-slavery forces in the nineteenth century and the anti-slavery activists who fought against slavery in Illinois and Illinois stops on the Underground Railroad. In the first half of the quarter we will learn about the little-known history of slavery practices, indentured servitude, sundown towns, Black Codes, and even lynching in Illinois history. In the second half of the quarter we will study the rise of abolitionism and anti-slavery voices, with a focus on key figures who led change, including instrumental figures who kept Illinois from becoming a slave state. A focus on how these inherited legacies impact Illinois residents and communities today will be threaded into discussions and assignments throughout the course.

CCH 234 | COUPLES PSYCHOLOGY AND INTIMATE PARTNER CONFLICT | 4 quarter hours
(Undergraduate)
The desire and pursuit of romantic love and partnership is a normal part of psychological development. This course will examine the psychology behind how couples become attracted to one another by focusing on the relationship between emotions, thoughts and behaviors and the dyadic environment in which they function. Students will learn about healthy partnerships as well as how conflict arises between couples including the context in which behaviors such as abuse and violence manifest. This course will also examine cultural factors that influence couples psychology.

CCH 236 | CULTURAL COMMUNICATIONS IN CUBA: WHO TALKS TO WHOM IN SCHOOLS AND CAFES | 4 quarter hours
(Undergraduate)
This study abroad course will provide participants with a foundation in the theories of intercultural communications. They will observe how people from different cultures communicate in public spaces, cafes, schools and other institutions and evaluate how communications are affected by place. Through their stay in Havana and a day trip to Vinales, participants will analyze how different socio-cultural factors interact to shape individuals and interaction patterns in these different settings, as well as in the United States. They will engage in global communication and evaluate the impact of communication differences that diverse political, religious, social, ethnic and educational backgrounds have on individuals communicating within an organization or individually. Prior to departure, participants will use interactive, online technology to engage in cross-cultural communication and to create criteria for evaluating and comparing communication patterns. In Cuba, participants will collaboratively use the criteria to analyze cross-cultural aspects of language and interactions in various settings from social and political perspectives. The trip duration is 7 days. The readings and activities ground students in recent theories of intercultural practice and provide a framework for students to become interculturally competent. Students will be staying in small groups in Casa Particulares, similar to Bed and Breakfasts, and hosted by Cuban families. The activities tentatively planned include touring Old Havana and the Plaza de la Revolucion, a visit to the Museo de la Revolucion, a visit to the Callejon de Hamel street fair, a day in rural Cuba to visit a tobacco farm and the Sierra del Rosario Biosphere Reserve, a visit to the Akokan community and the Casa de Africa, and a day at the beach. An important part of the curriculum are visits to local elementary schools, guest lectures with local university professors and an afternoon and evening with university students.

CCH 238 | ENGAGING RESILIENCE IN ADULT LIFE | 4 quarter hours
(Undergraduate)
Building & Engaging Resilience (in Adult Life) (4 credit hours) (Fac: Matamonasa) ? An ancient proverb reads: ?Fall down seven times. Stand up eight.? But how? What?s involved in such flexibility, adaptability, tenacity, hardness and resilience? What understandings, values and skills help? How does one develop these and nurture them across an adult lifetime? Through this seminar, participants will explore various concepts, models and ?best practices? for growing, rebounding and self-guarding one?s resilience?given the challenges and uncertainties of adult life. (Questions? Contact instructor at amatamo1@depaul.edu.)

CCH 239 | BUSINESS, TECHNOLOGY AND OUR GLOBAL FUTURE | 4 quarter hours
(Undergraduate)
Students will study the latest changes in the fields of intercultural communication and leadership development in today's global corporations, including reading interviews from some of the world's leaders in manufacturing, energy, telecommunications, and health care from numerous countries. This course combines hard science with cutting-edge organizational research-based case studies in today's trans-cultural global corporations. Students study key behaviors needed today to be successful in a global corporation, including cultural self-awareness, frame-shifting, inviting the unknown, third-way solutions, and others. Students will also study how "disruptive technologies", mobile internet, automation of knowledge work, cloud technology, next generation genomics, 3D printing, advanced materials, and renewable energy are changing and will continue to revolutionize global corporations. This course concludes with an analysis of the effects of social justice and corporate social responsibility on today's global corporations. (4 credit hours)

CCH 243 | POST-TRAUMATIC SLAVE SYNDROME AND ITS AFFECTS | 2 quarter hours
(Undergraduate)
This FDLS seeks to inform students about the nature of trauma, and the impact of post-traumatic slave syndrome (PTSS) on African-American life and culture. In the context of this course, both of these phenomena are associated with 250 years of U.S. chattel slavery, followed by decades of de jure and de facto racial discrimination. It is a subject that has historical, psychological and sociological implications and thus is a must for students pursuing undergraduate and/or graduate work in these areas. With this primary goal in mind, students will be asked to review one of two texts on the subject, Joy DeGruy-Leary's Post Traumatic Slave Syndrome: America's Legacy of Enduring Inquiry and Healing or Thom Burrell's Brainwashed: Challenging the Myth of Black Inferiority, along with selected readings where appropriate.
CCH 249 | NEW YORK: AN HISTORICAL OVERVIEW | 2 quarter hours 
(Undergraduate)
This Faculty Designed Independent Study (FDIS) encourages students to study the history of one of our nation’s oldest and most vibrant cities: New York City, including its five boroughs: Manhattan, the Bronx, Brooklyn, Staten Island, and Queens. The readings associated with the course provide a skeletal history of the city’s nearly four hundred years. Students are then asked to read a series of articles that elaborate on key historical events and/or eras, i.e. the city’s role in the American Revolution, the Great Depression, the impact of deindustrialization and suburbanization, and development of art and culture across different epochs, among other areas. Students are finally asked to supplement readings and a major homework assignment with a five-page paper that mirrors the spirit of their competence. The collection of readings and video presentations offer a fascinating, insightful, and fun look at one of the most interesting and intriguing American metropolises.

CCH 253 | FAMILY LIFE: THE PAST, PRESENT AND FUTURE OF FAMILIES | 4 quarter hours 
(Undergraduate)
In history, families have been defined as mother, father, and children. In our current experience, more families differ from that model than comply with it. Family structure is evolving. Missing fathers, Single parents, and Blended families are only a few of the changes to the family structure that have occurred with some significance beginning in the 1950s. (2-4 quarter hours) What influences family structure? Do economics and education make a difference? Are race and ethnicity important factors? What about gender, personality, and religion? Is the two parent family necessary? What role do grandparents and great grandparents play in the changing family? Perhaps the most important question we can ask about the family is what comes next. What are the many ways in which families might be redesigned in the future? How do these changes impact individuals in society?

CCH 254 | RESISTANCE DURING THE HOLOCAUST AND WORLD WAR II | 4 quarter hours 
(Undergraduate)
This course explores the history of the Holocaust in the context of the Second World War (1939-1945) with a central focus on examples of resistance to discrimination, fascism and oppression. We will explore varied forms of opposition including armed resistance, spiritual resistance, resistance through writing and identity preservation. We will read autobiographies, view documentary and dramatic films, and use museum resources to develop our understanding of resistance. Required activities include a visit to the Illinois Holocaust Museum and Education Center (Skokie, IL). We will also consider the implications of this history for making ethical choices in our world today.

CCH 257 | PARTICIPATION AND DEMOCRACY IN AMERICA | 4 quarter hours 
(Undergraduate)
Why don’t more Americans vote? How do education, income, and age impact voting trends? Why are some Americans more interested in politics than others? How is inequality reflected in other forms of political participation, such as donating money? Do recent trends in voter ID laws help to safeguard the democratic process, or restrict it? In summary, how democratic or representative are American elections? The course begins with some famous arguments about why participation matters. Trends in voter turnout then become the primary object of study, but we also consider other forms of participation including writing members of Congress, attending political meetings and contributing money. We explore recent discoveries in behavioral psychology that are changing the strategies of modern campaigns. After taking this course, you will understand the fundamental role of participation in democracy.

CCH 274 | THE BILL OF RIGHTS IN CONTEMPORARY LIFE AND WORK | 4 quarter hours 
(Undergraduate)
This course will be organized around a series of central questions: What is a law? Who has the authority to make one? What are the various sources of law? What is or should be the relationship between law, ethics and morality, law and religion? What is the difference between legislative law and constitutional law? What are the legal, historical, philosophical, and political sources of American constitutional law? What sort of society did the Framers of the Bill of Rights have in mind and are their ideas still applicable in 21st century America? How does the Bill of Rights fit into our constitutional framework and what does it guarantee? What is the relationship between the states and the federal government in guaranteeing those rights? What is the relationship between our legal system and our political system generally? What criteria do judges use to interpret laws? How does our own legal system differ from those of other countries and cultures? Are there any universal rights worth protecting? What role does (or should) science play in upholding our rights under the Bill of Rights? Possible areas to be covered are freedom of speech, religion, establishment of church and state, the right to privacy, the 4th, 5th and 6th Amendments? protections for criminal defendants and the death penalty.

CCH 281 | LIBERAL ARTS IN ACTION: VOICE OF HER OWN: EQUALITY IN ACTION | 2-6 quarter hours 
(Undergraduate)
On January 21, 2017, over two million women around the world marched. They marched in big cities, small towns, and on every continent. Why did they march? What was and will be the impact of their marching? What can we learn from this phenomenon? These are questions we will explore in this course using three different disciplinary perspectives: history, psychology, and rhetoric. (6 credit hours)
**CCH 282 | LEISURE FOR WELL-BEING | 2 quarter hours**  
(Undergraduate)

The pursuit of happiness for most people is an important aim in life. A personal feeling of well-being includes “emotional happiness” and the rational satisfaction with one's own life. In this course you will attempt to define the term “well-being” and discover its relationship with other concepts such as mental health and life satisfaction. How does physical exercise influence well-being? How do positive and negative life events influence well-being? Do good social relationships guarantee happiness? Do the expectations one has in life with regard to income influence well-being? Is it important to set goals to achieve a high level of well-being? These and other questions will be addressed in this course. You will try to define some of things a person can do to increase his or her level of well-being. Others' ideas serve as common course content, as presented in the material assigned to this course. You will be asked to participate actively and critically, to work individually and in study groups, using your own experience as a field of analysis and reflection. Active group participation will foster a harmonic, interactive environment, which might increase positive relationships among students and foster a feeling of well-being throughout this course. (2 quarter hours)

**CCH 283 | GLOBAL PERSPECTIVES OF WORK & FAMILY | 4 quarter hours**  
(Undergraduate)

What role does the political, economic, and cultural structure of a nation play in its concepts of work and family? This course develops students’ understanding of issues in the history of family and work through historical and contemporary accounts from Europe and the United States. We will take a close look at issues such as the gender division of labor, child labor, government policies on maternity, economic structure as well as social and political movements. Course materials include historical documents, lectures, films, and varied readings. Assignments will include essays, reflection journals, discussion, and a research project on work-life balance. (4 credit hours)

**CCH 284 | JAZZ AGE PARIS: 1919-1939 | 4 quarter hours**  
(Undergraduate)

This is a history of Parisian society and culture in the era between the two world wars. We will explore issues of race, class and gender in the interwar period in French society. We will also examine the role of American writers, artists, musicians and performers in the cultural world of Paris, the City of Light, and an outpost in the Harlem Renaissance. (4 credit hours)

**CCH 286 | NEW ORLEANS IN SONG, STORY & STRUGGLE | 4 quarter hours**  
(Undergraduate)

The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry - music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, r&b, zydeco and funk. We will situate these art forms in social, historical and political context and examine the complex processes of invention and adaptation which have shaped them; in that regard, we will particularly highlight the development of early jazz in this unique metropolis which, though residing at the tip of North America, has been called "the capitol of the Caribbean." We will make use of Thomas Brothers' pioneering study Louis Armstrong's New Orleans as well as musical performances by the likes of Professor Longhair, the Neville Brothers, Wynton Marsalis and Dr. John. We will also learn about the carnivalesque culture of New Orleans, a pursuit that will take us into what might be called the secret history of Mardi Gras. In addition, we will read two striking literary works by artists who have a background in and fascination with the crescent city: Kate Chopin's groundbreaking novella The Awakening and Tennessee Williams' spine-tingling one-act play Suddenly, Last Summer. Moreover, we will consider the role played by New Orleans in American history and imagination as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level. (4 quarter hours)

**CCH 299 | ASSESSING AND MANAGING CONFLICT | 4 quarter hours**  
(Undergraduate)

Our usual method for presenting, analyzing, and resolving conflicts has centered around legalistic argument; the goal being to discover the "right" answer and suppress the "wrong" ones. However, the multiple worldviews operating in the world today make such an approach to conflict less viable. Reflecting this reality, ways of communicating about and resolving conflict have arisen that go beyond enforcement of rules or legal determinations of right and wrong. In this course, we will look at various methods for handling conflict and consider how we might apply them to personal, work, community and literary conflicts through lecture, small group work, role playing, reading, various written projects, and discussion.

**CCH 300 | GLOBALIZATION AND PROFESSIONAL PRACTICE | 4 quarter hours**  
(Undergraduate)

For decades scholars have observed a growing body of evidence and employers a growing body of experience of significant changes in the way that international business is conducted. These changes in the business world, brought on largely by globalization, present new challenges. These challenges require staff with specific skills related to global competence in order for the business to remain competitive. The goal of this course is to help students to cultivate and/or refine the skills and capabilities necessary to succeed in today's global work environment. Organized around four learning units and one major project, the class will provide each student with extensive content and resources; it will also provide a forum for assessing the competences necessary to attain success in a global workplace and a method for honing those skills each student needs to cultivate. (4 quarter hours)
CCH 315 | ECONOMICS FOR DECISION-MAKING | 4 quarter hours
(Undergraduate)
The purpose of this course is to provide the modern consumer living in a global economy fueled by unabated technological progress, with basic notions to understand the path that has led to sustained prosperity. The focus is on endowing students, as householders, with conceptual tools to make optimal financial and consumer decisions throughout the life-cycle. That theoretical foundation is reinforced and exemplified with a wealth of practical applications offered through a student-friendly online interactive learning platform, which also provides a convenient means to complete weekly assignments. That online platform will help students relate what they learn to their everyday experience of active participants in the economic game. The course is divided into two modules, microeconomic and macroeconomic, and basic economic methodology is presented in both. Microeconomic topics include scarcity, opportunity costs, the law of diminishing returns, the trade principle of comparative advantage, the mechanism of the price system, the laws of demand and supply, the impact of market interventions by the government, etc. Macroeconomic topics include the forces undergirding the performance of the gross domestic product (GDP), the forces that influence inflation and unemployment, the role of fiscal and monetary policy, the workings of money and banking, the relevance of balancing the requirements of economic growth (efficiency in the use of inputs) with the necessity of attending to the needs of both society (need for equity) and the environment (need for sustainability), etc. (2-4 credit hours)

CCH 325 | CONNECTING THOUGHT AND BEHAVIOR | 4 quarter hours
(Undergraduate)
This course introduces students to concepts of Cognitive Psychology. They will review the history and development of the field and explore how cognitive processes impact thought and behavior. Through an experiential learning process, students will explore the science behind such topics as perception, consciousness, memory, language, problem solving, reasoning and emotional experience and how these cognitive abilities impact their lives.

CCH 330 | LAW IN THE BUSINESS ENVIRONMENT | 2 quarter hours
(Undergraduate)
The influence of the law is far-reaching in the corporate world. Whether an entrepreneur, manager, administrative assistant, union employee, nonunion employee, sales representative, purchasing agent, etc., the law ultimately affects how we make decisions in the work arena. This course allows students to discover the wide range of laws affecting America’s business environment. Students will learn how the law is established and developed, and be provided with tools to recognize potential legal issues that arise in daily business operations. The curriculum considers the impact of the law in the global workplace, and in commerce, business operations, employer/employee relationships, and in the regulatory environment.

CCH 335 | HUMAN RESOURCE AND TALENT DEVELOPMENT FUNDAMENTALS FOR MANAGERS | 4 quarter hours
(Undergraduate)
This course is designed as an introduction to the practices of human resources (HR) in a corporate environment. It will target the practices that managers need to know such as recruiting, training, hiring, and terminating employees as well as the basics of HR law. Additional content that will be addressed includes headcount management, performance appraisals, learning & development, compensation basics, and grievance processes. This course will equip managers with the information they need to know without making them Human Resource experts but rather how to work effectively with their HR counterparts. (4 hours)

CCH 345 | EMOTIONAL INTELLIGENCE AT WORK | 4 quarter hours
(Undergraduate)
One’s IQ (intelligence quotient) alone does not predict success in the workplace or in life. Emotional intelligence (EI) plays a vital role as well. This course provides an introduction to the field of emotional intelligence, evidence of its impact on individuals and organizations, and strategies for applying it in multiple settings. Participants will deepen their understanding of EI by exploring the research literature and completing an assessment of EI provided by 6 Seconds (http://www.6seconds.org). Strategies for applying EI to increase one’s success and satisfaction at work and in other social contexts will also be explored. There are a several models of emotional intelligence, each with a measure used by individuals to create a profile of EI abilities, used as the basis for learning and development. Some focus more directly on the workplace or on therapeutic settings. The Six Seconds’ model of EI is designed to have broad application and enable individuals to draw on EI across the various dimensions of their lives. (4 credit hours)

CCH 359 | ETHICAL BUSINESS BEHAVIOR | 4 quarter hours
(Undergraduate)
Ethical Business Behavior explores the ethical issues that business decision-makers face and examines the moral principles that are used to help resolve these issues. Ethical decisions in the workplace can have tremendous influence on the individuals and the corporations involved. The outcomes of unethical behavior can affect reputations, trust and career path. Results have been as severe as loss of employment, physical harm to individuals, corporate bankruptcy and even impacts to the economy. Students are placed in decision-making roles through exercises, case studies and role-playing. Reasoning skills are honed through identification of ethical issues and alternative means to analyze these issues. Ethical behavior is evaluated using analytical skills to apply ethical concepts to business situations. (4 quarter hours)

CCH 363 | ACHIEVING YOUR WORK AND LIFE GOALS | 4 quarter hours
(Undergraduate)
You will study the process of goal achievement from goal definition through development of a vision, review of resources and obstacles, strategic ordering of tasks and steps, effective communication and problem solving and development of an action plan. You will consider theories of goal setting, planning, communication, and negotiation, and engage in practical exercises that will require the application of theory. You will produce a completed action plan for a defined career or personal goal. (4 quarter hours)

CCH 367 | LEISURE, RECREATION, AND HEALTH | 4 quarter hours
(Undergraduate)
This course will stimulate your thinking about the meaning of leisure in your life. Leisure today and historically has been central to the human experience. It is an elemental experience, essential to the total well-being of every person; it is a reflection and expression of the cultural values of a society; it is an important vehicle for treatment. Leisure and recreation services are also essential for healthy communities in terms of social climate, environmental quality, and economic stability. Leisure services comprise one of the largest and fastest growing industries in the world, whether measured in dollars spent, persons served, hours of time devoted, or resources used. The study of leisure and recreation is a broad discipline, combining diverse fields of study and professional practice. This course will (1) illustrate the importance of leisure to you and your loved ones, (2) contribute to your ability to become an informed consumer of leisure, (3) question the binary relationship of work and leisure and, (4) teach you how to use leisure to increase emotional and physical health, resulting in a higher quality of life. The course will be interactive and participatory.
The ethical implications of different approaches and uses of intelligence attention to the unintended effects of the biases of test developers and examine the implications of the definitions and measurement approaches "intelligence" and consider various approaches to intelligence, errors), and apply them to intelligence testing. We will work to define assessing human traits (reliability, validity, bias and other systematic employee selection and placement. Students learn the principles of In this course, students examine intelligence testing and its uses in debates involving the intersection of science and religion.

Core Curriculum Scientific World (CCS)

CCS 153 | SCIENCE FOR CITIZENS | 2 quarter hours (Undergraduate)
Students will learn basic knowledge of science as they engage in activities that are connected to their everyday life. They will explore their natural ecosystem and be able to describe various functions. They will engage in the scientific method through observations, hypotheses, data collection and basic data analysis. Students will apply their critical thinking based on the scientific method to local environmental or science related issues/events. (2 quarter hours)

CCS 208 | ISSUES IN SCIENCE AND RELIGION | 4 quarter hours (Undergraduate)
This course develops students' understandings of the scientific and religious constructions of self in the modern world (natural and social). The institutions and bodies of knowledge comprising science, religion, and their overlap are critically analyzed. Key historic debates are examined, for example: the Vatican's trial of Galileo for his teachings of a heliocentric universe; the controversial reception of Darwin's theory of evolution; and the 2001 U.S. policy on embryonic stem cell research. Through such analyses, the course develops students' skills in making ethically-informed decisions and thus recognizing their roles in the public debates involving the intersection of science and religion.

CCS 217 | UNDERSTANDING AND MEASURING INTELLIGENCE | 4 quarter hours (Undergraduate)
In this course, students examine intelligence testing and its uses in employee selection and placement. Students learn the principles of assessing human traits (reliability, validity, bias and other systematic errors), and apply them to intelligence testing. We will work to define "intelligence" and consider various approaches to intelligence, contrasting the theories of unitary vs. multiple intelligences. Students will examine the implications of the definitions and measurement approaches on different groups of people, both historically and currently, with attention to the unintended effects of the biases of test developers and the ethical implications of different approaches and uses of intelligence testing.

CCS 219 | NEUROPLASTICITY AND THE AGING BRAIN | 4 quarter hours (Undergraduate)
In this course, we will examine the latest research on the aging process and, specifically, its relationship to the brain. We will cover a mix of material from psychological and, especially, neuroscientific fields. Students will also be introduced to the field of neuroplasticity, which is revolutionizing the way we understand the functioning power of the brain. Neuroplasticity, in simple terms, is the brain's ability to rearrange its connections and, therefore, its functions based on experiences. In other words, the brain has the capacity to literally change itself, based on experiences, to achieve positive results. The goals of this course are to understand how the brain works, examine its impact on our daily actions, study how aging impacts brain functioning, discover the learning and adjustment potential of the brain, and apply the principles of the 3 P’s. We will use numerous examples to understand the brain, including health, work, relational, and personal settings. Students will ultimately answer the question of whether they will have an aging or reengaging brain.

CCS 230 | CANNABIS AND SOCIETY | 2 quarter hours (Undergraduate)
This course engages students in foundational studies of cannabis, drawing upon perspectives from science, medicine, history, sociology, law, ethics, and business. Students will receive a broad introduction to the plant's key facts, uses, status, and controversies in contemporary society, with an emphasis on the local Illinois context. We will draw comparisons between cannabis and other drugs. The course focuses on developing students' competencies in critical and ethical analysis, dialog, and civic engagement.

CCS 250 | SOCIAL MEDIA MARKETING FUNDAMENTALS | 2 quarter hours (Undergraduate)
This course will provide students with an overview of the history of the Internet and basic marketing strategies as they relate to the Internet and Web 2.0 technologies. Students will learn about how to keep abreast of new technology, how these technologies can be used to market services and products as well as how they can be used to create and maintain social networks for professional use.

CCS 256 | EVERYDAY ECOLOGY | 4 quarter hours (Undergraduate)
Every week, we learn of typhoons and landslides, floods and hurricanes, droughts and other natural catastrophes. Scientists now agree that the major cause of climate shift is man-made, specifically our use and abuse of global energy resources. In Everyday Ecology we will analyze our energy use patterns and explore practical alternatives. The word "ecology" originates from the meshing of two Greek words meaning the "study of homes." Although the main focus of this course is the individual household, another?household?we must take into account is the economy. Ecological economics examines how both disciplines need to look toward the other to be viable long term. We will examine options to bring the earth household (ecology) and the human household (economy) together for the benefit of both. This course observes how ? man? is connected to the world around him. It allows us to see our options in response to growing concern over global climate change. Through readings, field trips, activities, discussions and an analysis of our personal use of energy, this course enables us to become increasingly aware of ecological issues. You will learn to evaluate the effect of personal choices on the earth and be introduced to alternative, 'greener' options.
This course promotes students' investigation of fossils to interpret the character of 3.5 billion years of biological evolution and ecological change on earth. By way of scientific reasoning, mathematical inference, and applicable technologies, emphasis is on the exploration of earliest evidence of life, development of multi-celled plants and animals, dinosaur evolution, mass extinction events, mammal diversification, human origins as well as appraisal of the societal reliance on fossil resources and the persistent debate over evolution versus creation. Learning is assessed through labs, a fieldtrip, an exam, video summaries, contributions to online discussions, and a research paper in a scientific format.

This course will provide a framework for understanding human energy needs, the better we are able to make choices concerning our health. This course will offer an overview of the basic science of nutrition, with an emphasis on the relationship between disease and nutrition, and current research findings.

This course will provide a framework for understanding human energy systems, such as digestion and respiration, in relation to current healthcare practices to enhance their effectiveness (dietary approach, manipulation therapies, acupuncture, exercise, and meditation). We will consider connections between social and environmental variables such as constitution, stress, lifestyle, and vital physiological functions. Each class will build on the basic understanding of biological systems in relation to energy through lecture and discussion. We will review literature on various healthcare practices to discern sound approaches and practical applications. Students will cultivate an appreciation for daily health choices that cumulatively affect their health.

Why are 20 million Americans practicing yoga? This course answers that question with an introduction to yoga and meditation techniques and the underlying scientific and philosophical principles of the system of yoga. The first half of each class will be experiential, conducted as a yoga and meditation class for beginners, providing tools to reduce stress, focus the mind, and cultivate inner peace. This first hour and a half will use yoga postures, breathing exercises, and meditation techniques. The second half of each class will use readings, reflection, and discussion to examine the scientific and philosophical knowledge of yoga as a way to ease stress, strengthen the bone and muscle structures, lower blood pressure, increase flexibility and strength, improve mind functioning, and provide spiritual sustenance. We will read Yoga Mind Body and Spirit: A Return to Wholeness by Donna Fari, and The Yoga Sutras of Patanjali, research articles on the scientific studies of yoga's benefits from journals and websites, etc. Students will keep weekly reflection journal observations on the changes(s) they notice in themselves. This course will refresh, relax, rejuvenate. Yoga mats and other props will be provided. Bring/wear comfortable clothes (no jeans, belts, dresses). This is a Gentle Yoga class for beginners. Yoga means to unite or yoke so course will explore the ways to unite body, mind, spirit. This course is designed to 1) help establish good health and well-being; 2) gain scientific knowledge and understanding of the various systems of the human body; and 3) explore the spiritual benefits of meditation.

This course directs students to analyze an engaging topic (here, urban rats) from multiple perspectives in the liberal arts. Students strengthen their problem-solving skills by drawing upon the ideas and methods of three different liberal arts disciplines. The learning activities clarify how the liberal arts can be put into action to solve problems. The course strengthens students? development of critical thinking and academic writing across the curriculum. Students also will learn about resources that will be useful for their academic success at DePaul. (2-6 credit hours)

This course contains two distinct strands of learning: (1) the current condition of the natural world and the ways it is approached scientifically; and (2) the major premises of the most significant ethical frameworks in use today. Using this knowledge, students investigate several contemporary environmental problems, identifying their underlying causes, and analyzing various proposed solutions. This is complemented by the intensive study of major ethical perspectives, particularly those which have developed alongside, and as a consequence of, grave environmental concerns. The course project is a collaborative endeavor to integrate the knowledge and skills acquired through mastery of both learning strands.
Presentations, discussions, and open-source epidemiological tools to ability to measure improvements in health outcomes in well-resourced track the emergence of new disease threats, assess global disease we will learn about the science-based methods and tools we have to "western world" diseases to low and middle income countries, and so fragile in the face of new disease challenges such as the Covid-19 address new challenges; and examine why some health systems are expectations in determining how health systems function and adapt to emphasis on understanding the critical intersection of policy, social (Undergraduate)

CCS 320 | MAMMALOGY | 2-4 quarter hours (Undergraduate)

This course will introduce you to the origins, evolution, ecology, and biodiversity of the class Mammalia. Key topics will include mammalian anatomy, classification, genetics, reproduction, thermoregulation, locomotion, behavior, ecology, and conservation. Special emphasis will be on investigating the connections of mammalian evolutionary biology to human health issues including disease, nutrition, physical activity, injury, and overpopulation. Online learning will incorporate readings, discussions, a science "kit" for hands-on labs, virtual labs using 3D mammals, and computer simulations. Student will also undertake collaborative experimentation and onsite inquiry of mammals at a zoological park, museum, and/or nature reserve. Prerequisite: None.

CCS 328 | GLOBAL INFECTIOUS DISEASES AND HEALTH | 4 quarter hours (Undergraduate)

In this course we will learn about the global burden of disease with an emphasis on understanding the critical intersection of policy, social expectations in determining how health systems function and adapt to address new challenges; and examine why some health systems are so fragile in the face of new disease challenges such as the Covid-19 pandemic. We will look at the role of globalization in introducing "western world" diseases to low and middle income countries, and we will learn about the science-based methods and tools we have to track the emergence of new disease threats, assess global disease burden, understand disease mitigation strategies, and compare our ability to measure improvements in health outcomes in well-resourced and resource-poor countries. Online learning will include readings, slide presentations, discussions, and open-source epidemiological tools to examine disease burden and trends.

Counseling (CSL)

CSL 95 | CLINICAL ORIENTATION | 0 quarter hours (Graduate)

Students will be oriented to the expectations and requirements of the practicum and internship experiences in Human Services and Counseling. (0 credit hours)

CSL 96 | CLINICAL APPLICATION | 0 quarter hours (Graduate)

This milestone course ensures that all students have met the requirements for clinical placement. (0 credit hours)

CSL 97 | CLINICAL PLACEMENT | 0 quarter hours (Graduate)

This milestone course ensures that students have secured a clinical placement that fulfills all requirements for Human Services and Counseling Program. (0 credit hours)

CSL 200 | LEADERSHIP AND SOCIAL CHANGE | 4 quarter hours (Undergraduate)

This is an advanced course exploring how leadership theory interacts with organizational structures, advocacy, and social justice. The class is structured to expand from the individual to the group/organization/ school level to the societal macro view of leadership. The topics of leadership development and leadership education in P-16 settings will be included. Contemporary topics in leadership will be addressed to coincide with social change and leadership. (Cross-listed with CSL 500).

CSL 377 | SOCIAL EMOTIONAL LEARNING IN THE MIDDLE GRADES | 4 quarter hours (Undergraduate)

This course introduces social-emotional learning standards and their relevance and application to middle grades content area classrooms. Topics addressed include the relationship between social emotional learning and classroom management as well as bullying and cyberbullying in school communities. Co-requisites for this course are MGE 341, MGE 351 and MGE 361. In this course, students will: 1. Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.
Counseling (CSL)

CSL 451 | LEGAL AND ETHICAL ISSUES IN COUNSELING | 4 quarter hours (Graduate)
Professional counseling involves interplay of ethics, personal values and legal implications of practice. A core component of the course is a focus on how personal values intersect with ethical decision-making. Ethical codes and ethical decision-making models related to the profession are studied so that the students will have the knowledge of professional ethical practice. An examination of local and federal laws in relation to the previously mentioned components will be examined. Students engage in case conceptualization, small group activities, role-playing with lectures, and video technology.
Admission to the Counseling Masters Program is a prerequisite for this course.

CSL 452 | INTRODUCTION TO THE COUNSELING PROFESSION | 4 quarter hours (Graduate)
This introductory course provides students with a broad yet comprehensive overview of the Counseling profession. Through lectures, discussions, activities, and group work, students learn and apply core concepts and aspects of counseling including basic counseling skills, advocacy, multiculturalism, ethics, evaluation, and assessment. For most of the primary topics covered, students will take a full course on them later in the program.
Admission to the Counseling Masters Program is a prerequisite for this course.

CSL 454 | CAREER COUNSELING | 4 quarter hours (Graduate)
This course introduces students to methods for assisting individuals in choosing, preparing for, and progressing in a career. Vocational testing and sources for occupational information are explored and technology tools designed for career exploration are demonstrated. The study of vocational behavior in relation to career patterns is also considered, with special attention to the analysis of empirical data and theories pertaining to vocational choice.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 458 | GROUP COUNSELING | 4 quarter hours (Graduate)
This course includes the study and ethics of group process, theoretical application, leadership and membership styles and problems such as conflict resolution. Students will engage in a regular group experience as a part of the course. In addition, opportunities to observe and participate in group work in the community are also part of the course. In addition, CSL 501 Counseling Skills must be taken either before or concurrently with CSL 458 Group Counseling.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 461 | TESTING AND APPRAISAL | 4 quarter hours (Graduate)
This course includes a detailed analysis of intelligence, aptitude, personality, and achievement tests used with groups and individuals. The course is intended to familiarize students with various appraisal procedures and their utilization. Attention is given to the development of the institutional testing program.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 466 | ASSESSMENT AND TREATMENT OF CHEMICAL DEPENDENCY | 4 quarter hours (Graduate)
This course seeks to develop skills and understanding relevant to the assessment and treatment of chemical dependency. The major alternative assessment approaches and treatment interventions for chemical dependency are surveyed and analyzed.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 467 | COUNSELING THEORIES | 4 quarter hours (Graduate)
This course reviews counseling a broad range of counseling theories. Counseling techniques and process derived from these various counseling theories will be used in classroom experiences and with follow-up assignments. Students will begin to develop their own theoretical orientation. Theoretical frameworks will be considered for a variety of counseling contexts.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 475 | COLLEGE AND CAREER READINESS COUNSELING FOR SCHOOL COUNSELORS | 4 quarter hours (Graduate)
This course provides an introduction to college and career readiness counseling in the school context. Students are introduced to career theories and resources, as well as strategies to promote access and readiness for postsecondary education.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 476 | COLLEGE AND POSTSECONDARY ACCESS COUNSELING | 4 quarter hours (Graduate)
This course will introduce students to the college and postsecondary education admissions process. Students will learn methods for counseling others through selecting, applying, and transitioning to postsecondary education. Topics include admission requirements for various types of higher education institutions, financial aid, college match and fit concepts, college search technology, college transition, and working with special populations.

CSL 477 | SOCIAL EMOTIONAL LEARNING IN THE MIDDLE GRADES | 4 quarter hours (Graduate)
This course introduces social-emotional learning standards and their relevance and application to middle grades content area classrooms. Topics addressed include the relationship between social emotional learning and classroom management as well as bullying and cyberbullying in school communities. Co-requisites for this course are MGE 441, MGE 451 and MGE 461. In this course, students will: 1. MGE 421 and Advanced Teacher Candidate Standing are prerequisites for this class.

CSL 480 | SPECIAL TOPICS IN COUNSELING | 1 quarter hours (Graduate)
The content and format of this course are variable. This course includes an in-depth study of a specific topic in counseling. Subject matter will be indicated in the class schedule. (1 credit hour)
A grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.
CSL 481 | SPECIAL TOPICS IN COUNSELING: | 2 quarter hours (Graduate)
The content and format of this course are variable. This course includes an in-depth study of a specific topic in counseling. Subject matter will be indicated in the class schedule. (2 credit hours)
A grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 482 | SPECIAL TOPICS IN COUNSELING: | 4 quarter hours (Graduate)
The content and format of this course are variable. This course includes an in-depth study of a specific topic in counseling. Subject matter will be indicated in the class schedule.
A grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 483 | COUNSELING INTERVENTIONS AND TREATMENT PLANNING | 4 quarter hours (Graduate)
This course provides students with an introduction to empirically supported treatments for specific disorders occurring across the lifespan. Opportunities for hands-on practice with several treatments are required.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, CSL 452 and CSL 489 are prerequisites for this course.

CSL 484 | ISSUES IN CLINICAL MENTAL HEALTH COUNSELING | 4 quarter hours (Graduate)
This course provides students with a review of up-to-date information on the issues related to community and clinical mental health counseling including but not limited to outcome evaluation, prevention and wellness strategies, advocacy strategies, counselor roles, reimbursement, paperwork, and referral processes.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 485 | SEXUALITY COUNSELING | 4 quarter hours (Graduate)
This course provides students with an overview of human sexual development and the assessment and treatment of various sexual issues and disorders. Topics covered include common development of human sexuality, sexual concerns, sexual behavior, sexual orientation, gender identity, diagnostic and treatment techniques, treatment planning, and therapeutic interventions for individuals and couples.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 489 | PSYCHOPATHOLOGY | 4 quarter hours (Graduate)
This course provides students with an overview of normal and abnormal personality and behavior, and the DSM-5 and ICD classifications and descriptions of mental health disorders. Specific attention is given to diverse cultural perspectives in diagnosis and assessment.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 490 | FOUNDATIONS OF STUDENT AFFAIRS | 4 quarter hours (Graduate)
The course examines historical and philosophical elements relative to the role of student affairs in higher education as well as the impact of changing demographics on current trends pertinent to the management of student affairs. The course also provides students with theoretical and practical knowledge about organization structure, services, and faculty/staff/administrative functions in student affairs.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 491 | CONTEXTUAL DIMENSIONS OF COLLEGE STUDENT DEVELOPMENT | 4 quarter hours (Graduate)
This course examines the impact of institutional mission and state and national policies on access, retention and graduation rates. Organizational change, decision-making and conflict resolution strategies are explored within the context of strategic planning, organizational structure and leadership style and management. Personnel selection, management theories and performance evaluations are also studied. Various assessment practices are reviewed and analyzed. Within this framework, student demographics, campus culture and student development theory (traditional and contemporary) are examined.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 490 are prerequisites for this course.

CSL 492 | PROGRAM DEVELOPMENT IN STUDENT AFFAIRS | 4 quarter hours (Graduate)
This course explores models for designing, managing, and evaluating student affairs programs, including the use of technological applications. Students become familiar with models and methodologies of program development and implementation in higher education and understand how to use professional standards and other resources for program development.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 490 are prerequisites for this course.

CSL 500 | LEADERSHIP AND SOCIAL CHANGE | 4 quarter hours (Graduate)
This is an advanced course exploring how leadership theory interacts with organizational structures, advocacy, and social justice. The class is structured to expand from the individual to the group/organization/school level to the societal macro view of leadership. The topics of leadership development and leadership education in P-16 settings are included. Contemporary topics in leadership are addressed to coincide with social change and leadership. (Cross-listed with CSL 200).
Counseling (CSL)

CSL 501 | COUNSELING SKILLS | 4 quarter hours
(Graduate)
This course is designed to provide students with a comprehensive application and integration of the basic counseling skills used in the helping profession. Skills emphasized in the course include: active listening, attending, rapport building, empathy, paraphrasing, confrontation, reflection, and goal setting. These skills enable students to establish a helping relationship with a client, facilitate the client’s self-exploration and engagement in counseling, and encourage the client’s active progression towards achieving specified counseling goals. Students practice basic counseling skills and participate in in-vivo role-play through laboratory exercises in the Education and Counseling Center (ECC). The instructor gives feedback on skill development to students during face-to-face consultation and through the viewing of videotaped sessions.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 510 | MULTICULTURAL COUNSELING | 4 quarter hours
(Graduate)
This course is designed to provide students with a basic foundation in multicultural counseling with an emphasis on culturally proficient counseling practices. Students learn multicultural models and counseling interventions for working with culturally and linguistically diverse populations. Attention is given to issues such as worldview, acculturation, racial/ethnic identity, culture-centered interventions, and various dimensions of diversity. Role play is used throughout the course to provide students with a more in-depth application of culturally responsive services.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 511 | SUPERVISION | 1 quarter hours
(Graduate)
This course is an introduction to the theory and practice of supervision in the Counseling profession. There is a focus on developing the basic skills necessary for the effective supervision of counselors. (1 credit hour)
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 512 | CRISIS INTERVENTION | 2 quarter hours
(Graduate)
This course provides students with an understanding of the principles of crisis intervention and crisis management with a focus on the school setting. Working with individuals and groups in crisis is significantly different than other counseling situations, both in the characteristics of the clients and in the types of intervention strategies employed. This course provides the skills and knowledge needed to employ crisis intervention strategies in school settings. (2 credit hours)
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 513 | CONSULTATION FOR COUNSELORS | 1 quarter hours
(Graduate)
This course focuses on the theory, techniques, practice and skill development needed to effectively provide consultation in communities and schools. Emphasis is on the application of consultation, collaboration and the role of the consultant. (1 credit hour).
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 514 | CRISIS INTERVENTION FOR SCHOOL COUNSELING | 2 quarter hours
(Graduate)
This course provides students with an understanding of the principles of crisis intervention and crisis management with a focus on the school setting. Working with individuals and groups in crisis is significantly different than other counseling situations, both in the characteristics of the clients and in the types of intervention strategies employed. This course provides the skills and knowledge needed to employ crisis intervention strategies in school settings. (2 credit hours)
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 515 | CRISIS INTERVENTION AND TRAUMA COUNSELING | 4 quarter hours
(Graduate)
This course provides students with an understanding of the individual in crisis and the impact of trauma. Students develop the knowledge and skills needed to access and treat both the acute and long-term effects of trauma. Subjects such as disaster response, psychological first-aid, and evidence-based treatment models are examined and students explore perspectives on the causes and prevention of trauma as it applies to the individual, family, local, national, and international community. The role of power and oppression in the experience of trauma within family, socio-political, and ethno-cultural systems is also addressed.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 516 | SPECIAL EDUCATION: LEGAL AND PROFESSIONAL ISSUES FOR SCHOOL COUNSELORS | 2 quarter hours
(Graduate)
This course introduces students to special education law including relevant legislation, cases, and regulations. Students also learn about the development, monitoring, and implementation of IEPs. In addition, this course addresses the school counselor’s potential role in the evaluation, referral, monitoring, and consultation of students with special needs. (2 credit hours)
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 517 | COUNSELING CHILDREN AND ADOLESCENTS | 4 quarter hours
(Graduate)
This course considers the theoretical foundations of working with children and adolescents. It addresses developmentally appropriate counseling perspectives and interventions. Emphasis is on the child/adolescent in various systemic contexts, multicultural factors, specific child/adolescent problems, and the role of the school counselor in helping to prevent and remediate them.
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 456 and 501 are prerequisites for this course.
CSL 521 | CONTEXTUAL DIMENSIONS OF SCHOOL COUNSELING | 4 quarter hours  
(Graduate)  
This course addresses the role of the school counselor and provides an understanding of the coordination of counseling program components as they relate to the school and the wider community. Students explore the various roles of the school counselor as advocate, leader, consultant, collaborator and counselor. The developmental approach to school counseling programs and the Transformed School Counseling Initiative are introduced and integrated throughout the course. Students must take CSL 521 and CSL 522 consecutively.

CSL 451, CSL 452 (B- or better required) and Advanced Masters Education (Counseling) student or Counseling (Licensure) student are prerequisites for this course. Students must pass the TAP test prior to enrolling in CSL 521.

CSL 522 | DELIVERY OF COMPREHENSIVE DEVELOPMENTAL SCHOOL COUNSELING PROGRAMS | 4 quarter hours  
(Graduate)  
This course focuses on the comprehensive development, delivery, and evaluation of school counseling programs based on the Illinois state model and the American School Counselor Association national model. Students learn strategies to develop school counseling programs that align with school wide goals, to promote the value of counseling activities and programs, to plan for and present school counseling core curricula, and to use data to effect systemic change. Students must take CSL 521 and CSL 522 consecutively.

CSL 521 (B- or better required), and status as an Advanced Masters Education (Counseling) student or Counseling (Licensure) student are prerequisites for this course.

CSL 523 | LEARNING AND CLASSROOM MANAGEMENT FOR SCHOOL COUNSELORS | 4 quarter hours  
(Graduate)  
This course explores current learning frameworks in education and education reform movements that impact learning and classroom management. The history of foundational learning approaches is also covered particularly those from the 19th and 20th centuries. Classroom management models and theories of inner discipline and consistency management are discussed so that the school counselor can assist educators and parents in home-school management of youth. Students develop original lesson plans, and observe and interview current educators as a part of this course.  
Advanced Masters Education (Counseling) or Counseling (Licensure) student and a grade of B- or better in CSL 451, 452, 467, 501, and 510 are prerequisites for this course.

CSL 552 | PRACTICUM IN COUNSELING | 4 quarter hours  
(Graduate)  
The practicum course is the initial professional practice experience for the CSL student. The student begins to see himself or herself as a counselor-in-training in an actual counseling setting and will develop and continue to work on mastery of counseling skills in a clinical setting. The practicum requires a minimum of 100 clock hours during the quarter.  
Grade of B- or better in CSL 451, CSL 452, CSL 458, CSL 467, CSL 501, and CSL 510 or CSL 492 or CSL 511 or (CSL 475 and CSL 522) and status as an Advanced Masters Education (Counseling) student are prerequisites for this course.

CSL 553 | INTERNSHIP IN COUNSELING I | 4 quarter hours  
(Graduate)  
After the completion of required courses and consultation with one’s advisor, the student-intern is approved to be in a professional practice site such as a school, community agency, college or university. The student-intern functions under the joint supervision of a professionally qualified site supervisor and a university faculty supervisor. Internship I requires a minimum of 300 clock hours on site each quarter with a minimum of 120 clock hours in direct service work. A structured contract requires specific experiences and expectations of the student, site, and University, and is signed by all parties. Ongoing reflective seminars are a part of the internship experience and are related to concentration specific topics and the skill and process development of students.  
Admission to the Counseling Masters Program and a grade of B or better in CSL 552 are prerequisites for this course.

CSL 554 | INTERNSHIP IN COUNSELING II | 4 quarter hours  
(Graduate)  
This course is a continuation of Internship I. The student-intern continues with a minimum of 300 clock hours under supervision of the site supervisor and university faculty supervisor using a structured contract.  
Note: School Counseling students must have also met the 181 testing requirement for this course.  
Admission to the Counseling Masters Program and a grade of B or better in CSL 553 are prerequisites for this course. (School Counseling students must have also met the 181 testing requirement as a prerequisite for this course.)

CSL 555 | INTERNSHIP IN COUNSELING III | 0 quarter hours  
(Graduate)  
This course is a continuation of Internship II. The student-intern continues with a minimum of 200 clock hours under supervision of the setting supervisor and University faculty supervisor using a structured contract.  
Admission to the Counseling Masters Program and a grade of B or better in CSL 554 are prerequisites for this course.

CSL 556 | COUPLES AND FAMILY COUNSELING | 4 quarter hours  
(Graduate)  
This course focuses on providing theoretical formulations and practical illustrations applicable to the practice of marriage and family counseling. Students engage in role-playing, case study, and observation of counseling techniques. Skills expected in this course include understanding the process of marriage and family counseling and the role of the counselor in the marriage and family setting. Students will learn to develop effective marriage and family strategies, and to conduct complete case analysis.  
Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 557 | INDEPENDENT STUDY IN COUNSELING | 1-4 quarter hours  
(Graduate)  
Admission to the Counseling Masters Program and the permission of instructor, department chair and associate dean are required for this course.  
Admission to the Counseling Masters Program is a prerequisite for this course.

CSL 559 | THESIS RESEARCH IN COUNSELING | 0 quarter hours  
(Graduate)  
A student writing a thesis registers for this non-credit course. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.  
SCG 410, thesis, advanced Mast
Criminology (CRIM)

CRIM 101 | INTRODUCTION TO THE CRIMINAL LEGAL SYSTEM | 4 quarter hours
(Undergraduate)
The course examines the relationship between crime and the criminal legal system in American society. Specifically, the course will introduce students to the origins and purposes of the criminal law, explaining why rules are broken and who breaks them, and exposing students to the those agencies that comprise the criminal legal justice (police, courts, corrections).

CRIM 105 | CRIME AND THE MEDIA | 4 quarter hours
(Undergraduate)
The objective of this course is to examine the influence of mass media on crime and society. Specifically, the course explores how mass media shapes the public’s understanding of criminality, social responses to criminality, and the criminal justice system. Through an analysis of television, film, newspaper, and electronic/internet media channels, the course explores how the media represents, distorts, and/or filters crime and criminal justice issues. Students will be able to be able to identify the common links between media representations and criminal justice actors, issues, and policies; in addition to becoming critical consumers of media related depictions of criminality.

CRIM 107 | CRIMINOLOGY GOES TO THE MOVIES | 4 quarter hours
(Undergraduate)
This course explores popular representations of crime in films. Crime films communicate social concerns, moderate public debates, and serve as the primary point of access to criminal justice agencies and populations. This course will examine how crime films influence notions of criminality, victimization, and appropriate social responses. Students will discover the significance of crime films in shaping and distorting public perceptions of crime and punishment in society. The course will contextualize crime films within existing and emerging issues in Criminology, including policing, courts, penology, criminal injustice, wrongful convictions, organized crime, gangs, drugs, communities, forensic science and serial killers.

CRIM 201 | LAW ENFORCEMENT | 4 quarter hours
(Undergraduate)
The course examines the social and historical origins of police systems in America. Specifically, the course will introduce students to the role of policing in society, explaining how police organizations operate and respond to occupational challenges.

CRIM 202 | CRIMINAL LAW AND PROCEDURE | 4 quarter hours
(Undergraduate)
The course examines the historical and philosophical development of procedural law in America. The course will introduce students to the definition, constitutionality, and application of criminal law. The course will consider interrelationships between law, custom, morality, and social change.

CRIM 203 | CORRECTIONS | 4 quarter hours
(Undergraduate)
The course examines the history, philosophy, and practice of corrections in America. The course will introduce students to the origins and purposes of corrections, explaining how U.S. culture defines punishment, incarceration, and social control. The course will expose students to the individual agencies and prison administrators that comprise the American system of corrections.

CRIM 205 | RACE, CLASS, GENDER AND THE CRIMINAL LEGAL SYSTEM | 4 quarter hours
(Undergraduate)
The objective of this course is to examine the fundamental principles and procedures employed in criminal investigations. The course will introduce students to investigative theory, collection and preservation of evidence, interviews and interrogations, behavioral analysis and criminalistics. The course will consider procedural law and the constitutional limits to criminal investigations. Specific topics include drug laws, juvenile justice, victims, white-collar crime, ethical behavior, and criminal justice policies.

CRIM 206 | CRIMINAL INVESTIGATIONS | 4 quarter hours
(Undergraduate)
The objective of this course is to examine the fundamental concepts of law enforcement administration and management that underlie decision-making, policy formulation, operational strategies, and procedural limitations. The course will introduce students to organizational patterns, administrative processes, and management theories in regards to law enforcement. The course will consider internal and external factors affecting the role of police administrators in relation to organizational communications and community relations. Special topics include leadership, political climate, unionization, recruitment and retention of qualified law enforcement personnel, training policies, and management issues.

CRIM 207 | LAW ENFORCEMENT MANAGEMENT | 4 quarter hours
(Undergraduate)
The objective of this course is to examine the relationship between Race, Class, Gender, and the criminal legal system. Throughout the course, we will examine the multiple and intersecting ways these concepts shape the criminal process. Specifically, how do these socially constructed axioms influence a variety of institutional contexts such as law enforcement, courts, and corrections? The goal is to provide students with knowledge and understanding of the criminal legal system from the position of under-represented groups in America.

CRIM 208 | LATINOS AND THE CRIMINAL JUSTICE SYSTEM | 4 quarter hours
(Undergraduate)
The objective of this course is to examine the relationship between Latinos/as and the criminal legal system. Throughout the course, we will ask (1) what distinguishes Latinos/as from other racial and ethnic groups (2) and what Criminological theories can help us understand the causes of these differences and inequalities. The course will examine key variables such as historical context, ethnic and race relations, and current criminal justice policy regarding Latinos/as in the United States. Cross-listed with LST 209.
CRIM 209 | CRIME AND PUNISHMENT | 4 quarter hours
(Undergraduate)
This course examines the nature of crime and the justification of punishment. Through historical and contemporary readings, basic issues such as what crime and punishment actually are, how punishment has been and continues to be justified, and the various forms that penal practices have taken will be explored. The course will also examine the question of social justice as it relates to punishment and the vexed problem of whether any forms of crime can ever be morally justified.

CRIM 215 | GANGS IN SOCIETY | 4 quarter hours
(Undergraduate)
The objective of this course is to provide a historical and organizational examination of gangs in society. The course will address the nature and definition of gangs, gang typologies and theoretical explanations of gang behavior. The course pays particular attention to social, cultural, political, and economic causes of gangs. In addition, students will analyze law enforcement responses, intervention and prevention strategies, and public policy issues. In short, students will develop a greater understanding of the social forces that contribute to the creation of gangs and assess societal responses to reduce deviant behavior.

CRIM 218 | COMMUNITIES AND CRIME | 4 quarter hours
(Undergraduate)
The objective of this course is to examine the connection between crime and various aspects of community context. Specifically, the course will explore how conditions and processes both within the community and in the broader society impact crime. The course will pay particular attention to factors that influence community-level crime rates and the effects on individual behavior. Students will assess Criminological explanations regarding the causes of crime, the consequences for neighborhoods, and how policing and imprisonment influence crime, violence, and the people who reside in such communities. Special topics of interest include social disorganization, collective efficacy, industrial and post-industrial urbanization, population instability, family structure, the concentration of poverty, economic processes, and social transformations.

CRIM 225 | COMMUNITY NON-VIOLENCE | 4 quarter hours
(Undergraduate)
The objective of this course is to examine non-violence efforts to reduce crime in violent communities. Specifically, the course will introduce students to the history, theory, and practice of non-violence with an emphasis on crime prevention and social change. The course will highlight factors that influence community-level violence, the effects that community characteristics have on individual violence, and attempts to resolve violence through non-violent means.

CRIM 228 | CRIME PREVENTION | 4 quarter hours
(Undergraduate)
This course provides an introduction to the science and practice of crime prevention. Specifically, the course examines the history, theories, and philosophies that inform crime prevention strategies. The course pays particular attention to the role of community capacity building in preventing crime and explores alternatives to incarceration. Students develop informed decision making skills by linking crime to individual and societal factors, collaborating with community and criminal justice agencies, and assessing the social costs associated with current criminal justice policies regarding punishment.

CRIM 235 | JUVENILE JUSTICE | 4 quarter hours
(Undergraduate)
This course provides a historical and philosophical examination of juvenile justice in American society. Specifically, the course explores the nature and extent, causes and correlates, and treatment and prevention of juvenile delinquency. The course reviews current policies and practices influencing juvenile justice as well as societal definitions and reactions to juvenile delinquency. Special topics include: the role of family and peer groups, substance abuse and mental health, school violence, status offenses, jurisdiction and function of juvenile agencies, disproportionate minority confinement and prevention and treatment programs.

CRIM 240 | CRIMES OF THE STATE | 4 quarter hours
(Undergraduate)
While the state has traditionally been the author, guardian and executor of criminal law within its own borders, there are numerous instances when the state violates its own standards of criminal law. This course explores major global cases of state-sponsored criminal activities including cases of torture, war crimes, terrorism, and genocide. Students study the ways that the state implicates itself in crimes concerning the obstruction of justice, misinformation, cover-ups, unaccountability and fraud. To this end, the course explores the measures used to determine whether a state’s activity is criminal and compare them against behaviors and operating standards by which the estate attempts to fulfill its own civic goals.

CRIM 245 | HATE/BIAS CRIMES | 4 quarter hours
(Undergraduate)
This course provides an introductory understanding of the definitions of hate/bias crime; examines the causes and consequences of hate/bias crimes, explores hate/bias crime as it relates to policy and legislation; and scrutinizes the reporting, investigation, and prosecution of hate/bias crimes in the United States.

CRIM 257 | SCHOOL VIOLENCE, DISCIPLINE AND JUSTICE | 4 quarter hours
(Undergraduate)
The objective of this course is to examine crime and punishment in America’s educational system. Specifically, the course will introduce students to the nature, extent and proposed remedies to school violence. The course will pay particular attention to the policy and practice of school discipline grounded in the philosophy of law and order and the criminalization of young people. Within the context of educational justice, students will explore equitable access to quality instruction, school resources and alternatives to punishment. Finally, a number of special topics such as bullying, sexual harassment, dating violence, school shootings, the school to prison pipeline, zero tolerance, school resource officers, corporal punishment, and restorative justice will all be addressed in relation to the larger macro concerns of the American ethos of education and the primary institution of upward mobility in American society.

CRIM 264 | FORENSIC SCIENCE | 4 quarter hours
(Undergraduate)
This course introduces the field of forensic science and its application to the criminal legal system. Specifically, the course explores the theory and practice of forensic science used in the collection, examination, preservation, evaluation and interpretation of evidence. Students will understand the basic considerations, guidelines, and procedures that comply with both legal and scientific regulations regarding the use of physical evidence. Special topics include crime scene techniques, nature of evidence, physical and chemical analyses, toxicology, DNA, botany, entomology, courtroom activities and new trends in forensic science.
CRIM 265 | DOMESTIC AND INTERNATIONAL TERRORISM | 4 quarter hours
(Undergraduate)
This course is designed to introduce students to the topic of terrorism, both domestically and internationally. The course will critically examine how terrorism is defined, what is known about the causes of terrorism, the strategies and tactics of terrorist groups, and the efficacy of current prevention and intervention efforts.

CRIM 275 | CYBERCRIME AND CYBERTERRORISM | 4 quarter hours
(Undergraduate)
This course introduces students to cybercrime, cyberterrorism, and information warfare along with the law enforcement response to these issues. Topics addressed in this course include descriptions of the types of crimes and terrorist acts committed using computer technology; theories addressing digital criminals; and an overview of the laws which govern cybercrime investigation and prosecution. Students will examine current events and high profile cyberattacks ranging from facilitation of terrorist attacks, hackers, identify theft and fraud, cyber criminal organizations, sex crimes, digital hate, espionage, and nation-state attacks.

CRIM 290 | SPECIAL TOPICS | 4 quarter hours
(Undergraduate)
In-depth examination of selected and timely social issues. Topics vary from quarter to quarter. Topics may be initiated by students.

CRIM 301 | RESEARCH METHODS IN CRIMINOLOGY | 4 quarter hours
(Undergraduate)
The course examines the fundamental principles of social science research. Specifically, the course provides students with the necessary skills to design, conduct, interpret, and evaluate criminal justice data.

CRIM 302 | STATISTICS IN CRIMINOLOGY | 4 quarter hours
(Undergraduate)
The course introduces students to the basic principles and techniques of statistical analysis. Specifically, the course utilizes quantitative research methods to collect, analyze, and evaluate criminal offending patterns and criminal justice responses to crime.

(MAT 095 & MAT 100) or MAT 101 or placement and CRIM 101 are prerequisites for this class.

CRIM 303 | CRIMINOLOGICAL THEORY | 4 quarter hours
(Undergraduate)
The course examines the theoretical perspectives related to the causes of crime and delinquency. Specifically, the course considers the impact and application of criminological theories of crime to the practice of criminal justice. Students will be required to analyze the assumptions of each theoretical perspective and demonstrate how these assumptions shape our knowledge of criminal behavior.

CRIM 101 is a prerequisite for this class.

CRIM 305 | VICTIMOLOGY | 4 quarter hours
(Undergraduate)
The course will review victimology as an evolving discipline. It will examine the elements of this field, including the development of the discipline, theories of victimization, the use of victimization surveys, specific types of victimization, the economic and other costs of crime to victims, services and programs for victims, and the implications of the victim-offender system on the criminal justice process.

CRIM 101 is a prerequisite for this class.

CRIM 306 | ETHICS IN CRIMINOLOGY | 4 quarter hours
(Undergraduate)
The course will provide students with an understanding of the ethical dilemmas faced by criminal justice practitioners across the criminal legal system. Specifically, the course will discuss the history and philosophy of justice, fundamentals and history of ethics, professional codes of conduct, as well as discuss ethical decision-making processes at both the individual and organizational levels.

CRIM 309 | FEDERAL LAW ENFORCEMENT AGENCIES | 4 quarter hours
(Undergraduate)
This course will explore the role of federal law enforcement in regards to sharing responsibilities for intelligence collection, national security matters, and expansive criminal investigations. Specific topics will include the interaction between agencies, conflicts between local and federal law enforcement, international responsibilities, and the impact of public perceptions.

CRIM 312 | 21ST CENTURY POLICING | 4 quarter hours
(Undergraduate)
The purpose of this course is to examine police reform efforts in society. Specifically, the course explores how to law enforcement agencies can build legitimacy in the eyes of its constituents and balance considerations of procedural justice with due process. The course considers the ethical, moral, and accountability dilemmas that face law enforcement practitioners in preventing and controlling crime. Students will be exposed the audit and oversight functions in law enforcement. Special topics include: proactive policing, police use of force, racial profiling, police and community partnerships, restorative justice practices, the changing nature of police work, police discretion and misconduct and different types of policing strategies.

CRIM 320 | WRONGFUL CONVICTIONS | 4 quarter hours
(Undergraduate)
Several elements make innocent people vulnerable to being wrongfully convicted, including faulty or junk science; eyewitness misidentification; false confessions; misconduct by government officials; use of snitches; and poor defense. Using a case study approach, this course explores how innocent people can wind up on death row, incarcerated, or convicted, with a particular emphasis on how race and poverty increase the risk of innocent people being convicted. The class will include accounts of exonerated persons, readings critical of criminal justice system, and videos that highlight key cases and issues.

CRIM 325 | US POLITICAL PRISONERS AND CRIMES OF CONSCIENCE | 4 quarter hours
(Undergraduate)
Although the United States government claims not to hold political prisoners, there are hundreds of individuals in US detention charged with political crimes or crimes of conscience. This course identifies the various types of political prisoners, the history and philosophy of counterintelligence measures, and the accommodations made by the judicial system to enforce social, political and economic codes of behavior on dissenters. In this course, students question the traditional definitions of crime. Specifically, students explore the ways that people purposely break the law to address larger issue of injustice, for example through acts of civil disobedience, and the ways that political resistance is criminalized as in charges of seditious conspiracy.
CRIM 328 | MOBILITY & THE STATE | 4 quarter hours
(Undergraduate)
In this course we explore the history, culture, and politics of migration along with an examination of the expanding culture of the United States. We analyze the varied mythology of the border as a danger zone, an intermediary zone, and a place of contact and conflict. We also look to the theorizations of the border as a site of cultural exchanges, resistance and critical negotiation; interchanges that impact the construction of race, ethnicity, sexuality and gender from both sides of the border. We examine issues relating to U.S. policies of immigration and labor movements as well as the economic and political consequences of globalization along the border region. Finally, we examine how the U.S. border has shifted and changed over time, critically challenging issues of political, cultural, and legal belonging.

CRIM 337 | DRUGS AND SOCIETY | 4 quarter hours
(Undergraduate)
This course provides a historical, social, and political examination of drugs in American society. Specifically, the courses explores the causes and consequences of drug use, the impact of the medicalization of human behavior, legislation and enforcement of drug policies and prevention and treatment efforts. The course will pay particular attention to the criminalization of certain substances and groups as a result of the War on Drugs. Students will study the intersection of research, policy and practice to developed evidence based approaches in health promotion and disease prevention relative to treatment and prevention of addiction. The course will conclude with an investigation of alternative drug policies in American society. Special topics of interest include: drug identification, subcultures, drugs and the media, systemic shame, cultural stigma, class and race conflict, drug violence, drug industries, decriminalization, legalization, harm reduction and drug courts.

CRIM 345 | WHITE COLLAR AND CORPORATE CRIME | 4 quarter hours
(Undergraduate)
The objective of this course is to examine white collar crime in a transnational context. Specifically, the course exposes students to the economic, political and social consequences of white collar crime in a global age. Students investigate the cause and extent of white collar crime with particular attention to the differences and similarities to other criminal activity. The study of white collar crime challenges traditional assumptions of criminality. Therefore, the course explores alternative methodologies to research, investigate, prosecute, and sanction white collar crime in society. Special topics of interest include: embezzlement, mail and wire fraud, money laundering, computer crime, identity theft, tax crimes, securities fraud, conspiracy, RICO, antitrust and environmental laws, obstruction of justice and bribery and corruption.

CRIM 390 | SPECIAL TOPICS | 4 quarter hours
(Undergraduate)
In-depth examination of selected and timely social issues. Topics vary from quarter to quarter. Topics may be initiated by students.

CRIM 395 | CAPSTONE IN CRIMINOLOGY | 4 quarter hours
(Undergraduate)
Capstone in Criminology.

CRIM 398 | INTERNSHIP | 4 quarter hours
(Undergraduate)
The purpose of the internship is to complement a student’s educational understanding with real world experience. Specifically, internships require students to apply Criminology related theories and paradigms to professional settings. Throughout the internship experience, students learn about the criminal legal system through techniques of observation and reflective analysis. An internship opportunity allows students to compare different career fields and develop a better understanding of their personal skills and interests. In addition, internships provide students with professional references and networking contacts. Finally, an internship develops skills, knowledge, and approaches that will distinguish them within a pool of applicants.

CRIM 399 | INDEPENDENT STUDY | 4 quarter hours
(Undergraduate)
With the approval and under the guidance of an assigned faculty member, students in this course conduct research on Criminology related topics.

CRIM 409 | FEDERAL LAW ENFORCEMENT AGENCIES | 4 quarter hours
(Graduate)
This course will explore the role of federal law enforcement in regards to sharing responsibilities for intelligence collection, national security matters, and expansive criminal investigations. Specific topics will include the interaction between agencies, conflicts between local and federal law enforcement, international responsibilities, and the impact of public perceptions.

CRIM 425 | US POLITICAL PRISONERS AND CRIMES OF CONSCIENCE | 4 quarter hours
(Graduate)
Although the United States government claims not to hold political prisoners, there are hundreds of individuals in US detention charged with political crimes or crimes of conscience. This course identifies the various types of political prisoners, the history and philosophy of counterintelligence measures, and the accommodations made by the judicial system to enforce social, political and economic codes of behavior on dissenters. In this course, students question the traditional definitions of crime. Specifically, students explore the ways that people purposely break the law to address larger issue of injustice, for example through acts of civil disobedience, and the ways that political resistance is criminalized as in charges of seditious conspiracy.

Critical Ethnic Studies (CES)

CES 400 | CRITICAL SOCIAL THEORY | 4 quarter hours
(Graduate)
Social movements are collective efforts that spring up from within communities that are not connected to organizations or power entities. At times a leader springs forth from the movement as it gather steam, but in other cases the movement continues to have a collective leadership, and in diverse regions. Examples in the US, the abolitionist movement, the women’s suffrage movement, the civil rights movement, anti-war movements, the feminist and gay rights movements, the environmental movement, social justice and immigrant rights movements, the Tea Party movement, and the “occupy” and “we are the 99%” movement. Globally, such movements take on longstanding hegemonic systems, such as the “Arab spring” of 2011, and the movement by indigenous people in Bolivia that eventually brought Evo Morales to the presidency, for the first time since European arrival in the continent. In the US, movements tend to pursue social justice causes, rather than removing hegemonic power. Cross-listed with INT 401.
CES 401 | CRITICAL ETHNIC STUDIES | 4 quarter hours  
(Graduate)
This core seminar will serve as an introduction to key issues and methods in the comparative study of ethnicity and race. The course highlights an interdisciplinary approach to the study of systemic oppression in the United States, and the global implication of these structures. We will consider how critical ethnic studies presents a progressive intellectual challenge to global and local configurations of power in the name of global justice. Among our methods will be an intersectional theoretical analysis of the identities of race, gender, class, nation, sexuality, ability and religion. Readings will cover theories of intersectionality, decolonial indigeneities, mestiza feminism and other critical mixed race theories, queer critical theory, settler racism and state violence, as well as creative and political movements of resistance and social change.

CES 402 | MOBILITY AND THE STATE | 4 quarter hours  
(Graduate)
In this course we explore the history, culture, and politics of migration along with an examination of the expanding borders of the United States. We analyze the varied mythology of the border as a danger zone, an intermediary zone, and a place of contact and conflict. We also look to the theorizations of the border as a site of cultural exchanges, resistance and critical negotiation; interchanges that impact the construction of race, ethnicity, sexuality and gender from both sides of the border. We examine issues relating to U.S. policies of immigration and labor movements as well as the economic and political consequences of globalization along the border region. Finally, we examine how the U.S. border has shifted and changed over time, critically challenging issues of political, cultural, and legal belonging.

CES 403 | CITIES AND RACIAL FORMATION | 4 quarter hours  
(Graduate)
The goal of this course is to critically examine urban redevelopment policies and policy strategies that have profoundly shaped Latinx and African-American populations in the United States. Topics to be discussed include: race and racial formation, class and ethnicity, urban neoliberal policies, gentrification, contestation, and public school policy. Class lectures, discussions, speakers, and assignments are geared toward helping students develop a critical understanding of the primary urban redevelopment issues related to the experiences of African-American, Central American, and Mexican American communities in Chicago or other city/cities.

CES 404 | BORDERS AND MIGRATION | 4 quarter hours  
(Graduate)
This course examines the integral role that different processes of mobility play in shaping today’s world: migration, immigration, displacement, refugee and internally displaced persons flows. Students study the causes and effects of population movements including push-pull factors, demographic, economic, and political variables. Students also look at the role of state and non-state actors and organizations. Cross-listed with INT 404 “Migration and Forced Migration.”

CES 405 | RACE AND THE MEDIA | 4 quarter hours  
(Graduate)
Using an intersectional and interdisciplinary approach, this seminar course explores the landscape of popular media and visual culture in the U.S. along the axes of race, ethnicity, class, gender, and sexuality and cultural “difference.” Cross-listed with CMNS 563.

CES 410 | SPECIAL TOPICS IN CRITICAL ETHNIC STUDIES | 4 quarter hours  
(Graduate)
Open elective for Critical Ethnic Studies. Topics vary. See schedule for current offerings.

CES 412 | FINAL PROJECT INDEPENDENT RESEARCH | 4-8 quarter hours  
(Graduate)
This course involves individual investigation and research (toward completion of the Master’s thesis, project, internship, or portfolio) under the supervision of a faculty member. A minimum of 4 credit hours required. Course can be repeated for a total of 8 credit hours.

CES 413 | CANDIDACY CONTINUATION | 0 quarter hours  
(Graduate)
This 0-credit hour course is available to master’s degree candidates who are actively working toward the completion of a thesis, project, or portfolio. Enrollment in this course is limited to three quarters and requires thesis/project advisor and graduate director approval and demonstration to them of work each quarter. Enrollment in this course allows access to the library and other campus facilities. This course carries and requires the equivalent of half-time enrollment status. The student may be eligible for loan deferment and student loans. This course is graded as pass/fail. (0 credit hours)

CES 414 | CANDIDACY MAINTENANCE | 0 quarter hours  
(Graduate)
This 0-credit hour course is available to graduate students who are not registered for a course in a given quarter but need to maintain active university status. Enrollment in this course is limited to three quarters and requires permission of the graduate director. Enrollment in this course allows access to the library and other campus facilities. This course does not carry an equivalent enrollment status and students in it are not eligible for loan deferment or student loans. This course is not graded. (0 credit hours)

CES 495 | INTERNSHIP | 4 quarter hours  
(Graduate)
Internship by arrangement. Written permission of supervising faculty member and of the program director is necessary before registration. Variable service learning content. May include direct service, project-based service, community-based research, or advocacy. Status as a Critical Ethnic Studies student is a prerequisite for this class.

CES 499 | INDEPENDENT STUDY | 4 quarter hours  
(Graduate)
Individually supervised learning experience, usually involving extensive research and writing.

Curriculum Studies (CS)

CS 447 | CURRICULUM DESIGN FOR THE MIDDLE GRADES | 4 quarter hours  
(Graduate)
This course is designed to provide students with a comprehensive understanding of the history of and rationale for middle level education as well as the curricular and pedagogical knowledge needed to meaningfully engage middle level students in learning within and across the content areas. Important considerations and strategies for disciplinary and interdisciplinary learning in the middle school classroom, as well as the importance of reading and writing across the curriculum with regard to these, will be addressed.
CS 460 | LEARNING IN A TECHNOLOGY-SUPPORTED CLASSROOM | 4 quarter hours
(Graduate)
An examination of current theories about instructional technology and of recent literature in the field. Students will become familiar with particular technology appropriate for their areas of interest and will learn to evaluate this technology for a variety of instructional purposes. The course includes: frameworks for classifying educational uses of the technology; an analysis of selected research on educational technology; theories and practices of using technology in classrooms; and the advantages and disadvantages of distance learning. Emphasis throughout will be on why and how technology can be used to enhance the learning process.

CS 461 | LITERACY PROCESSES AND PRACTICES | 4 quarter hours
(Graduate)
Foundational theoretical perspectives and practices for teaching and learning language and literacy in a diverse, changing, and political world. Background of knowledge in the area of learning and exposure to the controversies that surround the teaching of literacy will be used to develop an understanding of literacy learning in action. Students will be invited to participate in the current conversations around literacy learning and teaching in order to inform their everyday curricular decisions.

CS 463 | ASSESSMENT, DIAGNOSIS, DEVELOPMENTAL/REMEDIAL MATERIALS & RESOURCES: EMERGENT & DEVELOPING READING | 4 quarter hours
(Graduate)
Assessment, diagnosis and instructional planning for early and emergent learners. Building on a knowledge base of emergent reading processes and literacy practices, teachers will explore the ways in which young learners construct meaning and use language purposefully in their unique social worlds, even before beginning school. Participants in this course will learn to use performance based assessments as well as more formal standardized measures of achievement to support emerging and struggling readers with appropriate materials and theoretically sound instructional practices.

CS 461 is a prerequisite for this class.

CS 464 | ASSESSMENT, DIAGNOSIS, DEVELOPMENTAL/REMEDIAL MATERIALS & RESOURCES: MIDDLE SCHOOL/ADOLESCENT READING | 4 quarter hours
(Graduate)
Assessment, diagnosis and instructional planning for middle school students. Building on a knowledge base of reading processes and literacy practices, teachers will explore the ways in which students construct meaning and use language purposefully in their unique social worlds. Participants in this course will learn to use performance based assessments as well as more formal standardized measures of achievement to support middle school and adolescent readers with appropriate materials and theoretically sound instructional practices.

CS 461 is a prerequisite for this class.

CS 465 | TEACHING READING IN THE CONTENT AREAS | 4 quarter hours
(Graduate)
This course focuses on teaching reading in various subject (content) areas and emphasizes non-fiction reading process, strategies, and theories for grades K-9. The course will examine what it means to be literate in the elementary content areas (e.g. science, math, social studies, arts). Emphasis will be placed on learning effective literacy strategies for different subject areas. There will also be a focus on how one uses reading and writing to think, act, speak, question, and apply the tools of each content/subject area in ways that are unique to that discipline. Additionally, as teachers it is important to remember that students will bring various literacies from their homes and communities. An important emphasis will be on creating learning environments that honor student diversity, and learning about multiple ways of knowing, acting, and communicating.

CS 461 is a prerequisite for this class.

CS 470 | TEACHERS AS LEADERS | 4 quarter hours
(Graduate)
Assists teachers in becoming leaders for positive change in schools and districts. Provides overview of major theoretical models in research on teaching and teacher leadership, historical perspectives on the teaching profession, and overview of select best practice in teacher collaboration, mentoring and coaching. Specific topics addressed may include: developing leadership among existing teaching staff; fostering professional collaboration; improving instruction school-wide; organizing colleagues, administrators, parents and students to improve achievement; fostering sustainability in teaching/fighting teacher attrition; teaching standards; team teaching; and curriculum mapping.

CS 471 | DIVERSITY IN THE CLASSROOM | 4 quarter hours
(Graduate)
Examines issues related to diversity that result when students from diverse socioeconomic, cultural, linguistic, and academic backgrounds are in the same classroom. Explores the impact of inclusion, ESL, bilingual, and bicultural programs on instruction. Emphasis on developing strategies to meet individual student needs within the regular classroom.

CS 472 | ETHICS, CURRICULUM AND SOCIAL CHANGE | 4 quarter hours
(Graduate)
Explores some major issues impacting curriculum, including cultural and socioeconomic factors, legal issues, conflicting values, pressures for assessment, and the push to include technology. Examines the historical development and current state of education in the U.S. as compared to education in other cultures. Emphasis on ways that educators can work as change agents within the competing demands of these forces.

CS 473 | ASSESSMENT | 4 quarter hours
(Graduate)
Explores current theory and practice regarding alternate forms of assessment, including formal, standardized, and informal tests and inventories; selection, evaluation, and interpretation of tests used in educational settings; portfolio assessment, video performances, and presentations; preparation and use of teacher-made tests; evaluating outcomes; and utilizing data to improve instruction. The critical examination of multiple perspectives of assessment theories, policies and practices center around the emphasis on developing strategies to evaluate student progress.
CS 481 | THE STUDY OF TEACHERS AND TEACHING | 4 quarter hours (Graduate)  
A selective survey and analysis of research on teachers and teaching. Particular emphasis will be placed on the assumptions which are built into various forms of research and the effect these assumptions have on how results should be interpreted and used in supervision and curriculum development. Each student will be expected to become familiar with alternative ways of studying teachers and the teaching process in his/her area of expertise. While many school settings will be utilized because of the many studies done in this area, research in non-school settings will be given a good deal of emphasis.

CS 482 | THE HISTORY OF CURRICULUM PRACTICE | 4 quarter hours (Graduate)  
A survey of trends and movements in curriculum practice. Particular emphasis will be placed on the recurrent nature of curriculum practices and the reasons for this. The class will consider underlying models of curriculum practice in their historical settings as possible methods for meeting contemporary social needs as well as the assets and liabilities of these models.

CS 484 | MULTIMEDIA MATERIALS PRODUCTION | 4 quarter hours (Graduate)  
This course will analyze the role of multimedia materials in instruction. A variety of media will be explored (including software, internet, audio, video, and film). Students will be expected to manipulate a variety of images and produce sample materials for critique and analysis. The primary focus will be on enhancing learning in elementary and secondary schools.

CS 485 | CURRICULUM/PROGRAM EVALUATION | 4 quarter hours (Graduate)  
Evaluation is essential for curriculum/program development and implementation. Hence, understanding evaluation methods, technologies, and quality criteria is particularly relevant to educational leaders, curriculum/program designers, and technology specialists. In this course, students will critically examine a variety of current evaluation models, instruments, and resources. Students will also conduct a comprehensive analysis of a significant evaluation study relevant to their specific professional interest. Registration is restricted to students in Advanced Master's programs.

Status as an Advanced Masters Education student is a prerequisite for this class.

CS 487 | INTRODUCTION TO CURRICULUM DELIBERATION | 4 quarter hours (Graduate)  
An introduction to systematic and collaborative deliberation on curriculum problems. A pattern for deliberation (including situation analysis, problem discrimination and formulation, development of alternative courses of action, and anticipation of consequences) will be developed and exemplified. This pattern will be contrasted with other descriptions of curriculum planning. Each student will complete a project which describes his/her systematic formulation of a curriculum problem and a plan of action for resolving it.

Status as an Advanced Masters Education student is a prerequisite for this class.

CS 488 | CURRICULUM DESIGN | 4 quarter hours (Graduate)  
Provides a project-based opportunity to develop curriculum that promotes student understanding, student voice, and student involvement in school or community change. Encourages educators to think carefully about what does and should constitute the curriculum and why, who and what is served and who/what is marginalized by current curriculum arrangements, and how collaboration in curriculum design can assist in organizing classrooms, schools, and communities.

CS 489 | CREATIVITY AND CRITICAL THINKING - VYGOTSKY, BAKHTIN, MAKIGUCHI, IKEDA | 4 quarter hours (Graduate)  
Introduces students to the educational philosophies of Russian thinkers Lev Vygotsky (1896 - 1934) and Mikhail Bakhtin (1895 - 1975) and Japanese thinkers Tsunesaburo Makiguchi (1871 - 1944) and Daisaku Ikeda (1928 - ). Students will locate confluences in these thinkers' philosophies and apply them to current curriculum or curriculum theorizing in their chosen discipline(s) (e.g., mathematics, social studies, language education, etc.), context(s) (e.g., policy, gender, socioeconomics, identity, etc.) and K-12/adult level(s). Topics covered include, among others, cultural-historical theory, socially constructed meaning making, zone of proximal development, dialogism, carnival, value and value-creating pedagogy, humanitarian competition, and human revolution.

CS 492 | CREATING AND SUSTAINING PROFESSIONAL LEARNING COMMUNITIES | 4 quarter hours (Graduate)  
This course will provide the framework for the creation, development and sustainability of a professional learning community. Professional learning communities have at their core three guiding principles: 1) a focus on learning, 2) the creation of a collaborative culture and 3) a results-orientation. Within the professional learning community, members are committed to working collaboratively in an ongoing process of collective inquiry and action research in order to achieve better results for the students and community they serve. Professional Learning Communities operate under the assumption that the key to improved learning for students is continuous, job-embedded learning for educators.

CS 493 | CURRICULUM DEVELOPMENT AND ASSESSMENT IN K-12 SCHOOLS | 4 quarter hours (Graduate)  
This course prepares future school leaders with knowledge; understanding; and application of planning, assessment, and instructional leadership for roles in the K-12 school setting at the supervisory or administrative level. The emphasis of the course will be planning, implementation, and refinement of standards-based curriculum aligned with instruction, assessment, and instructional decisions as they affect the teaching and learning environment of the school with diverse cultural, ethnic, linguistic, and special needs populations.

CS 494 | CURRICULUM 2.0: CURRICULUM FOR LEARNING IN GLOBAL NETWORKS | 4 quarter hours (Graduate)  
This course will explore curriculum theories and practices for the age of global networks, including themes such as the shift from industrial to post-industrial educational paradigms, online learning, and more. New communications technologies make it possible for teaching and learning to take place anywhere and anytime, in many cases under conditions radically different from those of formal schooling. This course considers the implications of curriculum under such conditions.
CS 495 | DESIGN THINKING IN EDUCATION | 4 quarter hours
(Graduate)
Design Thinking is a problem solving methodology for collaborative innovation. This course introduces the methods of design thinking applied to curriculum design and education in general. Students will learn how to use design thinking for insight, ideation, and implementation of collaborative solutions to complex educational problems. In addition, students will understand design thinking within the context of the history of ideas and be able to critically analyze and evaluate implementations of design thinking in a variety of educational settings.

CS 551 | CURRICULUM FOR HUMAN AND COMMUNITY DEVELOPMENT | 4 quarter hours
(Graduate)
This course focuses on the relationships between schools and the communities they serve. Specifically, it focuses on how PK-12 schools as well as colleges/universities can and cannot promote human development (healthy growth, learning, and maturation) and community development (creating healthy, safe, connected, & politically-enfranchised communities). The course explores contemporary models of educational reform and community development, notably project- and community-based learning, asset-based development, participatory action research (PAR), full-service community schools, and university-assisted community schools. Additional topics may include: Explicit and implicit goals of educational reforms and how these (re-)shape civic and democratic opportunities; how universities, schools, and communities can collaborate on individual and community development; and the benefits and liabilities of hybrid educational improvement/community development projects (e.g., Promise Neighborhoods/Promise Zones, the Harlem Children’s Zone, etc.).

CS 564 | CURRICULUM AND IDEOLOGY | 4 quarter hours
(Graduate)
This course examines the ideological significance of “youth,” youth development, and education in societies characterized by structural inequalities based on class, race, ethnicity, and sexual/gendered relations of domination and subordination. Texts from a range of academic disciplines - psychology, sociology, cultural studies, social work - are studied to show the influence these perspectives have had in shaping discourse about youth, youth development, and education as a vehicle for social reproduction and social change. Youth and education are looked at as the locus of arguments about social crises and social change and the impacts of framing social problems as educational and youth problems are explored.

CS 579 | RESEARCH IN TEACHING READING: DEVELOPMENTAL & REMEDIAL READING INSTRUCTION & SUPPORT: BEST PRACTICES | 4 quarter hours
(Graduate)
In this course, students will explore and analyze current literacy research through the critical lenses of educational practitioners. Students will: identify meaningful questions about literacy practices in their classrooms and schools; create a plan for addressing the identified research question(s); collect and analyze data relevant to the research question(s); and organize and present the research findings. This inquiry project, or an extension of it, may subsequently become the basis for the student’s Master’s paper or thesis. CS 461 is a prerequisite for this class.

CS 580 | RESEARCH SEMINAR IN CURRICULUM STUDIES | 4 quarter hours
(Graduate)
This course is designed to help graduate students in Curriculum Studies through the difficult process of planning, organizing, drafting, and revising their Master’s papers. Students will be expected to complete a literature review and to develop a strong proposal for an integrative paper as a prelude to selecting an advisor for their Master’s papers. For M.Ed. students only.

CS 589 | THESIS RESEARCH IN CURRICULUM STUDIES | 4 quarter hours
(Graduate)
A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit. SCG 410 and CS 580 are prerequisites for this class.

CS 591 | CURRICULUM THEORIZING: MULTIPLE LENSES | 4 quarter hours
(Graduate)
This course examines diverse curriculum discourses, historical as well as contemporary, within a broader context of issues related to education and schooling. It is designed to engage students critically in the study of curricular frameworks, their assumptions, values, and implications for education, schooling, teaching and learning. Major topics include frameworks for defining and conceptualizing curriculum and curricular visions; social, political, and historical contexts of curriculum construction; issues of gender, race, class, and the media; and the curriculum as socially constructed and historically contextualized discourse(s) about what is and what should be taught. Particular content areas will be used as examples.
CS 594 | SPECIAL TOPICS IN CURRICULUM | 4 quarter hours  
(Graduate)
In order to assure that the program remains flexible, responsive to the needs of students, and inclusive of the areas of interest of both faculty and students, this variable topics course will provide an opportunity for critical examination of compelling topical issues related to education. Topics could include: issues in educational reform; special education; controversies in curricular discourse; current issues such as the education of homeless children; or legal and constitutional issues in education and schooling. The course will be conducted in a seminar format.

CS 600 | REGISTERED STUDENT IN GOOD STANDING | 0 quarter hours  
(Graduate)
Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)
Status as a Graduate Education student is a prerequisite for this class.

CS 606 | REVIEW OF LITERATURE | 0 quarter hours  
(Graduate)
Review of Literature. This paper will give students the opportunity to develop and demonstrate written competence in a subfield of their disciplines and to enhance life-long learning. Specifically, they will broaden their knowledge base and inform themselves about a topic, issue, theory, etc., reviewing and synthesizing existing literature. To do so, students will need a variety of bibliographic skills including searching data bases. (See the student handbook for additional information about completing Master’s papers.) (0 credit hours)

CS 607 | INTEGRATIVE PAPER | 0 quarter hours  
(Graduate)
Integrative Paper. Non-credit. Students will observe and/or participate in the reciprocal interaction of theory and practice, by investigating actual practice in the field as it relates to theory. This might take the form of investigating how a particular theory is applied in the field, developing a practical application of a theory, or, conversely, developing/refining a theory based on investigations made in the field. (See the student handbook for additional information about completing Master’s papers.) (0 credit hours)

CS 608 | CAPSTONE IN CURRICULUM STUDIES | 4 quarter hours  
(Graduate)
Students who have completed the majority of the Curriculum Studies coursework will engage in a thorough analysis of a school or other educational institution (e.g., museum, community organization) and develop an action plan for professional development; mentoring and inducting new teachers; teacher evaluation and training; instructional coaching; curriculum development, assessment, or alignment; using assessments or other data to improve student learning; or building collaboration with teachers and stakeholders. Students will gather and analyze demographic, financial and testing data, develop a narrative to tell the story of a school’s (or educational institution’s) history and recent past, capture the school by way of photographs and interviews, and collect documents or other pertinent artifacts to support their action plan.

CS 625 | CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING) | 0 quarter hours  
(Graduate)
Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms. (0 credit hours)
Status as a Graduate Education student is a prerequisite for this class.

CS 694 | CURRICULUM 2.0: CURRICULUM FOR LEARNING IN GLOBAL NETWORKS | 4 quarter hours  
(Graduate)
This course will explore curriculum theories and practices for the age of global networks, including themes such as the shift from industrial to post-industrial educational paradigms, online learning, and more. New communications technologies make it possible for teaching and learning to take place anywhere and anytime, in many cases under conditions radically different from those of formal schooling. This course considers the implications of curriculum under such conditions.
Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.

CS 695 | REGISTERED DOCTORAL STUDENT IN GOOD STANDING | 0 quarter hours  
(Graduate)
This registration is required of all doctoral students who are not enrolled in a doctoral course, but are completing course requirements and/or dissertation research. It provides access to University facilities. Academic advisor approval required. After the third enrollment, dissertation chair approval required. (0 credit hours)
Status as a EDD student with a declared concentration is a prerequisite for this class.

CS 696 | CURRICULUM DISCOURSES/PERSPECTIVES OVER TIME | 4 quarter hours  
(Graduate)
This course focuses on the examination of the ways in which curriculum - both PK-12 and college/university curriculum - has developed over time. It looks at changes in how curriculum has been defined and conceptualized, theoretical and philosophical developments, evolving assumptions and values, and implications for teaching and learning across varied historical and social contexts. Readings include primary texts by major theorists as well as secondary material including commentary and critique. A primary goal of the course is to provide students with an overview of major movements in curriculum history as a foundation for further study.
Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class.

CS 706 | CANDIDACY PAPER | 0 quarter hours  
(Graduate)
Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook. (0 credit hours)
Status as a EDD student with a declared concentration is a prerequisite for this class.
CS 751 | CURRICULUM FOR HUMAN AND COMMUNITY DEVELOPMENT | 4 quarter hours  
(Graduate)  
This course focuses on the relationships between schools and the communities they serve. Specifically, it focuses on how PK-12 schools as well as colleges/universities can and cannot promote human development (healthy growth, learning, and maturation) and community development (creating healthy, safe, connected, and politically-enfranchised communities). The course explores contemporary models of educational reform and community development, notably project-based and community-based learning, asset-based development, participatory action research (PAR), full-service community schools, and university-assisted community schools. Additional topics may include: Explicit and implicit goals of educational reforms and how these (re-)shape civic and democratic opportunities; how universities, schools, and communities can collaborate on individual and community development; and the benefits and liabilities of hybrid educational improvement/community development projects (e.g., Promise Neighborhoods/Promise Zones, the Harlem Children's Zone, etc.)  
Status as an EDD, PhD, or EdS student with a declared concentration is a prerequisite for this class.

CS 754 | CURRICULUM THEORIZING: MULTIPLE LENSES | 4 quarter hours  
(Graduate)  
Curriculum Theorizing: Multiple Lenses. This course examines diverse curriculum discourses, historical as well as contemporary, within a broader context of issues related to education and schooling. It is designed to engage students critically in the study of curricular frameworks, their assumptions, values, and implications for education, schooling, teaching and learning. Major topics include: frameworks for defining and conceptualizing curriculum and curricular visions; social, political, and historical contexts of curriculum construction; issues of gender, race, class, ableness, and the media; the curriculum as socially constructed, and historically contextualized discourse(s) about what is and what should be taught. Particular content areas will be used as examples.  
Status as an EDD, PhD, or EdS student with a declared concentration is a prerequisite for this class.

CS 764 | YOUTH DEVELOPMENT, IDEOLOGY, CULTURE, AND SOCIETY | 4 quarter hours  
(Graduate)  
This course examines the ideological significance of "youth," youth development, and education in societies characterized by structural inequalities based on class, race, ethnicity, and sexual/gendered relations of domination and subordination. Texts from a range of academic disciplines -- psychology, sociology, cultural studies, social work -- are studied to show the influence these perspectives have had in shaping discourse about youth, youth development, and education as a vehicle for social reproduction and social change. Youth and education are looked at as the locus of arguments about social crises and social change and the impacts of framing social problems as educational and youth problems are explored.  
Status as an EDD, PhD, or EdS student with a declared concentration is a prerequisite for this class.

CS 774 | ENGAGING IN CURRICULUM DELIBERATION | 4 quarter hours  
(Graduate)  
This course engages students in systematic and collaborative deliberation on curriculum problems. A pattern for deliberation -- including situation analysis, problem discrimination and formulation, development of alternative courses of action, and anticipation of consequences -- will be developed, exemplified, and contrasted with other descriptions of curriculum development. The importance and role of alternative conceptions of learners, of situation, and of knowledge structures within disciplines will be emphasized. After engaging in stimulated deliberations, each student will be asked to examine the intellectual commitments underlying this approach to curriculum change, to reconsider his or her role as a curriculum leader in a school or other educational setting, and to develop realistic plans for engaging a particular school community in collaborative curriculum deliberation.  
Status as an EDD, PhD, or EdS student with a declared concentration is a prerequisite for this class.

CS 784 | CURRICULUM AND PROGRAM DESIGN | 4 quarter hours  
(Graduate)  
This course studies principles underlying the design of effective, coherent, and comprehensive instructional programs. Topics include: the design and organization of core courses of study and related curricular components; the associated staff development program; and alignment with local, state, and national mandates. Particular attention will be given to planning for diversity, including differences in learning styles, special needs, culture, and language.  
Status as an EDD, PhD, or EdS student with a declared concentration is a prerequisite for this class.

CS 785 | CURRICULUM AND PROGRAM DESIGN IN INTERNATIONAL BACCALAUREATE | 4 quarter hours  
(Graduate)  
This course studies principles underlying the design of effective, coherent, and comprehensive instructional programs within the International Baccalaureate PYP, MYP, DP, and CCP continuum. Topics include: the principles and practices of the International Baccalaureate, the integration of the IB learner profile, the design and organization of IB core courses of study and related curricular components; the associated staff development program to meet IB requirements for Category 1, 2, and 3 training; and alignment with local, state, and national mandates as well as IB mandates. Particular attention will be given to planning for global minded education, diversity, including differences in learning styles, special needs, culture, and language.  
Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.
CS 786 | CURRICULUM AND PROGRAM DESIGN IN CATHOLIC SCHOOLS | 4 quarter hours
(Graduate)
This course studies principles underlying the design of effective, coherent, and comprehensive instructional programs within the theoretical and philosophical foundation of Catholic education. Topics include: The National Catholic Benchmark standards, as well as the design and organization of curriculum using the Catholic lens, and related curricular components; the associated staff development program to integrate Catholic values and faith; and alignment with local, state, and national mandates as well as Catholic education standards. Particular attention will be given to planning for global minded Catholic education, diversity, including differences in learning styles, special needs, culture and language.

Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.

CS 794 | SPECIAL TOPICS IN CURRICULUM | 4 quarter hours
(Graduate)
In order to assure that the program remains flexible, responsive to the needs of students, and inclusive of the areas of interest of both faculty and students, this variable topics course will provide an opportunity for critical examination of compelling topical issues related to education. Topics could include: issues in educational reform; special education; controversies in curricular discourse; current issues such as the education of homeless children; or legal and constitutional issues in education and schooling. The course will be conducted in a seminar format.

Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class.

CS 838 | INDEPENDENT APPLIED CAPSTONE (EDD) PROPOSAL DEVELOPMENT | 4 quarter hours
(Graduate)
Students register for this course for the quarter in which they defend their capstone proposals. Permission of capstone chair required.

CS 839 | INDEPENDENT APPLIED CAPSTONE (EDD): CURRICULUM STUDIES | 4 quarter hours
(Graduate)
Students register for this course for the quarter in which they defend their capstone projects. Permission of capstone chair required.

CS 849 | SUPERVISED DISSERTATION (PHD) PROPOSAL DEVELOPMENT | 4 quarter hours
(Graduate)
Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

CS 859 | INDEPENDENT DISSERTATION RESEARCH (PHD): CURRICULUM STUDIES | 4 quarter hours
(Graduate)
Students register for this course for the quarter in which they defend their dissertations. Permission of dissertation chair required.

Cyber-Physical Systems Engineering (CSE)

CSE 299 | HARDWARE PROJECTS | 4 quarter hours
(Undergraduate)
A course that introduces student to building basic cyber-physical systems. The course will cover basic electronics, a hardarecomputing platform (e.g., Raspberry Pi), and the API for managing hardware devices including serial communication, interfacing with digital and analog inputs (sensors), controlling motors, and using displays.

CSC 242 or CSC 243 is the prerequisite for this class.

CSE 304 | RAPID PROTOTYPING TECHNOLOGIES | 4 quarter hours
(Undergraduate)
An overview of computer-aided design for 3-D modeling and prototype fabrication using 3-D printing and other technologies. PREREQUISITE(S): MAT 262.

CSE 314 | NETWORKING FOR CYBER-PHYSICAL SYSTEMS | 4 quarter hours
(Undergraduate)
Overview of computer network technologies used in cyber-physical systems. Topics covered wired and wireless network protocol stacks, serialization, real-time network programming, and utilizing cloud-based services.

CSE 316 | CYBER-PHYSICAL SYSTEM SECURITY | 4 quarter hours
(Undergraduate)
Design for security for cyber-physical systems, security breaches and enforcement, standardization, best practices, security policies, security threat and protection-in-depth modeling, vulnerability and risk assessment for cyber-physical systems, CPS security incidents and trends.

CSC 374 is a prerequisite for this class.

CSE 331 | CYBER-PHYSICAL SYSTEM ENGINEERING I | 4 quarter hours
(Undergraduate)
The first in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This first course focuses on electromagnetics and circuit analysis with applications to displays, touchpads, cameras, memory, batteries, GPS, and wireless communications. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.

MAT 152 is a prerequisite for this class.

CSE 332 | CYBER-PHYSICAL SYSTEMS ENGINEERING II | 4 quarter hours
(Undergraduate)
The second in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This second course covers more advanced concept in electromagnetism and electronics (transistors, amplifiers and circuit interfaces and operational amplifiers) and abstractions such as state machines along with probabilistic inference and state space search. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.

CSE 331 is a prerequisite for this course.
CSE 333 | CYBER-PHYSICAL SYSTEMS ENGINEERING III | 4 quarter hours
(Undergraduate)
The third in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This third course introduces signals and analog and digital signal processing, sampling and quantization, and control. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.
CSE 332 is a prerequisite for this class.

CSE 341 | DIGITAL SYSTEMS | 4 quarter hours
(Undergraduate)
Design and implementation of digital systems using transistor transistor logic (TTL), SystemVerilog, and field-programmable gate arrays (FPGAs). Topics include combinational and sequential logic, storage elements, input/output, timing analysis, design trade offs, synchronous and asynchronous design methods.
CSE 332 is a prerequisite for this class.

CSE 342 | COMPUTER SYSTEM ORGANIZATION AND DESIGN | 4 quarter hours
(Undergraduate)
Overview of the design of hardware elements of computer systems. Topics include instruction set design, processor micro-architecture and pipelining, cache and virtual memory organizations, protection and sharing, I/O and interrupts, and multithreaded architectures, and embedded systems.
CSC 374 is a prerequisite for this class.

CSE 351 | EMBEDDED SYSTEMS I | 4 quarter hours
(Undergraduate)
The first of a two course sequence on programming embedded architectures in devices such as smartphones, portable gaming devices, and robots. Topics covered include embedded architectures, interaction with devices (buses, memory architectures, memory management, device drivers) and concurrency (software and hardware interrupts, timers).
CSC 374 is a prerequisite for this class.

CSE 352 | EMBEDDED SYSTEMS II | 4 quarter hours
(Undergraduate)
The second of a two course sequence on programming embedded architectures in devices such as smartphones, portable gaming devices, and robots. Topics may include real-time principles (multi-tasking, scheduling, synchronization), implementation trade-offs, profiling and code optimization (for performance and memory), and embedded software (exception handling, loading, mode-switching, programming embedded systems).
CSE 351 is a prerequisite for this class.

CSE 361 | LINEAR SYSTEMS | 4 quarter hours
(Undergraduate)
A comprehensive overview of modeling and analysis of dynamic systems including mechanical, electrical, electro-mechanical, thermal, and fluid systems. Topics include modeling using state-variable equations, input-output differential equations, transfer functions, and block diagrams, analytical solutions using the Laplace transform, and applications to modeling and designing feedback control systems.
CSE 333 and MAT 304 are prerequisites for this class.

CSE 362 | FOUNDATIONS OF CYBER-PHYSICAL COMPUTING | 4 quarter hours
(Undergraduate)
This course covers the modeling, design, and analysis of cyberphysical systems that integrate computation and physical processes. It introduces formal models that support abstractions to manage the complexity of a system design and verify the system implementation correctness. Topics include safety and liveness requirements, temporal logic, model checking, deductive verification, stability analysis of linear systems, and real-time scheduling algorithms.
CSE 352 is a prerequisite for this class.

CSE 377 | INTRO TO MECHATRONICS | 4 quarter hours
(Undergraduate)
Design and development of a mechatronic system incorporating sensors, actuators, and artificial intelligence.
CSE 332 is a prerequisite for this class.

CSE 393 | CYBER-PHYSICAL SYSTEMS ENGINEERING PRACTICUM I | 4 quarter hours
(Undergraduate)
The first course in a two-course sequence in which students work in small groups to implement a cyber-physical system.
CSE 333 and CSE 352 are prerequisites for this class.

CSE 394 | CYBER-PHYSICAL SYSTEMS ENGINEERING PRACTICUM II | 4 quarter hours
(Undergraduate)
The second course in a two-course sequence in which students work in small groups to implement a cyber-physical system.
CSE 393 is a prerequisite for this class.

CSE 424 | NETWORKING FOR CYBER-PHYSICAL SYSTEMS | 4 quarter hours
(Graduate)
Overview of computer network technologies used in cyber-physical systems. Topics covered wired and wireless network protocol stacks, serialization, real-time network programming, and utilizing cloud-based services.
CSC 407 is a prerequisite for this class.

CSE 426 | CYBER-PHYSICAL SYSTEM SECURITY | 4 quarter hours
(Graduate)
Design for cyber-physical system (CPS) security, security breaches and enforcement, standardization, best practices, security policies, security threat and protection-in-depth modeling, vulnerability and risk assessment for cyber-physical systems, CPS security incidents and trends. Students will carry out a CPS security-related independent project.
CSC 407 is a prerequisite for this class.

CSE 431 | CYBER-PHYSICAL SYSTEMS ENGINEERING I | 4 quarter hours
(Graduate)
The first in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This first course focuses on electromagnetics and circuits analysis with applications to displays, touchpads, cameras, memory, batteries, GPS, and wireless communications. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.
PREREQUISITES: linear algebra and a year of college physics and CSC 407.
CSE 432 | CYBER-PHYSICAL SYSTEMS ENGINEERING II | 4 quarter hours
(Graduate)
The second in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This second course covers more advanced concept in electromagnetism and electronics (transistors, amplifiers and circuit interfaces and operational amplifiers) and abstractions such as state machines along with probabilistic inference and state space search. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.

CSE 433 | CYBER-PHYSICAL SYSTEMS ENGINEERING III | 4 quarter hours
(Graduate)
The third in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This third course introduces signals and analog and digital signal processing, sampling and quantization, and control. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.

CSE 432 is a prerequisite for this class.

CSE 441 | DIGITAL SYSTEMS | 4 quarter hours
(Graduate)
Design and implementation of digital systems using transistor-transistor logic (TTL). SystemVerilog, and field-programmable gate arrays (FPGAs). Topics include combinational and sequential logic, storage elements, input/output, timing analysis, design tradeoffs, synchronous and asynchronous design methods.

CSE 432 is a prerequisite for this class.

CSE 442 | COMPUTER SYSTEM ORGANIZATION AND DESIGN | 4 quarter hours
(Graduate)
Overview of the design of hardware elements of computer systems. Topics include instruction set design, processor micro-architecture and pipelining, cache and virtual memory organizations, protection and sharing, I/O and interrupts, and multithreaded architectures, and embedded systems.

CSC 407 is a prerequisite for this class.

CSE 451 | EMBEDDED SYSTEMS I | 4 quarter hours
(Graduate)
The first of a two course sequence on programming embedded architectures in devices such as smartphones, portable gaming devices, and robots. Topics covered include embedded architectures, interaction with devices (buses, memory architectures, memory management, device drivers) and concurrency (software and hardware interrupts, timers).

CSC 407 is a prerequisite for this class.

CSE 452 | EMBEDDED SYSTEMS II | 4 quarter hours
(Graduate)
The second of a two course sequence on programming embedded architectures in devices such as smartphones, portable gaming devices, and robots. Topics may include real-time principles (multi-tasking, scheduling, synchronization), implementation trade-offs, profiling and code optimization (for performance and memory), and embedded software (exception handling, loading, mode-switching, programming embedded systems).

CSE 451 is a prerequisite for this class.

CSE 462 | FOUNDATIONS OF CYBER-PHYSICAL COMPUTING | 4 quarter hours
(Graduate)
This course covers the modeling, design, and analysis of cyber-physical systems that integrate computation and physical processes. It introduces formal models that support abstractions to manage the complexity of a system design and verify the system implementation correctness. Topics include safety and liveness requirements, temporal logic, model checking, deductive verification, stability analysis of linear systems, and real-time scheduling algorithms.

CSE 433 is a prerequisite for this class.

CSE 464 | RAPID PROTOTYPING TECHNOLOGIES | 4 quarter hours
(Graduate)
An overview of computer-aided design for 3-D modeling and prototype fabrication using 3-D printing and other technologies. PREREQUISITES: linear algebra.

CSE 476 | LINEAR SYSTEMS | 4 quarter hours
(Graduate)
A comprehensive overview of modeling and analysis of dynamic systems including mechanical, electrical, electro-mechanical, thermal, and fluid systems. Topics include modeling using state-variable equations, input-output differential equations, transfer functions, and block diagrams, analytical solutions using the Laplace transform, and applications to modeling and designing feedback control systems.

CSE 433 is a prerequisite for this class.

CSE 527 | CPSE MASTER'S PROJECT | 4 quarter hours
(Graduate)
Students will work in small groups to implement a cyber-physical system.

CSE 433 and CSE 452 are prerequisites for this class.

Cybersecurity (CSEC)

CSEC 228 | LEGAL, ETHICAL AND SOCIAL ISSUES IN INFORMATION SECURITY (FORMERLY CNS 228) | 4 quarter hours
(Undergraduate)
This course is designed to acquaint students with electronic privacy, security and ethics. Students will gain an understanding of information ethics, existing and emerging cyber-laws, organizational liability issues, and explore several Codes of Ethics. Students will learn about real and potential security issues, steps that can be taken to create environments of trust, how to evaluate the strengths and weaknesses of a firm’s information resource environment, and risk management and operation feasibility issues.

CSEC 320 | COMPUTER FORENSIC AND INCIDENT RESPONSE (FORMERLY CNS 320) | 4 quarter hours
(Undergraduate)
Introduction to the topics of computer forensic, computer crimes, response to security incidents, Cybercrime investigation and prosecution. Students will learn how an organization can setup a security response team, prepare for Security incidents and manage these incidents.

CSEC 378 or CSC 374 is a prerequisite for this class.
CSEC 340 | FUNDAMENTALS OF INFORMATION ASSURANCE
(FORMERLY CNS 340) | 4 quarter hours
(Undergraduate)
This course is a survey of the fundamental elements of computer security and information assurance. Topics may include confidentiality, integrity, and availability; security policies; authentication; access control; risk management; threat and vulnerability assessment; common attack/defense methods; ethical issues.

CSEC 342 | CYBERSECURITY OPERATIONS (FORMERLY CNS 342) | 4 quarter hours
(Undergraduate)
The Cybersecurity Operations course presents the knowledge and skills needed for a Security Analyst in a typical Security Operations Center environment. The course covers the core security skills needed for monitoring, detecting, investigating, analyzing and responding to security events. Extensive laboratory exercises are included to apply knowledge learned in the lectures and allow the students to implement typical SOC tools. In addition to technologies, the course will also cover cybersecurity operations network principles, roles and responsibilities as well as the related technologies, tools, regulations and security frameworks.

CSEC 345 | HUMAN-CENTERED CYBERSECURITY (FORMERLY CNS 345) | 4 quarter hours
(Undergraduate)
A survey of behavioral theories relevant in cybersecurity context. Topics include economic theories of decision making, heuristics, biases, and bounded rationality, signal detection theory, mental models, social engineering, game theory, information search, and cognitive engineering. Students work on term paper describing potential application(s) of a theory of their choice in cybersecurity context. PREREQUISITE(S): IT 263 or CSC 242.

CSEC 348 | SECURITY TESTING AND ASSESSMENT (FORMERLY CNS 348) | 4 quarter hours
(Undergraduate)
Vulnerability assessment and ethical security testing; review of ethical concerns and legal issues associated with security testing activities; study and analysis of the defensive mechanisms used to mitigate such threats. There will be extensive hands-on laboratory exercises. CSEC 340 and CSEC 378 are prerequisites for this class.

CSEC 350 | PHYSICAL AND IT SECURITY CONVERGENCE (FORMERLY CNS 350) | 4 quarter hours
(Undergraduate)
This course introduces students to the fundamental processes associated with the Physical Security discipline. This course will present the convergence of IT Security and Corporate Physical Security, focusing on where convergence takes place - at the technology, process and function level. Students will look at real-world illustrations of implementation and analyze perceived efficiencies and cost-savings. This course is designed for students who desire to understand physical and IT security in the framework of Enterprise Risk Management. CSEC 340 and CSEC 378 are prerequisites for this class.

CSEC 355 | CRITICAL INFRASTRUCTURE AND CONTROL SYSTEMS CYBERSECURITY (FORMERLY CNS 355) | 4 quarter hours
(Undergraduate)
This course is an introduction to the cybersecurity challenges for control systems present in industry, homes and traditional businesses such as manufacturing. Topics covered include the design and setup of Supervisory Control and Data Acquisition (SCADA) systems, Distributed Control Systems (DCS), and Programmable Logic Controller (PLC) systems. As these systems are typically designed without any intrinsic security mechanism, we will study the challenges of protecting them and how to employ a defense-in-depth methodology to secure them. This class will focus on the security risks of critical infrastructure systems (such as Electrical, Pipelines, Water/Wastewater and transportation) and methods to protect them. PREREQUISITE(S): CSEC 340 or NET 377 or IT 263.
CSEC 394 | INFORMATION SYSTEMS SECURITY ENGINEERING I
(Formerly CNS 394) | 4 quarter hours
(Undergraduate)
This course requires students to apply Information System Security Engineering methods and processes to design, document and implement comprehensive security infrastructures in realistic scenarios. Students will work in teams through the entire life cycle of a Security infrastructure project from needs discovery, threat assessment, architecture design, implementation, effectiveness assessment and auditing. The course is designed to span two quarters. In this first quarter, students will learn the Information Systems Security Engineering process and perform asset identification, threat assessment and system requirement specification. CSEC 378 and NET 377 and NET 379 are prerequisites for this course.

CSEC 395 | INFORMATION SYSTEMS SECURITY ENGINEERING II
(Formerly CNS 395) | 4 quarter hours
(Undergraduate)
This senior project capstone course requires students to apply Information System Security Engineering methods and processes to perform the design and implementation of Information Systems Security infrastructures. The human and sociological impacts of Information Security will be studied with a particular focus on privacy issues, ethical use of Security tools and cultural and legal difference that exist in a globally connected but diverse world. CSEC 394 is a prerequisite for this class.

CSEC 397 | TOPICS IN COMPUTER, INFORMATION AND NETWORK SECURITY
(Formerly CNS 397) | 1-4 quarter hours
(Undergraduate)
May be repeated for credit. (1 quarter hour)

CSEC 399 | INDEPENDENT STUDY
(Formerly CNS 399) | 1-8 quarter hours
(Undergraduate)
Variable credit. PREREQUISITE(S): Consent of dean. (variable credit)

CSEC 418 | INTRODUCTION TO HOST SECURITY
(Formerly CNS 418) | 4 quarter hours
(Graduate)
Principles of host based security. Review of security methods used to ensure the confidentiality, integrity, and availability of the information stored on a host. The class will cover OS configuration, access control, anti-malware, public facing application security, host-based intrusion detection/prevention, host-based firewalls and audit & compliance. Course includes laboratory work with both the Linux and Windows operating systems. NET 413 is a prerequisite for this class.

CSEC 440 | INFORMATION SECURITY MANAGEMENT
(Formerly CNS 440) | 4 quarter hours
(Graduate)
Survey of information security management as it applies to information systems analysis, design, and operations. Managing information assets and the security infrastructure. Emphasis on managing security-related risk, as well as the process of developing, implementing, and maintaining organizational policies, standards, procedures, and guidelines. Identifying and evaluating information assets, threats, and vulnerabilities. Quantitative and qualitative risk analysis, risk mitigation, residual risk, and risk treatment as they relate to information security. Topics include information security vulnerabilities, threats, and risk management; security policies and standards; security audits; access controls; network perimeter protection, data protection; physical security; security education training and awareness. Introduction to compliance, as well as the CISSP domains.

CSEC 445 | HUMAN-CENTERED CYBERSECURITY
(Formerly CNS 445) | 4 quarter hours
(Graduate)
Application of behavioral theories in cybersecurity context. Topics include economic theories of decision making, heuristics, biases, and bounded rationality, signal detection theory, mental models, social engineering, game theory, information search, and cognitive engineering. Students work on an individual project applying one of these theories to a practical cybersecurity scenario of their choice.

CSEC 446 | SECURE DESIGN
(Formerly CNS 446) | 4 quarter hours
(Graduate)
Secure design is a cross-disciplinary approach to cybersecurity and user-centered design. The course includes hands-on, interactive activities focused on secure designs for Internet-of-Things (IoT) technologies. Topics include: principles of visual design, user-centered design, mental models, heuristics, bounded rationality, applied cybersecurity, prototyping, and usability testing. Students will work on a class long project that will employ the principles of secure design to develop a secure yet usable prototype of an IoT device.

CSEC 450 | DIGITAL FORENSIC TECHNIQUES
(Formerly CNS 450) | 4 quarter hours
(Graduate)
This course focuses on the forensic acquisition, analysis and presentation of data from computer systems. This course covers: preservation and interpretation of evidence; forensic imaging; file systems and data recovery; Windows registry forensics; internet history and social media analysis; mobile device forensics; timeline analysis; incident response and writing expert reports and testimony. CSC 407 or CSEC 418 is a prerequisite for this class.

CSEC 455 | PHYSICAL AND IT SECURITY CONVERGENCE
(Formerly CNS 455) | 4 quarter hours
(Graduate)
This course introduces students to the fundamental processes associated with the Physical Security discipline. This course will present the convergence of IT Security and Corporate Physical Security, focusing on where convergence takes place - at the technology, process and function level. Students will look at real-world illustrations of implementation and analyze perceived efficiencies and cost-savings. This course is designed for students who desire to understand physical and IT security in the framework of Enterprise Risk Management.

CSEC 466 | CRITICAL INFRASTRUCTURE AND CONTROL SYSTEMS
CYBERSECURITY
(Formerly CNS 466) | 4 quarter hours
(Graduate)
This course is an introduction to the cybersecurity challenges for control systems present in industry, homes and traditional businesses such as manufacturing. Topics covered include the design and setup of Supervisory Control and Data Acquisition (SCADA) systems, Distributed Control Systems (DCS), and Programmable Logic Controller (PLC) systems. As these systems are typically designed without any intrinsic security mechanism, we will study the challenges of protecting them and how to employ a defense-in-depth methodology to secure them. This class will focus on the security risks of critical infrastructure systems (such as Electrical, Pipelines, Water/Wastewater and transportation) and methods to protect them. CSEC 440 or NET 477 is a prerequisite for this class.
CSEC 440 and CSEC 418 are prerequisites for this class.

CSEC 440 | GOVERNANCE POLICIES IN INFORMATION ASSURANCE (FORMERLY CNS 477) | 4 quarter hours
(Graduate)
This course focuses on assessment of business risks arising from information security and privacy issues, as well as the creation and implementation of policies that ensure compliance with laws and industry standards. It is a complement to IS 482, which focuses on the legal standards to which people and organizations are held under laws and regulations that concern computing and information technology. Legal issues arising under information security and control frameworks, such as COBIT and ISO 17799, are considered. Topics include privacy laws, payment card industry standards, information security measures mandated by select federal statues (e.g., HIPAA, Gramm-Leach-Bliley and Sarbanes-Oxley), data breach notification, governance and policy development, e-discovery, contracts, intellectual property, and security risk assessments.

CSEC 440 is a prerequisite for this class.

CSEC 440 | INFORMATION SECURITY RISK ASSESSMENT FOR NON-PROFIT ORGANIZATIONS (FORMERLY CNS 490) | 4 quarter hours
(Graduate)
Students taking this course will gain real-world experience by partnering with a non-profit, community-based organization to assess information security needs and propose recommendations that improve the organization's security and privacy practices. Within the context of an assigned non-profit organization, students will work in teams to conduct a security risk assessment using industry standards as guidance; write a formal risk assessment report for the organization's management; identify and propose cost-effective security safeguards that may consist of security policies, technologies, or procedures; define a plan to test, monitor, and train system users on recommended security safeguards.

CSEC 440 is a prerequisite for this class.

CSEC 453 | ENTERPRISE SECURITY INFRASTRUCTURE CONTROLS AND REGULATORY COMPLIANCE (FORMERLY CNS 533) | 4 quarter hours
(Graduate)
Design, implementation, support and management of control methods in enterprise environments. Focus is on how these controls can help organizations achieve regulatory compliance. Review of Sarbanes-Oxley and its impact on IT systems. Detailed study of how risk assessment methods, information security program management and ERP systems can be used to fulfill regulatory and legal requirements. Control Objectives for Information and related Technology (COBIT) guidelines and best practices for SOX compliance. Security management standards (ISO 17799, BS 7799 and ISO 27001).

CSEC 453 is a prerequisite for this class.

CSEC 459 | COMPUTER INFORMATION AND NETWORK SECURITY (FORMERLY CNS 504) | 1-4 quarter hours
(Graduate)
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)
CSEC 599 | INDEPENDENT STUDY (FORMERLY CNS 599) | 1-4 quarter hours
(Undergraduate)
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None. (variable credit)

Data Science (DSC)

DSC 323 | DATA ANALYSIS AND REGRESSION | 4 quarter hours
(Undergraduate)
Topics include multiple regression and correlation methods, model building and validation processes, analysis of variance, logistic regression and regularized regression techniques.
IT 223 or MAT 351 or MAT 137 is a prerequisite for this course.

DSC 324 | ADVANCED DATA ANALYSIS | 4 quarter hours
(Undergraduate)
The course will teach advanced statistical techniques to discover information from large sets of data. The course topics include visualization techniques to summarize and display high dimensional data, dimensional reduction techniques such as principal component analysis and factor analysis, clustering techniques for discovering patterns from large datasets, and classification techniques for decision making. The methods will be implemented using standard computer packages.
CSC 324 or DSC 323 or consent of instructor is a prerequisite for this class.

DSC 333 | INTRODUCTION TO BIG DATA PROCESSING | 4 quarter hours
(Undergraduate)
This course will explore different approaches and a framework for performing data analytics on a dynamic, heterogeneous cluster of computing nodes. The course will begin with studying principles behind MapReduce and implementation of custom distributed queries using Hadoop. It will then expand to cover higher-level languages and tools within Hadoop ecosystem (e.g., Pig, Hive) and cluster configuration techniques. Finally, the course will delve into a comparative evaluation of several NoSQL and NewSQL databases that make fundamentally different assumptions for data processing (e.g., OLAP vs OLTP, disk-bound vs in-memory or real-time streaming data). The primary focus of the course will be hands-on implementation and tuning performance for large-scale clusters and data sets.
CSC 355 is a prerequisite for this class.

DSC 341 | FOUNDATIONS OF DATA SCIENCE | 4 quarter hours
(Undergraduate)
The course is an introduction to the Data Mining (DM) stages and its methodologies. The course provides students with an overview of the relationship between data warehousing and DM, and also covers the differences between database query tools and DM. Possible DM methodologies to be covered in the course include: multiple linear regression, clustering, k-nearest neighbor, decision trees, and multidimensional scaling. These methodologies will be augmented with real world examples from different domains such as marketing, e-commerce, and information systems. If time permits, additional topics may include privacy and security issues in data mining. The emphasis of this course is on methodologies and applications, not on their mathematical foundations.
IT 223 (or MAT 137 or MAT 242 or MAT 341 or MAT 353) is a prerequisite for this class.

DSC 345 | MACHINE LEARNING | 4 quarter hours
(Undergraduate)
This course introduces students to machine learning techniques and builds upon the background and skills learned in the previous data science and statistics courses. The course topics include advanced methods and algorithms for supervised and unsupervised learning, and ensemble methods. Through research paper discussion and hands-on assignments, the course will also cover recent applications of machine learning, such as autonomous navigation, biomedical informatics, biometrics, and text and web mining.
(CSC 367 or DSC 341) and (CSC 334 or DSC 324) are prerequisites for this class.

DSC 365 | DATA VISUALIZATION | 4 quarter hours
(Undergraduate)
This course will be an introduction to data visualization techniques for exploration and analysis of data sets from a wide range of fields including commercial, financial, medical, scientific and engineering applications. Topics will include visual encoding of numeric data, effective visualization design, graphical integrity, visualizing distributions and correlation, false-color techniques for feature extraction and enhancement, basic network graph visualization, geospatial visualization and some additional topics.
(IT 223 or MAT 137) and CSC 241 and CSC 241 are prerequisites for this class.

DSC 390 | TOPICS IN DATA SCIENCE | 4 quarter hours
(Undergraduate)
Specific topics will be selected by the instructor and may vary each quarter. This course is repeatable.

DSC 394 | DATA SCIENCE PROJECT | 4 quarter hours
(Undergraduate)
This course provides students with the opportunity to apply and integrate the knowledge they have acquired during the degree program. Students may work in teams and will work on real world data analytics projects using their skills and knowledge. At the end of the course, they submit a complete report summarizing analyses and study outcomes, and present results to the class.
(CSC 367 or DSC 341) and CSC 301 are prerequisites for this class.

DSC 423 | DATA ANALYSIS AND REGRESSION | 4 quarter hours
(Graduate)
Multiple regression and correlation, residual analysis, analysis of variance, and robustness. These topics will be studied from a data analytic perspective, supported by an investigation of available statistical software.
IT 403 is a prerequisite for this class.

DSC 424 | ADVANCED DATA ANALYSIS | 4 quarter hours
(Graduate)
The course will teach advanced statistical techniques to discover information from large sets of data. The course topics include visualization techniques to summarize and display high dimensional data, dimensional reduction techniques such as principal component analysis and factor analysis, clustering techniques for discovering patterns from large datasets, and classification techniques for decision making. The methods will be implemented using standard computer packages.
CSC 423 or DSC 423 or consent of instructor is a prerequisite for this class.
DSC 435 | TIME SERIES ANALYSIS AND FORECASTING | 4 quarter hours
(Graduate)
The course introduces students to statistical models for time series analysis and forecasting. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, volatility models (GARCH-type, GARCH-M type, etc.), forecasting evaluation and diagnostics checking. The course will emphasize applications to financial data, volatility modeling and risk management. Real examples will be used throughout the course.

CSC 423 or DSC 423 or MAT 456 or consent is a prerequisite for this class.

DSC 430 | PYTHON PROGRAMMING | 4 quarter hours
(Graduate)
This course builds the skills necessary to use Python to develop larger programs and libraries. Students will learn to design, implement and debug Python functions and programs, including stochastic and object-oriented techniques. The course will cover Python data structures, and Python facilities for working with files, strings, regular expressions, databases and URLs. The course will also include an introduction to the Pandas package for data management, the NumPy package for scientific computing, and the Matplotlib package for visualization.

CSC 401 is a prerequisite for this class.

DSC 433 | SCRIPTING FOR DATA ANALYSIS | 4 quarter hours
(Graduate)
Data access and transformation with modern statistical software such as SAS and R. Report writing, data graphing and visualization, writing macros and functions to automate tasks and statistical analyses.

IT 403 and (CSC 401 or IT 411) are prerequisites for this class.

DSC 441 | FUNDAMENTALS OF DATA SCIENCE | 4 quarter hours
(Graduate)
An introduction to the Knowledge Discovery Technologies covering all stages of a data mining process: domain understanding, data collection and selection, data cleaning and transformation, dimensionality reduction, pattern discovery, evaluation, and knowledge extraction. The course provides a comprehensive overview of data mining techniques used to realize these stages, including traditional statistical analysis and machine learning techniques. Students will analyze large datasets and develop modeling solutions to support decision making in various domains such as healthcare, finance, security, marketing, customer relationship management (CRM), and multimedia.

IT 403 or DSC 423 or ECO 520 is a prerequisite for this class.

DSC 450 | DATABASE PROCESSING FOR LARGE-SCALE ANALYTICS | 4 quarter hours
(Graduate)
The course covers core concepts of database systems with focus on applications in large-scale analytics. Topics include relational databases, scheme normalization, SQL queries for data integration and data cleaning, database programming for ETL, and nontraditional database systems for unstructured data.

DSC 430 is a prerequisite for this class.

DSC 465 | DATA VISUALIZATION | 4 quarter hours
(Graduate)
An introduction to data visualization techniques to enhance the exploration and analysis of large data sets from a wide range of fields including commercial, financial, medical, scientific and engineering applications. Topics include visual encoding of numeric data, graphical integrity and effective visualization design, visualizing distributions and correlation, false-color techniques for feature extraction and enhancement, basic network visualization and graph layout, isosurface generation, geospatial visualization and volumetric rendering techniques. The course explores both existing visualization software packages and code interfaces for data visualization.

(IT 403 or MAT 453) and (CSC 401 or IT 411 or MAT 449) are prerequisites for this class.

DSC 478 | PROGRAMMING MACHINE LEARNING APPLICATIONS | 4 quarter hours
(Graduate)
The course will focus on the implementations of various data mining and machine learning techniques using a high-level programming language. Students will have hands on experience developing both supervised and unsupervised machine learning algorithms and will learn how to employ these techniques in the context of popular applications including automatic personalization, recommender systems, searching and ranking, text mining, group and community discovery, and social media analytics.

DSC 441 and (DSC 430 or CSC 403) are prerequisites for this class.

DSC 480 | SOCIAL NETWORK ANALYSIS | 4 quarter hours
(Graduate)
This course is an introduction to the concepts and methods of social network analysis. Students will learn to extract and manage data about network structure and dynamics, and to analyze, model and visualize such data. Students will use software tools to model and visualize network structure and dynamics. Specific network applications to be discussed include online social networks, collaboration networks, and communication networks.

(DSC 423 or SOC 412 or PSY 411) is a prerequisite for this class.

DSC 484 | WEB DATA MINING | 4 quarter hours
(Graduate)
An in-depth study of the knowledge discovery process and its applications in Web mining, Web analytics and business intelligence. The course provides coverage of various aspects of data collection and preprocessing, as well as basic data mining techniques for segmentation, classification, predictive modeling, association analysis, and sequential pattern discovery. The primary focus of the course is the application of these techniques to Web analytics, user behavior modeling, e-metrics for business intelligence, Web personalization and recommender systems. Also addressed are privacy and ethical issues related to Web data mining. Students can choose from three types of final course projects: implementation projects, research papers, or data analysis projects. Throughout the course, the students will learn and use a variety of data mining tools to analyze sample data sets as part of class assignments.

IT 403 and (CSC 451 or CSC 453 or CSC 455 or DSC 450) are prerequisites for this class.
DA 220 | DATA MINING | 2-4 quarter hours (Undergraduate)

In this course, students will be introduced to data mining and will learn techniques including cluster, classification, association, and decision tree analysis to discover patterns in datasets. Students are expected to have a good understanding of databases and parametric statistics prior to the course. The course is highly applied and hands-on, using a problem-based approach to problem solving. Pre-Requisites: IT 223 Data Analysis and IT 240 Introduction to Databases. (2-4 quarter hours)

DA 233 | APPLIED INFORMATION MANAGEMENT SYSTEMS | 4 quarter hours (Undergraduate)

This course introduces students to the key concepts in the field of Management Information Systems (MIS) and enhances understanding of the issues that business organizations face when developing and managing information systems. In this course, students will be presented with a broad overview of the field to first examine the increasing impact of information technology in business organizations, and second, in preparation for more advanced courses in data analytics and information systems. Specifically, the three major topics covered include (1) e-businesses and networks, (2) databases, as well as (3) enterprise resource planning (ERP) and process models. These topics are designed to prepare students for further inquiry on web analytics, data mining, project management, supply chain management, as well as business in general. By completing the course, students should be better equipped to apply IT skills to solve business problems, to participate in IT projects, and to communicate more knowledgeably with IT professionals. (4 quarter hours)

DA 240 | TEXT ANALYTICS | 2 quarter hours (Undergraduate)

Although analytics can be thought of as inductive data analysis, involving huge data sets, the data organizations face are not always quantitative. From the comments on rating scales to consumer reports, some quantitative scales can be arbitrary. Using a market-leading analytics tool, students will explore a different form of analytics - text analytics? to perform content analysis of unstructured textual documents, or textual data. The course takes a hands-on, scenario-based approach, thus enabling students to have multiple opportunities to apply their skills to different problems. Upon completion, students will not only learn about text analytics, but also have a strong grasp of a market-leading analytics tool. Pre-Requisite: Foundations of Analytics and IT 223 Data Analysis. (2-4 quarter hours)
DA 340 | ACCELERATING ORGANIZATION INTELLIGENCE: WHAT'S THE STORY? | 2 quarter hours
(Undergraduate)
This course focuses on developing the curiosity of students in decision analytics. Rather than verifying hypotheses, students will dig deeper to discover the right questions to ask and develop solutions. Having understood the emerging field of decision analytics and how analyzing Big Data can solve many current organization problems, this course adopts market-leading software to answer the preceding two questions. In this course, students will use this software to understand datasets, analyze datasets, visualize and share their findings. Through a series of problems, students will analyze a company's current position, identify problematic areas, develop insights for decision-making, develop compelling visuals and dashboards, build scenarios, and work collaboratively with companies (subject to availability). The hands-on approach enables students to build on existing knowledge on analytics to develop specific skills in using market-leading software. In addition, students will have the opportunity to use their own data for analysis in their focus areas. Pre-Requisite: Descriptive Analytics. (2-4 quarter hours)

DA 350 | QUALITATIVE ANLYTICS | 2-4 quarter hours
(Undergraduate)
While analytics often imply the use of predictive models, research problems do not always allow researchers to use quantitative methods. In this course, we look at problems that require a qualitative approach through an introduction to qualitative methods, hands on analysis of qualitative data, and discussion of ethics involved in empirical inquiry. (2-4 quarter hours)

Design (DES)

DES 111 | DRAWING FOR DESIGNERS I | 2 quarter hours
(Undergraduate)
The first in a 3 quarter sequence of general drawing courses. An introduction to composition, line, and rendering in black and white media. Students will develop technical skills of drawing to enable them to express their ideas visually. The course will cover techniques and materials used for documentation of designs, including perspective, spatial understanding, and figure drawing. Drawing exercises will be combined with critiques, discussions, and demonstrations. Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

DES 112 | DRAWING FOR DESIGNERS II | 2 quarter hours
(Undergraduate)
The second in a 3 quarter sequence of general drawing courses. An introduction to composition, line, and rendering in black and white media. Students will develop technical skills of drawing to enable them to express their ideas visually. The course will cover techniques and materials used for documentation of designs, including perspective, spatial understanding, and figure drawing. Drawing exercises will be combined with critiques, discussions, and demonstrations. (Status as a Wig & Makeup Design Major) or (DES 111 and status as an Undergraduate or Graduate Theatre student) or (DES 111 and a Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

DES 113 | DRAWING FOR DESIGNERS III | 2 quarter hours
(Undergraduate)
The third in a 3 quarter sequence of general drawing courses. An introduction to composition, line, and rendering in black and white media. Students will develop technical skills of drawing to enable them to express their ideas visually. The course will cover techniques and materials used for documentation of designs, including perspective, spatial understanding, and figure drawing. Drawing exercises will be combined with critiques, discussions, and demonstrations. DES 112 and status as a Theatre School Undergraduate or Graduate student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

DES 141 | ELEMENTS OF DESIGN | 4 quarter hours
(Undergraduate)
The course will develop and strengthen abilities to observe, visualize, and visually communicate conceptual ideas through design problem solving. Students will develop an understanding of how design principles create meaning in performance based art forms. Assignments will stimulate and refine intuitive design sensibilities and skills relative to the elements of design and composition. Project work will explore various 2-D and 3-D means of visual communication. Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

DES 142 | PRINCIPLES OF DESIGN | 4 quarter hours
(Undergraduate)
The course will develop and strengthen abilities to observe, visualize, and visually communicate conceptual ideas through design problem solving. Students will develop an understanding of how design principles create meaning in performance based art forms. Assignments will stimulate and refine intuitive design sensibilities and skills relative to the elements of design and composition. Project work will explore various 2-D and 3-D means of visual communication. DES 141 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

DES 143 | SCRIPT ANALYSIS | 4 quarter hours
(Undergraduate)
A study of theatre text analysis. Using dramatic literature from naturalism to the avant garde, students will dissect how plays work structurally with an eye toward design and technology. (Status as a Theatre Undergraduate or Graduate student) or (DES 111 and status as an Undergraduate or Graduate Theatre student) or (DES 111 and a Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

DES 208 | SOUND DESIGN I | 4 quarter hours
(Undergraduate)
Fundamentals of Sound Design - This introductory course teaches the fundamentals of how to approach the artistry of sound design through the understanding of the physics of sound, and the tools by which you will manipulate it. It is recommended that you have some knowledge of computer sound software programs. Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 209 | SOUND DESIGN I | 4 quarter hours  
(Undergraduate)  
History of Music and Implementation of Sound to Visual - Students will learn the history of sound design, and how music and the recording of sound has changed from 1400 to present day. Students will apply practical knowledge from the prior quarter to form and apply soundscapes to visual images.  
DES 208 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 210 | SOUND DESIGN I | 4 quarter hours  
(Undergraduate)  
Design Organization and Script Analysis - An in depth exploration with the process of creating a sound design for a specific script. The students will learn how to analyze the script for sound design, create the cues for the script, and learn the process of how to approach a concept and see it through to its final design.  
DES 209 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 215 | WIG & MAKEUP DESIGN AND TECHNOLOGY 1 | 4 quarter hours  
(Undergraduate)  
First in a three course sequence. Introduction to the study of facial anatomy, chiaroscuro, and color theory as it applies to makeup design and application for theatre and film. Corrective and age makeup, contour and expression, texturing techniques, and basic injury-makeup are explored. Testing makeup's ability to read under stage lights of varying intensity/color and discussions of how makeup reads onstage in a variety of venues. A whimsical or animal-based makeup design with training in using Aquacolor and cream makeup will be a final project.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 216 | WIG & MAKEUP DESIGN AND TECHNOLOGY 1 | 4 quarter hours  
(Undergraduate)  
Second in a three-course sequence. An introduction to basic makeup prosthetics, adhesives, and three-dimensional makeup techniques such as wax, nose putty, and latex. Techniques used for eyebrow blocking and reshaping explored. Use of crepe hair to build brows and mustaches. Advanced study in injury makeup, in addition to the study of various stage blood and delivery systems. Beginning training in hair ventilation techniques. Special topics in cultural theatrical makeup practices. Final project will consist of a fantasy makeup design and application.  
DES 215 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 217 | WIG & MAKEUP DESIGN AND TECHNOLOGY 1 | 4 quarter hours  
(Undergraduate)  
Third course in a three-course sequence. Makeup and hair design in conjunction with script and character analysis explored. Stylized makeup will be studied. Introduction to high definition/film makeup techniques. Training in wig prep and application techniques, including pin curling and pin curl alternatives. Wig roller sets, pinning on a wig, and applying facial hair. Head wraps and tracings for ventilation patterning will be created. Students will create a mustache from scratch. Introduction to cultural and period makeup techniques.  
DES 216 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 220 | INTRODUCTION TO COSTUME DESIGN | 4 quarter hours  
(Undergraduate)  
An introduction to costume design for the stage. Students will explore costume silhouette and detail as it relates to the elements and principles of design. Students will learn the steps in a typical design process for costume design, including script analysis, research, and paperwork.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 230 | PROJECTION DESIGN I | 4 quarter hours  
(Undergraduate)  
First course in three course sequence. An introduction to the methods of projection design, with exposure to both historical and contemporary practice. The development and communication of projection, video and media ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.  
DES 230 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 231 | PROJECTION DESIGN I | 4 quarter hours  
(Undergraduate)  
Second course in three course sequence. An introduction to the methods of projection design, with exposure to both historical and contemporary practice. The development and communication of projection, video and media ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.  
DES 231 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 232 | PROJECTION DESIGN I | 4 quarter hours  
(Undergraduate)  
Third course in three course sequence. An introduction to the methods of projection design, with exposure to both historical and contemporary practice. The development and communication of projection, video and media ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.  
DES 232 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.
DES 242 | SCENE DESIGN I | 4 quarter hours (Undergraduate)
Second of a 3-course sequence. An introduction to the methods of scenic design, with exposure to both historical and contemporary practice. Students become familiar with the mechanical aspects of scenery and stages, and assimilate the principles of design and the technical requirements of a script into a fully developed scene design.

DES 241 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 243 | SCENE DESIGN I | 4 quarter hours (Undergraduate)
Third of a 3-course sequence. An introduction to design research techniques and use of research in creating, and detailing, environments that reflect a particular period.

TEC 152 & DES 143 and status as a Theatre School undergraduate or graduate student (or concentration in Production Design in the School for Cinematic Arts) are prerequisites for this course.

DES 244 | COSTUME DESIGN I | 4 quarter hours (Undergraduate)
First of a 3-course sequence. An introduction to costume design. Students will explore the design process, costume silhouette and detail, and script and character analysis.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 245 | COSTUME DESIGN I | 4 quarter hours (Undergraduate)
Second of a 3-course sequence. An introduction to costume design. Students will explore the design process, costume silhouette and detail, and script and character analysis within the context of historical theatrical costuming.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 246 | COSTUME DESIGN I | 4 quarter hours (Undergraduate)
Third of a 3-course sequence. An introduction to costume design. Students will explore the design process, costume silhouette and detail, and script and character analysis within the context of historical theatrical costuming.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 247 | LIGHTING DESIGN I | 4 quarter hours (Undergraduate)
First course in a 3 course sequence. The development and communication of lighting ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 143 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 248 | LIGHTING DESIGN I | 4 quarter hours (Undergraduate)
Second course in a 3 course sequence. The development and communication of lighting ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 247 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 249 | LIGHTING DESIGN I | 4 quarter hours (Undergraduate)
Third course in a 3 course sequence. The development and communication of lighting ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 248 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 250 | MATERIALS AND PROCESSES | 4 quarter hours (Undergraduate)
Students will become familiar with both the general concept of theatrical production and the specifics at The Theatre School. Students will also be introduced to the most common scenic construction materials, their strengths, limitations, and the tools used to manipulate these materials. Students will understand and practice the safety procedures of TTS production spaces while demonstrating proficiency with shop tools and equipment sufficient to complete construction assignments.

Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

DES 252 | SCENOGRAPHIC DRAFTING | 3 quarter hours (Undergraduate)
First course in a 2 course sequence. With an emphasis on practical work in substantial projects, students learn the organization of the technical documentation of scenery. Scenic drafting conventions are studied and applied to the comprehensive communication of a design.

TEC 153 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

DES 253 | SCENOGRAPHIC DRAFTING | 3 quarter hours (Undergraduate)
Second course in a 2 course sequence. With an emphasis on practical work in substantial projects, students learn the organization of the technical documentation of scenery. Scenic drafting conventions are studied and applied to the comprehensive communication of a design.

DES 252 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

DES 260 | GLOBAL HISTORY OF COSTUME, HAIR, AND MAKEUP | 4 quarter hours (Undergraduate)
Students will become familiar with the most important historical movements in costuming and will be introduced to the most common scenic construction materials, their strengths, limitations, and the tools used to manipulate these materials. Students will understand and practice the safety procedures of TTS production spaces while demonstrating proficiency with shop tools and equipment sufficient to complete construction assignments.

Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

DES 261 | GLOBAL HISTORY OF COSTUME, HAIR, AND MAKEUP | 4 quarter hours (Undergraduate)
3) Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 260 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 271 | DESIGN PRODUCTION PRACTICE I | 3 quarter hours (Undergraduate)
First course in a 3 course sequence. Design students do practical work on planning, constructing, rigging, painting, crewing, and running of productions. Areas may include scenery, costumes, lighting, or sound. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 272 | DESIGN PRODUCTION PRACTICE I | 3 quarter hours
(Undergraduate)
Second course in a 3 course sequence. Design students do practical work on planning, constructing, rigging, painting, crewing, and running of productions. Areas may include scenery, costumes, lighting, or sound. (3 quarter hours)
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 273 | DESIGN PRODUCTION PRACTICE II | 3 quarter hours
(Undergraduate)
Third course in a 3 course sequence. Design students do practical work on planning, constructing, rigging, painting, crewing, and running of productions. Areas may include scenery, costumes, lighting, or sound. (3 quarter hours)
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 284 | MODEL BUILDING | 3 quarter hours
(Undergraduate)
The course focuses on creating professional quality scale models of stage scenery. Students will learn to work with a variety of materials (foamcore, board, paper, wood, and metal, and appropriate glues), will find sources for scale furnishings, and will learn a variety of techniques such as soldering and casting.

DES 113, DES 143, TEC 152 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

DES 285 | MEDIA FOR DESIGNERS | 3 quarter hours
(Undergraduate)
An advanced level class on rendering skills with different media: Charcoal Graphite. Pastels/Color pencils and Water Color/Acrylic/Acrylic markers. These will be practically explored in the classroom within a project context, and will be geared towards developing an advanced, refined and individual method of communicating design ideas and concepts.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 286 | FIGURE DRAWING FOR THEATRE | 4 quarter hours
(Undergraduate)
By creating drawings from live models, students will learn about body structure and musculature, and will develop their skills in figure drawing, and ‘drawing what you see’.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 290 | PORTRAITURE FOR THE WIG AND MAKEUP ARTIST | 4 quarter hours
(Undergraduate)
In-depth study of the head, face, and hair through drawing from live models. Focus of study is on anatomy and multiple forms of artistic medium are explored. Theatrical lighting and its effect on facial features will be explored alongside the illusion created by makeup applied on the model.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 308 | SOUND DESIGN II | 4 quarter hours
(Undergraduate)
Analysis and Psychoacoustics - Delving into the why and than the how of the choices we make in sound design students learn how to bring an audience on an emotional journey through psychoacoustics and analysis of a specific script. Guest directors are present to aid in the students’ understanding of communication of their ideas.
DES 210 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 309 | SOUND DESIGN II | 4 quarter hours
(Undergraduate)
Intro to Composition - Students will learn both simple and advanced methods of music composition using MIDI, hardware and software samplers and keyboards. Students will create several pieces of composed music including scores for theatre and film and integrate other learned skills to create sound designs for both published and new plays.
DES 308 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 310 | SOUND DESIGN II | 4 quarter hours
(Undergraduate)
Advanced Design and Technology - An advanced look at sound design and how to implement it with greater understanding. Advanced paperwork and advanced analysis of plays from the canonical work to new plays. Guests are invited to give a range of implementation ideas that students can learn from.
DES 309 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 315 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 316 | WIG & MAKEUP DESIGN AND TECHNOLOGY 2 | 4 quarter hours
(Undergraduate)
The first course in a three-course sequence. Wig and facial hair ventilation and styling techniques. Specialized training in the techniques used to create realistic facial hair. Study of the natural hair growth and patterns, along with study of hair of various ethno-profiles. Techniques for cutting, styling, and coloring. Advanced period makeup techniques will be explored in concert with historical hairstyles and facial hair grooming techniques. Script analysis, visual research, and design of wigs, hair, and makeup for theatrical text will be explored.
DES 217 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 315 | WIG & MAKEUP DESIGN AND TECHNOLOGY 2 | 4 quarter hours
(Undergraduate)
The second course in a three-course sequence. Wig and facial hair ventilation and styling techniques. Specialized training in the techniques used to create realistic facial hair. Study of the natural hair growth and patterns, along with study of hair of various ethno-profiles. Techniques for cutting, styling, and coloring. Advanced period makeup techniques will be explored in concert with historical hairstyles and facial hair grooming techniques. Script analysis, visual research, and design of wigs, hair, and makeup for theatrical text will be explored.
DES 315 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.
DES 317 | WIG & MAKEUP DESIGN AND TECHNOLOGY 2 | 4 quarter hours (Undergraduate)
The third course in a three-course sequence. Wig and facial hair ventilation and styling techniques. Specialized training in the techniques used to create realistic facial hair. Study of the natural hair growth and patterns, along with study of hair of various ethno-profiles. Techniques for cutting, styling, and coloring. Advanced period makeup techniques will be explored in concert with historical hairstyles and facial hair grooming techniques. Script analysis, visual research, and design of wigs, hair, and makeup for theatrical text will be explored.

DES 316 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 320 | ADVANCED MAKEUP | 3 quarter hours (Undergraduate)
In this course students will design a character makeup involving both facial prosthetics and ventilated hair. Three types of facial prosthetics are produced: silicone, foamed latex and slush molded latex. Face casting, clay sculpting and mold making are taught as steps to creating the final prosthetic. A ventilated hair piece is produced with attention to techniques of pattern making, hair processing, ventilating and hair dressing. Painting techniques are reviewed as final makeup is put together. Each year the class will choose one "extra" technique to pursue. Past pursuits have been: Kabuki Makeup with Kabuki master Shozo Sato, Tooth casting and stage teeth. (3 quarter hours)
PRF 214, 215 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 330 | PROJECTION DESIGN 2 | 4 quarter hours (Undergraduate)
First course in three course sequence. Basic techniques are incorporated into a comprehensive approach to projection design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of production designs. Students will demonstrate familiarity and skill in the use of equipment, cueing and playback, and the exploration of projection as character.

DES 232, TEC 232 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 331 | PROJECTION DESIGN 2 | 4 quarter hours (Undergraduate)
Second course in three course sequence. Basic techniques are incorporated into a comprehensive approach to projection design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of production designs. Students will demonstrate familiarity and skill in the use of equipment, cueing and playback, and the exploration of projection as character.

DES 330 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 332 | PROJECTION DESIGN 2 | 4 quarter hours (Undergraduate)
Third course in three course sequence. Basic techniques are incorporated into a comprehensive approach to projection design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of production designs. Students will demonstrate familiarity and skill in the use of equipment, cueing and playback, and the exploration of projection as character.

DES 331 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 340 | TOPICS: ADVANCED LIGHTING TECHNOLOGY | 4 quarter hours (Undergraduate)
Rotating instruction in advanced lighting technology includes: types of intelligent lighting fixtures, LED fixtures, computer control consoles (types and programming), and visualizer programs as well as their integration into theatrical design. Additional topics covered are concert/live event lighting design including: professional practice and protocols, equipment, rigging, consoles and documentation of those designs.

DES 240 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 341 | SCENE DESIGN II | 4 quarter hours (Undergraduate)
First course in a 3 course sequence. Basic techniques are incorporated into a comprehensive approach to scene design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of stage designs.

DES 243 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 342 | SCENE DESIGN II | 4 quarter hours (Undergraduate)
Second course in a 3 course sequence. Basic techniques are incorporated into a comprehensive approach to scene design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of stage designs.

DES 341 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 344 | COSTUME DESIGN II | 4 quarter hours (Undergraduate)
First course in a 3 course sequence. Lectures and projects in costume design for the modern drama, specifically from realism through 21st century styles. Design projects include script interpretation, rendering techniques, budgets, and fabric selections.

DES 246 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 345 | COSTUME DESIGN II | 4 quarter hours (Undergraduate)
Second course in a 3 course sequence. Lectures and projects in costume design for the modern drama. Design projects include team collaboration, script interpretation, rendering techniques, budgets, and fabric selections.

DES 344 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 346 | COSTUME DESIGN II | 4 quarter hours  
(Undergraduate)
Third course in a 3 course sequence. Lectures and projects in costume design for the modern drama, specifically from realism through 21st century styles. Design projects include script interpretation, rendering techniques, budgets, and fabric selections.

DES 345 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 347 | LIGHTING DESIGN II | 4 quarter hours  
(Undergraduate)
First course in a 3 course sequence. The implementation of lighting ideas. Practice in the translation of lighting ideas into actual designs. Light pads, lighting paperwork, Vectorworks, the use of equipment and the exploration of realistic lighting styles.

DES 349 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 348 | LIGHTING DESIGN II | 4 quarter hours  
(Undergraduate)
Second course in a 3 course sequence. The implementation of lighting ideas. Practice in the translation of lighting ideas into actual designs. Light pads, lighting paperwork, Vectorworks, the use of equipment and the exploration of realistic lighting styles.

DES 347 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 349 | LIGHTING DESIGN II | 4 quarter hours  
(Undergraduate)
Third course in a 3 course sequence. The implementation of lighting ideas. Practice in the translation of lighting ideas into actual designs. Light pads, lighting paperwork, Vectorworks, the use of equipment and the exploration of realistic lighting styles.

DES 348 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 361 | THEATRICAL COLLABORATION | 3 quarter hours  
(Undergraduate)
An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects. (3 quarter hours)

Status as a 2nd, 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

DES 362 | THEATRICAL COLLABORATION | 3 quarter hours  
(Undergraduate)
An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects. (3 quarter hours)

Status as a 2nd, 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

DES 371 | DESIGN PRODUCTION PRACTICE II | 4 quarter hours  
(Undergraduate)
First course in a 3 course sequence. For all design students. Through demonstration, discussion, lecture, and projects, students explore thAssignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 372 | DESIGN PRODUCTION PRACTICE II | 4 quarter hours  
(Undergraduate)
Second course in a 3 course sequence. For all design students. Through demonstration, discussion, lecture, and projects, students explore thAssignments will be commensurate with ability and experience.

DES 371 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 373 | DESIGN PRODUCTION PRACTICE II | 4 quarter hours  
(Undergraduate)
Third course in a 3 course sequence. For all design students. Demonstration, discussion, lecture, and projects. Assignments will be commensurate with ability and experience.

DES 372 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 384 | RENDERING FOR DESIGNERS I | 3 quarter hours  
(Undergraduate)
First course in a 3 course sequence. Using color pencils, pastel and markers, the fundamentals of drawing will be explored with primary emphasis on working from observation. The course develops insights in the mechanisms of visual perception, how the individual components of the drawing relate to the whole and compositional organization. Each student works to represent accurately and proportionately objects, planes, and volumes in color by developing hand-to-eye coordination with line and tone and color.

DES 113 or DES 286 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

DES 385 | RENDERING FOR DESIGNERS II | 3 quarter hours  
(Undergraduate)
Second course in a 3 course sequence. Using color pencils, pastel and markers, the fundamentals of drawing will be explored with primary emphasis on working from observation. The course develops insights in the mechanisms of visual perception, how the individual components of the drawing relate to the whole and compositional organization. Each student works to represent accurately and proportionately objects, planes, and volumes in color by developing hand-to-eye coordination with line and tone and color.

DES 384 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

DES 386 | RENDERING FOR DESIGNERS III | 3 quarter hours  
(Undergraduate)
Third course in a 3 course sequence. Using color pencils, pastel and markers, the fundamentals of drawing will be explored with primary emphasis on working from observation. The course develops insights in the mechanisms of visual perception, how the individual components of the drawing relate to the whole and compositional organization. Each student works to represent accurately and proportionately objects, planes, and volumes in color by developing hand-to-eye coordination with line and tone and color.

DES 385 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.
DES 388 | SCENE PAINTING | 2 quarter hours (Undergraduate)
First course in a 3 course sequence. Discussion of the formulation and handling of scene paints and dyes, brushes and tools, and techniques. Practical laboratory work in problems of the realistic representation of a variety of textures and materials at scenic scale. (2 quarter hours)
Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

DES 389 | SCENE PAINTING | 2 quarter hours (Undergraduate)
Second course in a 3 course sequence. Discussion of the formulation and handling of scene paints and dyes, brushes and tools, and techniques. Practical laboratory work in problems of the realistic representation of a variety of textures and materials at scenic scale leads to fully developed illusionistic and pictorial stage scenery. (2 quarter hours)
Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

DES 408 | SCENE PAINTING | 2 quarter hours (Undergraduate)
Third course in a 3 course sequence. Discussion of the formulation and handling of scene paints and dyes, brushes and tools, and techniques. Practical laboratory work in problems of the realistic representation of a variety of textures and materials at scenic scale leads to fully developed illusionistic and pictorial stage scenery. (2 quarter hours)
DES 388 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 409 | SOUND DESIGN III | 4 quarter hours (Undergraduate)
Senior Capstone - Focusing on the individual student and their requested field of study. Students choose what they wish to learn to create a more specialized approach to the individual's specific skills. The student outlines their own curriculum in an area in which they wish further research or study.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 410 | SOUND DESIGN III | 4 quarter hours (Undergraduate)
Different Careers in Sound Design - Each week will be an introduction to different careers possible within the field of Sound Design. This course will contain guest lectures from professional designers who specialize in each field. Allowing students to narrow their focus to what they wish to achieve after they graduate.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 415 | WIG & MAKEUP DESIGN AND TECHNOLOGY 3 | 4 quarter hours (Graduate)
First course in a three-course sequence. Students will explore advanced ventilating techniques, including developing wig foundations and advanced hand tying/wefting. Exploration in non-traditional materials and fantasy design for both wigs and makeup. The analysis of scripts and development of a design concept are studied through projects in contrasting styles of production design, including design for film and other various entertainment media. The business side of wig and makeup design will be explored, including budgeting for materials and labor. As a corollary, portfolio and resume building is developed.
DES 317 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 416 | WIG & MAKEUP DESIGN AND TECHNOLOGY 3 | 4 quarter hours (Graduate)
Second course in a three-course sequence. Students will explore advanced ventilating techniques, including developing wig foundations and advanced hand tying/wefting. Exploration in non-traditional materials and fantasy design for both wigs and makeup. The analysis of scripts and development of a design concept are studied through projects in contrasting styles of production design, including design for film and other various entertainment media. The business side of wig and makeup design will be explored, including budgeting for materials and labor. As a corollary, portfolio and resume building is developed.
DES 415 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 417 | WIG & MAKEUP DESIGN AND TECHNOLOGY 3 | 4 quarter hours (Graduate)
Third course in a three-course sequence. Students will explore advanced ventilating techniques, including developing wig foundations and advanced hand tying/wefting. Exploration in non-traditional materials and fantasy design for both wigs and makeup. The analysis of scripts and development of a design concept are studied through projects in contrasting styles of production design, including design for film and other various entertainment media. The business side of wig and makeup design will be explored, including budgeting for materials and labor. As a corollary, portfolio and resume building is developed.
DES 416 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 430 | PROJECTION DESIGN 3 | 4 quarter hours (Undergraduate)
First course in three course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres; including designs for the classical and modern drama, opera, architecture, installation art and the ballet. As a corollary, portfolios of a professional caliber are developed. Students will show competency in synthesizing their design and technical skills in projects that expand beyond theatre. They will create and be practiced in sharing a portfolio of their design work.
DES 332 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.
DES 431 | PROJECTION DESIGN III | 4 quarter hours
(Undergraduate)
Second course in a three course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres; including designs for the classical and modern drama, opera, architecture, installation art and the ballet. As a corollary, portfolios of a professional caliber are developed. Students will show competency in synthesizing their design and technical skills in projects that expand beyond theatre. They will create and be practiced in sharing a portfolio of their design work.

DES 430 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 432 | PROJECTION DESIGN III | 4 quarter hours
(Undergraduate)
Third course in a three course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres; including designs for the classical and modern drama, opera, architecture, installation art and the ballet. As a corollary, portfolios of a professional caliber are developed. Students will show competency in synthesizing their design and technical skills in projects that expand beyond theatre. They will create and be practiced in sharing a portfolio of their design work.

DES 431 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 441 | SCENE DESIGN III | 4 quarter hours
(Undergraduate)
First course in a 3 course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres; including designs for the classical and modern drama, opera, and the ballet. As a corollary, portfolios of a professional caliber are developed.

DES 343 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 442 | SCENE DESIGN III | 4 quarter hours
(Undergraduate)
Second course in a 3 course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres; including designs for the classical and modern drama, opera, and the ballet. As a corollary, portfolios of a professional caliber are developed.

DES 441 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 443 | SCENE DESIGN III | 4 quarter hours
(Undergraduate)
Third course in a 3 course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres; including designs for the classical and modern drama, opera, and the ballet. As a corollary, portfolios of a professional caliber are developed.

DES 442 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 444 | COSTUME DESIGN III | 4 quarter hours
(Undergraduate)
First course in a 3 course sequence. Costume design for the diverse styles of the pre-modern drama evolving through lecture and project work. Projects will include script interpretation, developing a professional portfolio, discussions on career planning, and the exploration of design for a classical text.

DES 346 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 473 | DESIGN PRODUCTION PRACTICE III | 5 quarter hours  
(Undergraduate)  
For all design students. Assignments will be commensurate with ability and experience. (5 quarter hours)  
**Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.**

DES 484 | PHOTOSHOP FOR DESIGNERS | 3 quarter hours  
(Undergraduate)  
Students will work through the process of creating professional renderings of stage scenery, costumes, and lighting, by using Photoshop to manipulate and transform their original sketches. Through this process, the students will master the tools available in Photoshop, and will create portfolio-ready rendering works.  
**Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.**

DES 485 | PROJECTION DESIGN | 3 quarter hours  
(Undergraduate)  
Students are provided with basic design concepts, techniques and skills in the use of projection design for theatre. The course focuses on conceiving motion and still images for projection, communicating those ideas to the design team through story boards, and realizing those ideas through the use of Isadora video control software.  
**Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.**

DES 486 | PORTFOLIO PREPARATION | 3 quarter hours  
(Undergraduate)  
Students will work on developing a professional portfolio that showcases their design work to best advantage. Students will develop a consistent presentation style and will rework projects as necessary to increase the quality of their portfolio.  
**Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.**

DES 490 | DESIGN INTERNSHIP | 5 quarter hours  
(Undergraduate)  
The internship provides the student with an opportunity to learn by working with experienced professionals in an area related to his/her area of study at The Theatre School. (5 quarter hours)  
**Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.**

DES 641 | THEATRICAL COLLABORATION | 3 quarter hours  
(Graduate)  
An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects. (3 quarter hours)  
**Status as a 2nd, 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.**

DES 642 | THEATRICAL COLLABORATION | 3 quarter hours  
(Graduate)  
An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects. (3 quarter hours)  
**Status as a 2nd, 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.**

Digital Humanities (DHS)

DHS 410 | INTRO TO VISUAL COMMUNICATIONS PRINCIPLES | 4 quarter hours  
(Graduate)  
This course introduces visual communication principles including, but not limited to, typography, color, movement and composition for print and screen applications. Students will create multiple projects and participate in class critiques to help build industry specific vocabulary, critical assessment, and familiarity with presenting creative work. Relevant creative methodologies and software used to prepare media for print and digital applications will also be covered. **PREREQUISITE(S): None.**

DHS 500 | INTRODUCTION TO DIGITAL HUMANITIES | 4 quarter hours  
(Graduate)  
An introduction to tools and methods in digital humanities.

Digital Media Arts (DMA)

DMA 402 | INTRO TO VISUAL COMMUNICATIONS PRINCIPLES | 4 quarter hours  
(Graduate)  
This course introduces visual communication principles including, but not limited to, Adobe Illustrator, Photoshop, InDesign, and website building tools (CMS), like Wordpress or Squarespace. Throughout the course, students will use these tools to create a personal portfolio website. **PREREQUISITE(S): None.**

DMA 405 | INTRO TO VISUAL COMMUNICATION TOOLS | 4 quarter hours  
(Graduate)  
This course introduces visual communication tools including, but not limited to, professional design software, digital media applications, and a deep understanding of graphic design principles and practices. Students will work on developing basic skills in the use of Adobe Creative Suite, and the intersection with moving technologies. Students will have the opportunity to produce sophisticated printed matter on state-of-the-art printing equipment or digital presentation for the web, screen or mobile devices. **PREREQUISITE(S): None.**
DMA 415 | AUDIO WORKSHOP | 4 quarter hours
(Graduate)
This course is an introduction to the world of interactive audio communication for multimedia. Students will study various uses of sound and music on stand-alone applications, mobile devices, and the internet. Students will learn to create and edit podcasts, deliver multimedia presentations, upload audio in various standard formats and attach audio files to social media platforms. Emerging hardware and software technologies will also be introduced. The course will also cover current trends and legalities of digital media. PREREQUISITE(S): None.

DMA 420 | DIGITAL MEDIA ARTS SURVEY | 4 quarter hours
(Graduate)
Introduces the field of Digital Media through a weekly focus on various media arts themes (for example, UX, video production, design management, etc.). Panel discussions where faculty members and industry professionals will share their work and answer questions will occur weekly. This class encourages students to clarify their course of study and build connections with faculty, professionals, and students with similar interests. In addition to panel discussions, students will also complete a series of trend reports and presentations that align with the weekly themes. PREREQUISITE(S): None.

DMA 425 | STILL IMAGE WORKSHOP | 4 quarter hours
(Graduate)
This course develops and expands the digital imaging skills introduced in the introductory class (DC 225), with a specific focus on their application in contemporary photographic practice. Advanced color correction, retouching, and compositing techniques are covered and complemented by further development of digital capture (scanning and digital cameras) and printing techniques. Assignments incorporate the technical aspects of specific skills while emphasizing their conceptual application. Digital acquisition and output utilizes ever-changing technology providing an understanding of advanced digital workflow and new processes as they apply to individual artistic practice. Students gain a wealth of technical understanding on topics such as color calibration and device profiling, file types and file management, and advanced color correction terms and techniques (gamma, color space, raster image processing and profile printing). Output methodologies and materials, including dye-based and pigment-based color inkjet prints, carbon-based black and white inkjet prints, digital color coupler printing, and a variety of experimental materials are explored. Assignments facilitate students' research and exploration of new techniques in the conception and production of their own work. PREREQUISITE(S): None.

DMA 445 | 360 VIDEO PRODUCTION | 4 quarter hours
(Graduate)
This class will focus on the development, production and post-production of live-action 360 video. The medium of virtual reality will be analyzed within the context of the evolution of time-based and interactive media. Experimental projects will offer students the opportunity to tell stories in new ways while exploring the affordances and challenges of the evolving medium.

DMA 475 | MOVING IMAGE WORKSHOP | 4 quarter hours
(Graduate)
This course introduces students to more sophisticated forms of image/sound manipulation, editing, and theory. Pre-production planning (storyboards, scripting, budgeting), further refinement of digital editing techniques, and basic post-production/visual effects are covered, as well as studio production techniques, such as chroma-keying and work with advanced cameras. Students are expected to achieve a level of technical competence and confidence necessary to undertake more ambitious independent work. The class views and discusses key contemporary works and related critical writings. PREREQUISITE(S): None.

DMA 480 | WEB/MEDIA DELIVERY WORKSHOP | 4 quarter hours
(Graduate)
This course is an intensive exploration of the opportunities and constraints of social media platforms for the distribution and curation of digital media artifacts. We will explore both commercial and academic platforms to develop an understanding of how different designs support different models of curation and distribution. As a project, students will select 2 platforms and create original digital installations using media they have authored in order to examine how the design of a social media platform influences how audiences interact with their installations. PREREQUISITE(S): None.

DMA 490 | PORTFOLIO | 4 quarter hours
(Graduate)
This course assists students preparing to enter the job market and emphasizes assembling a professional quality portfolio through workshops on advanced modeling and rendering techniques, visual composition, portfolio layout, design communication and presentation skills. Portfolio reviews by invited professionals are an integral component of this course. PREREQUISITE(S): None.

DMA 495 | SPECIAL TOPICS IN DIGITAL MEDIA ARTS WORKSHOP | 1-4 quarter hours
(Graduate)
Specific topics selected by the instructor. Topic varies with teach offering. Contact instructor for more information. Credit counts towards DMA Advanced Workshop requirement. Prerequisite(s): See syllabus.

DMA 521 | DESIGN MANAGEMENT WORKSHOP | 4 quarter hours
(Graduate)
In this course students learn to infuse design thinking into the business strategies of organizations, develop creative leadership, and refine project management planning skills. Based on a topic selected for the class, the outcome of the design process is manifested in a concept that satisfies the needs of the customer, market, producer and organization. Through documentation and a formal project presentation, students demonstrate their understanding of the design process and resolution of conflicting issues related to innovation and delivering digital media. PREREQUISITE(S): None.

DMA 525 | FOUNDATION OF DIGITAL MEDIA | 4 quarter hours
(Graduate)
This introductory course will provide students with a detailed practical introduction to the technological practices, skills, and tools of digital communication. Students will engage with digital technology with the goals of learning and practicing technical skills across a range of technologies, including video, audio, graphic design, and human-computer interaction. Students work with still images, moving images and sound using integrated digital media applications. The course focuses on the technical, social and cultural competencies required to traverse media in online convergence environments. This class provides students a hands-on approach to digital communication. This course will also prepare students to work with digital technology at future jobs.
DMA 527 | CREATIVE PROCESS AND STRATEGY | 4 quarter hours  
(Graduate)
This course focuses on developing a creative process rooted in iteration, exploration and user-centered methodologies. Students will develop project concepts following the steps of research, analysis, ideation and prototyping to help establish an understanding of strategic creative planning and management. Concept documentation and critical assessment will also be practiced through regular class presentations and critiques. Students will explore and experiment with their own creative processes throughout the course.

DMA 405 is a prerequisite for this class.

DMA 530 | DESIGN THINKING AND STORYTELLING | 4 quarter hours  
(Graduate)
The course is an exploration of design as a form of storytelling. Design thinking and the human-centered design process will be examined, practiced and employed over the course of the quarter, culminating in a significant project. Groups will develop their quarter-long projects by utilizing the tools and approaches of design thinking through the lens of interactive design. Students learn the basics of conceptualizing for interactive media as well as gain proficiencies in using various tools to create interactive experiences.

DMA 535 | STORYTELLING ACROSS MEDIA | 4 quarter hours  
(Graduate)
This course introduces students to the theory and practice of multi-modal storytelling, i.e. the strategic use of two or more communication modes to make meaning, such as image, gesture, music, spoken and written language. While the application areas of storytelling may remain the same - from artistic expression to advertising, PR, journalism, documentary, activism and other persuasive forms - our means of meaning making are changing dramatically due to technological innovation, availability of digital media production tools, and the potential of immediate and universal online publication. Changing technological affordances demand an increased media literacy that includes a deep understanding of the specific strengths and weaknesses of various communication modes and their manifestation in digital media formats, so we can leverage them intentionally to create impactful, cohesive and emotionally compelling multi-modal texts and trans-media stories.
DNA 525 is a prerequisite for this class.

DMA 555 | DIGITAL MEDIA STUDIO | 4 quarter hours  
(Graduate)
Students explore studio-based collaborative creation of media arts projects and work processes. The course will include different methods and approaches rather than a discipline-specific focus. Depending on student interest, the projects will include image production and design through animation, film, sound, design, interactivity and photography. The computer is used as a creative solution to producing innovative projects emphasizing the construction of a portfolio of work. PREREQUISITE(S): None.

DMA 599 | INDEPENDENT STUDY | 1-4 quarter hours  
(Graduate)
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. Prerequisite(s): Instructor and dean approval.

DMA 695 | THESIS I | 4 quarter hours  
(Graduate)
The thesis courses provide an opportunity for students to apply the skills they have learned to a professionally developed project of their interest. The project will be accompanied by a written analysis of the concept and documentation of the process. Students have the choice to work individually or in small teams. In Thesis I, students will be guided through in depth precedent and user research, surveying the field to develop a unique concept that will challenge their skills and understanding of the medium, while also seeking to contribute to the advancement of the field. Students will create a project plan and a series of prototypes and/or rough drafts to help develop and refine their concepts. Regular presentations with peers will be held weekly to prepare for a final concept presentation to a professional panel.

DMA 525 and DMA 527 are prerequisites for this class.

DMA 698 | THESIS II | 4 quarter hours  
(Graduate)
The thesis courses provide an opportunity for students to apply the skills they have learned to a professionally developed project of their interest. The project will be accompanied by a written analysis of the concept and documentation of the process. Students have the choice to work individually or in small teams. In Thesis II, students will work in a studio format to refine the concept developed in Thesis I. Concept development will consist of on-going analysis and critique of the concept through user/audience testing to result in creation of a professional quality digital media piece or high-fidelity prototype. Students will have regular presentations to prepare them to defend their final thesis project before a panel of faculty and industry professionals.

DMA 695 is a prerequisite for this class.

E-Commerce Technology (ECT)

ECT 250 | INTERNET, COMMERCE, AND SOCIETY | 4 quarter hours  
(Undergraduate)
An introduction of Internet technology, its application for commerce, and its social impact. This course surveys Internet technology, collaboration and commerce activities, digital media distribution, online communities, and social networking in the Internet environment.

ECT 310 | INTERNET APPLICATION DEVELOPMENT | 4 quarter hours  
(Undergraduate)
Development of Internet-based applications using client and server-side scripting. Students will design and build an Internet application that accesses a database.
CSC 211 (or IT 231 or CSC 241 or CSC 243) is a prerequisite for this class.

ECT 330 | ADVANCED INTERNET APPLICATION DEVELOPMENT | 4 quarter hours  
(Undergraduate)
This is a programming course focusing on advanced Internet technologies such as tiered design of Internet applications, transactions, creating components, and Web services.
(IT 211 or IT 231 or CSC 241 or CSC 243) is a prerequisite for this class.
ECT 355 | INTERNET SYSTEMS: COLLABORATION, COMMERCE, AND MEDIA | 4 quarter hours
(Undergraduate)
This course examines the application of Internet technology to support collaboration, commerce, and digital media distribution activities. It will focus on the latest technologies, new development models and their social impact. Students will explore different models and develop applications to support collaborative commerce.
ECT 310 (or ECT 330 or IT 232) is a prerequisite for this class.

ECT 360 | INTRODUCTION TO XML | 4 quarter hours
(Undergraduate)
An introduction to Extensible Markup Language (XML) and XML transformations. XML syntax, processing and validation. Namespaces. Transformations using XSLT and XPath. XML applications such as XHTML, RDF, SVG, XSL.
CSC 211 (or CSC 241 or CSC 243) is a prerequisite for this class.

ECT 355 | INTERNET SYSTEMS: COLLABORATION, COMMERCE, AND MEDIA | 4 quarter hours
(Undergraduate)
This course examines the application of Internet technology to support collaboration, commerce, and digital media distribution activities. It will focus on the latest technologies, new development models and their social impact. Students will explore different models and develop applications to support collaborative commerce.
ECT 310 (or ECT 330 or IT 232) is a prerequisite for this class.

ECT 424 OR CSC 435 OR NET 463 is a prerequisite for this class.

ECT 481 | INTERNET SUPPLY CHAIN MANAGEMENT | 4 quarter hours
(Graduate)
This course examines system architectures, technologies, approaches, and infrastructure requirements in the context of supply chain systems. The focus is on the design, development and implementation of systems that facilitate the collaboration of an enterprise with its buyers and suppliers. Topics include development of messaging-based collaboration framework with web services. Students will design and implement a collaborative extranet system component in team projects.
CSC 401 or IT 411 is a prerequisite for this class.

ECT 556 | ENTERPRISE ARCHITECTURE AND DESIGN | 4 quarter hours
(Graduate)
This is an advanced course on the design and planning of enterprise architecture that enables intra-/multi-enterprise collaboration and interoperability. The emphasis is on the alignment between IT and organizational objectives through the integration of business architectures, data and information architecture, application architecture, technology architecture, interfaces and infrastructure. Topics include frameworks, tools, and methodologies for enterprise architecture design; data and process modeling, application integration, implementation fundamentals, adaptability to changing organizational needs, and managing costs of implementation. Students will conduct case studies and develop architecture plans. Prerequisites: ECT 424 and SE 430. ECT 424 and SE 430 are prerequisites for this class.

ECT 565 | MOBILE ENTERPRISE | 4 quarter hours
(Graduate)
Mobile enterprise information systems are becoming increasingly complex and consist of existing systems with enabling middleware to achieve end-to-end enterprise mobile solutions. Mobile infrastructure performs content adaptation, data synchronization, bridging corporate and mobile messaging systems and support mobile information portals. The course will discuss web services oriented component architecture and system integration with Adaptive Application Architecture (AAA) with Wireless application gateway (WAG) and Multi-channel Access Gateways (MAG) supporting mobile and wireless access for heterogeneous devices. Such concepts as content distribution, connectivity and security, scalability and load balancing, device management will be discussed. Additional topics include Location-aware applications supporting mobile knowledge workers, business process for value contribution, and investment decisions on mobile technologies. Students will become familiar with mobile enterprise tool suites, mobile messaging delivery platforms, wireless Web portals. Students will be implementing mobile enterprise solution components.
ECT 455 is a prerequisite for this class.

ECT 582 | SECURE ELECTRONIC COMMERCE | 4 quarter hours
(Graduate)
This course studies security requirements, threat modeling, and appropriate safeguards for e-commerce systems. Major topics include web application security, web service security, and web server security. ECT 424 OR CSC 435 OR NET 463 is a prerequisite for this class.

ECT 583 | ADVANCED SCRIPTING TECHNOLOGIES | 4 quarter hours
(Graduate)
This course focuses on applying advanced scripting technologies in the design and development of large Web applications. Major topics include tiered application design, transacted Web applications, components, and Web services.
CSC 401 or IS 411 or IT 411 is a prerequisite for this class.
ECT 586 | CUSTOMER RELATIONSHIP MANAGEMENT TECHNOLOGIES | 4 quarter hours (Graduate)
An in-depth study of customer relationship management (CRM) technologies and applications. The special focus will be on the application of CRM technologies for managing the customer lifecycle across Internet and offline channels. Topics include customer identification, data integration, personalization technologies, web and email interaction techniques; sales force automation applications; call centers, field service and logistics applications; customer self-service and customer knowledge management technologies. Students will review and compare specific eCRM technologies and develop an Internet customer interaction system to support an eCRM strategy in group project. IS 411 is a prerequisite for this class.

ECT 587 | MOBILE COMMERCE TECHNOLOGY | 4 quarter hours (Graduate)
This course examines leading wireless and mobile technologies for consumer and enterprise mobile commerce. This course discusses how mobile technologies have changed the business community with an emphasis on major mobile platforms. Major topics include analysis and design of business applications in a mobile environment, and wireless user interface design. Students will develop mobile applications using a prominent mobile technology. CSC 401 or IS 411 or IT 411 is a prerequisite for this class.

ECT 589 | E-BUSINESS STRATEGIES | 4 quarter hours (Graduate)
Designed for ECT majors and IS majors in ECT concentration, this course focuses on the deployment of Internet and enterprise technologies to support organization’s e-business initiatives and collaborative commerce. Conducted in the format of seminar, case analysis, and dialogue with industry practitioners, this course requires students to actively participate in the study of models and approaches for e-business technology implementation and transformation. Topics include: the impact of Internet on industry structure and organizational transformation, enterprise application architecture, planning and implementation of technology and process to support an increasingly collaborative and integrated environment for e-commerce. Students have to complete an organization case study of e-business technology implementation to fulfill the requirement of this capstone course. This course should be taken at the conclusion of the ECT program. PREREQUISITE(S): Completion of ten or more School of Computing MS level courses is required.

ECT 596 | TOPICS IN E-COMMERCE TECHNOLOGY | 4 quarter hours (Graduate)
Independent study form required. PREREQUISITE(S): Consent of instructor.

ECT 690 | RESEARCH SEMINAR | 1-4 quarter hours (Graduate)
Readings and discussion on current research topics. Students may register for this course no more than twice. PREREQUISITE(S): Consent of the instructor. (variable credit)

ECT 696 | MASTER’S PROJECT | 4 quarter hours (Graduate)
Four credit hours. Students may register for this course only after their advisor has approved a written proposal for their project. Independent study form required. (PREREQUISITE(S): Consent of advisor).

ECT 698 | MASTER’S THESIS | 2 quarter hours (Graduate)
(2 credit hours) Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. Independent study form required. PREREQUISITE(S): Consent of advisor. (2 quarter hours)

Early Childhood Education (ECE)

ECE 91 | CLINICAL EXPERIENCES WITH INFANTS AND TODDLERS | 1 quarter hours (Undergraduate)
Candidates will observe and interact with infants and toddlers (25 clock hours) and attend a weekly seminar in which they will be required to reflect on their experiences in relation to the development and learning processes of infants and toddlers. Appropriate early childhood lesson planning and assessment techniques and tools will be emphasized. COREQUISITE: ECE 290. (1 credit hour)

ECE 92 | CLINICAL EXPERIENCES WITH YOUNG CHILDREN AND FAMILIES | 1 quarter hours (Undergraduate)
Candidates will observe and interact with young children and their families in school and child care settings with family/parent education programs; family conferences and home visits will be included in the options. (25 clock hours). Candidates will meet once a week in a seminar to reflect and discuss topics around parental involvement, parental support, and building communities through connections between schools and homes. COREQUISITE: ECE 302. (1 credit hour)

ECE 93 | CLINICAL EXPERIENCES WITH PRE-SCHOOLERS | 1 quarter hours (Undergraduate)
Candidates will observe and interact with preschool age children (25 clock hours) and attend a weekly seminar in which they will be required to reflect on their experiences in relation to the development and learning processes of preschool age children. Appropriate early childhood assessment and instructional methodologies will be emphasized. COREQUISITE: ECE 310. (1 credit hour)

An education major or minor is a prerequisite for this class.

ECE 94 | CLINICAL EXPERIENCES IN PRIMARY GRADES | 1 quarter hours (Undergraduate)
Candidates will observe and interact with primary age children (25 clock hours) and attend a weekly seminar in which they are required to reflect on their experiences in relation to the development and learning processes in the primary years (K-3). Appropriate assessment and instructional methodologies for children in the primary grades will be emphasized. COREQUISITE: ECE 311. (1 credit hour)

An education major or minor is a prerequisite for this class.
ECE 175 | EDUCATING THE TWENTY-FIRST CENTURY YOUNG CHILD | 4 quarter hours  
(Undergraduate)
Course is for students with interests in early childhood programs in the United States. Course explores issues influencing early childhood education, such as socio-historical factors, family policy, diversity, and federal/state regulations. Students examine programs using readings from the Vincentian Collection, child psychology, social theories and the current media. Students compare Vincentian Heritage, current and past federal policies, applying this study to their understanding of social justice to modern childcare practices. To guide students deeper into understanding the lives of young children, the course offers an option for service learning with Jumpstart, Chicago-area Head Start, and other early childhood education centers.

ECE 280 | INTERNSHIP WITH INFANTS AND TODDLERS | 2 quarter hours  
(Undergraduate)
Candidates conduct 75 hours of intense supervised fieldwork in an infant/toddler center where they are observing and documenting behavior and interactions, planning activities, and assessing development in children ages birth to 3. Candidates will also participate in a twice a quarter, hour and a half, seminar to reflect and discuss aspects of infant/toddler development and care, making connections between theory and practice. Onsite meetings with groups of candidates will be held weekly for supervision and reflection on practice. Co-requisite ECE 290. (2 credit hours)

ECE 286 | ART, MUSIC, AND MOVEMENT FOR THE YOUNG CHILD | 4 quarter hours  
(Undergraduate)
This course will focus on the theory, research, methods, and activities of art, music, and movement for young children birth through age 8. Emphasis will be on the integration of developmental domains, creative and critical thinking as developmental domains are integrated.

ECE 290 | CHILD GROWTH AND DEVELOPMENT | 4 quarter hours  
(Undergraduate)
This course examines human growth and development of the child from pregnancy through age eight, including cognitive, language, physical, social, spiritual, creative, and emotional areas of development. Learning and development theories of young children, including those of Freud, Erikson, Bowlby, Piaget, Vygotsky, Bronfenbrenner, and other modern developmental theorists are explored. Pedagogical implications of these developmental theories are embedded in class discussions and course activities. COREQUISITE: ECE 280.

ECE 298 | CHILD HEALTH SAFETY AND NUTRITION | 4 quarter hours  
(Undergraduate)
This course focuses on the interrelationships among child, family and the areas of health, safety and nutrition. Special emphasis will be placed upon the issues of health, safety and nutrition that affect young children from the ages of birth through age 8. Understanding cultural issues and special needs of individual children are addressed, as are aspects of health and safety. Central to this course is the acquisition of knowledge and application of practices that promote good nutrition, dental health, and the physical, social and emotional well being of young children. The course includes information on common diseases and health problems.

ECE 302 | CHILD AND FAMILY IN THE URBAN COMMUNITY | 4 quarter hours  
(Undergraduate)
This course focuses on understanding the diversity of children and families in approaches to development, learning, and disability. Strategies in developing positive and supportive relationships with families of young children with special needs, including family-centered practices, will be explored. Particular attention is given to the challenges faced by teachers and other professionals in early intervention in assessing children's needs and providing services, which are reflective of the child's development within his/her diverse cultural and community context. In addition, the course examines ways to develop and maintain productive and collaborative relationships among professionals and families, communities, and other professionals across the range of support systems in the IFSP and IEP planning processes.

ECE 303 | INTRODUCTION TO EARLY CHILDHOOD EDUCATION | 4 quarter hours  
(Undergraduate)
This course will introduce students to the professional ethics of early childhood education and the critical role of federal policy in the evolution of the field. Historical, sociological, philosophical, and psychological foundations of early childhood education are explored. Of special interest is a review of key theories and research that inform the development of early childhood education goals and practices, as well as administrative, pedagogical, and ethical professional standards for working with children from diverse communities. The course includes foci on Developmentally Appropriate Practice (DAP), inclusive pedagogical practice, appropriate use of technology with young children, and various curricular models: Montessori, Reggio Emilia, High Scope, and Creative Curriculum.

ECE 306 | FUNCTIONAL BEHAVIOR ASSESSMENT: INTERVENTION AND SUPPORT IN EARLY CHILDHOOD | 4 quarter hours  
(Undergraduate)
This course is designed to prepare early childhood pre-service teachers to work with children who present a variety of challenging behaviors in the classroom. Grounded in principles of Applied Behavior Analysis, the philosophy of the course is based on the premise that understanding the underlying causes of children's externalizing and internalizing behavior enables the teacher to utilize appropriate techniques in conducting behavior intervention and classroom management. Using Positive Behavioral Support and Functional Behavior Analysis (a competency required for all teachers under the provisions of IDEA), students will learn how to design and develop a Behavior Intervention Plan. Diverse methods for addressing a variety of behaviors are explored and practiced through field-based assignments that also include application of behavioral assessment and intervention tools, as well as techniques. ECE 290 and edu major or minor
ECE 307 | LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD (BIRTH TO 8) | 4 quarter hours
(Undergraduate)
This course examines language acquisition and development in young children, including culturally and linguistically diverse learners and children with atypical language development. Attention will be given to dialectical issues as these apply to growth and development of linguistic competencies through the early childhood years. Explored in this course are the core topics of linguistic morphology, syntax, semantics, pragmatics, phonetics, and phonology. Psycholinguistic and sociolinguistic theories anchor the discussion of language learning in childhood. Issues of language delay and processing of symbolic information to facilitate the development of articulation, fluency, voice, and functional language are included.

ECE 290 and edu major or minor

ECE 309 | YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS | 4 quarter hours
(Undergraduate)
This course is a survey of the field of early childhood special education, including the Early Intervention System. Characteristics of infants, toddlers, and young children with special needs are examined in this course. Methods of working with different disabilities during children’s early years will be explored. Strengths and needs of families of young children with disabilities and collaboration with family members will be emphasized. Understanding the impacts of current legislation, policy, and research on practice is fostered and developed. Completing 15 hours of field experience in an early childhood special education setting is a part of this course’s requirements.

ECE 290 and edu major or minor

ECE 310 | PREPRIMARY PROGRAMS: CURRICULUM AND STRATEGIES | 4 quarter hours
(Undergraduate)
Candidates will plan, implement, and evaluate activities that promote the physical, emotional, social, spiritual, cognitive, and creative development of preschool children from diverse cultural and socioeconomic backgrounds. Emphasis will be placed on creating learning environments that facilitate children’s learning through play. Developmentally appropriate practices, with a particular emphasis on social studies, use of technology, and learning centers will be thoroughly investigated.

COREQUISITE: ECE 381.

ECE 290 and edu major or minor

ECE 311 | CURRICULUM AND INSTRUCTION IN PRIMARY GRADES | 4 quarter hours
(Undergraduate)
This course provides an examination of the objectives, content methods and materials used in the primary grades of elementary schools (K-3). A variety of teaching methods and classroom management strategies will be discussed and illustrated, including teacher-led and student-centered instruction. Candidates will be encouraged to reflect upon their own emerging educational philosophies and teaching styles as they take part in laboratory and clinical experiences. Many opportunities for planning, using and evaluating a variety of teaching methods will be offered. Each student will develop at least one teaching unit on a primary social studies theme.

COREQUISITE: ECE 382.

ECE 290, ECE 310 and an Education major or minor are prerequisites for this class.

ECE 312 | BILINGUAL THEORY IN EARLY CHILDHOOD DEVELOPMENT | 4 quarter hours
(Undergraduate)
This course is designed to equip bilingual and second language teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, political and legal foundations of bilingual education programs in the United States. It will examine different models of bilingual programs and the psycholinguistic and sociolinguistic principles upon which they are based.

ECE 313 | CROSS CULTURAL STUDIES IN EARLY CHILDHOOD EDUCATION | 4 quarter hours
(Undergraduate)
The course will focus on meeting the needs of young children in a multicultural society, emphasizing the role of ethnicity and cultural variables in development of young children within the context of families, childcare centers, and educational systems. Topics include: history of immigration and predictions for the future; the effects of population shifts on the education of English Language Learners and their families; the impact of immigration and educational orders on bilingual/English-as-a-Second-Language education; understanding cultural and linguistic differences regarding locating and using educational resources.

ECE 314 | METHODS AND MATERIALS FOR DUAL LANGUAGE AND MULTILINGUAL LEARNERS | 4 quarter hours
(Undergraduate)
This course focuses on best practices in teaching dual language and multilingual learners (DLL/ML), helping them to learn English while maintaining their native language, in bilingual/ESL early childhood classrooms, from birth through age 8. Candidates will demonstrate competencies with different approaches and methodologies currently used to support the development of listening, speaking, reading, and writing in first and subsequent languages. Curriculum-based assessment, cultural awareness, and self-reflective practice will also be addressed. 17 hours of Field Experience required.

ECE 325 | SECOND LANGUAGE ACQUISITION AND EARLY LITERACY DEVELOPMENT | 4 quarter hours
(Undergraduate)
This course will examine the process of learning and using a second language. Research in second language acquisition (SLA) is multidisciplinary in nature, reflecting the complexity of language learning and use. Linguistic, psychological and social processes that underlie language learning and use will be introduced and applied to the understanding of this learning in young children. Language acquisition theory concerning relationships between early literacy and oral language development in first and subsequent languages will be explored. Understanding developed through this exploration will then be applied to the classroom in the form of strategies and literacy development activities.
ECE 326 | PRINCIPLES AND STRATEGIES FOR FAMILY ADVOCACY AND ACTION IN EARLY CHILDHOOD | 4 quarter hours
(Undergraduate)
This course develops knowledge and skills to assist families of young children who face the stress of living in poverty. The focus will be on developing empathetic relationships with families so that family service and education can be optimized. Candidates will be assisted in learning to identify community resources and ways to support families in accessing resources. A focal point will be on ways to empower families, recognizing family strengths and respect for cultural variables, as they apply.

ECE 302 and an Education major or minor are prerequisites for this class.

ECE 327 | IMPACT OF PUBLIC POLICY ON FAMILIES OF YOUNG CHILDREN | 4 quarter hours
(Undergraduate)
This course is grounded in social justice practice and designed to promote an understanding of the ethical principles, legal issues, policies, and law influencing the well being of families, including those families of young children with disabilities and those who are English Language Learners. A particular focus will be on how federal childcare and education policy affects and shapes early childhood practice and service delivery to families. This course explores historical developments of laws and public policy affecting families. Ethics and ethical implications of social change will be explored.

ECE 328 | WORKING WITH FAMILIES OF CHILDREN WITH DISABILITIES AND CHRONIC ILLNESS | 4 quarter hours
(Undergraduate)
This course will strengthen the knowledge and skills of early childhood educators and other professionals working with young children in cultural competency (at the individual and institutional level), family-centered care, family-professional partnerships, family-directed practices, and family empowerment. Candidates will develop best practices to assure the health and well being of children and their families and to honor the strengths, cultures, traditions and expertise that everyone brings to this relationship.

ECE 329 | YOUNG CHILDREN'S LITERATURE AND FAMILY LITERACY | 4 quarter hours
(Undergraduate)
This class explores the joys of reading and provide strategies for candidates to awaken and encourage the joy of reading in the children and families with whom they work. It focuses on how early childhood educators are uniquely positioned to foster literacy in children and their families through thoughtful, theoretically based programming and activities.

ECE 331 | BEGINNING MATH AND SCIENCE INSTRUCTION | 4 quarter hours
(Undergraduate)
This course applies child development principles to the planning of science and mathematics experiences for both typically and atypically developing young children. Emphasis is placed on understanding how children develop problem-solving skills, and on recognizing how teachers can facilitate inquiry-discovery experiences for young children with diverse learning styles and needs. Course assignments include participation in experiments and field-based experiences in mathematics and sciences. Teacher candidates are required to develop and provide developmentally and culturally appropriate activities in science and mathematics activities for young children.

ECE 290 and a minor or major are prerequisites for this course.

ECE 332 | EARLY LITERACY AND ASSESSMENT FOR YOUNG CHILDREN WITH DISABILITIES | 4 quarter hours
(Undergraduate)
This course focuses on the nature of the reading process, current literacy theory and practices, and research-based instructional strategies to develop literacy skills in emergent and developing readers and young children with reading/learning disabilities. Emphasis is placed on understanding the reading process, analyzing and applying research-based instructional practices, administering, analyzing, and interpreting formal and informal reading assessments, and making informed instructional decisions to meet the unique needs of individual readers. Differences in reading abilities will be examined in light of providing appropriate, effective, and meaningful literacy instruction for young children with disabilities.

ECE 333 | EARLY CHILDHOOD EDUCATION FOR LOW INCIDENCE DISABILITIES | 4 quarter hours
(Undergraduate)
This course focuses on an examination of the developmental and learning characteristics of young children with low incidence disabilities. A specific focus is on educating early childhood students with Autism Spectrum Disorders and those with Intellectual Disabilities. A primary goal of this course is to understand the learning needs of these children, and to examine and evaluate various educational and therapeutic methods of working with them. A major part of this course is devoted specifically to the characteristics associated with and interventions for children with Autism Spectrum Disorders.

ECE 334 | SPECIAL EDUCATION CURRICULUM AND STRATEGIES FOR YOUNG CHILDREN | 4 quarter hours
(Undergraduate)
Study of the theoretical and practical approaches to instruction for young children with high incidence disabilities. Emphasis is placed on the development of supportive learning environments, using special curricular and behavioral management strategies for all early childhood settings; application of collaborative practices with multiple service providers and families to meet the needs of diverse learners with high incidence disabilities. Strategies and materials for improving the social, emotional, and academic adjustment and functioning of young children with high incidence disabilities are examined. Includes teaching social and emotional curricula; implementing functional behavioral assessment; and monitoring growth and development in targeted areas. Strategies to increase the young child’s self-awareness, self-management, self-control, self-reliance, and self-esteem are considered. Application of diagnostic information into teaching strategies and implementation of an instructional plan (IEP) is a central tenet of the course. It is recommended for students to take ECE 290 and ECE 309 and to have 25 clock hours of Level II Experience prior to taking this class.
ECE 375 | ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE SETTINGS | 4 quarter hours  
(Undergraduate)  
Candidates will study, use and evaluate early childhood assessment methods and tools that are appropriate for use with young children with diverse cultural and socioeconomic experiences. Focus of the course is on the teacher candidate’s acquisition of knowledge and skills regarding an array of formal and informal assessment instruments and techniques used to gather information needed for making decisions about typical and atypical children served in individual and group learning situations. Focus is directed toward the development of curricular goals and instructional approaches that evolve from the development of curricular goals and instructional approaches that evolve from the assessment information. Such information is used to create learning plans, including Individual Family Service plans (IFSP) and Individualized Education Plan (IEP), serving child and family responsibly.

ECE 290 and edu major or minor

ECE 377 | ASSESSMENT OF DUAL LANGUAGE AND MULTILINGUAL LEARNERS | 4 quarter hours  
(Undergraduate)  
This course will focus on the discussion of basic principles and current approaches to assessment of dual language and multilingual learners (DLL/ML) in ESL and bilingual early childhood and early elementary educational settings. Candidates will learn about the different purposes of process and product assessment tools, authentic and curriculum-based forms of assessment, issues in the assessment of DLLs/MLs, and assessment in academic areas for early elementary MLs. Research on language and literacy acquisition in MLs vis a vis instruction and assessment will be discussed. Candidates will have opportunities to critically examine and learn how to administer assessment tools used in current practice. 17 hours Level 2 Field Experience required.

ECE 380 | EARLY CHILDHOOD SPECIAL EDUCATION PRACTICUM | 4 quarter hours  
(Undergraduate)  
Supervised teaching in a cooperating school serving young children with disabilities for 150 clock hours; arranged in collaboration with supervising faculty member and the Field Experience Office. Candidates will reflect upon their teaching experiences with young children with disabilities and collaborate with colleagues and instructor to identify alternative strategies for problematic situations. Application and approval required prior to registration. Open only to DePaul students.

ECE 381 | INTERNSHIP IN PRESCHOOL SETTING | 2 quarter hours  
(Undergraduate)  
Candidates conduct 75 hours of intensive supervised field work in preschool during the winter quarter. The internship is designed to be taken by ECE teacher candidates before student teaching. Candidates enrolling in this internship have completed or are taking ECE 310: Preprimary Programs: Curriculum and Strategy concurrently. (2 credit hours)

ECE 290 and edu major or minor

ECE 382 | INTERNSHIP IN PRIMARY SETTING | 2 quarter hours  
(Undergraduate)  
Candidates conduct 75 hours of intense supervised field work in a primary grade (K-3) during the spring quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have taken ECE 311: Curriculum and Instruction in Primary Grades. (2 credit hours)

An education major or minor is a prerequisite for this class.

ECE 383 | INTERNSHIP IN EARLY CHILDHOOD ESL/BILINGUAL EDUCATION SETTINGS | 4 quarter hours  
(Undergraduate)  
This course will focus on application of the theories of effective teaching practices and assessment procedures appropriate for young English Language learners. It will emphasize an application of knowledge gained from previous ESL/ELL courses and demonstration of skills necessary to work collaboratively and effectively with families of young English Language Learners. Professional behaviors that respect, value, and support all children’s native language and culture will be reinforced. (100 clock hours)

ECE 313, ECE 314, ECE 325, ECE 377, and (BCE 305 and BCE 306) or (BCE 325 and BCE 366) are prerequisites for this class.

ECE 384 | EARLY CHILDHOOD EDUCATION CAPSTONE | 4 quarter hours  
(Undergraduate)  
The senior capstone course is designed to help Candidates integrate the central emphases of their liberal learning studies curriculum with their professional behavior. It will provide prospective early childhood educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to use critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to early childhood education. Candidates will develop a professional portfolio that reflects the standards of the various guiding professional organizations. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies program. This course is taken after student teaching.

ECE 385 | EARLY CHILDHOOD STUDENT TEACHING | 12 quarter hours  
(Undergraduate)  
This course requires students to participate in supervised teaching at a cooperating school, five full days per week, for an academic quarter. Part of the teaching will be in a preprimary setting and part will be in a primary setting. Feedback and discussion of issues encountered in student teaching as well as new materials and techniques of student teaching will be included. Application and approval are required. Open only to DePaul students. (12 credit hours)

ECE 387 | CAPSTONE SEMINAR IN EARLY CHILDHOOD EDUCATION | 2 quarter hours  
(Undergraduate)  
This course is designed to help candidates integrate the central emphases of their Liberal Studies curriculum with their professional knowledge and behavior. It provides opportunities and activities to prospective educators that engage them in being analytic and reflective upon their major and related disciplines; guide them in further considering their value commitments and how they relate to their chosen profession; apply critical and creative thinking in addressing ‘real-time’ professional issues and needs; and examine extant practices from multicultural perspectives. Candidates develop a professional teaching portfolio that reflects the standards of the various guiding professional organizations and the Illinois State Board of Education (ISBE). The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator as well as the goals of the Liberal Studies program. The course is taken simultaneously with student teaching. COREQUISITE(S): ECE 385. (2 credit hours)
ECE 390 | DEVELOPMENTAL THERAPY STRATEGIES FOR INFANTS AND TODDLERS IN EARLY INTERVENTION | 4 quarter hours  
(Undergraduate)  
This course will focus on the knowledge and skills needed to work effectively with young children from birth through age 3, who have disabilities and special learning needs. The course will use child-centered, play-based interventions and developmentally appropriate practice as the central approach. Furthermore, students will examine learning outcomes and related intervention (lessons), which will be used to effectively address these outcomes, as well as aligning ongoing assessment of the intervention strategies. Students will examine issues related to the impact that disability conditions have on young children's learning needs in all developmental domains. Additionally, students will explore issues related to intervention of young children within the context of families and caregivers - that is within natural and inclusive settings, such as the family's home, community settings, or center-based programs.

ECE 290, ECE 309 and an Education major or minor are prerequisites for this class.

ECE 391 | ASSESSMENT OF INFANT AND TODDLERS | 4 quarter hours  
(Undergraduate)  
Built on a partnership with families, this course focuses attention on all aspects of development including social/emotional, cognitive, sensory/motor and communication. Beginning with observation and naturalistic assessment processes, teachers examine the principles of best practice for assessing babies and toddlers for service in infant/toddler care, Early Head Start and early intervention. Teacher candidates learn to administer screening tools, criterion referenced instruments and leading standardized instruments and procedures, including the transdisciplinary approach and the Hawaii Early Learning Profile.

ECE 290, ECE 309 and an Education major or minor are prerequisites for this class.

ECE 392 | WORKING WITH FAMILIES OF INFANTS AND TODDLERS: PARTNERSHIP AND COLLABORATION IN EARLY INTERVENTION | 4 quarter hours  
(Undergraduate)  
This course will focus on the knowledge and skills needed to work effectively with families of young children from birth through age 3, who have disabilities and special learning needs. The course will examine philosophical foundations and collaboration strategies for teachers and other professionals working with families of young children with exceptionalities in Early Intervention programs and inclusive settings where the infants and toddlers may be served.

ECE 306 and an Education major or minor are prerequisites.

ECE 393 | INTERNSHIP EXPERIENCES WITH INFANTS, TODDLERS AND TWOS WITH SPECIAL NEEDS | 2 quarter hours  
(Undergraduate)  
This course is a supervised internship, in which the candidates will practice early intervention strategies in a field experience of 40 clock hours with infants and toddlers with special needs. In this internship candidates will practice 1) assessment of infants and toddlers, 2) developmental therapy and play strategies with infants and toddlers, and 3) collaboration working in partnership with family members of children with special needs. Co-requisite: ECE 390; ECE 391; ECE 392. (2 credit hours)

ECE 395 | DESIGNING CURRICULUM FOR INFANTS AND TODDLERS | 4 quarter hours  
(Undergraduate)  
Research in neuroscience indicates that the brain developmental foundation for all later learning is created in the first three years of life. The impact and impetus for the adults (families and caregivers) who nurture and teach children from birth to three will be explored in this course. The course will examine the developmental milestones, as well, as each child's developmental profile to create a developmentally appropriate curriculum to enhance the foundation for all later learning. The course explores ways to provide a safe and challenging environment; to focus on play as a vehicle for learning for optimal developmental outcomes. Collaboration with families in addressing each child's development is featured in the course. Candidates will be expected to design curricula to meet the needs of linguistically and culturally diverse children, as well as young children with special needs.

ECE 398 | SPECIAL TOPICS IN EARLY CHILDHOOD EDUCATION | 4 quarter hours  
(Undergraduate)  
This course offers intensive study of selected topics in the field of early childhood education and care. Course content and credits vary according to topics. Syllabus is tailored to the topic of special study. Example topics include: Implementing common core in kindergarten; Social-emotional learning programming in K-3; Using data to make curricular decisions in PK-3; Mentoring families who are teen-agers.

ECE 490 | DEVELOPMENTAL THERAPY STRATEGIES FOR INFANTS AND TODDLERS IN EARLY INTERVENTION | 4 quarter hours  
(Graduate)  
This course will focus on the knowledge and skills needed to work effectively with young children from birth through age 3, who have disabilities and special learning needs. The course will use child-centered, play-based interventions and developmentally appropriate practice as the central approach. Furthermore, students will examine learning outcomes and related intervention (lessons), which will be used to effectively address these outcomes, as well as aligning ongoing assessment of the intervention strategies. Students will examine issues related to the impact that disability conditions have on young children's learning needs in all developmental domains. Additionally, students will explore issues related to intervention of young children within the context of families and caregivers that is within natural and inclusive settings, such as the family's home, community settings, or center-based programs.

SCG 404 and T&L 427 (or equivalent) are prerequisites for this class.

ECE 491 | ASSESSMENT OF INFANT AND TODDLERS | 4 quarter hours  
(Graduate)  
Built on a partnership with families, this course focuses attention on all aspects of development including social/emotional, cognitive, sensory/motor and communication. Beginning with observation and naturalistic assessment processes, teachers examine the principles of best practice for assessing babies and toddlers for service in infant/toddler care, Early Head Start and early intervention. Teacher candidates learn to administer screening tools, criterion referenced instruments and leading standardized instruments and procedures, including the transdisciplinary approach and the Hawaii Early Learning Profile.

SCG 404 and T&L 427 (or equivalent) are prerequisites for this class.
ECE 492 | WORKING WITH FAMILIES OF INFANTS AND TODDLERS: PARTNERSHIP AND COLLABORATION IN EARLY INTERVENTION | 4 quarter hours (Graduate)
This course will focus on the knowledge and skills needed to work effectively with families of young children from birth through age 3, who have disabilities and special learning needs. The course will examine philosophical foundations and collaboration strategies for teachers and other professionals working with families of young children with exceptionalities in Early Intervention programs and inclusive settings where the infants and toddlers may be served.
T&L 421 (or equivalent) is a prerequisite for this class.

ECE 493 | INTERNSHIP EXPERIENCES WITH INFANTS, TODDLERS AND TWOS WITH SPECIAL NEEDS | 2 quarter hours (Graduate)
This course is a supervised internship, in which the candidates will practice strategies and research in a field experience of 40 clock hours with infants and toddlers with special needs. In this internship candidates will practice 1) assessment of infants and toddlers, 2) developmental therapy and play strategies with infants and toddlers, and 3) collaboration with families of children with special needs. Co-requisite: ECE 490; ECE 491; ECE 492. (2 credit hours)

ECE 704 | SEMINAR IN RESEARCH IN CHILD DEVELOPMENT | 4 quarter hours (Graduate)
The focus of the seminar is to introduce the doctoral students to major research questions and issues in child development. The doctoral students will lead discussions on the most current and seminal research in the field of child development. In addition, the students will participate in analyses of existing US Policies in regards to child development. The seminar will have the following objectives: 1) Examination, analysis, and evaluation of the seminal and contemporary research and research methodologies in child development. 2) Examination and analysis of major theories of child development through a study of the original literature. 3) Examination and analysis of contemporary issues regarding maternal health and early development. 4) Examination, analysis, and evaluation of US policy approaches to maternal health and early childhood development and education.
Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 706 | CANDIDACY PAPER | 0 quarter hours (Graduate)
Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook. (0 credit hours)
Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 714 | SEMINAR IN DEVELOPMENT, RISK, AND RESILIENCE | 4 quarter hours (Graduate)
This seminar will examine the concept of risk and its influence on child development within various frameworks such as environment, genetics and neurobiology, psychopathology, family, public policy and education. An issue of interest will be the development of children who are at-risk due to environmental factors. The U.S. policies in addressing this population will be examined. The seminar will have the following objectives: 1) In-depth analysis of the concepts of risk and resilience through examination of the original research literature. 2) Examination and analysis of various risk factors (e.g.: genetics, biology, poverty, family, socio political influences) with attention given to neurobiological risk factors, including disabilities. 3) Examination and analysis of factors of resilience (including implications for intervention and early childhood education). 4) Examination and analysis of U.S. Policies in relationship to promotion of resilience via early childhood intervention and education programs.
Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 724 | SEMINAR IN CURRICULAR APPROACHES IN EARLY CHILDHOOD EDUCATION | 4 quarter hours (Graduate)
This seminar will examine issues related to curriculum in early childhood education and intervention, including assessment and other contemporary schooling issues. An in-depth analysis of various theoretical approaches influencing curriculum design in early childhood and family intervention will be conducted, as well as a review of the most influential and current educational models guiding curriculum in current early childhood settings. Through participation in this seminar candidates will meet the following objectives: 1) Examination of theoretical approaches influencing early childhood curriculum design. 2) Examination and analysis of contemporary curricular and assessment issues in early childhood education. 3) Examination and analysis of current early childhood educational models guiding curriculum. 4) Observation and analysis of model early childhood programs. 5) Exploration of other relevant contemporary early childhood education issues.
Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 734 | SEMINAR IN EARLY CHILDHOOD PROGRAM DESIGN AND EVALUATION | 4 quarter hours (Graduate)
Doctoral students will examine the design and goals of various nationally funded early childhood programs from their philosophical and policy perspectives. Doctoral students will devote the major part of this seminar to conducting a research evaluation of one selected national early childhood program as a class team project. The research may require utilizing field research methodologies of one or more centers belonging to the selected program. When feasible the students will present their research findings in a local or national conference. The seminar will have the following objectives: 1) Understanding program design. 2) Developing program evaluation to match questions and address stakeholder needs. 3) Acquiring hands-on experience conducting a program evaluation on a selected early childhood program. 4) Written and oral dissemination of study.
Status as a EDD student with a declared concentration is a prerequisite for this class.
ECE 744 | SEMINAR IN CULTURE, LANGUAGE AND LEARNING | 4 quarter hours (Graduate)
This seminar will focus on examining the influences of culture and language in development and education of children. Current cross-cultural, cross-lingual educational research will be examined in detail. The seminar will have the following objectives: 1) In-depth examination and analysis of influences of race and culture on development based on current research. 2) Examination and analysis of multicultural issues, and implications for early education method and practices. 3) Examination and analysis of issues related to the education of interracial children. 4) Examination of bilingual issues and implications for early education methods and practices. 5) Examination and evaluation of current educational policies in relationship to bilingual and bicultural children in the US.
Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 759 | TEACHING INTERNSHIP IN EARLY CHILDHOOD EDUCATION | 4 quarter hours (Graduate)
This teaching internship is designed to respond to the growing need for preparing high quality teaching professionals in the field. Early Childhood Education Doctoral students acquire hands-on experience in college-level teaching in early childhood education or related fields. The doctoral student will teach one course under the supervision of an early childhood program faculty member. The course to be taught is recommended by the supervising faculty advisor based on the student’s background and career goals. The major objectives of this internship are: 1) Demonstrating mastery of course content. 2) Demonstrating knowledge, skills, and dispositions for teaching college and university level students and pre-service early childhood professionals from diverse backgrounds.
Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 769 | RESEARCH INTERNSHIP IN EARLY CHILDHOOD EDUCATION | 4 quarter hours (Graduate)
This research internship is designed to provide an actual research experience in early childhood education. With the approval of the ECE program faculty, the candidates will work either with a faculty from the College of Education, from another college at DePaul University, or with a research associate or scientist at DePaul or in another institution to assist on a research project in one of the following areas: child development, early childhood education, child and family studies, developmental psychology or another closely related field. The student’s progress will be followed up by an early childhood advising faculty. The internship has the following objectives: 1) Understanding DePaul’s IRB protocol and application process to acquire certification for conducting research. 2) Acquiring first-hand experience while assisting research faculty in conducting various phases of research. 3) Collecting, analyzing, and interpreting data under supervision. 4) Understanding various research methodologies employed in the field of early childhood education.
Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 849 | SUPERVISED DISSERTATION PROPOSAL DEVELOPMENT | 4 quarter hours (Graduate)
Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

ECE 859 | INDEPENDENT DISSERTATION RESEARCH: EARLY CHILDHOOD EDUCATION | 4 quarter hours (Graduate)
Students register for this course for the quarter in which they defend their dissertations. Permission of dissertation chair required.

Economics (ECO)

ECO 101 | INTRODUCTION TO ECONOMIC ISSUES | 4 quarter hours (Undergraduate)
This course will introduce students to basic concepts from both micro- and macroeconomics. The goal is for students to gain an appreciation of how economics can be used to understand the world. Students will enhance their analytical skills by using basic economic concepts to examine current domestic and international issues. Students will improve their oral communication skills during class discussions and debates. This course is intended for non-Commerce students and cannot be counted toward a major or minor in economics.
LSP 121 (or HON 180) or MAT 101 (or equivalent) are prerequisites for this class.

ECO 105 | PRINCIPLES OF MICROECONOMICS | 4 quarter hours (Undergraduate)
Principles of Microeconomics. Basic theories of micro (or individual) economic units; the theory of consumer demand, the firm, and distribution; pricing and production in competitive, monopolistic and oligopolistic industries.
MAT 101 (or equivalent) is a prerequisite for this class.

ECO 106 | PRINCIPLES OF MACROECONOMICS | 4 quarter hours (Undergraduate)
Principles of Macroeconomics. Fundamental theories of macro (or aggregate) economics: supply and demand, national income accounting and analysis, and international trade. Analysis of unemployment, and inflation, and policies designed to combat these and other current problems.
MAT 101 (or equivalent) is a prerequisite for this class.

ECO 198 | CURRENT ECONOMIC ISSUES | 2 quarter hours (Undergraduate)
This is a 2-hour special topics course. Content and format of this course are variable. This course format will facilitate an in-depth examination of a specific economic issue. The specific topic covered will be indicated in the class schedule. The goal of the topics course is to introduce students to the discipline of economics through the study of a specific issue at the introductory level. This course will generally not carry any prerequisites and will not be applicable toward the requirements of the Economics major or minor. The course can be repeated for credit when a different topic is scheduled.

ECO 250 | CAREER PREPARATION FOR ECONOMICS MAJORS | 2 quarter hours (Undergraduate)
Students will explore possible career options for economics majors while addressing three competency areas: self-management skills, career building skills, and general business skills. The course will focus on further developing students’ quantitative skills as they research career options and will include the development of a portfolio as a final assignment. (2 quarter hours)
MAT 137, ECO 105, ECO 106 and status as an ECO major in either the College of Business or the College of Liberauls Arts & Social Sciences is a prerequisite of this class.
ECO 105 | ANALYTICS FOR ECONOMICS | 4 quarter hours
(Undergraduate)
Students will learn how to interpret and apply the ordinary least squares regression model to answer important questions related to economics and business. The course incorporates real world applications of the ways in which these empirical methods are influencing decisions in businesses and government. Students will also analyze real data and learn how to design their own empirical studies. Students may not receive credit for ECO 304 and ECO 375.
MAT 137 and (BUS 102 or a declared BA Economics major) are prerequisites for this class.

ECO 305 | INTERMEDIATE MICROECONOMICS | 4 quarter hours
(Undergraduate)
This course is an extension of the topics introduced in Economics 105. It uses models to explain economic decision-making by consumers and firms. Students will examine how markets allocate resources, how market structure affects choices and social welfare, and the ways in which government can improve or impair markets.
ECO 105 (minimum of C-) and MAT 130 (or equivalent) are prerequisites for this class.

ECO 306 | INTERMEDIATE MACROECONOMICS | 4 quarter hours
(Undergraduate)
The purpose of this course is to develop macroeconomic models that assist in understanding the myriad economic problems facing us today, both domestic and foreign, and in evaluating proposed solutions. These static and dynamic models are used to understand interactions in the macroeconomy, and will serve as a tool in predicting the level of GDP, inflation, unemployment and interest rates. Models included are: traditional short-run Keynesian analysis; the New Classical market-clearing approach; and the recent work in Neo-Keynesian thought.
ECO 105, ECO 106 & MAT 130 (or equivalent) are prerequisites for this class.

ECO 307 | MANAGERIAL DECISION MAKING | 4 quarter hours
(Undergraduate)
This course provides an introduction to the various behavioral issues that affect economic and business decision-making. The goal is to understand (a) how cognitive constraints and common biases hinder rational decisions, (b) how emotions, motivations, and social and organizational pressures can lead to inefficient outcomes, and (c) how to design strategies aimed at improving decision-making at the individual and firm levels. This course is designed for both Economics and Non-Economics majors.
ECO 105 is a prerequisite for this class.

ECO 308 | BUSINESS STRATEGY | 4 quarter hours
(Undergraduate)
There is strategy in everything. From games, to sports, to politics, to relationships. Mastering the discipline of strategy will allow students to assess problems and break them down into manageable components so that they can become stronger decision makers. This course is designed to demystify that strategic thought process from a business perspective. This course covers various concepts and frameworks used to analyze and formulate business strategies. Students will become familiar with a number of tools and techniques for diagnosing a firm’s competitive position and internal strengths, identifying managerial and organizational issues, evaluating and formulating various plans of action, and anticipating the consequences of alternative decisions.
ECO 105 is a prerequisite for this class.

ECO 310 | URBAN ECONOMICS | 4 quarter hours
(Undergraduate)
This course discusses the economic rationale for the existence of cities and urban areas. Location decision-making by both firms and households is analyzed with attention given to the resulting land values, land rents, population density gradients, and urban land use patterns. We study models of the supply and demand for housing, the measurement and determination of house value, and the corresponding problems of segregation, housing abandonment, property taxation, and public housing. Other urban problems such as poverty, crime, and transportation are also discussed.
ECO 105 is a prerequisite for this class.

ECO 312 | THE CHICAGO ECONOMY | 4 quarter hours
(Undergraduate)
The first part of this course will focus on changes in the Chicago metropolitan economy over time. Topics to be covered will include the development of the Chicago economy in the 19th Century, modern economic development, land use, and suburbanization. The second part of the course will focus on selected policy issues including poverty, housing, pollution, crime, education, transportation, and taxes.
ECO 105 is a prerequisite for this class.

ECO 313 | MARKET STRUCTURE AND REGULATION OF BUSINESS | 4 quarter hours
(Undergraduate)
This course discusses market failures and the economic role of government. Topics covered will include: government interventions that correct market failures, the efficiency of government policies, collective decision-making and voting, as well as the theory of optimal taxation and the incentive effects of taxes. Specific government programs such as Social Security and welfare programs are also analyzed. The emphasis is on the revenues, expenditures and policies of the federal government.
A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 314 | ECONOMICS OF THE PUBLIC SECTOR | 4 quarter hours
(Undergraduate)
This course examines the behavior of firms, especially how firms pursue business strategies, in real-world markets. What factors determine price and output? Why do firms like Apple, Google and Microsoft dominate their markets? And what are the implications of this dominance? Why does government intervene in market transactions? What has government done about mergers, price fixing, and false advertising?.

ECO 315 | INTRODUCTION TO MONEY AND BANKING | 4 quarter hours
(Undergraduate)
Introduction to Money and Banking. The structure of the American banking system; role of the Federal Reserve System; private financial markets and institutions; the effectiveness of monetary policy, and international finance.
ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 316 | EUROPEAN ECONOMIC HISTORY | 4 quarter hours
(Undergraduate)
European Economic History. Major factors and institutions which have influenced the economic development of European nations. Impact of these nations on U.S. development is also discussed.
ECO 105 and ECO 106 are prerequisites for this course.
ECO 317 | AMERICAN ECONOMIC HISTORY | 4 quarter hours
(Undergraduate)
This course addresses the major factors and institutions which have influenced the economic development of the United States, including differences in regional development, slavery, transportation improvements, western expansion, the rise of large scale business, and government policy responses.
ECO 105 and ECO 106 are prerequisites for this course.

ECO 318 | LABOR ECONOMICS AND ORGANIZATION | 4 quarter hours
(Undergraduate)
Historical and theoretical analysis of labor groups and labor market problems (including wage determination, unemployment and discrimination), with particular reference to the dynamic economy of the United States.
ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 319 | ECONOMICS AND GENDER | 4 quarter hours
(Undergraduate)
This course covers economic trends concerning women in the economy and examines economic analyses of gender issues, with special emphasis on gender issues in the work place. The increase in the number of women in the work place has been a major change in labor markets, affecting workers, employers and families. Different economic perspectives are examined to give students an understanding of the range of contributions by economists to this field. The course also examines feminist economics which raises concerns about economic analysis in general and as it is applied to this field.
ECO 105 and ECO 106 are prerequisites for this course.

ECO 320 | ECONOMICS OF RELIGION | 4 quarter hours
(Undergraduate)
This course examines selected economic and sociological aspects of religion in society. Some of the topics that are covered include marriage and divorce, fertility and population growth, schooling, church contributions and work.
ECO 105 and ECO 106 are prerequisites for this course.

ECO 321 | LAW & ECONOMICS | 4 quarter hours
(Undergraduate)
The overall goal of this course will be to demonstrate how businesses and government interact by surveying the economic and legal aspects of this relationship. This course is designed to prepare students to engage in methods of formal inquiry. The students will examine the American historical aspects of this relationship from the industrial revolution to the present. All topics are discussed with an emphasis on real-world applications and will include: a review of microeconomic theory pertaining to market structures with an emphasis on oligopolies; the history of antitrust; a review of the US legal and political framework; government regulation and key judicial decisions affecting businesses and industries concentrating on the legal and economic logic of those decisions. Class will begin with a discussion of current events once a week and it is expected that each student will attempt to participate and be knowledgeable of what is occurring locally, nationally and internationally.
ECO 105 is a prerequisite for this class.

ECO 322 | FINANCIAL MARKET REGULATION | 4 quarter hours
(Undergraduate)
This class explores policy approaches to regulating the financial system and the economy. The list of topics (such as regulation of banking, insurance and other financial services) changes depending on faculty and student interest. Other topics could include the solvency of Social Security and Illinois pension systems, student loans, cryptocurrencies, and providing financial services to underserved areas and groups. Students study the nature of market capitalism itself and proposals to reform it. This course builds on the Money and Banking course (ECO315 or FIN320) to permit deeper understanding of these issues.
ECO 315 or FIN 320 is a prerequisite for this class.

ECO 325 | THE ECONOMICS OF POVERTY | 4 quarter hours
(Undergraduate)
This class addresses society's view of poverty. It begins with an introduction to theories of economic justice for perspective. The introduction is followed by empirical issues related to the measurement of poverty and identification of its causes. An assessment of programs designed to ameliorate the effects of poverty also is covered.
ECO 105 and ECO 106 are prerequisites for this course.

ECO 326 | HEALTH ECONOMICS | 4 quarter hours
(Undergraduate)
Taking a microeconomic perspective, this course provides a comprehensive overview of the field of health economics building on economic principles, recent research, and problem-based learning. Students will consider conceptual and empirical analyses of: supply of and demand for health and medical services; role of insurance; influence of physicians and hospitals on price, quantity, and quality of services; factors that distort the market; and the impact of technological change on health care cost. The recent changes in federal law regarding health insurance coverage are considered as well.
ECO 105 (minimum of C-) and MAT 130 (or equivalent) are prerequisites for this class.

ECO 330 | RADICAL RESPONSES TO CAPITALISM | 4 quarter hours
(Undergraduate)
The collapse of communism in Central and Eastern Europe and the continuing movement of the Chinese economy away from central planning means there are few real world economies in the 21st century that fully embrace the classic socialist model. However, there continues to be an influence exerted by socialist theory on policy in contemporary economies as well as a heterodox theoretical tradition. This course will examine the current influence of socialist thinking on various economies in the world and how the character of radicalism has evolved in recent decades.
ECO 105 and ECO 106 are prerequisites for this course.

ECO 333 | TOPICS IN GLOBAL ECONOMIES | 4 quarter hours
(Undergraduate)
This course provides an introduction to the major changes in the global economy in the twentieth century. It will devote particular attention to comparative analysis of national economic institutions and performance and business conditions, as well as prominent international institutions such as the International Monetary Fund, World Bank, and World Trade Organization. Knowledge of microeconomic and macroeconomic analysis (Economics 105 and 106) will be presumed and applied to global economic flows and national institutions. Selection of countries and case studies from advanced and developing countries will vary according to recent economic developments.
ECO 106 is a prerequisite for this class.
ECO 334 | UNDERSTANDING CHINA’S ECONOMY | 4 quarter hours (Undergraduate)
The expansion of relations between China and foreign enterprises continues to entwine China’s economy with those of the world. This course will analyze China’s continuing evolution into a global market economy. We will examine China’s impact on the world economy and the problems that must be overcome for China to continue its dynamic growth. We will further discuss the characteristics of China’s evolution and how they can be extrapolated to other nations undergoing similar transitions.
ECO 105 and ECO 106 are prerequisites for this course.

ECO 335 | SUSTAINABLE STRATEGIES FOR ENERGY AND THE ENVIRONMENT | 4 quarter hours (Undergraduate)
This class explores the relationship between energy, business, the economy, the environment and society. An interdisciplinary approach and real world case studies are used to understand the various dimensions of sustainable energy strategies (economic, scientific, political, environmental) and how they impact business and society. In the end, students will be able to (1) assess the costs and benefits of different energy and environmental strategies, and (2) contribute to discussions about building more sustainable economies for the future.
ECO 105 is a prerequisite for this class.

ECO 336 | EXPLORING ECONOMICS & STATISTICS THROUGH SPORTS | 4 quarter hours (Undergraduate)
The main objective of this course is to have students use and understand economics analysis. It covers many of the basic principles/theories in microeconomics, using the sports industry to illustrate these topics. Students use concepts from Business core courses (microeconomics and statistics) to analyze questions such as 'Do large-city professional sports franchises have a competitive advantage over their small-market counterparts?' or 'Why did Chicago and the State of Illinois use $463 million of public money to refurbish Soldier Field?'.
(ECO 105 and MAT 137 or equivalent) are prerequisites for this course.

ECO 340 | DEVELOPMENT OF ECONOMIC THOUGHT | 4 quarter hours (Undergraduate)
A study of the most influential contributions to our understanding of political economy broadly understood. An historical examination of the development of economic theories with special emphasis placed upon their relevance to present economic and political issues.
ECO 105, ECO 106, MAT 130 and (ECO 306 with a minimum grade of C-) are prerequisites for this class.

ECO 341 | BEHAVIORAL ECONOMICS | 4 quarter hours (Undergraduate)
Behavioral Economics incorporates insights from psychology to expand the standard models of economic choice. This course will examine the findings from the psychology literature that inform the issue of decision making, explore how these findings have challenged standard economic models, and examine how the findings are being incorporated into economic thinking about choice. In addition to an introduction to the Behavioral Economics literature, students will have the opportunity to develop a project of their own using behavioral economics to examine a current economic issue.
A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 359 | DEVELOPMENT ECONOMICS | 4 quarter hours (Undergraduate)
By some estimates, approximately 1.4 billion people live on less than $1.25 a day. When the world's per capita GDP is $10,000, why do so many people live on so little? Life expectancy in many parts of sub-Saharan Africa is less than 50 years, and in Burundi the average adult has less than three years of schooling. Why does this happen, and what can be done to change this? Students will learn how to objectively measure levels of poverty and development. Students will come to understand and analyze which types of interventions lead to improvements in people’s lives. Using Stata, students will also learn techniques that researchers use to identify causal relationships between interventions and outcomes. A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 360 | ECONOMICS OF LOW-INCOME COUNTRIES | 4 quarter hours (Undergraduate)
This course analyzes economic development issues in low-income countries. Attention is given to several key issues including agricultural and rural development, population growth, human capital, international trade, foreign resource flows, the role of the public sector, and environmental quality.
(ECO 105 or ECO 106) is a prerequisite for this class.

ECO 361 | INTERNATIONAL TRADE | 4 quarter hours (Undergraduate)
This course deals primarily with the trade side of international economic relations. The main objective is the development of analytical tools required for an understanding of the gains from trade and barriers to trade. Particular emphasis is placed on currently pressing issues including the impact of trade on domestic employment and income, international trade tensions, and the rise of regional trade blocks.
ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 362 | INTERNATIONAL MONETARY ECONOMICS | 4 quarter hours (Undergraduate)
How does international trade and capital mobility affect a country’s ability to use fiscal and monetary policy to promote economic growth and successful development? This question and others of international importance are examined in an environment where other countries’ behavior matters. Topics to be explored include: the foreign exchange market under both fixed and floating exchange rate regimes, the balance of payments, economic policy in an open economy, and the role of international institutions such as the International Monetary Fund and World Bank.
ECO 106 and MAT 130 are prerequisites for this class.
will learn various methodologies to understand the time series processes currently available data into the STATA program. Additionally, students will build upon the STATA programming skills learned in ECO375 and government website FRED (Federal Reserve Economic Data). The data will be drawn from websites such as wsj.com and empirical support for them in the studies. Students will learn to use the techniques used but also discuss the economic issues and assess the背后的 properties of the OLS model. The course will review the standard textbook treatment of a topic, then review academic papers that use the techniques outlined in class. Students will be expected to read the assigned papers and be able to discuss not only the econometric techniques used but also discuss the economic issues and assess the empirical support for them in the studies. Students will learn to use the STATA statistical software package.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 375 | INTRODUCTION TO ECONOMETRICS | 4 quarter hours (Undergraduate)

What separates economics from most other social sciences is that our discipline begins with a few basic assumptions and utilizes these as building blocks for models of behavior. Models are only useful if they can be tested and economists have developed a large toolkit of statistical models that are used to test these theories. The workhorse statistical model in the social sciences is the ordinary least squares (OLS) regression. The bulk of the course will be spent outlining the theory behind and the properties of the OLS model. The course will review the standard textbook treatment of a topic, then review academic papers that use the techniques outlined in class. Students will be expected to read the assigned papers and be able to discuss not only the econometric techniques used but also discuss the economic issues and assess the empirical support for them in the studies. Students will learn to use the STATA statistical software package.

ECO 105, ECO 106, MAT 136 or equivalent, and MAT 137 or equivalent are prerequisites for this class.

ECO 376 | TIME SERIES ANALYSIS | 4 quarter hours (Undergraduate)

This course introduces time series regression models. Rather than focusing only on the technical and theoretical sides, primary attention is given to applications of time series regression models using economic and financial data. The data will be drawn from websites such as wsj.com and government website FRED (Federal Reserve Economic Data). The course will build upon the STATA programming skills learned in ECO375 [Introduction to Econometrics], particularly as they relate to extracting currently available data into the STATA program. Additionally, students will learn various methodologies to understand the time series processes in economics and finance.

ECO 304 or ECO 375 is a prerequisite for this class.

ECO 377 | ECONOMIC ANALYTICS USING SAS & R | 4 quarter hours (Undergraduate)

This course teaches advanced data analytical skills by identifying meaningful patterns of data and transforming patterns into statistical models to make more profitable decisions using big data. It covers descriptive, predictive, and prescriptive analytics. The class will introduce many practical methodologies through the use of SAS. The class covers the topics on advance levels of clustering analysis, discrete choice models, multivariate regression models, and neural network analysis to find the best suitable techniques to drive the best business decision.

ECO 304 or ECO 375, and a declared major in Economic Data Analytics (COB), Economics Honors (COB) or Economics Honors (LAS) are prerequisites for this class.

ECO 379 | GAME THEORY | 4 quarter hours (Undergraduate)

Game Theory provides a series of frameworks and tools to analyze strategic interactions. This course introduces the game-theoretic approach and shows its usefulness in understanding situations arising in economics, business, and other areas where agents make interdependent decisions. The main goal is for students to develop the ability to think about strategic problems and make strategic decisions in a more disciplined way.

A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 380 | MATHEMATICAL ECONOMICS | 4 quarter hours (Undergraduate)

Review of various mathematical functions useful in formulating economic theories followed by elements of Matrix algebra and its application to concepts of micro and macro economic equilibria. Particular emphasis will be placed on differential calculus, including the use of partial derivatives. These mathematical tools will be applied to optimization problems in micro and macro economic theory.

ECO 105, MAT 135 (or equivalent) and MAT 136 (or equivalent) are prerequisites for this class.

ECO 393 | INTERNSHIP IN APPLIED ECONOMICS | 4 quarter hours (Undergraduate)

This course provides an opportunity to apply knowledge acquired in the classroom to a real world situation within a private or public enterprise. Registration is by permission of the instructor following internship approval. The course can be used to satisfy the Liberal Studies Experiential Learning requirement or as an open elective. The course is not applicable to the economics electives required for the major or minor in economics.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 395 | CAPSTONE SEMINAR IN ECONOMICS | 4 quarter hours (Undergraduate)

A seminar in which students explore how the discipline of economics addresses issues from a different perspective than other disciplines within and beyond the social sciences. This course is the Liberal Studies Capstone Requirement for the LA&S Economics major and is restricted to LA&S economics majors with senior standing.

ECO 305, ECO 306 and status as an LAS Economics major with Senior standing is a prerequisite for this class.

ECO 398 | SPECIAL TOPICS | 4 quarter hours (Undergraduate)

Special Topics. Content and format of this course are variable. All topics will include an in-depth study of current issues in Economics. Subject matter will be indicated in class schedule. Prerequisites vary by topic.
ECO 399 | INDEPENDENT STUDY | 4 quarter hours
(Undergraduate)
An Independent Study may be available to students of demonstrated
capability for intensive independent work in economics. Written
permission of supervising faculty member, chair, and director of
undergraduate programs is required prior to registration. (variable credit)

ECO 435 | REAL ANALYSIS I | 4 quarter hours
(Graduate)
This course covers real number system, completeness, supremum, and
infimum, sequences and their limits, lim inf, lim sup, limits of functions,
continuity.
(MAT 149 or MAT 152 or MAT 162 or MAT 172) and (MAT 141 or
MAT 215) are a prerequisite for this class.

ECO 436 | REAL ANALYSIS II | 4 quarter hours
(Graduate)
This course follows ECO 435 and covers properties of continuous
functions, uniform continuity, sequences of functions, differentiation,
integration.
ECO 435 or MAT 335 or equivalents is a prerequisite for this class.

ECO 500 | MONEY AND FINANCIAL SYSTEMS | 4 quarter hours
(Graduate)
This course examines both the role of money in the economy from a
functional and macroeconomic perspective as well as the structure
and function of the most important financial institutions and financial
markets. Topics covered include the role of the Federal Reserve as
monetary policymaker, interest rate and exchange rate determination, the
relationship between money and economic activity, and the organization
and importance of money markets, capital markets, markets for derivative
securities, commercial banks and other intermediaries in a well-
functioning financial system.

MS in Taxation and MSAA students are restricted from registering for this
class.

ECO 501 | CONCEPTS OF MICRO AND MACRO ECONOMICS | 4 quarter hours
(Graduate)
This course investigates the basic elements of the economic way of
thinking. Students will begin with models of the consumer and the
producer, looking specifically at demand and supply, elasticity, measures
of efficiency, production and cost theory, and the determination of price
and quantity under different market structures. The remainder of the
course is devoted to analyzing the economy as a whole, focusing on
the determination of Gross Domestic Product, the role of money and
monetary policy, labor markets and unemployment, price stability, and
short-run fluctuations in output.
Status as a graduate accountancy student is a prerequisite for this class.

ECO 502 | ANALYSIS OF BUSINESS CONDITIONS | 2 quarter hours
(Graduate)
This survey course in macroeconomics will cover the nature of
macroeconomic activity including the component parts of aggregate
expenditures and the nature of key indicators of the economy’s
performance. The roles of fiscal and monetary policy makers will be
examined as well as the structure of the central bank.

MS in Taxation and MSAA students are restricted from registering for this
class.

ECO 503 | GLOBAL ECONOMY | 4 quarter hours
(Graduate)
This course is designed to be an introduction to the economic
environment in which businesses operate. With the increasing
interdependence of national economies and the growing role of global
enterprises, the understanding of international economic issues is
vital to decision-makers. The material covered will include both socio-
cultural aspects and economic and financial dimensions of global
business. Students should obtain a grasp of the basic theory as well as a
knowledge of the major current issues in the global economy.

ECO 505 | ADVANCED MICROECONOMICS | 4 quarter hours
(Graduate)
An advanced course in microeconomic theory. This course will present
a systematic and rigorous analysis of price determination and the
allocation of specific resources to particular uses.
Status as an Economics & Policy Analysis MS student (or instructor
consent) is a prerequisite for this class.

ECO 506 | ADVANCED MACROECONOMICS | 4 quarter hours
(Graduate)
An advanced course in macroeconomic theory that examines the
determination of income, employment, and prices, and their interrelations.
Covers traditional Keynesian as well as alternative models of output,
consumption, investment, money demand, inflation and unemployment.
The dynamic character of income determination is emphasized, along
with effects of government policy, economic institutions, and social
goals.

ECO 507 or status as an Economics & Policy Analysis MS student is a
prerequisite for this class.

ECO 508 | DATA ANALYTICS II: TIME SERIES AND PANEL DATA ANALYSIS
| 4 quarter hours
(Graduate)
This course focuses on the tools and techniques used to statistically
analyze economic data. We will focus on both theoretical understanding
(why do we use such tools and how do they work) and applied
understanding (the ability to carry on a research project using these
tools). Students will learn Stata, which is the most widely used statistical
analysis programming language in Economics. Students will learn the
practical skills of how to choose the right tools for the analysis, how
to prepare and inspect the data, and how to run an analysis that is
robust, can be replicated, and can be understood and used by others - all
extremely valuable qualities in real life work.

(GSB 420 or GSB 519 or equivalent) or status as an Economics and Policy
Analysis MS student is a prerequisite for this class.

ECO 509 | INDEPENDENT STUDY II | 4 quarter hours
(Undergraduate)
This Independent Study may be available to students of demonstrated
capability for intensive independent work in economics. Written
permission of supervising faculty member, chair, and director of
undergraduate programs is required prior to registration. (variable credit)
ECO 509 | BUSINESS CONDITIONS ANALYSIS | 4 quarter hours (Graduate)
This course teaches students how to use available economic data to assess business conditions. This is done by: (1) evaluating the sources and usefulness of data periodically released by government and private sources and (2) developing a macroeconomic framework that the student can use to analyze business conditions. Completion of this course will allow students to understand economic news and relate it to their business or job.

MS in Taxation and MSAA students are restricted from registering for this class.

ECO 510 | DATA ANALYTICS III: CAUSAL INFERENCE | 4 quarter hours (Graduate)
This course is about the research designs and methods that researchers use to support causal inferences in the social sciences. Some specific topics include randomized experiments, instrumental variables, regression discontinuity designs, difference-in-differences models, regression analysis, and propensity score matching. ECO 507 and ECO 508 are prerequisites for this class.

ECO 511 | BUSINESS AND ECONOMIC FORECASTING | 4 quarter hours (Graduate)
This course surveys a number of quantitative techniques commonly used to forecast business and economic variables. Emphasis will be on techniques, their relative strengths and weaknesses and real-world economic applications. Topics include smoothing techniques, regression and econometric analysis and Box-Jenkins time series. (GSB 420 or GSB 519 or equivalent) or status as an Economics and Policy Analysis MS student is a prerequisite for this class.

ECO 513 | DEMYSTIFYING THE FEDERAL RESERVE BANK | 4 quarter hours (Graduate)
This is a course about monetary policy. The Federal Reserve has (and other central banks have) the capacity to directly control interest rates and the monetary base (money supply) with an impact on real output growth, unemployment, inflation and financial stability. The expected movement in these variables is important for business and consumer decisions. The Fed has been criticized as of late for policies that put us into the recent financial crisis and for policies that do not appear to be getting us quickly out of the current slowdown, but instead are setting the country up for higher inflation. This course will focus on the theory and evidence of what the Fed does (and other central banks do), why they do it and how what they do affects our well-being. It is meant to demystify their policies by providing a rationale behind their statements and actions. Unlike most courses that rely on textbooks, this course will have numerous topics and readings that do not yet appear in traditional texts. Consequently, it will include some of the latest (over the last couple of years or months) ideas on what central banking is and should be about.

ECO 502 or ECO 509 or ECO 506 is a prerequisite for this class.

ECO 514 | INDUSTRIAL ORGANIZATION | 4 quarter hours (Graduate)
This course is concerned with how the market system directs production decisions under varying deviations from the competitive environment. The links between market structure, conduct and performance are examined. Topics include determinants of market structure, various theories of imperfect competition, price discrimination, predatory pricing, and antitrust policy.

ECO 555 or 505
ECO 525 | STRATEGIC DECISION MAKING AND GAME THEORY | 4 quarter hours  
(Graduate)  
The goal of this course is to introduce students to game-theoretic way of thinking and show its usefulness in understanding various problems arising in business, economics, as well as many other disciplines and every day life. The tools used in game theory are analytical in nature, and hence the building blocks of the course will necessarily draw on analytics. The instructor’s job will be to make these analytics accessible to students without using too much mathematics. Once students grasp these tools, a variety of applications will be presented, discussed, and illustrated using experiments. These applications will be mainly in the fields of business and economics, but will often span to other areas like law, politics, biology, and ethics. In this way, students will get a broad perspective of the multiple applications of game-theoretic reasoning.  
ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.  

ECO 526 | BUSINESS STRATEGY | 4 quarter hours  
(Graduate)  
This class deals with firms’ business plans and policies and how they change in response to various incentives and stimuli. We will discuss frameworks used to analyze and formulate business strategies. We will introduce tools and techniques for diagnosing a firm’s competitive position, identifying managerial and organizational issues, evaluating plans of action, and anticipating the consequences of alternative decisions.  
ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.  

ECO 527 | BUSINESS REGULATION AND ANTITRUST | 4 quarter hours  
(Graduate)  
This course examines the rationale for and efficiency of government regulation of business in the United States. Various forms of government regulation are evaluated to determine their effectiveness in promoting market efficiency. We will emphasize the importance of market structure and industrial performance, including the strategic interaction of firms. We will examine the behavior of individual markets in some detail, focusing on cost analysis, the determinants of market demand, investment behavior, market power, and the implications of government regulatory behavior.  
ECO 555 or 505  

ECO 528 | STRATEGIES AND PROCESSES OF NEGOTIATIONS | 4 quarter hours  
(Graduate)  
This course is geared towards developing negotiation skills that are important in both the business world as well as day to day life. We will consider both practical and theoretical aspects of negotiations. In the theoretical part, we will learn what factors affect negotiations success. For example, what is the alternative if an agreement is not reached? In the practical part, we will practice negotiations in class using relevant case studies.  
ECO 555 is a prerequisite for this class.  

ECO 529 | COMPETITION, STRATEGY AND ANTITRUST POLICY | 4 quarter hours  
(Graduate)  
This class introduces major topics in the economics of imperfectly competitive industries, competition policy, and the economics of incentives and information. The main goals are to understand basic firm behaviors and interactions under various industry configurations, and to scrutinize these behaviors and interactions through the lenses of competition policies (antitrust laws and regulation). We will draw on microeconomic theory, game theory and competitive strategy, as well as empirical evidence and a variety of case studies.  
ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.  

ECO 530 | HISTORY OF ECONOMIC THOUGHT | 4 quarter hours  
(Graduate)  
A study of the evolution of the science of economics. Emphasis is on the important contributions made to the field by the great thinkers, starting with the Physiocrats and extending to the work of contemporary institutional and post-Keynesian economists.  
ECO 555 or 505  

ECO 531 | BUSINESS MODELS AND INNOVATION STRATEGY | 4 quarter hours  
(Graduate)  
This course studies the intersection of three areas: (a) Business Models, (b) Innovation Strategy, and (c) Dynamic Competition. We will explore each of these areas through assessments of conceptual and empirical papers, case study assignments, student presentations, and an experiential consulting project with a local company. We will emphasize the tradeoffs in pursuing certain strategies given the constraints imposed by the competitive environment, the resources and capabilities of the firm, and the impact of technological innovation across various industries. Other topic areas include platform economics, networks and standards, intellectual property, and methods of pivoting business models in the presence of disruptive technologies.  
ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.  

ECO 535 | BEHAVIORAL ECONOMICS AND DECISION-MAKING | 4 quarter hours  
(Graduate)  
Behavioral Economics studies the psychological processes and biases underlying decision-making in economics and other connected areas. The course focuses on optimality in decision-making by consumers and producers, and emphasizes where and how deviations from optimality affect the profitability of business strategies and the efficiency of economic policies. Students learn and discuss the most robust and relevant theoretical and empirical findings in Behavioral Economics through a variety of applications in economics, business, and managerial and policy-driven environments.  
ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.
ECO 540 | THE BUSINESS OF HEALTH | 4 quarter hours (Graduate)
This course provides an overview of the healthcare sector, including the pharmaceutical and medical device industry, health insurance, healthcare providers, and public sector. The overarching perspective of the course will be through the critical lens of economics in that the underlying incentive mechanism (or lack thereof) will be probed and evaluated. Even students new to the healthcare sector will gain a wide-ranging understanding of the myriad ways in which the healthcare industry touches all of us.

Not available to MSEPA Students.

ECO 541 | HEALTHCARE DATA ANALYTICS | 4 quarter hours (Graduate)
This course will provide students with an overview of the complex data decision-makers in the healthcare industry must make sense of every day. These data include but are not limited to health insurance billing, electronic health records, patient satisfaction surveys, disease surveillance data, and others. A key overriding issue will be the development of skill to distinguish correlation from causation.

GSB 420 (or GSB 420 waiver) or GSB 519 (or GSB 519 waiver) or IT 403 (or IT403 milestone) is a prerequisite for this class.

ECO 542 | HEALTH ECONOMICS | 4 quarter hours (Graduate)
Health Economics is the study of the allocation of resources relating to health and the market for medical care. Taking a microeconomic perspective, this course provides a comprehensive overview of the field of health economics building on economic principles, recent research, and problem-based learning. Students will consider conceptual and empirical analyses of: supply of and demand for health and medical services; role of insurance; influence of physicians and hospitals on price, quantity, and quality of services; reimbursement mechanisms; factors that distort the market; and the impact of technological change on health care cost. Students will also learn how analytic tools such as cost-benefit and cost-effectiveness analyses can contribute to decision making for the provision and financing of health care.

ECO 505 or ECO 555 is a prerequisite for this class.

ECO 550 | REGIONAL AND URBAN ECONOMICS | 4 quarter hours (Graduate)
The course investigates the spatial character of an economic system. The first part of the course is concerned with theories in regional economics, including business and household location theory, urbanization, and regional development. The latter part of the course deals with urban economics, a specialized area concerned with the economic forces behind many urban problems. Topics include the economics of housing, transportation, poverty, crime and urban public finance.

ECO 505 or 505

ECO 555 | MANAGERIAL ECONOMICS | 4 quarter hours (Graduate)
This course focuses on the application of microeconomic principles to managerial decision making. These principles include the theories of consumer choice, production and cost as they relate to decisions made by firms and households under various industry configurations. Specific topics are consumer and market demand; elasticities; production theory; cost structure; profit maximization; market impacts of government interventions; externalities; and the effect of market structure on firm decisions on pricing, output and profit.

ECO 557 | INTERNATIONAL TRADE THEORY & POLICY | 4 quarter hours (Graduate)
Modern theories of international trade: classical theory of comparative advantage, factor proportions theory, factor price equalization, application of welfare economics to international trade, including regional economic integration, commercial policy and tariff problems. Cross-listed with IB 520.

ECO 555 or 505

ECO 558 | INTERNATIONAL MACROECONOMICS | 4 quarter hours (Graduate)
Analyzes traditional macroeconomic issues in a framework that allows for international trade and capital flows. Cross-listed as IB 521.

ECO 506 or ECO 509 is a prerequisite for this class.

ECO 560 | DEVELOPMENT OF THE AMERICAN ECONOMY | 4 quarter hours (Graduate)
This course describes the economic development of the United States by examining topics such as: colonial settlement patterns, the impact of the railroad, the development of the financial system and the Great Depression.

(ECO 505 or ECO 555) and (ECO 506 or ECO 509) are prerequisites for this class.

ECO 561 | ECONOMICS OF DEVELOPING COUNTRIES | 4 quarter hours (Graduate)
Introduction to the economist's analytical skills applied to problems of developing and newly industrialized countries. Studies economic theory of development, development policy, and decision-making in the developing world; several case studies are examined. Cross-listed with IB 525.

ECO 555 or 505

ECO 600 | THESIS RESEARCH | 4-8 quarter hours (Graduate)
Thesis Research.

ECO 798 | SPECIAL TOPICS | 4 quarter hours (Graduate)
Content and format of this course are variable. An in-depth study of current issues in economics. Subject matter will be indicated in class schedule.

ECO 799 | INDEPENDENT STUDY | 4 quarter hours (Graduate)
Available to graduate students of demonstrated capability for intensive independent work in economics.

Educating Adults (EA)

EA 505 | APPLIED INQUIRY PROJECT PROPOSAL I | 0.5 quarter hours (Graduate)
Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project advisor. Proposal I emphasizes selecting a project topic/focus, identifying the primary users, and conducting a literature review. Proposal II emphasizes shaping and designing the inquiry project, and outlining the final product(s). Upon completion of both phases, the proposal must be approved by the Academic Committee and Graduate Student Program Review Committee (GSPRC). (.5 quarter hour)

Status as an MAEA student or departmental permission is a prerequisite for this class.
EA 506 | APPLIED INQUIRY PROJECT PROPOSAL II | 0.5 quarter hours (Graduate)
Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project advisor. Proposal I emphasizes selecting a project topic/focus, identifying the primary users, and conducting a literature review. Proposal II emphasizes shaping and designing the inquiry project, and outlining the final product(s). Upon completion of both phases, the proposal must be approved by the Academic Committee and Graduate Student Program Review Committee (GSPRC). (.5 quarter hours)
Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 507 | APPLIED INQUIRY PROJECT PROPOSAL I | 1 quarter hours (Graduate)
Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project advisor. Proposal I emphasizes selecting a project topic/focus, identifying the primary users, and conducting a literature review. Proposal II emphasizes shaping and designing the inquiry project, and outlining the final product(s). Upon completion of both phases, the proposal must be approved by the Academic Committee and Graduate Student Program Review Committee (GSPRC). (1 quarter hour)
Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 508 | APPLIED INQUIRY PROJECT PROPOSAL II | 1 quarter hours (Graduate)
Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project advisor. Proposal I emphasizes selecting a project topic/focus, identifying the primary users, and conducting a literature review. Proposal II emphasizes shaping and designing the inquiry project, and outlining the final product(s). Upon completion of both phases, the proposal must be approved by the Academic Committee and Graduate Student Program Review Committee (GSPRC). (1 quarter hour)
Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 515 | DEVELOPING PROFESSIONAL IDENTITY | 4 quarter hours (Graduate)
In this foundation course, students will situate their own area of practice in broader contexts of adult learning and adult education. Students will systematically reflect on their professional identity(ies), examine their practice in the context of philosophical traditions, and construct their own philosophy of education to guide their practice. They will expand their academic sources and professional networks. Students will begin work on their individual program portfolios, which will be constructed throughout their program.
Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 516 | DESIGNING EDUCATIONAL OFFERINGS | 4 quarter hours (Graduate)
In this course, students will be introduced to major components involved in designing educational offerings for adult learners in various face-to-face settings. Students will develop (or revise) a design plan for an educational offering appropriate to their selected adult clientele. In particular, they will articulate learning outcomes around which to build their design plan (backward design). They will apply theories, concepts, and principles of adult learning while making design decisions. While the design principles addressed in this course are relevant to on-line environments, students who wish to delve further into on-line learning/teaching technology are encouraged to do so through the MAEA Electives option.

EA 517 | FACILITATING ADULT LEARNING | 4 quarter hours (Graduate)
In this course, students will develop and hone skills to facilitate adult learning in a variety of settings. Students will learn about concepts that inform learner-centered methods and techniques of facilitating learning. Throughout the course, they will apply various methods and techniques in various settings and reflect on how these methods influence learning. The repertoire of skills that students develop as facilitators of learning will have both immediate and future application. While the concepts, methods, and techniques covered in this course are relevant to on-line learning, students who wish to delve further into facilitating on-line learning are encouraged to do so through the MAEA Electives option.

EA 518 | ENHANCING PRACTICE WITH THEORY IN ADULT LEARNING | 4 quarter hours (Graduate)
In this capstone course, students’ practices in helping adults learn will be grounded in relevant theories, models, and principles of adult learning and development. Students will examine various strands of research and theory that support, challenge, and enhance their practices in working with adult learners in their selected settings. Students will have many opportunities to explore and share new ideas and approaches through the various perspectives studied, thereby enhancing one another’s theoretical foundations.

EA 525 | CONDUCTING PRACTICE-BASED INQUIRY | 4 quarter hours (Graduate)
In this course, students will be introduced to methods, strategies, and techniques appropriate for qualitative research designs. Students will select a topic of inquiry (research topic) relevant to their individual practice setting. The history and philosophy of qualitative research in the social sciences will be briefly explored to provide the framework for designing a research plan appropriate to their selected inquiry topic. Students will investigate various literature related to their topic of inquiry, research designs, data collection and analysis strategies, and research reporting formats. In this way, EA 525 becomes a springboard for independent learning projects, including the Applied Inquiry Project (AIP). Students who wish to augment qualitative research with quantitative approaches are encouraged to do so through the MAEA Electives option.
EA 526 | ASSESSING ADULT LEARNING | 4 quarter hours  
(Graduate)  
In this course, students will learn about and apply various approaches for assessing learning outcomes of individuals in ways that also contribute to the learning process. The assessment of adult learning entails examining the actual outcomes of learning activities in relation to intended outcomes in order to make determinations about, and continually improve, both student learning and facilitator instructional practices. Students will address these components as they develop an assessment plan relevant to their practice setting and gain skill in designing assessment instruments.

EA 528 | APPLIED INQUIRY PROJECT | 4 quarter hours  
(Graduate)  
In consultation with the faculty mentor and a project guide, each student will design and carry out a project that addresses a significant question/issue in the student’s area of practice, with the aim of enhancing practice informed by relevant frameworks and ideas. The final product must be approved by GSPRC.  
Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 528C | APPLIED INQUIRY PROJECT CAPSTONE | 4 quarter hours  
(Graduate)  
Within the structure of this course, students will complete their Applied Inquiry Projects (AIP), the culminating project of their Master of Arts in Educating Adults (MAEA) program. Key elements of the AIP are that it has a clear focus; draws on relevant literature; employs an appropriate inquiry design; and results in an applied product relevant to their area of practice in educating adults. Students will draw on learning from prior MAEA courses, in particular EA 525 [inquiry design] and EA 518 [adult learning theories]. Students may work on a project already in process (if they have already begun their AIP work independently), or select a project from among topics provided by the instructor. Structured guidance and assignments will support both pathways. A learning contract approach will be used for either option.  
LLS 450B is a prerequisite for this class.

EA 535 | REFLECTIVE PRACTICE SEMINAR I | 0.5 quarter hours  
(Graduate)  
This is a faculty mentor-guided session, which follows EA 515. Students revisit their selected area of practice, select purposes for their program portfolio, and plan for development of the Elements of Reflective Practice.  
Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 536 | REFLECTIVE PRACTICE SEMINAR II | 0.5 quarter hours  
(Graduate)  
Students meet with their faculty mentor for group reflection and review of their progress in the program. This seminar assists students in planning their electives, reflecting on applications of their learning and assessing growth in the Elements of Reflective Practice, mapping theories and concepts to their practice settings, and sharing approaches to their program portfolios.  
Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 537 | REFLECTIVE PRACTICE SEMINAR III | 0.5 quarter hours  
(Graduate)  
Meeting with their faculty mentor, this seminar offers students an opportunity to get feedback on plans for the Applied Inquiry Project, conduct an informal mid-program review, examine ways in which students are applying the three Elements of Reflective Practice, identify significant threads? across the curriculum, and present on aspects of their program portfolios.  
Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 538 | REFLECTIVE PRACTICE SEMINAR IV | 0.5 quarter hours  
(Graduate)  
Near the end of the program, students join their faculty mentors in a summit to review their program, engage in discussion on their next steps, review their credo of educating adults, reflect again on the three Elements of Reflective Practice, and present their program portfolio.  
Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 540 | DESIGNING AND DELIVERING TECHNOLOGY-ENHANCED LEARNING OFFERINGS | 4 quarter hours  
(Graduate)  
This course focuses on designing and delivering educational experiences using the web, digital video, animation, gaming and mobile delivery formats. Students explore instructional design theory and bridge its application into/through basic training in each of these technological applications, including consideration of relevant examples of best practices and instructions regarding when to employ each application. This course does not have prerequisites; however, students are expected to be familiar with basic learning design principles.

EA 541 | TEACHING WITH WRITING IN ANY COURSE | 2 quarter hours  
(Graduate)  
This online course (six-modules) for teachers in any discipline focuses on making the most of writing as a tool for teaching and learning in undergraduate and graduate courses. In the course, teachers will explore practical ideas for in-class writing assignments that initiate discussions and provide quick input regarding student learning. Teachers will also learn strategies for developing assignments and providing feedback while maximizing efficiency and minimizing frustration. Opportunities to share ideas and receive coaching on current writing assignments and ways of giving feedback are included. This course does not have prerequisites; however, those taking it should have undergraduate or graduate courses that they wish to develop or revise and experience teaching at the college level that they can draw upon for discussions. (2 quarter hours)

EA 542 | DESIGNING OUTCOME-BASED PROGRAM EVALUATION: PERSPECTIVES & PRACTICES | 2-4 quarter hours  
(Graduate)  
This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Each student designs a plan for outcome-based program evaluation, along with evaluation tools, that are relevant to his/her practice setting. This evaluation approach is then considered in relation to other models and approaches to evaluation of education, training and professional development programs. Illustrations of current program evaluation practices are included (2 quarter hours)
EA 543 | INNOVATIVE FACILITATING GFDIS | 2 quarter hours (Graduate)
This course functions as a Graduate Faculty-Directed Independent Study/ GFDIS. (See MAEA Guidebook for general GFDIS details.) Students participate in SNL's Adult Learning Innovation Institute (Module: Innovative Strategies for Facilitating Adult Learning), learn innovative strategies for engaging and motivating adult learners in various educational and training settings and subsequently apply their learning in specific ways within their practice settings. Students also receive feedback and coaching from instructors and institute peers. (Questions? For information regarding the Institute, contact caea@depaul.edu. For information regarding the GFDIS-course, contact its instructors.) (2 quarter hours)

EA 544 | BUILDING GAMES FOR LEARNING GFDIS | 4 quarter hours (Graduate)
This course functions as a Graduate Faculty-Directed Independent Study/ GFDIS. (See MAEA Guidebook for general GFDIS details.) Technology advances make it possible to enhance social learning (interpersonal) in cost-efficient ways by creating simulations and other forms of virtual delivery. This course focuses on ways to apply game concepts and game techniques, supported by foundational theories, that can be applied in various settings, e.g., corporate, higher education, community-based. Using simulation software (Articulate Storyline provided by the instructor), students will produce interactive serious games for virtual delivery for their targeted audience. Students are expected to be proficient in use of Microsoft Word and Power Point and have a computer with Internet access.

EA 545 | PARTNERING FOR SOCIAL ACTION GFDIS | 4 quarter hours (Graduate)
This course functions as a Graduate Faculty-Directed Independent Study/ GFDIS. (See MAEA Guidebook for general GFDIS details.) This course provides opportunities for students to engage in community settings throughout Chicago. Students will learn how to: observe social agency in action; build relationships across class, race and other barriers to mutual understanding; and, actively participate in service opportunities with organizations addressing social justice concerns. In addition to hands-on engagement in the field, students will explore theories and principles related to community empowerment work in community settings. Students must contact the instructor prior to registering for this GFDIS to obtain information about available community settings/projects and time/schedule/location expectations. Onsite community project work and meeting schedule (max five) will be determined based on the selected project work.

EA 546 | EDUCATING FOR SOCIAL JUSTICE GFDIS | 4 quarter hours (Graduate)
This course functions as a Graduate-Faculty-Directed Independent Study/ GFDIS. (See MAEA Guidebook for general GFDIS details.) Students critically examine and apply diverse ways of defining, analyzing and engaging in social justice education, as both educators and learners. Key dimensions of social justice approaches to education of adults (culture, ethics and politics; facilitation; curriculum development; and, educator as change-agent) will be addressed. In addition to critical reflection on assigned readings, students will observe social justice education in a community context (arranged by the instructor) and will apply social justice principles to an educational offering in their own practice sites.

EA 547 | DESIGNING ONLINE LEARNING GFDIS | 4 quarter hours (Graduate)
This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Course addresses the process of designing effective, learner-centered online offerings such as webinars, workshops, or modules for use in formal education or training settings. Using adult learning principles, best practices, and backward planning, learning outcomes, content, and assessments are developed and delivered in a virtual environment. Formal and informal learning communities are explored using social media for learner engagement and interaction. The instructor incorporates interactive lectures and group discussions. Assessment criteria and rubrics guide feedback for ongoing learning as well as for final evaluation of performance. Students will have an opportunity to design an offering specifically applicable to their needs and interests with regard to helping adults learn.

Education - General (EDU)

EDU 25 | BASIC TECHNOLOGY LITERACY | 0 quarter hours (Undergraduate)
This online course provides students with a knowledge about assembling, using, and troubleshooting basic technology hardware and software. In this course, students demonstrate understanding of basic computer setup and the use of peripheral devices such as printers, speakers, flash drives, scanners, digital cameras, videos, and computer software. (0 credit hours)

EDU 95 | CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH | 0 quarter hours (Undergraduate)
Required of all students. Observations and participatory experience with children and youth in a school or agency. This course is a prerequisite for student teaching and related professional courses. (0 credit hours)

EDU 100 | INTEGRATIVE KNOWLEDGE E-PORTFOLIO | 0 quarter hours (Undergraduate)
This course provides an introduction to the Digication e-portfolio platform and the development of integrative knowledge e-portfolios. Prerequisite: Permission of instructor. (0 credit hours)

EDU 115 | CRITICAL THINKING AND LEARNING STRATEGIES | 2 quarter hours (Undergraduate)
This 2 quarter hour course is designed to develop a learning community for transfer students and/or students who desire to advance academic skills and knowledge through professional writing, metacognitive study strategies, critical thinking and reading, and research and technology. (2 credit hours)

EDU 125 | THE SCIENCE OF HUMAN COGNITION | 4 quarter hours (Undergraduate)
In this course we will consider traditional and modern practices for measuring human cognition. We will read, think, and talk about these practices from a variety of social and cultural contexts. We will consider the application and value of cognitive neuroscience to the future of this field of study. We will also venture into how, over time, research into human cognition and how people learn has impacted schooling, teaching practices, and political agendas.
EDU 499 | LANGUAGE AND LITERACY PRACTICES ACROSS THE ACADEMY | 0 quarter hours 
(Graduate)
This course addresses issues related to the use of English in the Academy, particularly (1) in classrooms where English is not the native language of the instructor or students but is the language of instruction and/or (2) in scholarship written in English by non-native speakers of English. Topics include but are not limited to academic writing, curriculum development, classroom pedagogy, content pedagogical knowledge, globalization and international education, 21st century technologies, and English as a medium of instruction. Registration with permission of instructor only. (0 credit hours)

Primary Education (EE)

EE 281 | INTRODUCTION TO EDUCATIONAL PRACTICE | 4 quarter hours 
(Undergraduate)
This is the first in a sequence of theory and practice courses that serves to familiarize teaching candidates with the world of elementary education observation and participation in schools, self-reflection, independently created assignments, cooperative learning assignments and classroom discussion, candidates will acquire familiarity with schools and classrooms including: social/cultural context, classroom climate, classroom management, curricular coherence, standards-based instruction, and teacher professional beliefs and practices. Written critical reflections and papers serve as a foundation for the development of teaching philosophies. Required field experiences are integrated into this course.

EE 317 | PHYSICAL EDUCATION AND CLASSROOM MANAGEMENT IN THE ELEMENTARY SCHOOL | 4 quarter hours 
(Undergraduate)
The course is designed to promote an understanding of the contribution that Physical Education makes to the elementary school curriculum and the development of the whole child. Lesson planning, instructional delivery, and classroom management will be focused as students engage in 15-20 hours of supervised field experience teaching whole classes of children in local schools.

EE 281 and an Education major or minor are prerequisites for this class.

EE 324 | READING/LANGUAGE ARTS IN THE EARLY YEARS | 4 quarter hours 
(Undergraduate)
This course focuses on the curriculum content and sequence, instructional and assessment strategies as well as considerations integral to the creation of authentic, effective emergent literacy environments and engagements for kindergarten through third grade. Theory and practice principles are woven into course assignments and required field experiences designed to observe, teach, and reflect upon instructional decisions made for individual as well as groups of children. Prevailing curricular and instructional models (e.g., code-based, meaning-oriented, balanced) and their histories are compared and contrasted. The influences of development, home language(s) and dialect(s) (especially those of U.S. metropolitan areas), and educational settings are studied and applied to candidate instructional planning and teaching. Case studies and lesson planning facilitate the application of course content. (EE 281 or ECE 290) and an Education major or minor are prerequisites for this class.

EE 326 | READING/LANGUAGE ARTS IN THE INTERMEDIATE GRADES | 4 quarter hours 
(Undergraduate)
This course extends Emerging Reading and Language Arts to facilitate increased independence in students as strategic readers and competent writers. It focuses on the further development of reading comprehension and writing abilities in the intermediate grades. Emphasis is placed on the complex nature of literacy addressing issues such as content-area literacies, learning in and across languages, and critically consuming and producing a wide variety of texts (including online, multimedia and print based). Application of course material is facilitated through the design, teaching, and reflection on literacy lesson(s) for intermediate learners in required field experiences.

EE 281, EE 324, and an Education major or minor are prerequisites for this class.

EE 330 | URBAN EDUCATION RESIDENCY | 4 quarter hours 
(Undergraduate)
The Urban Education Residency is designed to enhance students’ knowledge and experiences working in urban school settings. Working along professional urban educators, preservice elementary candidates will gain first-hand experience in best pedagogical practices that make teaching and learning culturally relevant in diverse urban elementary classrooms and support students’ academic success. Students will build a repertoire of strategies that will enable them to become reflective and effective urban professional educators.

An education major or minor is a prerequisite for this class.

EE 333 | TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS | 4 quarter hours 
(Undergraduate)
This course is an introduction to materials, processes for developing, and strategies for mathematical literacy in grades 1-6. Particular attention will be given to the theoretical views about how children learn mathematics, the proper use of manipulative materials, the development of mathematical thinking, e.g., skills in estimation, pattern recognition, or spatial perception; and the use of technology, and ways to assess student progress. Daytime clinical hours are required. Note: MAT 111 may be taken as a prerequisite OR it may be taken concurrently with EE 333. MAT 110, EE 281, and an Education major or minor are prerequisites for this class.

EE 334 | ELEMENTARY SCIENCE INQUIRY TEACHING STRATEGIES | 4 quarter hours 
(Undergraduate)
This course is an introduction to instructional strategies for helping students in grades 1-6 become science literate: i.e., to understand the nature of science and its impact on the world. Particular attention will be given to theoretical views about how children learn science and develop scientific process skills, e.g., skills in observing, classifying, collecting and interpreting data and questioning strategies, and ways to assess student progress. Daytime clinical hours are required.

EE 281 and an Education major or minor are prerequisites for this class.
EE 344 | ART AND MUSIC IN THE ELEMENTARY SCHOOL | 4 quarter hours
(Undergraduate)
This course focuses on the arts (visual art, music, drama and dance) as an integral component of teaching and learning in the elementary school curriculum. Students will explore a variety of art forms and disciplines to develop a critical aesthetic and artistic vocabulary. Students learn to help children utilize artistic media in the exploration and expression of thoughts and feelings. Emphasis is placed on design, construction, and implementation, and assessment of authentic conceptual classroom arts activities that integrate the arts with other classroom curricula. Daytime clinical hours (10) are required during this course.

EE 281 and an Education major or minor are prerequisites for this class.

EE 347 | CHILDREN'S LITERATURE | 4 quarter hours
(Undergraduate)
This course familiarizes students with quality children's literature for infancy through young adulthood. Students will select, discuss, critique, and share books appropriate for this age span, focusing primarily on ages 1-6 years. The influences of child development, culture, technology, and education stakeholders (i.e., parents, students, teachers, administrators, and their community) on literature selection are emphasized. Students will develop skills in evaluating books, responding to books, and using literature across the curriculum.

EE 355 | METHODS: CONTEMPORARY TEACHING OF SOCIAL STUDIES | 4 quarter hours
(Undergraduate)
This course is an introduction to an integrated view of social studies for engaged citizenship. Through the study of strategies such as concept formation, historical inquiry, and role-play, and materials, such as primary sources, teacher candidates will apply principles of curricular integration to create curriculum/units that engage elementary learners in the exploration of issues, ideas, and perspectives that impact our world. Daytime clinical hours are required.

EE 281 and an Education major or minor are prerequisites for this class.

EE 356 | ASSESSMENT IN THE ELEMENTARY CLASSROOMS | 4 quarter hours
(Undergraduate)
This course focuses on study, use, and evaluation of assessment practices in diverse, elementary school contexts. Assessment is addressed as part of instructional systems, attending to issues including: the appropriate use of standardized measures, formal and informal classroom assessment, portfolio development, as well as reporting to all stakeholders. This course also emphasizes ways of involving students and parents in assessment processes, how to observe and assess children individually and in classroom settings, and the use of numerous technologies as components of a classroom assessment system.

EE 281, SCU 337, and (EE 324, EE 333, EE 334, or EE 355) and an Education major or minor are prerequisites for this class.

EE 384 | CAPSTONE IN ELEMENTARY EDUCATION | 4 quarter hours
(Undergraduate)
The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective elementary educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to engage in critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to elementary education. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies Program. COREQUISITE(S): EE 385.

EE 385 | ELEMENTARY STUDENT TEACHING | 10 quarter hours
(Undergraduate)
Five school days a week supervised teaching in a cooperating school for a full academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. Application and approval required. Open only to DePaul students. (10 credit hours)

EE 387 | CAPSTONE SEMINAR IN ELEMENTARY EDUCATION | 2 quarter hours
(Undergraduate)
The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective elementary educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to engage in critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to elementary education. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies Program. COREQUISITE(S): EE 385.

EE 399 | INDEPENDENT STUDY IN ELEMENTARY EDUCATION | 1-4 quarter hours
(Undergraduate)
Permission of program chair required. (1 credit hour)

English (ENG)

ENG 101 | INTRODUCTION TO LITERATURE | 4 quarter hours
(Undergraduate)
This course introduces students to the art of literary analysis. Through reading novels, stories, plays, and poems, students will develop the skills needed to gain a deeper appreciation of literature. Students will learn about the choices authors make to convey meaning, and will practice reading closely and deeply in order to understand the nuances of literary language. Each section of this course will focus on a specific theme (e.g. "Heroes and Villains," "Passion and Betrayal," "Coming of Age," etc.), and different sections will focus on different literary genres; please see the schedule for current offerings. This course is not repeatable.

ENG 102 | INTRODUCTION TO POETRY | 4 quarter hours
(Undergraduate)
This course provides an introduction to poetry through the study of meter, rhyme, figurative language, form, and genre. Students will learn how to understand and appreciate poetry from a wide variety of periods and traditions. Students will leave the course with a greater appreciation for the beauty of language and with the interpretive skills needed to make reading any poem a rewarding experience.

ENG 103 | INTRODUCTION TO DRAMA | 4 quarter hours
(Undergraduate)
One of the most ancient art forms, drama combines the art of storytelling with the excitement of live performance. Students will learn about dramatic structure and technique as they explore major themes in a selection of dramatic works from antiquity to the present. In addition to studying plays within their various historical and cultural contexts, students will consider the performance possibilities inherent in dramatic texts. Authors may include Sophocles, Shakespeare, Moliere, Henrik Ibsen, Arthur Miller, Samuel Beckett, Lorraine Hansberry, August Wilson, Caryl Churchill.
This course focuses on great works of literature that are widely considered to be classics. Works studied might range from Greek drama up through modern American novels, by authors such as Shakespeare, Dante, Austen, Tolstoy, Goethe, Bronte, Dostoevsky, Hemingway, Yeats, Virginia Woolf, or Toni Morrison. Variable emphasis on different authors, texts, themes, and historical periods. See schedule for current offerings. This course is not repeatable.

**ENG 120 | READING LITERATURE | 4 quarter hours (Undergraduate)**

Study of the elements and construction of literary texts, of the vocabulary of literary criticism, and of various literary modes and genres.

**ENG 130 | THEMES IN LITERATURE | 4 quarter hours (Undergraduate)**

Introduction to the study of literature through selected literary texts focused on a particular theme. Variable topics. May not be repeated.

**ENG 197 | CLOSE ENCOUNTERS WITH LITERATURE | 2 quarter hours (Undergraduate)**

This course provides a focused, in-depth exploration of a single literary text, theme, author, or topic. For example, one section of the course might focus just on Jane Austen's Pride and Prejudice and its adaptations, while another section might explore Shakespeare's sonnets or stories by Jhumpa Lahiri. Please see the schedule for current offerings. This course can be repeated with different topics. Two quarter hours credit.

**ENG 198 | CREATIVE WRITING CLOSE UP | 2 quarter hours (Undergraduate)**

This course is a focused creative writing workshop that concentrates on a specific skill, genre, or topic. For instance, one section of the course might focus on writing dialogue, while another section might teach students to write flash fiction. Please see the schedule for current offerings. This course can be repeated with different topics. Two quarter hours credit. Applicable to the English major only with department permission.

**ENG 201 | INTRODUCTION TO CREATIVE WRITING | 4 quarter hours (Undergraduate)**

This course provides an introduction to the art of writing poetry, short stories, and creative nonfiction. Students will study the work of published authors in order to learn about craft elements, techniques, language usage, and literary forms before composing and revising original poems, stories, and essays of their own.

**ENG 205 | LITERATURE TO 1700 | 4 quarter hours (Undergraduate)**

This course will provide a general overview of literature written primarily in English up to 1700, with a focus on medieval and Renaissance literature. The course will focus on major literary movements and developments, and will situate important literary texts in their historical contexts. Topics might include generic emulation and adaptation, literary nationalism, the relationship between oral and written culture and popular and elite literature, the emergence of popular theater, the development of English as a language suitable for literary composition, gender and sexuality, and the historical importance accorded to same sex friendship. Authors studied might include Virgil, Geoffrey Chaucer, Margery Kempe, Sir Thomas Malory, Christopher Marlowe, William Shakespeare, Sir Philip Sidney, John Donne, George Herbert, Margaret Cavendish, and John Milton, as well as anonymous epics and morality plays, such as Beowulf and Everyman.

**ENG 206 | LITERATURE FROM 1700 TO 1900 | 4 quarter hours (Undergraduate)**

This course will provide a general overview of literature written primarily in English between 1700 and 1900. The course will focus on major literary movements and developments, and will situate important literary texts in their historical contexts. Topics might include the rise of the novel; 18th-century satire; Gothic literature; Romanticism; Transcendentalism; literary responses to the American Revolution, the American Civil War, the Industrial Revolution, and the expansion of the British empire; slavery and abolition; women, domesticity, and early feminism; the Victorian novel; and the Fin de Siecle. Authors studied might include Daniel Defoe, Jonathan Swift, Benjamin Franklin, Jane Austen, Mary Shelley, John Keats, Frederick Douglass, Ralph Waldo Emerson, Nathaniel Hawthorne, Emily Dickinson, Mark Twain, Walt Whitman, Charlotte and Emily Bronte, Charles Dickens, and Oscar Wilde.

**ENG 207 | LITERATURE FROM 1900 TO THE PRESENT | 4 quarter hours (Undergraduate)**

This course will provide a general overview of literature written primarily in English between 1900 and the present. The course will focus on major literary movements and developments, and will situate important literary texts in their historical contexts. Topics might include modernism and postmodernism; divisions between mass and high culture; literary responses to the World Wars, the feminist and civil rights movements, and immigration; and post-colonial literatures. Authors studied might include W. B. Yeats, T. S. Eliot, James Joyce, Virginia Woolf, Ernest Hemingway, Ralph Ellison, William Faulkner, Jean Rhys, Samuel Beckett, Tennessee Williams, Toni Morrison, Salmon Rushdie, Derek Walcott, Wole Soyinka, and Zadie Smith.

**ENG 209 | TOPICS IN WRITING | 4 quarter hours (Undergraduate)**

Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

**ENG 211 | GRAMMAR AND STYLE | 4 quarter hours (Undergraduate)**

An introduction to elements of the linguistic structure of English as they are employed to create stylistic effects in writing. The course aims at clarifying ways that language can affect audiences' perceptions and responses to writing.

**ENG 216 | CREATING CHARACTERS | 4 quarter hours (Undergraduate)**

This cross-genre course—open to students interested in fiction, journalism, screenwriting, playwriting, animation, and game design—will introduce students to the tools writers use for making fictional characters and real people come alive on the page. In addition to studying the ways in which detail, setting, point of view and dialogue affect character, students will learn the art of the interview and the craft of writing nonfiction profiles. Participants will also gain basic skills in reading and responding to other students' stories in a workshop setting. This course is not repeatable.

**ENG 218 | READING AND WRITING FICTION | 4 quarter hours (Undergraduate)**

An introduction to the art of fiction through analysis and criticism of fiction by established writers and through writing and revising the student's own stories.

**ENG 219 | READING AND WRITING POETRY | 4 quarter hours (Undergraduate)**

An introduction to the art of poetry through analysis and criticism of poems by established poets and through writing and revising the student's own poems.
ENG 221 | READING PROSE | 4 quarter hours
(Undergraduate)
An introduction to close analytical reading of the fundamental prose genres that students will encounter in the English major, including short stories, novels, literary nonfiction, and criticism.

ENG 222 | INTRODUCTION TO LINGUISTICS | 4 quarter hours
(Undergraduate)
The focus of this course is on linguistics as the study of how language works in the minds and brains of its speakers, taking an approach that focuses on the mental representation of language. We develop a theory of language knowledge that includes knowledge of sound systems, sentence structure, and meaning, and along the way we investigate data from diverse languages to illustrate how linguists think and reason. We also draw connections between linguistic knowledge and other types of cognition, as well as connections between linguistics and related fields, including philosophy, psychology, and neuroscience.

ENG 225 | THE HISTORY OF BOOKS | 4 quarter hours
(Undergraduate)
This course is an introduction to the study of the book as an object and as a technology. It investigates the production of texts from handwritten manuscripts to modern digital media, with a particular focus on the influence of the printing press between the late Middle Ages and the early nineteenth century. We will explore the development and rise of what is now known as print culture, as well as related histories of authorship, reading, and publishing. Classes incorporate hands-on work with rare books and primary sources in DePaul’s Special Collections alongside a range of digital tools. The final project will include a public outreach component that shares the history you have recovered with the community.

ENG 228 | INTRODUCING SHAKESPEARE | 4 quarter hours
(Undergraduate)
Introduction to the basic structures and conventions of representative plays by William Shakespeare, emphasizing film and stage interpretations. May not be taken by students who have completed ENG 328.

ENG 231 | GOTHIC MONSTERS AND VILLAINS | 4 quarter hours
(Undergraduate)
This course provides an introduction to Gothic narratives. Students will learn about the different ways authors use monsters, villains, and spooky settings to comment on social anxieties related to gender, sexuality, race, politics, technology, etc. Texts might include classics such as Frankenstein, The Strange Case of Dr. Jekyll and Mr. Hyde, and Dracula, as well as lesser known works drawn from the eighteenth century to the present. Variable emphasis. (See schedule for current offerings.) This course is not repeatable.

ENG 232 | THE ROMANCE | 4 quarter hours
(Undergraduate)
Introduction to the genre of the romance. Emphasis on characteristics of the genre in particular historical moments. Variable emphasis on particular historical periods or topics. (See schedule for current offerings.) This course is not repeatable.

ENG 235 | SCIENCE FICTION | 4 quarter hours
(Undergraduate)
Introduction to science fiction as a literary genre. Variable topics, such as the history of the genre, multi-media adaptations, cyberpunk, and global variants. This course is not repeatable.

ENG 236 | GRAPHIC NOVELS AND SOCIAL JUSTICE | 4 quarter hours
(Undergraduate)
This course will consider graphic novels and comics as literary, visual, and social art. The course will focus on graphic novels and comics that engage issues of social justice such as the Holocaust, the Civil Rights Movement, and the U.S. prison system. Discussion topics might include how comics and graphic novels use unique storytelling tools to convey big issues in powerful ways; how comics and graphic novels get readers to think differently about the role of art in violence, suffering, social struggle, objectification, voice, and self-expression; and how graphic novels help readers to imagine and reimagine history, create social change, and envision new futures. Throughout the course, students will consider how graphic novels work effectively both as narratives and as visual art.

ENG 237 | HARRY POTTER | 4 quarter hours
(Undergraduate)
This course provides a scholarly introduction to the Harry Potter series. Students will analyze the series through the lens of Joseph Campbell’s theory of the hero’s journey, and will contextualize Rowling’s work through comparisons to Arthurian legend and other British novels. The course will also consider the ways in which the series acts as a commentary on social, cultural, and political issues. Texts will include the entire Harry Potter series as well as essays from literary scholars, historians, and political scientists. This course is not repeatable.

ENG 245 | THE BRITISH NOVEL | 4 quarter hours
(Undergraduate)
Studies in the British novel. Variable emphasis on particular historical periods or topics from 1700 to present.

ENG 250 | GREAT WRITERS | 4 quarter hours
(Undergraduate)
Introduction to the works of one or more writers of classic or influential literary texts. Authors vary; please see schedule for current offerings. This course is not repeatable.

ENG 255 | THE AMERICAN NOVEL | 4 quarter hours
(Undergraduate)
Studies in the American novel. Variable emphasis on the historical development, regional expression, multicultural scope, ethical engagement, and/or recurring thematic concerns of the genre.

ENG 265 | LITERATURE ACROSS CULTURES | 4 quarter hours
(Undergraduate)
Readings in literature by writers from various ethnic backgrounds. Works may be by American minority authors or by authors writing in English from outside Britain and the U.S. This course takes a comparative approach to studying concepts of ethnicity and identity in literature drawn from several ethnic traditions. Variable emphasis on different groups, genres, themes, or historical periods. See schedule for current offerings. This course is not repeatable.

ENG 268 | LITERATURE AND IDENTITY | 4 quarter hours
(Undergraduate)
Studies in the literary expression and representation of identity. Variable emphasis on different groups, genres, themes, or historical periods. (See schedule for current offerings.) This course is not repeatable.
ENG 273 | GLOBAL ASIAN LITERATURE | 4 quarter hours
(Undergraduate)
Introduction to selected authors, genres, and topics in Asian American or
Asian diasporic literature from the mid-nineteenth century to the present.
Variable emphasis on different groups, genres, or historical periods.

ENG 275 | LITERATURE AND FILM | 4 quarter hours
(Undergraduate)
Introduction to the comparative study of literature and film. Emphasis
on construction of narrative, development of character, point-of-view,
and adaptation across genres and mediums. (See schedule for current
offerings.) This course is not repeatable.

ENG 276 | LATINX LITERATURE | 4 quarter hours
(Undergraduate)
Introduction to works of poetry, fiction, nonfiction, and/or drama by Latinx
authors.

ENG 279 | STUDIES IN LITERATURE | 4 quarter hours
(Undergraduate)
Variable emphasis. (See schedule for current offerings.) This course is
repeatable with different topics.

ENG 280 | THE EPIC | 4 quarter hours
(Undergraduate)
Introduction to the appreciation and analysis of epic as a cultural form,
with attention to the genre in both its oral and written forms. Special
consideration will be given to issues of gender, sexuality, and politics.
Texts discussed will span a range of cultures and historical periods.
Readings will vary but may include translations of Homer and Virgil, as
well as epics by Milton, Margaret Atwood and Derek Walcott. This course
is not repeatable.

ENG 283 | GENDER IN LITERATURE | 4 quarter hours
(Undergraduate)
Studies in representations of gender in literature. Variable emphasis on
different groups, genres, themes, or historical periods. See schedule for
current offerings. This course is not repeatable.

ENG 284 | THE BIBLE AS LITERATURE | 4 quarter hours
(Undergraduate)
Introduction to the major stories, genres (e.g., poems, parables,
prophecies) and intra-textual echoes of the Bible.

ENG 285 | LGBTQ LITERATURE | 4 quarter hours
(Undergraduate)
Studies in representations of queer identities, sexualities, and
communities by LGBTQ authors. Variable emphasis on different groups,
genres, themes, or historical periods. See schedule for current offerings.
This course is not repeatable.

ENG 286 | TOPICS IN POPULAR LITERATURE | 4 quarter hours
(Undergraduate)
Studies in the forms and functions of popular fiction. Variable emphasis.
(See schedule for current offerings.) This course is not repeatable.

ENG 288 | AUTOBIOGRAPHY AND BIOGRAPHY | 4 quarter hours
(Undergraduate)
Introduction to the forms, functions, problems and purposes of life-
writing.

ENG 290 | THE CRAFT OF CREATIVE NONFICTION WRITING | 4 quarter hours
(Undergraduate)
Writing and analyzing creative nonfiction. May be taken twice. May not be
taken pass/fail.
ENG 201 or instructor permission is a prerequisite for this class.

ENG 291 | THE CRAFT OF FICTION WRITING | 4 quarter hours
(Undergraduate)
Writing and analyzing short prose fiction. May be taken twice. May not be
taken pass/fail.
ENG 201 is a prerequisite for this class.

ENG 292 | THE CRAFT OF POETRY WRITING | 4 quarter hours
(Undergraduate)
Writing and analyzing poems. May be taken twice. May not be taken
pass/fail.
ENG 201 is a prerequisite for this class.

ENG 299 | CAREERS FOR ENGLISH MAJORS | 2 quarter hours
(Undergraduate)
An introduction to the many careers available to English majors. The
course will use literary and contemporary work-related readings along
with guest speakers to help students explore their options and develop a
unique career path. Two credit hours. Applicable to the English major only
with department permission.

ENG 300 | COMPOSITION AND STYLE | 4 quarter hours
(Undergraduate)
Advanced instruction in invention, arrangement, and style, toward
developing clear and effective prose styles.
WRD 104 or HON 100 is a prerequisite for this course.

ENG 302 | SCIENCE AND NATURE WRITING | 4 quarter hours
(Undergraduate)
This writing workshop will provide an introduction to the exciting, fast-
growing field of writing about nature and science. We will define science
in its broadest sense, and no prior science background is necessary.
Students will read essays about the natural world and learn how to
write in different genres that might include press releases, articles, and
memoirs.
ENG 201 is a prerequisite for this class.

ENG 303 | MAGAZINE WRITING | 4 quarter hours
(Undergraduate)
In this writing workshop, students will explore the many varied forms of
magazine writing. Students will analyze past and contemporary classics,
generate ideas, and learn how to research and write in different genres
that may include press releases, features, and creative articles. The
course may also feature visits from guest professionals and alumni in the
field.
ENG 201 is a prerequisite for this class.

ENG 304 | TRAVEL WRITING | 4 quarter hours
(Undergraduate)
This writing workshop provides an introduction to the travel essay.
Students will craft the raw materials of experience, memory, and research
into literary nonfiction. The course will investigate concepts of truth,
accuracy, and authority, as well as questions about the very nature of
travel. What does it mean to travel? Why do we do it? What do we gain
in the process of uprooting ourselves, and what do we lose? In addition
to creating their own travel essays, students will also read examples of
classic and contemporary travel writing. The course does not require
students to have extensive or international travel experience.
ENG 201 is a prerequisite for this class.

ENG 305 | LITERARY MAGAZINES | 4 quarter hours
(Undergraduate)
This course examines the literary magazine—exploring the missions,
personalities, processes, histories, and aesthetics of print and/or online
journals and little magazines publishing work by poets and creative prose
writers. Variable emphasis. (See schedule for current offerings.)
ENG 201 or instructor permission is a prerequisite for this class.
ENG 306 | ADVANCED CREATIVE NONFICTION WRITING | 4 quarter hours
(Undergraduate)
Writing and analyzing creative nonfiction, for students with prior
workshop experience. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.

ENG 307 | ADVANCED FICTION WRITING | 4 quarter hours
(Undergraduate)
Writing and analyzing short prose fiction, for students with prior
workshop experience. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.

ENG 308 | ADVANCED POETRY WRITING | 4 quarter hours
(Undergraduate)
Writing and analyzing poems, for students with prior workshop
experience. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.

ENG 309 | ADVANCED TOPICS IN WRITING | 4 quarter hours
(Undergraduate)
Variable emphasis. (See schedule for current offerings.) This course is
repeatable with different topics.
ENG 201 is a prerequisite for this class.

ENG 312 | HISTORICAL FICTION | 4 quarter hours
(Undergraduate)
In this combination seminar and writing workshop, students will read
and write fiction that highlights the intersection of history and fiction,
memory and imagination, fact and invention. Authors studied might
include Alice Munro, Toni Morrison, Edward P. Jones, A.S. Byatt, or Colson
Whitehead. Students will consider how each author retrieves, recreates,
and then reinvents a past that inevitably weaves itself into the present.
Keeping in mind the demands of historical fiction in terms of setting and
characterization, this course will explore the elements that define strong
fiction writing across genres (point of view, plot, theme, and metaphor, to
name a few), and students will learn how to incorporate these elements
into their own writing as they create new, original historical-fiction stories.
ENG 201 is a prerequisite for this class.

ENG 313 | SPECULATIVE FICTION | 4 quarter hours
(Undergraduate)
In this writing workshop, students will read and write works of speculative
fiction that ask what the world would be or could be under different
circumstances. Students will study the narrative design of successful
works of speculative fiction (including sub-genres such as magic realism,
alternative history, post-apocalyptic, horror, dystopia, science fiction, and
heroic fantasy), dissecting these works in an attempt to understand what
defines the genre. This course will explore the elements that define strong
fiction writing across genres (point of view, plot, theme, and metaphor, to
name a few), and students will learn how to incorporate these elements
into their own writing as they create their own original speculative fiction
stories.
ENG 201 is a prerequisite for this class.

ENG 314 | SETTING IN FICTION | 4 quarter hours
(Undergraduate)
This writing workshop will focus on the role of place and time in fiction,
examining the ways in which they give rise to character and interact with
other story elements. The course will place a heavy emphasis on reading
in addition to helping students develop their own works of fiction.
ENG 201 is a prerequisite for this class.

ENG 317 | THE ART OF DESCRIPTION | 4 quarter hours
(Undergraduate)
In this writing workshop, students will learn to write vivid and striking
poetry and short but effective prose/fiction. Students will learn the art of
description by writing scenes and vignettes?brief narratives and sketches
characterized by great precision, economy of language, and accuracy
of composition. A vignette?a short impressionistic scene that focuses
on one moment or a fleeting slice of life?is composed like a photograph
or painting to give a trenchant impression about a character, an idea, a
setting, or an object. The writing of vignettes requires utmost attention to
detail, and requires a presence of mind and powers of keen observation
that are important in any kind of creative writing. This course?s goal is to
help students write with clarity, power, and directness.
ENG 201 is a prerequisite for this class.

ENG 318 | ENGLISH LITERATURE TO 1500 | 4 quarter hours
(Undergraduate)
Study of selected poetry and prose by John Milton.
ENG 220 or (ENG 205 and ENG 101 or HON 101) or
(THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 321 | ENGLISH LITERATURE TO 1500 | 4 quarter hours
(Undergraduate)
Study of selected plays and poetry of William Shakespeare in relation
to early modern English culture. Variable emphasis. (See schedule for
current offerings.) This course is repeatable with different topics.
ENG 201 is a prerequisite for this class.

ENG 322 | CHAUCER | 4 quarter hours
(Undergraduate)
Study of selected poetry and prose by Geoffrey Chaucer.
ENG 220 or (ENG 205 and ENG 101 or HON 101) is a prerequisite for this
class.

ENG 323 | TOPICS IN MEDIEVAL LITERATURE | 4 quarter hours
(Undergraduate)
Study of selected plays and poetry of William Shakespeare in relation
to early modern English culture. Variable emphasis. (See schedule for
current offerings.) This course is repeatable with different topics.
ENG 220 or (ENG 205 and ENG 101 or HON 101) or
(THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 324 | STUDIES IN SHAKESPEARE | 4 quarter hours
(Undergraduate)
Study of selected plays and poetry of William Shakespeare in relation
to early modern English culture. Variable emphasis. (See schedule for
current offerings.) This course is repeatable with different topics.
ENG 220 or (ENG 205 and ENG 101 or HON 101) or
(THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 325 | ENGLISH RENAISSANCE LITERATURE | 4 quarter hours
(Undergraduate)
Survey of English literature from 1660 to 1780.
ENG 201 is a prerequisite for this class.

ENG 326 | ENGLISH LITERATURE TO 1780 | 4 quarter hours
(Undergraduate)
See schedule for current offerings. This course is repeatable with
different topics.
ENG 220 or (ENG 205 and ENG 101 or HON 101) or
(THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 327 | MILTON | 4 quarter hours
(Undergraduate)
Study of selected poetry and prose by John Milton.
ENG 220 or (ENG 101 and HON 101) is a prerequisite for this class.

ENG 328 | STUDIES IN SHAKESPEARE | 4 quarter hours
(Undergraduate)
Study of selected plays and poetry of William Shakespeare in relation
to early modern English culture. Variable emphasis. (See schedule for
current offerings.) This course is repeatable with different topics.
ENG 220 or ENG 101 or HON 101 or (THE 204 and THE 205 and THE 206)
is a prerequisite for this class.

ENG 329 | TOPICS IN RENAISSANCE LITERATURE | 4 quarter hours
(Undergraduate)
Study of selected plays and poetry of William Shakespeare in relation
to early modern English culture. Variable emphasis. (See schedule for
current offerings.) This course is repeatable with different topics.
ENG 220 or ENG 101 or HON 101 or (THE 204 and THE 205 and THE 206)
is a prerequisite for this class.

ENG 330 | RESTORATION AND 18TH-CENTURY LITERATURE | 4 quarter hours
(Undergraduate)
Survey of British literature from 1660 to 1780.
ENG 332 | MAJOR AUTHORS BEFORE 1800 | 4 quarter hours
(Undergraduate)
Study of one or two major authors whose works were published before 1800. This course is repeatable with different authors. (See schedule for current offerings.)

ENG 335 | TOPICS IN EARLY AMERICAN LITERATURE | 4 quarter hours
(Undergraduate)
Selected authors, genres and topics in American literature written before 1800. This course is repeatable with different topics.
(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) are prerequisites for this class.

ENG 339 | TOPICS IN RESTORATION AND 18TH CENTURY BRITISH LITERATURE | 4 quarter hours
(Undergraduate)
Selected authors, genres and topics in British Literature, 1660-1780. This course is repeatable with different topics.
(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 340 | 19TH-CENTURY BRITISH LITERATURE | 4 quarter hours
(Undergraduate)
Survey of British literature from 1780 to 1900.
(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 342 | MAJOR AUTHORS 1800-1900 | 4 quarter hours
(Undergraduate)
Study of one or two major authors whose works were published between 1800 and 1900. This course is repeatable with different authors. (See schedule for current offerings.)

ENG 343 | LITERATURE OF THE ROMANTIC ERA | 4 quarter hours
(Undergraduate)
Study of literature written primarily between 1780 and 1840. Topics will vary and may include English Romantic Poetry, Literature of the French Revolution, Transatlantic Romanticism, American Romanticism, Regency Fiction, or author-oriented studies of works by writers such as Percy Bysshe Shelley, Lord Byron, John Keats, Jane Austen, and Mary Shelley. See schedule for current offerings. This course is repeatable with different topics.

ENG 349 | TOPICS IN 19TH-CENTURY BRITISH LITERATURE | 4 quarter hours
(Undergraduate)
This course focuses on some of the important works of nineteenth-century Irish literature. It sees them as engaging with the often traumatic political and social changes of their time.

ENG 348 | TOPICS IN 19TH-CENTURY LITERATURE | 4 quarter hours
(Undergraduate)
Selected authors, genres, and topics in 19th-century literature. This course is repeatable with different topics.
ENG 101 (or HON 101) and ENG 206 are prerequisites for this class.

ENG 346 | 19TH-CENTURY IRISH LITERATURE | 4 quarter hours
(Undergraduate)
This course focuses on some of the important works of nineteenth-century Irish literature. It sees them as engaging with the often traumatic political and social changes of their time.

ENG 344 | VICTORIAN LITERATURE | 4 quarter hours
(Undergraduate)
Study of literature written in the British Empire between 1830 and 1900. Topics will vary and may include the Victorian Novel, Victorian Women Writers, Literature of the British Empire, or author-oriented studies of works by writers such as the Bronte sisters, Charles Dickens, and Oscar Wilde. See schedule for current offerings. This course is repeatable with different topics.

ENG 101 (or HON 101) and ENG 206 are prerequisites for this class.

ENG 345 | TOPICS IN 19TH-CENTURY AMERICAN LITERATURE | 4 quarter hours
(Undergraduate)
Selected authors, genres and topics in nineteenth-century American literature. This course is repeatable with different topics.
(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) are prerequisites for this class.

ENG 350 | MODERN BRITISH LITERATURE | 4 quarter hours
(Undergraduate)
Survey of British literature in the twentieth century.
(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 351 | POSTCOLONIAL LITERATURE | 4 quarter hours
(Undergraduate)
This course explores the cultural legacy of colonialism and imperialism through literature. Variable emphasis on different authors and national traditions. See schedule for current offerings. This course is repeatable with different topics.

ENG 352 | GLOBAL ENGLISH LITERATURE | 4 quarter hours
(Undergraduate)
Study of literature written in English from outside Britain, Ireland, and the U.S. Variable emphasis on different authors, national traditions, ethnic backgrounds, or historical periods. (See schedule for current offerings.)
This course is repeatable with different topics.

ENG 353 | TOPICS IN GLOBAL ASIAN LITERATURE | 4 quarter hours
(Undergraduate)
Selected authors, genres, and topics in Asian-American or Asian diasporic literature. See schedule for current offerings. This course is repeatable with different topics.

ENG 354 | THE IRISH REVIVAL | 4 quarter hours
(Undergraduate)
The course invites a study of the cultural ferment of the decades from the 1890's to the 1920's in Ireland. Particular attention will be given to an introduction to the work of canonical writers such as Yeats and Joyce who emerged from it.

ENG 355 | MODERN IRISH LITERATURE | 4 quarter hours
(Undergraduate)
This course provides an introduction to Irish literature, including some poems in the Irish language with English translations on facing pages, written from the Literary Revival to the late twentieth century. It emphasizes the transitions from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.

ENG 357 | TOPICS IN IRISH STUDIES | 4 quarter hours
(Undergraduate)
Selected authors, genres, and topics in Irish literature and culture. This course is repeatable with different topics.
ENG 358 | TOPICS IN 20TH-CENTURY LITERATURE | 4 quarter hours (Undergraduate)
Selected authors, genres, and topics in 20th-century literature. This course is repeatable with different topics.
ENG 101 (or HON 101) and ENG 207 are prerequisites for this class.

ENG 359 | TOPICS IN MODERN BRITISH LITERATURE | 4 quarter hours (Undergraduate)
Selected authors, genres, and topics in twentieth-century British literature. This course is repeatable with different topics.
(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 360 | AMERICAN LITERATURE TO 1830 | 4 quarter hours (Undergraduate)
Survey of American literature from the beginnings to 1830.
ENG220&221 or ENG 101& ENG 206

ENG 361 | 19TH-CENTURY AMERICAN LITERATURE | 4 quarter hours (Undergraduate)
Survey of 19th-century American literature. Authors studied might include Washington Irving, Nathaniel Hawthorne, Herman Melville, Frederick Douglass, Walt Whitman, Emily Dickinson, Mark Twain, Harriet Jacobs, and Kate Chopin.
ENG220&221 or ENG 101& ENG 206

ENG 362 | AMERICAN LITERATURE FROM 1865 TO 1920 | 4 quarter hours (Undergraduate)
Survey of American literature from 1865 to 1920.
ENG220&221 or ENG 101& ENG 206

ENG 363 | AMERICAN LITERATURE AFTER 1900 | 4 quarter hours (Undergraduate)
This survey focuses on twentieth- and twenty-first-century American literary works, authors, and movements. Coverage will explore several genres, and expose students to the diversity of some major American literary movements such as modernism, the Harlem Renaissance, and postmodernism. Authors studied might include William Faulkner, F. Scott Fitzgerald, Willa Cather, Zora Neale Hurston, Ernest Hemingway, Toni Morrison, and Junot Diaz.
(ENG 220 and ENG 221) or (ENG 101/HON 101 and ENG 207) or AMS 200 or AMS 201 are prerequisites for this class.

ENG 364 | TOPICS IN GENRE STUDIES | 4 quarter hours (Undergraduate)
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 365 | TOPICS IN 20TH-CENTURY FICTION | 4 quarter hours (Undergraduate)
Selected authors, genres, and topics in 20th-century American literature. This course is repeatable with different topics.
(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) are prerequisites for this class.

ENG 366 | STUDIES IN POETRY | 4 quarter hours (Undergraduate)
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.
ENG 220 or (ENG 101 or HON 101) is a prerequisite for this class.

ENG 367 | TOPICS IN AMERICAN STUDIES | 4 quarter hours (Undergraduate)
Selected authors, genres, and topics in American literature and culture. This course is repeatable with different topics.

ENG 368 | STUDIES IN LITERATURE ACROSS CULTURES | 4 quarter hours (Undergraduate)
Selected authors, genres, and topics in literature by writers from various ethnic backgrounds. Works may be by American minority authors or by authors writing in English from outside Britain and the U.S. This course takes a comparative approach to studying concepts of ethnicity and identity in literature drawn from several ethnic traditions. This course is repeatable with different topics.

ENG 369 | TOPICS IN AMERICAN LITERATURE | 4 quarter hours (Undergraduate)
See schedule for current offerings. This course is repeatable with different topics.
(ENG 220 & 221) or (ENG 101 or HON 101 or AMS 200 or AMS 201) is a prerequisite for this class.

ENG 370 | HISTORY OF THE ENGLISH LANGUAGE | 4 quarter hours (Undergraduate)
Examination of the development of vocabulary and structure of English from its beginnings to contemporary British and American English usage.

ENG 371 | TOPICS IN AFRICAN AMERICAN LITERATURE | 4 quarter hours (Undergraduate)
Selected authors, genres, and topics in African American literature. See schedule for current offerings.

ENG 372 | NATIVE LITERATURE | 4 quarter hours (Undergraduate)
This course provides an introduction to a wide range of Native and First Nations literature. Students will read a selection of work, including some early contact and expansion texts, but will focus on the prose and poetry of mid-to-late 20th century and contemporary writers. Students will examine, compare and contrast the ways in which Native literary writing approaches agendas and ideas such as personal and community identity; racial and cultural stereotypes; social and cultural obligations and duties; self-expression and humor as acts of survival; re-appropriation and redefinition; and encounters with a dominant culture.

ENG 373 | MULTIETHNIC LITERATURE OF THE U.S. | 4 quarter hours (Undergraduate)
Readings in recent literature, primarily fiction, by American writers of various ethnic backgrounds, exploring the evolving concept of ethnicity in literature.

ENG 374 | NATIVE LITERATURE | 4 quarter hours (Undergraduate)
The development of European, English, and American short fiction.
ENG 101 (or HON 101) is a prerequisite for this class.

ENG 375 | STUDIES IN SHORT FICTION | 4 quarter hours (Undergraduate)
The development of European, English, and American short fiction.

ENG 376 | CREATIVE WRITING AND SOCIAL ENGAGEMENT | 4 quarter hours (Undergraduate)
Study and practice of creative writing in the contexts of community service. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 377 | TOPICS IN EDITING AND PUBLISHING | 4 quarter hours (Undergraduate)
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 378 | LITERATURE AND SOCIAL ENGAGEMENT | 4 quarter hours (Undergraduate)
Study of selected literary works in the contexts of community service. See schedule for current offerings. This course is repeatable with different topics.
ENG 379 | TOPICS IN LITERATURE | 4 quarter hours  
(Undergraduate)  
See schedule for current offerings. This course is repeatable with different topics.  
(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

ENG 380 | MASTERPIECES OF WORLD LITERATURE | 4 quarter hours  
(Undergraduate)  
Selected works in translation from Classical Antiquity to the present. Variable emphasis. (See schedule for current offerings.)  
(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

ENG 381 | LITERARY THEORY | 4 quarter hours  
(Undergraduate)  
Study of the major approaches to analyzing literature, including formalist, historicist, psychoanalytic, post-structuralist, and feminist readings.  
(ENG 220 and ENG 221) or (ENG 101 or HON 101) or instructor permission are prerequisites for this class.ENG220/221 or 101/HON 101 perm

ENG 382 | MAJOR AUTHORS | 4 quarter hours  
(Undergraduate)  
Study of one or two major writers. This course is repeatable with different authors. (See schedule for current offerings.)

ENG 383 | WOMEN AND LITERATURE | 4 quarter hours  
(Undergraduate)  
Study of literature by women, with attention to the traditions of women's literature, historical and theoretical perspectives on women as writers and readers, and issues of feminist literary history and criticism.

ENG 384 | TOPICS IN LATINX LITERATURE | 4 quarter hours  
(Undergraduate)  
Selected authors, genres, and topics in Latinx literature. See schedule for current offerings.

ENG 385 | TOPICS IN LGBTQ LITERATURE | 4 quarter hours  
(Undergraduate)  
Selected authors, genres, and topics in LGBTQ literature. See schedule for current offerings. This course is repeatable with different topics.

ENG 386 | POPULAR LITERATURE | 4 quarter hours  
(Undergraduate)  
Studies in selected forms of popular literature. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 387 | TOPICS IN CONTEMPORARY LITERATURE | 4 quarter hours  
(Undergraduate)  
Study of selected late twentieth- and twenty-first century literary works, authors, and movements. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.  
(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

ENG 388 | TOPICS IN TRANSATLANTIC LITERATURE | 4 quarter hours  
(Undergraduate)  
Study of transatlantic or circum-atlantic literary production and consumption. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.  
(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

ENG 389 | TOPICS IN COMPARATIVE LITERATURE | 4 quarter hours  
(Undergraduate)  
See schedule for current offerings. This course is repeatable with different topics.

ENG 390 | SENIOR CAPSTONE SEMINAR | 4 quarter hours  
(Undergraduate)  
Variable emphasis. See schedule for current offerings. This course is not repeatable.  
Senior Status and (ENG 220 and ENG 221) or (ENG 101 or HON 101 and ENG 205 and ENG 206 and ENG 207) are prerequisites for this class.

ENG 391 | TEACHING ENGLISH | 4 quarter hours  
(Undergraduate)  
Strategies for teaching composition, literature, and language skills to secondary-school students.  
(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

ENG 392 | INTERNSHIP | 1-4 quarter hours  
(Undergraduate)  
Internship in such fields as writing, editing, and publishing supplemented by readings and assignments.  
Junior standing or above and permission of the internship coordinator are a prerequisite for this class.

ENG 397 | NEWBERRY LIBRARY SEMINAR | 4 quarter hours  
(Undergraduate)  
Newberry Library Seminar.

ENG 398 | LITERARY AND CULTURAL HERITAGE | 1-8 quarter hours  
(Undergraduate)  
Study tours - locations, topics, fees, and credit vary.

ENG 399 | INDEPENDENT STUDY | 1-8 quarter hours  
(Undergraduate)  
Written permission of supervising faculty member and of department chair required before registration.

ENG 400 | STRUCTURE OF MODERN ENGLISH | 4 quarter hours  
(Graduate)  
A systematic outline of modern English from both traditional and contemporary linguistic perspectives. Examines descriptive grammars, word and phrase structure, syntax and semantics, and formal issues of style and rhetoric. Formerly ENG 416.

ENG 401 | HISTORY OF THE ENGLISH LANGUAGE | 4 quarter hours  
(Graduate)  
A systematic study of the nature, history and usage of the English language. The course traces the language from its origin to its present status in England and America.

ENG 402 | HISTORY OF ENGLISH PROSE STYLE | 4 quarter hours  
(Graduate)  
A survey of alternative theoretical approaches to the study of style, followed by intensive study of changes in the conventions of English prose from the Renaissance to the present.

ENG 407 | LANGUAGE AND STYLE FOR WRITERS | 4 quarter hours  
(Graduate)  
A comprehensive examination of structural elements and stylistic devices that experienced writers use across a number of creative and professional genres. Topics include components of style, sentence rhythm and prosody, diction choices, rhetorical punctuation, and the development of one's personal writing voice.
ENG 408 | STYLISTICS | 4 quarter hours
(Graduate)
Theory and practice in examining features of prose style, including
linguistic, rhetorical and literary perspectives on style.

ENG 411 | CHAUCER | 4 quarter hours
(Graduate)
Chaucer’s works in context of his milieu.

ENG 412 | STUDIES IN ARTHURIAN LITERATURE | 4 quarter hours
(Graduate)
Geoffrey of Monmouth, Wace, Layamon and Malory.

ENG 413 | STUDIES IN MEDIEVAL LITERARY FORMS | 4 quarter hours
(Graduate)
Alternating emphasis on poetic, narrative and dramatic genres of the 14th
and 15th centuries.

ENG 419 | TOPICS IN MEDIEVAL LITERATURE | 4 quarter hours
(Graduate)
See schedule for current offering.

ENG 421 | STUDIES IN ENGLISH RENAISSANCE PROSE | 4 quarter hours
(Graduate)
Major prose works, including More’s Utopia, Sidney’s Apology for Poetry,
Bacon’s Essays, and Milton’s Areopagitica.

ENG 422 | STUDIES IN ENGLISH RENAISSANCE POETRY | 4 quarter hours
(Graduate)
Alternating emphasis on the English epic, the 16th-century lyric, and the
17th-century lyric.

ENG 423 | STUDIES IN ENGLISH RENAISSANCE DRAMA | 4 quarter hours
(Graduate)
Tudor-Stuart drama, including works by Kyd, Marlowe, Jonson, Webster
and Ford.

ENG 426 | THE ESSAY: HISTORY, THEORY, PRACTICE | 4 quarter hours
(Graduate)
Explores the history of the essay as genre from the Renaissance to the
present, compares and contrasts literary essays with those written in
most school settings, and offers students the opportunity to write their
own extended essays on personal and professional topics. Formerly
ENG 488.

ENG 427 | MILTON | 4 quarter hours
(Graduate)
Major poems and selected prose.

ENG 428 | STUDIES IN SHAKESPEARE | 4 quarter hours
(Graduate)
Study of selected plays through various critical and scholarly
perspectives.

ENG 429 | TOPICS IN RENAISSANCE LITERATURE | 4 quarter hours
(Graduate)
See schedule for current offering.

ENG 431 | STUDIES IN THE EIGHTEENTH CENTURY NOVEL | 4 quarter hours
(Graduate)
Representative English prose fiction, including Defoe, Richardson,
Fielding, Sterne and the Gothic novel.

ENG 432 | STUDIES IN RESTORATION AND EIGHTEENTH-CENTURY
DRAMA | 4 quarter hours
(Graduate)
Studies in the comedy of manners, sentimental comedy, heroic drama,
and bourgeois tragedy.

ENG 434 | STUDIES IN RESTORATION AND EIGHTEENTH CENTURY
AUTHORS | 4 quarter hours
(Graduate)
Alternating emphasis on Dryden, Pope, Swift, Johnson, or other major
authors.

ENG 439 | TOPICS IN RESTORATION AND EIGHTEENTH-CENTURY
LITERATURE | 4 quarter hours
(Graduate)
See schedule for current offerings.

ENG 441 | STUDIES IN ENGLISH ROMANTIC PROSE | 4 quarter hours
(Graduate)
Major Romantic nonfiction prose writers, including Burke, Coleridge,
Hazlitt, DeQuincey and Lamb.

ENG 442 | STUDIES IN ENGLISH ROMANTIC POETRY | 4 quarter hours
(Graduate)
Alternating emphasis on major Romantic poets, including Blake,
Wordsworth, Coleridge, Byron, Shelley and Keats.

ENG 443 | STUDIES IN VICTORIAN PROSE | 4 quarter hours
(Graduate)
Major Victorian nonfiction prose writers, including Carlyle, Newman,
Ruskin, Mill, Arnold and Pater.

ENG 444 | STUDIES IN VICTORIAN POETRY | 4 quarter hours
(Graduate)
Major Victorian poets, including Tennyson, Browning and Arnold.

ENG 445 | STUDIES IN NINETEENTH-CENTURY BRITISH FICTION | 4
quarter hours
(Graduate)
Alternating emphasis on major novelists including Dickens, Thackeray,
the Brontes, Eliot, Trollope and Hardy.

ENG 446 | NINETEENTH-CENTURY IRISH LITERATURE | 4 quarter hours
(Graduate)
This course surveys a broad range of literature from nineteenth-century
Ireland. It reads literature within the social and historical context of its
day; in terms of the formation of individual, social and national identities;
and within today’s debate about Ireland’s status at the time.

ENG 449 | TOPICS IN NINETEENTH-CENTURY BRITISH LITERATURE | 4
quarter hours
(Graduate)
See schedule for current offering.

ENG 451 | STUDIES IN THE MODERN BRITISH NOVEL | 4 quarter hours
(Graduate)
Alternating areas of emphasis, including Woolf, Joyce, Forster and
Conrad.

ENG 452 | STUDIES IN MODERN BRITISH POETRY | 4 quarter hours
(Graduate)
Alternating areas of emphasis, including Yeats, Auden, Lawrence, Dylan
Thomas, Eliot and Larkin.

ENG 453 | STUDIES IN MODERN DRAMA | 4 quarter hours
(Graduate)
Study of selected modern plays from 1870 to present. Authors studied
might include Henrik Ibsen, Anton Chekhov, George Bernard Shaw, Eugene
O’Neill, J. M. Synge, Tennessee Williams, Samuel Beckett, Caryl Churchill,
Maria Irene Fornes, and Wole Soyinka.
ENG 455 | MODERN IRISH LITERATURE | 4 quarter hours  
(Graduate)  
This course uses both historical and theoretical approaches to Irish literature written from the Literary Revival to the late twentieth century. It emphasizes the transition from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.

ENG 456 | CONTEMPORARY IRISH LITERATURE | 4 quarter hours  
(Graduate)  
This course relates contemporary Irish literature to recent Irish history and to social and cultural change. It charts the ways in which patterns of individual, social and national identity have been challenged and renegotiated.

ENG 459 | TOPICS IN MODERN BRITISH LITERATURE | 4 quarter hours  
(Graduate)  
See schedule for current offering.

ENG 464 | STUDIES IN AMERICAN AUTHORS | 4 quarter hours  
(Graduate)  
Alternating emphasis on major writers, including Hawthorne, Melville, Poe, Whitman, Dickinson, Twain, Chopin, Crane, James, Wharton and Cather.

ENG 465 | STUDIES IN THE MODERN AMERICAN NOVEL | 4 quarter hours  
(Graduate)  
Alternating emphasis on major 20th-century writers, including Fitzgerald, Hemingway, Stein, Faulkner, Steinbeck, Porter, Penn Warren, Bellow, O'Connor, Oates and Morrison.

ENG 466 | STUDIES IN MODERN AMERICAN POETRY | 4 quarter hours  
(Graduate)  
Introduction to a wide range of twentieth-century American poetries, with alternating emphasis on modernists such as Frost, Eliot, Pound, Stevens, Williams, Moore, HD., Hughes, and Rukeyser as well as more recent figures and trends..

ENG 467 | STUDIES IN AMERICAN DRAMA | 4 quarter hours  
(Graduate)  
American dramatists and dramatic movements.

ENG 469 | TOPICS IN AMERICAN LITERATURE | 4 quarter hours  
(Graduate)  
See schedule for current offering.

ENG 470 | BOOK AND MEDIA HISTORY | 4 quarter hours  
(Graduate)  
Selected topics in book and media history.

ENG 472 | LITERARY THEORY | 4 quarter hours  
(Graduate)  
Studies in literary theory and cultural criticism.

ENG 473 | TEACHING CREATIVE WRITING | 4 quarter hours  
(Graduate)  
Prepares English teachers to teach creative writing at the secondary and college undergraduate levels. Models the planning and directing of effective workshops in poetry, creative nonfiction, and fiction writing. Formerly ENG 485.

ENG 474 | TEACHING LITERATURE | 4 quarter hours  
(Graduate)  
Prepares English teachers to teach literature at the secondary and college undergraduate levels. The course develops methods of teaching all literary genres, addresses problems in literacy, and focuses on the transactional nature of reading and writing.

ENG 475 | TOPICS IN LITERATURE | 4 quarter hours  
(Graduate)  
See schedule for current offering.

ENG 476 | TOPICS IN GENRE AND FORM | 4 quarter hours  
(Graduate)  
See schedule for current offerings. Formerly ENG 479.

ENG 477 | TOPICS IN PUBLISHING | 4 quarter hours  
(Graduate)  
See schedule for current offerings.

ENG 478 | TOPICS IN TEACHING | 4 quarter hours  
(Graduate)  
See schedule for current offerings.

ENG 480 | INTRODUCTION TO CREATIVE WRITING | 4 quarter hours  
(Graduate)  
An introductory creative writing course open to all DePaul graduate students and non-degree-seeking students with a bachelor's degree in any field.

ENG 481 | WRITING WORKSHOP TOPICS | 4 quarter hours  
(Graduate)  
See schedule for current offerings. Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 482 | SCIENCE WRITING | 4 quarter hours  
(Graduate)  
An introduction to the creative career of science writing. Students investigate, compose and edit finished magazine articles to be submitted for publication. Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 483 | TRAVEL WRITING | 4 quarter hours  
(Graduate)  
Writing travel essays: history and forms of the literary travel essay; writing about travel for the book and magazine market. Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 484 | WRITING THE PERSONAL ESSAY | 4 quarter hours  
(Graduate)  
Focuses on studying and writing creative nonfiction essays, with particular attention paid to voice, style, form and structure, narration and exposition, scene, and narrative distance. Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 485 | SCREENWRITING | 4 quarter hours  
(Graduate)  
An introduction to the craft of screenwriting. Covers principles of plot, dramatic conflict, characterization, dialogue, and screenplay form. Students develop short dramatic and documentary screenplays. Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 486 | WRITING FOR MAGAZINES | 4 quarter hours  
(Graduate)  
Covers the range of skills necessary for magazine writing. Discussion of the elements of style, humor, research, concept and imagery that characterize the literature of fact. Students investigate, compose and edit finished magazine articles to be submitted for publication. Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 487 | WRITING WORKSHOP TOPICS | 4 quarter hours  
(Graduate)  
An introductory creative writing course open to all DePaul graduate students and non-degree-seeking students with a bachelor's degree in any field.

ENG 488 | WRITING WORKSHOP TOPICS | 4 quarter hours  
(Graduate)  
See schedule for current offerings. Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 489 | WRITING WORKSHOP TOPICS | 4 quarter hours  
(Graduate)  
See schedule for current offerings. Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.
ENG 492 | WRITING FICTION | 4 quarter hours  
(Graduate)
A course in writing short stories. Emphasis is placed on class discussion of student writing.
Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 493 | WRITING POETRY | 4 quarter hours  
(Graduate)
A course in writing and reading poetry. Emphasis is placed on class discussion of student writing.
Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 496 | TOPICS IN EDITING | 4 quarter hours  
(Graduate)
An introduction to editing principles and practices in professional and technical fields. See Schedule for current offerings.

ENG 497 | WRITING THE LITERATURE OF FACT | 4 quarter hours  
(Graduate)
An advanced course in reading and writing true-life stories in the nonfiction tradition exemplified by such writers as Dickens, Agee, McPhee, and Didion.
Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

ENG 500 | INDEPENDENT STUDY | 4-8 quarter hours  
(Graduate)
Written permission of supervising faculty member and of the program director is necessary before registration. Variable credit.

ENG 501 | THESIS RESEARCH | 4 quarter hours  
(Graduate)
Written permission of supervising faculty member and of the program director is necessary before registration. Limited to four credits.

ENG 502 | CANDIDACY CONTINUATION | 0 quarter hours  
(Graduate)
This 0-credit hour course is available to master’s degree candidates who are actively working toward the completion of a thesis, project, or portfolio. Enrollment in this course is limited to three quarters and requires thesis/project advisor and graduate director approval and demonstration to them of work each quarter. Enrollment in this course allows access to the library and other campus facilities. This course carries and requires the equivalent of half-time enrollment status. The student may be eligible for loan deferment and student loans. This course is graded as pass/fail. (0 credit hours)

ENG 503 | CANDIDACY MAINTENANCE | 0 quarter hours  
(Graduate)
This 0-credit hour course is available to graduate students who are not registered for a course in a given quarter but need to maintain active university status. Enrollment in this course is limited to three quarters and requires permission of the graduate director. Enrollment in this course allows access to the library and other campus facilities. This course does not carry an equivalent enrollment status and students in it are not eligible for loan deferment or student loans. This course is not graded. (0 credit hours)

ENG 509 | INTERNSHIP | 4 quarter hours  
(Graduate)
Internship: Written permission of supervising faculty member and of the program director is necessary before registration. Limited to four credits.

English Language Academy (ELA)

ELA A030 | ADVANCED WRITING AND WORD PROCESSING | 0 quarter hours  
(CNED Systems)
An advanced-level course in English-as-a-second-language writing. Students learn to write 3-to-5 page compositions including a research paper.

ELA A031 | ADVANCED READING AND VOCABULARY DEVELOPMENT | 0 quarter hours  
(CNED Systems)
An advanced-level course in English-as-a-second-language reading. Students build on their reading skills by identifying intended audience, source and tone of a reading, acquire more literary terms, read longer newspaper articles, editorials, plays, and novels.

ELA A032 | ADVANCED GRAMMAR | 0 quarter hours  
(CNED Systems)
An advanced-level course in English-as-a-second-language grammar. Students build on the work from previous levels with the future perfect and future perfect progressive tenses, negative and past forms of modals, passive voice, causative verbs, conditionals, and gerunds and infinitives.

ELA A033 | ADVANCED SPOKEN ENGLISH AND LISTENING | 0 quarter hours  
(CNED Systems)
An advanced-level course in English-as-a-second-language spoken English. Among other skills, students learn to manage small group discussions, defend positions, speak persuasively, deliver a formal presentation, draw inferences from authentic speech, and takes notes from short lectures.

ELA B040 | UNIVERSITY BRIDGE WRITING: SERVICE, RESEARCH AND WRITING | 0 quarter hours  
(CNED Systems)
A university bridge-level course in English-as-a-second-language writing. Students learn to write first-person narrative and a research essay through participation in community service.

ELA B041 | UNIVERSITY BRIDGE READING AND VOCABULARY DEVELOPMENT | 0 quarter hours  
(CNED Systems)
A university bridge-level course in English-as-a-second-language reading. Students build on their reading skills by comparing points of view, paraphrasing and outlining ideas, acquiring higher-level literary terms, and read more complex articles, novels, plays, or several short stories.

ELA B042 | UNIVERSITY BRIDGE GRAMMAR | 0 quarter hours  
(CNED Systems)
A university bridge-level course in English-as-a-second-language grammar. Students build on the work from previous levels with more complex uses of such structures as auxiliary verbs, noun modifiers, adjective and adverb clauses, and unreal conditionals.

ELA B043 | UNIVERSITY BRIDGE SPOKEN ENGLISH AND LISTENING | 0 quarter hours  
(CNED Systems)
A university bridge-level course in English-as-a-second-language spoken English. Students master previous functions at the highest level, such as persuading, negotiating, and debating; deliver formal presentations; demonstrate skill at note taking and comprehending regional dialects.
ELA CP050 | UNIVERSITY EXPERIENCE RESEARCH AND WRITING | 0 quarter hours
(CNED Systems)
University Experience Research and Writing provides non-native speaking students authentic experiences preparing and writing papers using American academic standards and styles. This course teaches students to select and effectively evaluate scholarly sources appropriate to their discipline, to organize their research and to present a thesis logically using American academic styles. Ideally, the course is taken in conjunction with CP052 University Experience Reading or other similar academic English reading course.

ELA CP051 | UNIVERSITY EXPERIENCE READING AND SURVEY OF TEXTS | 0 quarter hours
(CNED Systems)
University Experience Reading & Survey of Texts provides university level reading instruction and prepares non-native speaking students to evaluate and categorize university level texts within their chosen discipline. The course focuses on using reading strategies that maximize reading efficiency and comprehension and is designed specifically for students who are preparing to enroll in university degree programs. The course is an ideal complement to CP050 University Experience Research and Writing.

ELA CP053 | UNIVERSITY EXPERIENCE ACADEMIC AND CLASSROOM CULTURE | 0 quarter hours
(CNED Systems)
University Experience Academic and Classroom Culture prepares non-native speaking students for success in American university classrooms. The course focuses on becoming an effective oral communicator in university environments. Instruction helps students develop effective strategies for note taking, classroom participation, and successful interaction with other students and instructors in a variety of teaching modes that are common in American universities.

ELA CP054 | UNIVERSITY EXPERIENCE ADVANCED ENGLISH PRACTICE | 0 quarter hours
(CNED Systems)
University Experience Advanced English Practice offers students a selection of options that allows them to address individual English language development needs from pronunciation to interviewing skills to advanced topics within their proposed discipline of study. The exact structure of this module is determined by individual student needs and each student works with an ELA advisor to select options that will provide maximum individual language growth. The individual student plan requires approval of the ELA director.

ELA EB1 | ENGLISH BASICS I | 0 quarter hours
(CNED Systems)
This is an integrated, beginning-level ESL course.

ELA EB2 | ENGLISH BASICS II | 0 quarter hours
(CNED Systems)
This is part two of an integrated, beginning-level ESL course.

ELA F000 | FOUNDATIONS WRITING AND WORD PROCESSING | 0 quarter hours
(CNED Systems)
A beginning-level course in English-as-a-second-language writing. Students learn basic paragraph structure, topic sentences and how to support them. (Students should have an active vocabulary of 200-400 words in English.)

ELA F001 | FOUNDATIONS READING AND VOCABULARY DEVELOPMENT | 0 quarter hours
(CNED Systems)
A beginning-level course in English-as-a-second-language reading. Students practice various reading skills, such as locating the main idea; study vocabulary acquisition; and read ESL specific readings and newspaper articles. (Students should have an active vocabulary of 200-400 words in English.)

ELA F002 | FOUNDATIONS GRAMMAR | 0 quarter hours
(CNED Systems)
A beginning-level course in English-as-a-second-language grammar. Students work on basic grammar, such as simple tenses, modals, and articles, as well as nouns, pronouns, adjectives and adverbs. (Students should have an active vocabulary of 200-400 words in English.)

ELA F003 | FOUNDATIONS SPOKEN ENGLISH AND LISTENING | 0 quarter hours
(CNED Systems)
A beginning-level course in English-as-a-second-language spoken English. Students learn many basic practical functions, such as asking for and giving opinions and leaving a simple message. (Students should have an active vocabulary of 200-400 words in English.)

ELA H020 | HIGH INTERMEDIATE WRITING AND WORD PROCESSING | 0 quarter hours
(CNED Systems)
A high intermediate-level course in English-as-a-second-language writing. Students learn to write academic compositions using specific organizational patterns.

ELA H021 | HIGH INTERMEDIATE READING AND VOCABULARY DEVELOPMENT | 0 quarter hours
(CNED Systems)
A high intermediate-level course in English-as-a-second-language reading. Students build on their reading skills by learning the difference between fact and opinion, understanding inferences, acquiring more literary terms, reading newspaper articles, short stories and novels.

ELA H022 | HIGH INTERMEDIATE GRAMMAR | 0 quarter hours
(CNED Systems)
A high intermediate-level course in English-as-a-second-language grammar. Students build on the work from previous levels with perfect progressive tenses, adjective clauses, reflexive pronouns, and more advanced modals, adjectives and adverbs.

ELA H023 | HIGH INTERMEDIATE SPOKEN ENGLISH AND LISTENING | 0 quarter hours
(CNED Systems)
A high intermediate-level course in English-as-a-second-language spoken English. Students practice such functions as supporting opinions, expressing empathy and compromise, reporting and summarizing; make a presentation; and listen effectively to authentic speech.

ELA I010 | INTERMEDIATE WRITING AND WORD PROCESSING | 0 quarter hours
(CNED Systems)
An intermediate-level course in English-as-a-second-language writing. Students begin connecting paragraphs into longer essays.

ELA I011 | INTERMEDIATE READING AND VOCABULARY DEVELOPMENT | 0 quarter hours
(CNED Systems)
An intermediate-level course in English-as-a-second-language reading. Students build on the work in the Foundations level and learn to restate the author's point of view, acquire literary terms, and read stories.
ELA I012 | INTERMEDIATE GRAMMAR | 0 quarter hours
(CNED Systems)
An intermediate-level course in English-as-a-second-language grammar. Students build on the work in Foundations grammar and learn progressive and past tenses, question formation, noun clauses, and comparative and superlative forms of adjectives and adverbs.

ELA I013 | INTERMEDIATE SPOKEN ENGLISH AND LISTENING | 0 quarter hours
(CNED Systems)
An intermediate-level course in English-as-a-second-language spoken English. Students practice such functions as giving advice, apologizing, complaining, asking for explanations and make a simple presentation.

ELA T200 | GRAMMAR FOR TOEFL WRITING | 0 quarter hours
(CNED Systems)
An English-as-a-second-language course that reinforces and reviews the grammar skills necessary to excel on the Writing portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as in future academic pursuits.

ELA T201 | TOEFL READING AND READING LAB | 0 quarter hours
(CNED Systems)
An English-as-a-second-language course that prepares students for the Reading portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice reading strategies and the variety of reading skills tested on the TOEFL iBT. In addition, students expand their academic vocabulary and knowledge of word roots. Moreover, students get valuable exposure to the testing lab environment by doing practice computerized tests in this skill area.

ELA T202 | TOEFL WRITING AND INTEGRATED SKILLS | 0 quarter hours
(CNED Systems)
An English-as-a-second-language course that prepares students for the Writing and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the writing skills necessary to produce the high-quality essays required during the writing portion of the test. They also practice and learn the skills necessary to synthesize and summarize information in a written format, as required in the Integrated Skills portion of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional practice writing and integrated skills computerized tests in this skill area.

ELA T203 | TOEFL SPEAKING AND INTEGRATED SKILLS | 0 quarter hours
(CNED Systems)
An English-as-a-second-language course that prepares students for the Speaking and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the speaking skills and strategies which must be applied during the Integrated Skills portion of the test. Students also practice useful idioms that can be applied in both the listening and speaking portions of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional integrated skills computerized tests in this skill area.

ELA T204 | TOEFL PRACTICE TESTS | 0 quarter hours
(CNED Systems)
An English-as-a-second-language lab that allows students to apply the skills they have been learning and check their progress in a timed, self-testing environment.

ELA T205 | TOEFL LISTENING AND LISTENING LAB | 0 quarter hours
(CNED Systems)
An English-as-a-second-language course that prepares students for the listening portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as for future academic study. Students learn and practice the listening skills and strategies which must be applied during the listening portion of the test. Moreover, students get valuable exposure to the testing lab environment through computerized practice tests in this skill area.

ELA 100 | PRONUNCIATION WORKSHOP: A COURSE IN ACCENT REDUCTION | 0 quarter hours
(CNED Systems)
An English-as-a-second-language course designed to help students improve their pronunciation.

ELA 101 | TOEFL (TEST OF ENGLISH AS FOREIGN LANGUAGE) PREPARATION | 0 quarter hours
(CNED Systems)
An English-as-a-second-language course designed to help students prepare for the TOEFL (Test of English as a Foreign Language).

ELA 102 | GMAT/MBA (GRADUATE MANAGEMENT ADMISSION TEST/MASTERS IN BUSINESS ADMINISTRATION) PREPARATION | 0 quarter hours
(CNED Systems)
An English-as-a-second-language course designed to help students prepare for the GMAT (Graduate Management Admissions Test).

ELA 109 | VOCABULARY DEVELOPMENT FOR NON-NATIVE SPEAKERS OF ENGLISH | 0 quarter hours
(CNED Systems)
This class is designed to expand students' vocabulary by reinforcing ability to use vocabulary accurately, by use of new vocabulary-learning skills, and by acquisition of word decoding skills and strategies. Students will be introduced to approximately 25-40 new words per class. (Students in this class should have at least high intermediate proficiency in English.)

ELA 110 | TALKING BUSINESS | 0 quarter hours
(CNED Systems)
Talking Business is an intensive course for non-native English speakers preparing for business school or expanding their careers in the business world. The course will focus on improving students' vocabulary, knowledge of key concepts in business and economics, and listening and speaking skills related to those concepts. Each day, students will have the opportunity to read and listen to authentic materials as well as to engage in lively, informative discussion.

ELA 120 | ELA ORIENTATION AND NEW STUDENT REGISTRATION | 0 quarter hours
(CNED Systems)
New ELA students enroll in ELA 120 to reserve a place in a coming term. Only new students enroll in ELA 120.

ELA 130 | CONTINUING STUDENT REGISTRATION | 0 quarter hours
(CNED Systems)
Students wishing to continue enrollment at ELA select ELA 130. Only continuing students enroll in ELA 130.

ELA 300 | ELA TOPICS | 0 quarter hours
(CNED Systems)
Special courses and workshops offered by the English Language Academy.
ELA 301 | SIT TESOL PROGRAM | 0 quarter hours
(CNED Systems)
A 130-hour TESOL/TEFL certificate course during which students learn how to teach English-as-a-Second-Language, including 36 hours of practice teaching with ESL students. Taught by the School for International Training at DePaul's English Language Academy.

ELA 302 | DECEMBER INTERSESSION TOPICS | 0 quarter hours
(CNED Systems)
December Intersession Topics is an intensive course that seeks to develop the academic English skills of English-language students through exploration of current, controversial or topical matters that change from term to term.

ELA 305 | SUMMER LANGUAGE AND CULTURE | 0 quarter hours
(CNED Systems)
Summer Language and Culture a 4-week non-credit language and culture program that builds students' English language skills through in-class and experiential study of American culture and intercultural communication. The course also includes weekly excursions in the City of Chicago.

Environmental Science (ENV)

ENV 101 | INTRO TO ENVIRONMENTAL SCIENCE WITHOUT LAB | 4 quarter hours
(Undergraduate)
ENV 101 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Students cannot receive credit for both ENV 101 and ENV 102.

ENV 102 | INTRO TO ENVIRONMENTAL SCIENCE WITH LAB | 4 quarter hours
(Undergraduate)
ENV 102 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Lab investigations further develop scientific and environmental understandings. Students cannot receive credit for both ENV 101 and ENV 102.

LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 115 | ENVIRONMENTAL GEOLOGY | 4 quarter hours
(Undergraduate)
An examination of the earth’s materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic resources and the geological aspects of waste disposal and pollution. The course includes a three-hour lab. Students cannot receive credit for both ENV 115 and ENV 116.

LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 116 | GEOLOGY OF THE ENVIRONMENT | 4 quarter hours
(Undergraduate)
An examination of the earth’s materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic resources and the geological aspects of waste disposal and pollution. Students cannot receive credit for both ENV 115 and ENV 116.

ENV 117 | EARTH THROUGH TIME WITH LABORATORY | 4 quarter hours
(Undergraduate)
A general introduction to the 4.6 billion-year geologic history of planet Earth. The course scientifically explores the history of the earth from its formation to present day, the origin and transformation of rocks, internal and external geologic processes and structures, evolution and extinction of organisms, and patterns of Earth’s environmental conditions through time. The course includes a three-hour lab. LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 118 | EARTH THROUGH TIME | 4 quarter hours
(Undergraduate)
A general introduction to the 4.6 billion-year geologic history of planet Earth. The course scientifically explores the history of the earth from its formation to present day, the origin and transformation of rocks, internal and external geologic processes and structures, evolution and extinction of organisms, and patterns of Earth's environmental conditions through time.

LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 150 | FOUNDATIONS OF ENVIRONMENTAL STUDIES | 4 quarter hours
(Undergraduate)
The purpose of this course is to introduce students to environmental studies. It presents students with an overview of the intersections between ecology, the social sciences, and the humanities that inform our vision of the rigor and power of interdisciplinary environmental studies. It draws upon the natural sciences, communication, geography, philosophy, religion, history, literature, art and design, and public policy to stress the interrelationships between human society and the natural world. Students will study the effects of the human use of the natural world and the interactions of culture, society, resources, and the environment. We will examine the social, political, and economic institutions that impact the environment. Particular attention will be paid to how the role of power and inequality contribute to environmental problems and how those problems in turn, impact certain groups more than others (e.g. citizens of undeveloped nations, people of color in urban areas).

ENV 151 | INTRODUCTION TO SUSTAINABILITY | 4 quarter hours
(Undergraduate)
This course provides an interdisciplinary introduction to sustainability and examines the essential interdependence between environmental, human, and economic systems. The class focuses on the theories and practices that respect the Earth's ecological limits so that these systems remain viable now and into the future. Students will explore the interrelated environmental, social, and economic problems that we currently face at the local, national, and global scale and the solutions that individuals, governments, and institutions are implementing in an effort to ensure a sustainable future.
ENV 152 | ECOLOGICAL AND SOCIAL ECONOMICS | 4 quarter hours (Undergraduate)
In this course, students examine the role of the environment and natural resources in neoclassical, environmental and ecological economics. First, students study mechanisms for efficiently allocating scarce resources among specific alternative ends and take a brief foray into environmental economics and learn methods of resource/environmental valuation. We also discuss aspects of macroeconomics as it pertains to ecological economics. Students come away able to critically assess the benefits and drawbacks of these three ways that the economy incorporates the environment. It also encourages ethical reasoning as we discuss distribution of environmental benefits over generations and globally.
LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 160 | IDEAS OF NATURE | 4 quarter hours (Undergraduate)
This course is an introductory history of the ideas of nature that emerged over the last two and a half centuries in Europe and the United States. We examine how the conceptions, meanings, and values of nature today have been influenced by the Scientific and Industrial Revolutions, Romanticism, and evolutionary theory; notions of the sublime, the frontier, and wilderness; and the practices of conservation, preservation, and restoration. Also discussed are the ideological commitments of current environmentalisms, in particular sustainability.

ENV 165 | NATIONAL PARKS HISTORY | 4 quarter hours (Undergraduate)
This course is designed, in part, as intensive introduction to the history of national parks, both in the United States and abroad, and will cover a broad swath of history, from the historical antecedents that influenced the founding of the America's earliest parks to twenty-first century issues throughout the world. By necessity, this will not be an exhaustive survey of the history of all fifty-nine national parks in the United States, let alone the roughly 7,000 national parks worldwide. Instead, we will use illustrative examples to highlight key moments in national park history, including nineteenth-century intellectual movements that inspired the creation of national parks, the debates over conservation and preservation, legislative acts such as the Antiquities Act and the National Park Service Organic Act, the democratization of tourism in America, the rise of the wilderness and environmental movements, the conservative revolution, the exportation of the national park ideal throughout the burgeoning world, and the future of American national parks. The historical knowledge gained through course readings and lectures will be essential for completion of both writing assignments and the two exams.

ENV 170 | ENVIRONMENTAL ETHICS | 4 quarter hours (Undergraduate)
The environmental issues that confront us are both global and local; they involve political, economic and ethical decision-making by governments, corporations and citizens. Students will explore and evaluate diverse approaches to a range of such issues, as well as the ways different thinkers and different cultures have envisioned the relationship between human beings and the natural world—all with a view to understanding their own relationships to the natural world, their own environmental ethics.

ENV 180 | ISSUES IN ENVIRONMENTAL DESIGN | 4 quarter hours (Undergraduate)
Issues in Environmental Design is an introductory course that will examine concepts, theories and practices across multiple scales of design, including architecture, landscape architecture and urban design. Students will discuss and evaluate the design decisions that compose our built environment with a focus on contemporary ideas of ecological sustainability. Examples of excellence will be explored through the examination of case studies. The underlying theme is the connection between culture and nature, and how we may reduce our negative impact on systems that support all life while building positive systems that support all life.

ENV 181 | LANDSCAPE ARCHITECTURE | 4 quarter hours (Undergraduate)
This course will examine the process by which landscape architects contribute to the built environment. The course will culminate in the presentation of a student design proposal for an existing site in Chicago. In preparation, students will use literature and design examples to examine how political and aesthetic attitudes toward landscape architecture have evolved, from the pastoral focus of the 19th century to today’s desire for adaptable and multifunctional spaces. Selection of readings and examples will be catered to key issues arising from the chosen design proposal site for that quarter. Students will become familiar with standard architectural representation methods (such as plan, section and model) and will learn how landscape architects engage with existing social and environmental conditions in the development of their aesthetic designs.

ENV 200 | CITIES AND THE ENVIRONMENT | 4 quarter hours (Undergraduate)
This course focuses on the interactions between urban areas and the environment. It presents a discussion of the physical setting of cities; the water, energy, air and waste disposal needs of urban areas; and the effects of urban development on air, soil, and water quality, and the health of the community of non-human organisms. In particular, it presents this topic in the context of the emerging discipline of urban ecology, and introduces the notion of cities as social ecological systems where both people and nature interact.

ENV 202 | RESOURCES, POPULATION, AND THE ENVIRONMENT | 4 quarter hours (Undergraduate)
A course on the relationship between the exploitation of the biological, mineral and energy resources of the earth to support an increasing population, and the environmental effects of this development. To provide an overview of the current debate on the relationship between the growing human population worldwide, the natural resources required to sustain this population, and the consequences of resource exploitation for managing environmental quality. We will integrate the ecological, economic, and policy factors involved in natural resource management.

ENV 203 | CHEMISTRY FOR ENVIRONMENTAL STUDIES | 4 quarter hours (Undergraduate)
ENV 203 is a course for Environmental Studies majors that develops the fundamental concepts of chemistry with experimental exploration in the context of societal issues. Chemistry topics include atomic structure, chemical bonding, chemical reactions, thermodynamics, and acid-base behavior. These topics are discussed on a “need-to-know” basis, embedded in discussions of air pollution, ozone depletion, global climate change, energy, water pollution, and acid rain.
LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.
ENV 204 | ENERGY AND THE ENVIRONMENT | 4 quarter hours  
(Undergraduate)  
This course is designed to provide students with the scientific tools necessary to understand and critically evaluate both personal and policy decisions regarding the variety of options (e.g. fossil fuel, solar, wind, etc.) for energy generation and use. The course also focuses on the environmental impacts of all forms of energy, from the extraction of fossil fuels and mineral resources from the earth, to the generation, distribution and consumption of energy, and ultimately emission of fossil fuel combustion products, notably carbon dioxide and other heat trapping gases, to the atmosphere.  
LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 205 | BIOLOGY FOR ENVIRONMENTAL STUDIES | 4 quarter hours  
(Undergraduate)  
This lecture-laboratory course for Environmental Studies majors introduces the fundamental concepts of biology that are critical for the understanding of a wide range of environmental issues, such as genetic engineering, overpopulation, conservation biology, and climate change. Under the framework of evolutionary biology, the content of this course includes basic cell biology, genetics, population biology, phylogeny, ontogeny, and biodiversity.  
LSP 120 or LSP 121 (or HON 180) or (MAT 130 or above) is a prerequisite for this class.

ENV 216 | EARTH SYSTEM SCIENCE | 4 quarter hours  
(Undergraduate)  
This course focuses on three of the great spheres of the Earth (lithosphere, hydrosphere and atmosphere) and how they interact with the biosphere to create an integrated Earth system with an emphasis on how human activities impact important earth system cycles. Students should have a basic understanding of how living organisms interact with their physical environment. Laboratory activities provide experience with the tools and methodology of systems thinking.  
LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 217 | HUMAN IMPACTS ON THE ENVIRONMENT | 4 quarter hours  
(Undergraduate)  
A science-based course that examines the interface between humans and the living and non-living environment, the consequences of these interactions, and options for mitigating environmental impacts.  
ENV 222 | TOPICS IN ENVIRONMENTAL STUDIES | 4 quarter hours  
(Undergraduate)  
Variable topics in environmental studies.  
ENV 230 | GLOBAL CLIMATE CHANGE | 4 quarter hours  
(Undergraduate)  
Climate change is a crucial issue facing society and involves intricate interactions between human pollution, processes in the Earth system and societal impacts. The course will cover the basic science of climate change and also consider its ethical dimensions. Solutions to climate change that incorporate sound science and social behavior will be explored through student-driven projects.  
LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 235 | ENVIRONMENTAL EDUCATION: THEORY AND PRACTICE | 4 quarter hours  
(Undergraduate)  
This course, led by educators from the Chicago Academy of Sciences and its Peggy Notebaert Nature Museum (PNNM), examines theories and models of environmental education (EE) and the status of environmental literacy in the US. The goal is to equip you, as future environmental professionals, to effectively engage audiences in environmental topics and issues. In this experiential learning course, you will participate in and observe aspects of program implementation, development, and evaluation at PNNM. These experiences serve as an additional "text" for you to reflect on and connect with course content, and ultimately utilize in your future career paths. As a result of this course, you will be able to: 1. Articulate trends in environmental education theory and practice across a range of educational settings 2. Connect course content (readings, lectures, and discussion) to firsthand experiences with PNNM program development, implementation, and evaluation 3. Apply EE best practices in the development of an educational experience for audiences and topics aligned with PNNM.

ENV 240 | INTRODUCTION TO HORTICULTURE | 4 quarter hours  
(Undergraduate)  
This course introduces the principles and core practices involved in the culture of plants. Topics include the uses of plants and horticultural practices throughout history; the botanical and horticultural classification of plants; plant structure and function, growth and regulation; environmental requirements for plant growth; genetic modification of plants; plant reproduction and propagation; and plant pests and diseases. The course also considers environmental issues in horticulture including xeriscaping, biodiversity and the use of native plants, water management and rain gardens and hydroponics and container gardens.  
ENV 245 | URBAN AND COMMUNITY AGRICULTURE | 4 quarter hours  
(Undergraduate)  
This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary case-study approach, this course will explore issues such as food security, community gardening, farmers markets, the locavore food movement, entrepreneurial aspects of urban agriculture, methods of urban food production, and food consumption patterns. The course will meet in the classroom and on-site at the DePaul urban farm and greenhouses. In addition, students are expected to spend several hours each week outside of class time engaged in hands-on experience in urban farming at DePaul or at local sites arranged with the instructor.

ENV 250 | APPLIED ECOLOGY | 4 quarter hours  
(Undergraduate)  
This course provides a broad survey of ecological principles and methods of lab and field investigation. Topics include the distribution and abundance of organisms in nature including those factors that influence population size, growth, and regulation; species interactions; community organization and change; and ecosystem level processes that move matter and energy among the living and non-living parts of the environment. The lecture also integrates ecological theory with natural history and environmental issues. Lab goals are to help students 1) acquire experience in ecological methods and sampling techniques, 2) better understand ecological concepts, 3) develop skills in hypothesis testing, experimental design, and the analysis of ecological data and 4) gain an increased awareness of and appreciation for the complexity, diversity, and structure of the natural world.  
LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.
ENV 260 | ENVIRONMENTAL DATA ANALYSIS | 4 quarter hours  
(Undergraduate)  
This course will provide students with skills to implement the most common statistical methods used in the environmental sciences. It emphasizes statistical literacy and develops statistical thinking. Exams will include real data to address authentic questions, and fosters active learning by experiencing statistics; student design studies, collect data, analyze data using graphs and numerical tools, interpret results, and communicate statistical inferences with written and oral reports. LSP 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 261 | MIXED METHODS IN ENVIRONMENTAL STUDIES | 4 quarter hours  
(Undergraduate)  
Environmental studies as a discipline is increasingly interdisciplinary and requires knowledge and skills in not only the natural sciences, social sciences, and humanities, but also quantitative and qualitative analytical methods. In this class, students will learn how to effectively blend different theories and methodologies to examine interactions between humans and the environment. Skills gained will include survey design and implementation, qualitative interviewing and analysis, photo interpretation, case study, ethical considerations in environmentally-focused human subjects research, and more. ENV 250 is either a prerequisite or co-requisite for this class.

ENV 294 | SECOND YEAR SEMINAR | 2 quarter hours  
(Undergraduate)  
The purpose of this course is to advance ecological literacy. The seminar presents the study of the environment to students in a philosophical, cultural, and historical context, and in addition makes them aware of some foundational ideas of the discipline through a selection of new and classic literature. (2 quarter hours)

ENV 300 | PLANT IDENTIFICATION | 4 quarter hours  
(Undergraduate)  
An in-depth overview of plant families and species in the Chicagoland area. Lectures will focus on morphology of plants, evolutionary relationships among plant families, and terminology of plant structures. Students will use botanical keys and manuals for the area to identify plants and will learn collection techniques. Plant species will be collected in their natural habitats during field trips. ENV 250 or BIO 215 is a prerequisite for this class.

ENV 305 | ANIMAL DIVERSITY | 4 quarter hours  
(Undergraduate)  
This course investigates the diversity of animals, including invertebrates and vertebrates. Discussions include the origin and evolution of animals, species concepts, developmental biology, taxonomic classification, phylogenetic systematics, and conservation biology. ENV 205 (or BIO 192) is a prerequisite for this class.

ENV 310 | ENVIRONMENTAL SOIL SCIENCE | 4 quarter hours  
(Undergraduate)  
An examination of the physical, chemical, biological and engineering properties of soils, their genesis and classification, how they function as sites of waste disposal, and their role in global agricultural production. The course includes a three-hour lab and a mandatory Saturday field trip. LSP 120 or LSP 121 (or HON 180) or MAT 130 is a prerequisite for this class.

ENV 315 | PLANT ECOLOGY | 4 quarter hours  
(Undergraduate)  
This course focuses on how plants are affected by abiotic factors in the environment and interactions with other organisms. Goals are to improve students' abilities to understand research papers, present overviews of current research, design experiments, and analyze data. The course includes weekly labs with greenhouse experiments or field trips followed by data analysis. Topics include germination ecology, pollination biology, competition between plants, and effects of herbivory. ENV 250 or BIO 215 is a prerequisite for this class.

ENV 316 | CHEMISTRY OF EARTH SYSTEMS | 4 quarter hours  
(Undergraduate)  
This class focuses on the impact of pollution on the Earth's ability to provide clean air, water and food for human consumption. The industrialization of the economy during the last 150 years has greatly increased the amount of waste that is sent into the four Earth spheres: the atmosphere, hydrosphere, lithosphere and biosphere. These emissions directly harm organisms and also cycle back to pollute essential ecosystem services provided by the Earth. This class will consider the source, transport, transformation and ultimate fate of pollution emitted into the air, water and solid Earth. Examples will include relatively simple cases (agricultural pesticides harming birds) and range to more complex interactions (depletion of stratospheric ozone by CFCs and the increase in harmful ultraviolet radiation). The laboratory component will be project-based and some work can be completed outside of the assigned lab time.

ENV 216 and CHE 132 are a prerequisite for this class.

ENV 320 | CONSERVATION BIOLOGY | 4 quarter hours  
(Undergraduate)  
Conservation biology is an interdisciplinary field that has developed in response to the challenge of preserving species and ecosystems. With a specific focus on the Chicago area, students in this course will: assess key threats to biodiversity and the challenges associated with conservation of native communities, evaluate how different institutions implement conservation in the region, and engage with the primary literature related to the field of conservation biology. BIO 215 or ENV 250 is a prerequisite for this class.

ENV 322 | ECOSYSTEM ECOLOGY | 4 quarter hours  
(Undergraduate)  
This course will introduce students to the conceptual and methodological tools of ecosystem ecology. The course will focus on understanding the fundamental structure and function of ecosystems but will also address very recent debates on the economic value of ecosystem services, the role of biological diversity in maintaining ecosystem processes, and the consequences of stressed and degraded ecosystems for human welfare. Finally, we assess the role of ecosystem ecology in designing sustainable restoration projects. The course includes a weekly lab. BIO 215 or ENV 250 is a prerequisite for this class.
ENV 331 | URBAN ENVIRONMENTAL MONITORING | 4 quarter hours
(Undergraduate)
As the world’s population shifts into cities, there is an increasing interest in measuring the quality of the urban environment. From air quality to soundscapes, urban dwellers want to live in an environment that is healthy and sustainable. However, deteriorated environmental conditions are widespread and often unfairly distributed with regards to race, ethnicity and class. Assuming that knowledge is power, person-centered environmental monitoring can identify hotspots, highlight injustices and lead to improvements. The class will focus on a new generation of wearable/deployable sensors that use cell phones and other technology advances to measure air, sound and visual quality. This project-driven class will have students personally investigating an urban environmental question using wearable sensors or easily deployable environmental monitors.

(LSP 120) or (LSP 121 or ON 180) or (MAT 130 or above) is a prerequisite for this class.

ENV 340 | URBAN ECOLOGY | 4 quarter hours
(Undergraduate)
Urban ecology has been described as an ?upstart discipline.? This is because it is relative new, and challenges the historical emphasis that scientific ecology has placed on pristine and wilderness locations. Thus, this novel discipline examines the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more sustainable - cleaner, healthier and more biodiverse. We also examine how ecology as a discipline can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, geography, economics, demography, architecture and planning. In particular we develop the notion of the system as a ? social ecological system.? This course has a required lab; and some Saturday field trips.

BIO 215 or ENV 250 is a prerequisite for this class.

ENV 341 | URBAN FORESTS AS SOCIAL-ECOLOGICAL SYSTEMS | 4 quarter hours
(Undergraduate)
Urban forests include all the trees, forests, and greenspaces in cities and towns. Urban forest management, or urban forestry, is the discipline/profession that seeks to plan and manage this green infrastructure in order to provide ecological, economic, and social benefits to all residents. Trees and vegetation have long been protected and planted in cities and towns for a variety of reasons. Recently, urban forestry has expanded to be a lead focus in the broader arena of urban ecology and urban ecosystem management, with a clear goal of creating sustainable ecosystems. This course will look at urban forests through the lens of social-ecological systems (SESs) of linked human and natural components, with a focus on teaching students the hands-on skills of urban forest management. The course will utilize the talents of a number of guest speakers and field experience facilitators who are professionals in urban forestry to give students a practical, real world introduction to the subject. The DePaul University campus and the City of Chicago and surrounding region will serve as our field laboratory to view an actively managed urban forest. This course meets learning outcomes 1 and 4 for the Environmental Science and Studies majors, outcomes 5 through 8 for the Environmental Science major, outcome 6 in the Environmental Studies major, and outcome 9 for the sustainability concentration.

ENV 250 (or permission of instructor) is a prerequisite for this course.

ENV 344 | ENVIRONMENTAL JUSTICE AND ADVOCACY | 4 quarter hours
(Undergraduate)
This course explores the roles of individuals and organizations in advocacy through the lens of environmental justice, particularly as power arrangements facilitate or impede consensus building. The course examines how legislation is written and how this process has impacted communities of color. Special attention is paid to advocacy techniques such as lobbying, movement-building, public education and litigation.

ENV 345 | URBAN AGRICULTURE | 4 quarter hours
(Undergraduate)
This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary, integrative, case-study approach, this course will explore issues such as food access, food security, food deserts, community gardening, farmers markets, locavore food movement, entrepreneurial aspects of urban agriculture, method of food production, community nutrition, and food consumption patterns. The course will meet both in the classroom and on-site at an urban farm, where students will work in all aspects of the farm as well as learn to organize communities in an effort to help them create food security and access to healthy food systems.

ENV 350 | ENVIRONMENTAL SCIENCE AND STUDIES CAPSTONE | 4 quarter hours
(Undergraduate)
This course examines basic core concepts of and current issues in environmental science drawing on perspectives of the liberal studies curriculum, including reflectiveness, value consciousness, critical and creative thinking, and a multicultural perspective.

Status as a senior Environmental Studies or Environmental Science major is a prerequisite for this class.

ENV 355 | INTRODUCTION TO ENVIRONMENTAL HEALTH | 4 quarter hours
(Undergraduate)
Study of the environment factors that influence health. Topics include air and water pollution, global population and local community dynamics, toxicology, infectious and chemical agents, radiation, and management.

ENV 359 | ADVANCED ENVIRONMENTAL DATA ANALYSIS WITH R | 4 quarter hours
(Undergraduate)
Advanced topics in design and analysis of environmental experiments using the free data science software, R. Students will apply univariate and multivariate statistics to publicly available environmental data, interpret results, make appropriate inferences from data, and communicate findings in written and oral format.

ENV 260 (or equivalent) is a prerequisite for this class.

ENV 360 | RESEARCH METHODS | 4 quarter hours
(Undergraduate)
This course is intended for junior year Environmental Science majors who are preparing for their senior thesis research projects. Topics include the nature and philosophy of science, experimental design, scientific ethics, and scientific writing. Students will prepare a thesis research proposal on a topic to be determined in the first week of the course.

Status as an Environmental Science major with junior standing or above is a prerequisite for this class.
Urban ecology has been described as an "upstart discipline". This is because it is relatively new, and challenges the historical emphasis that scientific ecology has placed on pristine and wilderness locations. Thus, this novel discipline examines the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more sustainable, cleaner, healthier and more biodiverse. We also examine how ecology as a discipline can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, geography, economics, demography, architecture and planning. In particular, we explore "social ecological system" analysis as a way of framing question concerning people and nature in metropolitan settings.

This course will provide students with the skills to implement the most common statistical methods used in the environmental sciences. It builds upon students' prior knowledge of statistical thinking, and addresses real data to address the sorts of questions students are likely to encounter in their professional lives. The course fosters active learning by experiencing statistics; student design studies, collect data, analyze data using appropriate software, and amplifies students' ability to interpret results, communicate statistical inferences with written and oral reports.

Successful environmental management requires a balanced approach to the theoretical framing of problems and the practical implementation of solutions. Scientists can fail to be informed by phenomena that emerge in the field of practice, and conversely practitioners at times do not draw upon the best available scientific evidence. This course focuses both on the productive tension between theory and practice in environmental management, as well as the integration of ecological and social science in the applied discipline. Collaborating with multiple organizations in the region, the class consists of field visits, professional seminars and guest lectures, case studies, hands-on workshops and practicum research. Central themes include restoration ecology, traditional ecological knowledge, environmental justice, climate science, urban biocultural diversity, and volunteer stewardship.

A course of study is set out in agreement with a supervising professor that outlines an internship experience, including reflective assignments. Permission of instructor and chair required.

A course of study is set out in agreement with a supervising professor that will inculcate the student with a very specific set of knowledge, or skill set.

This course prepares students for thesis research. In agreement with research supervisory the topics may include accounts of the nature and philosophy of science, experimental design, scientific ethics, and scientific writing. Students will prepare a thesis research proposal on a topic to be determined in the first week of the course.
ENV 410 | ENVIRONMENTAL SOIL SCIENCE | 4 quarter hours
(Graduate)
An examination of the physical, chemical, biological and engineering properties of soils, their genesis and classification, how they function as sites of waste disposal, and their role in global agricultural production. The course includes a three-hour lab and a mandatory Saturday field trip. Recommended prerequisites for this class are LSP 120 or LSP 121 or MAT 130 or the equivalent and CHE 103 or CHE 130 or ENV 203.

ENV 415 | PLANT ECOLOGY | 4 quarter hours
(Graduate)
This course focuses on how plants are affected by abiotic factors in the environment and interactions with other organisms. Goals are to improve students' abilities to understand research papers, present overviews of current research, design experiments, and analyze data. The course includes weekly labs with greenhouse experiments or field trips followed by data analysis. Topics include germination ecology, pollination biology, competition between plants, and effects of herbivory. Recommended prerequisites are ENV 250 or BIO 215 or the equivalent.

ENV 420 | CONSERVATION BIOLOGY | 4 quarter hours
(Graduate)
Conservation biology is an interdisciplinary field that has developed in response to the challenge of preserving species and ecosystems. With a specific focus on the Chicago area, students in this course will: assess key threats to biodiversity and the challenges associated with conservation of native communities, evaluate how different institutions implement conservation in the region, and engage with the primary literature related to the field of conservation biology. Recommended prerequisite is ENV 250 or BIO 215.

ENV 422 | ECOSYSTEM ECOLOGY | 4 quarter hours
(Graduate)
This course will introduce students to the conceptual and methodological tools of ecosystem ecology. The course will focus on understanding the fundamental structure and function of ecosystems but will also address very recent debates on the economic value of ecosystem services, the role of biological diversity in maintaining ecosystem processes, and the consequences of stressed and degraded ecosystems for human welfare. Finally, we assess the role of ecosystem ecology in designing sustainable restoration projects. Recommended prerequisite is ENV 250 OR BIO 215.

ENV 425 | ANIMAL DIVERSITY | 4 quarter hours
(Graduate)
This course investigates the diversity of animals, including invertebrates and vertebrates. Discussions include the origin of animals, species concepts, developmental biology, taxonomic classification, phylogenetic systematics, and conservation biology. ENV 205 (or BIO 192) is a prerequisite for this class.

ENV 440 | URBAN ECOLOGY | 4 quarter hours
(Graduate)
In this course we examine the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more habitable - cleaner, healthier and more biodiverse. We will pay considerable attention to the ways in which ecology can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, economics, demography, architecture and planning. This course has a required lab; some Saturday field trips.

ENV 441 | URBAN FORESTS AS SOCIAL-ECOLOGICAL SYSTEMS | 4 quarter hours
(Graduate)
Urban forests include all the trees, forests, and greenspaces in cities and towns. Urban forest management, or urban forestry, is the discipline/profession that seeks to plan and manage this green infrastructure in order to provide ecological, economic, and social benefits to all residents. Trees and vegetation have long been protected and planted in cities and towns for a variety of reasons. Recently, urban forestry has expanded to be a lead focus in the broader arena of urban ecology and urban ecosystem management, with a clear goal of creating sustainable ecosystems. This course will look at urban forests through the lens of social-ecological systems (SESs) of linked human and natural components, with a focus on teaching students the hands-on skills of urban forest management. The course will utilize the talents of a number of guest speakers and field experience facilitators who are professionals in urban forestry to give students a practical, real world introduction to the subject. The DePaul University campus and the City of Chicago and surrounding region will serve as our field laboratory to view an actively managed urban forest. Recommended prerequisite is ENV 250 OR BIO 215.

ENV 450 | THESIS RESEARCH | 1-8 quarter hours
(Graduate)
This course is designed for students undertaking research projects in conjunction with their thesis.

ENV 490 | SPECIAL TOPICS | 2-4 quarter hours
(Graduate)
Variable topics. Variable credit.

ENV 499 | INDEPENDENT STUDY | 2-4 quarter hours
(Graduate)
Permission of instructor and chair required. Variable credit.

ENV 502 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)
Students who have completed their coursework and are actively working on the requirements for the Master's thesis or final independent project must enroll in candidacy continuation each quarter of the academic year until the Master's requirement has been completed. This course carries the equivalent of half-time enrollment status. Course requires graduate program director approval and proof of work each quarter. Pass/No Pass grading. (0 credit hours)

ENV 503 | CANDIDACY MAINTENANCE | 0 quarter hours
(Graduate)
This course is meant for Master's students not actively working on their thesis or final independent project. It is only used to maintain active student status. It will not give the student full- or half-time enrollment status and will not permit deferment of student loans. Course requires graduate program director approval each quarter. (0 credit hours)

ENV 506 | SUSTAINABILITY SCIENCE: ENVIRONMENTAL LIMITS, HUMAN NEEDS, & SYSTEMS THINKING | 4 quarter hours
(Graduate)
This course aims to orient students to the problems of the Anthropocene? a new geologic epoch characterized by climate change, increasing human population, pollution of air, water and soil, overuse of natural resources, and underserving of human needs. This course will help students think about solutions to these challenges through the discipline of sustainability science? and build systems thinking? skills. Graduate standing is a prerequisite for this class.
Experience Design (EXP)

EXP 170 | MAKE IT AT DEPAUL | 2 quarter hours
(Undergraduate)
This course combines the technical “how to” skills of making, with more fundamental ideas underpinning the thought processes behind creative and design thinking that emerge through making. Throughout this course, students will be provided with contexts through which to learn, while being given the latitude to follow their intuition and to find their own problems. Students will tinker with digital fabrication, embedded systems, and hardware design through individual and group projects. No prior experience is required.

EXP 210 | DESIGN AND FABRICATION FOR PHYSICAL SPACE WORKSHOP | 2-2.25 quarter hours
(Undergraduate)
This workshop introduces students to design principles for public spaces and physical interaction. Students will explore space through wayfinding, installations, kiosks and other projects to understand the role technology plays in varying environments. A focus on 3D design principles and ergonomics will be a prominent theme throughout the course. Students will experiment with various materials, including cloth, clay, 3D printing and other 3D modeling materials.

EXP 250 | HARDWARE DESIGN BASICS WORKSHOP | 2-2.25 quarter hours
(Undergraduate)
This workshop applies problem solving and programming skills toward building physical systems using an array of fundamental skills. The course will cover basic electronics and hardware skills like soldering, circuit building, and basic programming for an electronic prototyping platform to interface with digital and analog inputs (sensors), control motors, and use displays. Throughout the workshop you will work in groups to build basic physical systems (e.g., controlling LEDs) to moderately sophisticated ones (e.g., developing remote controls). GAM 240 or CSC 241 or IT 130 is a prerequisite for this class.

EXP 340 | DESIGNING FOR AUTONOMY | 4 quarter hours
(Undergraduate)
Through the emergence of open source software, as well as widely-available and inexpensive hardware, creating autonomous robots has become easier than ever. This hands-on course will cover the evolution of robotics, including the concepts and philosophy behind autonomy that govern seemingly organic behavior. Student groups will use a framework to develop robots with a wide range of behaviors, including following, patrolling, avoiding, and exploring. Accompanying lectures will cover the theory and practical application behind designing for organic behavior.
EXP 250 and EXP 210 are prerequisites for this class.

EXP 350 | DESIGNING FOR THE INTERNET OF THINGS | 4 quarter hours
(Undergraduate)
From everyday household items like thermostats and locks to cities developing arrays of climate and traffic sensors, the world is increasingly becoming an interconnected system of aware and responsive devices. This course will cover the development and evolution of our connected world, and the possibilities for designing future products. Students will be introduced to ambient intelligence through exercises, collaborative projects, in-depth discussions, and instructor-led tutorials. The course will cover ambient sensing, communication, embedded systems, and designing experiences for the Internet of Things. Students will be familiar with the considerations involved in designing an interconnected system, and work in groups to prototype an “IoT” product.
UXD 210 and EXP 250 are the prerequisites for this class.

EXP 360 | PHYSICAL & INTERACTIVE EXHIBITS | 4 quarter hours
(Undergraduate)
With the introduction of new, widely-available interactive technologies, physical computer-based exhibits are adapting to incorporate multi-touch interfaces, motion-sensing spaces, and interconnected systems. In this workshop, students will explore the development of interactive exhibits while utilizing skills in interaction design, physical technology, and desktop fabrication. Accompanying lectures will cover the affordances of physical space in design and the utilization of augmented reality, real-time sensing, eye tracking, and other technologies while rethinking how technology is used in museums and other public spaces.
EXP 250 and EXP 210 and UXD 210 are prerequisites for this class.

EXP 370 | GAMES AND PLAY IN PHYSICAL SPACE | 4 quarter hours
(Undergraduate)
This course introduces hardware design and programming to designers and artists. Students will cover the knowledge needed to craft interactive experiences using microcontrollers, electronics, and programming. Students will experiment with circuitry, soldering, and designing for an electronic prototyping platform while developing small-sized physical games. No prior programming experience is required.
EXP 250 is a prerequisite for this class.

EXP 390 | PHYSICAL TECHNOLOGY COLLABORATIVE STUDIO I | 4 quarter hours
(Undergraduate)
This is the first course in a two-quarter sequence. The second quarter will be EXP 391. You will earn four quarter hours of credit for each quarter for a total of eight quarter hours of credit. You must complete both quarters to receive any credit. Students explore studio-based collaborative creation of physical technology projects and work processes. Students will work together in cross disciplinary teams to research and design challenges that will be solved through the creation of physical technology projects. Students may work with community partners or other disciplines at DePaul to create applicable solutions with real-world context. Some examples of projects may include wearables, installations, toys, games, etc.
EXP 250 and EXP 210 and UXD 210 are prerequisites for this class.

EXP 391 | PHYSICAL TECHNOLOGY COLLABORATIVE STUDIO II | 4 quarter hours
(Undergraduate)
This is the continuation of EXP 390. EXP 390 and EXP 391 must be taken as a sequence in two consecutive quarters.
EXP 390 is a prerequisite for this class.

EXP 440 | DESIGNING PLAYFUL EXPERIENCES | 4 quarter hours
(Graduate)
This course focuses on the pedagogy of play within the design dissemination and critique of designed experiences. The course will begin with an inquiry into the origins of the term, its role in human development, cultural ritual, and social interaction before moving on to a series of design investigations into the affordances of play as design principles for the creation of engaging experiences. Further, we will use the study of play mechanics as a way to broadly explore the larger concept of “playful systems.” How might interesting play mechanics be used to structure interactive experiences in systems that aren’t necessarily games? Students will explore systems such as museums, classrooms, and social media to apply these concepts.
HCD 450 OR HCI 440 is a prerequisite for this class.
EXP 441 | DESIGNING LEARNING EXPERIENCES | 4 quarter hours
(Graduate)
This course will focus on re-envisioning the future of learning, as a robust context for the application of experience design principles. Through a study of literature on human development, principles of learning and motivation, design processes, and the unique affordances of learning contexts, students will explore strategies for the design of innovative learning environments. From the design of mobile apps, to tools, to classroom spaces, to social interfaces, students will challenge their own thinking about what it means to learn and the role design can play in transforming the experiences of learners.
HCD 450 OR HCI 440 is a prerequisite for this class.

EXP 442 | DESIGNING INTERFACES FOR EMERGING TECHNOLOGIES | 4 quarter hours
(Graduate)
This course focuses on the concept of "interface" as it relates to the design of human-centered experiences. From an inquiry into the design of digital interfaces for web and mobile platforms, to the exploration of non-digital social interfaces in day-to-day life, students will apply research and design methods to prototype and test a range of interface solutions. The course is designed as a stepping stone to a student's own investigations and interests, as well as a space for exploration and experimentation with alternative design processes and methodologies.
HCD 450 OR HCI 440 is a prerequisite for this class.

EXP 450 | PORTFOLIO WORKSHOP | 4 quarter hours
(Graduate)
Students review previous course projects and prior work in order to prepare a final portfolio as well as their own design identity and a resume in preparation for job interviews. Visiting design professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development.
HCD 421 is a prerequisite for this class.

EXP 480 | COLLABORATION STUDIO | 4 quarter hours
(Graduate)
This is a unique type of studio course, pairing interdisciplinary teams of students with community-based organizations or groups to undertake real-world projects. Working in teams, students engage with a local group to study and identify an area of inquiry, to be formulated by students into one or more design problems to be solved. Applying user research methods, a rigorous design, design and production skills, and effective teamwork, the students propose and prototype solutions in partnership with members of the local community.
HCD 421 is a prerequisite for this class.

EXP 599 | INDEPENDENT STUDY | 4-8 quarter hours
(Graduate)
This is an independent study course. This course may be repeated for credit. PREREQUISITES: Advisor and/or department consent.

Film & Television Documentary (DOC)

DOC 122 | ART OF DOCUMENTARY (FORMERLY DC 204) | 4 quarter hours
(Undergraduate)
This course explores the variety of styles and concerns that shape documentaries. Students will learn the evolution of unique voices and influences in documentary. The course will examine the broad range of documentary practices from the earliest actualities to contemporary documentary media through weekly screenings. PREREQUISITE(S): NONE.

DOC 224 | DOCUMENTARY PRODUCTION I (FORMERLY DC 289) | 4 quarter hours
(Undergraduate)
This introductory hands-on course introduces and explores a wide variety of documentary styles and techniques. Through screenings of classic and contemporary films, lecture, and discussion, students learn different styles of documentary storytelling and visualization and apply these to four exercises over the quarter. Every student will rotate through crew roles and produce, direct, shoot, and record sound.
FILM 110 OR FILM 111 OR FILM 102 is a prerequisite for this class.

DOC 305 | DOCUMENTARY STORYTELLING (FORMERLY DC 369) | 4 quarter hours
(Undergraduate)
The course is designed to further develop the skills needed for creating compelling and dramatic non-fictional storytelling. The class will investigate various approaches to documentary and analyze the basic narrative principles in various media. Regular viewing of documentary films will encourage discussion on topics of finding original stories, development of narratives, developing characters, story structure, the ethics of representation, and the question of "what is truth?" Students will create a proposal for a documentary film.

DOC 312 | EDITING THE DOCUMENTARY (FORMERLY DC 351) | 4 quarter hours
(Undergraduate)
Editing the Documentary will expose students to the specialized post production workflow of documentary film. Utilizing a workshop atmosphere in combination with lectures and projects, students will gain an appreciation of the art and craft of documentary film editing. This course will cover an overview of current documentary trends and styles, explore various workflows to find the story in documentary footage, the ethical role of editor in shaping the stories of real people and events, how to apply the visual language of fiction to documentary film, use of archival media in a contemporary way, how to structure the story scene to scene and where to start and end the story.
POST 110 is a prerequisite for this class.

DOC 324 | DOCUMENTARY PRODUCTION II (FORMERLY DC 371) | 4 quarter hours
(Undergraduate)
This hands-on course builds on skills learned in DC 289. Students will work in groups to produce, direct, and edit a short subject documentary over the course of the quarter. Students will be exposed to all stages of the documentary filmmaking process including potential for public exhibition, festival acceptance, and/or as a fundraising tool for a long-form project.
DOC 224 is a prerequisite for this class.

DOC 326 | DOCUMENTARY PRODUCING (FORMERLY DC 386) | 4 quarter hours
(Undergraduate)
The course will cover the key areas of producing for documentaries, which encompasses pre-production, production, marketing, fundraising, and community outreach and engagement. Students will gain knowledge of the ways in which producers engage with writers, directors, editors, grant making institutions, individual donors, festival marketplaces, exhibitors and broadcasters. This course will be project-based and include developing a fundraising and distribution plan, identifying audiences, grant writing and developing a proposal.
DOC 324 is a prerequisite for this class.

This class will be a hands-on workshop exploring a film production process or technique that has had a significant influence on the development of non-fiction storytelling and expression. Students will create short documentaries on topics of their choosing, utilizing and incorporating the method being taught. Specific topics will vary with each quarter. Classes will consist of lectures, screenings, in-class production, discussion, and analysing creative assignments. Students are encouraged to explore their individual creative voices and to use this knowledge to stimulate original work in their areas of interest.

DOC 324 is a prerequisite for this class.

DOC 352 | DOCUMENTARY CINEMATOGRAPHY (FORMERLY DC 378) | 4 quarter hours
(Undergraduate)
This course focuses on the language, practice, and art of visual storytelling in the documentary form. Students will examine the cinematographer’s role in the ideation, shooting, and editing of non-fiction film content. Through a series of screenings, lectures, and class discussions, students will better understand the history and practice of cinematography as it pertains to story, character, and structure—all through the prism of documentary. PREREQUISITE(S): None.

DOC 372 | DOCUMENTARY LAW AND ETHICS (FORMERLY DC 367) | 2 quarter hours
(Undergraduate)
Students will explore the legal and ethical issues that can arise in the course of documentary and non-fiction media production. The course will discuss standards and practices; decision making and creative control; archival footage and its fair use; legal requirements and implications; the question of informed consent; and ethical issues arising from paying subjects, staging and reenactments, to sale and resell footage. Case studies of selected documentary films will be presented and analyzed by the class. (2 credit quarter hours)

DOC 382 | THE PERSONAL DOCUMENTARY (FORMERLY DC 366) | 4 quarter hours
(Undergraduate)
This class is designed to help students identify their personal voices through a variety of techniques, styles, and tools of non-traditional documentary film making. Students explore their relationships to their subject matter and express themselves in creative and authentic ways through video. Although the class is process oriented, students are expected to finish a short personal documentary and to develop a proposal for future work.

DOC 324 is a prerequisite for this class.

DOC 384 | DOCUMENTARY PRODUCTION 3 (FORMERLY DC 373) | 4 quarter hours
(Undergraduate)
This advanced course in documentary production is designed for students who already have experience with making documentaries. In this course, each student will direct and produce a substantial short subject documentary and serve as a crew member on at least one other student project. Topics covered will include choice of subject matter, filmmaker’s POV, dramatic structure, proposal writing, and a variety of technical, aesthetic, practical, and ethical concerns related to producing professional documentary projects.

DOC 324 is a prerequisite for this class.

DOC 396 | ADVANCED TOPICS IN DOCUMENTARY (FORMERLY DC 374) | 4 quarter hours
(Undergraduate)
This class will be an in-depth examination of a documentary filmmaker, film movement, production style, or technique that has had a significant influence on the development of documentary storytelling and expression. Through lectures, screenings, readings, discussions, and creative assignments, students will analyze the distinctive traits of the selected topics within the broader context of cinema history and culture and apply them to their own projects. Specific topics will be selected by the instructor and will vary with each quarter.

DOC 399 | INDEPENDENT STUDY | 1-8 quarter hours
(Undergraduate)
Variable credit. PREREQUISITE(S): Consent of dean.

DOC 405 | NON-FICTION STORYTELLING (FORMERLY DC 469) | 4 quarter hours
(Graduate)
The course is designed to further develop the skills needed for creating compelling and dramatic non-fictional storytelling. The class will investigate various approaches to documentary and analyze the basic narrative principles in various media. Regular viewing of documentary films will encourage discussion on topics of finding original stories, research and development of narratives, developing characters, story structure, the ethics of representation, and the question of “what is truth?” Students will create a proposal for a documentary film.

DOC 412 | EDITING THE DOCUMENTARY (FORMERLY DC 451) | 4 quarter hours
(Graduate)
Editing the Documentary will expose students to the specialized post production workflow of documentary film. Utilizing a workshop atmosphere in combination with lectures and projects, students will gain an appreciation of the art and craft of documentary film editing. This course will cover an overview of current documentary trends and styles, explore various workflows to find the story in documentary footage, the ethical role of editor in shaping the stories of real people and events, how to apply the visual language of fiction to documentary film, use of archival media in a contemporary way, how to structure story scene to scene and where to start and end the story.

DOC 414 | INTRO TO DOCUMENTARY PRODUCTION | 4 quarter hours
(Graduate)
This introductory, hands-on course introduces and explores a wide variety of documentary styles and techniques. Through screenings, lecture, and discussion, students learn different styles of documentary storytelling and visualization and apply these to three exercises over the quarter. Every student will rotate through crew roles and produce/direct, shoot, and record sound.
DOC 424 | DOCUMENTARY PRODUCTION (FORMERLY DC 471) | 4 quarter hours  
(Graduate)  
Through this course students experience all stages of making a documentary film, including developing an idea, writing a proposal, pre-production, production and post-production. Students work in groups to produce a short documentary. Students also analyze and discuss contemporary documentary films to inform their choices. PREREQUISITE(S): FILM 410 and POST 400.

DOC 426 | DOCUMENTARY PRODUCING (FORMERLY DC 486) | 4 quarter hours  
(Graduate)  
The course will cover the key areas of producing for documentaries, which encompasses pre-production, production, marketing, fundraising, and community outreach and engagement. Students will demonstrate a knowledge of the ways in which producers engage with directors, editors, grant making institutions, individual donors, festival marketplaces, exhibitors and broadcasters. This course will be project-based and students will develop a proposal for a documentary, identify target audiences, identify relevant funding organizations and foundations, write grants, and develop a fundraising and distribution plan. Prerequisite(s): none.

DOC 433 | DOCUMENTARY SOUND WORKSHOP | 2 quarter hours  
(Graduate)  
This course will give the student the confidence and technical skills to operate a documentary sound kit in dynamic shooting situations. This course will focus on applied sound recording techniques specific to the documentary format, including short and feature film projects. The students will record audio in controlled and uncontrolled situations while exercising the skills required in pre-production, production, and post-production of advanced documentary films. Students will evaluate their sound quality and troubleshoot various real life scenarios to connect to practical solutions.

DOC 439 | TOPICS IN DOCUMENTARY PRODUCTION WORKSHOP | 2-2.25 quarter hours  
(Graduate)  
This class will be a hands on workshop exploring a film production process or technique that has had a significant influence on the development of non-fiction storytelling and expression. Students will create short documentaries on topics of their choosing, utilizing and incorporating the method being taught. Specific topics will vary with each quarter. Classes will consist of lectures, screenings, in-class production, discussion and analyses, culminating in creative assignments. Students are encouraged to explore their individual creative voice and to use this knowledge to stimulate original work in their areas of interest.

DOC 440 or DOC 424 is a prerequisite for this course.

DOC 452 | DOCUMENTARY CINEMATOGRAPHY (FORMERLY DC 478) | 4 quarter hours  
(Graduate)  
This course focuses on the language, practice and art of visual storytelling in the documentary form. Students will examine the cinematographer’s role in the ideation, shooting and editing of non-fiction film content. Through a series of screenings, lectures, experiential exercises and class discussions, students will better understand the history and practice of cinematography as it pertains to story, character and structure - all through the prism of documentary. PREREQUISITE(S): None.

DOC 460 | INTERACTIVE DOCUMENTARY (FORMERLY DC 468) | 4 quarter hours  
(Graduate)  
This course will introduce the evolving media form of interactive non-fiction storytelling. Students will examine the historical context of the genre, analyze the advantages and effectiveness of one media form over another, and explore current production styles and techniques of transmedia and interactive narratives. Students will create individual and group projects revolving around a contemporary theme utilizing different forms of media including film, audio, photography, animation, illustration, writing, and game design.

DOC 472 | DOCUMENTARY LAW AND ETHICS (FORMERLY DC 467) | 2 quarter hours  
(Graduate)  
Students will explore the legal and ethical issues that can arise in the course of documentary and non-fiction media production. The course will discuss standards and practices; decision making and creative control; archival footage and its fair use, legal requirements and implications; the question of informed consent; and ethical issues ranging from paying subjects, staging and reenactments, to sale and resale footage. Case studies of selected documentary films will be presented and analyzed by the class. (2 quarter hours)

DOC 482 | THE PERSONAL DOCUMENTARY (FORMERLY DC 466) | 4 quarter hours  
(Graduate)  
This class is designed to help students identify their personal voices through a variety of techniques, styles and tools of non-traditional documentary filmmaking. Students explore their relationships to their subject matter and express themselves in creative and authentic ways through video. Although the class is process oriented, students are expected to finish a short personal documentary and to develop a proposal for future work.

DOC 484 is a prerequisite for this class.

DOC 484 | ADVANCED DOCUMENTARY PRODUCTION (FORMERLY DC 473) | 4 quarter hours  
(Graduate)  
This advanced course in documentary production is designed for students who already have experience with making documentaries. In this course, each student will direct and produce a substantial short subject documentary and serve as a crew member on at least one other student project. Topics covered will include choice of subject matter, filmmaker’s POV, dramatic structure, proposal writing, and a variety of technical, aesthetic, practical, and ethical concerns related to producing professional documentary projects.

DOC 424 is a prerequisite for this class.

DOC 496 | ADVANCED TOPICS IN DOCUMENTARY (FORMERLY DC 474) | 4 quarter hours  
(Graduate)  
This will be an in-depth examination of a filmmaker, film genre, film movement, or film production technique that has had a significant influence on the development of non-fiction storytelling and expression. Through lectures, screenings, readings, discussions, critical writing assignments, and/or creative projects, students will analyze the distinctive traits of the selected topic within the broader context of documentary history and culture. Specific topics will be selected by the instructor and will vary with each quarter. Classes will consist of lectures, screenings, in-class discussions, analyses, as well as creative assignments. Students are encouraged to explore their individual creative "voice" and to use this knowledge to stimulate original work in their areas of interest.
An introduction to video production for social media. Students learn how to produce videos with consumer-grade equipment (including cell phones). The course covers the basic principles of shooting, editing and uploading to social media sites. The course offers students an opportunity to create media specifically targeted for social websites such as: Facebook, MySpace, Twitter, etc. Students will learn the production process from idea execution to distribution. PREREQUISITE(S): None.

DOC 599 | INDEPENDENT STUDY | 1-8 quarter hours (Graduate)
Independent study form required. PREREQUISITE(S): Consent of instructor. (variable credit)

DOC 701 | THESIS CONTINUATION | 0 quarter hours (Graduate)
Non-credit. Students admitted to MFA program who have completed all the required coursework and who are regularly using the facilities of the University for thesis production and/or post-production are required to be registered each quarter of the academic year until the thesis and defense have been completed.
FILM 510 or ANI 640 is a prerequisite for this class.

Film & Television Production (FILM)

FILM 100 | INTRODUCTION TO CINEMA: THE ART OF MAKING MOVIES (FORMERLY DC 100) | 4 quarter hours (Undergraduate)
This lecture-based course will introduce students to the art of cinema from the point of view of the filmmaker. Through screenings of contemporary and classic films, students will gain an appreciation of the many expressive strategies potentially usable in the creation of moving image art forms: image construction and manipulation, editing, composition, sound, narrative, and performance. An emphasis will be placed on story and storytelling. In addition to analyzing the works of others, students will also produce their own projects - putting theory into practice. Prerequisite(s): None.

FILM 101 | FOUNDATIONS OF CINEMA FOR MAJORS (FORMERLY DC 110) | 4 quarter hours (Undergraduate)
This course deals with visualization and cinema literacy skills. Drawing heavily on a wide array of historical examples, the course will examine the many expressive strategies potentially usable in the creation of moving image art forms: image construction and manipulation, editing, composition, sound, narrative, and performance. An emphasis will be placed on story and storytelling. In addition to analyzing the works of others, students will also produce their own projects - putting theory into practice. Prerequisite(s): None.

FILM 102 | FOUNDATIONS OF CINEMA FOR NON-MAJORS (FORMERLY DC 205) | 4 quarter hours (Undergraduate)
This course will examine the craft, technology, and aesthetic principles of media production. Drawing heavily on a wide array of historical examples, the course will examine the many expressive strategies potentially usable in the creation of moving image art forms: the importance of story and controlling ideas, storytelling with images, the basics of composition and editing, and an examination of narrative, documentary, and experimental approaches. In addition to analyzing the works of others, students will also produce their own projects thus, putting theory into practice.

FILM 104 | VIDEO FOR SOCIAL MEDIA (FORMERLY DC 111) | 4 quarter hours (Undergraduate)
An introduction to video production for social media. Students learn how to produce videos with consumer-grade equipment (including cell phones). The course covers the basic principles of shooting, editing and uploading to social media sites. The course offers students an opportunity to create media specifically targeted for social websites such as: Facebook, MySpace, Twitter, etc. Students will learn the production process from idea execution to distribution. PREREQUISITE(S): None.

FILM 105 | FOUNDATIONS OF TELEVISION (FORMERLY TV 110) | 4 quarter hours (Undergraduate)
This course provides an introduction and framework of the history of television production. Evolving story forms will be examined from television's beginnings to the present. Developments in story and production styles will be analyzed and discussed. Professionals from different sectors of the Chicago television industry will speak to the class in panels.

FILM 110 | DIGITAL CINEMA PRODUCTION I (FORMERLY DC 210) | 4 quarter hours (Undergraduate)
This course is a beginning workshop in narrative film production. The course provides an introduction to the fundamentals of cinema, including camera and lens technology, composition, lighting, directing and sound recording. Utilizing digital technology, students will produce several films with an emphasis on visual storytelling and personal expression.

FILM 111 | CINEMA PRODUCTION FOR NON-MAJORS (FORMERLY DC 150) | 4 quarter hours (Undergraduate)
The course provides an introduction to the fundamentals of cinema production, including cinematography, directing and sound. Students will produce at least one fiction project with an emphasis on visual storytelling. PREREQUISITE(S): None.

FILM 115 | TELEVISION PRODUCTION I (FORMERLY TV 271) | 4 quarter hours (Undergraduate)
An introduction to the basic principles, procedures, and techniques of television production. Students are organized in teams and create various TV broadcasts. Students learn how to operate TV switches, TV cameras, sound, and graphic equipment. The course covers the fundamentals of producing, scripting, directing, and editing for television.

FILM 110 is a prerequisite for this class.

FILM 116 | INTRODUCTION TO TV PRODUCTION FOR NON-MAJORS (FORMERLY TV 171) | 4 quarter hours (Undergraduate)
An introduction to the basic principles, procedures, and techniques of television production. This course will explore how to create a single-cam and a multi-cam television program. It will also introduce live and pre-recorded processes, practicing the essential activities that crews need to perform in these different formats.

FILM 110 or FILM 111 is a prerequisite for this class

FILM 130 | FUNDAMENTALS OF SHORT FILM (FORMERLY DC 102) | 4 quarter hours (Undergraduate)
Students will study approximately 100 well-crafted and landmark short films from throughout film history. Through screenings, analysis, analysis and discussion, students will explore these short films' story structure, cinematic design and historical importance. Additionally, students will examine how the short film format can be used as an illustration of a filmmaker's skills in order to navigate the film industry. Short films will include: narrative, experimental, documentary, and animation from different parts of the world. PREREQUISITE(S): None.
FILM 131 | HISTORY OF CINEMA PRODUCTION (FORMERLY DC 206) | 4 quarter hours  
(Undergraduate)  
This course studies the origins and rise of cinema production from the perspective of a filmmaker. The course examines critical historical events that impacted the industry and the craft of filmmaking; the emergence of the studio system, the coming of sound, audience shifts, emergence of other media and the rise of digital technology. PREREQUISITE(S): NONE.

FILM 145 | DIGITAL MEDIA LITERACIES (FORMERLY DC 105) | 4 quarter hours  
(Undergraduate)  
This course is designed to help students develop an informed, critical and practical understanding of new communication media, including ways to read, write and produce in a digital environment. We will explore implications of these technologies and their uses in schools, communities, and workplaces. The course also focuses on practices involving current and future technologies that hold promise for the creation and distribution of all media.

FILM 165 | DIGITAL STILL PHOTOGRAPHY FOR NON-MAJORS (FORMERLY DC 125) | 4 quarter hours  
(Undergraduate)  
This course is an introduction to the history and aesthetics of still photography and to the concept of photography as a descriptive and interpretive artistic medium. Students studying photography in this context will discover relationships between individual photographers’ choices and their own understanding of meaning. Discussions of the photos’ cultural contexts and meanings will deepen their understanding of the role of still photography as a conduit for cultural values. Students will learn the fundamental concepts necessary to shoot, edit, manipulate, and print digital still photographs. Also, students will acquire the knowledge needed to analyze and critique existing work. Students will be required to use their own digital still cameras for this course.

FILM 170 | THE ART OF PRODUCTION DESIGN (FORMERLY DC 121) | 4 quarter hours  
(Undergraduate)  
This course explores production design and art direction as a narrative art form in cinema and examines the collaborative relationship between director, production designer and cinematographer. Using films, observational readings, screenplays, lectures, research, and discussion, students will study the fundamentals of a production designer’s approach towards visualizing and conceptualizing story. Students will also gain a historical perspective of how the role of production design has evolved and how advances in technology have influenced the various crafts.

FILM 184 | STAND-UP COMEDY (FORMERLY DC 104) | 4 quarter hours  
(Undergraduate)  
Students will analyze and practice stand-up comedy as an art form, both onstage and as a foundation for film and television work. Students will learn about the history of stand-up comedy, particularly about the comedians who parlayed success on the stage into success in television and films. The process of how comedians create material and hone it on stage will be analyzed. Additionally, students will mine their own lives for material, creating original stand-up comedy routines and workshopping them in class. Finally, these routines will be performed in public, at venues such as the Main Stage at the world-renowned Zanies Comedy Club.

FILM 210 | CINEMA PRODUCTION II (FORMERLY DC 310) | 4 quarter hours  
(Undergraduate)  
This course expands on topics covered in DC 210 Production I. Students will refine their skills in the areas of line-producing, pre-production, cinematography, lighting, sound recording, post production work flow. FILM 250 and POST 124 are prerequisites for this class.

FILM 228 | ETHICS IN COMPUTER GAMES AND CINEMA (FORMERLY DC 228) | 4 quarter hours  
(Undergraduate)  
Societies function based on normative ethics utilizing common sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded in games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact particularly on children will be discussed.

FILM 232 | CREATIVE METHODOLOGIES FOR FILM AND TELEVISION (FORMERLY DC 232) | 4 quarter hours  
(Undergraduate)  
This class focuses on creative methods and processes useful for a variety of roles in film and television, including: ideation, divergent thinking, the role of environment/community, and how to avoid creative blocks. The class encourages students to embrace self-directed learning, explore who they are as creative individuals, and unlock the themes and forms at the core of their artistic visions.

FILM 233 | CINEMA & ART (FORMERLY DC 233) | 4 quarter hours  
(Undergraduate)  
This course will provide an overview of avant-garde film, video, animation and installation, and the relationship of these cinematic forms to Modern and Contemporary art. Students will be introduced to the major styles and themes of alternative and experimental moving image work from the past hundred years. Cinema & Art places emphasis on moving image work that is not usually included in a survey of mainstream cinema or film history. A major concern for the class is first-hand exposure to these original sources, and an examination of the relationship of these works to mainstream cinema and other types of popular culture. Topics covered in the class include the avant-garde and kitsch, Surrealism, experimental film, abstract animation, video art, camp, and video installation. In addition to lectures by visiting artists and viewing films, videos, and installation work, students will produce a short creative work in the style of their choice that responds to the work studied during the quarter.

FILM 235 | FILM AESTHETICS: TIME, SPACE, AND MEMORY (FORMERLY DC 273) | 4 quarter hours  
(Undergraduate)  
This course introduces students to practical applications of aesthetics in the production and appreciation of cinema. Analyzing a diverse selection of films throughout the course, students will identify and define the aesthetic systems of time, space, and memory in the process of filmmaking. In doing so, students will enhance identification of the application of aesthetics in their own personal work. The culmination of the course will find students producing a media project encompassing the conceptual framework of the course.
Cinematography is the scientifically grounded discipline of making works of notable cinematographers. Students will examine the changing approaches to screen acting and actor-director collaboration in the development of narrative cinema. The screen demanded a new approach to acting which differed markedly from the theatrical traditions which preceded it. Seminal practitioners of actor training such as Constantin Stanislavski and his American interpreters Lee Strasberg, Sanford Meisner, and Stella Adler and their students (such as Brando, Pacino, DeNiro, Hoffman, and Duvall) have had an incalculable influence on how screen actors prepare for a role and work with directors. This course will survey the major acting techniques and approaches, examine major films as case studies, and explore contemporary approaches to screen acting and actor-director collaboration in the cinema.
FILM 282 | ACTING FOR THE CAMERA (FORMERLY DC 251) | 4 quarter hours
(Undergraduate)
This course is designed for acting and directing students who want to develop skills and gain experience in acting and directing for the camera. Course sessions include lecture, practical exercises and preparation for analyzing and blocking a scene and working on a set. Students will screen select film clips to evaluate performances, explore methods to prepare for an audition, discuss the actor/director relationship and examine the professional requirements of relating to a crew. The final project will include directing or acting in a short dialogue scene for analysis and critique.

(FILM 110 and FILM 281) or PRF 313 is a prerequisite for this class.

FILM 283 | SCRIPT ANALYSIS FOR DIRECTORS | 4 quarter hours
(Undergraduate)
Script analysis informs a director’s creative decision making. Through a series of practical exercises, students will learn the process of analyzing a script based on the film’s narrative elements. In doing so they will uncover their unique vision for the story that will aid in collaboration with actors and crew.

FILM 284 | CASTING AND REHEARSING | 4 quarter hours
(Undergraduate)
Each film project requires a customized approach to casting and rehearsing. Students will learn to create individualized plans for any size cast (individuals, pairs, ensembles) and strategies that will take them from casting room to table read to set.

FILM 285 | DIRECTING (FORMERLY DC 390) | 4 quarter hours
(Undergraduate)
This is a course in directing motion pictures. Topics include casting, rehearsals, the basic relationship between the director, actor, and script, script breakdown, camera placement, and shooting for continuity editing. Each student will produce and direct a scene study and a short narrative film.

FILM 210 is a prerequisite for this class.

FILM 290 | TOPICS IN DIGITAL CINEMA (FORMERLY DC 270) | 4 quarter hours
(Undergraduate)
Advanced study in cinema focusing on a specific genre each quarter such as: Science Fiction, Film Noir, Comedy, Action-Adventure, Nonfiction, etc. Please check the CDM website for description of specific quarter offering.

FILM 298 | INTERNSHIP IN MEDIA PRODUCTION/POST-PRODUCTION (FORMERLY DC 298) | 4 quarter hours
(Undergraduate)
This course offers students the opportunity to reflect on an internship while gaining professional experience, industry contact, and referrals while still in school. The class fulfills the Junior Year Experiential Learning credit and must be taken concurrently with an approved internship. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can qualify for the course. Classroom time is required. Admission to the program requires consent of internship course instructor after the verification of the student’s internship. Prerequisites: Internship.

FILM 299 | INTERNSHIPS IN MEDIA AND DESIGN (NON-EL) (FORMERLY DC 299) | 1-4 quarter hours
(Undergraduate)
This course is an internship/independent study course for students who have already fulfilled their EL credit. This course offers students the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for this course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student’s internship. PREREQUISITE(S): Internship (variable credit)

FILM 318 | TV PRODUCTION WORKSHOP (FORMERLY TV 310) | 2 quarter hours
(Undergraduate)
In this workshop students will produce projects for internal and external clients. Students will learn professional practices and work with clients to create projects such as promos, documentaries, commercials, short series and live events from concept inception to finished product. Through this process, students will examine different professional roles involved in the TV production process. PREREQUISITE(S): None (2 quarter hours)

FILM 319 | LIVE EVENT/TALK TV WORKSHOP (FORMERLY TV 381) | 2 quarter hours
(Undergraduate)
In this workshop students will produce events with guest artists, presented in front of a live studio audience. Students will help prep each appearance and participate a crew members in the multi-camera production and telecasting of the events. They will learn the professional practices and positions that constitute talk-show format television production. Post-production and finishing for Web Streaming and VOD delivery will also be addressed. May be repeated for credit. (2 quarter hours)

FILM 321 | COMMERCIAL PRODUCTION (FORMERLY DC 361) | 4 quarter hours
(Undergraduate)
This course will study the commercial production industry and the production techniques and processes of televised commercials and public service announcements. Industry standards for creating commercials for a client will be discussed. Additional topics include copywriting, style guides, casting, media, and client-relations.

FILM 110 is a prerequisite for this class.

FILM 323 | MUSIC VIDEO PRODUCTION (FORMERLY DC 311) | 4 quarter hours
(Undergraduate)
In this course, we will analyze ways in which artists combine visual imagery with music as with MTV-style music videos. The music business and how it relates/effects music videos. Each student will develop his or her own music video project from script to final edit with a local band of their choice, through their own scheduling process. FILM 110 is a prerequisite for this class.
FILM 325 | EXPERIMENTAL FILMMAKING I (FORMERLY DC 345) | 4 quarter hours  
(Undergraduate)  
This production-based course explores breaking the boundaries of conventional cinema through experimental formal approaches, techniques and content. Students will create projects in the modes of key figures form the history of experimental and avant-garde film and video, such as Kenneth Anger, Stan Brakhage, Luis Bunuel, Maya Deren, Dana Hodgdon, David Lynch, Bill Viola, or Andy Warhol. Additionally, students will be encouraged to capture, edit and process material through non-traditional means, and to explore unconventional content. Screenings of experimental works may be tailored to the specific interests of students as projects develop. The influences of experimental cinema on conventional media such as Hollywood movies, commercials, and music video will also be analyzed.  
POST 100 or POST 110 is a prerequisite for this class.  
FILM 326 | EXPERIMENTAL FILMMAKING II (FORMERLY DC 348) | 4 quarter hours  
(Undergraduate)  
In this production-based course, students will build on skills gained in Experimental Filmmaking I with a focus on the professional execution of an experimental film project. From creating the abstract, to an intensive focus on pre-production, to non-traditional filming techniques, to critique through various stages of post-production, the student will be pushed to create a visionary work for the film festival circuit and beyond. Through this regimented process, the filmmaker will learn skills necessary to write grants, produce and package professional quality cinematic work targeted toward distribution success.  
FILM 325 is a prerequisite for this class.  
FILM 345 | IMMERSIVE AND 360 VIDEO PRODUCTION | 4 quarter hours  
(Undergraduate)  
This class will focus on the development, production and post-production of live-action 360 video. The medium of virtual reality will be analyzed within the context of the evolution of time-based and interactive media. Experimental projects will offer students the opportunity to tell stories in new ways while exploring the affordances and challenges of the evolving medium.  
FILM 110 is a prerequisite for this class.  
FILM 348 | FILM FESTIVALS (FORMERLY DC 393) | 4 quarter hours  
(Undergraduate)  
Film festivals and their role in independent cinema and the Hollywood studio system. The global proliferation of film festivals will be examined from the perspectives of both film studies scholars and film making professionals. Students will research the history of major festivals, from the perspectives of both film studies scholars and film making professionals. Students will attend film festival screenings, panels, and/or networking events.  
PREREQUISITE(S): None (variable credit)  
FILM 350 | CINEMATOGRAPHY II (FORMERLY DC 375) | 4 quarter hours  
(Undergraduate)  
This class explores he creation of visual imagery and meaning through cinematography. Students will study advanced cinematography techniques including visual language, composition and movement as well as advanced tools in lighting and camera.  
FILM 250 is a prerequisite for this class.  
FILM 355 | LIGHTING I (FORMERLY DC 377) | 4 quarter hours  
(Undergraduate)  
Introduction to safe and established practical operation of studio lighting and grip equipment. Students will learn a variety of basic lighting techniques, set electrical distribution, dolly set up, grip and lighting equipment.  
FILM 110 is a prerequisite for this class.  
FILM 356 | LIGHTING II (FORMERLY DC 384) | 4 quarter hours  
(Undergraduate)  
Continuation of Lighting for Cinema 1 with introduction to more advanced lighting setups. Students will learn a variety of lighting techniques - night exterior, practical location, complex lighting cues, etc... Advanced lighting and grip equipment will be utilized - Hmi, LED, theatrical and fluorescent.  
FILM 357 | CINEMATIC SPACE (FORMERLY DC 333) | 4 quarter hours  
(Undergraduate)  
This seminar mixes theory and practice to expose students to an in-depth exploration of different techniques and possibilities concerning cinematic space. Beginning with an introduction to the fundamental differences between montage and mise-en-scene, the course will teach students the art and craft of designing, blocking and executing plan sequences, starting with static camera shots and ending in complex 3D camera moves.  
FILM 358 and FILM 250 are prerequisites for this class.  
FILM 358 | ADVANCED CAMERA TECHNOLOGIES (FORMERLY DC 368) | 4 quarter hours  
(Undergraduate)  
This course is an advanced camera workshop covering the specific jobs of 1st and 2nd Assistants, DIT and data manager in a narrative film environment. Students will learn how to build, maintain and utilize advanced camera equipment, follow set protocols, apply industry standard processes to safely record, download, protect and transcode media for editorial workflows.  
FILM 250 is a prerequisite for this class.  
FILM 359 | VISUAL EFFECTS CINEMATOGRAPHY (FORMERLY DC 359) | 4 quarter hours  
(Undergraduate)  
This course examines both traditional “in-camera” and contemporary digital visual effects techniques and the tools used to create them from a cinematographer’s vantage point. Students will develop a sense of when to use each technique to achieve a specific visual task.  
FILM 350 and FILM 355 are prerequisites for this class.  
FILM 363 | CAMERA OPERATING WORKSHOP | 2-2.25 quarter hours  
(Undergraduate)  
This course will refine a student’s ability to operate a camera successfully in a variety of narrative film scenarios. Students will learn operating techniques to accomplish specific cinematic goals. This is a two-credit-hour course.  
FILM 350 and FILM 355 are prerequisites for this class.  
FILM 364 | CINEMATOGRAPHY III (FORMERLY DC 394) | 4 quarter hours  
(Undergraduate)  
This seminar focuses on the art and craft of designing, blocking and executing planned sequences. It mixes theory and practice to expose students to an in-depth exploration of different techniques and possibilities concerning cinematic space. Emphasis will be on storytelling from the perspective of the cinematographer, specifically exploring how the camera is used to serve the narrative.  
FILM 350 and FILM 355 are prerequisites for this class.
FILM 370 | ADVANCED PRODUCTION DESIGN (FORMERLY DC 331) | 4 quarter hours
(Undergraduate)
In this course, students will construct a set from a prepared script. Beginning with the written page, students will synthesize through all the stages of construction including visualizing, drafting, constructing, painting and finishing.
FILM 270 is a prerequisite for this class.

FILM 375 | SCRIPT SUPERVISOR WORKSHOP | 2-2.25 quarter hours
(Undergraduate)
This course explores the role of the script supervisor on a film or television project. The duties of this role that will be studied include: working with various departments during production, assisting in preserving screen direction, maintaining continuity through photographs and other tools, documenting script coverage with script notes and lining scripts, and assigning slate numbers. Professional script supervising software will be introduced and utilized. This is a two-credit-hour course.

FILM 376 | CASTING DIRECTOR WORKSHOP | 2-2.25 quarter hours
(Undergraduate)
This course explores the role of the casting director/agency on a film or television project. The duties of this role that will be studied include: working with directors and producers, sourcing actors, posting calls, scheduling and running casting sessions, making offers and booking sheets, negotiating contracts, dealing with actor representation and implementing SAG guidelines. Professional casting software will be introduced and utilized. This is a two-credit-hour course.

FILM 377 | ASSISTANT DIRECTOR WORKSHOP | 2-2.25 quarter hours
(Undergraduate)
This course explores the role of the assistant director on a film or television project. The duties of this role that will be studied include: working with directors and crew, managing cast and crew on set, directing extras, calling shots, keeping to a schedule, and creating call sheets and reports for each shoot day. Professional scheduling software will be utilized towards the pre-production of existing or future projects. This is a two-credit-hour course.

FILM 380 | PROJECT BLUELIGHT (FORMERLY DC 380) | 4 quarter hours
(Undergraduate)
Production of a feature-length digital motion picture written by students or faculty within the Digital Cinema program. Students will work as crew under supervision of faculty members heading each of the various production areas. Goal is to produce a completed digital motion picture suitable for festivals or distribution.

FILM 381 | ACTING FOR FILMMAKERS (FORMERLY DC 349) | 4 quarter hours
(Undergraduate)
This course is designed to provide students who plan to work with actors in any aspect of cinema or interactive media, with a foundation in the actor's craft. This will be a hands-on, practical class in which all students will be required to participate fully in the exercises and scene work. Topics to be covered include: relaxation, concentration, trust, listening, sensory work, physical actions, improvisation, imagination, needs, circumstances, objectives, obstacles, scene analysis and scene work. The course will culminate in a staged scene to be presented in class. PREREQUISITE(S): None.

FILM 384 | DIRECTING FOR TELEVISION | 4 quarter hours
(Undergraduate)
This course provides abilities and knowledge to direct multiple episodes on a television series. As a response to available time and resources, students will learn how to direct television episodes at a fast pace. They will explore the intricacies of multiple-camera blocking, single-camera production, and the post-production processes of an episodic program. Also, students will explore the differences between directing the TV pilot versus an episode.
FILM 285 is a prerequisite for this class.

FILM 385 | DIRECTING II (FORMERLY DC 392) | 4 quarter hours
(Undergraduate)
Advanced study of directing for cinema. Students will continue exploration of directing concepts including: casting, rehearsing, analyzing script, blocking and working with actors, blocking and moving camera, and re-directing through editing and sound. Course will culminate in a final project directed by each student, using professional actors, professional equipment and/or facilities, and an original screenplay.
FILM 285 is a prerequisite for this class.

FILM 386 | REHEARSAL WORKSHOP FOR DIRECTORS (FORMERLY DC 352) | 2 quarter hours
(Undergraduate)
The rehearsal workshop deepens a director's understanding of effective rehearsal techniques. Students learn tools to work with any size cast (individuals, pairs and ensembles) at every stage of the process from table read to set.
FILM 285 is a prerequisite for this class.

FILM 387 | DIRECTING THE SHORT FILM (FORMERLY DC 350) | 4 quarter hours
(Undergraduate)
Through managing the technical, theoretical and creative responsibilities of the director, students produce a narrative fiction short film. Students must enter with a finished, producible short film script with major principal pre-production elements in place. Advanced pre-production skills and topics to be covered include: script break down, schedule and budget, pre-visualization, creative collaboration and management, set procedures, and directing post-production and delivery.
FILM 210, CP 320 and SCWR 308 are prerequisites for this class.

FILM 389 | ADVANCED TOPICS IN CINEMA (FORMERLY DC 370) | 4 quarter hours
(Undergraduate)
This class will be an in-depth examination of a filmmaker, film genre, or film movement that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and critical writing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): None.

FILM 391 | TOPICS IN PRODUCTION (FORMERLY DC 395) | 4 quarter hours
(Undergraduate)
This course allows advanced students to work in close conjunction with a faculty member to develop a digital media project. Topics focus on a specific genre or medium each quarter such as: traditional movie production (horror, comedy, action/adventure, documentary, experimental, etc.), animation (narrative, non-narrative, web-based, cinematic, etc.), and advanced digital game design (story, strategy, graphics, etc.). Students work to produce a five to ten minute project.
FILM 210 is a prerequisite for this class.
FILM 392 | TOPICS IN TV PRODUCTION (FORMERLY TV 372) | 4 quarter hours  
(Undergraduate)  
This course is a hands-on experience in television production of news and public affairs programs. Students learn through theory and practice the role TV Producers and their teams play in creating various TV programs. PREREQUISITE(S): None.

FILM 393 | TOPICS IN STUDY ABROAD (FORMERLY DC 396) | 4 quarter hours  
(Undergraduate)  
This practical course offers students an intensive experience studying cinema and/or television production abroad. Students will be introduced to the cultural context, practices, philosophies, styles and business of film and TV. Facility tours, screenings and cultural experiences may be used to supplement the classroom activities in order to deepen the understanding of the experience abroad. PREREQUISITE(S): None.

FILM 396 | NON-CREDIT INDEPENDENT STUDY | 0 quarter hours  
(Undergraduate)  
Registration through the online Independent Study application form, which requires a certification that the student is actively working on a project under a faculty member's supervision. Approval by the Dean is required. This course is for zero-credit hour.

FILM 397 | CAPSTONE DEVELOPMENT (FORMERLY DC 397) | 4 quarter hours  
(Undergraduate)  
In this course, students will create a proposal that outlines what they will do for their Senior Capstone Project. The project should be a culmination of all of the course work that the student did during their time in the School of the Cinematic Arts. Each project must adhere to the guidelines for their degree concentration. Students will begin to work on their projects in this class; the first version, cut, or draft of their project must be ready by the time the student begins DC 398 Digital Cinema Capstone. ANI 340 or SCWR 352 or SCWR 353 or FILM 210 is a prerequisite for this class.

FILM 398 | DIGITAL CINEMA CAPSTONE (FORMERLY DC 398) | 4 quarter hours  
(Undergraduate)  
This course provides a Digital Cinema-specific capstone experience for the student. Students must have completed at least one of the three Topics in Production courses before they enroll in this course. The capstone course will connect the students’ Digital Cinema course work with the University courses s/he has taken through three components: student-generated production packages, class/instructor discussions, and the actual creation/production of the student’s proposal. The production piece is the primary focus of this course.

FILM 399 | INDEPENDENT STUDY | 1-8 quarter hours  
(Undergraduate)  
Variable credit. PREREQUISITE(S): Consent of dean.

FILM 401 | FUNDAMENTALS OF CINEMA PRODUCTION (FORMERLY DC 414) | 4 quarter hours  
(Graduate)  
This course is a beginning workshop in narrative film production. The course provides an introduction to the fundamentals of cinema production, including camera and lens technology, composition, lighting, directing, sound recording, and basic editing. Students will produce several short films with an emphasis on visual storytelling and personal expression. PREREQUISITE(S): None.

FILM 410 | PRODUCTION WORKSHOP (FORMERLY DC 461) | 4 quarter hours  
(Graduate)  
Students work in teams to produce a completed project every two weeks. Each team will be assigned a specific genre or medium of cinema/media production. Students will be exposed to every aspect of media production from live action shooting to visual effects. Students will also learn how to work well in a team environment and be forced to adhere to deadlines, time constraints and medium limitations. PREREQUISITE(S): None.

FILM 419 | LIVE EVENT/ TALK TV WORKSHOP (FORMERLY TV 481) | 2 quarter hours  
(Graduate)  
In this workshop students will produce events with guest artists, presented in front of a live studio audience. Students will help prep each appearance and participate as crew members in the multi-camera production and telecasting of the events. They will learn the professional practices and positions that constitute talk-show format television production. Post-production and finishing for Web Streaming and VOD delivery will also be addressed. May be repeated for credit. (2 quarter hours)

FILM 423 | MUSIC VIDEO PRODUCTION (FORMERLY DC 411) | 4 quarter hours  
(Graduate)  
In this course, we will analyze ways in which artists combine visual imagery with music as with MTV-style music videos. The music business and how it relates/effects music videos. Each student will develop his or her own music video project from script to final edit with a local band of their choice, through their own scheduling process. FILM 401 or FILM 410 is a prerequisite for this class.

FILM 425 | EXPERIMENTAL FILMMAKING I (FORMERLY DC 447) | 4 quarter hours  
(Graduate)  
This production-based course explores breaking the boundaries of conventional cinema through experimental formal approaches, techniques and content. Students will create projects in the modes of key figures from the history of experimental and avant-garde film and video, such as Kenneth Anger, Stan Brakhage, Luis Bunuel, Maya Deren, Dana Hodgdon, David Lynch, Bill Viola, or Andy Warhol. Additionally, students will be encouraged to capture, edit and process material through non-traditional means, and to explore unconventional content. Screenings of experimental works may be tailored to the specific interests of students as projects develop. The influences of experimental cinema on conventional media such as Hollywood movies, commercials, and music video will also be analyzed. FILM 410 is a prerequisite for this class.

FILM 426 | EXPERIMENTAL FILMMAKING II (FORMERLY DC 448) | 4 quarter hours  
(Graduate)  
In this production-based course, students will build on skills gained in Experimental Filmmaking I with a focus on the professional execution of an experimental film project. From creating the abstract, to an intensive focus on pre-production, to non-traditional filmmaking techniques, to critique through various stages of post-production, the student will be pushed to create a visionary work for the film festival circuit and beyond. Through this regimented process, the filmmaker will learn skills necessary to write grants, produce and package professional quality cinematic work targeted toward having distribution success. FILM 425 is a prerequisite for this class.
FILM 430 | FUNDAMENTALS OF SHORT FILM (FORMERLY DC 460) | 4 quarter hours (Graduate)
Students will study approximately 100 well-crafted and landmark short films from throughout film history. Through these screenings, students will learn film vernacular, the roles these short films served their respective filmmakers and the concept of how "calling card" shorts can be used to illustrate a filmmaker's voice. Short film genres and styles that will be explored will include: narrative, experimental, documentary and animation, ranging from early silent films to contemporary films being screened at festivals today. PREREQUISITE(S): None.

FILM 431 | FILM HISTORY FROM THE FILMMAKER'S PERSPECTIVE (FORMERLY DC 520) | 4 quarter hours (Graduate)
In film history, countless directors have established distinct directorial styles or voices through their unique use of film form and content. In this course, students will analyze the work of several of these directors through screenings, lectures and discussions of directorial choices in composition, movement, editing, production design, sound or story. Concepts will be applied to assignments that will help students develop their own directorial voices. PREREQUISITE(S): None.

FILM 445 | IMMERSIVE AND 360 VIDEO PRODUCTION | 4 quarter hours (Graduate)
This class will focus on the development, production and post-production of live-action 360 video. The medium of virtual reality will be analyzed within the context of the evolution of time-based and interactive media. Experimental projects will offer students the opportunity to tell stories in new ways while exploring the affordances and challenges of the evolving medium.

FILM 410 is a prerequisite for this class.

FILM 448 | FILM FESTIVALS (FORMERLY DC 493) | 4 quarter hours (Graduate)
Film festivals and their role in independent cinema and the Hollywood studio system. The global proliferation of film festivals will be examined from the perspectives of both film studies scholars and film making professionals. Students will research the history of major festivals, and attend film festival screenings, panels, and/or networking events. A festival strategy and budget will be developed for students' own films. PREREQUISITE(S): None (2 quarter hours)

FILM 450 | CINEMATOGRAPHY (FORMERLY DC 475) | 4 quarter hours (Graduate)
In this course, students learn advanced production techniques of camera movement, lighting, rigging, filtration and shot composition. Students will be given hands on training in the use of the latest high definition cameras and then create a short script which they will shoot and edit.

FILM 401 or FILM 410 is a prerequisite for this class.

FILM 455 | LIGHTING I (FORMERLY DC 477) | 4 quarter hours (Graduate)
Introduction to safe and established practical operation of studio lighting and grip equipment. Students will learn a variety of basic lighting techniques, set electrical distribution, dolly set up, grip and lighting equipment. PREREQUISITE(S): None or instructor permission.

FILM 456 | LIGHTING FOR CINEMA II (FORMERLY DC 484) | 4 quarter hours (Graduate)
This continuation of Lighting for Cinema I is a hands-on, experiential class exploring advanced lighting techniques with an emphasis on engaging the audience visually. Students will learn night exterior lighting techniques, practical location lighting approaches, Hollywood gag and moving lights applications. The proper, efficient and safe use of advanced lighting and grip equipment will be demonstrated - Hmi, LED, theatrical, large tungsten, fluorescent, overheads, rigging and dollies. Students will work together in groups to accomplish visual tasks in class each week.

FILM 455 is a prerequisite for this class.

FILM 457 | CINEMATIC SPACE (FORMERLY DC 433) | 4 quarter hours (Graduate)
This seminar mixes theory and practice to expose students to an in-depth exploration of different techniques and possibilities concerning cinematic space. Beginning with an introduction to the fundamental differences between montage and mise-en-scene, the course will teach students the art and craft of designing, blocking and executing plan sequences, starting with static camera shots and ending in complex 3D camera moves.

FILM 450 is a prerequisite for this class.

FILM 458 | ADVANCED CAMERA TECHNOLOGIES (FORMERLY DC 458) | 4 quarter hours (Graduate)
This course is an advanced camera workshop covering the specific jobs of 1st and 2nd Assistants, DIT and data manager in a narrative film environment. Students will learn how to build, maintain and utilize advanced camera equipment, follow set protocols, apply industry standard processes to safely record, download, protect and transcode media for editorial workflows.

FILM 450 is a prerequisite for this class.

FILM 463 | CAMERA OPERATING WORKSHOP | 2-2.25 quarter hours (Graduate)
This course will refine a student's ability to operate a camera successfully in a variety of narrative film scenarios. Students will learn operating techniques to accomplish specific cinematic goals.

FILM 450 or FILM 455 is a prerequisite for this class.

FILM 464 | ADVANCED CINEMATOGRAPHY (FORMERLY DC 494) | 4 quarter hours (Graduate)
This seminar focuses on the art and craft of designing, blocking and executing planned sequences. It mixes theory and practice to expose students to an in-depth exploration of different techniques and possibilities concerning cinematic space. Emphasis will be on storytelling from the perspective of the cinematographer, specifically exploring how the camera is used to service the narrative.

FILM 450 or FILM 455 is a prerequisite for this class.

FILM 470 | PRODUCTION DESIGN (FORMERLY DC 421) | 4 quarter hours (Graduate)
Analysis of production design and art direction in motion pictures.

FILM 479 | VISUAL DESIGN (FORMERLY DC 476) | 4 quarter hours (Graduate)
Definition, analysis, and structure of visual components that cinema employs to support and emphasize the story. Theory of visual design will be applied through student still photos, as well as an original, visually-oriented, narrative or documentary short film, animation or game design.

FILM 410 or ANI 422 is a prerequisite for this class.
FILM 480 | PROJECT BLUENIGHT (FORMERLY DC 480) | 4 quarter hours  
(Graduate)  
Production of a feature-length digital motion picture written by students or faculty within the Digital Cinema program. Students will work as crew under supervision of faculty members heading each of the various production areas. Goal is to produce a completed digital motion picture suitable for festivals or distribution. In addition to production work, graduate students are required to write a 7-10 page paper which analyzes the experience and how it relates to their MS/MFA course of study.

FILM 481 | ACTING FOR FILMMAKERS (FORMERLY DC 449) | 4 quarter hours  
(Graduate)  
This course is designed to provide students who plan to work with actors in any aspect of cinema or interactive media, with a foundation in the actor’s craft. This will be a hands-on, practical class in which all students will be required to participate fully in the exercises and scene work. Topics to be covered include: relaxation, concentration, trust, listening, sensory work, physical actions, improvisation, imagination, needs, circumstances, objectives, obstacles, scene analysis and scene work. The course will culminate in a staged scene to be presented in class. PREREQUISITE(S): None.

FILM 484 | DIRECTING ACTORS (FORMERLY DC 462) | 4 quarter hours  
(Graduate)  
Emphasis on directing actors for film. Topics include script analysis, script interpretation, casting, rehearsals, director-actor relationship and director-actor communication. Projects will focus primarily on actor performance. FILM 410 is a prerequisite for this class.

FILM 485 | DIRECTING THE PRODUCTION (FORMERLY DC 490) | 4 quarter hours  
(Graduate)  
Emphasis on directing the production. Topics covered include blocking actors, blocking camera, directing a crew, coverage and locations. Projects should include multiple setups and crews with, at the minimum, a producer, cinematographer and production designer. FILM 484 is a prerequisite for this class.

FILM 486 | REHEARSAL WORKSHOP FOR DIRECTORS (FORMERLY DC 452) | 2 quarter hours  
(Graduate)  
The rehearsal workshop deepens a director’s understanding of effective rehearsal techniques. Students learn tools to work with any size cast (individual, pairs and ensemble) at every stage of the process from table read to set. FILM 484 is a prerequisite for this class.

FILM 487 | DIRECTING ACTORS FOR THE CAMERA (FORMERLY DC 450) | 4 quarter hours  
(Graduate)  
Directing students from SCA and acting students from TTS enroll in the same course and explore unique challenges and opportunities of collaboration between film directors and theater actors. Emphasis will be placed on the actor/director relationship, the relationship between the camera and performer, casting for film/TV, blocking for the camera and on-set technical considerations. Students will work toward the creation of a final, polished short film, using scripts written by screenwriting students. PREREQUISITE(S): None.

FILM 489 | DIRECTING THE WEB SERIES (FORMERLY DC 465) | 4 quarter hours  
(Graduate)  
This course is an introduction to directing narrative content for the Internet. Students will learn how to direct a production in an episodic or serialized environment where the primary goal is to maintain a tone and tenor consistent with the show-runner’s vision. The course also covers the basic principles of budgeting, financing, casting, hiring talent, scheduling, securing locations, shooting and gathering social media artifacts for a series. Students will shepherd the project from idea execution through production, and finish the course with a five-episode web series. FILM 487 is a prerequisite for this class.

FILM 490 | ADVANCED TOPICS IN CINEMA (FORMERLY DC 470) | 4 quarter hours  
(Graduate)  
This class will be an in-depth examination of a filmmaker, film genre, or film movement that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and critical writing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Specific topics will be selected by the instructor and will vary with each quarter.

FILM 493 | TOPICS IN STUDY ABROAD (FORMERLY DC 496) | 4 quarter hours  
(Graduate)  
This practical course offers students an intensive experience studying cinema and/or television production abroad. Students will be introduced to the cultural context, practices, philosophies, styles and business of film and TV. Facility tours, screenings and cultural experiences may be used to supplement the classroom activities in order to deepen the understanding of the experience abroad. PREREQUISITE(S): None.

FILM 499 | INTERNSHIPS IN MEDIA AND DESIGN | 1-4 quarter hours  
(Graduate)  
This is an internship/ independent study course for graduate students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for the course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student’s internship. PREREQUISITE(S): Internship. (variable credit)
This course introduces students to how a production company operates.

FILM 510 | CINEMA THESIS I | 4 quarter hours
(Graduate)
In this class, students work intensively on a thesis project proposal based on responses from the instructor, their classmates, and from graduate faculty thesis advisors. For narrative work, the goals is to finalize a shooting script for the thesis project. PREREQUISITE(S): Faculty permission.

FILM 511 | CINEMA THESIS II (FORMERLY DC 566) | 4 quarter hours
(Graduate)
In this class, students work intensively on a thesis project proposal based on responses from the instructor, their classmates, and from graduate faculty thesis advisors. For narrative work, the goal is to finalize pre-production for the thesis project.

FILM 510 and instructor consent are prerequisites for this class.

FILM 560 | GRADUATE TEACHING SEMINAR | 4 quarter hours
(Graduate)
This seminar exposes students to effective methods and professional practices of teaching undergraduate and graduate students. A variety of approaches to course materials and projects will be introduced and discussed in detail. In addition to work in class, students will work closely with a faculty member in order to gain first-hand knowledge, including class observation, of practical aspects of creative and academic instruction. PREREQUISITE(S): none. FORMERLY DC 560.

FILM 599 | INDEPENDENT STUDY | 0 quarter hours
(Graduate)
Independent study form required. PREREQUISITE(S): Consent of instructor. (variable credit)

FILM 701 | THESIS CONTINUATION | 0 quarter hours
(Graduate)
Non-credit. Students admitted to MFA program who have completed all the required coursework and who are regularly using the facilities of the University for thesis production and/or post-production are required to be registered each quarter of the academic year until the thesis and defense have been completed. (0 credit hours)

FILM 510 or ANI 640 is a prerequisite for this class.

Film & TV Creative Producing (CP)

CP 310 | FILM PRODUCTION COMPANY DEVELOPMENT | 4 quarter hours
(Undergraduate)
This course introduces students to how a production company operates. Students will learn how to build a film slate by identifying intellectual properties and developing them into viable projects. There will be an emphasis on story development with a focus on optioning material, talent packaging, and fund raising.

CP 320 | INTRODUCTION TO FILM SCHEDULING AND BUDGETING
(Formerly DC 323) | 4 quarter hours
(Undergraduate)
This course will cover the fundamentals of film scheduling and budgeting. Students will learn how to develop a shooting schedule and working budget. Professional scheduling and budgeting software will be utilized in a lab setting.

CP 323 | PRE-PRODUCTION WORKSHOP (FORMERLY DC 379) | 2-2.5 quarter hours
(Undergraduate)
This two-credit course will provide valuable pre-production work on targeted productions, such as Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Professional scheduling, budgeting and pre-visualization software may be utilized. PREREQUISITE(S): By instructor permission only.

CP 340 | THE FUNDAMENTALS OF PRE PRODUCTION (FORMERLY DC 385) | 4 quarter hours
(Undergraduate)
This course focuses on the key steps of pre-production for a feature film. Students will learn how to prep a film with a focus on cast and crew deals, location agreements, clearance, insurance, and working with the major unions.

CP 343 | INDEPENDENT FILM PRODUCING (FORMERLY DC 364) | 4 quarter hours
(Undergraduate)
This course introduces students to the principals and strategies of independent film producing with a focus on the following key areas: packaging material, fundraising, foreign sales, and festival and distribution strategies.

CP 350 | PRODUCING FOR ANIMATION AND VFX (FORMERLY DC 363) | 4 quarter hours
(Undergraduate)
This course introduces students to the key concepts behind producing for computer animation and the use of visual effects in live action filmmaking such as production planning, cost estimating production and post workflows.

CP 360 | PRODUCING TELEVISION (FORMERLY TV 385) | 4 quarter hours
(Undergraduate)
This is a course discussing the different roles of the television producer and show runners. Particular emphasis will be put on exploring and discussing the difference between line, segment, coordinating, field, executive (show-runner), and supervising producers. Students wear many television producer hats through the quarter, and will explore those roles in relation to different scripted and non-scripted formats. Examining and performing various tasks like budgets, staffing, and scheduling will give students a comprehensive view of the needs and responsibilities of different producers. Additional consideration will be given to the on-set roles and responsibilities of the showrunner in the television production environment. The class will culminate in the creation of short promo segments of various styles of television shows. PREREQUISITES: FILM 110, TV 306 OR TV 307.

CP 364 | REALITY TELEVISION PRODUCTION (FORMERLY TV 373) | 4 quarter hours
(Undergraduate)
Advanced production class develops a reality or factual show concept and treatment. Students will produce and cast a pilot based on their treatments. The class will focus on techniques and methods to build engagement and conflict within the reality or factual genre.
This course focuses on the fundamentals of pre-production for a feature film. Students will learn how to prep a film with a focus on cast and crew deals, location agreements, clearance, insurance, and working with the major unions.

**CP 423 | PRE-PRODUCTION WORKSHOP (FORMERLY DC 479) | 2 quarter hours**
(Graduate)
This two-credit course will provide valuable pre-production work on targeted productions, such as Project BlueLight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Professional scheduling, budgeting and pre-visualization software may be utilized. PREREQUISITE(S): By instructor permission only. (2 quarter hours)

**CP 440 | PRE-PRODUCTION FOR PRODUCERS (FORMERLY DC 485) | 4 quarter hours**
(Graduate)
This course focuses on the fundamentals of pre-production for a feature film. Students will learn how to prep a film with a focus on cast and crew deals, location agreements, clearance, insurance, and working with the major unions.

**CP 366 | THE BUSINESS OF TELEVISION (FORMERLY TV 289) | 4 quarter hours**
(Undergraduate)
Course provides historical background of the television business, beginning with the initial launch of the industry in the 1940s. Students examine the establishment of the regulatory system, including the Federal Communications Commission (FCC), the operational structure of stations and networks, the development of cable and satellite broadcasting, and the programming policies and strategies of the present broadcasting industry.

**CP 380 | CONTRACTS AND NEGOTIATIONS (FORMERLY DC 365) | 4 quarter hours**
(Undergraduate)
This course introduces students to the principals and strategies of entertainment law with a focus on the following key areas: chain of title, production legal, clearance, music licensing, and delivery requirements.

**CP 382 | DISTRIBUTION AND EXHIBITION (FORMERLY DC 381) | 4 quarter hours**
(Undergraduate)
This course explores the commercial and economic structure of the contemporary film industry. Topics to be covered include: the development of "Hollywood" as a distribution mechanism; the subsequent emergence of an independent commercial sector; the revenue stream from "box office" and ancillary markets, through distributors and to producers; the history and current state of theatrical exhibition; and emerging modes of content delivery.

**CP 399 | INDEPENDENT STUDY (FORMERLY DC 399) | 1-8 quarter hours**
(Undergraduate)
Variable credit. PREREQUISITE(S): Consent of dean.

**CP 410 | CREATIVE PRODUCING (FORMERLY DC 489) | 4 quarter hours**
(Graduate)
This course introduces students to the role of the Creative Producer. Students will learn how to build a film and television slate by identifying intellectual properties and developing them into viable projects. There will be an emphasis on optioning material, talent packaging, and financing.

**CP 412 | FEATURE FILM DEVELOPMENT | 4 quarter hours**
(Graduate)
This course will focus on feature film development from a producer's perspective. Students will evaluate completed screenplays and the producer's role in developing them into films.

**CP 414 | TELEVISION DEVELOPMENT | 4 quarter hours**
(Graduate)
This course focuses on scripted television development from the producer's perspective. Emphasis will be placed on the industrial process and personnel of the networks, as well as the creative strategies needed to guide a project from concept ideation to hit series.

**CP 420 | SCHEDULING & BUDGETING (FORMERLY DC 423) | 4 quarter hours**
(Graduate)
This course will cover the fundamentals of film scheduling and budgeting. Students will learn how to break a script down and create a shooting schedule and working budget. Professional scheduling and budgeting software will be utilized in a lab setting.

**CP 423 | PRE-PRODUCTION WORKSHOP (FORMERLY DC 479) | 2 quarter hours**
(Graduate)
This two-credit course will provide valuable pre-production work on targeted productions, such as Project BlueLight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Professional scheduling, budgeting and pre-visualization software may be utilized. PREREQUISITE(S): By instructor permission only. (2 quarter hours)

**CP 440 | PRE-PRODUCTION FOR PRODUCERS (FORMERLY DC 485) | 4 quarter hours**
(Graduate)
This course focuses on the fundamentals of pre-production for a feature film. Students will learn how to prep a film with a focus on cast and crew deals, location agreements, clearance, insurance, and working with the major unions.

**CP 442 | THE AGENCY | 2-2.25 quarter hours**
(Graduate)
This course will examine the critical role the talent manager performs in today's entertainment industry. Students will learn how managers operate as producers and work with talent to develop and sell their projects to the studios.

**CP 444 | THE TALENT MANAGER | 2-2.25 quarter hours**
(Graduate)
This course will examine the critical role the talent manager performs in today's entertainment industry. Students will learn how managers operate as producers and work with talent to develop and sell their projects to the studios.

**CP 448 | THE NETWORK EXECUTIVE | 2-2.25 quarter hours**
(Graduate)
This course provides an overview of the various departments at a major motion picture studio. Students will learn how studio executives develop projects and oversee production and distribution for the studio.

**CP 450 | PRODUCING REALITY TELEVISION | 2-2.25 quarter hours**
(Graduate)
This course will examine the process for producing reality shows. Students will learn how to develop ideas for reality shows and create pitch decks. There will be an emphasis on producing techniques for signing and working with reality show talent.

**CP 452 | PRODUCING COMMERCIALS & MUSIC VIDEOS | 2-2.25 quarter hours**
(Graduate)
This course examines the process and production techniques for producing commercials and music videos. Industry standards for creating commercials and music videos for clients will be discussed. Additional topics include copywriting, style guides, casting, media, and client-relations.
This course will examine the creative and business skills required for producing television. Students will review different genres and styles of television production while exploring the various roles in relation to specified and non-scripted formats. Additional consideration will be given to the on-set roles and responsibilities of the showrunner on a television production.

This course introduces students to the principles and strategies of entertainment law with a focus on the following key areas: chain of title, production legal, clearance, music licensing, and delivery requirements. PREREQUISITE(S): None.

This course will provide an overview of the post process for producers. Students will examine the key stages of post from edit to delivery, with an emphasis on producing visual effects for film and television.

This is an internship course for graduate creative producing students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Students will intern at an entertainment company with a focus on the development and pre-production stages of film and television.

This is an internship course for graduate creative producing students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Students will intern at entertainment company with a focus on the production and distribution stages of film and television.

Students will be required to complete a final thesis project that involves creating a film and television slate. Students will be required to create a professional package for three projects which will entail optioning and developing source material such as a book, script, or magazine article. The ultimate goal for the thesis projects is for the students to have viable projects upon graduation that they can set up at a studio or produced independently. Student also have the option to produce a festival quality short film for their final thesis project subject to approval by the Creative Producing Committee.

Students will revise their thesis projects based on the feedback from the instructor and thesis advisors. During this stage, students will be expected to be actively producing their short film or sizzle reels, and securing any rights necessary for the completion of the project.

Current avenues for the development of the student director for a professional career will be explored, including film festivals, fundraising, self-distribution and pitching. Usable film festival strategies, self-distribution plans, and fundraising business plans will be created for the exploitation of existing or future projects.

FILM 487 is a prerequisite for this class.

Independent study form required. PREREQUISITE(S): Consent of instructor. Variable credit.

Non-credit. Students admitted to MFA program who have completed all the required coursework and who are regularly using the facilities of the University for thesis production and/or post-production are required to be registered each quarter of the academic year until the thesis and defense have been completed.

FILM 510 or ANI 640 is a prerequisite for this class.

Students analyze and assemble dramatic scenes under a variety of conditions and narrative strategies. Editing theories, techniques and procedures, issues of continuity, effects, movement and sound are examined as they relate to the fundamentals of cinematic montage and visual storytelling. This class presents a variety of topics and experiences that are designed to broaden the student’s understanding of the art of cinematic storytelling and montage. Work on more advanced projects is integrated into the class as a means to an understanding of advanced editing tools and techniques. PREREQUISITE(S): NONE.

Students analyze and assemble dramatic scenes under a variety of conditions and narrative strategies. Editing theories, techniques and procedures, issues of continuity, effects, movement and sound are examined as they relate to the fundamentals of cinematic montage and visual storytelling.

ANI 101 or ANI 201 or FILM 101 is a prerequisite for this class.

This course is an introduction to the uses and practical applications of sound for multimedia. Students will study various uses of sound and music on the Internet from creative to professional websites. Using free or inexpensive hardware and software, students will learn to create and edit podcasts and attach audio files to programs and web pages such as Facebook, iTunes, Keynote, PowerPoint and other sites. The course will cover both Mac and PC applications so all students will be able to work on projects from their home computers. The course will also cover current legalities of digital media. PREREQUISITES: NONE.
POST 124 | SOUND DESIGN I (FORMERLY DC 215) | 4 quarter hours
(Undergraduate)
This course is an introduction to sound editing and sound design. The course examines the place of sound in cinema, both artistic and technological. The course will cover the basics of sound, microphones, and analogue-to-digital conversion. Lectures, readings, and film clips will be used to illustrate the language of film sound, as practiced by film directors, sound designers, and editors. Students will learn to edit sound assignments with Pro Tools and current technologies. PREREQUISITE(S): None.

POST 200 | EDITING II (FORMERLY DC 320) | 4 quarter hours
(Undergraduate)
This course expands on topics covered in DC 220. Emphasis is on developing the student’s understanding of the art of cinematic storytelling and montage. Work on more advanced projects is integrated into the class as a means of mastering advanced editing tools and techniques. POST 110 is a prerequisite for this class.

POST 224 | SOUND DESIGN II (FORMERLY DC 315) | 4 quarter hours
(Undergraduate)
This course expands on topics covered in DC 215. Emphasis will be on mixing and editing techniques for music and sound effects. Coursework also includes the recording of natural sounds and special effects to reinforce images and the story. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound tracks for traditional as well as interactive narratives.

GAM 250 or POST 124 is a prerequisite for this class.

POST 280 | PRE - PRODUCTION FOR POST | 4 quarter hours
(Undergraduate)
This course covers the technical aspects and decision-making processes of pre-production. It will cover various image capture and final output options, and will explain the concepts and methods of digital color, formats, codecs, compression and storage. Practical considerations about camera and codec selection will be explored through image capture and exhibition, including an introduction to digital intermediate concepts. Beginning-to-end workflows, including the creation and application of proxies, will be demonstrated and practiced. FILM 110 is a prerequisite for this class.

POST 303 | EDITING III (FORMERLY DC 340) | 4 quarter hours
(Undergraduate)
This course provides an advanced workshop for students to edit their own narrative or documentary projects. Students will be expected to bring in their own footage, and will take their projects from logging, through rough cut, to picture lock. Post-production workflow, and basic sound design and color correction for picture editors will also be emphasized. POST 200 is a prerequisite for this class.

POST 304 | AVID MEDIA COMPOSER EDITING WORKSHOP | 2-2.5 quarter hours
(Undergraduate)
This course provides an advanced workshop for students to learn how to use Avid Media Composer. Students will learn how to set up a project, import, organize, and edit media. Post-production workflow, basic sound design, and color correction for picture editors will also be emphasized.

POST 305 | DAVINCI RESOLVE EDITING WORKSHOP | 2-2.5 quarter hours
(Undergraduate)
This course provides an advanced workshop for students to learn how to edit using DaVinci Resolve. Students will learn how to set up a project, import, organize, and edit media. Post-production workflow, basic sound design, and color correction for picture editors will also be emphasized.

POST 306 | EDITING STYLES AND TECHNIQUES (FORMERLY DC 322) | 4 quarter hours
(Undergraduate)
This course is designed for editors looking for innovative ways to tell stories, by exploring how editing techniques have been pushed by artists working in the margins. Cutting edge editing techniques are a co-opting of historical and experimental styles, repackaged and used in a narrative context. A series of practical exercises and a freeform final project using found footage allow editors to explore the array of editing techniques adopted from experimental work while discovering their personal style as editors and storytellers. Editors will consider how form affects content and will reinvent techniques in ways to surprise modern audiences. POST 110 is a prerequisite for this class.

POST 309 | EDITING THE FEATURE FILM (FORMERLY DC 360) | 4 quarter hours
(Undergraduate)
In this course, students will be introduced to the specialized post-production workflow of editing the feature film. Topics will include: understanding the script notes, organizing the project, editing scenes with a focus on performance and character arcs, working with sound effects and music, performing a temp mix, breaking the film into reels, and producing deliverables for the composer, sound editor, and color correction. PREREQUISITE(S): POST 200.

POST 312 | EDITING THE DOCUMENTARY | 4 quarter hours
(Undergraduate)
Editing the Documentary will expose students to the specialized post production workflow of documentary film. Utilizing a workshop atmosphere in combination with lectures and projects, students will gain an appreciation of the art and craft of documentary film editing. This course will cover an overview of current documentary trends and styles, explore various workflows to find the story in documentary footage, the ethical role of editor in shaping the stories of real people and events, how to apply the visual language of fiction to documentary film, use of archival media in a contemporary way, how to structure the story scene to scene and where to start and end the story. POST 110 is a prerequisite for this class.
POST 324 | SOUND MIXING I (FORMERLY DC 317) | 4 quarter hours
(Undergraduate)

This workshop based course focuses on re-recording mixing for cinema using the surround sound field. Subjects include mixing philosophies, techniques, advanced digital signal processing, and monitoring. A history of surround sound mixing will be covered. Several projects will be completed throughout the quarter.

POST 322 | ABLETON LIVE WORKSHOP (FORMERLY DC 336) | 2 quarter hours
(Undergraduate)

Ableton Live is a Digital Audio Workstation (DAW) software designed for recording, manipulating, and playing back audio and MIDI tracks both linearly and nonlinearly. Students will learn the basics of working within the Live interface to create musical arrangements, sound design, sequence MIDI instruments and samples, score Video, create DJ mixes, drum patterns, automate effects and mixing parameters. The course includes hands-on, guided demonstrations of the Live interface and tools for complex compositions, mixing, and live performances in any musical style. The course projects will emphasize exploration and experimentation.

POST 321 | LOGIC PRO MIDI SEQUENCING WORKSHOP (FORMERLY DC 324) | 2 quarter hours
(Undergraduate)

This course offers training on all aspects of MIDI sequencing in Logic Pro software. All aspects of MIDI will be covered including recording, programming, editing, mixing and processing functions. PREREQUISITE(S): None (2 quarter hours)

POST 320 | PRODUCTION SOUND II (FORMERLY DC 313) | 4 quarter hours
(Undergraduate)

This workshop based course expands on topics covered in Production Sound I. Students will advance their knowledge of pre-production, acoustics, microphone techniques, single and dual system recording techniques, and production recording/mixing techniques. Subjects include production management, microphone selection and techniques, advanced sound-for-camera workflows, professional dual system recording/mixing practices, and post workflows. Several projects will be completed throughout the quarter.

POST 315 | EDITING FOR TELEVISION (FORMERLY TV 320) | 4 quarter hours
(Undergraduate)

Class emphasizes editing and post production producing under tight deadlines. Students edit commercials, trailers, and PSA projects. POST 110 and FILM 115 are prerequisites for this class.

POST 319 | EDITING STUDIO | 4 quarter hours
(Undergraduate)

This course provides practical experience in editing. Participants will apply learned editorial techniques into real-world experience, serving as editors for various projects that may include thesis, capstone and other student work. A key element of this course will be in-class discussions and critiques of students? work, to sharpen their editing and storytelling skills.

POST 336 | ADVANCED SOUND RECORDING AND EDITING (FORMERLY DC 318) | 4 quarter hours
(Undergraduate)

This workshop based course focuses on re-recording mixing for cinema using the surround sound field. Subjects included mixing philosophies, techniques, advanced digital signal processing, and monitoring. A history of surround sound mixing will be covered. Several projects will be completed throughout the quarter.

POST 328 | SCORING FOR FILM AND VIDEO (FORMERLY DC 312) | 4 quarter hours
(Undergraduate)

Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances the visual statement. Course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score for their own film or video as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied.

POST 339 | SOUND DESIGN AND SCORING STUDIO | 4 quarter hours
(Undergraduate)

This course is intended to provide practical experience in sound design and scoring for cinema, animation, and other media as well as to offer the opportunity to create quality materials to include in a demo reel or portfolio. Students will be serving as the sound and music crew for various projects that may include thesis, capstone and other student projects. A key element of this course will be in-class discussions and critiques of students? work, both to sharpen their sound designing, composing and critical listening skills.

POST 330 | PRODUCTION SOUND I (FORMERLY DC 212) | 4 quarter hours
(Undergraduate)

This workshop based course on topics covered in Production Sound I. Students will advance their knowledge of pre-production, acoustics, microphone selection and techniques, advanced sound-for-camera workflows, professional dual system recording/mixing techniques, and post workflows. Several projects will be completed throughout the quarter.

POST 335 | SCORING FOR FILM AND VIDEO (FORMERLY DC 311) | 4 quarter hours
(Undergraduate)

This workshop based course offers advanced sound recording and editing techniques. Subjects include voice processing, basic acoustics, room tone matching, sound effects recording, Foley recording, proximity processing, frequency analysis, and mixing. Several projects will be completed throughout the quarter.

POST 324 | SOUND MIXING II (FORMERLY DC 318) | 4 quarter hours
(Undergraduate)

This workshop based course focuses on re-recording mixing for cinema using the surround sound field. Subjects included mixing philosophies, techniques, advanced digital signal processing, and monitoring. A history of surround sound mixing will be covered. Several projects will be completed throughout the quarter.

POST 329 | SOUND DESIGN AND SCORING STUDIO | 4 quarter hours
(Undergraduate)

This course offers training on all aspects of MIDI sequencing in Logic Pro software. All aspects of MIDI will be covered including recording, programming, editing, mixing and processing functions. PREREQUISITE(S): None (2 quarter hours)

This course provides practical experience in editing. Participants will apply learned editorial techniques into real-world experience, serving as editors for various projects that may include thesis, capstone and other student work. A key element of this course will be in-class discussions and critiques of students? work, to sharpen their editing and storytelling skills.

POST 310 | EDITING THE SHORT FORM | 4 quarter hours
(Undergraduate)

Editing the Short Form will explore the world of TV commercials, music video, movie trailers and internet content for clients. Emphasis on the culture of commercial production environments, including the advertising agency, entertainment and music media business, as well as the broader online market for creation of motion content.

POST 110 is a prerequisite for this class.

POST 332 | PRODUCTION SOUND II (FORMERLY DC 313) | 4 quarter hours
(Undergraduate)

This workshop based course expands on topics covered in Production Sound I. Students will advance their knowledge of pre-production, acoustics, microphone selection and techniques, advanced sound-for-camera workflows, professional dual system recording/mixing techniques, and post workflows. Several projects will be completed throughout the quarter.

POST 330 | PRODUCTION SOUND I (FORMERLY DC 212) | 4 quarter hours
(Undergraduate)

This workshop based course offers advanced sound recording and editing techniques. Subjects include voice processing, basic acoustics, room tone matching, sound effects recording, Foley recording, proximity processing, frequency analysis, and mixing. Several projects will be completed throughout the quarter.

POST 224 is a prerequisite for this class.

POST 336 | ADVANCED SOUND RECORDING AND EDITING (FORMERLY DC 319) | 4 quarter hours
(Undergraduate)

This workshop based course offers advanced sound recording and editing techniques. Subjects include voice processing, basic acoustics, room tone matching, sound effects recording, Foley recording, proximity processing, frequency analysis, and mixing. Several projects will be completed throughout the quarter.

POST 324 is a prerequisite for this class.

POST 340 | COLOR CORRECTION (FORMERLY DC 325) | 4 quarter hours
(Undergraduate)

Students acquire a working knowledge of the aesthetics and technical aspects of the post-production phase of color correction. Content addresses theory and application of color correction, image control, and manipulation techniques. Principles of color theory and the tools available to filmmakers engaged in the processes of electronic media and image manipulation are explored through lecture, interactive computer exercises, and hands-on experience with professional color correction software.

POST 110 is a prerequisite for this class.
POST 344 | ADVANCED COLOR CORRECTION (FORMERLY DC 326) | 4 quarter hours  
(Undergraduate)  
This class expands on topics covered in DC 325. Students will refine their skills in the areas of Primary, Secondary and Color FX room advanced grading techniques used by professional colorists. This class will explore more in detail colorist strategies, grading workflows, aesthetics and technical aspects of color correction for the digital cinema. Students will explore color correcting trends that are popular in feature films and national television commercials. Through a series of three short projects and a final project, students will practice using the techniques they study in class.  
POST 340 is a prerequisite for this class.

POST 348 | TITLE DESIGN (FORMERLY DC 362) | 4 quarter hours  
(Undergraduate)  
This course explores the relationship between film and typography through an analysis of title design production in film, television, animation, and games. By studying examples from film and television history and the creative process behind those productions, students will develop an understanding of how to interpret and use typography to create narrative exposition on screen. Students will gain an appreciation and skill for working with text, image, and sound within time-based media that will add value, clarity, and sophistication to multimedia projects.  
ANI 101 or ANI 201 or VFX 200 is a prerequisite for this class.

POST 360 | SOUND & MUSIC SYNTHESIS FOR FILM (FORMERLY DC 327) | 4 quarter hours  
(Undergraduate)  
This course focuses on the integration of perception, theory, and practice using examples of real-time sound synthesis utilizing object-oriented programming. Students will learn how to create custom software for musical, video, and interactive experiences. Projects will incorporate case-studies and experimental tutorials and lectures will include guest artists working in audiovisual media, sound design, and interactive composition for film.&nbsp;  
POST 124 or ANI 315 or GAM 250 is a prerequisite for this class.

POST 364 | MAX CYCLING 74 WORKSHOP (FORMERLY DC 337) | 2 quarter hours  
(Undergraduate)  
This course is a workshop style introduction to the object-oriented programming language Max, that is used by musicians, designers, filmmakers, and visual artists to create works of Interactive Media. The course will introduce the basics of programming in the Max environment and cover sound synthesis, sample playback, music instrument design, and audio-reactive animation.  

POST 380 | POST-PRODUCTION WORKSHOP (FORMERLY DC 382) | 2 quarter hours  
(Undergraduate)  
This two-credit course will provide an opportunity for students to apply their post-production skills and work collaboratively on projects happening during the academic year. These projects can be Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Students will work under faculty supervision and gain valuable experience collaborating as part of post-production team. Professional post-production applications, equipment, and facilities will be utilized.  
PREREQUISITE(S): By instructor permission only. (2 quarter hours)

POST 384 | POST-PRODUCTION SEMINAR (FORMERLY DC 391) | 4 quarter hours  
(Undergraduate)  
This course is an introduction and overview of Post Production, from the end of principle photography, through editing, to final delivery. Students will learn workflows, technical aspects, the online environment, and the best way to finish and deliver a film.  
POST 110 is a prerequisite for this class.

POST 388 | POST PRODUCTION WORKFLOWS | 4 quarter hours  
(Undergraduate)  
This course explores the practices that underpin modern post production workflows. It considers a range of mediums and platforms, encompassing fiction and non-fiction story-telling. Students will learn how post is organized, across post departments, incorporating picture editing, music, sound design and audio post, titles, graphics and VFX. Topics include post production teams, individual responsibilities, scheduling, budgeting, collaboration and communication, mastering, delivery, archiving, and the impact of new and evolving technologies. Students will visit post-production companies to experience post professionals undertaking the varying roles.

POST 390 | TOPICS IN POST-PRODUCTION SOUND (FORMERLY DC 316) | 4 quarter hours  
(Undergraduate)  
Advanced study in post-production sound focusing on a specific area each quarter such as: A.D.R., Foley, Scoring, Sound Effects, Mixing, etc. May be repeated for credit. PREREQUISITES: NONE.

POST 391 | ADVANCED TOPICS IN EDITING (FORMERLY DC 342) | 4 quarter hours  
(Undergraduate)  
This class will be an in-depth examination of an editor, editing style, or editing theory that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and editing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Editing projects will be assigned through the quarter. Specific topics will be selected by the instructor and will vary with each quarter.  
POST 110 is a prerequisite for this class.

POST 394 | IT AND ENGINEERING FOR MEDIA CAPSTONE | 4 quarter hours  
(Undergraduate)  
This course provides students with the opportunity to utilize and integrate acquired knowledge in information technology for media to an applied audio and video engineering project. Students will work in teams to design, create, and test a real world media technology solution. Completed projects will be presented and evaluated by the class.  
CSC 382, NET 377 and POST 384 are prerequisites for this class.

POST 399 | INDEPENDENT STUDY | 1-8 quarter hours  
(Undergraduate)  
Variable credit. PREREQUISITE(S): Consent of dean.

POST 400 | EDITING (FORMERLY DC 420) | 4 quarter hours  
(Graduate)  
Emphasis is on developing the student's understanding of the art of cinematic storytelling and montage. Work on more advanced projects is integrated into the class as a means of mastering advanced editing tools and techniques.  
FILM 401 or FILM 410 is a prerequisite for this class.
POST 401 | EDITING INTENSIVE | 4 quarter hours  
(Graduate)
This course is an accelerated introduction to editing, from basic concepts to advanced methods and techniques. Emphasis is on developing the students' understanding of the art of cinematic storytelling and montage. Utilizing a workshop atmosphere students will work on advanced projects as a means of mastering advanced editing tools and techniques. Status as a student in the MS Film and Television with concentration in Editing or Sound is a prerequisite for this class.

POST 403 | ADVANCED EDITING (FORMERLY DC 440) | 4 quarter hours  
(Graduate)
This course provides an advanced workshop for students to edit their own narrative or documentary projects. Students will be expected to bring in their own footage, and will take the projects from logging, through rough cut, to picture lock. Post-production workflow, and basic sound design and color correction for picture editors will also be emphasized. POST 401 is a prerequisite for this class.

POST 404 | AVID MEDIA COMPOSER EDITING WORKSHOP | 2-2.5 quarter hours  
(Graduate)
This course provides an advanced workshop for students to learn how to use Avid Media Composer. Students will learn how to set up a project, import, organize, and edit media. Post-production workflow, basic sound design, and color correction for picture editors will also be emphasized.

POST 405 | DAVINCI RESOLVE EDITING WORKSHOP | 2-2.5 quarter hours  
(Graduate)
This course provides an advanced workshop for students to learn how to edit using DaVinci Resolve. Students will learn how to set up a project, import, organize, and edit media. Post-production workflow, basic sound design, and color correction for picture editors will also be emphasized.

POST 406 | EDITING STYLES AND TECHNIQUES (FORMERLY DC 422) | 4 quarter hours  
(Graduate)
This course is designed for editors looking for innovative ways to tell stories, by exploring how editing techniques have been pushed by artists working in the margins. Cutting edge editing techniques are a co-opting of historical and experimental styles, repackaged and used in a narrative context. A series of practical exercises and a freeform final project using found footage allow editors to explore the array of editing techniques adopted from experimental work while discovering their personal style as editors and storytellers. Editors will consider how form affects content and will reinvent techniques in ways to surprise modern audiences.

FILM 401 or FILM 410 is a prerequisite for this class.

POST 409 | EDITING THE FEATURE FILM (FORMERLY DC 459) | 4 quarter hours  
(Graduate)
In this course, students will be introduced to the specialized post-production workflow of editing the feature film. Topics will include: understanding the script notes, organizing the project, editing scenes with a focus on performance and character arcs, working with sound effects and music, performing a temp mix, breaking the film into reels, and producing deliverables for the composer, sound editor, and color correction. PREREQUISITE(S): POST 400.

POST 412 | EDITING THE DOCUMENTARY | 4 quarter hours  
(Graduate)
Editing the Documentary will expose students to the specialized post production workflow of documentary film. Utilizing a workshop atmosphere in combination with lectures and projects, students will gain an appreciation of the art and craft of documentary film editing. This course will cover an overview of current documentary trends and styles, explore various workflows to find the story in documentary footage, the ethical role of editor in shaping the stories of real people and events, and the process of applying editing techniques to documentary footage. How to apply the visual language of fiction to documentary film, use of archival media in a contemporary way, how to structure story scene to scene and where to start and end the story.

POST 400 or POST 401 is a prerequisite for this class.

POST 418 | EDITING THE SHORT FORM | 4 quarter hours  
(Graduate)
Editing the Short Form will explore the world of TV commercials, music video, movie trailers and internet content for clients. Emphasis on the culture of commercial production environments, including the advertising agency, entertainment and music media business, as well as the broader online market for creation of motion content.

POST 400 or POST 401 is a prerequisite for this class.

POST 419 | EDITING STUDIO | 4 quarter hours  
(Graduate)
This course provides practical experience in editing. Participants will apply learned editorial techniques into real-world experience, serving as editors for various projects that may include thesis, capstone and other student work. A key element of this course will be in-class discussions and critiques of students work, to sharpen their editing and storytelling skills.

POST 403 is a prerequisite for this class.

POST 420 | POST-PRODUCTION SOUND DESIGN (FORMERLY DC 415) | 4 quarter hours  
(Graduate)
This course expands on topics covered in DC 215. Emphasis will be on mixing and editing techniques for music and sound effects. Coursework also includes the recording of natural sounds and special effects to reinforce images and the story. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound tracks for traditional as well as interactive narratives.

FILM 410 or ANI 422 is a prerequisite for this class.

POST 421 | SOUND DESIGN INTENSIVE | 4 quarter hours  
(Graduate)
This accelerated course examines artistic and technological sound design in cinema. The course will cover the basics of sound, microphones, production and post-production sound processes. Lectures, readings, and film clips will be used to illustrate the language of film sound, as practiced by film directors, sound designers, and editors. Students will learn to edit sound assignments current industry technologies. The second half of the course focuses on mixing and editing techniques for music and sound effects in film.

Status as a student in the MS Film and Television with concentration in Editing or Sound is a prerequisite for this class.
POST 424 | SOUND MIXING I (FORMERLY DC 417) | 4 quarter hours
(Graduate)
This workshop based course focuses on re-recording mixing for cinema using the stereo sound field. Subjects include mixing philosophies, techniques, advanced digital signal processing, and monitoring. A history of sound mixing will be covered. Several projects will be completed throughout the quarter.
POST 421 is a prerequisite for this class.

POST 426 | SOUND MIXING II (FORMERLY DC 418) | 4 quarter hours
(Graduate)
This workshop based course focuses on re-recording mixing for cinema using the surround sound field. Subjects include mixing philosophies, techniques, advance digital signal processing, and monitoring. A history of surround sound mixing will be covered. Several projects will be completed throughout the quarter.
POST 424 is a prerequisite for this class.

POST 428 | SCORING FOR FILM AND VIDEO (FORMERLY DC 412) | 4 quarter hours
(Graduate)
Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances the visual statement. Course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score of their own film or video as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied.

POST 429 | SOUND DESIGN AND SCORING STUDIO | 4 quarter hours
(Graduate)
This course is intended to provide practical experience in sound design and scoring for cinema, animation, and other media as well as to offer the opportunity to create quality materials to include in a demo reel or portfolio. Students will be serving as the sound and music crew for various projects that may include thesis, capstone and other student projects. A key element of this course will be in-class discussions and critiques of students' work, both to sharpen their sound designing, composing and critical listening skills.
POST 424 is a prerequisite for this class.

POST 430 | PRODUCTION SOUND I | 4 quarter hours
(Graduate)
This workshop based course is an introduction to production recording/mixing and field recording. Subjects include microphone selection, basic acoustics, microphone techniques, single and dual system recording practices, and mixing. Several recording projects will be completed throughout the quarter.
FILM 401 or FILM 410 is a prerequisite for this class.

POST 432 | PRODUCTION SOUND II (FORMERLY DC 413) | 4 quarter hours
(Graduate)
This workshop based course expands on topics covered in Production Sound I. Students will advance their knowledge of pre-production, acoustics, and production recording/mixing techniques. Subjects include production management, microphone selection and techniques, advanced sound-for-camera workflows, professional dual system recording/ mixing practices, and post workflows. Several projects will be completed throughout the quarter.
PROFESSIONAL DEGREE

POST 436 | ADVANCED SOUND RECORDING AND EDITING (FORMERLY DC 419) | 4 quarter hours
(Graduate)
This workshop based course offers advanced sound recording and editing techniques. Subjects include voice processing, basic acoustics, room tone matching, sound effects recording, Foley recording, proximity processing, frequency analysis, and mixing. Several projects will be completed throughout the quarter.
POST 421 is a prerequisite for this class.

POST 440 | COLOR CORRECTION (FORMERLY DC 425) | 4 quarter hours
(Graduate)
Students acquire a working knowledge of the aesthetics and technical aspects of the post-production phase of color correction. Content addresses theory and application of color correction, image control, and manipulation techniques. Principles of color theory and the tools available to filmmakers engaged in the processes of electronic media and image manipulation are explored through lecture, interactive computer exercises, and hands-on experience with professional color correction software.
POST 400 or POST 401 is a prerequisite for this class.

POST 444 | ADVANCED COLOR CORRECTION (FORMERLY DC 426) | 4 quarter hours
(Graduate)
This class expands on topics covered in DC 425. Students will refine their skills in the areas of Primary, Secondary and Color FX room advanced grading techniques used by professional colorists. This class will explore more in detail colorist strategies, grading workflows, aesthetics and technical aspects of color correction for the digital cinema. Students will explore color correcting trends that are popular in feature films and national television commercials. Through a series of three short projects and a final project, students will practice using the techniques they study in class.
POST 440 is a prerequisite for this class.

POST 448 | TITLE DESIGN (FORMERLY DC 463) | 4 quarter hours
(Graduate)
This course explores the relationship between film and typography through an analysis of title design production in film, television, animation, and games. By studying examples from film and television history and the creative process behind those productions, students will develop an understanding of how to interpret and use typography to create narrative exposition on screen. Students will gain an appreciation and skill for working with text, image, and sound within time-based media that will add value, clarity, and sophistication to multimedia projects.

POST 460 | INTERACTIVE AUDIO AND VIDEO (FORMERLY DC 435) | 4 quarter hours
(Graduate)
This course focuses on the integration of perception, theory, and practice using digital electronic sound synthesis to create custom sound effects and music for visual media. Topics will cover the use and creation of digital electronic sound synthesizers, audio mixing, acoustics, and the history of electronic music in film. Students will learn how to use synthesizers to create customized sonic designs as well as how to apply them to film, video, and interactive experiences. Projects and labs will incorporate real-world examples, practical tutorials, and lectures that will include guests working in audiovisual media, sound design, and electronic music composition for film.&nbsp.
POST 420 is a prerequisite for this class.
POST 480 | POST-PRODUCTION WORKSHOP (FORMERLY DC 482) | 2 quarter hours  
(Graduate)  
This two-credit course will provide an opportunity for students to apply their post-production skills and work collaboratively on projects happening during the academic year. These projects can be Project BlueLight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Students will work under faculty supervision and gain valuable experience collaborating as part of the post-production team. Professional post-production applications, equipment, and facilities will be utilized. PREREQUISITE(S): By instructor permission only. (2 quarter hours)

POST 484 | POST-PRODUCTION SEMINAR (FORMERLY DC 491) | 4 quarter hours  
(Graduate)  
This course is an overview of post-production, from the end of production, through editing, to final delivery. Topics covered include workflows, technical aspects, and the online environment. The focus will be on the best way to finish and deliver a film. POST 400 or POST 401 is a prerequisite for this class.

POST 488 | POST PRODUCTION WORKFLOWS | 4 quarter hours  
(Graduate)  
This course explores the practices that underpin modern post-production workflows. It considers a range of mediums and platforms, encompassing fiction and non-fiction story-telling. Students will learn how post is organized, across post departments, incorporating picture editing, music, sound design and audio post, titles, graphics and VFX. Topics include post production teams, individual responsibilities, scheduling, budgeting, collaboration and communication, mastering, delivery, archiving, and the impact of new and evolving technologies. Students will visit post-production companies to experience post professionals undertaking the varying roles.

POST 490 | TOPICS IN POST-PRODUCTION SOUND (FORMERLY DC 416) | 4 quarter hours  
(Graduate)  
Advanced study in post-production sound focusing on a specific area each quarter such as: A.D.R., Foley, Scoring, Sound Effects, Mixing, etc. May be repeated for credit. PREREQUISITE(S): None.

POST 499 | INTERNSHIPS IN MEDIA AND DESIGN | 1-4 quarter hours  
(Graduate)  
This is an internship/independent study course for graduate students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for the course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student's internship. PREREQUISITE(S): Internship. (variable credit)

POST 500 | ADVANCED EDITING FOR THESIS (FORMERLY DC 572) | 4 quarter hours  
(Graduate)  
Advanced concepts and techniques in picture editing for directors, such as re-directing, re-writing, pace, tone and rhythm, are taught in lecture and workshop. These concepts and techniques will be applied to the editing phase of MFA Cinema thesis films, culminating in picture lock. Status as a Film & Television Directing MFA student is a prerequisite for this class.

POST 520 | ADVANCED SOUND WORKSHOP FOR THESIS (FORMERLY DC 573) | 2 quarter hours  
(Graduate)  
Advanced concepts and techniques in sound design for directors, such as supervising sound editing, Foley, ADR, music and mixing, are taught in lecture and workshop. These concepts and techniques will be applied to the editing phase of MFA Cinema thesis films, culminating in a final sound mix. PREREQUISITE(S): POST 500.

POST 580 | ADVANCED FINISHING WORKSHOP FOR THESIS (FORMERLY DC 574) | 2 quarter hours  
(Graduate)  
Advanced concepts and techniques in film finishing for directors, such as supervising color correction, titling, visual effects and deliverables, are taught in lecture and workshop. These concepts and techniques will be applied to the finishing phase of MFA Cinema thesis films, culminating in final film delivery. PREREQUISITE(S): POST 500.

POST 599 | INDEPENDENT STUDY | 1-8 quarter hours  
(Graduate)  
Independent study form required. PREREQUISITE(S): Consent of instructor. (variable credit)

Film & TV Screenwriting (SCWR)

SCWR 100 | INTRODUCTION TO SCREENWRITING (FORMERLY DC 201) | 4 quarter hours  
(Undergraduate)  
This course is an introduction to and overview of the elements of theme, plot, character, and dialogue in dramatic writing for cinema. Emphasis is placed on telling a story in terms of action and the reality of characters. The difference between the literary and visual medium is explored through individual writing projects and group analysis. Films and scenes examined in this class will reflect creators and characters from a wide range of diverse backgrounds and intersectional identities. Development of a synopsis and treatment for a short theatrical screen play: theme, plot, character, mise-en-scene and utilization of cinematic elements.

SCWR 101 | SCREENWRITING FOR MAJORS (FORMERLY DC 101) | 4 quarter hours  
(Undergraduate)  
This course introduces digital cinema majors to dramatic writing for motion pictures. The topics covered include theme, plot, story structure, character, and dialogue. Emphasis is placed on telling a story in visual terms. Films and scenes examined in this class will highlight creators and characters from a wide range of diverse backgrounds and intersectional identities.

SCWR 110 | INCLUSIVE REPRESENTATION IN FILM & TV | 4 quarter hours  
(Undergraduate)  
This course will interrogate the representation of people and communities across a range of intersectional identities in film and television through the lens of creators. Through readings, screenings and discussions students will examine how marginalized groups have been represented on screen, identifying harmful and stereotypical depictions and erasures from the past to the present day. Students will learn creative tools and tactics to combat harmful representation and implement these tactics in their own creative work. Emphasis will be placed on the importance of research, lived experience, and authenticity to ensure inclusive and equitable representation across all media platforms.
SCWR 120 | FILM STRUCTURE FOR MAJORS (FORMERLY DC 221) | 4 quarter hours  
(Undergraduate)
A critical analysis of three-act film structure as well as an introduction to alternative narrative structures including, but not limited to, dual protagonist, ensemble, and non-linear structures. Films of multiple genres and eras by creators with a diverse range of intersectional identities will be examined. Students will develop a cinematic language with which to discuss films as well as a toolbox of techniques to use when making films.

SCWR 121 | CLASSIC HOLLYWOOD FILM STRUCTURE (FORMERLY DC 222) | 4 quarter hours  
(Undergraduate)
Critical analysis of successful Hollywood films and their narrative structures. Films of multiple genres and eras by creators with a diverse and intersectional range of identities will be examined. Students will learn how to recognize classical three-act structure in finished films and scripts. Students will develop a cinematic language with which to discuss films as well as a toolbox of techniques to use when making films. Key story concepts to be discussed include: protagonist, antagonist, want versus need, elements of the future, poetic justice, planting and payoff, catalyst, climax, and Aristotelian terminology.

SCWR 122 | SCRIPT TO SCREEN (FORMERLY DC 224) | 4 quarter hours  
(Undergraduate)
This analytical course examines the screenplay’s evolution to the screen from a writer’s perspective. Students will read feature length scripts of varying genres and then perform a critical analysis and comparison of the text to the final produced versions of the films. Storytelling conventions such as structure, character development, theme, and the creation of tension will be used to uncover alterations and how these adjustments ultimately impacted the film’s reception.

SCWR 123 | ADAPTATION: THE CINEMATIC RECRAFTING OF MEANING (FORMERLY DC 235) | 4 quarter hours  
(Undergraduate)
This course explores contemporary cinematic adaptations of literature and how recent re-workings in film open viewers up to critical analysis of the cultural practices surrounding the promotion and reception of these narratives. What issues have an impact upon the borrowing and reinterpreting of narratives of film? How, when, and where can we identify such borrowings and reinterpretations in multiple contemporary iterations of the same narrative?

SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 150 | TELEVISION GENRES FOR MAJORS (FORMERLY DC 230) | 4 quarter hours  
(Undergraduate)
This analytical course examines the screenplay’s evolution to the screen from a writer’s perspective. Students will read scripts of varying genres and then perform a critical analysis and comparison of the text to the final produced versions of the series. Storytelling conventions such as structure, character development, theme, and tension will be used to uncover alterations and how these adjustments ultimately impacted the show’s reception. In addition to series of various genres, students will examine shows by, for, and about a diverse range of intersectional characters and creators reflective of our communities.

SCWR 210 | THE FUNDAMENTALS OF COMEDY | 4 quarter hours  
(Undergraduate)
This course explores how Chicago became the cultural hub for comedy in America and the vital role The Second City has played in the modern style of improvisation. Through lectures and screenings, students will explore the history of comedy theory and where the form is headed next.

SCWR 240 | INTRODUCTION TO PITCHING (FORMERLY DC 288) | 4 quarter hours  
(Undergraduate)
This course focuses on creating an inventory of new material for future writing projects by developing and pitching stories for studio and independent films, as well as cable, streaming, and network television series. Students will analyze the vital role of pitching in the entertainment industry and build a foundation towards mastering professional pitching techniques.

SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 250 | INTRODUCTION TO TELEVISION WRITING (FORMERLY DC 272) | 4 quarter hours  
(Undergraduate)
This course focuses on writing the sitcom and one-hour drama television formats. Students will examine the conventions of serialized and procedural series and will learn how the collaborative dynamic of the writer’s room impacts story. The lectures and workshop provide a foundation of what it takes to be a professional staff writer and culminate in crafting a spec episode of a current television series.

(SCWR 100 or SCWR 101) and (SCWR 150 or SCWR 151) are prerequisites for this class.

SCWR 301 | STORY DEVELOPMENT (FORMERLY DC 300) | 4 quarter hours  
(Undergraduate)
This course is designed to help the emerging writer focus their creativity into a viable original project for a feature film. The lectures, workshops, and assignments are designed to enable the student to identify and develop material they have a strong personal connection to. Emphasis is placed on extensive research of the subject matter, creating memorable characters, and crafting a strong dramatic throughline.

SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 302 | WRITING THE FEATURE SCREENPLAY (FORMERLY DC 301) | 4 quarter hours  
(Undergraduate)
This course focuses on completing the first draft of a feature length screenplay. Emphasis will be placed on a foundation of character, structure, plot, and theme to bring the writer’s vetted concept to fruition. The lectures, in-class workshops, and aggressive page deadlines are designed to culminate in a spec screenplay that showcases voice and command of screenwriting conventions.

SCWR 301 is a prerequisite for this class.
SCWR 303 | REWRITING THE FEATURE FILM SCRIPT (FORMERLY DC 303) | 4 quarter hours (Undergraduate)

This course focuses on practical ways to approach the rewriting process for feature film screenplays. Through group workshops and assignments, students isolate issues with plot, character development, dialogue and pacing in their script and work on addressing them in a full draft rewrite. Student must possess a complete feature length script in order to enroll in the course.

SCWR 305 | WRITING ON ASSIGNMENT (FORMERLY DC 308) | 4 quarter hours (Undergraduate)

Modeled after professional writing assignments, this advanced course challenges students to complete a feature length screenplay within specific parameters provided by the instructor in ten weeks. Lectures and strict weekly page submission deadlines provide a practical framework on how to write quickly without sacrificing quality. Constructive analysis will be used in discussing produced scripts, weekly assignments and group workshops to reveal the writer's unique voice and perspective. SCWR 302 is a prerequisite for this course.

SCWR 306 | SCENE WRITING (FORMERLY DC 346) | 4 quarter hours (Undergraduate)

This course focuses on analyzing and developing the fundamental building block of film and television writing: the scene. Students will gain a greater understanding of how to craft engaging scenes and refine their unique voice on the page through weekly lectures, writing exercises, and workshops.

SCWR 302 or SCWR 352 or SCWR 353 is a prerequisite for this course.

SCWR 307 | ADAPTATION (FORMERLY DC 347) | 4 quarter hours (Undergraduate)

This course will explore the process of adapting existing material into a feature screenplay or teleplay. With the professor's guidance, students will choose material from the public domain to adapt, and then formulate a logline, short pitch, treatment, and first act of a feature screenplay (or two acts of a teleplay). Students will also be exposed to the process by which media rights to existing material can be obtained, should they wish to pursue intellectual property in the future.

SCWR 302 or SCWR 352 or SCWR 353 is a prerequisite for this course.

SCWR 308 | WRITING THE SHORT FILM FOR PRODUCTION (FORMERLY DC 343) | 4 quarter hours (Undergraduate)

Students will study the essential elements and conventions for writing the short film including but not limited to character, structure, and tension. Students will write a polished short film (no longer than 25 pages) designed to be produced. Students will learn how to put together a professional proposal to apply for internal or external production funds and financing.

SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 309 | CHARACTER DEVELOPMENT | 4 quarter hours (Undergraduate)

This course will explore creative methodologies geared at getting deeply into the minds and points of view of dramatic characters. Throughout the course, students will concentrate on one set of characters to refine an existing web series, feature film, or television pilot.

SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 310 | ADVANCED SCREENWRITING LAB (FORMERLY DC 344) | 4 quarter hours (Undergraduate)

This advanced course is designed to take existing writing projects (including but not limited to features, pilots, television specs, web series, short scripts) at various stages of development and provide the practical means to move forward through constructive workshop sessions. Stories will be broken down to examine concept viability and the overall execution of the narrative. Instructor and peer critiques will challenge the writer to enhance their voice on the page with the goal of creating work that is unique, engaging, and commercial.

SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 341 | PITCHING SEMINAR (FORMERLY DC 305) | 4 quarter hours (Undergraduate)

This advanced course focuses on developing vetted story pitches for existing student projects and how to pitch a unique take on intellectual property. The lectures and in-class workshops will focus on preparing for pitch meetings with an emphasis on how to read the dynamics of a room and creating a unique brand that resonates with producers and executives.

SCWR 240 is a prerequisite for this class.

SCWR 342 | FEATURE DEVELOPMENT (FORMERLY DC 309) | 4 quarter hours (Undergraduate)

This course offers a practical approach to the screenwriter's role in the development of a feature film. Emphasis will be placed on obtaining a greater understanding of narrative conventions, script analysis and the film market. From agents to studio executives, we will examine the varying points of view that comprise the development process. Constructive analysis will be used to break down feature length produced screenplays and student work. The assignments and class discussions are designed to expose the inner workings of Hollywood and provide a framework for what it takes to succeed in the entertainment industry.

SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 345 | HOLLYWOOD HISTORY (FORMERLY DC 387) | 4 quarter hours (Undergraduate)

Students will gain a deeper appreciation of the history of the Hollywood film industry through behind-the-scenes access to working studios and theme parks, historical readings, presentations and discussions.

SCWR 346 | FILMMAKERS SEMINAR (FORMERLY DC 388) | 4 quarter hours (Undergraduate)

Each week, students will be given the rare opportunity to speak directly with some of the industry's biggest players. Hollywood directors, writers, cinematographers, editors, producers, agents, managers, entertainment lawyers, development executives and others will come to class, discuss their journeys, offer advice, and answer questions. The class will culminate with an industry mixer, where these professionals, along with dozens more, will join the students for a relaxed evening of networking. This is an invaluable opportunity for students to begin to form meaningful relationships that can help them as they transition from student to filmmaker. Note: Students must be participating in the DePaul LA program to be eligible to enroll.
SCWR 349 | STORYTELLING FOR VIDEO GAMES (FORMERLY DC 341) | 4 quarter hours  
(Undergraduate) 
This course examines the writer's role in the game development process and how storytelling conventions like character, conflict, and plot are utilized to enhance gameplay. Emphasis will be placed on building an understanding of game narratives, interactivity, and working with design teams. Students will develop a design document highlighting characters, locations, dialogue scripting, and overall gameplay for an original video game idea.  
SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 350 | WRITING THE SITCOM (FORMERLY DC 306) | 4 quarter hours  
(Undergraduate) 
This course focuses on the fundamentals of writing the half-hour situational comedy. Creating comedic characters, situations, and developing multiple storylines are covered. Students will create an original sitcom pilot.  
SCWR 250 is a prerequisite for this class.

SCWR 353 | WRITING THE EPISODIC DRAMA (FORMERLY DC 307) | 4 quarter hours  
(Undergraduate) 
This course examines the storytelling techniques necessary to write an hour long television dramatic series with an emphasis on characterization and structure. Students will create an original hour long pilot.  
SCWR 250 is a prerequisite for this class.

SCWR 354 | REWRITING THE ORIGINAL TELEVISION PILOT (FORMERLY DC 330) | 4 quarter hours  
(Undergraduate) 
This class focuses on practical ways to approaching the process of rewriting a script; specifically this class will focus on students' original television pilots. Through group workshops, lectures, readings, and assignments, students identify and improve problems in various areas of their teleplay including, but not limited to: plot, character development, dialogue and pacing. By the end of the quarter, students will have completed a full rewrite of their complete pilot script; therefore, students must possess a complete television pilot in order to enroll in the course.  
This course is repeatable.

SCWR 355 | THE WRITER'S ROOM (FORMERLY TV 302) | 4 quarter hours  
(Undergraduate) 
This course enables students to develop a television series in an advanced workshop setting modeled after a professional writer's room. Emphasis will be placed on pitching ideas, breaking story, and examining the various roles that make the writer's room a creative and dynamic environment.  
SCWR 352 or SCWR 353 is a prerequisite for this class.

SCWR 360 | WRITING THE INDEPENDENT TELEVISION SERIES  
(FORMERLY DC 328) | 4 quarter hours  
(Undergraduate) 
Students will study the conventions for writing and producing the independent television series, including concept and character development, narrative structure, story-world, budget constraints, and audience. Series of various styles and genres by creators with a diverse range of intersectional identities will be examined. Students will write an original, short-form, five-episode series.  
SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 361 | PRODUCING THE INDEPENDENT TELEVISION SERIES  
(FORMERLY TV 330) | 4 quarter hours  
(Undergraduate) 
This course is an immersive introduction to video production for the independent television series. Students learn how to produce a short-form, five-episode, independent series. The course covers the basic principles of directing, budgeting, financing, casting, hiring talent, scheduling, securing locations, shooting, creating safe, diverse, and inclusive sets, controlling continuity, and gathering social media artifacts for a series. Students learn the production process from idea execution through production.  
SCWR 360 is a prerequisite for this class.

SCWR 362 | MARKETING AND DISTRIBUTING THE INDEPENDENT TELEVISION SERIES  
(FORMERLY TV 309) | 4 quarter hours  
(Undergraduate) 
Students study online marketing and distribution models for independent television in order to develop and prepare to launch their own independent series or pilot. Topics covered include: platform options, social media outreach, participatory culture, the unique qualities of online communities, press kits, the role of film festivals, and shifts in digital exhibition and distribution.  
SCWR 361 or FILM 115 or CP 360

SCWR 365 | SHOWRUNNING I (FORMERLY TV 321) | 4 quarter hours  
(Undergraduate) 
This course provides an overview of the evolution of the Showrunner in network television, cable, and streaming media. Students will analyze how the success of a series is dependent on an astute Showrunner who knows how to handle the creative, financial, and managerial aspects of putting on a show. Emphasis will be placed on the vital role these executive producers play in the three stages of production to ensure the actualization and continuity of their artistic vision.  
SCWR 250 is a prerequisite for this class.

SCWR 366 | SHOWRUNNING II (FORMERLY TV 331) | 4 quarter hours  
(Undergraduate) 
This advanced course enables students to take on the role of the Showrunner for the packaging and preproduction of an original television or web series. Through hands-on exercises, students will use their creative sensibilities and business acumen to develop a viable show bible, style guide, budget and schedule for a self-produced production or as part of a network pitch package.  
SCWR 365 is a prerequisite for this class.

SCWR 370 | COMEDIC IMPROVISATION FOR FILMMAKERS | 4 quarter hours  
(Undergraduate) 
This course lays the foundation for successful improvisation in the current Chicago style, starting with the formation of the ensemble and exploring various elements of the creative process. Students experience what it means to be a part of a larger whole, create freely without self-judgement, and develop tools of play that will make them better communicators and filmmakers.  
SCWR 371 | COMEDIC IMPROVISATION FOR FILMMAKERS II | 4 quarter hours  
(Undergraduate) 
The essence of a good improvised scene is provided by strong character work. This course gives students a wealth of tools to create a variety of cinematic characters, each one driven by a unique perspective. They will continue to build on the fundamental skills of collaboration, play, and active listening while bringing more of themselves into their filmmaking.  
SCWR 370 is a prerequisite for this class.
SCWR 372 | COMEDIC IMPROVISATION FOR FILMMAKERS III | 4 quarter hours  
(Undergraduate)  
This advanced course focuses on the mechanics of the various forms that an improvised scene can take. Students learn to build off character and premise to develop a fully fleshed out scene with a strong comedic arc. Emphasis will be placed on breaking down the aesthetic devices that comprise a cinematic scene. SCWR 371 is a prerequisite for this class.

SCWR 373 | TOPICS IN COMEDY | 4 quarter hours  
(Undergraduate)  
This course features an in-depth study of comedy focusing on an aesthetic, history, or filmmaking method. Students will analyze the distinctive traits of the selected topic within the broader context of comedy film and television. Specific topics will be selected by the instructor and will vary with each quarter.

SCWR 374 | WHAT MAKES US LAUGH | 4 quarter hours  
(Undergraduate)  
This course examines the role that comedy and satire have played in the cinematic arts since the turn of the last century. Students will examine the comedic language in films and television shows, while understanding the context for the times in which they were made. SCWR 210 is a prerequisite for this class.

SCWR 375 | COMEDIC STORYTELLING | 4 quarter hours  
(Undergraduate)  
This course focuses on the most influential comedy writers from antiquity to today. Emphasis will be placed on the context for when these works were created, how they were received at the time, and how these pieces remain relevant. Students will immerse themselves in comedic structure and storytelling to build a frame of reference and to craft a distinct voice as a filmmaker. SCWR 374 is a prerequisite for this class.

SCWR 376 | COMEDIC VOICE | 4 quarter hours  
(Undergraduate)  
This course teaches students how to find and hone their comedic point of view through exploring how their experiences shape who they are. Through discussions and exercises, students create an abundance of ideas in order to refine their storytelling skills, develop their comedic voice, and pitch stories for a variety of formats. Students will then analyze the vital role of presentation of their original comedy concepts while mastering professional pitching techniques. SCWR 374 is a prerequisite for this class.

SCWR 377 | STAND-UP COMEDY | 4 quarter hours  
(Undergraduate)  
In this course, students will study and analyze stand-up comedy as a route to success in Film and Television. Students will learn about the history of stand up comedy and the comedians who parlayed success on the stage into success in television and films. Students will study the process of how comedians first created their material and honed/perfected it on stages around the world. Finally, students will mine their own lives for funny stories, creating original stand-up comedy routines (5 minutes), work-shopping them in class and eventually performing these routines on the Main Stage at Zanies Comedy Club.

SCWR 378 | Advanced Stand Up Comedy | 4 quarter hours  
(Undergraduate)  
Students will focus on developing an original comedy set and 5-10 minutes of original material connected conceptually and/or tonally; then taking it from stage-to-screen. Students will create and develop their material in class, perform in front of peers, and perform out at comedy clubs all in the service of crafting an original pitch for a longer project for the screen (web series, a TV show or movie). FILM 184 or SCWR 377 is a prerequisite for this class.

SCWR 379 | COMEDY, JOKE, AND SKETCH WRITING (FORMERLY DC 383) | 4 quarter hours  
(Undergraduate)  
Students will learn techniques and formulas for joke writing, writing sketch comedy packages, and writing for news driven comedy shows. Students will apply these skills to their existing scripts as well as to developing new material. SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 380 | COMEDY PRODUCTION | 4 quarter hours  
(Undergraduate)  
This course focuses on developing comedy filmmaking skills by refining the creative voice and technical proficiency. Students ideate, craft, and revise a short comedic script for production. This project then moves to the pre-production phase where emphasis is placed on casting, scouting, and crew collaboration to ensure continuity of the comedic vision. Principal photography, editing, and final delivery of this project will be completed in SCWR 382 Comedy Production III. SCWR 381 is a prerequisite for this class.

SCWR 381 | COMEDY PRODUCTION II | 4 quarter hours  
(Undergraduate)  
This advanced comedy filmmaking course focuses on the principal photography, editing, and final delivery of the project that originated in SCWR 381 Comedy Production II. Students will continue to hone their skills as directors, value the holistic fashion in which films are made by serving in different crew positions, and ensure the continuity of their comedic vision through the post-production workflow process. SCWR 381 is a prerequisite for this class.

SCWR 382 | COMEDY PRODUCTION III | 4 quarter hours  
(Undergraduate)  
This advanced comedy filmmaking course focuses on the principal photography, editing, and final delivery of the project that originated in SCWR 381 Comedy Production II. Students will continue to hone their skills as directors, value the holistic fashion in which films are made by serving in different crew positions, and ensure the continuity of their comedic vision through the post-production workflow process. SCWR 381 is a prerequisite for this class.

SCWR 385 | DIRECTING COMEDY FOR FILM | 4 quarter hours  
(Undergraduate)  
This course focuses on effective techniques for directing actors in comedy. Students will delve into text analysis, explore possibilities that reside within written works and craft comedic performances in scenes for film and television projects. Emphasis is put on effective casting, the importance of collaboration, and honing a unique point of view. DC 210 and SCWR 376 are prerequisites for this class.

SCWR 386 | DIRECTING COMEDY FOR FILM II | 4 quarter hours  
(Undergraduate)  
This course is an on-camera workshop with a focus on crew collaboration and directing screen performances with actors. Students will prep, cast, rehearse and direct select scene exercises, which will be edited to understand the holistic approach to comedy filmmaking. SCWR 385 is a prerequisite for this class.
SCWR 390 | TOPICS IN SCREENWRITING (FORMERLY DC 304) | 4 quarter hours
(Undergraduate)
Advanced study in screenwriting focusing on a specific genre each quarter such as: Science Fiction, Film Noir, Comedy, Action-Adventure, Nonfiction, etc. May be repeated for credit.
SCWR 100 or SCWR 101 is a prerequisite for this class.

SCWR 392 | TOPICS IN LA | 2-6 quarter hours
(Undergraduate)
This course features an in-depth study of an aesthetic, history, business or filmmaking method. Students will analyze the distinctive traits and application of the selected topic within the broader context of the film and television industry in Los Angeles. Specific topics will be selected by the instructor and will vary with each quarter.

SCWR 399 | INDEPENDENT STUDY | 4 quarter hours
(Undergraduate)
Variable credit. PREREQUISITE(S): Consent of dean.

SCWR 400 | FOUNDATIONS OF SCREENWRITING (FORMERLY DC 501) | 4 quarter hours
(Graduate)
Students begin their screenwriting journey with a strong foundation in the basic building blocks of solid, engaging storytelling. Students will mine their own lives in order to create memorable stories, characters, and settings. Films and other creative works analyzed in this class will reflect creators and stories from underrepresented groups, highlighting a wide range of diverse backgrounds and intersectional identities. Additionally, students will learn basic screenwriting skills such as character development, constructing atmosphere, and the fundamental components of a scene.

SCWR 401 | WRITING THE FEATURE I (FORMERLY DC 402) | 4 quarter hours
(Graduate)
This course focuses on creating a vetted concept and step outline for a feature length screenplay. Emphasis is put on idea origination and world building, forming engaging characters, and structuring an affecting plot with cause and effect storytelling. Through script readings, weekly assignments, and in-class workshops, students will hone their unique voice to craft the dramatic template for a cinematically viable story.

SCWR 402 | WRITING THE FEATURE II (FORMERLY DC 403) | 4 quarter hours
(Graduate)
This course focuses on completing the first draft of a feature length screenplay. Students will bring their vetted concepts to life on the page by focusing on a foundation of character, theme, structure, and plot. The lectures, in-class workshops, and weekly page deadlines are designed to culminate in a spec script that showcases the writer's voice and command of screenwriting conventions &nbsp.
SCWR 401 or SCWR 490 is a prerequisite for this class.

SCWR 403 | REWRITING THE FEATURE (FORMERLY DC 404) | 4 quarter hours
(Graduate)
This class focuses on rewriting the feature film screenplay. Through workshops and course discussions, students will learn how to identify missteps in their writing and develop a practical means to efficiently address these issues moving forward. Students must possess a complete feature length script to rewrite in order to enroll in the course. PREREQUISITE(S): None.

SCWR 405 | ADVANCED WRITING ON ASSIGNMENT (FORMERLY DC 408) | 4 quarter hours
(Graduate)
This course provides a framework for students to complete a feature length screenplay within specific parameters provided by the instructor in ten weeks plus an additional treatment that would complement their existing portfolio. Modeled after the techniques and deadlines of professional writing assignments, students learn how to meet the expectations of studio executives and producers without sacrificing their unique voice. PREREQUISITE(S): None.

SCWR 406 | THE ART OF SCENE WRITING (FORMERLY DC 445) | 4 quarter hours
(Graduate)
This advanced course asks students to move beyond convention in an effort to deconstruct the core elements of a scene: location, subject, conflict, and exposition. Through weekly lectures, writing exercises, and workshops we will examine a number of innovative screenwriting techniques to refine the writer’s unique voice and enhance the commercial viability of their work.

SCWR 407 | SCREEN ADAPTATION (FORMERLY DC 446) | 4 quarter hours
(Graduate)
This advanced course focuses on identifying and developing source material for the screen. Emphasis is placed on learning to negotiate the public domain when searching for material to adapt, as well as practical ways to acquire copyrighted material. Students will choose material from the public domain to adapt, and then formulate a logline, short pitch, treatment, and first act of a feature screenplay (or two acts of a teleplay).

SCWR 408 | WRITING THE SHORT MOTION PICTURE (FORMERLY DC 401) | 4 quarter hours
(Graduate)
In this screenwriting course students will study the essential elements and conventions of writing the short film, including character, structure, and conflict. They will examine the fundamental differences between feature and short films. Story development emphasis will be placed on compelling character-driven stories that can be produced on a modest budget. Students will be required to complete two short screenplays. PREREQUISITE(S): None.

SCWR 409 | CHARACTER DEVELOPMENT | 4 quarter hours
(Graduate)
This advanced course will explore creative methodologies geared at getting deeply into the minds and points of view of dramatic characters. Throughout the course, students will concentrate on one set of characters to refine an existing web series, feature film, or television pilot.

SCWR 410 | SCREENWRITING LAB (FORMERLY DC 444) | 4 quarter hours
(Graduate)
This course focuses on instructor led workshop sessions to help writers take existing projects (including but not limited to features, pilots, television specs, web series, short scripts) at various stages of development and provide a means to move forward. Story will be deconstructed, from concept to individual scene work, in an effort to craft a viable narrative for the screen. PREREQUISITE(S): None.
SCWR 420 | STORY STRUCTURES (FORMERLY DC 502) | 4 quarter hours  (Graduate)
Advanced critical analysis of multiple film structures beginning with a solid understanding of classically structured linear narratives told in three acts and ultimately exploring non-traditional feature film structures including but not limited to: ensemble, multiple protagonist, non-linear and episodic. Films will range from classic Hollywood films to contemporary independent films. Students will learn various theorists’ approaches to terminology (which may include Snyder, Field, Campbell, and Howard) in order to develop a language with which to discuss scripts and finished films, both other people’s work as well as in developing their own. PREREQUISITE(S): None.

SCWR 425 | GENRE STORYTELLING | 4 quarter hours  (Graduate)
This advanced course examines the dramatic conventions of genre storytelling in film and television. Through extensive script readings and discussions, students will deconstruct the common features of genre in an effort to discern audience expectations and develop a methodology for narrative innovation in their own work. In addition to evaluating films and series of varying genres, students will examine work by, for, and about a diverse range of intersectional characters and creators reflective of our communities.

SCWR 440 | DEVELOPING THE PITCH (FORMERLY DC 434) | 4 quarter hours  (Graduate)
In this course, students will create an inventory of new material for future writing projects by developing and pitching stories for independent and studio films, as well as cable, streaming, and network television series. Through lectures, guest speakers, and workshop exercises, we will analyze the vital role of pitching in the entertainment industry, and build a foundation to help students master professional pitching techniques. Students will seek to mine their own lives, using their diverse backgrounds, experiences, and identities to highlight their unique perspectives in the projects they pitch.

SCWR 441 | INDUSTRY AND PITCHING SEMINAR (FORMERLY DC 505) | 4 quarter hours  (Graduate)
Students will learn the art and craft of pitching including the differences between pitching new or existing ideas, shaping pitches based on your audience, and pitching a take on existing source material. Students will also learn not only how to pitch projects, but to pitch themselves, focusing on what makes them unique as a writer/director/producer, the themes that connect their work, and how to present themselves as a brand. Industry professionals will visit class (live or via Skype) when appropriate. Students will also learn how to create pitches for existing material that is either in the common domain or material that the students have acquired the rights to work on.

SCWR 442 | STUDIO DEVELOPMENT (FORMERLY DC 503) | 4 quarter hours  (Graduate)
This advanced course examines the development process that enables the screenplay’s journey from draft to screen. By crafting professional coverage and development notes, the class will deconstruct feature length scripts and student work in an effort to forge them into cinematically viable properties. The assignments and class discussions are designed to expose the inner workings of Hollywood and provide a framework for what it takes to succeed in the entertainment industry. Enrollment is only open to MFA students. PREREQUISITE(S): None.

SCWR 445 | HOLLYWOOD HISTORY (FORMERLY DC 487) | 4 quarter hours  (Graduate)
Students will gain a deeper appreciation of the history of the Hollywood film industry through behind-the-scenes access to working studios and theme parks, historical readings, presentations and discussions.

SCWR 446 | FILMMAKERS SEMINAR (FORMERLY DC 488) | 4 quarter hours  (Graduate)
Each week, students will be given the rare opportunity to speak directly with some of the industry’s biggest players. Hollywood directors, writers, cinematographers, editors, producers, agents, managers, entertainment lawyers, development executives and others will come to class, discuss their journeys, offer advice, and answer questions. The class will culminate with an industry mixer, where these professionals, along with dozens more, will join the students for a relaxed evening of networking. This is an invaluable opportunity for students to begin to form meaningful relationships that can help them as they transition from student to filmmaker. Note: Students must be participating in the DePaul LA program to be eligible to enroll.

SCWR 449 | STORYTELLING FOR VIDEO GAMES (FORMERLY DC 441) | 4 quarter hours  (Graduate)
This course examines the writer’s role in the game development process and how storytelling conventions like character, conflict, and plot are utilized to enhance gameplay. Emphasis will be placed on building an understanding of game narratives, interactivity, and working with design teams. Students will develop a design document highlighting characters, locations, dialogue scripting, and overall gameplay for an original video game idea.

SCWR 450 | TELEVISION GENRES AND ANALYSIS (FORMERLY DC 429) | 4 quarter hours  (Graduate)
The purpose of this class is to enable you to study scripted television from the professional’s point of view. The course involves critical analysis of successful scripted television shows, their narrative structures and themes. Programs of various genres and eras will be examined. Students will learn how to recognize basic structural elements in finished episodes. Students will develop a language with which to discuss television as well as a toolbox of techniques to use when creating television. Key concepts to be discussed include: basic structure, types of shows, character tropes, means of creating and sustaining tension, themes and advancements in form.

SCWR 451 | WRITING THE TELEVISION SPEC SCRIPT (FORMERLY DC 400) | 4 quarter hours  (Graduate)
In this class, students will learn the basic teleplay structures for both half-hour and hour-long television shows. Students will choose an existing show and write a spec episode, practicing the skills of matching character voice, structure, and tone.

SCWR 452 | WRITING THE SITCOM (FORMERLY DC 406) | 4 quarter hours  (Graduate)
In this course, students analyze half hour situational comedy teleplays. The course will feature a specific focus on story-telling styles and techniques of successful sitcom predecessors, various formats of sitcom teleplays, and methods for pushing original projects out into the world. Students will create an original sitcom pilot. SCWR 451 is a prerequisite for this class.
SCWR 453 | WRITING THE EPISODIC DRAMA (FORMERLY DC 407) | 4 quarter hours
(Graduate)
In this course, students analyze hour-long dramatic teleplays. This course features a specific focus on story-telling styles and techniques of successful dramatic predecessors, various formats of hour-long drama teleplays, and the definition and significance of “show bibles”. Students will create an original hour long pilot.
SCWR 451 is a prerequisite for this class.

SCWR 454 | REWRITING THE ORIGINAL TELEVISION PILOT (FORMERLY DC 432) | 4 quarter hours
(Graduate)
This class focuses on practical ways to approaching the rewriting of a script; specifically this class will focus on students’ original television pilots. Through group workshops, lectures, and readings, students will identify and improve problems in various areas of their teleplay including, but not limited to: plot, character development, dialogue, and pacing. By the end of the quarter, students will have completed a full rewrite of their complete pilot script; therefore, students must posses a complete television pilot in order to enroll in the course. This course is repeatable.
SCWR 452 or SCWR 453 is a prerequisite for this class.

SCWR 455 | ADVANCED WRITERS’ ROOM (FORMERLY DC 443) | 4 quarter hours
(Graduate)
This advanced course provides students the opportunity to develop a television series in a workshop setting modeled after a professional writers’ room. From Writer’s Assistant to Showrunner, we will examine the various roles that make the writers’ room a creative and dynamic environment. Students will pitch ideas, break story, and ultimately uncover strategies to running the room for a full season.

SCWR 460 | WRITING THE INDEPENDENT TELEVISION SERIES (FORMERLY DC 428) | 4 quarter hours
(Graduate)
Students will study the conventions for writing and producing the independent television series, including concept and character development, narrative structure, story-world, budget constraints, and audience. Series of various styles and genres by creators with a diverse range of intersectional identities will be examined. Students will write an original, short-form, five-episode series.
SCWR 400 is a prerequisite for this class.

SCWR 461 | WEB SERIES PRODUCTION | 4 quarter hours
(Graduate)
This course is an immersive introduction to video production for the web. Students learn how to produce a five-episode web series. The course covers the basic principles of directing, budgeting, financing, casting, hiring talent, scheduling, securing locations, shooting, controlling continuity, and gathering social media artifacts for a series. Students learn the production process from idea execution through production and will work in teams producing two web series.
SCWR 460 is a prerequisite for this class.

SCWR 462 | MARKETING AND DISTRIBUTING THE WEB SERIES | 4 quarter hours
(Graduate)
Students study online marketing and distribution models for web television in order to develop and implement the launch of their own series. Topics covered include: platform options, social media outreach, participatory culture, press kits, and the role of film festivals.
SCWR 461 is a prerequisite for this class.

SCWR 465 | SHOWRUNNING I | 4 quarter hours
(Graduate)
This course provides an overview of the evolution of the Showrunner in network television, cable, and streaming media. Students will analyze how the success of a series is dependent on an astute Showrunner who knows how to handle the creative, financial, and managerial aspects of putting on a show. Emphasis will be placed on the vital role these executive producers play in the three stages of production to ensure the actualization and continuity of their artistic vision.
SCWR 451 is a prerequisite for this class.

SCWR 466 | SHOWRUNNING II | 4 quarter hours
(Graduate)
This advanced course enables students to take on the role of the Showrunner for the packaging and pre-production of an original television or web series. Through hands-on exercises, students will use their creative sensibilities and business acumen to develop a viable show bible, style guide, budget and schedule for a self-produced production or as part of a network pitch package.
SCWR 465 is a prerequisite for this class.

SCWR 470 | IMPROVISATION FOR COMEDIC STORYTELLERS | 4 quarter hours
(Graduate)
This course focuses on building a foundation for comedy improvisation as it pertains to creating cinematic stories. Students will develop the skills to work in a collaborative environment steeped in the tradition of Chicago-style techniques and philosophies. Fundamental improvisational concepts such as give-and-take, surrender, support, mirror, explore-and-heighten, environment, object work, scenic structure, character and choices, will be explored in-depth and applied in scenes.
SCWR 471 is a prerequisite for this class.

SCWR 471 | IMPROVISATION FOR COMEDIC STORYTELLERS | 4 quarter hours
(Graduate)
Students delve into intermediate improvisation work with a focus on collaboration to identify premise, intention, point of view, and a character’s usable subtext in a scene. Emphasis is placed on adapting improvised creations into a foundation for film and television material.
SCWR 470 is a prerequisite for this class.

SCWR 472 | IMPROVISATION FOR COMEDIC STORYTELLERS III | 4 quarter hours
(Graduate)
This advanced course explores the intersection between improvisation and the screenwriting process. Emphasis will be placed on the structures that comedic moments can take, from joke construction through longer narrative forms. Students will develop basic concepts into polished written scenes and will revise using targeted improvisations.
SCWR 471 is a prerequisite for this class.

SCWR 474 | EVOLUTION OF COMEDY | 4 quarter hours
(Graduate)
This course examines the language, physicality, and structure of some of the most revered comedic films and television shows of all time. Students will analyze and discuss the conventions utilized in these works, how they influenced the era in which they were made, and what relevance they have to comedy filmmaking today.
**SCWR 475 | ADVANCED COMEDIC STORYTELLING | 4 quarter hours**  
*(Graduate)*  
This course immerses students in the great tradition of comedic literature and gives them a strong foundation in all its forms. Students will read works from the classic comedic authors’ canon: Shakespeare, Plutarch, Parker, Gay, Toole among others. Students will learn how these seminal works were created, how they were received by the public, and how they have influenced contemporary cinematic storytelling.  
**DC 501 is a prerequisite for this class.**

**SCWR 476 | THE BUSINESS OF COMEDY | 4 quarter hours**  
*(Graduate)*  
In this course, students explore the process of preparing to enter the professional marketplace as comedy writers. Emphasis will be placed on strategically evaluating the unique voice of existing projects for commercial viability, and curating a portfolio suitable for market demands and distribution trends.  
**SCWR 474 is a prerequisite for this class.**

**SCWR 477 | STAND-UP COMEDY | 4 quarter hours**  
*(Graduate)*  
In this course, students will study and analyze stand-up comedy as a route to success in Film and Television. Students will learn about the history of stand-up comedy and the comedians who parlayed success on the stage into success in television and films. Students will study the process of how comedians first created their material and honed/perfected it on stages around the world. Finally, students will mine their own lives for funny stories, creating original stand-up comedy routines (5 minutes), work-shopping them in class and eventually performing these routines on the Main Stage at Zanies Comedy Club.&nbsp.

**SCWR 478 | ADVANCED STAND-UP COMEDY | 4 quarter hours**  
*(Graduate)*  
Students will focus on developing an original comedy set; 5-10 minutes of original material connected conceptually and/or tonally;&nbsp; perform out at comedy clubs all in the service of crafting an original pitch for a longer project for the screen (web series, a TV show or movie).  
**SCWR 477 is a prerequisite for this class.**

**SCWR 479 | COMEDY, JOKE, AND SKETCH WRITING (FORMERLY DC 483) | 4 quarter hours**  
*(Graduate)*  
Students will learn techniques and formulas for joke writing, writing sketch comedy packets, and writing for news driven comedy shows. Students will apply these skills to their existing scripts as well as to developing new material.

**SCWR 480 | COMEDY FILMMAKING | 4 quarter hours**  
*(Graduate)*  
This introduction to film production focuses on collaboration, comedy and visual storytelling. Drawing on individual interests and observations, students produce a non-fiction short and then transition to developing a series of comedic narrative filmmaking exercises.  
**SCWR 476 is a prerequisite for this class.**

**SCWR 481 | COMEDY FILMMAKING II | 4 quarter hours**  
*(Graduate)*  
In this course, students refine their filmmaking skills by meticulously climbing through the stages of pre-production for their original short comedy film. Students ideate, craft, and revise their screenplay, then prepare for production by casting, scouting, budgeting, and rehearsing. Principal photography, editing, and final delivery of this project should be completed in SCWR 482 Comedy Filmmaking III.  
**SCWR 480 is a prerequisite for this class.**

**SCWR 482 | COMEDY FILMMAKING III | 4 quarter hours**  
*(Graduate)*  
In this advanced comedy filmmaking course, students will focus on the principal photography, editing, and final delivery of their original projects developed in SCWR 481 Comedy Filmmaking II. Reinforcing the importance of collaboration, students will work in different capacities on the projects of their classmates. Emphasis is placed on refining filmmaking skills and ensuring the continuity of the director’s comedic vision through the post-production workflow process.  
**SCWR 481 is a prerequisite for this class.**

**SCWR 490 | TOPICS IN SCREENWRITING (FORMERLY DC 405) | 4 quarter hours**  
*(Graduate)*  
Advanced study in screenwriting focusing on a specific genre each quarter such as: Science Fiction, Film Noir, Comedy, Action-Adventure, Nonfiction, etc. May be repeated for credit.

**SCWR 492 | TOPICS IN LA | 2-6 quarter hours**  
*(Graduate)*  
This course features an in-depth study of an aesthetic, history, business or filmmaking method. Students will analyze the distinctive traits and application of the selected topic within the broader context of the film and television industry in Los Angeles. Specific topics will be selected by the instructor and will vary with each quarter.

**SCWR 499 | INTERNSHIPS IN MEDIA AND DESIGN | 1-4 quarter hours**  
*(Graduate)*  
This is an internship/independent study course for graduate students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for the course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student’s internship.  
**PREREQUISITE(S): Internship. (variable credit)**

**SCWR 500 | WRITING FOR FILM THESIS DEVELOPMENT (FORMERLY DC 498) | 4 quarter hours**  
*(Graduate)*  
Students will develop a feature-length thesis project in preparation for writing the first draft of their thesis screenplay. The development process will include assignments designed to aid students in choosing their thesis project, fostering a strong personal connection to that project, creating compelling three-dimensional characters, and designing a clear, effective narrative structure for the screenplay. This course will culminate with a completed outline or treatment, and a pitch session with each student’s thesis committee.  
**SCWR 400 and (SCWR 451 or SCWR 401) are prerequisites for this class.**
SCWR 501 | WRITING FOR FILM THESIS I (FORMERLY DC 506) | 4 quarter hours (Graduate)
Students will complete an outline and first draft of their feature length screenplay. In a workshop environment, students will get extensive feedback from their instructor and peers.
SCWR 500 or SCWR 550 is a prerequisite for this class.
SCWR 502 | WRITING FOR FILM THESIS II (FORMERLY DC 507) | 4 quarter hours (Graduate)
Students will revise their thesis feature script. In a workshop environment, students will receive notes to help revise their project. Students will also be expected to meet with their thesis committee to receive additional notes to be applied to the rewrite.
SCWR 501 is a prerequisite for this class.

SCWR 550 | WRITING FOR TV THESIS DEVELOPMENT (FORMERLY DC 497) | 4 quarter hours (Graduate)
Students will select and then develop a television thesis project in preparation for writing the first draft of their thesis pilot. The development process will include assignments designed to aid students in choosing their thesis project, fostering a strong personal connection to that project, and creating compelling three-dimensional characters in a world or situation that will provide sustainable long-term conflict. The course will culminate with a completed show bible, an outline for the pilot, and a pitch session with each student's thesis committee.
SCWR 400 and (SCWR 401 or SCWR 402) are prerequisites for this class.

SCWR 551 | WRITING FOR TV THESIS I (FORMERLY DC 508) | 4 quarter hours (Graduate)
Students will complete a show bible, pilot, and future episode of an original television concept. In a workshop environment, students will get extensive feedback from their instructor and peers.
SCWR 500 or SCWR 550 is a prerequisite for this class.
SCWR 552 | WRITING FOR TV THESIS II (FORMERLY DC 509) | 4 quarter hours (Graduate)
Students will revise their television thesis scripts. In a workshop environment, students will receive notes to help revise their project. Students will also be expected to meet with their thesis committee to receive additional notes to be applied to the rewrite.
SCWR 551 is a prerequisite for this class.

SCWR 599 | INDEPENDENT STUDY | 1-8 quarter hours (Graduate)
Independent study form required. PREREQUISITE(S): Consent of instructor. (variable credit)

SCWR 701 | THESIS CONTINUATION | 0 quarter hours (Graduate)
Non-credit. Students admitted to MFA program who have completed all the required coursework and who are regularly using the facilities of the University for thesis production and/or post-production are required to be registered each quarter of the academic year until the thesis and defense have been completed. (0 credit hours)
FILM 510 or ANI 640 is a prerequisite for this class.

Finance (FIN)

FIN 202 | QUANTITATIVE REASONING | 2 quarter hours (Undergraduate)
This course is designed to provide students with an overview of basic statistical tools of financial analysis. Students will become familiar with the design and application of spreadsheet models for the analysis of financial data and tests of hypotheses. (2 quarter hours)
FIN 310 is a prerequisite for this class.

FIN 205 | LEARNING AND TEACHING FINANCIAL LITERACY | 4 quarter hours (Undergraduate)
Learn the fundamentals of financial literacy and teach these concepts to leaders of Chicago community groups that focus on helping limited-resource individuals.

FIN 250 | CAREER EXPLORATION & PROFESSIONAL DEVELOPMENT | 2 quarter hours (Undergraduate)
This course is designed to help students articulate specific goals and implement strategies to successfully pursue career opportunities and help develop a professional persona. Students will fine-tune their professional resume, begin to establish a personal brand, practice a variety of professional communications, and hone their interviewing skills. Students will participate in a variety of activities including lectures, assignments, and group collaboration.
Students must be intended or declared Finance majors to take this course.

FIN 251 | CAREER MANAGEMENT IN ACTUARIAL SCIENCE | 0 quarter hours (Undergraduate)
This course is designed to help you articulate your specific goals and implement strategies to successfully pursue opportunities as an Actuarial Science graduate and 21st century professional. You will fine-tune your professional resume, begin to establish your personal brand, practice a variety of professional communications, and hone your professional interviewing skills. Students will participate in a variety of activities including lectures, assignments, and group collaboration.
Status as a BSB Actuarial Science major or BS Actuarial Science major or BA/BS Math major with a concentration in Actuarial Science is a prerequisite for this class.

FIN 290 | FINANCE FOR NON-BUSINESS MAJORS | 4 quarter hours (Undergraduate)
This course will provide for non-business majors a foundation in the concepts and basic tools used in finance and financial management of the business firm, including time value of money, risk and return, interest rates and how companies raise money and reward their investors. Students will be able to understand at a basic level the financial statements, ratios and performance measures and financial markets and institutions they are likely to encounter in a general business environment. Students will also learn how to analyze and make more effective the operations of the firm from a financial perspective.
FIN 300 | FOUNDATIONS OF FINANCE | 4 quarter hours (Undergraduate)
This course provides a broad overview and introduces students to the logic, principles, institutions, and terminology of finance. The course is designed to familiarize students with the tools necessary for making sound financial decisions and provide a basic understanding of how finance relates to other business disciplines.
ACC 101, ECO 105 and MAT 137 are prerequisites for this class. MAT 137 may also be taken as a co-requisite. For Actuarial Science majors, the prerequisites are ACC 101, ECO 105 and MAT 150.
FIN 310 | INTRODUCTION TO FINANCE | 4 quarter hours (Undergraduate)
This course introduces students to the logic, principles, institutions, and terminology of finance. The goal of the course is to provide students with a basic understanding of the role of finance and its functions. It is designed to familiarize the students with tools necessary for making sound financial decisions, both at a personal level and at an enterprise level.
ACC 101, ECO 105, MAT 137 are prerequisites for this class. For Actuarial Science majors, ACC 101, ECO 105 and MAT 150 are prerequisites for this class.
FIN 311 | CORPORATE FINANCE | 4 quarter hours (Undergraduate)
The goal of the course is to provide students with the basic tools and theoretical background necessary to understand the corporate financial decision making process. Emphasis is on valuation principles with application to bonds, stocks, and capital budgeting as well as issues involving the capital structure, working capital, and dividend policy. A grade of C- or higher in FIN 310 is a prerequisite for this class.
FIN 313 | INVESTMENT BANKING | 4 quarter hours (Undergraduate)
This course is designed to provide students with an overview of investment banking, focusing on valuation, mergers & acquisitions, leveraged buyouts, and debt capital markets. The course is intentionally taught from a practitioner’s point of view, exposing students to various analytical tools and to a full appreciation of what is all required to complete an investment banking transaction. The course will foster collaboration skills through group case studies and presentations. A real world learning component designed to give students a true sense of working in an investment banking environment is integrated into the course.
FIN 333 is a prerequisite for this class.
FIN 315 | DATA ANALYTICS IN FINANCE | 4 quarter hours (Undergraduate)
Data analytics is transforming the field of finance. Firms can analyze internal data to optimize financial decision-making and investors can use sophisticated analytical tools to improve investment decisions. In the course, students will learn about this growing trend and how to use common software tools for analyzing data. The course provides experience in applying statistical models to financial data from a range of real-world cases. These skills will prepare students for the rapid evolution of data analytics in finance.
BUS 102 and FIN 310 are prerequisites for this class.
FIN 320 | MONEY AND BANKING | 4 quarter hours (Undergraduate)
The study of money and banking as a means to understanding how operations of our financial institutions affect functioning of our economic system and evaluation of monetary policies and goals.
ECO 106 and (a grade of C- or better in FIN 310 or a grade of A- or better in FIN 300) are prerequisites for this class.
FIN 323 | COMMERCIAL BANKING | 4 quarter hours (Undergraduate)
This course will analyze the role of commercial banks in the financial system and will focus on understanding what banks actually do, how they make money and how this has been changing over time, what risks they are exposed to and how they manage those risks. Students will learn how to analyze and evaluate banks’ financial statements, develop an appreciation for the complexity of risk in banking and the role and responsibility of regulators. The course will introduce students to banking case studies designed to take concepts learned and how to apply them to real world situations. This real world learning experience will revolve around a corporate credit risk analysis.
FIN 310 (C- or above) & FIN 320 are prerequisites for this class.
FIN 324 | BANKING & CREDIT ANALYSIS | 4 quarter hours (Undergraduate)
This course is designed to give students practical insight into the role commercial banks play in the global financial system through corporate credit intermediation. Specifically, the course is oriented to understanding the credit analysis and loan origination process a bank goes through in the extension of corporate credit as well as the resulting implications on risk mitigation, loan structuring and pricing. Students will gain industry analysis and technical finance knowledge, while significantly improving their financial analysis capacity and excel modeling. A real-world learning component designed to give students a true sense of working in a commercial banking environment is integrated into the course.
FIN 310 & (FIN 333 or ACC 304 or ACC 307) are prerequisites for this course.
FIN 330 | INVESTMENTS: THEORY & PRACTICE | 4 quarter hours (Undergraduate)
This course focuses on Investment principles and problems. It seeks to develop the student’s perception of risks and opportunities in investment instruments and markets. It will inform their description of the markets and the operational effects of current financial events upon the various markets.
A grade of C- or higher in FIN 310 is a prerequisite for this class.
FIN 333 | FINANCIAL STATEMENTS ANALYSIS | 4 quarter hours (Undergraduate)
FIN 311 is a prerequisite for this class.
FIN 335 | PORTFOLIO MANAGEMENT | 4 quarter hours (Undergraduate)
Theories and techniques to achieve superior selection and management of securities portfolios. Review and evaluation of significant literature. Problems of timing and strategies in response to changing economic and financial conditions.
FIN 330 is a prerequisite for this class.
FIN 336 | EQUITY RESEARCH | 4 quarter hours (Undergraduate)
This course focuses on developing the knowledge and skills critical for analyzing equities (stocks) including using Bloomberg, Excel, and Thomson ONE to conduct industry analysis, company analysis, basic financial modeling, and valuation to communicate a successful stock pitch.
FIN 330 is a prerequisite for this class.
FIN 340 | INTERNATIONAL FINANCE | 4 quarter hours  
(Undergraduate)  
The objectives of this course include: understanding the effect of political and economic factors on the financial decision-making of the firm, determining the major factors influencing currency value; analyzing and managing the spectrum of risks arising from a firm's international operations; and acquiring knowledge of the international financial system and the major players in that system.  
FIN 320 is a prerequisite for this class.

FIN 350 | REAL ESTATE ANALYSIS | 4 quarter hours  
(Undergraduate)  
This course introduces essential institutional, legal, regulatory, and financial aspects of real estate in the U.S. economy and financial system. The course incorporates demographic data for real estate market analysis and includes an exercise in land use planning.  
PREREQUISITE(S): Junior standing.

FIN 355 | GLOBAL IPOs & VENTURE CAPITAL | 4 quarter hours  
(Undergraduate)  
This course explores equity financing alternatives for young, innovative start-up companies, including their final funding step as a private company? their initial public offering (IPO), when they go public. These early-stage financial markets have been influenced by various economic systems and cultures around the world, and in turn there have been major cross-country differences in the motivation of and funding for innovation. This course has quantitative elements, but our focus will typically be on the analytics? on contract design, optimal regulation, balancing various risks and objectives, and structuring a deal to minimize conflicts of interest while optimizing incentives. A major focus of this course will be on why and how the venture capital industry developed, and how it funds and encourages innovation. This requires examining various economic and governmental systems and the incentives they provide for technological innovation and progress. Similarly, for IPOs, we will compare IPO markets and regulations in various countries, and explore how cultural and governmental systems have affected those markets. The IPO case studies will illustrate the three main IPO methods used around the globe.  
FIN 310 or FIN 300 is a prerequisite for this class.

FIN 365 | PRINCIPLES OF RISK & INSURANCE | 4 quarter hours  
(Undergraduate)  
This course surveys fundamental principles of risk, the risk management process, and insurance as a systematic approach to transfer and finance risk. It examines how insurance offers protection against major risks that firms and individuals face, how the insurance market is structured, and how and why the industry is regulated. This course also delves into theories and philosophies that provide insights into how the risk management industry functions in the larger society. Emphasis will be placed on understanding that insurance is just one of the techniques to be relied upon in planning a comprehensive risk management program.  
A grade of C- or higher in FIN 310 is a prerequisite for this class.

FIN 366 | FINANCIAL MODELING | 4 quarter hours  
(Undergraduate)  
This course will focus on the use of EXCEL in implementing financial theory to solve practical, real world problems in finance.  
FIN 311 and FIN 330 are a prerequisite for this class.

FIN 368 | INSURANCE INDUSTRY STRUCTURE & OPERATIONS | 4 quarter hours  
(Undergraduate)  
The course provides a study of the industrial organization of the evolving Insurance and financial services markets. Students are exposed to the structure, conduct and performance of the US and selected non-US markets. Students also develop an understanding of the state of captive developments and other alternative market participants.  
BLW 201, FIN 320, FIN 362, FIN 365, MAT 135, MAT 136 and MAT 137 are prerequisites for this class.

FIN 380 | CASES IN FINANCIAL DECISION MAKING | 4 quarter hours  
(Undergraduate)  
This is the capstone course for students majoring in Finance. The course applies the case study methodology to hone the student's analytical skills with applied finance issues, as well as to further develop verbal and written communication skills, the ability to work effectively within teams, and to engage in reasoned debate. This course will provide students the opportunity to apply and integrate the knowledge acquired in their previous finance courses.  
FIN 311 and FIN 330 are prerequisites for this class.

FIN 381 | BEHAVIORAL FINANCE | 4 quarter hours  
(Undergraduate)  
The primary objective of this course is to better understand investor behavior, return predictability in asset markets, and corporate decisions by considering behavioral aspects of decision making. We will discuss market efficiency, psychology of decision making, anomalies, investor behavior, limits of arbitrage, and behavioral corporate finance.  
FIN 310 is a prerequisite for this class.
FIN 393 | FINANCE INTERNSHIP | 4 quarter hours  
(Undergraduate)  
An academically supervised working experience in a major financial institution. Registration in this program requires approval of the department internship director.  
A grade of C- or higher in FIN 310 is a prerequisite for this class.

FIN 395 | INVESTMENT SEMINAR | 4 quarter hours  
(Undergraduate)  
Experience a rich learning and application opportunity focusing on financial investing. Learn methods to find the intrinsic value of a company's stock and explore catalysts that will increase the stock price. Make buy and sell recommendations for a 'live' portfolio.

FIN 330 is a prerequisite for this class.

FIN 396 | HONORS SEMINAR | 2 quarter hours  
(Undergraduate)  
This is a required course for all Honors Students in Finance. It is conducted on a year-long basis (Fall, Winter & Spring) for the benefit of the students in the program. Participants are required to attend all events sponsored by the class conductor. These include, but are not limited to, distinguished speakers series, networking luncheons, current topics forums, communications and protocol workshops, field trips and community service programs. All students are required to complete an empirical analysis paper, utilizing databases available to the department, as assigned by the seminar's conductor. (2 quarter hours)  
Status as an Honors Finance student is a prerequisite for this class.

FIN 397 | HONORS SEMINAR CONTINUATION | 0 quarter hours  
(Undergraduate)  
This is a continuation of FIN 396 Honors Seminar. Students register for FIN 397 during autumn and winter quarters. Participants are required to attend all events sponsored by the seminar's coordinator. These include, but are not limited to, distinguished speakers series, networking luncheons, current topics forums, communications and protocol workshops, field trips and community service programs. All students are required to complete an empirical analysis paper, utilizing databases available to the department, as assigned by the coordinator.  
Status as an Honors Finance student is a prerequisite for this class.

FIN 398 | SPECIAL TOPICS | 4 quarter hours  
(Undergraduate)  
Content and format of this course are variable. An in-depth study of current issues in finance. Subject matter will be indicated in class schedule.  
FIN 310 is a prerequisite for this class.

FIN 399 | INDEPENDENT STUDY | 4 quarter hours  
(Undergraduate)  
Available to students of demonstrated capability for intensive independent work in finance. (variable credit)  
Junior standing with at least 88 cumulative units is a prerequisite for this class.

FIN 400 | FOUNDATIONS OF QUANTITATIVE ANALYSIS | 0 quarter hours  
(Graduate)  
This course provides basic instruction in mathematical and statistical methods as a foundation for GSB 420 Applied Quantitative Analysis. This course will focus on strengthening students' algebra and calculus skills and provide basic instruction in statistical methods. (0 quarter hours)  

FIN 455 | PRINCIPLES OF FINANCIAL MANAGEMENT | 2 quarter hours  
(Graduate)  
This course provides an introduction to finance. The goal of the course is to provide students with the basic tools and the background necessary to understand and analyze the corporate financial decision-making process. The course is designed to familiarize accounting students with tools necessary for making sound financial decisions at the enterprise level. Topics covered include concepts in time value of money and their application to stock and bond valuation, capital budgeting, portfolio management, firm's capital structure, dividend policy, and derivative instruments. (2 quarter hours)  
Status as a graduate accountancy student is a prerequisite for this class.

FIN 501 | ETHICS IN FINANCIAL MARKETS | 4 quarter hours  
(Graduate)  
This seminar course will examine both ethical issues and conflicts of interest that face financial decision makers in today's business world. The class will feature case studies and guest speakers as the key teaching tools, supplemented by short lectures and student simulations/exercises. Each class period will be devoted to a different contest in which to consider topical issues. We will look at and discuss ethical issues facing financial services companies, corporates (both public and private), as well as not for profits. We will examine these issues, where applicable and relevant, from multiple perspectives: Board of Directors, Executive Management, Shareholders, Regulators, Suppliers and Customers, Competitors, Employees and Communities. Some of the discussion will purposefully consider the additional realities of differing culture and values in the international context.

FIN 523 is a prerequisite for this class.

FIN 512 | COMMERCIAL BANKING | 4 quarter hours  
(Graduate)  
The objective of this course is to analyze the role of commercial banks in the financial system in order to understand the problems and issues confronting bankers now and in the future. The student will learn to measure and evaluate bank performance; understand how banking firms make their money and how this has been changing over time; understand the management of assets and liabilities, the valuation of bank mergers and acquisitions, and how government policy influences the behavior of commercial banking firms. The course applies traditional finance and strategic management concepts to the management of financial institutions. The emphasis will be on developing a toolkit to solve problems not only in commercial banks but also in other financial services firms. The student will develop proficiency in relevant financial concepts, analytical frameworks, data analysis, and techniques in the field of financial economics. The course consists of a blend of lectures, discussions, and case studies.  
FIN 555 is a prerequisite for this class.
**FIN 513 | MONEY AND CAPITAL MARKETS | 4 quarter hours**  
*(Graduate)*  
This course analyzes interest rates, foreign exchange rates, federal funds futures market, the operation and regulation of financial institutions, and the impact of Central Bank actions on securities markets and the economy. The educational objective of the course is to provide graduate business students with the opportunity to acquire a thorough understanding of the theoretical and applied concepts that determine the operations of the money and capital markets. When you finish this course you will be able to demonstrate how the release of economic news about the real sector and the conduct of monetary policy influence the pricing of assets (interest rates and foreign exchange rates); measure and evaluate the impact of central bank actions on securities markets and the economy; understand the importance of having an independent central bank for macroeconomic performance; measure and evaluate the price volatility of interest-bearing securities; and understand how central bank monetary and regulatory actions can affect the stability and soundness of financial institutions. This course is designed to achieve maximum student involvement in order to add the greatest amount of value to their graduate educational experience. The emphasis will be on developing a toolkit to solve problems that financial analysts and other researchers encounter in security markets and financial institutions. We desire to become proficient in certain financial market concepts, analytical frameworks, data analysis, and various techniques in the field of financial economics. Accordingly, the course is structured to include extensive reading, several written statistical assignments, and class discussions that are based on the readings. These written assignments have three objectives: to make sure that the reading material has been absorbed in full measure; to serve as the foundation for class discussions; and, to provide students with the opportunity to demonstrate their understanding of the substantive class material and the ability to apply this material in "real world" situations.

**FIN 555 is a prerequisite for this class**

**FIN 523 | INVESTMENT ANALYSIS | 4 quarter hours**  
*(Graduate)*  
This course provides an introduction to capital markets and financial instruments with an emphasis on security valuation. It is not a course on personal investing. The course builds on FIN 555 and covers relevant aspects of fixed-income markets, asset pricing, portfolio management, equity markets, and derivatives markets. The course provides background material for both FIN 662 (Derivatives Valuation) and FIN 675 (Cases in Investments and Financial Engineering).

**FIN 555 is a prerequisite for this class**

**FIN 524 | FINANCIAL STATEMENT ANALYSIS | 4 quarter hours**  
*(Graduate)*  
This course provides an introduction to financial statement analysis from a global perspective by focusing on the International Financial Reporting Standards (IFRS). The emphasis is on the use of company financial reports to evaluate the historical, present, and prospective performance and financial soundness of a company for the purpose of financial decision-making.

**FIN 555 is a prerequisite for this class**

**FIN 525 | PORTFOLIO MANAGEMENT | 4 quarter hours**  
*(Graduate)*  
This course covers topics and techniques appropriate for institutional portfolio management. The course does not examine personal investment or personal portfolio management. The topics and readings are designed to be at the level of the portfolio management coverage in all the three levels of the CFA program.

**FIN 523 is a prerequisite for this class.**

**FIN 526 | ADVANCED TOPICS IN INVESTMENTS | 4 quarter hours**  
*(Graduate)*  
This course provides an understanding of several topics that are important to successful completion of the CFA examination. The course will focus on equity valuation including valuation of closely held companies, real estate valuation, venture capital, behavioral finance, hedge funds, distressed debt, commodity futures, and benchmarks. The course will proceed from simple valuation models to those used to value assets wherein daily mark-to-market accounting is not available (e.g., real estate, venture capital, etc.).

**FIN 523 is a prerequisite for this class.**

**FIN 528 | ALTERNATIVE INVESTMENTS | 4 quarter hours**  
*(Graduate)*  
Alternative investments are the fastest growing sector of the financial industry, and probably the least understood, including by many market professionals. Although the range of sophistication in people associated with alternative investments varies, it is more and more common to use them in investment strategies, either as direct investments, through funds of funds or structured products. The purpose of this course is to give students a good understanding and workable knowledge of the techniques that should be part of the toolkit of anyone investing in, analyzing and/or advising private and institutional clients on the inclusion of alternative investments in their portfolios. Because this course is geared for students wishing to pursue careers in Wealth Management or related fields, it will largely be taught from a practitioner’s point of view. Throughout the course we will pay special attention to capital market trends as they relate to the various investment vehicles we discuss. We will also turn our attention to corporate governance issues as they pertain to alternative investment strategies.

**FIN 523 is a prerequisite for this class.**

**FIN 530 | REAL ESTATE INVESTMENT AND FINANCE | 4 quarter hours**  
*(Graduate)*  
Analysis of real estate investment opportunities and the characteristics that distinguish them from other assets. Emphasis is upon forecasting cash flows and estimating risk. Case analysis is an integral part of the course technique.

**RE 527 or Completion or concurrent enrollment in FIN 555 is required**

**FIN 540 | CORPORATE GOVERNANCE | 4 quarter hours**  
*(Graduate)*  
This course is designed to intersect three areas of interest: (a.) Entrepreneurial Finance and Private Equity; (b.) Family and Closely Held Firms, and; (c.) International Finance with special emphasis on cross-border valuation and access to finance. The course is, by nature, a finance course that deals with ventures, family, and closely held firms in an international context. The core question behind GEF is: “How do entrepreneurial managers, family firms, closely held firms and those who finance them design and execute ventures that effectively match opportunities and resources in an international context?” An overreaching insight of the GEF course is that the notions of risk and reward are as important in privately held as in publicly held firms. In privately held firms, however, entrepreneurs and financiers are often forced to make assumptions based on incomplete data. The course will provide you with the tools necessary to value these ventures domiciled in countries around the world.
FIN 551 | PROBLEMS IN CORPORATE FINANCIAL POLICY | 4 quarter hours
(Graduate)
This course enables the student to apply the basic principles of corporate finance learned in FIN 555 and in FIN 553 to problems in corporate finance with the complexities encountered in practice. Through cases and discussion of topical issues, the course provides the student with an opportunity to analyze practical financial situations and problems. The course requires the student to be familiar with fundamental concepts such as valuation methods (WACC, Free Cash Flow and Capital Cash Flow, APV, Trading and Transaction Multiples), portfolio selection, CAPM, and analysis of capital structure. The course emphasis is sufficiently general so as to be of interest to a wide cross-section of students. At its most fundamental level, the course attempts to improve problem-solving skills that relate to problem definition, gathering and organizing the relevant information, developing feasible alternative courses of action, evaluating alternative choices, and recommending and defending the best course of action. In addition to analyzing specific problems or issues, the course will consider how these issues relate to the strategic objectives of the firm and examine the "big picture" assumptions that are used in the numerical calculations. FIN 553 is strongly recommended.
FIN 555 is a prerequisite for this class.

FIN 552 | HEDGE FUND MANAGEMENT | 4 quarter hours
(Graduate)
This is an experiential course focusing on investment analysis in the context of the hedge fund industry. The goal of this class is to give students working knowledge of the hedge fund industry by drawing upon the experience of simulated investment presentations to portfolio managers (in the classroom setting). It is designed to give students rigorous exposure to long/short equity strategies as a gateway to explore other fund strategies. Topics will include securities analysis, research strategies, short selling and portfolio management. The course will help students generate superior investment ideas by conducting creative, value-added research. Students will act as hedge fund analysts by working through the investment process: idea generation, analysis, and presentation, and should walk away with a working knowledge of the hedge fund industry.
FIN 553 is a prerequisite for this class.

FIN 553 | ADVANCED CORPORATE FINANCE | 4 quarter hours
(Graduate)
This course builds on FIN 555 and focuses on fundamental themes in corporate finance. Topics covered include the analysis of capital investments, valuation methods, cost of capital, real options, agency costs, corporate governance, payout policy, equity issues, hybrid forms of financing, and mergers and acquisitions. The main theme of the course is on valuation and the overall focus is on enhancing enterprise value. The course also uses several case studies to illustrate the application of finance theory to practical problems.
FIN 555 is a prerequisite for this class.

FIN 555 | FINANCIAL MANAGEMENT | 4 quarter hours
(Graduate)
This course provides an introduction to concepts and techniques required to analyze and implement optimal financial decisions by firms and serves as the core course in the graduate finance curriculum. The course focuses on the effect of time and uncertainty on investment and financing decisions. It develops a framework for corporate financial decision-making. Topics covered include basic discounting techniques, stock and bond valuation, capital budgeting, portfolio theory, asset pricing, and capital structure. The course uses several case studies to illustrate the application of finance theory to practical problems. (ACC 500 or ACC 502 or equivalent) and (GSB 420 or GSB 519 or equivalent) are prerequisites for this class.

FIN 557 | INTERNATIONAL FINANCE | 4 quarter hours
(Graduate)
This course examines the effect of political and economic factors on the financial decision-making of the firm. The objective of the course is to enable the student to i) utilize the knowledge of the determinants of currency values, and the mechanism through which they work, to forecast changes in currency values ii) to analyze and manage the spectrum of risks arising from a firm's international operations and iii) to be familiar with how the international financial system works and with the major players in the system.
FIN 555 is a prerequisite for this class.

FIN 558 | MERGERS AND ACQUISITIONS | 4 quarter hours
(Graduate)
The course provides an overview of common corporate restructuring strategies and the economic motives for undertaking them. Topics covered include mergers, acquisitions, friendly and hostile takeovers, financial re-capitalization, leveraged buyouts, management buyouts, going private, convertible securities, tracking-stock, spin-offs, splits-ups, carve-outs and reorganization under bankruptcy, liquidation, and out-of-court restructuring. The course integrates corporate governance and agency dimensions, financial and strategic management aspects, and legal and accounting considerations into a unified framework. This framework is then used to investigate issues such as pre-merger planning, fact-finding, accounting and tax implications, anti-trust problems, post-merger integration, and the short-term and long-term shareholder wealth consequences of financial and organizational restructuring transactions. The course examines transactions that significantly affect a corporation's assets, liabilities, and/or equity claims. Transactions will be examined from the perspectives of both the corporation (e.g. CFO and CEO) and the capital markets (e.g. investors). Common "arbitrage" trading strategies involving corporate transactions will also be discussed. A basic understanding of financial options and pricing is recommended.
FIN 555 and (FIN 551 or FIN 553) are prerequisites for this class.

FIN 559 | SUSTAINABLE VALUE CREATION | 4 quarter hours
(Graduate)
This course examines how firms create and sustain value over time. The course explores environmental/social sustainability issues as real business risks through analysis and discussion of current events and case studies. The course begins with an introduction to financial statements and the data they contain to inform investors about a firm's financial position and value to investors. We then examine how common environmental/social sustainability issues and solutions impact firm value. Finally, we look beyond firms to the impact on public and private resources as firms seek to create sustainable value.
This course examines risk management from a broad enterprise perspective by focusing on the various risks faced by a firm. The course covers various methods that can be used to minimize risk and its effect on firm value.

FIN 555 is a prerequisite for this class

FIN 565 | PRINCIPLES OF RISK AND INSURANCE | 4 quarter hours
(Graduate)
This course will provide students with an over view of the insurance industry and a foundation in the areas of property, casualty, and life insurance. Students will have a firm grasp of how insurance firms are able to meet their obligations while creating value for their stakeholders.

FIN 555 is a prerequisite for this class

FIN 566 | RISK MANAGEMENT MODELING | 4 quarter hours
(Graduate)
This course will use mathematical techniques via EXCEL to identify various risks and exposures affecting enterprises. Then, students will apply solutions that mitigate and control the risks and exposures as identified.

FIN 555 is a prerequisite for this class

FIN 571 | FINANCING NEW VENTURES | 4 quarter hours
(Graduate)
This course will focus on identifying, examining and evaluating various sources of original and growth capital. Emphasis will be on legal, financial and tax issues related to capital formation as well as specific problems experienced by the small-to-medium-sized firm undergoing rapid growth. Topics discussed will include financing startups, financial planning and strategy, going public, selling out and bankruptcy. A formal proposal for capital acquisition developed through field research will be required of each student. Cross-listed with MGT 571.

FIN 555 is a prerequisite for this class

FIN 581 | BEHAVIORAL FINANCE | 4 quarter hours
(Graduate)
After the development in the last four decades, Behavioral Finance has become an integral part of the toolkit that is essential for a successful career in any finance-related field: asset management, investment banking, corporate finance, finance-related policy work, among others. The traditional framework for thinking about financial markets assumes that all market participants are fully rational. The past four decades, however, have witnessed the emergence of an important new paradigm, behavioral finance, which argues that many financial phenomena are the result of less than fully rational thinking. In this course, we will cover the building blocks of behavioral finance: limits to arbitrage and psychology. Then, we will move on to applications to individual investor behavior, financial markets, corporate finance and policy. (Prerequisite: FIN 555)

FIN 555 is a prerequisite for this class

FIN 582 | THE PSYCHOLOGY OF FINANCIAL MARKETS | 4 quarter hours
(Graduate)
This course examines the structure and dynamics of asset prices in world financial markets from the perspectives of research in behavioral finance, portfolio management, and macroeconomic policy. Some prior learning in finance (preferably investments), economics and statistics, and a broad interest in the social sciences (psychology; sociology; history) are required. The course has use for investors and their advisors, as well as for anyone interested in financial history. Class discussions are based on academic research and accepted wisdom.

FIN 555 is a prerequisite for this class

FIN 583 | BEHAVIORAL ASPECTS OF CORPORATE FINANCE | 4 quarter hours
(Graduate)
This course examines selected aspects of investment and financing decisions made in corporations as well as some questions of corporate governance and organizational architecture. The course places special emphasis on corporate decision processes, i.e., on the psychological, sociological and organizational determinants of behavior (e.g., bureaucracy, management fads, or executive hubris). Class discussions are based on academic research.

FIN 555 is a prerequisite for this class

FIN 595 | INVESTMENT SEMINAR I | 4 quarter hours
(Graduate)
The Investment Seminar is intended to provide a rich learning and application opportunity focusing on financial investing. The learning module comes about through the fusion of academic knowledge gained from advanced courses in investments and corporate finance with the actual practice of analyzing securities and making and defending buy and sell recommendations for a "live" portfolio. Students taking the course are paired with executives from top financial firms and will present stock recommendations at company headquarters. The course is unique to collegiate business education and provides a definite competitive education and provides a definite competitive edge in the job market.

FIN 555 is a prerequisite for this class

FIN 595-2 | INVESTMENT SEMINAR II | 0 quarter hours
(Graduate)
This course is a continuation of FIN 595. The Investment Seminar is intended to provide a rich learning and application opportunity focusing on financial investing. The learning module comes about through the fusion of academic knowledge gained from advanced courses in investments and corporate finance with the actual practice of analyzing securities and making and defending buy and sell recommendations for a "live" portfolio. Students taking the course are paired with executives from top financial firms and will present stock recommendations at company headquarters. The course is unique to collegiate business education and provides a definite competitive education and provides a definite competitive edge in the job market.

FIN 595 is a prerequisite for this class.

FIN 617 | TOOLS OF FINANCIAL ANALYTICS | 4 quarter hours
(Graduate)
This course provides the student with a comprehensive introduction to the mathematics of finance. The course will focus on applying mathematical concepts, quantitative tools, and modeling techniques to practical problems encountered in finance.

FIN 660 | IPOs AND VENTURE CAPITAL | 4 quarter hours
(Graduate)
In IPOs and Venture Capital, we will explore equity financing alternatives for private companies, including their final funding step as a private company: their initial public offering or IPO, when they go public. Unlike many finance classes, this is not primarily a quantitative course. While there are some quantitative elements, the focus will typically be on the analytics: on contract design, optimal regulation, balancing various risks and objectives, and structuring a deal to minimize conflicts of interest and optimize incentives. Our focus will be largely on the U.S., but we will also cover fund-raising methods and options in other countries. We will work in part from Harvard Business School Case Studies. This course should be useful for those interested in investment banking, venture capital, private equity, or securities law, or those who hope to have a start-up of their own someday.
Focus Area (FA)

FIN 662 | DERIVATIVES VALUATION | 4 quarter hours  
(Graduate)  
This course focuses on the theory and practice of the valuation of derivative securities such as forward contracts, futures contracts, swaps, and options. The course also examines the underlying properties of each of these instruments and their use in managing the various risks faced by market participants.  
FIN 523 and FIN 555 are prerequisites for this class.  
FIN 675 | CASES IN INVESTMENTS AND FINANCIAL ENGINEERING | 4 quarter hours  
(Graduate)  
This course primarily uses case studies to illustrate the application of concepts learned in Fin 523 (Investment Analysis) and in Fin 662 (Derivatives Valuation). The topics covered in the course include the term structure of interest rates, portfolio management, asset pricing, and market efficiency; portfolio performance evaluation; option pricing; management of interest-rate risk, credit risk, foreign-exchange risk, and liquidity and basis risk with options, forwards, futures, and swaps; and enterprise risk management. The course will hone the student’s analytical and writing skills through group analyses of case studies and preparation of (case) write-ups.  
FIN 523 and FIN 555 and FIN 617 and FIN 662 are prerequisites for this class.  
FIN 676 | CASES IN RISK MANAGEMENT | 4 quarter hours  
(Graduate)  
This course addresses the overall role that internal audit plays as a critical part of an organization’s risk control and governance structure. Internal risk management systems and metrics are examined in detail. Compliance with these risk parameters are examined from the perspective of the Chief Risk officer, the Board of Directors, and the Chief Executive Officer.  
FIN 566 is a co-requisite for this class.  
FIN 719 | EQUITY RESEARCH | 4 quarter hours  
(Graduate)  
This course focuses on developing the knowledge and skills critical for analyzing equities (stocks) including using Bloomberg, Excel, and Thomson ONE to conduct industry analysis, company analysis, basic financial modeling, and valuation to communicate a successful stock pitch.  
FIN 555 is a prerequisite for this class  
FIN 793 | INTERNSHIP | 4 quarter hours  
(Graduate)  
Knowledge acquired in the classroom is applied in an actual business environment through varied theoretical and basic assignments under supervision in industry, government or public finance.  
FIN 798 | SPECIAL TOPICS | 4 quarter hours  
(Graduate)  
Content and format of this course are variable. In-depth study of current issues in finance. Subject matter will be indicated in class schedule. Offered variably.  
FIN 799 | INDEPENDENT STUDY | 4 quarter hours  
(Graduate)  
Available to graduate students of demonstrated capability for intensive independent work in finance.

FA 110 | ESSENTIALS OF TRAINING AND DEVELOPMENT | 2 quarter hours  
(Undergraduate)  
This is a 5-week, 1-competence course on Employee Training and Development. Students will learn the basic processes of employee training and development, including needs assessment, theories of learning and behavior change, training design to support appropriate selection or development of training, delivery of training, issues of transfer, and assessment of results. (2 quarter hours)  
FA 120 | ESSENTIALS OF COACHING | 2 quarter hours  
(Undergraduate)  
Effective coaching has long been recognized as a key element of success in the world of sports. More recently, a new breed of coaches has emerged to help people transform their personal and professional lives. In this course, we will explore the theories, concepts, and techniques of personal life and business coaching. Students will learn about the history of coaching, its uses in personal and professional development and practical applications. Working individually, in pairs, and in small groups, students will practice coaching skills and keep a detailed learning journal. This course will be highly experiential and collaborative in nature. Students will learn concepts of coaching for personal development and professional effectiveness. In addition, students will learn models of collaborative learning and will apply one recognized model in the exploration of their coaching practice in the course. (2 credit hours)  
FA 199 | CAREER ASSESSMENT AND PLANNING | 2 quarter hours  
(Undergraduate)  
In this course, students use structured analysis and reflection, research and planning to create a professional development portfolio. Students learn strategies for reflecting, assessing strengths and growth opportunities, identifying support systems and agents, practicing smart goal setting, and attaining goals. Opportunities to return to this portfolio will be built into the major courses for purposes of ongoing assessment, reflection and planning.  
FA 208 | SALES AND MARKETING MANAGEMENT FOR BUSINESS TODAY | 2 quarter hours  
(Undergraduate)  
Sales Management is one of the most important jobs in business today. It is the focal point for managing customer relations, and is critical for sustaining profitability and growth. It draws on a broad spectrum of skills and offers many desirable career paths for both entry level as well as experienced workers. Sales Management techniques are applicable in a wide variety of business settings, and the basic framework and details apply in all of them. The purpose of this course is to present a practical, contemporary framework for Sales Management. It starts with basic sales analysis techniques for determining company position in the market. From there it explores modern sales techniques for facilitating the customer’s buying decision. It then covers the major Sales Management job functions, such as Territory Management and Sales Training. The course concludes with a discussion of leadership and psychological skills that make for Sales Management excellence. Students will learn Sales Management via course lectures, textbook reading, Internet searches and independent research on the company they work for. (2-4 quarter hours)
Entrepreneurial Accounting is a thorough coverage of financial and management accounting topics in an economically challenging business environment. Clear principles and procedures are used to demonstrate the complete accounting cycle in any type of organization: For-Profit or Non-Profit. General purpose financial statements are prepared and examined from a fundamental understanding of how-for-profit and non-profit businesses operate in a dynamic and changing business marketplace. Specifically, the reach of this course will be on a global environment that is characterized by a high degree of uncertainty. We will examine a variety of accounting challenges faced by business from an international perspective. This will have important implications on the way a company becomes more competitive and thus profitable. As such each of you will be assigned a company on day one of class to manage through a series of accounting dilemmas often both inside and outside our borders. As you acquire the requisite skills (throughout the term) to meet those challenges you’ll execute decisions that will change the management course of the company. It is through this individual decision making that you’ll learn what works and what doesn’t and why. This is not a static accounting course. Your decisions will have an impact on the direction of the company. We will also cover a series of topics that will enhance your understanding of financing techniques and options through detailed ratio-analysis. This will advance your ability to understand and seek creative financing for any ideas you might have in the future. This is essential if you have that entrepreneurial spark that just needs some financial backing and support to get started. As this is an accounting course we would expect some proficiency in basic quantitative /mathematical ability. You should also be able to use a calculator reasonably well. (2-4 quarter hours)
FA 269 | ENTREPRENEURSHIP: HOW TO FIND AND FUND YOUR DREAM | 2 quarter hours
(Undergraduate)
Did you know that 90% of new restaurants are doomed to fail? Have you always wanted to be your own boss? Are you presently conducting a small business from your garage that you’d like to make bigger and more profitable? Who makes a great entrepreneur? Are businesses easier to manage in the age of technology? In this course, Students will learn how to identify an appropriate small business for their talents and time restrictions. Learners will also consider methods of financing their dream work lives, and review the pit falls awaiting new businesses in today’s economic climate. Students need not have a business in mind, but must be willing to consider how they might go about putting together a plan for a successful venture. Ideas about the definition of business in modern society, of entrepreneurship, about the psychological make up of the successful small business owner, and about the long term view for small businesses will also be covered. (2-4 quarter hours)

FA 270 | STARTING UP AND RUNNING YOUR OWN BUSINESS | 2 quarter hours
(Undergraduate)
This course will help students learn how to start and operate an independent business enterprise. We will address entrepreneurship, defining your markets, accounting basics, business plans, financing, establishing the business, hiring employees, business equipment, software, and marketing. Through readings, discussion, and home assignments, students will learn how to increase the probability of reaching their business goals while minimizing risks and costs. By applying management, financial, and software concepts and practices, students will have the knowledge to start and run a new business. (2-4 quarter hours)

FA 288 | MARKETING FOR THE SOCIAL GOOD | 2 quarter hours
(Undergraduate)
This is a ten week course on the nonprofit and public organizational issue of social marketing. Generally social marketing techniques are used to influence individuals, or groups to change their behavior in order to improve a social good such as: individual health, the environment, and the community. Students will develop an appreciation for the principles of social marketing and will be taught the techniques for conducting social marketing programs. Students will also learn how to develop social marketing plans and meaningful promotions, including utilizing imagery/art to understand and create advertisements. (2-4 quarter hours)

FA 300 | PROJECT MANAGEMENT | 2-4 quarter hours
(Undergraduate)
Project Management is a business concept which has received a great deal of attention over the last few years. Business managers are discovering that the complexity of human and technological systems forces workers to organize, prepare, and monitor project development in a way which was not necessary in simpler times. In this course, students will discuss and discover methods of project organization and execution which will help them achieve efficacy and success in the workplace. This course will cover concepts in describing project goals, setting priorities, identifying needs, and designing realistic time lines. Students will learn how to execute successful projects from start to finish. (2-4 quarter hours)

FA 301 | EFFECTIVE LEADERSHIP IN A CHANGING PROFESSIONAL ENVIRONMENT | 2 quarter hours
(Undergraduate)
In this leadership course, students will use readings, behavior/trait surveys, and case studies to understand leadership theories and models. Participants will learn to create, establish, and reinforce cultural rules of engagement designed to increase communication effectiveness and get the most out of the current human dynamic in their respective environments. Understanding these various leadership models allows students to reflect on their own style in today’s culturally changing environments. (online) (2 credit hours)

FA 302 | PROJECT MANAGEMENT: DESIGN AND ASSESSMENT | 2 quarter hours
(Undergraduate)
Project Management is an important discipline that can benefit students in their careers as well as personal life. This course will explore project management methodologies, their common steps and tools. The course translates Project Management theory into a practical and effective methodology, starting with working definitions of Project and Project Management, the course examines project initiation, evaluation and organization using analytic techniques such as discounted cash flow and PERT/CPM. In addition, the course examines project execution and control, along with the documentation and communications skills needed to keep a project on track. The course concludes with an overview of project management applied to computer information systems development. (2 quarter hours)

FA 304 | ADVANCED PROJECT COURSE | 4 quarter hours
(Undergraduate)
The main purpose of this course is to guide you through the various steps involved in designing and carrying out an Advanced Project (AP) on a subject that is related to your particular focus Area (FA). Whether you want to address a practical problem or a theoretical question, in this course you will be guided through the process of investigating a problem or issue in depth, and establishing clear links between the definition of the problem or issue, discussion of conceptual issues, methods of investigations, analysis of findings, and practical applications. Successful completion of the Advanced Project will satisfy the F-11 and F-12 competences. This course satisfies a residency requirement. LL 300 is a prerequisite for this class. This class is not open to BAC students.

FA 310 | GENDER IN BUSINESS AND LEADERSHIP | 2 quarter hours
(Undergraduate)
Women's work is never done. Not only are women mothers and wives, but these days the expectation is that women will take on leadership roles outside the home as well. What makes a woman a leader? How did the workplace differ when women were not corporate leaders? Who are today's prominent female leaders and how are they shaping our future? In this course, learners will study the lives and contributions of various important women from business, politics, and social action. Students will assess equality in management and leadership, the psychological make up of the woman leader, and the ways in which women's contributions to leadership differ from men's. Furthermore, the class will endeavor to define leadership, its consequences, and its personal ramifications. Students should expect to read extensively about the lives and characteristics of contemporary women who have surfaced in leadership roles. Learners will also identify women leaders in their own workplaces and communities and assess their involvement in the corporation and/or general public. (2-4 quarter hours)
Change management is a common term for all the processes, skills and practices used to prepare individuals, managers, and leaders to implement organizational changes. Simply put managing change, although difficult, is about the people side of change. Over this 5-weeks course theories, practices, and people management skills that are the foundation of sustainable change will be studied. The course emphasis is on deepening SCPS students’ understanding of the challenges and opportunities associated with being an effective change advocate and creating successful change outcomes. (2 credit hours)

**FA 318 | UNDERSTANDING FINANCIAL STATEMENTS | 2 quarter hours** (Undergraduate)

Business managers as well as investors must have a basic understanding of financial statements as not only a management tool but also as a way of communicating the financial and operational well-being of a company. This course teaches students the essential elements of financial statements, their interpretation and their impact on investors and society. This is a particularly important topic and skill in light of the recent corporate financial reporting scandals plaguing Wall Street and the nation. (2-4 quarter hours)

**FA 325 | CONNECTING THOUGHT AND BEHAVIOR | 2 quarter hours** (Undergraduate)

This course introduces students to concepts of Cognitive Psychology. They will review the history and development of the field and explore how cognitive processes impact thought and behavior. Through an experiential learning process, students will explore the science behind such topics as perception, consciousness, memory, language, problem solving, reasoning and emotional experience and how these cognitive abilities impact their lives. (2-4 quarter hours)

**FA 330 | PROFESSIONAL COMMUNICATION IN THE WORKPLACE | 2 quarter hours** (Undergraduate)

This course provides an overview of the fundamentals of professional writing. Through engaging in and reflecting upon a variety of professional writing tasks, you will learn the rhetorical theory and practice necessary for effective written communication in professional contexts. (online) (2 credit hours)

**FA 334 | HUMAN RESOURCE AND TALENT DEVELOPMENT FUNDAMENTALS FOR MANAGERS | 2 quarter hours** (Undergraduate)

This course is designed as an introduction to the practices of human resources (HR) in a corporate environment. It will target the practices that managers need to know such as recruiting, training, hiring, and terminating employees as well as the basics of HR law. Additional content that will be addressed includes headcount management, performance appraisals, learning & development, compensation basics, and grievance processes. This course will equip managers with the information they need to know without making them Human Resource experts but rather how to work effectively with their HR counterparts. (2-4 hours)

This overview course in risk management will introduce managers to the various types of risk that needs to be managed in the workplace. Numerous areas such as operational risk, market risk, global risk, and customer risk will be investigated. While this course is not to create students who will be experts in risk management this course will allow them to identify and analyze areas of potential risk to the assets of their organization. Students will use case studies to ensure that proper communication happens for key risks within the organization. (2-4 hours)

**FA 340 | IMPLEMENTING CORPORATE TRAINING PROGRAMS | 2 quarter hours** (Undergraduate)

In this course, students will learn about the strategic process of effectively and efficiently implementing a corporate training program based on business drivers from design stages through measurement of results. This process includes defining requirements and success criteria, designing the process, implementing and powerful communicating the program to the learners, and then understanding how to measure the success of the program. It is imperative to measure and report on the trends of the program and to understand why it is important. Using methodology and models that have been successful in numerous global and domestic companies, students in this course will create their own plan for implementation, communication, and measurement to ensure success in their future training program implementations. (2-4 quarter hours)

**FA 359 | ETHICAL BUSINESS BEHAVIOR | 2 quarter hours** (Undergraduate)

Ethical Business Behavior explores the ethical issues that business decision-makers face and examines the moral principles that are used to help resolve these issues. Ethical decisions in the workplace can have tremendous influence on the individuals and the corporations involved. The outcomes of unethical behavior can affect reputations, trust and career path. Results have been as severe as loss of employment, physical harm to individuals, corporate bankruptcy and even impacts to the economy. Students are placed in decision-making roles through exercises, case studies and role-playing. Reasoning skills are honed through identification of ethical issues and alternative means to analyze these issues. Ethical behavior is evaluated using analytical skills to apply ethical concepts to business situations. (2-4 quarter hours)

**FA 387 | AFRICAN-AMERICAN STUDIES IN CRITICAL PERSPECTIVE | 2 quarter hours** (Undergraduate)

This interdisciplinary 19th and 20th century African-American studies course examines the role of protest and resistance, the media, and cultural and artistic expression in African-American history. Vis-à-vis readings, documentaries, and discussion, the course intends to illustrate the multiple ways in which African-Americans have protested and resisted oppression while examining how such efforts have been framed in the media during varying historical eras. It defines ‘media’ broadly and analyzes its role, both via its traditional forms (print, television and radio) but also vis-à-vis other forms of entertainment/infotainment that were particularly unique to 19th century U.S. society (i.e. minstrelsy [1830-1920]). The course concludes with a discussion of the role of art and culture in refashioning thinking and transforming experience. The latter discussion promises to be rich and thought provoking and unearths some of the works of the raw and revolutionary artists of the 1960s while taking a careful look at novel cultural practices that emerged during this period.
French (FCH)

FCH 101 | BASIC FRENCH I | 4 quarter hours (Undergraduate)
First quarter of beginning French. Listening, speaking, reading and writing French in a cultural context for the beginning student. This course is an introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and Francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

FCH 101S | BASIC FRENCH I FOR SUMMER | 6 quarter hours (Undergraduate)
(Covers the equivalent of FCH 101 and the first half of FCH 102.) The first half of beginning French. Listening to, speaking, reading, and writing French in a cultural context for the beginning student.

FCH 102 | BASIC FRENCH II | 4 quarter hours (Undergraduate)
Second quarter of beginning French. Continued emphasis on the four skills in culturally-authentic situations. This course is a continued introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and Francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

FCH 103 | BASIC FRENCH III | 4 quarter hours (Undergraduate)
Third quarter of beginning French. Completion of the basic elements of the French language, spoken as well as written, with due regard to the cultural context of French expression. This course completes the introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and Francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

FCH 103S | BASIC FRENCH III FOR SUMMER | 6 quarter hours (Undergraduate)
(Covers the equivalent of the second half of FCH 102 and all of FCH 103.) The second half of beginning French. Further work on the basic elements of the French language, spoken as well as written, with due regard to the cultural context of French expression.

FCH 104 | INTERMEDIATE FRENCH I | 4 quarter hours (Undergraduate)
First quarter of intermediate French. Intensive practice in the use of French through listening, speaking, reading, and writing, and continued enhancement of the cultural awareness intrinsic to those skills. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students’ knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life. FCH 103 or equivalent, including placement test or permission of instructor, is recommended.

FCH 104S | INTERMEDIATE FRENCH I FOR SUMMER | 6 quarter hours (Undergraduate)
This intensive course covers the equivalent of FCH 104 and the first half of FCH 105. Focuses on listening, speaking, reading, and writing French in a cultural context for the intermediate-level student.
FCH 105 | INTERMEDIATE FRENCH II | 4 quarter hours (Undergraduate)
Second quarter of intermediate French. More concentration on the four language skills in an authentic cultural context. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students’ knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life. FCH 104 or equivalent, including placement test or permission of instructor, is recommended.

FCH 106 | INTERMEDIATE FRENCH III | 4 quarter hours (Undergraduate)
Third quarter of intermediate French. Developing more fluency in speaking, understanding, reading and writing French with a concomitant heightened awareness of the cultural dimensions of the French language. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students’ knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life. FCH 105 or equivalent, including placement test or permission of instructor, is recommended.

FCH 106S | INTERMEDIATE FRENCH III FOR SUMMER | 6 quarter hours (Undergraduate)
This intensive course covers the equivalent of the second half of FCH 105 and all of FCH 106. Focuses on listening, speaking, reading, and writing French in a cultural context for the intermediate-level student.

FCH 130 | MOLILSAP STUDY ABROAD | 2 quarter hours (Undergraduate)
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

FCH 197 | SPECIAL TOPICS IN FRENCH | 4 quarter hours (Undergraduate)
See schedule for current offerings.

FCH 198 | STUDY ABROAD | 1-8 quarter hours (Undergraduate)
Variable credit.

FCH 199 | INDEPENDENT STUDY | 0.5-8 quarter hours (Undergraduate)
Variable credit.

FCH 201 | ADVANCED COMMUNICATION I | 4 quarter hours (Undergraduate)
First quarter of advanced French. Developing culturally appropriate speech and writing through the study of speech acts and written documents within the context of a systematic study and review of grammar and an introduction to translation. Students will read and prepare orally all texts and questions assigned for each session. In class, time will be spent on oral communication activities. These activities will allow students to express their views and impressions with precise terminology and help students acquire greater fluency and accuracy. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 202 | ADVANCED COMMUNICATION II | 4 quarter hours (Undergraduate)
Second quarter of advanced French. Focus on the differences between speech and writing with an emphasis on the latter as expressed in compositions, editing, translation, and other writing activities. This course is designed to help students develop culturally appropriate speech, writing, and translation through the study of speech acts and written documents within the context of a systematic study and review of grammar. The course introduces sophisticated syntactical patterns of the language and increases students’ vocabulary, thus enabling them to write more elaborate compositions and improve their oral communication skills in a culturally appropriate manner. All students become editors of DePaul’s literary French magazine, Mille-Feuille, and participate in all stages of its publication. The overarching theme of the course is the geography of France. Students will gain an in-depth understanding of France’s geography, and be introduced to some of the regional characteristics of its literature and culture, economy, cuisine, music, and handcraft. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 203 | ADVANCED COMMUNICATION III | 4 quarter hours (Undergraduate)
Third quarter of advanced French. Developing a sophisticated spoken and written fluency using authentic texts as models for elaborated discourse. Written texts and writing exercises reinforce oral expression through extensive (journal) writing and intensive writing (individual and team compositions). The course includes advanced grammar work, occasional translation, and vocabulary enrichment. It utilizes Internet resources to create a simulation. Students write collaborative chapters based on their work. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 204 | ADVANCED COMMUNICATION IV | 4 quarter hours (Undergraduate)
Continued refinement of advanced speaking skills by focusing on oral texts discussed in their sociocultural context. Backup support provided through written texts and exercises. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.
FCH 261E | TERROIRS DU SUD: LAND, FOOD, AND LIFE IN THE SOUTH OF FRANCE | 4 quarter hours  
(Undergraduate)  
TAUGHT IN ENGLISH. The term terroir, defined by Angela Murrills as "a marvelous French word that encompasses soil, sun, and rain and how they all affect what grows there" (66), is typically associated with the geography of wine. The notion of terroir, however, extends beyond the fruits of the vine to impact the lives and behavior of people. This partner course explores the concept of terroir in French culture, cuisine, history, politics, and literature. Through readings, discussion, film, and presentations, students in FCH 261E will discover the symbiotic relationship between the land of the South of France and its inhabitants. The readings will consist of firsthand narratives from Anglophone expatriates who have chosen to live in the regions of Languedoc and Provence, as well as translated fictional stories from Southern French authors. These primary texts will be supplemented by lectures, student presentations, and film. The objective of FCH 261E is for students to gain a holistic cultural understanding of land, food, and life in the South of France.

GEO 350 is a co-requisite for this class.

FCH 270E | A FRENCH VILLAGE | 4 quarter hours  
(Undergraduate)  
TAUGHT IN ENGLISH. In this class, students will watch "A French Village" (2009-2017), a French television series created under the guidance of historian Jean-Pierre Azema. Inspired by the events that took place in France during World War II, this seven-season series follows the lives of inhabitants of the fictional town of Villeneuve from the Nazi occupation of France early in the war to the immediate aftermath of the war, including trials for war crimes and genocide and struggles to survive in a devastated society. The class will focus on learning about the causes of the war, the major events that occurred in the occupied territories, and the behavior of characters that mirror actual circumstances.

FCH 297 | SPECIAL TOPICS IN FRENCH | 4 quarter hours  
(Undergraduate)  
See schedule for current offerings.

FCH 298 | STUDY ABROAD | 1-8 quarter hours  
(Undergraduate)  
Variable credit.

FCH 299 | INDEPENDENT STUDY | 0.5-8 quarter hours  
(Undergraduate)  
Variable credit.

FCH 301 | THE MIDDLE AGES | 4 quarter hours  
(Undergraduate)  
This course is an overview of medieval literature such as the Chanson de Roland and the poetry of Francois Villon. It looks at the diverse literary genres that characterize medieval literature and create its diversity. Some genres, such as the "roman courtois," are given special attention because of their singular importance. Readings are placed within the cultural context of their times in order to understand the values they convey. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 302 | SURVEY OF 17TH AND 18TH CENTURY FRENCH LITERATURE | 4 quarter hours  
(Undergraduate)  
This course follows themes developed across two centuries of French literature from 1600 to the end of the ancien regime. It looks at notions such as religion and disbelief as they move from philosophers like Descartes and the French moralistes to the philosophes; it presents conceptions of theater, the novel, and the essay as they evolve from the "grand siecle" to the "siecle des lumieres." It looks at the unfolding of classical French literature in a historical context that moves from royal absolutism to the demands of political and intellectual freedom that arise during the Enlightenment. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 303 | ROMANTICS, REALISTS, AND REBELS | 4 quarter hours  
(Undergraduate)  
This course is an introduction to the writings of the French Realists and to nineteenth-century reactions against Romanticism. Readings might include works by Balzac, Baudelaire, Rimbaud and Flaubert. The course objectives are to familiarize students with Realist writers in the tradition of French literature and to examine ways in which Realism helped define French literary thought in the nineteenth century. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 304 | FRENCH CIVILIZATION I | 4 quarter hours  
(Undergraduate)  
A survey of French civilization from its Gallic origins to the end of the ancient regime, this course focuses primarily on the history and culture of France, although it accords special attention to broader international developments such as the crusades. Beyond the tensions and exchanges between Islam and Christianity, some of the other key subjects this course addresses are feudalism, the Renaissance, the wars of religion, the centralized monarchy, and the Enlightenment. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 305 | RENAISSANCE | 4 quarter hours  
(Undergraduate)  
This course provides an overview of the literature of the French Renaissance with strong emphasis on its most distinguished writers. These may include Rabelais (novel), Ronsard and Du Bellay (poetry), and Montaigne (essays). The course also may treat some lesser literary figures such as D'Aubigne, Marot (poetry) and Garnier (theater). The course conveys a sense of the unfolding Renaissance aesthetic and objectives, ranging from the early exuberance of Rabelais to the later skepticism and caution of Montaigne. It chronicles the self-conscious attempt of French authors to create a literature that rivaled that of Greco-Roman antiquity. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 306 | SEVENTEENTH-CENTURY FRANCE | 4 quarter hours  
(Undergraduate)  
This course is an overview of French literature of the classical period, i.e., the literature largely written during the reign of Louis XIV. The course approaches materials by genre covering theater (Corneille, Racine, Moliere), poetry (La Fontaine, Malherbe, Regnier, Tristan l'Hermite), the novel (Mme de LaFayette, Sorel, Furetiere), literary theory (Boileau), and the moralistes (Pascal, La Rochefoucauld, La Bruyere). FCH 106 or equivalent, including placement test or permission of instructor, is recommended.
FCH 307 | THE AGE OF ENLIGHTENMENT | 4 quarter hours  
(Undergraduate)
This course presents the French Enlightenment as a period of multiple liberations: the promotion of political liberty (the revolt against the absolutist monarchy), the condemnation of human slavery (most particularly in the colonies where it was rampant), the rejection of religious authority and dogma in the secular sphere (critique of the Roman Catholic Church and the advocacy of deism and atheism in place of Christianity), the exaltation of sensuality and the passions (libertine literature and the contestation of monogamy). The course examines the new cultural ideal, the philosophe, who fills the salons of the period. The course ends with several texts from the French Revolution. Most of the readings come from key writers of the period such as Diderot, Montesquieu, Rousseau and Voltaire, though they also include other writers of lesser magnitude. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 308 | THE ROMANTIC MOVEMENT | 4 quarter hours  
(Undergraduate)
This course is a study of the works of Lamartine, Hugo, Vigny, and Musset, all major representatives of the Romantic movement in France. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 309 | THE FRENCH NOVEL | 4 quarter hours  
(Undergraduate)
Topics may include: 17th- and 18th-century novel; world of Balzac; Flaubert and Stendhal; Realism and Naturalism; contemporary novelists; survey of the novel. This course examines the structures and situations that often typify the novel and asks why the genre has enjoyed such a continuous popularity among readers over so many centuries. It treats topics such as the transformation of the hero/heroine, the relationship of the greater society to the protagonist, the trials of the protagonist, the cultural ideals embodied by the hero/heroine, and the implications of the fate of the main characters. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 310 | FRENCH DRAMA | 4 quarter hours  
(Undergraduate)
Topics include: classical drama; romantic drama; contemporary drama. This course examines theatre practices in France across several centuries looking at the various art forms that populated its stages: tragedy, comedy, existentialist theatre, theatre of the absurd and contemporary creations. In addition to reading plays spanning from the 17th to the 21st centuries and putting these in their social context, students may view filmed productions of theatre performances and attend plays if possible. Authors might include Racine, Corneille, Moliere, Beaumarchais, Musset, Ionesco, Beckett and Reza. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 311 | FRENCH POETRY | 4 quarter hours  
(Undergraduate)
Topics include: form and substance; Baudelaire, Rimbaud, Verlaine, Mallarme; contemporary poets. This course is an exploration of French poetry. It provides a history of French poetry while outlining the socio-historical and intellectual context for poetic creation. The course is also an introduction to the techniques of literary analysis as characterized by "explication de texte," a close reading that looks at the various components of texts: the imagery, the style, rhyme scheme, structure, characterization, tone, etc. leading to an understanding of the overall structure and meaning of the piece. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 312 | TWENTIETH CENTURY WRITERS | 4 quarter hours  
(Undergraduate)
This course introduces students to some of the most prestigious literary figures of the earlier period of the past century, such as Proust, Gide, Malraux, Camus, Sartre, and De Beauvoir. It explores their work in the novel and, when appropriate, in other genres. The course situates the texts and authors within an historical and stylistic framework that indicates major twentieth-century concerns. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 313 | THE SURREALIST REVOLUTION | 4 quarter hours  
(Undergraduate)
Nerval, Lautreamont, Breton, Aragon; films of Man Ray and Bunel. This course takes an interdisciplinary approach to the surrealism movement because the European avant-garde of the early twentieth century used all modes of expression to convey their artistic theories. The course explores surrealist writings and art of all kinds to assess the totality of surrealist modes of expression. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 314 | CONTEMPORARY FRENCH WRITERS | 4 quarter hours  
(Undergraduate)
This course is an exploration of texts written by French authors since the 1940’s. Students are taught to analyze a series of novels and short stories as well as the themes they develop and the narrative strategies they adopt. This course will also study the theories that have shaped the period: existentialism, the New Novel, feminism, the literature of transgression, the question of being and language, and Neo-Realism. Authors might include: Bataille, Perec, Blanchot, Youncenar, Duras, Tournier, LeClezio, Guibert, Cixous, Ernaux, Tremblay, Conde, Ben Jelloun. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 315 | CONTEMPORARY FRENCH CRITICISM | 4 quarter hours  
(Undergraduate)
Topics include: structuralist critics; feminist critics; post-modernist critics. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 316 | FRANCOPHONE LITERATURE OF AFRICA AND THE CARIBBEAN | 4 quarter hours  
(Undergraduate)
Classic and emerging writers of these regions. This course might include the contemporary Haitian writer Dany Laferriere in a multi-faceted course examining the historical, cultural, and political background of the Haitian question. Other iterations of this course might include writings of authors from Francophone Africa or the Caribbean studied within the context of their nations and of the Francophone world. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 317 | THE LITERATURE OF FRENCH CANADA | 4 quarter hours  
(Undergraduate)
Classic and contemporary French-Canadian writers. This course is an introduction to established authors of French Canada whose works are considered classics. Authors to be read might include Louis Hemon, Gabrielle Roy, Yves Theriault, Antonine Maillet, Anne Hebert, and Michel Tremblay. While acquainting students with several forms of Canadian literature, this course intends also to familiarize them with many aspects of French Canadian culture in all its diversity. Topics covered might include the way of life in the wilderness of the Eastern Canadian forest; the disenfranchised in Montreal, Eskimo life and the Inuit culture; " le grand derangement " the removal of the Acadians from their land, now known as Nova Scotia, to Louisiana. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.
FCH 319 | FRENCH/FRANCOPHONE WOMEN WRITERS | 4 quarter hours
(Undergraduate)
This course is an exploration of recent texts written in French by a variety of women across the globe. It gives students a chance to discuss not only the place of these women within their own society but also the specificity of their relationship to French culture and language. From France, to Senegal, Benin, Congo, Algeria, Quebec, Egypt, Vietnam and Guadeloupe, the course will allow students to travel across socio-geopolitical borders and to explore the narrative strategies specific to these women. A few films might further contextualize the material. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 320 | FRENCH FOR BUSINESS | 4 quarter hours
(Undergraduate)
Advanced preparation for the use of French in the business world. This course focuses on acquiring business vocabulary, skills for dealing with French business partners, and the ability to comprehend specialized business journals and reports. It prepares students for using their knowledge of French in a business context. Extensive discussions of the role France plays in the European Union will also be included. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 321 | TRANSLATION | 4 quarter hours
(Undergraduate)
Fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of translation theory and provides an introduction to translating documents in theory, journalism, hotel management, psychoanalysis, literature, advertising, cooking and cinema. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 322 | FRENCH GRAMMAR AND USAGE | 4 quarter hours
(Undergraduate)
This course is an examination of French grammar as a linguistic system and of notions of "standard" in written and spoken French. Recommended for future teachers and students interested in grammatical analysis. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 323 | TRANSLATION II | 4 quarter hours
(Undergraduate)
Continued introduction to fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of translation theory and provides an introduction to translating documents in theory, journalism, hotel management, psychoanalysis, literature, advertising, cooking and cinema. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 324 | TRANSLATION III | 4 quarter hours
(Undergraduate)
Intensive practice of French-English and English-French translation. The course includes a major portfolio project requiring collaborative work. It aims to equip students with proficiency in translating at an advanced level, to train them to locate and make appropriate use of reference material from a variety of sources, to write introductions and footnotes as needed, to help them understand the importance of familiarity with a subject matter and distinguish between various lexical fields, to teach them to comprehend and effectively manage the linguistic and cultural aspects of language transfer. Furthermore, the course provides students with an understanding of professional expectations in the field of translation. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 326 | FRENCH STYLISTICS | 4 quarter hours
(Undergraduate)
An intensive writing course, providing rhetorical, linguistic, and literary analysis of varied styles of writing. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 329 | FRENCH CINEMA | 4 quarter hours
(Undergraduate)
Topics in French film from its origins to the present day. A course on iconic French filmmakers of the last fifty years and their contributions to a creative reorientation of cinema in the context of the history of French cinema and film criticism. Topics might include: the New Wave and after, growing up in France and its colonies, love and eroticism, the representation of women in cinema, women directors and the deconstruction of female stereotypes, living on the margins, cinema of the suburbs, social renegades, the construction of the city. Through readings, class discussions, and film viewings, students gain an understanding of French films in light of their cultural and historical contexts. Directors studied might include: Francois Truffaut, Jean-Luc Godard, Diane Kurys, Claire Denis, Patrice Leconte, Andre Techine, Agnes Varda, Bertrand Blier, Matthieu Kassowitz and Sylvain Chomet. Students learn the basic concepts of film aesthetics necessary to an appreciation of cinema, along with a critical vocabulary in French for analyzing and discussing films. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.
FCH 332 | FRENCH CIVILIZATION II | 4 quarter hours
(Undergraduate)
Intellectual, political and social background from the rise of Napoleon to the current time. This course describes the various political mutations of France from the Empire of the early nineteenth century to the Fifth Republic. The course presents critical social, literary, and artistic developments throughout the two centuries under consideration. A sample of cultural topics includes impressionism and cubism in art, and romanticism, realism and existentialism in literature. The course devotes significant attention to the creation of late-nineteenth century and early twentieth-century Paris (a time of French cultural pre-eminence in the West) when the city, initially under Haussmann’s urban renovation projects, began to take on the physical form that so many people associate with Paris today. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 333 | PASTEUR, MICROBES AND 19TH CENTURY FRANCE | 4 quarter hours
(Undergraduate)
Louis Pasteur, one of the world’s most important scientists, lived during a time of turmoil and explosive growth in France. A chemist and microbiologist, he is famous for his discoveries of the principles of vaccination, fermentation and pasteurization. In this course, students will read his scientific writings, as well as historical documents explaining the turbulent times in which Pasteur lived and worked. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 340 | CONTEMPORARY FRANCE | 4 quarter hours
(Undergraduate)
This course is an introduction to contemporary France through articles, books, films, web sites, and, when possible, direct interaction with French people via social networks. Although the course emphasizes France as it is today, it also seeks to point out underlying cultural/historical factors that govern French responses to particular situations. The course covers numerous topics from both high and popular culture. When timely, it makes comparisons between diverging French and American cultural perspectives. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 341 | INTRODUCTION TO FRENCH LITERATURE I | 4 quarter hours
(Undergraduate)
(Required of all majors.) Taught in Autumn quarter every two years on a rotating basis with FCH 342. This course is a survey of French Literature from the Middle Ages through the seventeenth century (le grand siecle). It treats some of the major authors/texts of the medieval, renaissance and classical periods of French literature and offers readings from a variety of genres: poetry (epic, lay, ballad, sonnet), theater (religious, profane, farce, high drama), and prose (philosophical musings, aphorisms, essays, novel). The course provides an overview of approximately six hundred years of French literature. FCH 106 or equivalent, including placement test or permission of instructor, is recommended. Offered autumn quarter of even numbered years.

FCH 342 | INTRODUCTION TO FRENCH LITERATURE II | 4 quarter hours
(Undergraduate)
(Required of all majors). Survey of French literature of the 18th and 19th centuries. Taught in Autumn quarter every two years on a rotating basis with FCH 341. By analyzing works and excerpts from major writings of the French canon, the course treats the progression from the Age of Enlightenment, putting an emphasis on the themes of love and virtue, to pre-Romanticism, and the libertine culture. The course then provides an overview of Romanticism and later nineteenth-century developments such as Symbolism in poetry and modernity. Authors to be read may include Rousseau, Sade, Laclos, Nerval, Hugo, Lamartine, Vigny, Balzac, Sand, Colet, Mme. d’Agouet, Mme. de Stael, and Flaubert. FCH 106 or equivalent, including placement test or permission of instructor, is recommended. Offered autumn quarter of odd numbered years.

FCH 345 | THE AFRICAN PRESENCE IN FRANCE | 4 quarter hours
(Undergraduate)
This course offers a cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. It is designed to increase students’ understanding of immigration in France as experienced by a variety of African communities. Through sociological documentaries, literature, manifestoes, legal documents, music, films and cooking, students will learn about the experiences and reshaped identities of first and second generation immigrants from both Western and Northern Africa. A brief introduction to the history of immigration in France and to the French colonization and subsequent decolonization of Africa will be provided. Countries discussed include Algeria, Morocco, Tunisia, Senegal, Cameroun, and Mali. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 350 | FRENCH PHONOLOGY AND PHONETICS | 4 quarter hours
(Undergraduate)
(Required of all majors). An in-depth study of the language’s sound system and intensive pronunciation practice. This course is designed to introduce advanced students to the structure of the sound system of the French language and—on a practical level—to help them improve their pronunciation. Lectures, discussions, practice sessions and group work are based on a main manual and various handouts as well as recordings of French speakers. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 359 | FOREIGN LANGUAGES ACROSS THE CURRICULUM | 2 quarter hours
(Undergraduate)
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in French. Students must have the equivalent of 106 or higher ability in French to take this two credit component. Please contact the Department of Modern Languages if you have questions about these courses or about language placement.

FCH 395 | FOREIGN LANGUAGES ACROSS THE CURRICULUM | 2 quarter hours
(Undergraduate)
See schedule for offerings.

FCH 398 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)
Variable credit. Students participating in the Institute of European Studies will be allowed to count a total of three courses (semester program) or five courses (year program) towards their major or minor requirements.

FCH 399 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)
Variable credit.
FCH 401 | THE MIDDLE AGES | 4 quarter hours  
(Graduate)  
This course is an overview of medieval literature such as the Chanson de Roland and the poetry of Francois Villon. It looks at the diverse literary genres that characterize medieval literature and create its diversity. Some genres, such as the "roman courtois," are given special attention because of their singular importance. Readings are placed within the cultural context of their times in order to understand the values they convey.

FCH 402 | SURVEY OF 17TH AND 18TH CENTURY FRENCH LITERATURE | 4 quarter hours  
(Graduate)  
This course follows themes developed across two centuries of French literature from 1600 to the end of the ancien regime. It looks at notions such as religion and disbelief as they move from philosophers like Descartes and the French moralistes to the philosophes; it presents conceptions of theater, the novel, and the essay as they evolve from the "grand siecle" to the "siecle des lumières." It looks at the unfolding of classical French literature in a historical context that moves from royal absolutism to the demands of political and intellectual freedom that arise during the Enlightenment.

FCH 403 | ROMANTICS, REALISTS AND REBELS | 4 quarter hours  
(Graduate)  
This course is an introduction to the writings of the French Realists and to nineteenth-century reactions against Romanticism. Readings might include works by Balzac, Baudelaire, Rimbaud and Flaubert. The course objectives are to familiarize students with Realist writers in the tradition of French literature and to examine ways in which Realism helped define French literary thought in the nineteenth century.

FCH 404 | FRENCH CIVILIZATION | 4 quarter hours  
(Graduate)  
A survey of French civilization from its Gallic origins to the end of the ancien regime, this course focuses primarily on the history and culture of France, although it accords special attention to broader international developments such as the crusades. Beyond the tensions and exchanges between Islam and Christianity, some of the other key subjects this course addresses are feudalism, the Renaissance, the wars of religion, the centralized monarchy, and the Enlightenment.

FCH 405 | RENAISSANCE | 4 quarter hours  
(Graduate)  
This course provides an overview of the literature of the French Renaissance with strong emphasis on its most distinguished writers. These may include Rabelais (novel), Ronsard and Du Bellay (poetry), and Montaigne (essays). The course also may treat some lesser literary figures such as D'Aubigne, Marot (poetry) and Garnier (theater). The course conveys a sense of the unfolding Renaissance aesthetic and objectives, ranging from the early exuberance of Rabelais to the later skepticism and caution of Montaigne. It chronicles the self-conscious attempt of French authors to create a literature that rivaled that of Greco-Roman antiquity.

FCH 406 | SEVENTEENTH-CENTURY FRANCE | 4 quarter hours  
(Graduate)  
This course is an overview of French literature of the classical period, i.e., the literature largely written during the reign of Louis XIV. The course approaches materials by genre covering theater (Corneille, Racine, Moliere), poetry (La Fontaine, Malherbe, Regnier, Tristan l'Hermite), the novel (Mme de Lafayette, Sorel, Furetire), literary theory (Boileau), and the moralistes (Pascal, La Rochefoucauld, La Bruyere).

FCH 407 | AGE OF ENLIGHTENMENT | 4 quarter hours  
(Graduate)  
This course presents the French Enlightenment as a period of multiple liberations: the promotion of political liberty (the revolt against the absolutist monarchy), the condemnation of human slavery (most particularly in the colonies where it was rampant), the rejection of religious authority and dogma in the secular sphere (critique of the Roman Catholic Church and the advocacy of deism and atheism in place of Christianity), the exaltation of sensuality and the passions (libertine literature and the contestation of monogamy). The course examines the new cultural ideal, the philosophe, who fills the salons of the period. The course ends with several texts from the French Revolution. Most of the readings come from key writers of the period such as Diderot, Montesquieu, Rousseau and Voltaire, though they also include other writers of lesser magnitude.

FCH 408 | THE ROMANTIC MOVEMENT | 4 quarter hours  
(Graduate)  
This course is a study of the works of Lamartine, Hugo, Vigny, and Musset, all major representatives of the Romantic movement in France.

FCH 409 | THE FRENCH NOVEL | 4 quarter hours  
(Graduate)  
Topics may include: 17th- and 18th-century novel; world of Balzac; Flaubert and Stendhal; Realism and Naturalism; contemporary novelists; survey of the novel. This course examines the structures and situations that often typify the novel and asks why the genre has enjoyed such a continuous popularity among readers over so many centuries. It treats topics such as the transformation of the hero/heroine, the relationship of the greater society to the protagonist, the trials of the protagonist, the cultural ideals embodied by the hero/heroine, and the implications of the fate of the main characters.

FCH 410 | FRENCH DRAMA | 4 quarter hours  
(Graduate)  
Topics include: classical drama; romantic drama; contemporary drama. This course examines theatre practices in France across several centuries looking at the various art forms that populated its stages: tragedy, comedy, existentialist theatre, theatre of the absurd and contemporary creations. In addition to reading plays spanning from the 17th to the 21st centuries and putting these in their social context students may view filmed productions of theatre performances and attend plays if possible. Authors might include Racine, Corneille, Moliere, Beaumarchais, Musset, Ionesco, Beckett and Reza.

FCH 411 | FRENCH POETRY | 4 quarter hours  
(Graduate)  
Topics include: form and substance; Baudelaire, Rimbaud, Verlaine, Mallarme; contemporary poets. This course is an exploration of French poetry. It provides a history of French poetry while outlining the socio-historical and intellectual context for poetic creation. The course is also an introduction to the techniques of literary analysis as characterized by "explication de texte;" a close reading that looks at the various components of texts: the imagery, the style, rhyme scheme, structure, characterization, tone, etc. leading to an understanding of the overall structure and meaning of the piece.

FCH 412 | TWENTIETH CENTURY WRITERS | 4 quarter hours  
(Graduate)  
This course introduces students to some of the most prestigious literary figures of the earlier period of the past century, such as Proust, Gide, Malraux, Camus, Sartre, and De Beauvoir. It explores their work in the novel and, when appropriate, in other genres. The course situates the texts and authors within an historical and stylistic framework that indicates major twentieth-century concerns.
FCH 413 | THE SURREALIST REVOLUTION | 4 quarter hours  
(Graduate)  
Nerval, Lautreamont, Breton, Aragon; films of Man Ray and Bunel. This course takes an interdisciplinary approach to the surrealist movement because the European avant-garde of the early twentieth century used all modes of expression to convey their artistic theories. The course explores surrealist writings and art of all kinds to assess the totality of surrealist modes of expression.

FCH 414 | CONTEMPORARY FRENCH WRITERS | 4 quarter hours  
(Graduate)  
This course is an exploration of texts written by French authors since the 1940’s. Students are taught to analyze a series of novels and short stories as well as the themes they develop and the narrative strategies they adopt. This course will also study the theories that have shaped the period: existentialism, the New Novel, feminism, the literature of transgression, the question of being and language, and Neo-Realism. Authors might include: Bataille, Perec, Blanchot, Yourcenar, Duras, Tournier, LeCleizio, Guibert, Cixous, Ernaux, Tremblay, Conde, Ben Jelloun.

FCH 415 | CONTEMPORARY FRENCH CRITICISM | 4 quarter hours  
(Graduate)  
Topics include: structuralist critics; feminist critics; post-modernist critics.

FCH 416 | FRANCOPHONE LITERATURE OF AFRICA AND THE CARIBBEAN | 4 quarter hours  
(Graduate)  
Classic and emerging writers of these regions. This course might include the contemporary Haitian writer Dany Laferrière in a multi-faceted course examining the historical, cultural, and political background of the Haitian question. Other iterations of this course might include writings of authors from Francophone Africa or the Caribbean studied within the context of their nations and of the francophone world.

FCH 417 | THE LITERATURE OF FRENCH CANADA | 4 quarter hours  
(Graduate)  
Classic and contemporary French-Canadian writers. This course is an introduction to established authors of French Canada whose works are considered classics. Authors to be read might include Louis Hemon, Gabrielle Roy, Yves Thériault, Antonine Maillet, Anne Hebert, and Michel Tremblay. While acquainting students with several forms of French literature, this course intends also to familiarize them with many aspects of French Canadian culture in all its diversity. Topics covered might include the way of life in the wilderness of the Eastern Canadian forest; the disenfranchised in Montreal; Eskimo life and the Inuit culture; “le grand derangement” the removal of the Acadians from their land, now known as Nova Scotia, to Louisiana.

FCH 419 | FRENCH WOMEN WRITERS | 4 quarter hours  
(Graduate)  
This course is an exploration of recent texts written in French by a variety of women across the globe. It gives students a chance to discuss not only the place of these women within their own society but also the specificity of their relationship to French culture and language. From France, to Senegal, Benin, Congo, Algeria, Quebec, Egypt, Vietnam and Guadeloupe, the course will allow students to travel across socio-geopolitical borders and to explore the narrative strategies specific to these women. A few films might further contextualize the material.

FCH 420 | FRENCH FOR BUSINESS | 4 quarter hours  
(Graduate)  
Advanced preparation for the use of French in the business world. This course focuses on acquiring business vocabulary, skills for dealing with French business partners, and the ability to comprehend specialized business journals and reports. It prepares students for using their knowledge of French in a business context. Extensive discussions of the role France plays in the European Union will also be included.

FCH 421 | TRANSLATION | 4 quarter hours  
(Graduate)  
Fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of the latest technologies such as web-based dictionaries, and provides an introduction to translating technical documents in medicine, law, sports, travel, and business.

FCH 422 | FRENCH GRAMMAR AND USAGE | 4 quarter hours  
(Graduate)  
This course is an examination of French grammar as a linguistic system and of notions of “standard” in written and spoken French. Recommended for future teachers and students interested in grammatical analysis.

FCH 423 | TRANSLATION II | 4 quarter hours  
(Graduate)  
Continued introduction to fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of translation theory and provides an introduction to translating documents in theory, journalism, hotel management, psychoanalysis, literature, advertising, cooking and cinema.

FCH 424 | TRANSLATION III | 4 quarter hours  
(Graduate)  
Intensive practice of French-English and English-French translation. The course includes a major portfolio project requiring collaborative work. It aims to equip students with proficiency in translating at an advanced level, to train them to locate and make appropriate use of reference material from a variety of sources, to write introductions and footnotes as needed, to help them understand the importance of familiarity with a subject matter and distinguish between various lexical fields, to teach them to comprehend and effectively manage the linguistic and cultural aspects of language transfer. Furthermore, the course provides students with an understanding of professional expectations in the field of translation.

FCH 426 | FRENCH STYLISTICS | 4 quarter hours  
(Graduate)  
An intensive writing course, providing rhetorical, linguistic, and literary analysis of varied styles of writing. Cross-listed with FCH 326.
FCH 429 | FRENCH CINEMA | 4 quarter hours  
(Graduate)
Topics in French film from its origins to the present day. A course on iconic French filmmakers of the last fifty years and their contributions to a creative reorientation of cinema in the context of the history of French cinema and film criticism. Topics include: the New Wave and after, growing up in France and its colonies, love and eroticism, the representation of women in cinema, women directors and the deconstruction of female stereotypes, living on the margins, cinema of the suburbs, social renegades, the construction of the city. Through readings, class discussions, and film viewings, students gain an understanding of French films in light of their cultural and historical contexts. Directors studied might include: Francois Truffaut, Jean-Luc Godard, Diane Kurys, Claire Denis, Patrice Leconte, Andre Techine, Agnes Varda, Bertrand Blier, Matthieu Kassowitz and Sylvain Chomet. Students learn the basic concepts of film aesthetics necessary to an appreciation of cinema, along with a critical vocabulary in French for analyzing and discussing films.

FCH 432 | FRENCH CIVILIZATION II | 4 quarter hours  
(Graduate)
Intellectual, political and social background from the rise of Napoleon to the current time. This course describes the various political mutations of France from the Empire of the early nineteenth century to the Fifth Republic. The course presents critical social, literary, and artistic developments throughout the two centuries under consideration. A sample of cultural topics includes impressionism and cubism in art, and romanticism, realism and existentialism in literature. The course devotes significant attention to the creation of late-nineteenth century and early twentieth-century Paris (a time of French cultural pre-eminence in the West) when the city, initially under Haussmann's urban renovation projects, began to take on the physical form that so many people associate with Paris today.

FCH 433 | PASTEUR, MICROBES AND 19TH CENTURY FRANCE | 4 quarter hours  
(Graduate)
Louis Pasteur, one of the world’s most important scientists, lived during a time of turmoil and explosive growth in France. A chemist and microbiologist, he is famous for his discoveries of the principles of vaccination, fermentation and pasteurization. In this course, students will read his scientific writings, as well as historical documents explaining the turbulent times in which Pasteur lived and worked.

FCH 440 | CONTEMPORARY FRANCE | 4 quarter hours  
(Graduate)
This course is an introduction to contemporary France through articles, books, films, web sites, and, when possible, direct interaction with French people via social networks. Although the course emphasizes France as is it is today, it also seeks to point out underlying cultural/historical factors that govern French responses to particular situations. The course covers numerous topics from both high and popular culture. When timely, it makes comparisons between diverging French and American cultural perspectives.

FCH 441 | INTRODUCTION TO FRENCH LITERATURE I | 4 quarter hours  
(Graduate)
Taught in Autumn quarter every two years on a rotating basis with FCH 442. This course is a survey of French Literature from the Middle Ages through the seventeenth century (le grand siecle). It treats some of the major authors/texts of the medieval, renaissance and classical periods of French literature and offers readings from a variety of genres: poetry (epic, lay, ballad, sonnet), theater (religous, profane, farce, high drama), and prose (philosophical musings, aphorisms, essays, novel). The course provides an overview of approximately six hundred years of French literature.

FCH 442 | INTRODUCTION TO FRENCH LITERATURE II | 4 quarter hours  
(Graduate)
Survey of French literature of the 18th and 19th centuries. Taught in Autumn quarter every two years on a rotating basis with FCH 441. By analyzing works and excerpts from major writings of the French canon, the course treats the progression from the Age of Enlightenment, putting an emphasis on the themes of love and virtue, to pre-Romanticism, and the libertine culture. The course then provides an overview of Romanticism and later nineteenth-century developments such as Symbolism in poetry and modernity. Authors to be read may include Rousseau, Sade, Laclos, Nerval, Hugo, Lamartine, Vigny, Balzac, Sand, Colet, Mme. d'Agouet, Mme. de Stael, and Flaubert.

FCH 445 | THE AFRICAN PRESENCE IN FRANCE | 4 quarter hours  
(Graduate)
This course offers a cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. It is designed to increase students’ understanding of immigration in France as experienced by a variety of African communities. Through sociological documentaries, literature, manifestoes, legal documents, music, films and cooking, students will learn about the experiences and reshaped identities of first and second generation immigrants from both Western and Northern Africa. A brief introduction to the history of immigration in France and to the French colonization and subsequent decolonization of Africa will be provided. Countries discussed include Algeria, Morocco, Tunisia, Senegal, Cameroun, and Mali.

FCH 450 | FRENCH PHONOLOGY AND PHONETICS | 4 quarter hours  
(Graduate)
An in-depth study of the language’s sound system and intensive pronunciation practice, this course is designed to introduce students to the structure of the sound system of the French language and—on a practical level—to help them improve their pronunciation. Lectures, discussions, practice sessions and group work are based on a main manual and various handouts as well as recordings of French speakers.

FCH 491 | FRENCH FOR READING | 4 quarter hours  
(Graduate)
Intensive review of basics of French grammar, vocabulary and sentence structure, for reading knowledge of scholarly articles in French.

FCH 496 | PRACTICUM IN FRENCH INSTRUCTION | 4 quarter hours  
(Graduate)
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

FCH 497 | SPECIAL TOPICS IN FRENCH | 4 quarter hours  
(Graduate)
See schedule for current offerings.
Game Development (GAM)

GAM 102 | MECHANICS OF GAME DESIGN | 4 quarter hours
(Undergraduate)
This course introduces students to the design and implementation of core mechanics and game loops for real-time digital games. In order to hone an eye for detail and a deeper understanding of how design decisions ripple out across different systems, this class focuses on a single game genre, such as 2D platforming games, walking simulators, or stealth games. Students will play several games from that genre, analyze their affordances, and develop prototypes of specific subsystems. Topics to be covered include genre history, game feel, interaction design, procedural rhetoric, systems design, common scripting patterns. GAM 240 is a prerequisite for this class.

GAM 180 | UNREAL ENGINE WORKSHOP | 2-2.25 quarter hours
(Undergraduate)
This course focuses on teaching students the fundamentals to Unreal Engine.&nbsp; By the end of the course the students will build a small game from scratch in the Unreal Engine.&nbsp; No programming knowledge is required to take this course.&nbsp; Students will learn basic concepts of the Unreal Engine, from learning the interface of UE4 to scripting basic behaviors with blueprints.&nbsp; Students will also learn the basics of several different modules in UE4.

GAM 181 | UNITY WORKSHOP | 2-2.25 quarter hours
(Undergraduate)
This course focuses on teaching students the fundamentals of Unity.&nbsp; By the end of the course the students will build a small game from scratch in the Unity.&nbsp; No programming knowledge is required to take this course.&nbsp; Students will learn basic concepts of the Unity Game Engine from learning the interface of Unity to scripting basic behaviors in C#.&nbsp; Students will also learn the basics of several different modules in Unity Engine.

GAM 200 | PLAY | 4 quarter hours
(Undergraduate)
Exploring the concept of "play" from a variety of disciplinary perspectives including sociology, anthropology, psychology, literary and theater studies and the arts, this course discusses "play" as a central force in cultural, social, artistic and personal development. It intends to raise awareness for the ways in which "play" can promote creativity, mental and emotional health, problem solving as well as personal and social change. It analyzes the role of "play" as an element of negotiation and reconciliation between disparate forces within the individual and with others.

GAM 201 | HISTORY OF VIDEOGAMES | 4 quarter hours
(Undergraduate)
This course provides an overview of the history of modern interactive entertainment starting with the early developments of the late 1940s up until the present day. The course covers five longitudinal perspectives, or themes. For each theme students will become familiar with notable game titles, events, people, technologies, game mechanics and genres.

GAM 205 | GAMES LITERACY | 4 quarter hours
(Undergraduate)
This lecture course introduces students to the evolving forms, uses, and design of games. Topics covered include the relationship between game design and play, the role of games in fueling the technological imagination, the changing contexts in which games are designed and played (art, social impact, health, education), and the rise of the independent games sector. Students will produce weekly written responses to course material, lead a seminar discussion in small teams, and produce a final written or multimedia paper. PREREQUISITE(S): None.

GAM 206 | HISTORY OF GAMES | 4 quarter hours
(Undergraduate)
From "The Royal Game of Ur" (2500+ BCE) to "World of Warcraft" (2004), games have been a constant in human history. The forms of games, their experiential qualities, and their cultural significance have varied enormously from era to era and place to place. This class will examine particular games and game genres in their historical context using a case study format. We will focus on "indoor" games, those of chance and skill, as opposed to physical games and sports. The examples will be chosen (i) to have global scope and historic diversity, (ii) to relate to games that students will find familiar, and (iii) to raise particular issues in historical interpretation, the use of primary sources and changing concepts of leisure activity.

GAM 208 | VIRTUAL WORLDS AND ONLINE COMMUNITIES | 4 quarter hours
(Undergraduate)
Environments such as social networking sites, multiplayer online games and other online communities are becoming an increasingly large part of how we work, play, and learn. This course introduces the fundamentals for the interdisciplinary study of cyberculture and online social behavior. By examining core scholarship in this area, together with analyzing an existing virtual world, game, or online community, students will learn to research and understand new technologically-enabled social forms as they are emerging.
WRD 104 is a prerequisite for this class.

GAM 224 | GAME DESIGN FOR NON-MAJORS | 4 quarter hours
(Undergraduate)
This course approaches the study of computer games from three angles: first, as examples of media that can be analyzed and critiqued for their thematic elements, formal structure, plot and interactive appreciation; second, as complex software artifacts subject to technological constraints and the product of a labor-intensive design and implementation process; and three as a cultural artifact with behaviors and associations comparable in import to other popular art forms. Students will study the principles of game design and use them both to analyze existing games and to develop their own original game ideas. Students will also learn about the process of game development, starting from the game’s narrative concept and moving to consideration of a game’s components: the representation of the player, of artifacts, the virtual world that contains them and the interaction between them and the player.

GAM 226 | FUNDAMENTALS OF GAME DESIGN | 4 quarter hours
(Undergraduate)
This course provides students a practical foundation in game design with a focus on concept development, design decomposition, and prototyping. Using game design theory, analysis, physical prototyping, playtesting, and iteration students learn how to translate game ideas, themes, and metaphors into gameplay, game pitches, and design documents. Students will analyze and recognize play that exists in important games, stories, and other media.
GAM 228 | ETHICS IN COMPUTER GAMES AND CINEMA | 4 quarter hours
(Undergraduate)
Societies function based on normative ethics utilizing common sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded in games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact, particularly on children, will be discussed.

GAM 229 | PRESENTATION AND COMMUNICATION | 4 quarter hours
(Undergraduate)
GAM 229 focuses on effective written and oral communication for designers in the professional world and beyond. While covering the basics of writing various design documents from high concepts to production guidelines, and teaching various presentation formats and techniques, GAM 229 aims to raise students' awareness for the "human" aspects of becoming an effective communicator and offers experimental, creative solutions to communication problems, such as team or client issues. Based on psychology research, this course offers insights on what it takes to "hear others" and "be heard" and to create constructive, productive relationships. PREREQUISITE(S): None.

GAM 230 | INTRO TO GAME PRODUCTION | 4 quarter hours
(Undergraduate)
Game development is a big business, and production teams can now exceed one hundred people. This course is an introduction to the production methods used in the game industry, and to the demanding role of the Producer on the game development team. Students will work to develop skills in team building, project presentation, organization, and dealing with people. Subjects covered include scheduling tools, collaborative software, project management, vendor relations, interdepartmental relations, and quality assurance. GAM 245 is a prerequisite for this class.

GAM 231 | HISTORY AND DESIGN OF ROLE-PLAYING GAMES | 4 quarter hours
(Undergraduate)
Students learn the history of role-playing games and the process of world-building to collaboratively design and develop their own games that advance the genre. Topics include the psychological and social opportunities unique to the genre, as well as its history from table-top, to live-action and massively multi-player. Class time consists of lectures, workdays, workshops, playtests, and critiques.

GAM 224 or GAM 226 is a prerequisite for this class

GAM 240 | PLAYGRAMMING | 4 quarter hours
(Undergraduate)
This workshop introduces computer programming to artists and game designers. Programming is an art, but before students can create masterpieces they first need to explore, play, and sketch with code. Students learn basic concepts and techniques of computation and apply these to create gameplay experiences, improvisational experiments, and software toys. Students will author code from scratch and remix code to complete their weekly projects. No prior programming experience or knowledge is required. PREREQUISITE(S): None.

GAM 244 | GAME DEVELOPMENT I | 4 quarter hours
(Undergraduate)
This course provides students additional theory and practice with an emphasis on game design and storytelling for games. Students continue learning about game development processes and techniques and how to apply advanced game design principles to create components of a 2D game.

GAM 245 | GAME DEVELOPMENT II | 4 quarter hours
(Undergraduate)
In this course students will develop skills in game design and development through the creation of a 2D digital game designed from a set of client based restrictions. Emphasis will be placed on teamwork and development pipelines for the design and creation of assets and systems. Students will use a combination of prototyping, storyboarding, user stories, character breakdowns, system breakdowns and flowcharts in the design portion of the game. We will be using Gamemaker Studio as the engine to develop and implement the game. The goals of all design done in this course will focus around designing for the needs of a client; solving problems identified by the client; and providing transparency via reports and milestone deliverables.

GAM 226 and (GAM 244 or CSC 241 or CSC 243) are prerequisites for this class

GAM 250 | GAME SOUND DESIGN I | 4 quarter hours
(Undergraduate)
This course expands on topics covered in GAM 250. Students will further learn to create sound assignments with Pro Tools and other current technologies.

GAM 226 and (GAM 244 or CSC 241 or CSC 243) are prerequisites for this class

GAM 250 | GAME SOUND DESIGN II | 4 quarter hours
(Undergraduate)
In this course, students will learn how to identify design goals, form hypothesis about their designs, develop good research and interview questions, plan and conduct playtests, as well as how to evaluate playtest data so it can inform design iterations and help to make better games.

GAM 226 is a prerequisite for this class.

GAM 315 | GAME SOUND DESIGN 2 | 4 quarter hours
(Undergraduate)
This course expands on topics covered in GAM 250. Students will further their knowledge of recording techniques for voiceover, sound effects, and music; editing voiceover and music; and mixing. The course will also introduce audio implementation using Unity. Coursework will utilize the recording studio extensively for in-class and out-of-class work. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound design for video games.

GAM 250 or POST 124 is a prerequisite for this class.
GAM 325 | APPLIED 3D GEOMETRY | 4 quarter hours
(Undergraduate)

Review of mathematical foundation and techniques needed for the development of 3D graphics and game systems. This class will provide the foundation in linear algebra and 3D geometry required for implementing common tasks in 3D graphics and game systems. Topics include: vectors, matrices, transforms, coordinate changes, projections, intersection.

CSC 301 is a prerequisite for this class.

GAM 326 | GAMES WITH A PURPOSE PRE-PRODUCTION | 4 quarter hours
(Undergraduate)

This course introduces students to the growing field of Games With A Purpose (GWAP) and its manifold application areas such as health, education, social and personal change, activism, journalism, politics and advertising. After laying the theoretical foundation of games as expressive and persuasive media with transformational power, and establishing a framework for the design and assessment of GWAPs, the course focuses on the conceptualization, prototyping, playtesting and evaluation of concrete, client-based projects for purposes beyond entertainment. Instructor Permission Required.

GAM 392 or GAM 362 is a prerequisite for this class.

GAM 329 | PHYSICAL PROTOTYPING FOR GAMES | 4 quarter hours
(Undergraduate)

This course will approach the study of Game Design with a focus on breaking designs into manageable elements and prototyping those elements in order to refine play. Students will learn how to develop game ideas and game systems with a focus on play procedures, rules, and designing for various types of possible players. Prototyping will involve various real world media in addition to paper write-ups and layouts. Students will engage in brainstorming exercises, develop game ideas and systems, and review and repurpose existing game mechanics. This course will help students find the balance between hard (planned logical) design and soft (more organic/emergent) design in order to develop compelling gameplay.

GAM 226 or GAM 224 is a prerequisite for this course.

GAM 330 | ADVANCED GAME PRODUCTION | 4 quarter hours
(Undergraduate)

This course builds on the fundamentals covered in earlier courses (GAM230 or IS372/ECT372) by providing a practical, hands-on context in which students can learn the tools and techniques game producers use to manage and organize assets, workflows, tasks, bugs, resources, and personnel. In this course, students combine classroom lectures and lab time to learn production theory, tools, and techniques fundamental to successful game development. Through this experience, students learn the skills and knowledge needed to have an immediate, positive impact on game development. Topics include: the process to refine ideas for game concepts, gameplay, and narrative; quality assurance of subjective elements including gameplay and art; design and art outsourcing pipelines; and feedback strategies and community management.

GAM 230 or IS 372 or ECT 372 is a prerequisite for this class.

GAM 333 | THE BUSINESS OF GAMES | 4 quarter hours
(Undergraduate)

This course gives an introduction to the business aspects of the game development industry, including development, publishing, distribution and marketing. Subjects covered include game development contracts, milestone-based development, management techniques, marketing, customer and community support, personnel, budgeting, outsourcing, pipelines, and external partnerships.

GAM 229 is a prerequisite for this class.

GAM 334 | THE BUSINESS OF INDIE GAMES | 4 quarter hours
(Undergraduate)

This class will explore how to successfully run an indie game company using an arsenal of best practices. Topics include how to write a game design document for marketability and a business plan for an indie studio, as well as how to build and maintain relationships with the media. Students will also gain an understanding of how indie games fit into the game industry as a whole.

GAM 229 is a prerequisite for this class.

GAM 340 | PRACTICAL SCRIPTING FOR GAMES | 4 quarter hours
(Undergraduate)

This workshop introduces game scripting to artists and game designers. A game script is a short list of commands that control something in a game, such as how a character moves, or an enemy’s behavior. Students will learn to read, modify, and author scripts that generate and affect a variety of game elements over the course of weekly projects.

GAM 245 or CSC 241 or CSC 242 or CSC 243 is a prerequisite for this class.

GAM 341 | INTRODUCTION TO LEVEL DESIGN | 4 quarter hours
(Undergraduate)

Level design is the art of creating believable environments, stages and missions for video games. This course explores topics including architecture, flow, pacing and puzzles. Using a 3D level editor, students will investigate technical design issues including the construction, texturing, lighting and scripting of modern game levels. The roles, duties and challenges of the level designer will also be discussed.

GAM 245 is a prerequisite for this class.

GAM 342 | ADVANCED LEVEL DESIGN | 4 quarter hours
(Undergraduate)

This class builds on topics covered in earlier courses, with a focus on creating believable worlds for videogames. This course emphasizes designing large exterior environments, advanced mission scripting, and integrated storytelling. Using a 3D level editor and formal level design process, students create fun, polished, memorable virtual worlds.

GAM 341 or GAM 392 is a prerequisite for this class.
GAM 350 | PHYSICS FOR GAME DEVELOPERS | 4 quarter hours
(Undergraduate)
The course concentrates on Newton's Laws of Motion, kinematics and kinetics. This theory will be applied to problems that a game programmer must understand e.g. collisions between objects, projectiles and their trajectories, real-time simulation of motion. Special objects such as cars, aircraft and ships will be discussed. Students will apply and implement laws of physics.

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

GAM 351 | EXPRESSIVE AUDIO SCRIPTING IN GAMES | 4 quarter hours
(Undergraduate)
This workshop is for game designers, sound designers and programmers to learn how to creatively use audio in game engines. Students develop skills to effectively shape and manipulate game audio to achieve intended dramatic experiences. Topics include key terms and techniques, industry trends in game audio implementation, and how to advance the medium of games through audio. Students listen and critique each other's work, learning to assess game audio in terms of narrative, aesthetics and quality.

GAM 353 | TOOL PROGRAMMING FOR GAME DEVELOPMENT | 4 quarter hours
(Undergraduate)
This course focuses on the parsing and conditioning of game related assets for real-time game engines. Topics include the content pipeline, processing or standard file formats using modern API, integration of external tools, run-time file format design, command line and graphical user interfaces.

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

GAM 355 | SOLO GAME DEVELOPMENT PROJECT | 4 quarter hours
(Undergraduate)
Students independently create a complete short video game serving as its designer, programmer, and artist. The project is structured around a compressed development cycle that supports an appropriately scoped, polished game. From brainstorming an innovative concept to rapidly prototyping and iterating on gameplay, the course focuses on core gameplay loops and game feel. A survey of noteworthy games developed by single authors in short timeframes provides students with references to draw from.

GAM 340 and GAM 341 are prerequisites for this class

GAM 362 | MAKING DEEP GAMES | 4 quarter hours
(Undergraduate)
This workshop investigates the process of designing games about the human condition. It specifically focuses on the potential of games to tackle profound and abstract ideas (e.g. loyalty, dignity, courage and trust) by way of metaphor and analogy. Assignments will explore metaphorical games, games for persuasion and games for self-expression. Special emphasis is placed on the analysis of personal experiences and how they can be translated systematically into game designs that generate non-typical gameplay content.

GAM 226 or GAM 224 is a prerequisite for this course

GAM 365 | ADVANCED GAME DESIGN | 4 quarter hours
(Undergraduate)
This is a studio course in which students work in teams to design and develop slices of polished small-scale gameplay experiences. The focus is on developing team-based creative and technical processes to produce innovative, engaging, and playable games. Teams will iteratively design and develop two distinct gameplay experiences or “vertical slices.” Each slice will demonstrate an understanding of the role of game mechanics, game art, audio, and technology platform in creating a cohesive and compelling gameplay.

(GAM 340 and GAM 341) or GAM 355 is a prerequisite for this class.

GAM 368 | AUGMENTED REALITY GAME DESIGN AND DEVELOPMENT | 4 quarter hours
(Undergraduate)
In this workshop students cultivate the skills to design, program and develop augmented reality (AR) games. Students learn about the unique affordances and design opportunities inherent to the platform. Based on the studio model, each student adopts a role on the development team, such as programmer, designer, and artist, and each is responsible for contributing professional work consistently each week. Because the platform of AR games presents unique challenges to developers (players often feel disoriented or over-tasked) teams first create a dozen AR toys, and build up the most promising experiences into games. Class time consists of lectures, workshops, workdays, playtests, critiques, and class discussions.

GAM 245 is a prerequisite for this class.

GAM 369 | VIRTUAL REALITY GAME DEVELOPMENT | 4 quarter hours
(Undergraduate)
In this workshop students cultivate the skills to design, program and develop VR (virtual reality) games. Students learn about the unique affordances and design opportunities inherent to the platform. Topics include the history of VR, VR art, as well as toy design and development. Students collaboratively develop cutting-edge VR toys and games using the studio model in which each student adopts a professional role on the team such as programmer, designer, and artist. Class time consists of lectures, workshops, workdays, playtests, critiques, and class discussions.

GAM 245 is a prerequisite for this class.

GAM 370 | RENDERING AND GRAPHICS PROGRAMMING | 4 quarter hours
(Undergraduate)
This programming class will present the rendering pipeline and basic shader creation. Students will create their own graphics package using a high-level graphics API such as Direct X. Topics covered include illumination techniques, Gouraud and Phong shading, antialiasing techniques, texture mapping, blending and environment mapping.

GAM 325 and CSC 361

GAM 372 | OBJECT-ORIENTED GAME DEVELOPMENT | 4 quarter hours
(Undergraduate)
Students will learn principles and techniques needed to build robust and efficient large scale game software systems. Principles of object-oriented modeling, design, implementation, and testing of large-scale game systems will be emphasized. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems.

CSC 361 is a prerequisite for this class
GAM 374 | GAME ENGINE PROGRAMMING I | 4 quarter hours (Undergraduate)
Students will develop a basic 3D game engine. The focus will be on the implementation challenges and interdependencies between systems such as asset management, rendering, simple collisions, input/output, alarms, etc. Emphasis will be placed on developing the skills needed for robust, efficient, and portable implementation.

GAM 372 and GAM 325 are prerequisites for this class.

GAM 376 | ARTIFICIAL INTELLIGENCE FOR COMPUTER GAMES | 4 quarter hours (Undergraduate)
Artificial Intelligence (AI) is one of the essential components of a computer game. The course introduces basic concepts of AI. Emphasis will be placed on applications of AI in various genres of computer games. In the implementation component of this course students will be exposed to the existing AI game engines (middleware), which contain implemented AI algorithms that are ready to be applied into game code. These algorithms include: decision trees, pathfinding, neural networks, and script-driven game object behaviors.

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

GAM 377 | GAME ENGINE PROGRAMMING II | 4 quarter hours (Undergraduate)
This class is a continuation of GAM 374. Students develop more complex systems for their 3D game engines: improved collision systems, terrain generation, and particle systems. Other advanced engine services are discussed and students are expected to research and implement one such system: sounds management, lighting system, tiered/broad phase collision system, advanced camera manipulation, etc.

GAM 374 is a prerequisite for this class.

GAM 378 | STRATEGY GAMES PROGRAMMING | 4 quarter hours (Undergraduate)
Turn-based and real-time strategy games. Abstract strategy games such as chess, backgammon, and bridge. Game themes and presentation of fantasy, historical and futuristic gaming scenarios. Ethically responsible content and social impact of different cultures, ethnicities, genders on the gameplay experience will be discussed. Game-player resource management. Implementation of strategy engines, 2D presentation and isometric projection.

GAM 376 is a prerequisite for this class.

GAM 380 | CONSOLE GAME DEVELOPMENT ENVIRONMENTS | 4 quarter hours (Undergraduate)
Specialized computers for games with high-end graphics and sound capabilities and other specialized input and output devices form one of the largest game markets. In this advanced programming course students will gain hands-on experience writing and porting code for game consoles.

CSC 393 and CSC 374 are prerequisites for this class.

GAM 382 | SERIOUS GAMES | 4 quarter hours (Undergraduate)
Explores the role of computer games and simulations for education and training. Topics include: overview of the science of learning, analysis of games for different purposes and types of content, assessment of learning, and learning through game creation. Students will design, implement, and evaluate a serious game. Development of socially responsible and ethical behaviors will be a primary objective.

GAM 245 is a prerequisite for this class.

GAM 383 | GAME STUDIO DEVELOPMENT | 4 quarter hours (Undergraduate)
This course focuses on the development cycle in a large game studio with a focus on pushing out a game targeted towards a commercial platform. The game in question is an ongoing development taking place over a number of years, Students participate quarterly and a public build will be made available at the end of the school year. This class can be taken multiple times but requires permission from the instructor each time. Each student will have a particular role in the studio where they will focus on developing mastery to help build the game over the course of the quarter. Available design roles include: Level Design, Gameplay design, UI Design, Graphic Design, Character Animation, Blueprint Specialist, Balancing, Narrative and Dialog, Writing, Cinematics and cutscenes, Production. Getting into the class requires the student to show a portfolio or display some level of mastery in one of the available areas to participate. This is an experiential learning credit class.

GAM 386 | GAME PROGRAMMING FOR MOBILE DEVICES | 4 quarter hours (Undergraduate)
In this course we introduce major mobile hardware platforms and their operating systems. Issues related to game design for handheld devices will be presented. The strong technical component of this course includes game programming for a handheld device with a wireless internet connection enabling multiplayer game architecture. Such concepts as: building a custom game library, multiplayer game programming, infrared, wireless and socket communication between devices will be discussed.

CSC 371 is a prerequisite for this class.

GAM 391 | GAME PERFORMANCE OPTIMIZATION | 4 quarter hours (Undergraduate)
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374.

GAM 392 | GAME MODIFICATION WORKSHOP | 4 quarter hours (Undergraduate)
In this course, students will develop skills in game design and development through the construction of a "mod" of an existing game. Emphasis will be placed on the game development life cycle from concept through release, on productivity in a team environment, and on effective project management practices.

GAM 365 or GAM 372 or (ANI 344 and GAM 341) are prerequisites for this class.

GAM 394 | GAME DEVELOPMENT PROJECT I | 4 quarter hours (Undergraduate)
Students work in teams to design and develop a videogame that demonstrates their mastery of game design and development. Additionally, students will reflect on ethical decision making and professional ethics in the game industry. This course and its continuation, GAM 395, must be taken consecutively.

GAM 377 or GAM 392 is a prerequisite for this class.
mixing sound designs for video games.

students to discover how to effectively and creatively communicate their ideas using accessible coding environments and engines and challenges them to build playful, interactive applications.

Students are introduced to the affordances of computers and digital technology as a medium using foundational texts from the discipline of digital media while being introduced to programming. The course teaches students to discover how to effectively and creatively communicate their ideas using accessible coding environments and engines and challenges them to build playful, interactive applications.

This course is an introduction to both the theory and practice of game design. Students will explore fundamental elements of game design and put these concepts to work in designing, prototyping, playtesting, and developing both physical and computer games. The course will cover formal elements of games, game dynamics, game narratives, and the dramatic components of games. Students will study the game design process including brainstorming, conceptualization, creation of design documentation, and play-testing. PREREQUISITE(S): none.

Review of mathematical foundation and techniques needed for the development of 3D graphics and game systems. This class will provide the foundation in linear algebra and 3D geometry required for implementing common tasks in 3D graphics and game systems. Topics include: vectors, matrices, transforms, coordinate changes, projections, intersection, interpolation and random number generator. 

CSC 403 is a prerequisite for this class.

Students will further their knowledge of recording techniques for voiceover, sound effects, and music; editing voiceover and music; and mixing. The course will also introduce audio implementation using Unity. Coursework will utilize the recording studio extensively for in-class and out-of-class work. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound designs for video games.

Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances video games. The course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score for their own video game as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied. 

GAM 426 is a prerequisite for this course.

This course is intended to provide practical experience in audio production for video games, as well as to offer the opportunity to create quality materials to include in a demo reel or portfolio. It will build on the background and skills acquired in Game Sound Design 2. Students will study the sound designs of different genres of video games, and then complete five projects in which they will be creating the sound designs for games of those genres. A key element of this course will be in-class discussions and critiques of students’ work, both to sharpen their sound design and critical listening skills.

GAM 427 | SCORING FOR GAMES | 4 quarter hours
(Graduate)

Students learn to appreciate and advance games as an artistic medium in this bootcamp by making work that is avant-garde in its formal aesthetics or sociopolitical force. Every two weeks students rapidly develop and complete an art game that challenges the conventional wisdom of what games are, how and why we play them, and the role they perform in popular culture.

GAM 440 | GAMES WITH A PURPOSE BOOTCAMP | 4 quarter hours
(Graduate)

This game design bootcamp focuses on the rapid yet deliberate creation of short games with a purpose beyond entertainment. Every two weeks, students are expected to deliver a completed game project that addresses a real-life issue, has a clear statement of intent and uses they specific properties of games as a medium to achieve its declared purpose.

GAM 450 | PHYSICS FOR GAME DEVELOPERS | 4 quarter hours
(Graduate)

The course concentrates on Newton’s Laws of Motion, kinematics and kinetics. This theory will be applied to problems that a game programmer must understand e.g. collisions between objects, projectiles and their trajectories, real-time simulation of motion. Special objects such as cars, aircraft and ships will be discussed. Students will apply and implement laws of physics. 

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

GAM 451 | EXPRESSIVE AUDIO SCRIPTING FOR GAMES | 4 quarter hours
(Graduate)

This workshop is for game designers, sound designers and programmers to learn how to creatively use audio in game engines. Students develop skills to effectively shape and manipulate game audio to achieve intended dramatic experiences. Topics include key terms and techniques, industry trends in game audio implementation, and how to advance the medium of games through audio. Students listen and critique each other’s work, learning to assess game audio in terms of narrative, aesthetics and quality. PREREQUISITE(S): None.
GAM 453 | TOOL PROGRAMMING FOR GAME DEVELOPMENT | 4 quarter hours (Graduate)
This course focuses on the parsing and conditioning of game related assets for real-time game engines. Topics include the content pipeline, processing or standard file formats using modern API, integration of external tools, run-time file format design, command line and graphical user interfaces. Adaptive real-time modification of data structures in game using managed languages (such as C#) will be explored.

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

GAM 462 | RITUAL, MYTH AND GAMES | 4 quarter hours (Graduate)
This class focuses on the intersection of ritual, myth, and games, and how they can facilitate personal transformation through contemplation of the "existential givens": birth, death, freedom, isolation, identity and the "meaning of life". We will draw on philosophy, anthropology, sociology, spiritual practices, psychotherapy as well as game design, theatre / performance study and fabrication ("making") to develop an interdisciplinary, creative framework for the design of playful, myth-based, transformational experiences. Our focus is on non-digital and hybrid playspaces to take full advantage of the power of embodiment and psycho-psychological immersion in ritual performance and the enactment of myth. PREREQUISITE(S): None.

GAM 470 | RENDERING AND GRAPHICS PROGRAMMING | 4 quarter hours (Graduate)
This programming class will present the rendering pipeline and basic shader creation. Students will create their own graphics package using a high-level graphics API such as Direct X. Performance issues will be considered as part of the API design. Topics covered include illumination techniques, Gouraud and Phong shading, antialiasing techniques, texture mapping, blending and environment mapping, reflection and hardware instancing.

GAM 475 and CSC 461 are prerequisites for this class.

GAM 475 | REAL - TIME SOFTWARE DEVELOPMENT | 4 quarter hours (Graduate)
Real-time software development. Topics include runtime library construction, abstracting low-level systems, custom data containers, memory tracking, framework development, real-time design patterns, low-level drivers, and graphics engine development. Design and implementation of multi-heap memory management systems with aligned allocations with cross heap tracking. Exploration of run-time control of behavior through real-time data driven messaging. Interface development to create a responsive optimized access to abstract data types. Students will design, develop and implement a real-time application (i.e. Graphics engine) that integrates multiple user-developed libraries with real-time constraints.

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

GAM 476 | ARTIFICIAL INTELLIGENCE FOR COMPUTER GAMES | 4 quarter hours (Graduate)
Artificial Intelligence (AI) is one of the essential components of a computer game. The course introduces basic concepts of AI. Emphasis will be placed on applications of AI in various genres of computer games. In the implementation component of this course students will be exposed to the existing AI game engines (middleware), which contain implemented AI algorithms that are ready to be applied into game code. These algorithms include: decision trees, pathfinding, neural networks, and script-driven game object behaviors.

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

GAM 486 | GAME PROGRAMMING FOR MOBILE DEVICES | 4 quarter hours (Graduate)
In this course we introduce major mobile hardware platforms and their operating systems. Issues related to game design for handheld devices will be presented. The strong technical component of this course includes game programming for a handheld device with a wireless internet connection enabling multiplayer game architecture. Such concepts as: building a custom game library, multiplayer game programming, infrared, wireless and socket communication between devices will be discussed.

CSC 471 is a prerequisite for this class.

GAM 491 | GAME PERFORMANCE OPTIMIZATION | 4 quarter hours (Graduate)
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): CSC 400 and CSC 403 and CSC 407.

GAM 499 | TOPICS IN COMPUTER GAME DESIGN AND DEVELOPMENT | 1-4 quarter hours (Graduate)
Variable topics course in computer game design and development. May be repeated for credit. PREREQUISITE(S): Permission of instructor (variable credit)

GAM 520 | GAME DESIGN PROSEMINAR | 4 quarter hours (Graduate)
In this foundational seminar course, students are exposed to significant written works that examine the medium of games in historical, cultural, and social contexts. Students analyze and interpret games in classroom discussions and written explorations that reveal the meaning and values of games as cultural artifacts. In doing so, they learn to situate their own critical practice within the history of the medium. PREREQUISITE(S): GAM 420.

GAM 530 | GAMES STUDIES PROSEMINAR | 4 quarter hours (Graduate)
This seminar class introduces students to a broad range of historical and current topics in game studies. It aims to support creative practice by expanding the theoretical foundation established in Game Design Proseminar with additional, deep insight into disciplines that relate to games, play, players, learning, activism, and art. PREREQUISITE(S): GAM 520.

GAM 540 | GAME DEVELOPMENT PRACTICUM | 4 quarter hours (Graduate)
This course introduces the creation of a term-long project in teams. In contrast to studio classes where students can work alone or with others and decide what games they want to create, the practicum requires students to make games about a specific topic or theme proposed by faculty. This can include a requirement of working with a client, involving subject matter experts in the design process, developing a site-specific art game installation, or working with a novel platform such as a wearable device.
GAM 550 | INCUBATION STUDIO | 4 quarter hours 
(Graduate)

Students situate their creative practice within historical, aesthetic, and social contexts. This includes an introspective analysis of why they want to design games. Students identify potential research areas or creative catalysts for their thesis projects, conducting research, critiquing and analyzing relevant work, technologies, and reference materials. The final course assignment is a thesis proposal outlining their project plans for Thesis Studio, which each student must get approved by their advisor before entering Thesis Studio. PREREQUISITE(S): GAM 530 and GAM 540.

GAM 575 | REAL-TIME SOFTWARE DEVELOPMENT II | 4 quarter hours 
(Graduate)

Real-time software development with asset conversion. Topics include offline data conversion, asset packing, data driven application behavior, hierarchy base scene management, profiling and debugging large opaque data, runtime formats for low-level drivers, and advanced visualization techniques. Design and implementation of hierarchy based data systems with dynamic real-time modifications. Exploration of run-time control of behavior through real-time data driven messaging. Implementation of the complete application process: tool creation, asset condition, responsive loading and data driven runtime behavior. Students will design, develop and implement a real-time application (i.e. Animation engine) that integrates large real-time converted data assets with real-time constraints.

GAM 475 is a prerequisite for this class.

GAM 576 | GPU ARCHITECTURE | 4 quarter hours 
(Graduate)

Real-time application GPU development. Topics include GPU pipeline, data parallelization, hierarchy data flow on GPU, asset compression, non-graphics data processing, graphics rendering and data conversion. Design and implementation of parallel GPU applications across multiple GPU cores. Exploration of different parallelization techniques for large (non-graphical) computationally heavy systems. Developing and debugging blind data flow on GPU hardware. Students will design, develop and implement a real-time GPU application (i.e. Skinned Animation rendering engine) that integrates large converted data assets using 100s of parallel GPU cores.

GAM 575 is a prerequisite for this class.

GAM 594 | GAMING AND ENTERTAINMENT TECHNOLOGY CAPSTONE | 4 quarter hours 
(Graduate)

This course gives students an opportunity to utilize knowledge obtained in this degree program in developing a computer game, from conceptualization, design, to implementation. Issues in project management and configuration management will also be addressed. This work will constitute a major part of the project portfolio that students have developed during their study. PREREQUISITE(S): Completion Of Foundation Courses.

GAM 597 | TOPICS IN GAME DESIGN | 4 quarter hours 
(Graduate)

Specific topics selected by the instructor. Topic varies with each offering. Contact instructor for more information. PREREQUISITE(S): See syllabus.

GAM 598 | TOPICS IN GAME PROGRAMMING | 1-4 quarter hours 
(Graduate)

Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

GEO 101 | ENVIRONMENTAL GEOGRAPHY | 4 quarter hours 
(Undergraduate)

An introduction to the history, scope, and breadth of environmental inquiry within Geography. The course will be divided between Physical Geography – that is, the spatial aspects of the Geosystem including the Atmosphere, Hydrosphere, Lithosphere, and Biosphere, and geographical perspectives of and approaches to the Human-Environment, to include Hazards Geography, Resource Geography, Cultural and Political Ecology.

GEO 103 | URBANIZATION | 4 quarter hours 
(Undergraduate)

The course explores the evolution of urban forms and structures in the United States from the perspective of geography. In addition to studying the historic emergence of the American urban system, the course covers processes and phenomena associated with the spatial organization of housing, transportation, commercial and industrial land-use planning, as well as urban poverty, local governance, and issues of race, gender and sexuality.

GEO 133 | URBAN GEOGRAPHY - EXPERIENTIAL LEARNING | 4 quarter hours 
(Undergraduate)

The course provides an in depth analysis of a Chicago neighborhood, connecting this to wider U.S. trends in urbanization and urban development. Students conduct a research project, through archival study and field work.
This course focuses on the application and meaning of ‘sustainability’ to our discussion and understanding of cities, urban communities, and the urbanization process. The course conceptualizes sustainability as residing at the intersection of political, economic, social, and ecological thinking and examines its utility and flexibility towards urban form and function. The course pursues the topic of urban sustainability through the lenses of scale (e.g., local vs. global), justice (e.g., social vs. ecological), and diversity (e.g., cultural vs. biotic).
GEO 211 | BIOGEOGRAPHY | 4 quarter hours
(Undergraduate)
Biogeography is the study of the distribution of plants and animals on the earth's surface, and the historical and ecological factors and human activities responsible. It asks questions such as: Why were placental mammals absent from (pre-European) Australia, while marsupials were abundant? How are current plant species' distributions different from those of the past, and what implications does this have for their ability to respond to global changes? Why have islands sustained so many extinctions compared to mainlands? Why are there so many insect species in the tropics and so few at high latitudes? How are humans changing the distribution and abundances of plant and animals? This course explores these and other such questions. The goal is to understand biodiversity patterns and processes across earth, and how this knowledge can help maintain biological communities in human-dominated, 21st century landscapes.

GEO 215 | INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY | 4 quarter hours
(Undergraduate)
This course charts the economic transformation in the Third World / Global South. The first third of the course examines theories of development and underdevelopment before moving on to a critique of the concept of development as a modernist paradigm using a postcolonial framework. The rest of the course examines the restructuring of the agricultural, manufacturing and service sectors, including the financial sector, in non-Western countries.

GEO 218 | SPAIN AND PORTUGAL | 4 quarter hours
(Undergraduate)
A geographical exploration of Spain and Portugal's history, culture, politics and society. This course focuses on critical periods, events, and socio-political forces that substantially influenced these countries and demonstrate their role as one of Europe's key links to Latin America and Africa.

GEO 219 | WOMEN AND SCIENCE | 4 quarter hours
(Undergraduate)
In this course, we will examine the evolving relationship between women and science. There are growing opportunities for and representation of women in scientific fields in many parts of the world, but there are historical contexts that should be considered and remaining challenges that are being addressed. We will begin the course with a review of the scientific method—what is this process and what about it has enabled it to attain legitimacy as a way of knowing the world? We will also learn about female scientists in the fields of environmental geography and ecology who have broken gender norms and boundaries and made notable scientific contributions. Students will learn through several case studies of both well-known scientists as well as those who are less widely recognized. Finally, we will examine aspects of science and culture that have impacted women's participation and achievements.

GEO 220 | OCEANOGRAPHY | 4 quarter hours
(Undergraduate)
Develops the concepts of physical oceanography. Topics include the chemical and physical properties of seawater, the dynamics of ocean currents and circulations, the physics of water waves and tides, the interaction of the ocean with the atmosphere, the formation of coastlines, and the effects of pollution on the ocean. Cross-listed with PHY 220. LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

GEO 225 | EARTH'S CHANGING CLIMATE | 4 quarter hours
(Undergraduate)
The dynamic atmospheric processes which control day-to-day weather and the longer term processes which determine prevailing climatic conditions are the two principal foci of this course. Special topics include weather systems, climate change, global warming, and human impacts on climate. Cross-listed with PHY 225.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

GEO 231 | HISTORICAL GEOGRAPHY OF CHICAGO | 4 quarter hours
(Undergraduate)
An exploration of Chicago's urban geography, focusing in detail on topics such as historical geography, industrial development, community development, built environment (i.e., housing/architecture), transportation and neighborhood change. Cross-listed with HST 240 and AMS 240.

GEO 233 | COMPARATIVE URBANISM | 4 quarter hours
(Undergraduate)
The course explores the history of mapmaking as a dimension and expression of the intellectual, scientific, technological, and political transformation of society. Focusing primarily on Europe and North America, the course covers the prevailing schools of thought and practitioners, and the structures and forces that shaped them. The course includes hands-on study of archival quality maps in DePaul's Special Collections and other regional institutions. Short field trip to the Newberry Library required.

GEO 240 | HISTORY OF CARTOGRAPHY | 4 quarter hours
(Undergraduate)
The course explores the history of mapmaking as a dimension and expression of the intellectual, scientific, technological, and political transformation of society. Focusing primarily on Europe and North America, the course covers the prevailing schools of thought and practitioners, and the structures and forces that shaped them. The course includes hands-on study of archival quality maps in DePaul's Special Collections and other regional institutions. Short field trip to the Newberry Library required.

GEO 241 | GEOGRAPHIC INFORMATION SYSTEMS | 4 quarter hours
(Undergraduate)
Instruction is accomplished through lectures and hands-on exercises using ArcGIS.

GEO 242 | GEOGRAPHIC INFORMATION SYSTEMS II: COMMUNITY GIS | 4 quarter hours
(Undergraduate)
An intermediate-level course focusing on applications of GIS for community development. Students conduct real-world GIS projects for community organizations in Chicagoland. Students will learn to design and create geographic information products that meet community partners' needs through the process of proposing, defining, and implementing GIS projects in collaboration with community partners. The course teaches an intermediate-level GIS skills, including address geocoding, spatial join, proximity analysis, and density mapping. Instruction is accomplished through lectures and hands-on exercises using ArcGIS.

GEO 141 or PSC 201 is a prerequisite for this class.

GEO 243 | EARTH OBSERVATION | 4 quarter hours
(Undergraduate)
Earth observation is the gathering of information about the planet via remote sensing technologies. This introductory level course covers how images of Earth are acquired via satellite and airborne sensors as well as how to process and interpret them to better understand our planet. The fundamentals of geospatial technology and introductory satellite-based remote sensing algorithms will be taught via lectures and hands-on labs.
GEO 315 | THE STATE AND ECONOMIC GROWTH | 4 quarter hours
(Undergraduate)
This course focuses on the role of the state in economic growth. The first half of the course studies the historical background, theory and criticism of the role of the state in economic growth, including the transitional economies of post-Communist countries. The second half examines case studies from different Asian and Eastern and Central European countries in the key moments of the incorporation of those states and their societies into the globalized economy. Some topics covered include corruption, transitional informal economies and industrial policy.

GEO 316 | THE EUROPEAN UNION | 4 quarter hours
(Undergraduate)
An integration of political geographic and international relations perspectives on European integration: Special emphases on political philosophies and theories of integration, the geopolitics of block formation and enlargement, institutional structure, the evolution of policies, and the future directions of the European Union. Cross-listed with PSC 340 and IRE 106.

GEO 320 | GLOBALIZATION AND RESOURCES | 4 quarter hours
(Undergraduate)
An exploration of globalization and the politics and flow of natural resources between the developed and developing world, especially since World War II. Using case studies from around the world, the course introduces students to competing paradigms of environmental and resource destruction and to the complexities and contingencies of social and environmental change in the "new" global economy.

GEO 326 | WORLD ECONOMY: STATES, MARKETS AND LABOR | 4 quarter hours
(Undergraduate)
This course introduces students to competing economic and political frameworks that analyze the interaction of states, markets and societies. The overall theme of the course is the spread of capitalism and the tandem disembedding of economic relations from social relations beginning with the Industrial Revolution in the 18th century through to the early 21st century.

GEO 329 | CULTURAL AND POLITICAL ECOLOGY | 4 quarter hours
(Undergraduate)
The course introduces students to the theoretical foundations and evolution of critical Political Ecology and its assessment of environmental change and social vulnerability in the developing world. The course traces the history of the discipline to its early roots in geography, anthropology, and ecology and tracks its emergence as a theoretically sophisticated critique of the global spread of economic development and environmental policy.

GEO 330 | SUSTAINABLE URBAN TRANSPORTATION | 4 quarter hours
(Undergraduate)
The course introduces transportation geography and explores the characteristics of sustainable transportation systems. From electric vehicles to new services like car and bike sharing, the course examines the role that transportation plays in environmental, social, and economic sustainability. Students will learn about current issues in urban transportation (both passenger and freight), and receive an introduction to tools and techniques used by transportation planners, e.g., Geographic Information Systems (GIS). Formerly GEO 230.

GEO 333 | URBAN PLANNING | 4 quarter hours
(Undergraduate)
A seminar on the intellectual history and theories of urban planning and design, and their application in urban settings in the U.S. and abroad. Systematic study of case studies leads to the investigation of current urban planning issues in Chicago.

GEO 334 | URBAN/CITY DESIGN | 4 quarter hours
(Undergraduate)
The course introduces the study of city/urban design? one of the building professions, which include architecture, landscape architecture, sculpture, and land design? from a distinctly geographic perspective. It addresses the evolution of concepts, ideas, and practices of the urban design profession through case studies, and discusses design? impacts on the quality of urban life, and the city?s ?legibility,? access, and equity. This, primarily, studio/skills-based course introduces students to key techniques shared by the building professions: ?figure-ground? and perspective drawing, urban sketching, georeferencing, ?rephotography,? site analysis, 3D object design and printing, and physical model-building.

GEO 310 | GREEN INFRASTRUCTURE | 4 quarter hours
(Undergraduate)
Green Infrastructure (GI) goes beyond the conventional conservation efforts of creating and maintaining national and state parks and wildlife refuges. Instead, GI promotes conservation that takes place at different spatial scales to create a network of open spaces out of existing open spaces and green corridors as well as offering strategies for constructing green spaces out of abandoned urban spaces.
GEO 242 is a prerequisite for this class.

interpolation with GIS. Instruction is accomplished through lectures and suitability analysis, point pattern analysis, network analysis, and spatial sustainability issues of their interest. Students will learn techniques for An advanced-level course. Students conduct spatial analysis into (Undergraduate)

FOR SUSTAINABILITY | 4 quarter hours

GEO 243 is a prerequisite for this course.

GEO 243. culminates in a self-directed remote sensing research project. Prereq. (Undergraduate)

GEO 343 | TOPICS IN ARCHITECTURE AND URBANISM | 4 quarter hours

Cities are changing dramatically as a result of the accelerated circulation of finance capital worldwide, the emergence of new information and data visualization technologies, the expansion of credit, the ceaseless retrenchment of population groups inside and around cities, and the emergence of new architectural and planning paradigms. The course explores and researches aspects of these transformative processes and their impacts on race, class, economic prosperity, and the contingencies of quality of urban life. A significant research and writing project is required in this specialist high-level course.

GEO 340 | PLACES, HUMANITIES AND GEOGRAPHIC INFORMATION SYSTEMS | 4 quarter hours

The course examines applications of GIS to digital humanities. The course focuses on techniques for processing geospatial data and making maps from sources related to humanities subject using a popular open source GIS software, QGIS. The course examines digital humanities projects that use GIS, and ways to deal with challenges to work with humanities data in addition to fundamentals of GIS. Students will learn techniques for map design, image georeferencing, mapping texts, mapping changes, and mapping qualitative data. The class is largely conducted through lectures and hands-on activities in a GIS laboratory.

GEO 343 | EARTH OBSERVATION II | 4 quarter hours

This course incorporates imagery from satellite and airborne sensors to teach intermediate-level remote sensing techniques for earth observation. There will be an emphasis on conducting computationally intensive remote sensing tasks (such as machine learning) and using programming languages to efficiently process images. The course culminates in a self-directed remote sensing research project. Prereq. GEO 243.

GEO 243 is a prerequisite for this course.

GEO 344 | GEOGRAPHIC INFORMATION SYSTEMS III: SPATIAL ANALYSIS FOR SUSTAINABILITY | 4 quarter hours

An advanced-level course. Students conduct spatial analysis into sustainability issues of their interest. Students will learn techniques for suitability analysis, point pattern analysis, network analysis, and spatial interpolation with GIS. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS.

GEO 242 is a prerequisite for this class.

GEO 345 | PROGRAMMING IN PYTHON FOR GIS | 4 quarter hours

Knowledge of a scripting language is a valuable skill for GIS analysts. Students will learn the basics of Python (a programming language), including script writing and implementation. By completing this course, students should be able to manipulate GIS data, automate GIS workflows, and develop customized GIS tools by writing script in Python in ArcGIS. The class is largely conducted through hands-on activities in a GIS laboratory.

GEO 141 or PSC 201 is a prerequisite for this class.

GEO 346 | GIS ANALYSIS OF ENVIRONMENTAL AND PUBLIC HEALTH | 4 quarter hours

Spatial data visualization and GIS applications are increasingly at the forefront of health data analysis. This course will examine health data using GIS and topics will be drawn from GIS applications that explore epidemiology, local and global health inequalities, and the role of GIS in public health, using data visualization, network and site analysis, and applied GIS research techniques. Cross-listed with GEO 446.

GEO 141 or PSC 201 is a prerequisite for this class.

GEO 347 | WEB GIS AND SPATIAL DATA VISUALIZATION ON THE WEB | 4 quarter hours

This project-oriented course will enable students to independently develop Web-based Geographic Information Systems (GIS) applications. The course introduces current developments in Web GIS technologies, their applications, and advanced cartography skills. Students will learn how to use Web GIS mapping tools and how to publish web-enabled interactive maps using commercial internet map servers (e.g., ArcGIS Online or ArcGIS for Server) and other cloud-based technologies. Students will be introduced to Application Programming Interfaces (e.g., JavaScript API) and open source tools, and will develop customized Web GIS applications such as spatial data models. Cross-listed with GEO 447.

GEO 141 or PSC 201 is a prerequisite for this class.

GEO 348 | SPATIAL DATA SCIENCE | 4 quarter hours

Data that carry location markers have become prevalent. Examples include demographic data from census, crime incidents through open government, location traces from smartphones, imagery from satellite, and pollution data from sensors. There will be more needs for spatially integrating and analyzing data to make better sense of and make connection among data. The course examines fundamental concepts and methods for spatial data science through a series of activities for creating, exploring, wrangling, and analyzing spatial data. Topics include web scraping, geocoding, exploratory spatial data analysis, spatial data quality, regionalization, and hot spot detection. The course focuses on creating reproducible workflow for spatial data science projects using relevant Python libraries with a Jupyter Notebook that enables interactive computing on the web. GEO 345 or CSC 241 or the permission of instructor is the prerequisite of GEO 348.

GEO 345 or GEO 445 or CSC 241 or CSC 242 or CSC 401 or with instructor permission is a prerequisite for this course.

GEO 350 | WORLD OF WINE | 4 quarter hours

An analysis of the geographical factors that influence the global production and distribution of wine. Students must be 21 years of age or older.
GEO 351 | GEOGRAPHY, FOOD AND JUSTICE | 4 quarter hours  
(Undergraduate)  
While the need for food is universal, geographies of food production, distribution and consumption are anything but even. This leads to multiple issues of food injustice at a variety of scales. This course critically examines the contemporary global food system with the goal of providing students with skills and knowledge to engage in food justice activism. Students study the development of food systems and how inequalities have emerged in production, distribution and consumption. The course then explores food justice movements including the emergence of alternative food networks in the U.S. and internationally. Assignments may engage students in local food projects and/or advocacy campaigns.

GEO 369 | RISKS, HAZARDS AND NATURAL DISASTERS | 4 quarter hours  
(Undergraduate)  
This course is about the interaction of humans with extreme natural and anthropogenic events like storms, earthquakes and climate change. We will examine how people become vulnerable to such events, how they are affected by them, how they contribute to causing them, how they cope - or fail to cope - and what they do when existing adjustments are unsuccessful. You will learn how disasters are the product of multiple and interacting forces; biophysical processes are only part of the equation. We will explore how livelihoods, places and institutions come together to create hazardous situations and disastrous outcomes. We will look at trends in hazards and losses, and the distribution of vulnerability and hazard impacts within and across populations and places. For a variety of global environmental and social reasons, losses from hazards and disasters are projected to increase at increasing rates into the foreseeable future. Hazards and the disasters they generate, thus, are inherently engaging subjects. They also depend on a multidisciplinary approach for their investigation and mitigation, bringing in the insights of natural scientists, social scientists, engineers, planners, emergency managers, first responders, and others. Geography is a very active discipline in the investigation of hazards, with its physical science, social science, and mapping traditions, as well as its ability to integrate these very different conceptual approaches with practical applications at all stages of the disaster cycle.

GEO 391 | STATISTICAL DATA ANALYSIS FOR GIS | 4 quarter hours  
(Undergraduate)  
This course examines statistical concepts and techniques that are applied to geographic problems. Topics include descriptive statistics and inferential statistics geared toward working with geographic data in GIS. Students will learn techniques for summarizing variables, testing difference of means, spatial autocorrelation, hot spot analysis, and correlation analysis through lectures and hands-on exercises using statistics and GIS software.

GEO 141 or PSC 201 is a prerequisite for this class.

GEO 395 | SEMINAR IN SELECTED TOPICS | 4-8 quarter hours  
(Undergraduate)  
Upper-division seminar exploring selected geographical issues.

GEO 398 | INTERNSHIP | 1-6 quarter hours  
(Undergraduate)  
The course combines academic study with practical experience obtained through work in an extramural internship setting. The internship course requires academic output in the form of a research journal, paper, or other project.

GEO 399 | INDEPENDENT STUDY | 1-4 quarter hours  
(Undergraduate)  
Intensive study of a topic of special interest. Private conferences with instructor of supervised reading and research. Variable credit. Junior or Senior standing and department consent are a prerequisite for this class.

GEO 430 | SUSTAINABLE URBAN TRANSPORTATION | 4 quarter hours  
(Graduate)  
The course introduces transportation geography and explores the characteristics of sustainable transportation systems. From electric vehicles to new services like car and bike sharing, the course examines the role that transportation plays in environmental, social, and economic sustainability. Students will learn about current issues in urban transportation (both passenger and freight), and receive an introduction to tools and techniques used by transportation planners, e.g., Geographic Information Systems (GIS).

GEO 433 | URBAN PLANNING | 4 quarter hours  
(Graduate)  
A seminar on the intellectual history and theories of urban planning and design, and their application in urban settings in the U.S. and abroad. Systematic study of case studies leads to the investigation of current urban planning issues in Chicago.

GEO 440 | PLACES, HUMANITIES AND GEOGRAPHIC INFORMATION SYSTEMS | 4 quarter hours  
(Graduate)  
This course explores the issues raised by digital humanities in art history through a specific focus on the digital mapping of art historical questions. Students will focus on advanced discussions of digital mapping but also apply these theoretical and methodological concerns to art historical problems. Students will learn techniques of map design, mapping texts, mapping changes, and mapping qualitative humanities data as they develop their own historical project.

GEO 441 | GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT | 4 quarter hours  
(Graduate)  
This course will focus on applications of Geographic Information Systems (GIS) to community studies and community development. As an amalgam of information technologies (e.g. database management, Web 2.0) and earth measurement technologies (e.g. global positioning systems, remote sensing), GIS is rapidly entering the realm of community development. The course will explain how GIS works; enable students to learn techniques including mapping, spatial analysis, and data management; and provide students with the opportunity to apply GIS to community development. Cross-listed with MPS 552.

GEO 442 | GEOGRAPHICAL INFORMATION SYSTEMS (GIS) FOR SUSTAINABLE URBAN DEVELOPMENT | 4 quarter hours  
(Graduate)  
An intermediate-level GIS course focusing on the application of GIS skills to real-world problems. Students as a group will conduct GIS projects that are proposed by community-based organizations (CBOs) that work towards promoting sustainability in Chicagoland. Topics include remote sensing, GPS, geocoding, hot spot detection, spatial interpolation, and network analysis. The course also explores case studies on using GIS for sustainable urban development. PREREQUISITE(S): GEO 441 or MPS 552 (GIS for Community Development).

GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.
GEO 443 | EARTH OBSERVATION II | 4 quarter hours (Graduate)
This course incorporates imagery from satellite and airborne sensors to teach intermediate-level remote sensing techniques for earth observation. There will be an emphasis on conducting computationally intensive remote sensing tasks (such as machine learning) and using programming languages to efficiently process images. The course culminates in a self-directed remote sensing research project.
GEO 441 or equivalent is a prerequisite for this course.

GEO 445 | PROGRAMMING IN PYTHON FOR GIS | 4 quarter hours (Graduate)
Knowledge of a scripting language is a valuable skill for GIS analysts. Students will learn the basics of Python (a programming language), including script writing and implementation. By completing this course, students should be able to manipulate GIS data, automate GIS workflows, and develop customized GIS tools by writing script in Python in ArcGIS. The class is largely conducted through hands-on activities in a GIS laboratory. Cross-listed with GEO 345.
GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.

GEO 446 | GIS ANALYSIS OF ENVIRONMENTAL AND PUBLIC HEALTH | 4 quarter hours (Graduate)
Spatial data visualization and GIS applications are increasingly at the forefront of health data analysis. This course will examine health data using GIS and topics will be drawn from GIS applications that explore epidemiology, local and global health inequalities, and the role of GIS in public health, using data visualization, network and site analysis, and applied GIS research techniques.
GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.

GEO 447 | WEB GIS AND SPATIAL DATA VISUALIZATION ON THE WEB | 4 quarter hours (Graduate)
This project-oriented course will enable students to independently develop Web-based Geographic Information Systems (GIS) applications. The course introduces current developments in Web GIS technologies, their applications, and advanced cartography skills. Students will learn how to use Web GIS mapping tools and how to publish web-enabled interactive maps using commercial internet map servers (e.g., ArcGIS Online or ArcGIS for Server) and other cloud-based technologies. Students will be introduced to Application Programming Interfaces (e.g., JavaScript API) and open source tools, and will develop customized Web GIS applications such as spatial data models. Cross-listed with GEO 347.
GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.

GEO 448 | SPATIAL DATA SCIENCE | 4 quarter hours (Graduate)
Data that carry location markers have become prevalent. Examples include demographic data from census, crime incidents through open government, location traces from smartphones, imagery from satellite, and pollution data from sensors. There will be more need for spatially integrating and analyzing data to make better sense of and make connection among data. The course examines fundamental concepts and methods for spatial data science through a series of activities for creating, exploring, wrangling, and analyzing spatial data. Topics include web scraping, geocoding, exploratory spatial data analysis, spatial data quality, regionalization, and hot spot detection. The course focuses on creating reproducible workflow for spatial data science projects using relevant Python libraries with a Jupyter Notebook that enables interactive computing on the web. GEO 445 or CSC 402 or the permission of instructor is the prerequisite of GEO 448.
GEO 445 or CSC 402 or with instructor permission is a prerequisite of this class.

GEO 469 | RISKS, HAZARDS AND NATURAL DISASTERS | 4 quarter hours (Graduate)
This course is about the interaction of humans with extreme natural and anthropogenic events like storms, earthquakes and climate change. We will examine how people become vulnerable to such events, how they cope - or fail to cope - and what they do when existing adjustments are unsuccessful. You will learn how disasters are the product of multiple interacting forces; physical processes are only part of the equation. We will explore how livelihoods, places and institutions come together to create hazardous situations and disastrous outcomes. We will look at trends in hazards and losses, and the distribution of vulnerability and hazard impacts within and across populations and places. For a variety of global environmental and social reasons, losses from hazards and disasters are projected to increase at increasing rates into the foreseeable future. Hazards and the disasters they generate, thus, are inherently engaging subjects. They also depend on a multidisciplinary approach for their investigation and mitigation, bringing in the insights of natural scientists, social scientists, engineers, planners, emergency managers, first responders, and others. Geography is a very active discipline in the investigation of hazards, with its physical science, social science, and mapping traditions, as well as its ability to integrate these very different conceptual approaches with practical applications at all stages of the disaster cycle.

GEO 491 | STATISTICAL DATA ANALYSIS FOR GIS | 4 quarter hours (Graduate)
This course examines statistical concepts and techniques that are applied to geographic problems. Topics include descriptive statistics and inferential statistics geared toward working with geographic data in GIS. Students will learn techniques for summarizing variables, testing difference of means, spatial autocorrelation, hot spot analysis, and correlation analysis through lectures and hands-on exercises using statistics and GIS software.
GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.

GEO 499 | INDEPENDENT STUDY [GRADUATE] | 2-4 quarter hours (Graduate)
Intensive study of a topic of special interest. Private conferences with instructor of supervised reading and research. Variable credit. Instructor consent required.
German (GER)

GER 101 | BASIC GERMAN I | 4 quarter hours
(Undergraduate)
GER 101 is the first quarter of the first-year college German sequence. It introduces the students to the study of language and culture of German speaking countries. The course focuses on the development of all four critical language skills—listening, reading, writing and speaking—while also introducing aspects of German-speaking societies that differ from American society. In-class work will be devoted primarily to communication activities, so that students will be able to utilize the structures and vocabulary you learn to express themselves meaningfully and to function in a German-speaking setting. To maximize each student’s engagement with the language, students will be talking and listening to each other as much as to the instructor. At the end of the three-course sequence, students will be in command of the basic elements of German language and culture, and should be able to function with relative ease in German-speaking countries. Students will be able to comprehend and engage in basic conversations, write clearly and effectively in German, and read simple but genuine texts.

GER 101S | BASIC GERMAN I FOR SUMMER | 6 quarter hours
(Undergraduate)
(Covers the equivalent of the GER 101 and the first half of GER 102.)
The first half of beginning German. The basic elements of the German language, spoken as well as written, with due regard to the cultural context of German expression.

GER 102 | BASIC GERMAN II | 4 quarter hours
(Undergraduate)
GER 102 is the second quarter of the first-year college German sequence. It continues to introduce the students to the study of language and culture of German speaking countries. The course focuses on the development of all four critical language skills—listening, reading, writing and speaking—while also introducing aspects of German-speaking societies that differ from American society. In-class work will be devoted primarily to communication activities, so that students will be able to utilize the structures and vocabulary to express themselves meaningfully and to function in a German-speaking setting. To maximize each student’s engagement with the language, students will be talking and listening to each other as much as to the instructor. At the end of the three-course sequence, students will be in command of the basic elements of German language and culture, and should be able to function with relative ease in German-speaking countries. Students will be able to comprehend and engage in basic conversations, write clearly and effectively in German, and read simple but genuine texts.

GER 102S | BASIC GERMAN II FOR SUMMER | 6 quarter hours
(Undergraduate)
(Covers the equivalent of the second half of GER 102 and all of GER 103.)
The second half of beginning German. Further work on the basic elements of the German language, spoken as well as written, with due regard to the cultural context of German expression.

GER 103 | BASIC GERMAN III | 4 quarter hours
(Undergraduate)
GER 103 is the third quarter of the first-year college German sequence. It continues to introduce the students to the study of language and culture of German speaking countries. The course focuses on the development of all four critical language skills—listening, reading, writing and speaking—while also introducing aspects of German-speaking societies that differ from American society. In-class work will be devoted primarily to communication activities, so that students will be able to utilize the structures and vocabulary to express themselves meaningfully and to function in a German-speaking setting. To maximize each student’s engagement with the language, students will be talking and listening to each other as much as to the instructor. At the end of the three-course sequence, students will be in command of the basic elements of German language and culture, and should be able to function with relative ease in German-speaking countries. Students will be able to comprehend and engage in basic conversations, write clearly and effectively in German, and read simple but genuine texts.

GER 103S | BASIC GERMAN III FOR SUMMER | 6 quarter hours
(Undergraduate)
(Covers the equivalent of the second half of GER 103 and all of GER 104.)
The first quarter of second-year college German, and emphasizes language as communication in real-life situations and as a means to immerse ourselves in the contemporary cultures and societies of German-speaking countries. Though students will review and perfect their knowledge of German grammar throughout the year, they will focus on the perfection of the four language skills reading, writing, listening and speaking. Students will have ample opportunities to express themselves in German, acquire basic discussion strategies, and gain insight into many aspects of the contemporary cultures and societies of German-speaking countries. GER 103 or equivalent, including placement test or permission of instructor, is recommended.

GER 104 | INTERMEDIATE GERMAN I | 4 quarter hours
(Undergraduate)
This course is the first quarter of second-year college German, and emphasizes language as communication in real-life situations and as a means to immerse ourselves in the cultures of German-speaking countries. Though students will review and perfect their knowledge of German grammar throughout the year, they will focus on the perfection of the four language skills reading, writing, listening and speaking. Students will have ample opportunities to express themselves in German, acquire basic discussion strategies, and gain insight into many aspects of the contemporary cultures and societies of German-speaking countries. GER 104 or equivalent, including placement test or permission of instructor, is recommended.

GER 105 | INTERMEDIATE GERMAN II | 4 quarter hours
(Undergraduate)
This course is the second quarter of second-year college German, and emphasizes language as communication in real-life situations and as a means to immerse ourselves in the cultures of German-speaking countries. Though students will review and perfect their knowledge of German grammar throughout the year, they will focus on the perfection of the four language skills reading, writing, listening and speaking. Students will have ample opportunities to express themselves in German, acquire basic discussion strategies, and gain insight into many aspects of the contemporary cultures and societies of German-speaking countries. GER 104 or equivalent, including placement test or permission of instructor, is recommended.
GER 106 | INTERMEDIATE GERMAN III | 4 quarter hours  
(Undergraduate)  
This video-based course is designed to develop and expand skills in German and explore ideas, cultural topics and themes from the German-speaking world. Course activities will include: learning from authentic video clips and films; visiting (in textbook and video) various cities and regions in the German-speaking world, exploring the variety and the similarities; practicing skills in German by discussing cultural issues and authentic readings; interpreting graphics and charts on topics of German culture; structured listening and writing practice; reading literary and nonliterary texts of increasing difficulty; summarizing verbally and in writing what is read, heard, and learned; writing compositions and short texts of various types; researching a topic; preparing and presenting results to the class (oral and written). GER 105 or equivalent, including placement test or permission of instructor, is recommended.

GER 130 | MOLILSAP STUDY ABROAD | 2 quarter hours  
(Undergraduate)  
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

GER 197 | SPECIAL TOPICS IN GERMAN | 4 quarter hours  
(Undergraduate)  
See schedule for current offerings.

GER 198 | STUDY ABROAD | 1-8 quarter hours  
(Undergraduate)  
Variable credit.

GER 199 | INDEPENDENT STUDY | 0.5-4 quarter hours  
(Undergraduate)  
Variable credit.

GER 201 | ADVANCED GERMAN I: COMING TO TERMS WITH THE PAST | 4 quarter hours  
(Undergraduate)  
The third year of German focuses on four primary linguistic skills: comprehension, reading, writing and speaking. Development in each of these areas is achieved through the introduction, consideration, and analysis of longer German stories, increasingly complex discussions of said texts, and the review, and hopefully ultimate mastery, of various vocabularies and advanced-level grammar. Ample time will be devoted to speaking and developing oral proficiency in class as well. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 202 | ADVANCED GERMAN II: READING THE FOREIGN/FOREIGN READING | 4 quarter hours  
(Undergraduate)  
The third year of German continues strengthening four primary linguistic skills: comprehension, reading, writing and speaking. The main goal is oral proficiency. Ample time will be devoted to speaking and developing oral proficiency in class as well. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 203 | ADVANCED GERMAN III: THE UNCANNY AND THE SELF | 4 quarter hours  
(Undergraduate)  
The third year of German continues strengthening four primary linguistic skills: comprehension, reading, writing and speaking. The main goal is oral proficiency. Ample time will be devoted to speaking and developing oral proficiency in class as well. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 272E | WORKING THROUGH THE PAST: MEMORY AND MEMORIAL IN GERMANY AND THE U.S. | 4 quarter hours  
(Undergraduate)  
TAUGHT IN ENGLISH. How does a shattered nation come to terms with its past? Recent events in the U.S. have revealed the depth of our societal divides, especially in the debate over memory and memorials. But these are not uniquely American questions: other places have navigated a reckoning with their own traumatic pasts. Philosopher Susan Neiman, author of “Learning from the Germans: Race and the Memory of Evil,” calls Germany’s relationship to its history “grown up.” The German project of “coming to terms with the past”?that is, the decades-long process of confronting its record of Nazism and working through the trauma of the Holocaust?reflects this “grown up” relationship to history, one that integrates the question of guilt and responsibility into the national story. This process, while always unfinished, has helped Germany reshape its identity to become what it is today: a harbor for refugees, a global leader in green energy, and a model social welfare and educational system. In this course, we’ll learn about Germany’s process of coming to terms with the past?what it consists of, how it was initiated, and how it informs Germans’ self-understanding today?and ask, how can a country acknowledge its guilt while also building its future? How do individual Germans incorporate the idea of collective guilt into their understanding of themselves? What kinds of people and events has Germany chosen to remember in monuments and memorials? And what kind of work remains to be done in Germany in relation to its history? In short: what can we learn from the Germans about coming to terms with the American past? Note to German students: this course is taught in English and does not replicate the content of GER 201.

GER 274E | REVOLUTION ON THE STAGE: BERLIN, EPIC THEATER, AND THE 20TH CENTURY | 4 quarter hours  
(Undergraduate)  
This video-based course is designed to develop and expand skills in German and explore ideas, cultural topics and themes from the German-speaking world. Course activities will include: learning from authentic video clips and films; visiting (in textbook and video) various cities and regions in the German-speaking world, exploring the variety and the similarities; practicing skills in German by discussing cultural issues and authentic readings; interpreting graphics and charts on topics of German culture; structured listening and writing practice; reading literary and nonliterary texts of increasing difficulty; summarizing verbally and in writing what is read, heard, and learned; writing compositions and short texts of various types; researching a topic; preparing and presenting results to the class (oral and written). GER 105 or equivalent, including placement test or permission of instructor, is recommended.

GER 274E | REVOLUTION ON THE STAGE: BERLIN, EPIC THEATER, AND THE 20TH CENTURY | 4 quarter hours  
(Undergraduate)  
TAUGHT IN ENGLISH. One of the most influential thinkers of the twentieth century, the revolutionary Marxist playwright Bertolt Brecht was witness to the crises that defined his age: the First and Second World Wars, the postwar division of Germany into East and West, and more personally, his own exile in the U.S. during the Nazi regime. Brecht criticized the changing face of Europe and the world in his writing, and his ideas about war and pacifism, capitalism, religion, fascism, inequality, and exile feel remarkably relevant today. In this course, we’ll think about those ideas as we learn about Brecht’s radical transformation of the stage, manifested in the theory of Epic Theater and the “Alienation/ Estrangement Effect.” two concepts that promoted critical distance and political awareness in the theater instead of the traditional focus on identification and catharsis. Berlin was highly progressive and experimental in the “Golden Twenties,” and we’ll also discuss the artistic, political, and social milieu there that informed Brecht’s activist art: his work is characterized by collaborations with artists and musicians, and many of his plays feature musical pieces informed by jazz and the cabaret. We’ll consider Brecht in exile, too, and think about the ways that his experiences as a displaced person shaped his writing and relate to current discussions about borders and belonging. Finally, we’ll explore the question of Brecht’s continued relevance and why his ideas still resonate with contemporary audiences. To that end, this course will include viewings and excursions, including visits to theaters and concert venues for live performances when possible.

GER 274E | REVOLUTION ON THE STAGE: BERLIN, EPIC THEATER, AND THE 20TH CENTURY | 4 quarter hours  
(Undergraduate)  
TAUGHT IN ENGLISH. One of the most influential thinkers of the twentieth century, the revolutionary Marxist playwright Bertolt Brecht was witness to the crises that defined his age: the First and Second World Wars, the postwar division of Germany into East and West, and more personally, his own exile in the U.S. during the Nazi regime. Brecht criticized the changing face of Europe and the world in his writing, and his ideas about war and pacifism, capitalism, religion, fascism, inequality, and exile feel remarkably relevant today. In this course, we’ll think about those ideas as we learn about Brecht’s radical transformation of the stage, manifested in the theory of Epic Theater and the "Alienation/ Estrangement Effect." two concepts that promoted critical distance and political awareness in the theater instead of the traditional focus on identification and catharsis. Berlin was highly progressive and experimental in the "Golden Twenties," and we'll also discuss the artistic, political, and social milieu there that informed Brecht’s activist art: his work is characterized by collaborations with artists and musicians, and many of his plays feature musical pieces informed by jazz and the cabaret. We'll consider Brecht in exile, too, and think about the ways that his experiences as a displaced person shaped his writing and relate to current discussions about borders and belonging. Finally, we'll explore the question of Brecht's continued relevance and why his ideas still resonate with contemporary audiences. To that end, this course will include viewings and excursions, including visits to theaters and concert venues for live performances when possible.
GER 275 | EXORCISM, MESMERISM, PSYCHOANALYSIS: THE GERMAN UNCONSCIOUS MIND | 4 quarter hours  
(Undergraduate)

This course is taught in English. Using the wrong word while speaking or writing, jokes, free association, dreams, listening to regressed patients? on the couch,? all of which are deeply rooted in specific cultural times and places?these are the traditional means for exposing and learning about the workings of the unconscious mind, considered by Freudian psychoanalysis to be the repository of instincually driven thoughts, fantasies, and inclinations that put individual people in conflict with societal expectations. This course examines closely those means and the conclusions drawn from them by Sigmund Freud and his followers. The course also gives consideration to the work of two important early but unwitting experimentations with the unconscious?demonic exorcism as practiced by German priest Johann Joseph Gassner and ?magnetic sleep? (now seen as a precursor to hypnosis) as practiced by Austrian physician Franz Anton Mesmer. This appraisal will allow us to debate the thesis of whether an engagement with the unconscious mind results in new or re-conceptualizations of the individual by societal institutions such as the church and mainstream medicine, so that the formerly chronically ill are by turns seen to be possessed, in need of redistribution of ?magnetic fluid,? neurotic, hysterical, or simply understood to be children within adults. We conclude by reviewing the psychoanalytic tool and human faculty of Einfuhlung, or empathy, which, rather than just meaning feeling sorry for another person, is used clinically to perceive through feeling and sensation what another person feels without necessarily having had even remotely similar experiences. Freud borrowed this idea from Romantic-era theories and methods for translating literature.

GER 276E | GREEN GERMANY: NATURE AND THE GERMAN MIND | 4 quarter hours  
(Undergraduate)

TAUGHT IN ENGLISH. For decades, Germany has been considered an environmental trailblazer: it’s a leader in developing sustainable and renewable energies; politically, its Green Party is ascendant, with real representation in the German parliament; and as of 2019, half of Germany’s energy came from renewable sources. In many ways, green technologies are affordable options for individual consumers around the world because of the investments made by Germany in the 1990s and early 2000s. How has Germany managed to create an energy policy that other countries, including the U.S., have failed to attain? This course attempts to answer this question by first considering the German relationship to nature and how it changed over time: from the earliest Germanic tribes and their ancient nature worship; to the German Romantics and their conception of nature as something overpowering and sublime; to Nazi Germany, where nature became associated with ideas of race and belonging; and finally, to today’s German brand of environmentalism, which perceives nature as an endangered thing to be conserved and protected. We’ll look at these phases through the perspective of thinkers and scientists who influenced the place of science in the world, including Alexander von Humboldt, Johann Wolfgang von Goethe, and Albert Einstein. This will give us an idea of the cultural context from which Germany approaches nature and the environment today, so that we can understand why it has been compelled to move toward a more sustainable future. Finally, we’ll connect these ideas to real-life experiences: we’ll speak and meet with representatives from “green” German companies here in Chicago in order to better understand the science and technology behind “Green Germany” now.

GER 277E | COFFEEHOUSES AND CULTURE IN TURN OF THE CENTURY VIENNA | 4 quarter hours  
(Undergraduate)

TAUGHT IN ENGLISH. Vienna around 1900 was the setting for major innovations in the arts, literature, sciences, and philosophy, and the developments that emerged from this time and place shaped 20th century thought and culture. Central to the rich intellectual life in turn of the century Vienna was the Viennese coffeehouse, a place that encouraged the exchange of ideas and served as a spatial extension of the private sphere. Using the coffeehouse as a kind of experiential environment, this course will look at the ideas that emerged from the cafe interiors of Vienna 1900: Freud’s theories of the unconscious, dreams, and (female) hysteria; the artworks of Gustav Klimt and the Viennese Secessionists; the “Young Vienna” literary circle; the new musical language of Arnold Schonberg; and the radicalism of modernist architecture. Further, we’ll discuss spatial and sociological theories of coffeehouse culture and consider the function that coffeehouses serve today in Vienna and in Chicago, too. This course includes several excursions (for example, to Ipsento and Metropolis coffeehouses for a “Coffee 101” class, coffee tastings and roasterie tours, as well as to the Art Institute and the Chicago Symphony Orchestra/Lyric Opera).

GER 278E | MAKING GRIMMS’ FAIRY TALES | 4 quarter hours  
(Undergraduate)

TAUGHT IN ENGLISH. Fairy tales spark our imaginations and inspire great artists in a variety of mediums from around the world, whether in commercial format like Disney or in illustrations that speak to sides of human nature that can make us uncomfortable. Of these tales, Grimms’ Children’s and Household Tales (known to us today as “Grimms’ Fairy Tales”) are some of the most powerful for how they use predictable narrative outcomes to give space to conflicts of power, gender, generational difference, and class. This course takes on all these issues while reading in English translation all 156 tales in the original edition of the fairytale collection. People who think they know these stories are in for a wild ride (for starters, they were originally never intended for children) as we peel back the layers of meaning in the tales and consider how and why the Grimm Brothers turned the stories they collected into now-familiar fairy tales: a process which may have originated in dedication to German nature and nation, but has been seen by some as a harbinger of Nazi fascism.

GER 297 | SPECIAL TOPICS IN GERMAN | 4 quarter hours  
(Undergraduate)

See schedule for current offerings.

GER 298 | STUDY ABROAD | 1-8 quarter hours  
(Undergraduate)

Variable credit.

GER 299 | INDEPENDENT STUDY | 0.5-8 quarter hours  
(Undergraduate)

Variable credit.
GER 301 | ORIGINS OF THE GERMAN LANGUAGE TO 1600 | 4 quarter hours
(Undergraduate)
The modern understanding of the German nation has its origins in a number of tribes that emerged from southern Scandinavia and northern Germany before the Common Era. This course will trace the development of "Germany" (a term that was not commonly used until the 1500s) in the Medieval period and into the 16th century, when Martin Luther and his 95 Theses initiated the movement that would later be known as the Protestant Reformation. In the exploration of this history, and of the evolution of the German language, students will read representative works of literature which will question the category of literature altogether. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 302 | PLAY, PERSONALITY, AND POLITICS IN SCHILLER'S LETTERS ON ART | 4 quarter hours
(Undergraduate)
Dramatist, playwright, and critic Friedrich Schiller used publicly published letters to experiment with and articulate his understanding of the value and function of art in the ordinary lives of human beings. His minute examination led him to grand claims that range widely beyond art in the narrow sense. This course traces three of them while reading the entirety of the letters and considering the impact of the medium he used in his thinking—letters ostensibly written to one person but made available to a wider public. In so doing we'll investigate the claim that play, personality, and politics result in and extend from a type of coherence that has its origin in early life. Schiller writes that human beings only play when being human "in the fullest sense of the word," a statement which points us toward the role of art as a process of amplification, or something that "makes full." GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 304 | WORD-SCRIPT-STAGE-WORLD: DAS THEATER | 4 quarter hours
(Undergraduate)
This course is designed to familiarize students with some of the outstanding dramas written in German speaking countries during the last half century. Students will explore dramas that ignited hot public debates on account of their weighty topics, science and ethics, or science as power, more precisely, political power: "What do scientific discoverers do when they feel responsibility towards the world?" Towards the end of the 20th century, and with the rise of critical feminist thought, the fierce satirical drama of the Nobel Prize winning Austrian playwright Elfriede Jelinek on science, and the power games of gender garners attention. Her satirical drama of the Nobel Prize winning Austrian playwright Elfriede Jelinek on science, and the power games of gender garners attention. His minute examination led him to grand claims that range widely beyond art in the narrow sense. This course traces three of them while reading the entirety of the letters and considering the impact of the medium he used in his thinking—letters ostensibly written to one person but made available to a wider public. In so doing we'll investigate the claim that play, personality, and politics result in and extend from a type of coherence that has its origin in early life. Schiller writes that human beings only play when being human "in the fullest sense of the word," a statement which points us toward the role of art as a process of amplification, or something that "makes full." GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 305 | COMPOSING REALITY: WRITING IN GERMAN | 4 quarter hours
(Undergraduate)
Topics include: prose from 1600 to Goethe; from the Romantic to the Realistic periods; prose of the 20th century. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 306 | THE NOVELLE | 4 quarter hours
(Undergraduate)
From Goethe to Grass. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 307 | FROM SOUND TO STRUCTURE: GERMAN POETRY | 4 quarter hours
(Undergraduate)
Instead of treating poems as potentially boring puzzles that can only be solved with some piece of arcane knowledge not available to average people, this course approaches the history of poems written in German by focusing on the various tools available to poets. What if sound (the sound of individual words but also the cumulative sound, including tone, which words make when put in a certain order) were more important than meaning or expression? What if lines, rather than sentences, made for a more reliable unit of composition? What if metaphor and simile actually created relationships between different things rather than those relationships existing prior to the poem? Students will be expected to experiment with these techniques themselves, and we will use our focus on those techniques as a constant that takes us through the periods comprising literary history in German-speaking countries. The variety of these periods, taken together, should serve to keep the subject matter lively. Even if the materials sacrifice depth for breadth, the course will reserve time for such luminaries as the Minnesingers, Holderlin, Goethe & Schiller, Trakl, Rilke, Brecht, Bachmann, and others, while touching on occasional oddballs like Heinz Herbeck and contemporaries such as Monika Rinck and Nora Gomringer. The aims of this course are to be better able to experience poems rather than decode them, and to situate them in their literary classification.

GER 308 | GOETHE AND HIS ERA | 4 quarter hours
(Undergraduate)
This course explores one of the great, canonical works of German literature, Goethe's peculiar and provocative interpretation of the legendary figure of Dr. Faustus. By spending an entire quarter with this one text, students have time to gain a thorough appreciation for its depth, complexity, and poetic excellence. Classroom discussions will focus in part on a close reading of the text in its various dimensions: characterization, motivation, plot-structure and plot-development, poetic form (meter and rhyme), and poetic imagery (metaphors, similes, etc.). Students will also examine the philosophical questions raised by Faust and Mephisto's rich and probing dialogues and also consider the larger cultural and historical significance of Goethe's Faust. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 311 | BREAKING NEWS IN THE GERMAN-SPEAKING WORLD | 4 quarter hours
(Undergraduate)
This course examines the many facets of contemporary Germany and Austria via five focused two week units: Politics; Business and the Environment; Film and Culture; Literature; and Communication/Social Media. We'll engage with several German-language media (internet, television, film, print) to understand the happenings of the German-speaking world in the present day. Moreover, the course includes several outings and/or events that will expose us to German-related happenings in Chicago. These will generate further, comparative discussions about representations of contemporary Germany and Austria in the U.S. GER 106 or equivalent, including placement test or permission of instructor, is recommended.
This course is designed to introduce the student to some of the most powerful and influential German thinkers in Western civilization of the 19th and 20th century, whose names are synonymous with revolutionary thinking, and whose philosophies have deeply shaped the Weltanschauung of 20th century man. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 313 | TURN OF THE CENTURY VIENNA | 4 quarter hours
(Undergraduate)
A world center of modern art and thought: Freud, Wittgenstein, Klimt, Kokoschka, Kafka, Shoenberg. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 314 | BERLIN AND THE GOLDEN TWENTIES | 4 quarter hours
(Undergraduate)
Berlin in the 1920s was an exhilarating, modern city marked by contrasts: the trauma of returning soldiers and the decadence of the modern metropolis; an ever-growing tension between liberalism and what would become an increasingly radical political right; and the emergence of the progressive Weimar Republic, which was characterized by periodic political turmoil and economic instability. These “Golden Twenties” also gave rise to cultural innovations in the arts, film, theater, literature, music, philosophy, architecture, social sciences, and technology. Berlin was at the center of it all. In this course, we’ll explore some of the major filmmakers, writers, artists, and musicians in this great metropolis of the early twentieth century as we consider the political conflicts that plagued Germany's young democracy. We’ll also discuss how Weimar-era Berlin has been depicted in film and television, with the miniseries “Babylon Berlin” (2017) functioning as a kind of foundational thread that we’ll return to throughout the quarter. Finally, we’ll think about what led to the collapse of the Weimar Republic and the resemblances this period may bear to our current political era. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 315 | LITERATURE AFTER 1945 (EAST AND WEST) | 4 quarter hours
(Undergraduate)
Reconstruction of German literature and coming to terms with the past: “Gruppe 47”, Grass, Boell, Enzensberger. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 317 | WOMEN WRITERS OF GERMAN EXPRESSION | 4 quarter hours
(Undergraduate)
Studies in literature and social issues from all periods of German, Austrian and Swiss history. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 318 | THE CONTEMPORARY GERMAN FILM | 4 quarter hours
(Undergraduate)
In this course, we’ll take a look at ten German-language films released since 2010, which are diverse in both genre and theme: German comedies; indie and art house films; popular movies; period films; and dramatic films that speak to Germany’s multicultural identity and the current European refugee crisis. We’ll also discuss some of the most influential filmmakers working in German-language cinema today, which run the gamut from relative newcomers to established auteurs: Margarethe von Trotta, Florian Henckel von Donnersmarck, Christian Petzold, Fatih Akin, Markus Schleinzer, and Maren Ade, among others. Above all else, we’ll consider the ways these works speak to German and Austrian identities, and how they reflect contemporary discussions and debates in the German-speaking world. Completion of GER 106 or equivalent is recommended.

GER 319 | MULTICULTURAL GERMANY: LITERATURE, FILM, FOOD, CULTURE | 4 quarter hours
(Undergraduate)
This course asks students to consider how a variety of cultural products—film, literature, theater, food, etc.—communicate and interpret experiences relevant to migrants in Germany, particularly in Berlin. We’ll consider the migrant and refugee experience in Germany over the past several centuries, focusing on postwar-era questions of identity and belonging, and most immediately, the influx of refugees to Germany from Syria, Afghanistan, and Iraq that spiked in 2015/16. By engaging with texts, films, and other cultural products created by members of these groups, students will be encouraged to think critically about representations of refugees and immigrants in media and discourse. To consider, for example, how even the contemporary labeling of refugees in Europe as a “crisis” generates a certain kind of response. The course will end with a look toward the future of multiculturalism in Germany and consider the possibility of a pan-European multicultural literature and film.

GER 320 | ADVANCED COMMERCIAL GERMAN | 4 quarter hours
(Undergraduate)
This course will approach the concept of Geschäftsdeutsch on two levels: first with an examination of Germany, Austria, the European Union, and the German industry and economy, and second, with an exploration of the German professional world (i.e. the processes involved in searching, applying, and interviewing for an internship or employment in a German speaking country). Students will practice in class through role playing, skits, writing example letters, resumes, and CVs, etc. A number of guest speakers from the German business community in Chicago are possible. GER 106 or equivalent, including placement test or permission of instructor, is recommended.
